Endangered Species; Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications to conduct certain activities with endangered species. With some exceptions, the Endangered Species Act (ESA) prohibits activities with listed species unless a Federal permit is issued that allows such activities. The ESA requires that we invite public comment before issuing these permits.

DATES: We must receive written data or comments on the applications at the address given in **ADDRESSES** by July 6, 2018.

ADDRESSES:

Reviewing Documents: Documents and other information submitted with the applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act. Submit a request for a copy of such documents to Karen Marlowe, 404-679-7097 (telephone) or 404-679-7081 (fax); karen_marlowe@fws.gov.

Submitting Comments: If you wish to comment, you may submit comments by any one of the following methods:

- *U.S. mail or hand-delivery:* U.S. Fish and Wildlife Service Regional Office, Ecological Services, 1875 Century Boulevard, Atlanta, GA 30345 (Attn: Karen Marlowe, Permit Coordinator).

- *Email:* permitsR4ES@fws.gov. Please include your name and return address in your email message. If you do not receive a confirmation from the U.S. Fish and Wildlife Service that we have

received your email message, contact us directly at the telephone number listed in **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT:

Karen Marlowe, Permit Coordinator, 404-679-7097 (telephone) or 404-679-7081 (fax).

SUPPLEMENTARY INFORMATION: We invite review and comment from local, State, and Federal agencies and the public on applications we have received for permits to conduct certain activities with endangered and threatened species under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17. With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activities. The ESA's definition of "take" includes hunting, shooting, harming, wounding, or killing and also such activities as pursuing, harassing, trapping, capturing, or collecting.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species,

and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild. The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and

recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Two Low-Effect Habitat Conservation Plans and Categorical Exclusions for Pacific Gas and Electric Company Gas Pipeline Vegetation Management, Santa Cruz and Monterey Counties, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received two applications from Pacific Gas and Electric Company for two 20-year incidental take permits under the Endangered Species Act of 1973, as amended (ESA). The applications address the potential for “take” of the federally endangered Mount Hermon June beetle and Santa Cruz long-toed salamander, as well as the federally threatened California red-legged frog, that is likely to occur incidental to the removal of vegetation along two natural gas pipelines that traverse Santa Cruz and Monterey Counties, California. We invite comments from the public on the application packages, which include two low-effect habitat conservation plans.

DATES: To ensure consideration, please send your written comments by July 6, 2018.

ADDRESSES:

Obtaining Documents: You may download copies of the habitat conservation plans, draft environmental action statements, low-effect screening forms, and related documents on the internet at <http://www.fws.gov/ventura/>, or you may request copies by U.S. mail to our Ventura office (below) or by phone (see **FOR FURTHER INFORMATION CONTACT**).

Submitting Comments: Please address written comments to Stephen P. Henry, Field Supervisor, Ventura Fish and Wildlife Office, U.S. Fish and Wildlife Service, 2493 Portola Road, Suite B, Ventura, CA 93003. You alternatively may send comments by facsimile to (805) 644-3958.

FOR FURTHER INFORMATION CONTACT: Chad Mitcham, Fish and Wildlife Biologist, by U.S. mail to the Ventura office, or by telephone at (805) 677-3328.

SUPPLEMENTARY INFORMATION: We have received two applications from Pacific Gas and Electric Company (PG&E) for two 20-year incidental take permits (ITPs) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applications address the potential for “take” of the federally endangered Mount Hermon June beetle (*Polyphylla barbata*) and Santa Cruz long-toed salamander (*Ambystoma macrodactylum croceum*), and the federally threatened California red-legged frog (*Rana draytonii*) likely to occur incidental to the initial removal and ongoing periodic management of vegetation that occurs over and along two separate natural gas pipelines. The first proposed habitat conservation plan (HCP), referred to in this document as the Sandhills HCP, concerns the natural gas pipeline located along Graham Hill Road, Santa Cruz County, California, and occurs within habitat for the Mount Hermon June beetle. The second HCP, referred to as the North Coast HCP, concerns a natural gas pipeline that traverses portions of Santa Cruz and

Monterey Counties and occurs within habitat of the Santa Cruz long-toed salamander and California red-legged frog. We invite comments from the public on the application packages, which include two proposed low-effect HCPs. The proposed actions have been determined to be eligible for categorical exclusions under the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*), as amended.

Background

Section 9 of the ESA and its implementing regulations prohibit the take of fish or wildlife species listed as endangered or threatened. “Take” is defined under the ESA to include the following activities: “to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct” (16 U.S.C. 1532); however, under section 10(a)(1)(B) of the ESA, we may issue permits to authorize incidental take of listed species. “Incidental Take” is defined as take that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity (50 CFR 17.3). Regulations governing incidental take permits for threatened and endangered species are provided at 50 CFR 17.32 and 17.22, respectively. Issuance of an incidental take permit must not jeopardize the existence of federally listed fish, wildlife, or plant species.

Applicant’s Proposal

PG&E (hereafter, the applicant) has submitted two low-effect HCPs in support of their applications for incidental take permits (ITPs) to address take of the Mount Hermon June beetle, Santa Cruz long-toed salamander, and the California red-legged frog. The Sandhills HCP addresses take of the Mount Hermon June beetle that is likely to occur as the result of direct impacts on up to 2.9 acres (ac) of habitat that is occupied by the species. The North
