

modification in an attempt to reduce finfish bycatch and habitat impact in the scallop dredge fishery. Any modification would comply with existing scallop gear regulations. All trips would take place in scallop fishing areas open to scallop RSA compensation fishing.

Exemption from crew size limits is needed because a research technician would accompany vessels on the compensation fishing trips to collect catch data associated with the dredge modifications. The crew size exemption would be for approximately 120 days-at-sea and would be used in conjunction with a valid compensation fishing letter of authorization. The technician would only engage in data collection activities, and would not process catch to be landed for sale. Exemption from possession limit and minimum sizes would support catch sampling activities, and ensure the vessel is not in conflict with possession regulations while collecting catch data. All catch above a possession limit or below a minimum size would be discarded as soon as possible following data collection. Estimated catch totals for the experimental permit activities are listed below in Table 1. The proposed gear modifications are not expected to increase catch above typical commercial fishing practices and gears. All research trips would otherwise be consistent with normal commercial fishing activity and catch would be retained for sale.

TABLE 1—ESTIMATED BYCATCH FOR CFF EFP COMPENSATION TRIPS

Species	Number	Weight (lb)	Weight (kg)
NE Skate Complex	19,326	10,051	4,559
Barndoor Skate	1,231	14	6
Summer Flounder	747	2,951	1,339
Winter Flounder	14	2	1
Yellowtail Flounder	36	10	5
Windowpane Flounder	106	39	18
Monkfish	2,973	4,689	2,127

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Title of Collection: Graduate Assistance in Areas of National Need (GAANN) Performance Report.

OMB Control Number: 1840-0748.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Private Sector; State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 291.

Total Estimated Number of Annual Burden Hours: 3,274.

Abstract: GAANN grantees must submit a performance report annually. In addition, grantees are required to submit a supplement to the final performance report two years after submission of their final report. The reports are used to evaluate grantee performance. Further, the data from the reports will be aggregated to evaluate the accomplishments and impact of the GAANN Program as a whole. Results will be reported to the Secretary in order to respond to GPRA requirements.

Minor changes have been made to the collection to clarify the intent of the questions and update the areas of national need. These changes did not alter the anticipated burden hours associated with this collection. There was a small increase in total burden hours based on the recalculation of the burden on public respondents.
