Notice of Hearing (Notice of Evidentiary Hearing and Opportunity To Provide Oral, Written, and Audio-Recorded Limited Appearance Statements); In the Matter of Crow Butte Resources, Inc. (Marsland Expansion Area)

July 27, 2018.

Atomic Safety and Licensing Board Panel Before the Licensing Board: G. Paul Bollwerk, III, Chairman, Dr. Richard E. Wardwell, Dr. Thomas J. Hirons

The Atomic Safety and Licensing Board hereby gives notice that it will convene an evidentiary hearing to receive testimony and exhibits in this proceeding regarding intervenor Oglala Sioux Tribe's (OST) challenge to the May 2012 application of Crow Butte Resources, Inc., (CBR) seeking to amend the existing 10 CFR part 40 source materials license for its Crow Butte in situ uranium recovery (ISR) site to authorize CBR to operate a satellite ISR facility within the Marsland Expansion Area (MEA) in Dawes County, Nebraska. The evidentiary hearing will concern OST's admitted Contention 2, which raises hydrogeological-related environmental and safety matters regarding the proposed license amendment. In addition, the Board gives notice that, in accordance with 10 CFR 2.315(a) and the procedures specified below, it will entertain oral, written, and audio-recorded limited appearance statements from members of the public in connection with the issues raised by Contention 2.

A. Matters To Be Considered

As set forth by the Licensing Board in a July 20, 2018 issuance, OST Contention 2 provides as follows:

OST Contention 2: Failure to Include Adequate Hydrogeological Information to Demonstrate Ability to Contain Fluid Migration

The application and final environmental assessment fail to provide sufficient information regarding the geological setting of the area to meet the requirements of 10 CFR part 40, Appendix A, Criteria 4(e) and 5G(2); the National Environmental Policy Act; and NUREG–1569 section 2.6. The application and final environmental assessment similarly fail to provide sufficient information to establish potential effects of the project on the adjacent surface and ground-water resources, as required by NUREG–1569 section 2.7, and the National Environmental Policy Act.

LBP–18–3, 88 NRC __, __ (slip op. at 43) (July 20, 2018). This issue will be the

subject matter of the evidentiary hearing and should be the focus of any limited appearance statements.¹

B. Date, Time, and Location of Evidentiary Hearing

The Board will convene an evidentiary hearing conducted in accord with the procedures set forth in 10 CFR part 2, subpart L, regarding the environmental and safety matters specified in section A above on the following date at the specified location and time:

Date: Tuesday, October 30, 2018.

Time: 8:30 a.m. Mountain Time (MT).

Location: Crawford Community Building, 1005 1st Street, Crawford, Nebraska.

The hearing will continue from day-to-day until concluded. CBR, the NRC staff, and OST will be parties to the hearing and will sponsor witnesses and evidentiary material.

Any member of the public who plans to attend the hearing is advised that security measures may be employed at the entrance to the room where the hearing will take place, including searches of hand-carried items such as briefcases or backpacks, and is reminded to arrive in sufficient time to allow for security screening. Items that could readily be used as weapons will not be permitted in the room where the evidentiary hearing sessions will be held. Also, during the evidentiary hearing session no signs will be permitted in the hearing room.

C. Date, Time, and Location of Oral Limited Appearance Statement Session

A 10 CFR 2.315(a) oral limited appearance session regarding the MEA ISR proceeding will be held on the following date at the specified location and time:

¹ As the Board also indicated in its July 2018 issuance, LBP-18-3, 88 NRC at (slip op. at 43), the scope of the safety and environmental concerns encompassed by this contention include the following: (1) The adequacy of the descriptions of the affected environment for establishing the potential effects of the proposed MEA operation on the adjacent surface water and groundwater resources; (2) exclusively as a safety concern, the absence in the applicant's technical report, in accord with NUREG-1569 section 2.7, of a description of the effective porosity, hydraulic porosity, hydraulic conductivity, and hydraulic gradient of site hydrogeology, along with other information relative to the control and prevention of excursions such as transmissivity and storativity; (3) the failure to develop, in accord with NUREG-1569 section 2.7, an acceptable conceptual model of site hydrology that is adequately supported by site characterization data so as to demonstrate with scientific confidence that the area hydrogeology, including horizontal and vertical hydraulic conductivity, will result in the confinement of extraction fluids and expected operational and restoration performance; and (4) whether the final EA contains unsubstantiated assumptions as to the isolation of the aquifers in the ore-bearing zones.

Date: Sunday, October 28, 2018 (if there is sufficient interest).

Time: 2:00 p.m. to 4:00 p.m. MT.

Location: Scottsbluff Room, Chadron State College Student Center, 1000 Main Street, Chadron, Nebraska.
