Overview of This Information Collection

1. *Type of Information Collection:* Revision of a currently approved collection.

2. *Title of the Form/Collection:* The National Forensic Laboratory Information System Collection of Drug Analysis Data.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Medical Examiner/Coroner Office Survey; National Forensic Laboratory Information System Drug Survey of Drug Laboratories; and Toxicology Laboratory Survey for the component within the Department of Justice is the Drug Enforcement Administration, Diversion Control Division.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected public (Primary): Forensic Science Laboratory Management.

Abstract: The National Forensic Laboratory Information System (NFLIS) collections provide the DEA with national databases on analyzed drug samples from law enforcement activities, antemortem toxicology samples (toxicology laboratories), and post-mortem toxicology samples (medical examiner/coroner offices (MECs) from federal, state, and local laboratories. Specifically, NFLIS-Drug data provide DEA current, precise, and representative estimates of drugs seized by law enforcement and analyzed by forensic laboratories. Since 2001, DEA has had case and drug report estimates for all drugs reported in NFLIS that are statistically representative of the nation and of census regions. The estimates, which are made possible by updating the laboratory profiles through the survey effort (see draft survey in Appendix), have given DEA the ability

to track national and regional drug trends; a clearer national picture of illicit or diverted drug availability; additional information about the temporal changes in drug availability by geographic region; and the ability to detect new or emerging drugs. Information from NFLIS is combined with other existing databases to develop more accurate, up-to-date information on abused drugs. This database represents a voluntary, cooperative effort on the part of participating laboratories and MECs to provide a centralized source of analyzed drug data. Existing federal drug abuse databases do not provide the type, scope, timeliness, or quality of information necessary to effectively estimate the actual or relative abuse potential of drugs as required under the Controlled Substances Act (21 U.S.C. 811(b)) and international treaties in a timely and efficient manner. For example, much of the trafficking data for federal drug scheduling actions is presently obtained on a case-by-case basis from state and local laboratories. Occasionally scientific personnel from the DEA's Diversion Control Division, Drug and Chemical Evaluation Section, have contacted specific laboratories and requested files. In addition, some DEA field offices routinely subpoena MEC records for use in case work. The development of the National Forensic Laboratory Information System (NFLIS) greatly enhances the collection of such data. Submission of information for this collection is voluntary. DEA is not mandating this information collection.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The DEA estimates that 140 persons annually for this collection at 1.6 hour per respondent, for an annual burden of 218 hours.

6. *An estimate of the total public burden (in hours) associated with the proposed collection:* The DEA estimates that this collection takes 218 annual burden hours.
