SUPPLEMENTARY INFORMATION: The John S. McCain III, Daniel K. Akaka, and Samuel R. Johnson VA Maintaining Internal Systems and Strengthening Integrated Outside Networks Act of 2018, Public Law 115-182, (the VA MISSION Act) creates a new 38 U.S.C. 1703B that contains requirements for VA to facilitate the establishment and use of access standards. Section 1703B(c) specifically requires VA to consult with all pertinent Federal entities, entities in the private sector, and other nongovernmental entities in establishing access standards. This notice and request for information serves as one of the means for VA to consult with these groups and entities. We note that VA will also hold a public hearing on Friday, July 13, 2018, to provide these groups and entities an opportunity to provide additional information. VA will use the comments it receives to help determine the access standards in compliance with the VA MISSION Act. VA will then submit a report, no later than March 3, 2019, as required by section 1703B(d)(1), detailing the access standards to the appropriate committees of Congress. The access standards will ultimately be published in the **Federal Register** and will be made available on a VA internet website.

In order to submit a report to Congress detailing the access standards by March 3, 2019, VA must expedite this consultation, which will be foundational to the process of determining the access standards. Hence, this notice and request for information has a comment period of 30 days. VA believes that 30 days is sufficient to provide comments, as the groups and entities with expertise in access standards will likely have the information readily available or can quickly compile and submit such information.

This notice is a request for information only. Commenters are encouraged to provide complete but concise responses to the questions outlined below. VA may choose to contact individual commenters, and such communications would serve to further clarify their written comments.

Request for Information: VA requests information that will assist in developing the access standards required by the VA MISSION Act. This

includes information regarding the development of these access standards, including but not limited to information, with regard to health plans, on the use of access standards for the design of health plan provider networks, referrals from network providers to out-of-network providers, the appeals process for exemptions from benefit limits to out-of-network providers, and with respect to health systems, the existence of standards for appointment wait times, the use of travel distance for establishing service areas, the development or use of guidelines to refer patients to out of system providers, and the measurement of performance against regulatory standards.

Specifically, VA requests information from health plans and systems related to the below:

1. Do health plans use internal access standards for the design of provider networks and the application of in network/out of network benefits that are more stringent than regulatory standards (time or distance of travel, appointment wait times, provider/member ratios)? If so, what are these internal standards? How does the health plan measure performance against regulatory and internal access standards? How does the health plan respond to findings when access standards are not being met? Are current regulatory access standards cost-effective while maintaining quality standards? Do health plans have a process to handle routine requests from members or referring providers for exemptions to benefit limits when members seek out of network care or a lower tier provider?

2. Do health plans allow for appeals by providers or members to request exemptions from benefit limits related to out of network care or care by a lower tier provider? Is external review allowed for such appeals?

3. What are health plan practices regarding internal, regulatory, and/or accreditation standards for appointment wait times, including variance by specialty or type of service? How does the health plan use travel distance or time and/or provider-to-population ratios in deciding which geographic areas to consider as primary or secondary service areas?

4. Are clinicians within the health system given guidelines or rules on when to refer patients to out of system providers? For example, are clinicians encouraged to refer out of system if in-system wait times are longer than standard, travel time or distance to an in-system provider is too long, the patient's ability to travel is compromised or the frequency of

treatment makes travel to an in-network provider difficult?
