SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Vertical Tandem Lifts for Marine Terminals information collection. The Vertical Tandem Lifts (VTLs) standards of regulations 29 CFR part 1917 require employers to develop, implement, and maintain a written plan for transporting vertically connected containers in the longshoring and marine terminal industries. The written plan is necessary for the safe transport of VTLs in the marine terminal where factors affect the stability of a VTL that has a higher center of gravity than a single container. Occupational Safety and Health of 1970 sections 2(b)(9), 6, and 8(c) authorizes this information collection. See 29 U.S.C. 651(b)(9), 655, and 657.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0260.

The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on January 22, 2018 (83 FR 3031).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0260. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Electrical Standards for Construction and General Industry information collection requirements codified in regulations 29 CFR part 1910 subparts K and S. The information collection requirements specified by these Standards alert workers to the presence and types of electrical hazards in the workplace and, thereby, help prevent serious injury and death by electrocution. The information collection requirements in these Standards involve the following: The employer using electrical equipment that is marked with the manufacturer's name, trademark, or other descriptive markings that identify the producer of the equipment, and marking the equipment with the voltage, current, wattage, or other ratings necessary; requiring each disconnecting means for motors and appliances to be marked legibly to indicate its purpose, unless located and arranged so the purpose is

evident; requiring entrances to rooms and other guarded locations containing exposed live parts to be marked with conspicuous warning signs forbidding unqualified persons from entering; and, for construction employers only, establishing and implementing the assured equipment grounding conductor program instead of using ground-fault circuit interrupters. Occupational Safety and Health Act sections 2(b)(9), 6, and 8(c) authorize this information collection. See 29 U.S.C. 651(b)(9), 655, and 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0130.

The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review.
