

Decommissioning Guidance.” The licensee’s decommissioning activities included decontamination, dismantlement, and demolition of various systems, structures, and components followed by MARSSIM-based FSS.

By letter dated January 12, 2017, UB submitted the FSS Report for the BMRC and requested the termination of Facility Operating License No. R-77 (ADAMS Accession No. ML17039A897). The NRC staff reviewed the FSS Report, which states that the criteria for termination set forth in UB’s license, and as established in its DP and FSS Plan, have been satisfied. Supplemental information was provided in an email from the licensee dated February 13, 2018 (ADAMS Accession No. ML18075A415), which addressed additional questions and items requiring clarification that were provided to the licensee.

Throughout the decommissioning process, inspectors from the NRC’s Region I office conducted routine safety inspections at the BMRC, as documented in the following NRC Inspection Reports (IRs): IR 050–00057/2015–001 (ADAMS Accession No. ML16007A027), IR 050–00057/2014–001 (ADAMS Accession No. ML15027A411), IR 050–00057/2013–003 (ADAMS Accession No. ML14219A022), IR 050–00057/2013–002 (ADAMS Accession No. ML13204A096), and IR 050–00057/2013–001 (ADAMS Accession No. ML13106A379). The inspections consisted of observations by the inspectors, interviews with BMRC and contractor personnel, confirmatory measurements, collection of soil samples, and a review of work plans and work instructions. The NRC inspections also verified that radioactive waste associated with the decommissioning project had been shipped offsite and that the decommissioning and final status survey activities were being conducted safely and in accordance with regulatory requirements, licensee commitments, and the NRC-approved DP. No health or safety concerns were identified during the NRC inspections.

During the periods of January 26–29, February 3–6, and August 17–21, 2015, the Oak Ridge Associated Universities (ORAU) performed confirmatory surveys in support of the BMRC excavation, which included surveys of surrounding soils, backfill material, and soil laydown areas. The survey activities included visual inspections, gamma radiation surface scans, gamma and beta radiation measurements, and soil sampling activities of six FSS units,

which were combined into two confirmatory survey units. At the time of confirmatory survey activities, structures associated with the BMRC had been demolished and removed from the site. The site consisted of exposed bedrock where the BMRC facility was located, and the impacted soils surrounding the excavation. The ORAU provided the results of the confirmatory surveys in a report dated January 6, 2016 (ADAMS Accession No. ML16006A200). The ORAU site data support the conclusion that the residual activity levels satisfy the DCGLs.

Based on observations during NRC inspections, decommissioning activities have been carried out by UB in accordance with the approved BMRC DP. Additionally, the NRC staff evaluated the licensee’s FSS Report and the results of the independent confirmatory survey conducted by ORAU. Based on the NRC staff’s evaluation of the FSS Report sampling and scanning data, NRC staff inspections, ORAU confirmatory analysis, and comparison to the BMRC reactor DP and FSS Plan criteria, the NRC staff concludes that the BMRC reactor decommissioning has been performed and completed in accordance with the approved DP, and that the facility and site are suitable for unrestricted release in accordance with the radiological criteria for license termination in 10 CFR part 20, subpart E.

Therefore, pursuant to 10 CFR 50.82(b)(6), Facility Operating License No. R-77 is terminated.

Dated at Rockville, Maryland, this 6th day of August, 2018.

For the Nuclear Regulatory Commission.

Andrea L. Kock,

Acting Director, Division of Decommissioning, Uranium Recovery and Waste Programs, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2017–0209]

Information Collection: General Domestic Licenses for Byproduct Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently

submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, “General Domestic Licenses for Byproduct Material.”

DATES: Submit comments by September 13, 2018.

ADDRESSES: Submit comments directly to the OMB reviewer at: OMB Office of Information and Regulatory Affairs (3150–0016), Attn: Desk Officer for the Nuclear Regulatory Commission, 725 17th Street NW, Washington, D.C. 20503; email: oir_submission@omb.eop.gov.

FOR FURTHER INFORMATION CONTACT:

David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555–0001; telephone: 301–415–2084; email: Infocollects.Resource@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2017–0209 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2017–0209.
- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The supporting statement is available in ADAMS under Accession No. ML18164A186.

- *NRC’s PDR:* You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

- *NRC’s Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC’s Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555–0001; telephone: 301–415–2084; email: Infocollects.Resource@nrc.gov.

B. Submitting Comments

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <http://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "General Domestic Licenses for Byproduct Material." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 10, 2018, 83 FR 15421.

1. *The title of the information collection:* Title 10 of the *Code of Federal Regulations* (10 CFR) part 31, "General Domestic Licenses for Byproduct Material."

2. *OMB approval number:* 3150-0016.

3. *Type of submission:* Revision.

4. *The form number if applicable:* N/A.

5. *How often the collection is required or requested:* Reports are submitted as events occur. General license registration requests may be submitted at any time. Changes to the information on the registration may be submitted as they occur.

6. *Who will be required or asked to respond:* Persons receiving, possessing, using, or transferring devices containing byproduct material.

7. *The estimated number of annual responses:* 140,281 (10,681 responses + 129,600 recordkeepers).

8. *The estimated number of annual respondents:* 10,681 (993 NRC licensee

respondents + 9,688 Agreement State respondents).

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 36,638 hours (4,926 hours for NRC licensees + 31,712 hours for Agreement State licensees).

10. *Abstract:* 10 CFR part 31 establishes general licenses for the possession and use of byproduct material in certain devices. General licensees are required to keep testing records and submit event reports identified in 10 CFR part 31, which assist the NRC in determining, with reasonable assurance, that devices are operated safely and without radiological hazard to users or the public.

Dated at Rockville, Maryland, this 9th day of August, 2018.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8502; NRC-2012-0120]

Uranium One; Ludeman Satellite

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering an amendment of License SUA-1341, to expand operations to the Ludeman Satellite at Uranium One's Willow Creek In-situ recovery (ISR) facility (Docket No. 40-8502). The NRC has prepared an environmental assessment (EA) and finding of no significant impact (FONSI) for this licensing action.

DATES: The environmental assessment referenced in this document is available on August 14, 2018.

ADDRESSES: Please refer to Docket ID NRC-2012-0120 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2012-0120. Address questions about NRC dockets to Jennifer Borges; telephone: 301-287-9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the

individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT:

Ashley Waldron, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001; telephone: 301-415-7317; email: Ashley.Waldron@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of an amendment of License No. SUA-1341, issued to Uranium One, for operation of the Ludeman Satellite, located in Wyoming, Converse County. Therefore, as required by part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC performed an environmental assessment. Based on the results of the environmental assessment, the NRC has determined not to prepare an environmental impact statement for the amendment, and is issuing a finding of no significant impact.

II. Environmental Assessment

Description of the Proposed Action

The proposed action would allow Uranium One to construct, operate, perform aquifer restoration, and decommissioning activities at the Ludeman Satellite. The proposed action is in accordance with the licensee's application dated December 3, 2011 (ADAMS Accession No. ML120120182).

Need for the Proposed Action

The proposed action allows Uranium One to recover uranium within the proposed Ludeman Satellite. The licensee would process the recovered uranium into yellowcake at the existing central processing plant (CPP) currently
