II. Background

On November 2, 2015, EPA published a final rule making changes to the WPS, 40 CFR part 170, referred to as the “2015 revised WPS” (80 FR 67496) (FRL–9931–81). The WPS is a regulation primarily intended to reduce the risks of injury or illness resulting from agricultural workers’ and handlers’ use of and contact with agricultural pesticides on farms, forests, nurseries and greenhouses. The rule primarily seeks to protect workers (those who

perform hand-labor tasks on pesticide-treated crops, such as harvesting, thinning or pruning) and handlers (those who mix, load and apply pesticides). The 2015 revised WPS requirements retained many of the 1992 WPS requirements, while increasing the stringency of some standards and adding new requirements.

III. Availability of Training Materials and Deadline for Compliance With New Training Requirements

Sections 170.401 and 170.501 of the 2015 revised WPS allowed employers to omit certain topics from training materials until 180 days after EPA publishes in the **Federal Register** a notification of availability of new WPS training materials. EPA is announcing the availability of new training materials covering the expanded training content for both workers and handlers. These materials, developed through a cooperative agreement with the Pesticide Education Resources Collaborative (PERC), are available at <http://pesticideresources.org/>. These materials have been approved by EPA and contain the content required by the 2015 revised WPS. There are also new training materials developed by other organizations that have been approved by EPA and contain the content required by the 2015 revised WPS; some of these materials are available on the PERC website and others are proprietary.

EPA is currently reconsidering three requirements of the 2015 revised WPS and plans to solicit comments on potential changes to the designated representative provision, the minimum age for handlers and early-entry workers, and the application exclusion zone. If those requirements are changed through a final rulemaking, training materials may need to be amended to reflect such changes.

The publication of this notification of availability of the training materials specified in 40 CFR 170.401(c)(3) and 170.501(c)(3) commences the 180-day period provided in those provisions. Per §§ 170.401(c)(3) and 170.501(c)(3), WPS training programs must include all of the topics specified in §§ 170.401(c)(3)(i)–(xxiii) and 170.501(c)(3)(i)–(xiv) no later than December 19, 2018.

Oxirane, 2-methyl-, polymer with oxirane, mono[2-[2-(2-methoxy methylethoxy)methylethoxy] methylether] ether; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of oxirane, 2-methyl-, polymer with oxirane, mono[2-[2-(2-methoxymethylethoxy)methylethoxy] methylether] ether, number average molecular weight 1900 daltons; when used as an inert ingredient in a pesticide chemical formulation. SciReg, Inc. on behalf of Solvay USA Inc., submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of oxirane, 2-methyl-, polymer with oxirane, mono[2-[2-(2-methoxymethylethoxy) methylethoxy]methylether] ether on food or feed commodities.

DATES: This regulation is effective June 22, 2018. Objections and requests for hearings must be received on or before August 21, 2018, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).
