Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Offices (SHPO), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.³ Commission staff will define the project-specific Area of Potential Effects (APE) in consultation with the SHPOs as the project develops. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). The EA for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that information related to this environmental review is sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If the Commission publishes and distributes the EA, copies will be sent to the environmental mailing list for public review and comment. If you would prefer to receive a paper copy of

the document instead of a CD version or would like to remove your name from the mailing list, please return the attached "Mailing List Update Form" (appendix 2).

³ The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

Abstract: EPA is seeking to combine multiple ICRs to establish one ICR for all recordkeeping and reporting related to the production, import, export, transformation, destruction, transshipment, and exempted uses of all ozone-depleting substances (ODS). As part of this consolidation, the ICR is also being updated to include the option of electronic reporting and improvements to the electronic forms under Title VI of the Clean Air Act (CAA). The ICRs being consolidated into the existing ICR for Class I ODS (ICR No. 1432.33; OMB Control No. 2060–0170) are the ICRs for Class II ODS (HCFC Allowance System—EPA ICR Number 2014.08; OMB Control Number 2060–0498) and Methyl Bromide Critical Use Exemptions (Protection of Stratospheric Ozone: Request for Applications from Critical Use Exemption for the Phase-out of Methyl Bromide—EPA ICR Number 2031.09; OMB Control Number 2060–0482).

This ICR covers the requirements under the *Montreal Protocol on Substances that Deplete the Ozone Layer* (Montreal Protocol) and Title VI of the CAA that establish limits on total U.S. production, import, and export of class I and class II controlled ODS (or controlled substances). Production and import of class I controlled substances (chlorofluorocarbons and others) was phased out in the United States with exemptions for essential uses, critical uses of methyl bromide, quarantine and pre-shipment uses of methyl bromide, previously used material, and material that will be transformed or destroyed. There are also limits and reduction schedules leading to the eventual phaseout of class II controlled substances, with limited exemptions for previously used material, and material that will be transformed, destroyed, or exported to developing countries. To implement the CAA provisions and meet commitments under the Montreal Protocol, the ODS phaseout regulations establish control measures for individual companies. EPA monitors company compliance through the recordkeeping and reporting requirements established in the regulations at 40 CFR part 82, subpart A. As part of this ICR renewal, EPA is also removing reporting elements that are no longer needed, revising others to address changes to a new electronic ODS Tracking System, and consolidating forms.

Forms: Class I Producer Quarterly Report, Class II Producer Quarterly Report, Methyl Bromide Producer Quarterly Report, Class I Importer Quarterly Report, Class II Importer Quarterly Report, Methyl bromide

Importer Quarterly Report, Class I Exporter Annual Report, Class II Exporter Quarterly Report, Methyl Bromide Exporter Quarterly Report, Second-Party Destruction Annual Report, Second-Party Transformation Annual Report, Class I Laboratory Supplier, Methyl Bromide Pre-2005 Stocks Annual Report, Distributor of QPS Methyl Bromide Quarterly Report, Methyl Bromide Trades Report, Methyl Bromide Sales of Critical Use Annual Report, Class II Request for Additional Consumption Allowances, and Class II Trades Report.

Respondents/affected entities: Chemical producers, importers, and exporters (chlorofluorocarbons and hydrochlorofluorocarbons); research and development (laboratories); and methyl bromide producers, importers, exporters, distributors, and applicators.

Respondent's obligation to respond: Mandatory—Section 603(b) of the Clean Air Act.

Estimated number of respondents: 2,929 (total).

Frequency of response: Quarterly, annually, and as needed.

Total estimated burden: 3,763 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$442,926 (per year), which includes \$13,082 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 1,726 hours in the total estimated respondent burden compared with the three ICRs currently approved by OMB. This decrease is a result of efficiencies from transitioning from paper to electronic reporting. While the one-time burden increase is associated with the transition to electronic reporting, overall burden will decrease from efficiencies associated with electronic reporting. Additionally, EPA estimates fewer companies reporting on imports and exports of ODS based on 2015 reporting activity.

Director, Regulatory Support Division.
