

goods and services for the National School Lunch Program (NSLP), School Breakfast Program (SBP), Fresh Fruit and Vegetable Program (FFVP), Summer Food Service Program (SFSP), and Child and Adult Care Food Program (CACFP) and to better understand how SFAs make decisions that lead to these procurement practices. Study findings will describe similarities and differences in how SFAs procure goods and services and explain key issues and experiences of SFAs. Using a nationally representative sample of SFAs, this study will be one of the first Food and Nutrition Service (FNS) studies of SFA procurement practices for Child Nutrition (CN) meal programs that comprehensively examines the use of Food Service Management Companies and Cooperative Purchasing Agreements, recordkeeping, local purchases, and food purchase specifications. Procurement for CN meal programs can be affected by federal regulations (such as the Richard B. Russell National School Lunch Act, which set procurement requirements for NSLP and SBP in 2014), policy memos, program guidance, and grant funding, in addition to State and local policies.

Additionally, there are government-wide regulations under 7 CFR 210.21, 220.16, 225.17, 226.22, and 2 CFR 200 that also apply to these procurements. SFA procurement procedures must adhere to CN program and government-wide regulations and guidance, and State and local policies related to procurement.

Need and Use of the Information: This study will collect data on a voluntary basis from SFAs using a web survey and in-depth interviews. FNS will use the information collected through this study to better understand how SFAs make decisions that lead to their procurement practices for CN programs, to assist SFAs in understanding FNS regulations and complying with program requirements, to provide more effective policy guidance, and to provide supplemental training.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 760.

Frequency of Responses: Reporting: One-time.

Total Burden Hours: 1,268.

Ruth Brown,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2018-0040]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Importation of Fruits and Vegetables

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with the regulations for the importation of fruits and vegetables into the United States.

DATES: We will consider all comments that we receive on or before September 17, 2018.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2018-0040>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2018-0040, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road, Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2018-0040> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the importation of fruits and vegetables into the United States, contact Mr. Juan Román, Senior Regulatory Policy Specialist, RCC, RPM, PHP, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737; (301) 851-2242. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Fruits and Vegetables.

OMB Control Number: 0579-0264.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service, which administers regulations to implement the PPA.

The regulations in "Subpart—Fruits and Vegetables" (7 CFR 319.56–1 through 319.56–83) allow a number of fruits and vegetables to be imported into the United States, under specified conditions, from certain parts of the world while continuing to protect against the introduction of pests into the United States. Under these regulations, the importation of a variety of fruits and vegetables from specified countries require the use of information collection activities such as phytosanitary certificates, trapping records, compliance agreements, application of sterile insect technique, monitoring, safeguarding, emergency action notifications, and notices of arrival.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information

is estimated to average 0.45 hours per response.

Respondents: National plant protection organization officials of countries exporting to the United States and businesses.

Estimated annual number of respondents: 65.

Estimated annual number of responses per respondent: 13.

Estimated annual number of responses: 855.

Estimated total annual burden on respondents: 381 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of July 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection: Forest Industries and Logging Operations Data Collection Systems

AGENCY: Forest Service, USDA.

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the USDA Forest Service is seeking comments from all interested individuals and organizations on the renewal of a currently approved information collection, *Forest Industries and Logging Operations Data Collection Systems (0596-0010)*, with a revision for a new sampling approach.

DATES: Comments must be received in writing on or before September 17, 2018 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to: USDA, Forest Service, Attn: James Bentley, Southern Research Station, Forest Inventory and Analysis, 4700 Old Kingston Pike, Knoxville, TN 37919. Comments also may be submitted via facsimile to 865-862-0262 or by email to: jamesbentley@fs.fed.us.

Comments submitted in response to this notice may be made available to the public through relevant websites and

upon request. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

The public may inspect comments received at the Southern Research Station, 4700 Old Kingston Pike, Knoxville, TN, during normal business hours. Visitors are encouraged to call ahead to 865-862-2000 to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT:

James Bentley, Southern Research Station, at 865-862-2056. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 twenty-four hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Title: Forest Industries and Logging Operations Data Collection Systems.

OMB Number: 0596-0010.

Expiration Date of Approval: December 31, 2019.

Type of Request: Renewal with Revision.

Abstract: The Forest and Range Renewable Resources Planning Act of 1974 and the Forest and Rangeland Renewable Resources Research Act of 1978 require the Forest Service to evaluate trends in the use of logs and wood chips, to forecast anticipated levels of logs and wood chips, and to analyze changes in the harvest of these resources from the Nation's forest resource. This important survey has been conducted since the 1940s, with various adjustments along the ways to accommodate new questions or data collection needs. Information provided in this data collection can be used to:

- Describe the timber resource and its use in detail;
- Evaluate trends in resource use;
- Forecast future anticipated level of demand on the resource; and
- Analyze the ramifications of any changes in timber demand.

For this renewal, we are proposing a new sample design to guide the annual collection of information from primary wood-using mills, replacing the periodic approach. This new approach is more

efficient and cost-effective, and ultimately will generate more accurate, comprehensive, and timely information.

To collect this information, USDA Forest Service or state natural resource agency personnel will use three questionnaires. Two questionnaires, the Pulpwood Questionnaire and the Logs and Other Roundwood Questionnaire, will be paper or electronic. Paper questionnaires will be returned in pre-paid postage envelopes, and electronic questionnaires returned via email. The third questionnaire, the Logging Operations Questionnaire, will be administered in person by field personnel collecting tree utilization data at sampled logging sites.

Pulpwood Received Questionnaire:

USDA Forest Service personnel will use this questionnaire to collect and evaluate information from pulp mills in order to monitor the volume, types, species, sources, and prices of timber products harvested throughout the United States. The data collected will be used to provide essential information about the current use of the Nation's timber resources for pulpwood industrial products and is not available from other sources.

Logs and Other Roundwood Received Questionnaire:

This questionnaire is used by USDA Forest Service or state natural resource agency personnel to collect and evaluate information from the other, non-pulp, primary wood-using mills, including small, part-time mills, as well as large corporate entities. Primary wood-using mills are facilities that use harvested wood in log or chip form, such as sawlogs, veneer logs, composite panel, posts, and poles, to manufacture a secondary product, such as lumber or veneer. USDA Forest Service personnel evaluate the information collected and use it to monitor the volume types, species, sources, and prices of timber products harvested throughout the United States.

Logging Operations Questionnaire:

This questionnaire is used by USDA Forest Service and/or state natural resource agency personnel to collect and evaluate information from logging operations, to help characterize the logging industry and its response to outside influences. The information will be used to measure the 'health' of the logging industry, as well as to provide background information for decision-making.

Affected Public: Individuals and the Private Sector (Businesses and Non-Profit Organizations), in particular mill owners, procurement foresters, logging operations owners, and loggers will be affected.
