I. Abstract

This request is for an extension of a currently approved information collection.

The North Pacific Observer Program (Observer Program) is implemented under the authority of section 313 of the Magnuson-Stevens Fishery Conservation and Management Act and regulations at 50 CFR 679. Through the Observer Program, the National Marine Fisheries Service (NMFS) collects the data necessary to conserve and manage the groundfish and halibut fisheries off Alaska. Observers collect biological samples and fishery-dependent information used to estimate total catch and interactions with protected species. Managers use data collected by observers to manage groundfish and prohibited species catch within established limits and to document and reduce fishery interactions with protected resources. Scientists use observer data to assess fish stocks, to provide scientific information for fisheries and ecosystem research and

fishing fleet behavior, to assess marine mammal interactions with fishing gear, and to assess fishing interactions with habitat.

All vessels and processors that participate in federally managed or parallel groundfish and halibut fisheries off Alaska are assigned to one of two categories: (1) The full observer coverage category, where vessels and processors obtain observer coverage by contracting directly with observer providers; or (2) the partial coverage category, where NMFS, in consultation with the North Pacific Fishery Management Council determines when and where observer coverage is needed. Some vessels and processors may be in full coverage for part of the year and partial coverage at other times of the year depending on the observer coverage requirements for specific fisheries. Funds for deploying observers on vessels in the partial coverage category are provided through a system of fees based on the gross ex-vessel value of retained groundfish and halibut. This observer fee is assessed on all landings by vessels that are not otherwise in full coverage. Information collected for the observer fee is approved under OMB Control No. 0648-0711.

II. Method of Collection

Methods of submittal include online web applications, email, email attachments, verbal communication by telephone or in person, and on paper by mail or fax. The Observer Declare and Deploy System (ODDS) is an internet-based interface that is used by vessel owners and operators in the partial coverage category. ODDS is available online at <https://chum.afsc.noaa.gov:7104/apex/f?p=140:1> or by phone at 1-855-747-6377. Copies of observer coverage category request forms are available on the NMFS Alaska Region website at <https://alaskafisheries.noaa.gov/>.
