BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR**U.S. Geological Survey**

[GX18EB00A181100; OMB Control Number 1028–0085/Renewal]

Agency Information Collection Activities; National Land Remote Sensing Education, Outreach and Research Activity

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the U.S. Geological Survey (USGS) is proposing to renew an information collection.

DATES: Interested persons are invited to submit comments on or before October 9, 2018.

ADDRESSES: Send your comments on the information collection request (ICR) by mail to the U.S. Geological Survey, Information Collections Clearance Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192; or by email to gs-info_collections@usgs.gov. Please reference OMB Control Number 1028–0085 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Sarah Cook by email at sscook@usgs.gov, or by telephone at 703–648–6136.

SUPPLEMENTARY INFORMATION: We, the U.S. Geological Survey, in accordance with the Paperwork Reduction Act of 1995, provide the general public and other Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps us assess the

impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary for the proper functions of the USGS; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the USGS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the USGS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The National Land Remote Sensing Education, Outreach and Research Activity (NLRSEORA) is an effort that involves the development of a U.S. national consortium in building the capability to receive, process and archive remotely sensed data for the purpose of providing access to university and state organizations in a ready-to-use format; and to expand the science of remote sensing through education, research/applications development and outreach in areas such as environmental monitoring to include the effects of climate variability on water availability (or lack thereof) and phenology, natural resource management and disaster analysis. Respondents are submitting proposals to acquire funding for a national (U.S.) program to promote the uses of space-based land remote sensing data and technologies through education and

outreach at the state and local level and through university-based and collaborative research projects. The information collected will ensure that sufficient and relevant information is available to evaluate and select a proposal for funding. A panel of USGS Land Resources Mission Area managers and scientists will review each proposal to evaluate the technical merit, requirements, and priorities identified in the call for proposals.

This notice concerns the collection of information that is sufficient and relevant to evaluate and select proposals for funding. We will protect information from respondents considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2), and under regulations at 30 CFR 250.197, “Data and information to be made available to the public or for limited inspection.” Responses are voluntary. No questions of a “sensitive” nature are asked. We intend to release the project abstracts and primary investigators for awarded/funded projects only.

Title of Collection: National Land Remote Sensing Education, Outreach and Research Activity (NLRSEORA).

OMB Control Number: 1028–0085.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Public or private institutions of higher education including universities; state and local governments (including county, city, township or special district governments), independent school districts, Native American Tribal governments or organizations, nonprofit organizations (with or without 501(c)(3) status).

Total Estimated Number of Annual Respondents: Approximately 5 respondents.

Total Estimated Number of Annual Responses: Approximately 5 responses or applications.

Estimated Completion Time per Response: We expect to receive approximately 5 applications per year, taking each applicant approximately 24 hours to complete, totaling 120 burden hours. We anticipate awarding one (1) grant per year. The grantee will be required to submit an interim Annual Progress Report to the designated USGS

Project Officer within 90 days of the end of the project period and a final report on or before 90 working days after the expiration of the agreement.

Total Estimated Number of Annual Burden Hours: 120 hours per year.

Respondent's Obligation: Required to Obtain a Benefit.

Frequency of Collection: Annually.

Total Estimated Annual Non-hour Burden Cost: There are no "non-hour-cost" burdens associated with this IC.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authorities for this action are the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*).

Timothy Newman,

Program Coordinator, National Land Imaging Program, U.S. Geological Survey.

Notice of Intent for Potential Amendment to the Resource Management Plan for the Bakersfield Field Office, California, and To Prepare an Associated Supplemental Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended, (FLPMA), the Bureau of Land Management (BLM) Bakersfield Field Office, Bakersfield, California, intends to prepare a supplemental Environmental Impact Statement (EIS) and a potential Resource Management Plan (RMP) amendment for the Bakersfield Field Office Resource Management Plan. The supplemental EIS will analyze the impacts of hydraulic fracturing technology on BLM-administered public land and mineral estate in the Bakersfield Field Office Planning Area exclusive of the California Coastal National Monument and the Carrizo Plain National Monument. This effort is in response to a settlement agreement in case No. 2:15-cv-04378-MWF/JEM, filed with, and approved by, the U.S. District

Court for the Central District of California on May 3, 2017. This notice announces the beginning of the scoping process to solicit public comments and identify issues.

DATES: This notice initiates the public scoping process for the Supplemental EIS and potential RMP amendment. Comments on issues may be submitted in writing until September 7, 2018. In order to be included in the analysis, all scoping comments must be submitted in writing and received prior to the close of the 30-day scoping period. We will provide additional opportunities for public participation as appropriate.

ADDRESSES: You may submit comments on issues and planning criteria related to this Supplemental EIS and potential RMP amendment by any of the following methods:

- *Email:* blm_ca_bkfo_oil_gas_update@blm.gov.

- *Mail:* Bakersfield Field Office, Bureau of Land Management, Attn: Bakersfield RMP Hydraulic Fracturing Analysis, 3801 Pegasus Drive, Bakersfield, CA 93308.

Documents pertinent to this proposal may be examined during regular business hours at: Bureau of Land Management, Bakersfield Field Office, 3801 Pegasus Drive, Bakersfield, CA 93308.

FOR FURTHER INFORMATION CONTACT:

Carly Summers, Supervisory Natural Resources Specialist, telephone 661-391-6000; address Bureau of Land Management, 3801 Pegasus Drive, Bakersfield, CA 93308; email blm_ca_bkfo_oil_gas_update@blm.gov. Contact Ms. Summers to have your name added to our mailing list. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to contact the above individual during normal business hours. FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: This document provides notice that the BLM Field Office, Bakersfield, California, intends to prepare a supplemental EIS and potential RMP amendment for the 2014 Bakersfield Field Office RMP Planning Area. Furthermore, this document announces the beginning of the scoping process and seeks public input on issues and planning criteria related to hydraulic fracturing. The planning area is located in Fresno, Kern, Kings, Madera, San Luis Obispo, Santa Barbara, Tulare, and Ventura counties in California and encompasses approximately 400,000 acres of public

land and an additional 1.2 million acres of Federal mineral estate (*i.e.*, split estate). The purpose of the supplemental EIS is to analyze the environmental effects of the use of hydraulic fracturing technology in oil and gas development on new leases within the planning area and to determine whether changes are needed to the fluid minerals decisions in the Bakersfield Field Office RMP. The need to develop the supplemental EIS is established by the settlement agreement in case No. 2:15-cv-04378-MWF/JEM, filed with the U.S. District Court for the Central District of California on May 3, 2017. The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives if necessary, and guide the planning process. Preliminary issues for the supplemental EIS have been identified by BLM personnel; Federal, State, and local agencies; and other stakeholders. The issues include: Air and atmospheric values; water quality and quantity; seismicity; special status species; mineral resources (oil and gas); and socioeconomics. Preliminary planning criteria include:

1. Only those portions of the existing plan that need to be updated to respond to the issues and management concerns identified in the court order and settlement agreement will be reviewed.

2. The planning process will be completed in compliance with the FLPMA and all other applicable laws.

3. The planning process will include a Supplemental EIS that will comply with NEPA standards.

4. The scope of analysis will be consistent with the level of analysis in approved plans and in accordance with Bureau-wide standards and program guidance.

5. Public comments will be addressed during the planning process.

You may submit comments on issues and planning criteria in writing to the BLM using one of the methods listed in the **ADDRESSES** section above. To be most helpful, you should submit comments by the close of the 30-day scoping period.

The BLM will utilize and coordinate the NEPA scoping process to help fulfill the public involvement process under the National Historic Preservation Act (54 U.S.C. 306108), as provided in 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed action will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian tribes on a government-to-government
