General Description of Collection: The supplementary leverage ratio regulations strengthen the definition of total leverage exposure and improve the measure of a banking organization's on- and off-balance sheet exposures. The rules are generally consistent with the Basel Committee on Banking Supervision's 2014 revisions and promote consistency in the calculation of this ratio across jurisdictions. All banking organizations that are subject to the advanced approaches risk-based capital rules⁴ are required to disclose their supplementary leverage ratios.⁵ Advanced approaches banking organizations must report their supplementary leverage ratios on the applicable regulatory reports. The calculation and disclosure requirements for the supplementary leverage ratio in the federal banking agencies' regulatory capital rules are generally consistent with international standards published by the Basel Committee on Banking Supervision. These disclosures enhance the transparency and consistency of reporting requirements for the supplementary leverage ratio by all internationally active organizations.
