

received a total of 94 public comments. Issues most frequently cited in public comments on the notice included:

- The potential for the genetically engineered CTV to change over time and the potential for recombination with other viruses;
- Impacts to non-target species;
- The potential for defensin proteins to be found in areas other than the phloem of the plant;
- The potential for the genetically engineered CTV to become more transmissible;
- The impacts to organic citrus growers; and
- Health and safety concerns.

The issues discussed in the draft EIS were developed by considering the public input from the **Federal Register** notice announcing the intention to draft an EIS. APHIS evaluated these issues to analyze the potential environmental impacts of CTV and included a discussion of these issues in the draft EIS.

Therefore, in accordance with NEPA, APHIS' NEPA Implementing Procedures (7 CFR part 372), and 7 CFR part 340, APHIS is making available the draft EIS, as well as a preliminary pest risk assessment (PRA), for a 45 day public review and comment period. The draft EIS and preliminary PRA are available as indicated under **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** above.

A notice of availability regarding the draft EIS was also published by the Environmental Protection Agency in the **Federal Register** on May 11, 2018 (82 FR 22060, Docket No. ER-FRL-9039-3).

Done in Washington, DC, this 11th day of May 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
