United States Provisional Patent Application No. 61/040,005, filed March 27, 2008 and entitled "Human Monoclonal Antibodies Specific for Mesothelin" [HHS Reference No. E-079-2008/0-US-01];

PCT Patent Application PCT/US2009/038228, filed March 25, 2009 and entitled "Human Monoclonal Antibody Against Mesothelin" [HHS Reference No. E-079-2008/0-PCT-02]; and US Patent No. 8,357,783, filed September 22, 2010, Issued January 22, 2013 and entitled "Human Anti-Mesothelin Monoclonal Antibodies" [HHS Reference No. E-079-2008/0-US-06].

The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide and the field of use may be limited to: "The development of a mesothelin chimeric antigen receptor (CAR)-based immunotherapy using autologous or allogeneic T cells either transduced with a retroviral vector (including lentiviral vectors) or modified using a gene-editing technology, wherein the vector expresses a CAR comprising:

(1) Single antigen specificity for binding to mesothelin, and

(2) at least (a) the complementary determining region (CDR) sequences of the anti-mesothelin antibody known as m912, and (b) a T cell signaling domain; for the prophylaxis and treatment of mesothelin-expressing human cancers."

This technology discloses a monoclonal antibody and methods of using the antibody for the treatment of mesothelin-expressing cancers, including mesothelioma, lung cancer, stomach/gastric cancer, ovarian cancer, and pancreatic cancer. The specific antibody covered by this technology is designated as m912, which is a fully human monoclonal antibody against mesothelin.

Mesothelin is a cell surface antigen that is preferentially expressed on certain types of cancer. The m912 antibody selectively binds to the mesothelin on the surface of cancer cells and induces cell death of those cancer cells while leaving healthy cells unharmed. This selectivity may lead to fewer side effects due to decreased non-specific killing of cells.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National

Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

SUPPLEMENTARY INFORMATION: Pursuant to Presidential Executive Order 13175 signed on November 6, 2000 and the Presidential Memorandum of September 23, 2004, SAMHSA established the

TTAC to provide a complementary venue wherein tribal leaders and SAMHSA officials exchange information about public health issues in Indian Country; identify urgent mental health and substance abuse needs in tribal communities; and discuss collaborative approaches for addressing issues and needs. The SAMHSA TTAC serves as a national advisory body to SAMHSA.

The TTAC meeting will include updates and discussion related to tribal priorities for SAMHSA; collaborative opportunities between SAMHSA and CDC/ATSDR; behavioral health policy, budget, and legislative activities; tribal input in response to recent consultation and listening sessions; and essential coordination with other SAMHSA and HHS efforts to improve tribal behavioral health and wellness.

The purpose of the CDC/ATSDR TAC meeting is to advance CDC and ATSDR support for and partnership with American Indian and Alaska Native (AI/AN) tribes, and to improve the health of tribes by pursuing goals that include assisting in eliminating the health disparities faced by tribes; ensuring that access to critical health and human services is maximized to advance or enhance the social, physical, and economic status of AI/AN people; and promoting health equity for all AI/AN people.

The CDC/ATSDR TAC agenda will include discussions on tribal priorities for CDC and ATSDR, public health capacity in Indian Country, AI/AN health concerns, CDC and ATSDR budget and funding opportunities, and programmatic highlights from the agencies. Agenda items are subject to change as priorities dictate. All tribal leaders are encouraged to submit written testimony for the CDC/ATSDR TAC by 5:00 p.m. EDT Friday, July 15, 2018, to Captain Carmen Clelland, Associate Director of Tribal Support, OSTLTS, via mail to 4770 Buford Highway NE, MS E-70, Atlanta, GA, 30341-3717, or email TribalSupport@cdc.gov. SAMHSA and CDC are publishing their committee meeting notices together as CDC/ATSDR TAC members will join the SAMHSA TTAC for a collaborative discussion on July 22. Further, based on recommendations from tribal leaders, a JTAC meeting has been scheduled to discuss issues of common concern across the SAMHSA TTAC, CDC/ATSDR TAC, Indian Health Service (IHS) National Tribal Advisory Committee on Behavioral Health, and other U.S. Department of Health and Human Services (HHS) operating division tribal advisory committees. The intent of the JTAC meeting is to improve coordination across shared TAC topics to strengthen tribal health.
