SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Food and Cosmetic Export Certificate Application Process

OMB Control Number 0910-0793—Revision

This information collection supports FDA's Center for Food Safety and Applied Nutrition's (CFSAN) export certificate application process. Some countries may require manufacturers of FDA-regulated products to provide certificates for products they wish to export to that country. Accordingly, firms exporting products from the United States often ask FDA to provide such a "certificate." In many cases, foreign governments are seeking official assurance that products exported to their countries can be marketed in the United States, or that they meet specific U.S. requirements. In some cases, review of an FDA export certificate may be required as part of the process to register or import a product into another country. An export certificate generally indicates that the particular product is marketed in the United States or otherwise eligible for export and that the particular manufacturer has no unresolved enforcement actions pending before, or taken by, FDA.

Interested persons may request a certificate from CFSAN electronically via the Certificate Application Process (CAP), a component of FDA Industry Systems, or by contacting CFSAN for assistance. To facilitate the application process we have eliminated paper-based forms. For food products, we have

expanded the electronic options for providing facility and product information. Respondents will now be able to identify facilities based on a food facility registration number, FDA Establishment Identification number, or Data Universal Numbering System number. The system uses these identifiers to locate and auto-populate name and address information, eliminating the need for users to manually enter this information and reducing the time to complete the application. Respondents can also upload product information via a spreadsheet, which reduces the time needed to enter product information, particularly for applications that include multiple products. All information is entered using electronic Forms FDA 3613d, 3613e, 3613g, and 3613l and used to evaluate certificate requests.

While burden associated with information collection activities for export certificates issued for other FDA-regulated products is approved under OMB control number 0910-0498, this collection specifically supports export certificates issued by CFSAN. Also, because we have eliminated paper-based forms, respondents who require assistance with completing export certificate applications online may contact CFSAN directly by email (CFSANExportCertification@fda.hhs.gov) or telephone (240-402-2307). Instructions for Form FDA 3613d are available online at <https://www.fda.gov/cosmetics/internationalactivities/exporters/ucm353912.htm> and instructions for Form FDA 3613e are available online at <https://www.fda.gov/Food/GuidanceRegulation/ImportsExports/Exporting/ucm260280.htm>. Draft screenshots of Form FDA 3613g and 3613l are available for comment online at <https://www.fda.gov/Food/GuidanceRegulation/ImportsExports/Exporting/default.htm>.

Description of Respondents: The respondents to this collection of information are firms interested in exporting U.S.-manufactured food and cosmetic products to foreign countries that require export certificates.

In the **Federal Register** of January 2, 2018 (83 FR 133), we published a notice soliciting public comment of the information collection. Two comments were received in support of the information collection. One comment included technical suggestions as well regarding respondents' ability to review and edit data that might have been entered improperly. We appreciate this comment and continue to seek ways to utilize improved information collection
