SUPPLEMENTARY INFORMATION: The National Occupational Research Agenda (NORA) is a partnership program created to stimulate innovative research and improved workplace practices. The national agenda is developed and implemented through the NORA sector and cross-sector councils. Each council develops and maintains an agenda for its sector or cross-sector.

Background: The National Occupational Research Agenda for Oil and Gas Extraction is intended to identify the research, information, and actions most urgently needed to prevent occupational injuries. The National Occupational Research Agenda for Oil and Gas Extraction provides a vehicle for stakeholders to describe the most relevant issues, gaps, and safety and health needs for the sector. Each NORA research agenda is meant to guide or promote high priority research efforts on a national level, conducted by various entities, including: Government, higher education, and the private sector.

The first National Occupational Research Agenda for Oil and Gas

Extraction was published in 2011 for the second decade of NORA (2006-2016). The revised agenda was developed considering new information about injuries and illnesses, the state of the science, and the probability that new information and approaches will make a difference. As the steward of the NORA process, NIOSH invites comments on the draft National Occupational Research Agenda for Oil and Gas Extraction. Comments expressing support or with specific recommendations to improve the Agenda are requested. A copy of the draft Agenda is available at https:// www.regulations.gov (see Docket Number CDC-2018-0065).

Dated: July 23, 2018.
