

reasons why a hearing on the application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore or Sara Young (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 21217 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 21217, issued on November 6, 2017 (82 FR 60968; December 26, 2017), authorizes the permit holder to import biological samples from up to 30 harp seals (*Pagophilus groenlandicus*) and 30 hooded seals (*Cystophora cristata*) from Canada to study the effects of polybrominated diphenyl ethers (PBDEs) on the fitness and immune function in two species of phocid seals. The permit holder is requesting the permit be amended to increase the number of samples imported from each species from 30 to 60 individuals and to include the import of samples collected during the 2019 field season in Canada. All other aspects of the permitted activities would not change.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the proposed activities are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of these applications to the Marine Mammal Commission and its Committee of Scientific Advisors.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Sand Point City Dock Replacement Project in Sand Point, Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: NMFS has received a request from the Alaska Department of Transportation and Public Facilities (ADOT&PF) to issue an incidental harassment authorization (IHA) previously issued to ADOT&PF to incidentally take nine species of marine mammal, by Level A and Level B harassment, during construction activities associated with the Sand Point City Dock Replacement Project in Sand Point, Alaska. ADOT&PF reported that the project has been delayed. The IHA issued on October 13, 2017 has effective dates of August 1, 2018 through July 31, 2019. ADOT&PF requested that a new IHA be issued to conduct their work between May 31, 2019 and May 30, 2020. NMFS is, therefore, issuing a second IHA to cover the incidental take

analyzed and authorized in the first IHA. The authorized take numbers would be the same as authorized previously, and the required mitigation, monitoring, and reporting would remain the same as authorized for the 2018 IHA referenced above. Pursuant to the Marine Mammal Protection Act (MMPA), NMFS is notifying the public about the issuance of an IHA to ADOT&PF to incidentally take marine mammals, by Level A and Level B harassment only, during the specified activity.

DATES: The IHA is valid May 31, 2019, through May 30, 2020.

ADDRESSES: An electronic copy of the final Authorization previously issued for 2018–2019, ADOT&PF's application, and related documents may be obtained by visiting <https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-construction-activities>. In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Rob Pauline, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:**Background**

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined “negligible impact” in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.
