SUPPLEMENTARY INFORMATION:

Title: Emergency Management Response System.

OMB Control Number: 0579-0071.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to protect the health of U.S. livestock and poultry populations by preventing the introduction and interstate spread of serious diseases and pests of livestock and by eradicating such diseases from the United States when feasible.

The Emergency Management Response System (EMRS), which is a web-based system, helps APHIS manage and investigate potential incidents of foreign animal diseases in the United States. When a potential foreign animal disease incident is reported, APHIS or State animal health officials dispatch a foreign animal disease veterinary diagnostician to the premises of the reported incident to conduct an investigation. The diagnostician obtains vital epidemiologic data by conducting field investigations, including sample collection, and by interviewing the owner or manager of the premises being investigated. These important data, which are submitted electronically by the diagnostician into EMRS, include such items as the purpose of the diagnostician's visit and suspected disease, type of operation on the premises, the number and type of animals on the premises, the number of sick or dead animals on the premises, the results of physical examinations of affected animals and necropsy examinations, vaccination information on the animals in the herd or flock, biosecurity practices at the site, whether any animals were recently moved out of the herd or flock, whether any new animals were recently introduced into the herd or flock, the number and kinds
