

goals, and objectives differ slightly, they are substantively similar.

Mission: To support the Service's mission by connecting people to fish, wildlife, and their habitats through strategic implementation of transportation programs.

Goals and Objectives: Each of these long-range transportation plans has six substantively similar goals: Safety; access, mobility, and connectivity; asset management; environmental protection; visitor experience; and partnership. Region 8 has an additional seventh goal: Planning. Under each goal, each Region presents distinct objectives that move the Service to the goal. Please see the individual draft LRTPs for more information.

Next Steps

After the comment period ends, the Service will analyze the comments received and consider them in preparation of final LRTPs.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Gregory J. Sheehan,

Principal Deputy Director, U.S. Fish and Wildlife Service.

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for the Southern California Distinct Population Segment of the Mountain Yellow-legged Frog (*Rana muscosa*)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of the Draft Recovery Plan for the Southern California Distinct Population Segment of the Mountain Yellow-legged Frog (*Rana muscosa*) for public review and comment. The draft

recovery plan includes objective, measurable criteria, and site-specific management actions as may be necessary to reclassify the species from endangered to threatened and also for removal from the Federal List of Endangered and Threatened Wildlife.

DATES: We must receive any comments on the draft recovery plan on or before September 17, 2018.

ADDRESSES: *Document availability:* You may obtain a copy of the recovery plan from our website at <http://www.fws.gov/Endangered/species/recovery-plans.html>. Alternatively, you may contact the Carlsbad Fish and Wildlife Office, U.S. Fish and Wildlife Service, 2177 Salk Avenue, Suite 250, Carlsbad, California 92008 (telephone 760-431-9440).

Comment submission: If you wish to comment on the draft recovery plan, you may submit your comments in writing by any one of the following methods:

- *U.S. mail:* Field Supervisor, at the above address;
 - *Hand-delivery:* Carlsbad Fish and Wildlife Office, at the above address; or
 - *Email:* fw8cfwocomments@fws.gov.
- For additional information about submitting comments, see the "Public Comments Solicited" section below.

FOR FURTHER INFORMATION CONTACT: Mendel Stewart, Field Supervisor, at the above street address or telephone number (see **ADDRESSES**).

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program and the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*). Recovery means improvement of the status of listed species to the point at which listing is no longer necessary under the criteria specified in section 4(a)(1) of the Act. The Act requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species.

Pursuant to section 4(f) of the Act, a recovery plan must, to the maximum extent practicable, include (1) A description of site-specific management actions as may be necessary to achieve the plan's goals for the conservation and survival of the species; (2) objective, measurable criteria which, when met, would support a determination under section 4(a)(1) that the species should be removed from the List of Endangered and Threatened Species; and (3)

estimates of the time and costs required to carry out those measures needed to achieve the plan's goal and to achieve intermediate steps toward that goal.

The Service has revised its approach to recovery planning; the revised process is called Recovery Planning and Implementation (RPI). The RPI process is intended to reduce the time needed to develop and implement recovery plans, increase recovery plan relevancy over a longer timeframe, and add flexibility to recovery plans so they can be adjusted to new information or circumstances. Under RPI, a recovery plan will include statutorily required elements (objective, measurable criteria, site-specific management actions, and estimates of time and costs), along with a concise introduction and our strategy for how we plan to achieve species recovery. The RPI recovery plan is supported by a separate Species Status Assessment, or in cases such as this one, a species biological report that provides the background information and threat assessment, which are key to recovery plan development. The essential component to flexible implementation under RPI is producing a separate working document called the Recovery Implementation Strategy (implementation strategy). The implementation strategy steps down from the more general description of actions described in the recovery plan to detail the specific, near-term activities needed to implement the recovery plan. The implementation strategy will be adaptable by being able to incorporate new information without having to concurrently revise the recovery plan, unless changes to statutory elements are required.

The Service listed the southern California distinct population segment of mountain yellow-legged frog (*Rana muscosa*) (hereafter "southern *R. muscosa*") as endangered in 2002 (67 FR 44382, July 2, 2002), and critical habitat was designated for the species in 2006 (71 FR 54344, September 14, 2006). Historically, southern *R. muscosa* was widely distributed in at least 166 known populations in watersheds across four mountain ranges in southern California. Currently, the species is restricted to 10 small, isolated populations in the headwaters of streams or tributaries within the San Gabriel, San Bernardino, and San Jacinto Mountains. Primary habitat for the southern *R. muscosa* includes streams with permanent (perennial) water that have steep gradients with numerous pools, rapids, and small waterfalls. The smallest creeks are likely not inhabited by southern *R. muscosa*

because they lack adequate depth to provide refuge or overwintering habitat.

Southern *Rana muscosa* is impacted by a number of threats, including: Recreational activities (hiking, mountain climbing, camping, swimming, stocking of trout resulting in predation, and suction dredge mining for gold), dumping of trash and release of toxic or hazardous materials into occupied stream reaches, wildfire, predatory nonnative species (trout), the potential for disease, threats associated with small population size (genetic, demographic, and environmental stochasticity, and natural catastrophes), illegal marijuana cultivation, fire management activities, nonnative plants, climate change, and contaminants.

Recovery Strategy

The purpose of a recovery plan is to provide a framework for the recovery of a species so that protection under the Act is no longer necessary. A recovery plan includes scientific information about the species and provides criteria that enable us to gauge whether downlisting or delisting the species is warranted. Furthermore, recovery plans help guide our recovery efforts by describing actions we consider necessary for each species' conservation and by estimating time and costs for implementing needed recovery measures.

The goal of this recovery plan is to control or ameliorate impacts from current threats to the southern *Rana muscosa* such that the taxon no longer requires protections afforded by the Act and, therefore, warrants delisting. Continued outreach with our partners is needed to ensure long-term protections are afforded to the southern *R. muscosa* and its habitat. The site-specific management actions identified in the draft recovery plan are as follows:

- (1) Conduct research to inform management actions throughout the range of the species;
- (2) Create and implement a protocol for rangewide surveys and monitoring;
- (3) Ameliorate Factor A threats associated with present or threatened destruction, modification, or curtailment of the habitat or range throughout each of the three Recovery Units;
- (4) Ameliorate Factor C threats associated with predation and disease in each of the three Recovery Units;
- (5) Ameliorate Factor E threats associated with other natural or manmade factors affecting the continued existence of southern *Rana muscosa* in each of the three Recovery Units;

(6) Use reestablishment and population augmentation to increase abundance and expand distribution in the wild.

Public Comments Solicited

We solicit written comments on the draft recovery plan described in this notice. All comments received by the date specified in **DATES** will be considered in development of a final recovery plan for southern *Rana muscosa*. You may submit written comments and information by mail, email, or in person to the Carlsbad Fish and Wildlife Office at the above address (see **ADDRESSES**).

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We developed this recovery plan and publish this notice under the authority of section 4(f) of the Act, 16 U.S.C. 1533(f).

Angela Picco,

Acting Regional Director, Pacific Southwest Region.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[DOI–2018–0004; 18XD4523WC DS68644000 DWCHF0000.000000 DQ.FPPJB.18000000]

Privacy Act of 1974; System of Records

AGENCY: Office of the Secretary, Interior.
ACTION: Notice of a modified system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended, the Department of the Interior proposes to modify the Department of the Interior system of records titled, “Payroll, Attendance, Retirement, and Leave Records—Interior, DOI–85.” This system of records allows the Department of the Interior to manage human resources and payroll functions; ensure proper payment for salary and benefits; track time worked, leave, or other

absences for reporting and compliance purposes; and meet regulatory requirements such as specialized pay, garnishments, and special appointment programs. The Department of the Interior is updating this system of records notice to (1) add new proposed routine uses, (2) modify existing routine uses to provide clarification, (3) modify the categories of records and categories of individuals covered by the system, and (4) update system location, authority for maintenance of the system, storage, retrievability, safeguards, retention and disposal, system manager and address, notification procedures, records access and contesting procedures, and records source categories. This modified system will be included in the Department of the Interior's inventory of record systems.

DATES: This modified system will be effective upon publication. New or modified routine uses will be effective August 20, 2018. Submit comments on or before August 20, 2018.

ADDRESSES: You may submit comments, identified by docket number DOI–2018–0004, by any of the following methods:

- *Federal e-Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail:* Teri Barnett, Departmental Privacy Officer, U.S. Department of the Interior, 1849 C Street NW, Room 7112, Washington, DC 20240.
- Hand-delivering comments to Teri Barnett, Departmental Privacy Officer, U.S. Department of the Interior, 1849 C Street NW, Room 7112, Washington, DC 20240.
- *Email:* DOI_Privacy@ios.doi.gov.

All submissions received must include the agency name and docket number. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Teri Barnett, Departmental Privacy Officer, U.S. Department of the Interior, 1849 C Street NW, Room 7112, Washington, DC 20240, email at DOI_Privacy@ios.doi.gov or by telephone at (202) 208–1605.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of the Interior (DOI), Interior Business Center (IBC) maintains the “Payroll, Attendance, Retirement, and Leave Records—Interior, DOI–85” system of records. This system helps DOI manage human resources and payroll functions; ensure proper payment for salary and benefits; track time worked, leave, or other absences for reporting and compliance purposes;
