mineral interest for conveyance is identical in location as the privately owned surface interest of the applicant, and is described as follows:

Gila and Salt River Meridian, Arizona

T. 12 S, R. 10 E, Section 1
Lots 1–3, S½NE¼, S½NW¼, SW¼, SE¼
The areas described aggregate 591.21 acres.

Section 209(b) of FLPMA authorizes the conveyance of the federally owned mineral interests in land to the current or prospective surface owner, upon payment of administrative costs and the fair market value of the interest being conveyed. The objective of Section 209 is to allow Consolidation of the surface and mineral interests when either one of the following conditions exist: (1) There are no known mineral values in the land; or (2) Where continued Federal ownership of the mineral interests interferes with or precludes appropriate non-mineral development and such development is a more beneficial use of the land than mineral development. The applicant has deposited sufficient funding to cover administrative costs, but not limited to, the cost for the mineral potential report.

Subject to valid existing rights, on August 1, 2018 the federally owned mineral interests in the land described above are hereby segregated from all forms of appropriation under the public land laws, including the mining laws. The segregative effect shall terminate upon: (1) Issuance of a patent or other document of conveyance as to such mineral interests; (2) Final rejection of the application; or (3) August 3, 2020, whichever occurs first.
