

classes across the landscape which would decrease the susceptibility of large scale mountain pine beetle outbreaks. Treatments proposed within the Browns Mountain Late Successional Reserve (LSR) are designed to accelerate the development of large trees and reduce stand densities which would reduce the risk of a stand to fire, insects and disease. No commercial treatments are proposed in Northern spotted owl (NSO) high quality habitat nor within activity centers or within high value habitat within LSR. Ladder fuel reduction treatments proposed in high value NSO habitat (approximately 920 acres) would affect the lowest canopy layer and stands would remain overstocked and above the upper management zone density.

To meet the need to improve fire management opportunities and provide for public and firefighter safety, this project proposes to treat approximately 16,800 acres of treatment to meet hazardous fuels reduction objectives.

The Twin projects also proposes to:

- Rehab dispersed sites that are causing resource damage;
- enhance spawning gravel, address boat ramp erosion and improve accessible trails;
- establish a buffer between developed and dispersed campsites;
- remove trees showing signs of future failure within developed sites; and
- close and decommissioning system roads and decommission user-created roads.

Responsible Official

The responsible official will be Kevin Larkin, District Ranger, Bend-Fort Rock Ranger District.

Nature of Decision To Be Made

The responsible official will consider how the proposed action meets the project's purpose and need, how public comments have been considered, and what the short and long term effects and benefits are to other resource areas.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the EIS. Public comments regarding this proposal are requested in order to assist in identifying issues and opportunities associated with the proposal, how to best manage resources, and to focus the analysis. Those wishing to object must meet the requirements at 36 CFR 218.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the EIS. Therefore, comments should be provided prior to the close of the comment period and should clearly

articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered.

Dated: May 9, 2018.

Chris French,

Associate Deputy Chief, National Forest System.
