personnel security investigations. Records in the system are used to document and support decisions regarding the suitability, eligibility, and fitness of applicants for federal and contract employment to include: Students, interns, or volunteers to the extent that their duties require access to federal facilities, information, systems, or applications. Additionally, records may be used to document security violations, and supervisory actions taken. Information contained in PerSIST includes but is not limited to: Employment records, education history, credit history, subjects' previous addresses, names of friends, neighbors, and associates, selective service records, military history, citizenship, pre-employment waivers, Background Investigations (BI's), security clearances, Sensitive Compartmented Information (SCI) access, clearance receipts (reciprocity), reinvestigations, completion dates of various security checks, and adjudication status/notes and decisions.

SUPPLEMENTARY INFORMATION: HUD is decommissioning its' legacy system of records titled Personnel Security Files (PSF) and replacing it with the Personnel Security Integrated Tracking System (PerSIST). PSF is an access based system that HUD has been utilizing since 2006. It requires manual processing and offers limited capabilities for data collection, file storage, file tracking, and file retrievals. The PSF system also lacks many capabilities needed to support HUD background security investigations such as multi-user access, workflow definition, workflow tracking, and the ability to interface with interagency systems such as the Office of Personnel Management Electronic Questionnaires for Investigations Processing (e-QIP) and Personnel Investigations Processing System (PIPS).

PII collected in PerSIST will remain consistent with data categories collected in PSF however, PerSIST reduces errors associated with manual entries, streamlines front-end/back-end data collection, offers the advance capabilities, takes advantage of the latest tools and technologies, and supports data exchange with both internal and external agency systems. PerSIST will allow HUD to realize process improvements, efficiencies and acquire the ability to capture data related to all aspects of pre-appointments, suitability determinations, and security clearance processing.

Additionally, PerSIST has the ability to leverage and share information with existing HUD systems and directly support these functions.
