I. Abstract

The Leahy-Smith America Invents Act (“Act”) was enacted into law on September 16, 2011 (Pub. L. 112–29, 125 Stat. 283 (2011)). Under section 10(b) of the Act, eligible small entities shall receive a 50 percent fee reduction from the undiscounted fees for filing, searching, examining, issuing, appealing, and maintaining patent applications and patents. The Act further provides that micro entities shall receive a 75 percent fee reduction from the undiscounted fees for filing, searching, examining, issuing, appealing, and maintaining patent applications and patents.

This information collection covers the submissions made by patent applicants and patentees to excuse fee payment errors that result from changes in their small or micro entity status, in accordance with the procedures set forth in 37 CFR 1.28(c) and 1.29(k). Specifically, 37 CFR 1.28(c) provides a procedure by which patent applicants and patentees may be excused for erroneous payments of fees in the small entity amount. 37 CFR 1.29(k) provides a procedure by which patent applicants and patentees may be excused for erroneous payments of fees in the micro entity amount.

Applicants who change their entity status may need to submit additional payments in order to have their applications associated with the correct category. A small or micro entity can be established in good faith, and a patent applicant pay a maintenance fee as a small or micro entity in good faith but later discover that such status was established in error or that through errors USPTO was not notified of a loss of entitlement to such status. The USPTO will excuse the error if a deficiency payment and other requirements are submitted in compliance with 37 CFR 1.28(c) or 1.29(k).

This information collection is necessary so that patent applicants and patentees may pay the balance of fees due (i.e., fee deficiency payment) in instances when the micro or small entity fee amount was paid in error. The USPTO requires the information in order to process and properly record a fee deficiency payment, and to avoid questions arising later, either for the USPTO or for the applicant or patentee as to whether the proper fees have been paid in the application or patent.

Failure to correct the error in entity status will result in the charging of patent application fees that correspond with the correct entity status at the discretion of the Agency. If these fees are not paid, patent protection lapses and rights provided by the patent are no longer enforceable.

II. Method of Collection

The items in this collection may be submitted online using EFS-Web, the USPTO’s Web-based electronic filing system, or on paper by either mail or hand delivery.

III. Data

OMB Number: 0651–0070.

IC Instruments: There are no forms in this collection.

Type of Review: Renewal of a previously existing information collection.

Affected Public: Businesses or other for-profits; not-for-profit institutions; individuals or households.

Estimated Number of Respondents: 2,500 responses per year. Of this total, the USPTO expects that 2,450 responses will be submitted electronically through EFS-Web and 50 will be submitted on paper.

Estimated Time per Response: The USPTO estimates that it will take the public approximately 2 hours to submit the information in this collection,
including the time to gather the necessary information, prepare the appropriate form or petition, and submit the completed request to the USPTO. The time per response, estimated annual responses, and estimated annual hour burden associated with each instrument in this information collection is shown in the table below.

### IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden (including hours and cost) of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Comments submitted in response to this notice will be summarized or included in the request for OMB approval of this information collection; they will also become a matter of public record.
