

paper is attached to the docket for this FRV notice.

As suggested by the 2/27/18 joint EPA-State paper written to identify improvements to the display, usability, and accuracy of ECHO, we are asking commenters, if they would like, to indicate a preference for one of the three FRV date reporting options agencies may choose to display on ECHO: 1a. *FRV Determination Date and Case File Resolved Date*; 1b. *Violation Occurrence Start Date and Occurrence End Date*; 2. *FRV Determination Date*. Option 1a would require the linking of formal enforcement actions to the case file, and in the absence of formal enforcement action, the entry of *Resolving Action Type and Date*. Option 1b would add two data elements to the minimum data requirements. Option 2 continues the status quo in which the FRV Determination Date is either reported voluntarily by the agency or auto-generated by ICIS-Air to match the date on which the agency submitted the FRV data to ICIS-Air.

The EPA-State paper expressed the authors' belief that EPA's ECHO could better display CAA violations if FRV dates are consistently reported. Several members of the workgroup that created the paper expressed the view that EPA should select an approach for FRV date reporting and request the entry of the necessary data, via this ICR renewal process. EPA encourages you to share the views of your organization on this topic.

EPA currently intends to continue the status quo with respect to the minimum data requirements associated with reporting FRVs. However, EPA is open to changing its viewpoint based upon the feedback received from stakeholders in response to this **Federal Register** notice.

Respondents: State, Local, Territorial, Indian Nations, and Commonwealth governments.

Respondent's obligation to respond: Mandatory, see Section 114(a)(1) of the Clean Air Act, 42 U.S.C. Section 7414(a)(1).

Estimated number of respondents: 99.
Frequency of response: Every 60 days.
Annual estimated burden: 51,413 hours.

Annual estimated cost: \$2,688,901. There are no annualized capital/startup or operations & maintenance costs.

Changes in Estimates: When developing the previous ICR, ICIS-Air was not yet implemented in a production environment and EPA estimated burden to the best of its ability based on the Agency's knowledge of ICIS-Air. At that time, EPA believed that states and locals, as

a whole, would experience a reduction in reporting burden due to the ease of reporting to ICIS-Air, a modern and more robust information system. For this ICR renewal, EPA will use experience from the last three years to provide burden estimates that adequately reflect the actual burden. EPA will consider any comment received and will conduct consultation with delegated agencies that are direct users of ICIS-Air, as well as those using EDT to report MDRs. Since ICIS-Air is a relatively new platform, the estimates provided are likely to change.

Dated: May 23, 2018.

Randolph L. Hill,

Director, Enforcement Targeting & Data Division, Office of Compliance.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9978-85—Region 10]

Extension of Comment Period for Proposed Issuance of NPDES General Permit for Hydroelectric Facilities Within the State of Idaho (IDG360000)

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed issuance of NPDES General Permit; extension of comment period.

SUMMARY: The Environmental Protection Agency (EPA) Region 10 is extending the comment period for the proposed issuance of a National Pollutant Discharge Elimination System (NPDES) General Permit for Hydroelectric Facilities discharging to waters within the State of Idaho (Permit No. IDG360000). The agency is extending the comment period for 30 days in response to requests from Idaho Power Co. and Utility Water Act Group.

DATES: The comment period for the proposed General Permit published in the **Federal Register** on April 27, 2018 (83 FR 18555) is being extended. Comments must be received on or before July 11, 2018.

ADDRESSES: Submit your comments on the draft General Permit to Director, Office of Water and Watersheds, USEPA Region 10, 1200 Sixth Avenue, Suite 155, OWW-191, Seattle, WA 98101. Your comments may also be submitted by fax to (206) 553-1280 or electronically to keenan.dru@epa.gov.

Comments on the draft 401 Certification should be sent to Loren Moore, Idaho Department of Environmental Quality, 1410 N Hilton,

Boise, Idaho 83706 or electronically to Loren.Moore@deq.idaho.gov.

FOR FURTHER INFORMATION CONTACT: Dru Keenan, 206-553-1219, Keenan.Dru@epa.gov.

SUPPLEMENTARY INFORMATION: On April 27, 2018 (83 FR 18555), the EPA Region 10 published the proposed general NPDES permit for hydroelectric facilities located in Idaho in the **Federal Register**. The original deadline to submit comments was June 11, 2018. This action extends the comment period for 30 days. Written comments must now be received on or before July 11, 2018.

Permit documents may be found on the EPA Region 10 website at: <https://www.epa.gov/npdes-permits/draft-mpdes-general-permit-hydroelectric-generating-facilities-idaho>. Copies of the draft General Permit and Fact Sheet are also available upon request. Requests may be made to Audrey Washington at (206) 553-0523 or to Dru Keenan at (206) 553-1219. Requests may also be electronically mailed to: Washington.audrey@epa.gov, or keenan.dru@epa.gov.

Dated: May 22, 2018.

Daniel D. Opalski,

Director, Office of Water and Watersheds, Region 10.
