

THSGP recipients were required to complete only the THIRA, they had to address all 32 core capabilities. This year, as they complete the THIRA and SPR, THSGP recipients will only be required to address 8 of the 32 core capabilities. Therefore, Tribal Governments' estimated average burden per response (in hours) has decreased from 408 to 290 hours. Only THSGP recipients are required to complete the THIRA/SPR, but FEMA encourages other Tribes to do so as well.

FEMA is hosting three in-person technical assistance sessions this year to help communities understand and complete the THIRA/SPR, and offered invitational travel for grantees required to complete the THIRA/SPR. The technical assistance sessions themselves are free for communities to attend, with no admission fee, nor are there any penalties for obtaining FEMA's help.

FEMA is also developing tools, materials, and guidance to help communities learn and complete the new methodology. Communities requiring assistance with their THIRA/SPR can also reach out to their Regional Preparedness Analysts and Planning Officers or the THIRA/SPR helpdesk at FEMA-SPR@fema.dhs.gov. These materials and services are provided at no cost to Tribes or other communities. It is also important to note that completing the THIRA and SPR are allowable expenses under the grant award. FEMA acknowledges the inherent sovereignty of Tribal governments, the trust responsibility of the Federal Government, and the nation-to-nation relationship between the U.S. government and Tribal governments as established by the U.S. Constitution, statutes, treaties, court decisions, executive orders, regulations, and policies as a foundation of the Tribal Homeland Security Grant Program.

The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Federal Regulations. The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will be finalized on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.
