k. *Description of Request:* The licensee filed a Fishway Operation and Maintenance Plan pursuant to Article 409 of the project license and a Fishway Evaluation Plan pursuant to Article 410 of the project license. Both plans only

address fish passage and effectiveness evaluation at the project's West Branch development; these plans do not address passage and evaluation at the Sysladobsis development—because of the licensee's pending amendment application (filed January 31, 2017) to remove the Sysladobsis development from the project license. The Fishway Operation and Maintenance Plan filed pursuant to Article 409 describes the fish species that would be passed and how the licensee would operate the fishway to ensure effectiveness. Under Article 409, the licensee and the resource agencies were unable to reach a consensus on which species to pass, therefore, the Commission will evaluate the record to make a determination on this issue. The Fishway Evaluation Plan filed pursuant to Article 410 provides a framework for evaluating the effectiveness of the fishway to those species selected for passage after operation of the fishway commences.

All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). facilities, and evaluate effectiveness of the facilities for up to 3 years.
