FEDERAL REGISTER

Vol. 83 Friday,

No. 160 August 17, 2018

Book 1 of 3 Books

Pages 40931–41142

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 83 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 83, No. 160
Friday, August 17, 2018

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1205

[Doc. #AMS–CN–18–0013]

Cotton Board Rules and Regulations: Adjusting Supplemental Assessment on Imports (2018 Amendments)

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Direct final rule.

SUMMARY: The Agricultural Marketing Service (AMS) is amending the Cotton Board Rules and Regulations, increasing the value assigned to imported cotton for the purposes of calculating supplemental assessments collected for use by the Cotton Research and Promotion Program. This amendment is required each year to ensure that assessments collected on imported cotton and the cotton content of imported products will be the same as those paid on domestically produced cotton. In addition, AMS is updating the Harmonized Tariff Schedule (HTS) statistical reporting numbers that were amended since the last assessment adjustment in 2017.

DATES: This direct rule is effective October 16, 2018, without further action or notice, unless significant adverse comment is received by September 17, 2018. If significant adverse comment is received, AMS will publish a timely withdrawal of the amendment in the **Federal Register**.

ADDRESSES: Written comments may be submitted to the addresses specified below. All comments will be made available to the public. Please do not include personally identifiable information (such as name, address, or other contact information) or confidential business information that you do not want publically disclosed. All comments may be posted on the internet and can be retrieved by most internet search engines. Comments may be submitted anonymously.

Comments, identified by AMS–CN–18–0013, may be submitted electronically through the *Federal eRulemaking Portal at http://www.regulations.gov.* Please follow the instructions for submitting comments. In addition, comments may be submitted by *mail or hand delivery* to Cotton Research and Promotion, Cotton and Tobacco Program, AMS, USDA, 100 Riverside Parkway, Suite 101, Fredericksburg, Virginia, 22406. Comments should be submitted in triplicate. All comments received will be made available for public inspection at Cotton and Tobacco Program, AMS, USDA, 100 Riverside Parkway, Suite 101, Fredericksburg, Virginia 22406. A copy of this document may be found at: *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Shethir M. Riva, Director, Research and Promotion, Cotton and Tobacco Program, AMS, USDA, 100 Riverside Parkway, Suite 101, Fredericksburg, Virginia, 22406, telephone (540) 361–2726, facsimile (540) 361–1199, or email at *Shethir.Riva@ams.usda.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

Amendments to the Cotton Research and Promotion Act (7 U.S.C. 2101–2118) (Act) were enacted by Congress under Subtitle G of Title XIX of the Food, Agriculture, Conservation, and Trade Act of 1990 (Pub. L. 101–624, 104 Stat. 3909, November 28, 1990). These amendments contained two provisions that authorize changes in the funding procedures for the Cotton Research and Promotion Program. These provisions provide for: (1) The assessment of imported cotton and cotton products; and (2) termination of refunds to cotton producers. (Prior to the 1990 amendments to the Act, producers could request assessment refunds.)

As amended, the Cotton Research and Promotion Order (7 CFR part 1205) (Order) was approved by producers and importers voting in a referendum held July 17–26, 1991, and the amended Order was published in the **Federal Register** on December 10, 1991, (56 FR 64470). A proposed rule implementing the amended Order was published in the **Federal Register** on December 17, 1991, (56 FR 65450). Implementing rules were published on July 1 and 2, 1992, (57 FR 29181) and (57 FR 29431), respectively.

This direct final rule would amend the value assigned to imported cotton in the Cotton Board Rules and Regulations (7 CFR 1205.510(b)(2)) that is used to determine the Cotton Research and Promotion assessment on imported cotton and cotton products. The total value of assessment levied on cotton imports is the sum of two parts. The first part of the assessment is based on the weight of cotton imported—levied at a rate of $1 per bale of cotton, which is equivalent to 500 pounds, or $1 per 226.8 kilograms of cotton. The second part of the import assessment (referred to as the supplemental assessment) is based on the value of imported cotton lint or the cotton contained in imported cotton products—levied at a rate of five-tenths of one percent of the value of domestically produced cotton.

Section 1205.510(b)(2) of the Cotton Research and Promotion Rules and Regulations provides for assigning the calendar year weighted average price received by U.S. farmers for Upland cotton to represent the value of imported cotton. This is so that the assessment on domestically produced cotton and the assessment on imported cotton and the cotton content of imported products is the same. The source for the average price statistic is *Agricultural Prices,* a publication of the National Agricultural Statistics Service (NASS) of the Department of Agriculture. Use of the weighted average price figure in the calculation of supplemental assessments on imported cotton and the cotton content of imported products will yield an assessment that is the same as assessments paid on domestically produced cotton.

The current value of imported cotton as published in 2017 in the **Federal Register** (82 FR 41829) for the purpose of calculating assessments on imported cotton is $0.011510 per kilogram. Using the average weighted price received by U.S. farmers for Upland cotton for the calendar year 2017, this direct final rule would amend the new value of imported cotton to $0.011905 per kilogram to reflect the price paid by U.S. farmers for Upland cotton during 2017.

An example of the complete assessment formula and how the figures are obtained is as follows:

One bale is equal to 500 pounds.

One kilogram equals 2.2046 pounds. One pound equals 0.453597 kilograms.

One Dollar per Bale Assessment Converted to Kilograms

A 500-pound bale equals 226.8 kg. (500 × 0.453597).
$1 per bale assessment equals $0.002000 per pound or $0.2000 cents per pound (1/500) or $0.004409 per kg or $0.4409 cents per kg. (1/226.8).

Supplemental Assessment of 5/10 of One Percent of the Value of the Cotton Converted to Kilograms

The 2017 calendar year weighted average price received by producers for Upland cotton is $0.68 per pound or $1.499128 per kg. (0.68 × 2.2046).
Five tenths of one percent of the average price equals $0.007496 per kg. (1.499128 × 0.005).

Total Assessment

The total assessment per kilogram of raw cotton is obtained by adding the $1 per bale equivalent assessment of $0.004409 per kg. and the supplemental assessment $0.007496 per kg., which equals $0.011905 per kg.

The current assessment on imported cotton is $0.011510 per kilogram of imported cotton. The revised assessment in this direct final rule is $0.011905, an increase of $0.000395 per kilogram. This increase reflects the increase in the average weighted price of Upland cotton received by U.S. farmers during the period January through December 2017.

Import Assessment Table in section 1205.510(b)(3) indicates the total assessment rate ($ per kilogram) due for each Harmonized Tariff Schedule (HTS) number that is subject to assessment. This table must be revised each year to reflect changes in supplemental assessment rates and any changes to the HTS numbers. In this direct final rule, AMS is amending the Import Assessment Table.

AMS believes that these amendments are necessary to ensure that assessments collected on imported cotton and the cotton content of imported products are the same as those paid on domestically produced cotton. Accordingly, changes reflected in this rule should be adopted and implemented as soon as possible since it is required by regulation.

As described in this **Federal Register** document, the amendment to the value used to determine the Cotton Research and Promotion Program importer assessment will be updated to reflect the assessment already paid by U.S. farmers. For the reasons mentioned above, AMS finds that publishing a proposed rule and seeking public comment is unnecessary because the change is required annually by regulation in 7 CFR 1205.510.

Also, this direct-final rulemaking furthers the objectives of Executive Order 13563, which requires that the regulatory process ''promote predictability and reduce uncertainty'' and ''identify and use the best, most innovative, and least burdensome tools for achieving regulatory ends.''

AMS has used the direct rule rulemaking process since 2013 and has not received any adverse comments; however, if AMS does receives significant adverse comment during the comment period, it will publish, in a timely manner, a document in the **Federal Register** withdrawing this direct final rule. AMS will then address public comments in a subsequent proposed rule and final rule based on the proposed rule.

B. Regulatory Impact Analysis

Executive Order 13175

This action has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. The review reveals that this regulation would not have substantial and direct effects on Tribal governments and would not have significant Tribal implications.

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review. Additionally, because this rule does not meet the definition of a significant regulatory action it does not trigger the requirements contained in Executive Order 13771. See OMB's Memorandum titled ''Interim Guidance Implementing Section 2 of the Executive Order of January 30, 2017 titled 'Reducing Regulation and Controlling Regulatory Costs' '' (February 2, 2017).

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 12 of the Act, any person subject to an order may file with the Secretary of Agriculture (Secretary) a petition stating that the order, any provision of the plan, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such person is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule on the petition. The Act provides that the District Court of the United States in any district in which the person is an inhabitant, or has his principal place of business, has jurisdiction to review the Secretary's ruling, provided a complaint is filed within 20 days from the date of the entry of the Secretary's ruling.

Regulatory Flexibility Act and Paperwork Reduction Act

In accordance with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS has examined the economic impact of this rule on small entities. The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such action so that small businesses will not be unduly or disproportionately burdened. The Small Business Administration defines, in 13 CFR part 121, small agricultural producers as those having annual receipts of no more than $750,000 and small agricultural service firms (importers) as having receipts of no more than $7,500,000. In 2017, an estimated 20,000 importers are subject to the rules and regulations issued pursuant to the Cotton Research and Promotion Order. Most are considered small entities as defined by the Small Business Administration.

This rule would only affect importers of cotton and cotton-containing products and would increase the assessments paid by the importers under the Cotton Research and Promotion Order. The current assessment on imported cotton is $0.011510 per kilogram of imported cotton. The amended assessment would be $0.011905, which was calculated based on the 12-month weighted average of price received by U.S. cotton farmers. Section 1205.510, ''Levy of assessments'', provides ''The rate of the supplemental assessment on imported cotton will be the same as that levied on cotton produced within the United States.'' In addition, section 1205.510 provides that the 12-month weighted average of prices received by U.S.

farmers will be used as the value of imported cotton for the purpose of levying the supplemental assessment on imported cotton.

Under the Cotton Research and Promotion Program, assessments are used by the Cotton Board to finance research and promotion programs designed to increase consumer demand for Upland cotton in the United States and international markets. In 2016 (the last audited year), producer assessments totaled $36.5 million and importer assessments totaled $36.51 million. According to the Cotton Board, should the volume of cotton products imported into the U.S. remain at the same level in 2018, one could expect an increase of assessments by approximately $1,278,951.

Imported organic cotton and products may be exempt from assessment if eligible under section 1205.519 of the Order.

There are no Federal rules that duplicate, overlap, or conflict with this rule.

In compliance with Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act (PRA) (44 U.S.C. Chapter 35) the information collection requirements contained in the regulation to be amended have been previously approved by OMB and were assigned control number 0581–0093, National Research, Promotion, and Consumer Information Programs. This rule does not result in a change to the information collection and recordkeeping requirements previously approved.

A 30-day comment period is provided to comment on the changes to the Cotton Board Rules and Regulations proposed herein. This period is deemed appropriate because an amendment is required to adjust the assessments collected on imported cotton and the cotton content of imported products to be the same as those paid on domestically produced cotton. Accordingly, the change in this rule, if adopted, should be implemented as soon as possible.

List of Subjects in 7 CFR Part 1205

Advertising, Agricultural research, Cotton, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, AMS amends 7 CFR part 1205 as follows:

PART 1205—COTTON RESEARCH AND PROMOTION

■ 1. The authority citation for part 1205 continues to read as follows:

Authority: 7 U.S.C. 2101–2118; 7 U.S.C 7401.

■ 2. In § 1205.510, paragraph (b)(2) and the table in paragraph (b)(3) are revised to read as follows:

§ 1205.510 Levy of assessments.

* * * * *

(b) * * *

(2) The 12-month average of monthly weighted average prices received by U.S. farmers will be calculated annually. Such weighted average will be used as the value of imported cotton for the purpose of levying the supplemental assessment on imported cotton and will be expressed in kilograms. The value of imported cotton for the purpose of levying this supplemental assessment is $1.1905 cents per kilogram.

(3) * * *

BUREAU OF CONSUMER FINANCIAL PROTECTION

12 CFR Part 1016

[Docket No. CFPB–2016–0032]

RIN 3170–AA60

Amendment to the Annual Privacy Notice Requirement Under the Gramm-Leach-Bliley Act (Regulation P)

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Final rule.

SUMMARY: The Bureau of Consumer Financial Protection (Bureau) is amending Regulation P, which requires, among other things, that financial institutions provide an annual notice describing their privacy policies and practices to their customers. The amendment implements a December 2015 statutory amendment to the Gramm-Leach-Bliley Act providing an exception to this annual notice requirement for financial institutions that meet certain conditions.

DATES: The amendments to Regulation P in this final rule will become effective on September 17, 2018.

FOR FURTHER INFORMATION CONTACT: Monique Chenault, Paralegal Specialist; Joseph Devlin, Senior Counsel; Office of Regulations, at (202) 435–7700.

SUPPLEMENTARY INFORMATION:

I. Summary of the Final Rule

Title V, Subtitle A of the Gramm-Leach-Bliley Act (GLBA) [1] and Regulation P, which implements the GLBA, mandate that financial institutions provide their customers with annual notices regarding those institutions' privacy policies. If financial institutions share certain consumer information with particular types of third parties, the annual notices must also provide customers with an opportunity to opt out of the sharing. Regulation P sets forth requirements for how financial institutions must deliver these annual privacy notices. In certain circumstances, Regulation P permits financial institutions to use an alternative delivery method to provide annual notices. This method requires, among other things, that the annual notice be posted on a financial institution's website.

On December 4, 2015, Congress amended the GLBA as part of the Fixing America's Surface Transportation Act (FAST Act). This amendment, titled Eliminate Privacy Notice Confusion,[2] added new GLBA section 503(f). This subsection provides an exception under which financial institutions that meet certain conditions are not required to provide annual privacy notices to customers. Section 503(f)(1) requires that to qualify for this exception, a financial institution must not share nonpublic personal information about customers except as described in certain statutory exceptions. (Sharing as described in these specified statutory exceptions does not trigger the customer's statutory right to opt out of the financial institution's sharing.) In addition, section 503(f)(2) requires that the financial institution must not have changed its policies and practices with regard to disclosing nonpublic personal information from those that the institution disclosed in the most recent privacy notice it sent.

Section 503(f) took effect upon enactment in December 2015. In July 2016 the Bureau proposed to update Regulation P to reflect the change in the underlying law. As part of its implementation, the Bureau is also amending Regulation P to provide timing requirements for delivery of annual privacy notices in the event that a financial institution that qualified for this annual notice exception later changes its policies or practices in such a way that it no longer qualifies for the exception. The Bureau is further

[1] 15 U.S.C. 6801 through 6809.

[2] FAST Act, Public Law 114–94, section 75001.

removing the Regulation P provision that allows for use of the alternative delivery method for annual privacy notices because the Bureau believes the alternative delivery method will no longer be used in light of the annual notice exception. Finally, the Bureau is amending Regulation P to make a technical correction to one of its definitions.

II. Background

A. The Statute and Regulation

The GLBA was enacted into law in 1999 and governs the privacy practices of a broad range of financial institutions.[3] Rulemaking authority to implement the GLBA privacy provisions was initially spread among many agencies. The Federal Reserve Board (Board), the Office of Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), and the Office of Thrift Supervision (OTS) jointly adopted final rules in 2000 to implement the notice requirements of the GLBA.[4] The National Credit Union Administration (NCUA), Federal Trade Commission (FTC), Securities and Exchange Commission (SEC), and Commodity Futures Trading Commission (CFTC) were part of the same interagency process, but each of these agencies issued separate rules.[5] In 2009, all of the agencies with the authority to issue rules to implement the GLBA privacy notice provisions issued a joint final rule with a model form that financial institutions could use, at their option, to provide required initial and annual disclosures.[6]

In 2011, the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act)[7] transferred GLBA privacy notice rulemaking authority from the Board, NCUA, OCC, OTS, the FDIC, and the FTC (in part) to the Bureau.[8] The Bureau then restated the implementing regulations in Regulation P, 12 CFR part 1016, in late 2011 through an interim final rule.[9] In April 2016, the Bureau finalized that interim final rule as amended by 79 FR 64057 (Oct. 28, 2014).[10]

The Bureau has the authority to promulgate GLBA privacy rules for depository institutions and many non-depository institutions. However, rulewriting authority with regard to securities and futures-related companies is vested in the SEC and CFTC, respectively, and rulewriting authority with respect to certain motor vehicle dealers is vested in the FTC.[11] The four agencies are required to consult with each other and with representatives of State insurance authorities to assure, to the extent possible, consistency and comparability among implementing rules.[12] Toward that end, the Bureau has consulted and coordinated with these agencies and with the National Association of Insurance Commissioners (NAIC) concerning this final rule and the proposal that preceded it. The Bureau has also consulted with prudential regulators and other appropriate Federal agencies, as required under Section 1022 of the Dodd-Frank Act as part of its general rulewriting process.[13]

The GLBA and Regulation P require that financial institutions provide consumers with certain notices describing their privacy policies.[14] Financial institutions are generally required to provide an initial notice of these policies when a customer relationship is established and to provide an annual notice to customers every year that the customer relationship continues.[15] Except as otherwise authorized in the regulation, if a financial institution chooses to disclose nonpublic personal information about a consumer to a nonaffiliated third party other than as described in its initial notice, the institution is also required to deliver a revised privacy notice.[16] The types of information required to be included in the initial, annual, and revised notices are identical. Each notice must describe whether and how the financial institution shares consumers' nonpublic personal information with other entities.[17] The notices must also briefly describe how financial institutions protect the nonpublic personal information they collect and maintain.[18]

GLBA Section 502 and Regulation P also require that initial, annual, and revised notices provide information about the right to opt out of certain financial institution sharing of nonpublic personal information with some types of nonaffiliated third parties. For example, a mortgage customer has the right to opt out of a financial institution disclosing his or her name and address to an unaffiliated home insurance company. On the other hand, a financial institution is not required to allow a consumer to opt out of the institution's disclosure of his or her nonpublic personal information to third party service providers and pursuant to joint marketing arrangements subject to certain requirements; disclosures relating to maintaining and servicing accounts, securitization, law enforcement and compliance, and consumer reporting; and certain other disclosures described in the GLBA and Regulation P as exceptions to the opt-out requirement.[19]

In addition to opt-out rights under the GLBA, annual privacy notices also may include information about certain consumer opt-out rights under the Fair Credit Reporting Act (FCRA). The privacy notices under the GLBA/Regulation P and affiliate disclosures under the FCRA/Regulation V interact in two ways. First, section 603(d)(2)(A)(iii) of the FCRA excludes from that statute's definition of a consumer report[20] the sharing of certain information about a consumer with the institution's affiliates if the consumer is notified of such sharing and is given an opportunity to opt out.[21] Section 503(c)(4) of the GLBA and Regulation P require financial institutions to incorporate into any required Regulation P notices the notification and opt-out disclosures provided pursuant to section 603(d)(2)(A)(iii) of the FCRA, if the institution provides such disclosures.[22]

Second, section 624 of the FCRA and Regulation V's Affiliate Marketing Rule provide that an affiliate of a financial institution that receives certain information (*e.g.,* transaction history)[23]

[23] The type of information to which section 624 applies is information that would be a consumer

from the institution about a consumer may not use the information to make solicitations for marketing purposes unless the consumer is notified of such use and provided with an opportunity to opt out of that use.[24] Section 624 of the FCRA and Regulation V also permit (but do not require) financial institutions to incorporate any opt-out disclosures provided under section 624 of the FCRA and subpart C of Regulation V into privacy notices provided pursuant to the GLBA and Regulation P.[25]

B. The Alternative Delivery Method for Annual Privacy Notices

In pursuit of the Bureau's goal of reducing unnecessary or unduly burdensome regulations, the Bureau in December 2011 issued a Request for Information (RFI) seeking specific suggestions from the public for streamlining regulations the Bureau had inherited from other Federal agencies. In that RFI, the Bureau specifically identified the annual privacy notice as a potential opportunity for streamlining and solicited comment on possible alternatives to delivering the annual privacy notice.[26] Numerous industry commenters responded to the RFI by advocating for the elimination or limitation of the annual notice requirement.

Financial institutions historically have provided annual notices generally by U.S. postal mail.[27] In 2014, the Bureau adopted a rule to allow financial institutions to use an alternative delivery method to provide annual privacy notices through posting the notices on their websites if they meet certain conditions.[28] Specifically, financial institutions were allowed to use the alternative delivery method for annual notices if: (1) No opt-out rights were triggered by the financial institution's information sharing practices under the GLBA; (2) no FCRA section 603 opt-out notices were required to appear on the annual notice and any opt-outs required by FCRA section 624 had previously been provided, if applicable, or the annual notice was not the only notice provided to satisfy those requirements; (3) the information included in the annual notice had not changed since the customer received the previous notice; and (4) the financial institution used the model form provided in Regulation P for its annual notice.

In addition, to assist customers with limited or no access to the internet, an institution using the alternative delivery method was required to mail annual notices to customers who requested them by telephone. To make customers aware that its annual privacy notice was available through the website or by phone, the institution was required to include a clear and conspicuous statement of availability at least once per year on an account statement, coupon book, or a notice or disclosure the institution issued under any provision of law.

C. Statutory Amendment and Proposed Rule

On December 4, 2015, Congress amended the GLBA as part of the FAST Act. This amendment, titled Eliminate Privacy Notice Confusion,[29] added new GLBA section 503(f), which provides an exception under which financial institutions that meet two conditions are not required to provide annual notices to customers.[30] New GLBA section 503(f)(1) states the first condition for the annual notice exception: That a financial institution must provide nonpublic personal information only in accordance with certain exceptions in the GLBA; providing nonpublic personal information under these exceptions does not trigger consumer opt-out rights.[31] New GLBA section 503(f)(2) states the second condition for the annual notice exception: That a financial institution must not have changed its policies and practices with regard to disclosing nonpublic personal information from the policies and practices that were disclosed in the most recent disclosure sent to consumers in accordance with GLBA section 503. The statutory amendment became effective upon enactment in December 2015.

On July 15, 2016, the Bureau published a proposed rule to implement the FAST Act statutory amendment to the GLBA. The Bureau has considered the comments received on that proposed rule, and now issues this final rule based on it.

D. Effective Date

As discussed above, the statutory exception to the annual notice requirement is already effective. The amendments to Regulation P in this final rule will be effective 30 days from the date of publication in the **Federal Register**.

E. Privacy Considerations

In developing this final rule, the Bureau considered its potential impact on consumer privacy. The rule will not affect the collection or use of consumers' nonpublic personal information by financial institutions. The rule implements a new statutory exception to limit the circumstances under which financial institutions subject to Regulation P will be required to deliver annual privacy notices to their customers. Delivery of annual privacy notices is required under the rule if financial institutions make certain types of changes to their privacy policies or if the statute and Regulation P afford customers the right to opt out of financial institutions' sharing of customers' nonpublic personal information with nonaffiliated third parties. The statutory exception and this final rule do not affect the requirement to deliver an initial privacy notice, and all consumers will continue to receive such notices describing the privacy policies of any financial institutions with which they do business to the extent currently required.

III. Legal Authority

The Bureau is issuing this final rule pursuant to its authority under section 504 of the GLBA, as amended by section 1093 of the Dodd-Frank Act.[32] The Bureau is also issuing this rule pursuant to its authority under sections 1022 and 1061 of the Dodd-Frank Act.[33]

IV. Section-by-Section Analysis

Section 1016.3 Definitions

3(s)(1)

Regulation P's substantive requirements, including the requirement to deliver privacy notices, are generally

report, but for the exclusions provided by section 603(d)(2)(A)(i), (ii), or (iii) of the FCRA.

[24] 15 U.S.C. 1681s–3 and 12 CFR pt. 1022, subpart C.

[25] 15 U.S.C. 1681s–3(b); 12 CFR 1022.23(b).

[26] 76 FR 75825, 75828 (Dec. 5, 2011).

[27] Regulation P, however, does allow financial institutions to provide notices electronically (*e.g.,* by email) with consent. 12 CFR 1016.9(a) (stating that a financial institution may deliver the notice electronically if the consumer agrees). The Bureau believes that most consumers do not receive privacy notices electronically.

[28] 79 FR 64057 (revising 12 CFR 1016.9(c)). The Bureau's alternative delivery method became effective on October 28, 2014. *Id.*

[29] FAST Act, Public Law 114–94, section 75001.

[30] In order to avoid confusion and facilitate responsiveness to consumer requests, the Bureau notes that a financial institution that qualifies for the annual notice exception could provide a privacy notice to a customer without jeopardizing the availability of the exception, such as in response to a customer specifically requesting a copy of the notice.

[31] These provisions are in GLBA section 502(b)(2) or (e) and are incorporated into existing Regulation P at § 1016.13, § 1016.14, and § 1016.15. They provide exceptions from the requirement that a financial institution provide notice and an opportunity to opt out of sharing nonpublic personal information with a nonaffiliated third party.

[32] 15 U.S.C. 6804.

[33] 12 U.S.C. 5512, 5581.

imposed upon entities that meet the definition of ''You'' in § 1016.3(s)(1). That provision defines ''You'' as a ''financial institution or other person for which the Bureau has rulemaking authority under section 504(a)(1)(A) of the GLBA.'' In order to coordinate this definition more correctly with the term's usage in the regulation, the Bureau proposed to limit ''You'' to financial institutions.

The Bureau received no comments on this technical amendment, and adopts it now as proposed.

As explained above, Regulation P's substantive requirements, including the requirement to deliver privacy notices, are generally imposed upon entities that meet the definition of ''You'' in § 1016.3(s)(1). The Bureau has rulemaking authority over entities other than financial institutions pursuant to GLBA section 504(a)(1)(A).[34] The statute's privacy notice requirements, however, specifically apply only to financial institutions.[35] The Bureau therefore believes that it is appropriate to limit the definition of ''You'' in § 1016.3(s)(1) to financial institutions. For this reason, the Bureau is amending § 1016.3(s)(1) to remove the phrase ''or other persons.'' The Bureau does not believe this technical amendment to § 1016.3(s)(1) will change the settled understanding of the scope of Regulation P's privacy notice requirements. Instead, the Bureau believes it will clarify that the scope of Regulation P's privacy notice requirements is consistent with the understanding of stakeholders.

Section 1016.5 Annual Privacy Notice to Customers Required

5(a) General Rule

The Bureau proposed to amend the general requirement in § 1016.5(a)(1) that financial institutions provide annual notices, to clarify that the Bureau has added an exception to this requirement in § 1016.5(e) to incorporate the amendment to GLBA section 503.

No commenters specifically discussed the conforming change to the general rule in § 1016.5(a). One commenter suggested that the Bureau remove any GLBA privacy notice requirement and instead require financial institutions to post their privacy notices online, allow all consumers to choose whether to receive any privacy notices, make electronic notices the default for any consumers who opt to receive any privacy notices, and allow financial institutions to charge fees for any paper privacy notices they provide.

The Bureau now adopts the conforming amendment to the general requirement in § 1016.5(a)(1) that financial institutions provide annual notices, to clarify that the Bureau has added an exception to this requirement in § 1016.5(e) to incorporate the amendment to GLBA section 503. The Bureau does not believe that the comment is relevant to the proposal and it does not provide a basis to change the approach proposed by the Bureau. Congress did not include revisions along the lines the commenter suggested in the statutory provision that the Bureau is implementing in this rulemaking.

5(e) Exception to Annual Notice Requirement

New GLBA § 503(f) provides that a financial institution is excepted from providing an annual notice if it meets the two conditions described below. The Bureau proposed to add new § 1016.5(e) to incorporate into Regulation P the exception created by new § 503(f). Under proposed § 1016.5(e), as in section 503(f), a financial institution would be excepted from providing an annual notice if it meets the two conditions discussed below.

The commenters overwhelmingly supported proposed § 1016.5(e). Although some commenters asked that the exception be broadened, no commenters who discussed the proposed exception objected to it. The commenters stated that the exception would reduce burden and would not harm consumers, and was less complicated and burdensome than the previous alternative delivery method. Some suggested that the provision would benefit consumers. The comments that specifically discussed either of the two requirements for the exception, in § 1016.5(e)(1)(i) and (ii), are discussed below in relation to those provisions.

A trade association representing credit unions requested that to eliminate confusion and protect institutions from citations, the rule should be effective retroactive to December 4, 2015, the date the statutory GLBA amendments took effect. In addition, an attorney suggested that the Bureau preempt State privacy statutes that might require institutions to continue providing annual privacy notices in spite of the Federal exception. The attorney recommended the Bureau modify § 1016.17 to expressly preempt contrary State law, and instead require that an institution make its privacy notice continually available online.

After considering the comments and for the reasons discussed below, the Bureau now adopts the exception to the annual notice requirement largely as proposed, with certain changes to the timing provisions in § 1016.5(e)(2), as discussed below.

In regard to the comment recommending that § 1016.17 be modified, § 1016.17 implements GLBA § 507,[36] which provides specific standards regarding preemption of State law. The Bureau does not believe that the comment is relevant to the proposal and it does not provide a basis to change the approach proposed by the Bureau. Congress did not include revisions along the lines the commenter suggested in the statute that the Bureau is implementing in this rulemaking.

In regard to the comment on retroactivity, the Bureau has made clear in the proposed rule and this final rule that new GLBA § 503(f) became effective upon enactment in December 2015.[37] As the central elements of this rule are already in effect, the Bureau believes that there is no need to make this rule retroactive. To the extent that this rule changes applicable law, the Bureau notes that retroactive rulemaking is disfavored by the courts, and the commenter has not established why it would be appropriate here. This rule takes effect 30 days after its publication in the **Federal Register**.

5(e)(1) When Exception Available

5(e)(1)(i)

New GLBA section 503(f)(1) states the first condition for the annual privacy notice exception: that a financial institution provide nonpublic personal information only in accordance with the provisions of subsection (b)(2) or (e) of section 502 of the GLBA. The Bureau proposed § 1016.5(e)(1)(i) to incorporate this condition by requiring that to qualify for the annual notice exception, any nonpublic personal information that financial institutions provide to nonaffiliated third parties must be provided only in accordance with § 1016.13, § 1016.14 or § 1016.15 of Regulation P.

Almost no commenters specifically discussed the first of the two requirements of the new statutory exception. One credit union explained that it does not share nonpublic personal information beyond the exceptions provided in § 1016.13,

[34] Such rulemaking authority has been exercised with respect to nonaffiliated third parties to which a financial institution discloses nonpublic personal information and that third party's affiliates for purposes of GLBA section 502(c)'s limits on reuse of information. *See* 12 CFR 1016.11(c)–(d).

[35] *See* GLBA sections 502(a)–(b) and 503(a).

[36] 15 U.S.C. 6807.

[37] See above, Part II.C.

§ 1016.14 or § 1016.15 of Regulation P, and that it believes the § 1016.5(e)(1)(i) requirement will work well. Another commenter discussed voluntary opt-outs that a financial institution may offer, asking whether the inclusion on the privacy notice of opt-outs that allow consumers to opt out of sharing that is described in § 1016.13, § 1016.14 or § 1016.15 of Regulation P would interfere with meeting the requirement in § 1016.5(e)(1)(i).

The Bureau now adopts § 1016.5(e)(1)(i) as proposed. Section 1016.5(e)(1)(i) will incorporate the first requirement of GLBA § 503(f) by requiring that to qualify for the annual notice exception, any nonpublic personal information that financial institutions provide to nonaffiliated third parties must be provided only in accordance with § 1016.13, § 1016.14 or § 1016.15 of Regulation P; these regulatory sections implement subsections (b)(2) and (e) of section 502.[38] A financial institution sharing information only pursuant to these exceptions is not required to provide customers with a right to opt out of that sharing. In addition, because they would only involve information sharing within the exceptions of § 1016.13, § 1016.14 or § 1016.15, voluntary opt-outs included on privacy notices would not affect compliance with the § 1016.5(e)(1)(i) requirement or the annual notice exception.

The Bureau notes that § 1016.6(a)(7) requires that annual privacy notices incorporate any disclosures made under FCRA section 603(d)(2)(A)(iii) regarding the consumer's ability to opt out of sharing of information among affiliates. Further, the notices may incorporate any opt-out disclosures provided under FCRA section 624.[39] GLBA section 503(f)(1) does not mention information sharing that would trigger an opt-out notice under FCRA sections 603(d)(2)(A)(iii) or 624.

Given the structure of the statute, the Bureau does not interpret GLBA section 503(f)(1) to preclude financial institutions that provide nonpublic personal information in accordance with FCRA sections 603(d)(2)(A)(iii) or 624 from qualifying for the exception. Thus, as the Bureau stated in its proposal, the presence or absence of these FCRA disclosures on a financial institution's privacy notice will not affect whether the institution satisfies GLBA section 503(f)(1) and § 1016.5(e)(1)(i). As the Bureau noted, however, financial institutions that choose to take advantage of the annual notice exception must still provide any opt-out disclosures required under FCRA sections 603(d)(2)(A)(iii) and 624, if applicable. Under the FCRA, neither of these opt-outs is required to be provided annually.[40] Accordingly, institutions can provide these disclosures through other methods, for example, through their initial privacy notices in most circumstances.

5(e)(1)(ii)

New GLBA section 503(f)(2) states the second condition for the annual notice exception: that a financial institution not have changed its ''policies and practices with regard to disclosing nonpublic personal information'' from the policies and practices that were disclosed in the most recent notice sent to consumers in accordance with GLBA section 503. Because the Bureau determined that the statutory language was ambiguous as to the exact types of sharing intended, the Bureau proposed § 1016.5(e)(1)(ii) to resolve this ambiguity by requiring that, to qualify for the annual notice exception, a financial institution must not have changed its policies and practices with regard to disclosing nonpublic personal information from the policies and practices that were disclosed to the customer under § 1016.6(a)(2) through (5) and (9) in the most recent privacy notice the financial institution provided.

As with the first requirement for the annual notice exception at § 1016.5(e)(1)(i), few commenters specifically discussed the second requirement at § 1016.5(e)(1)(ii). However, the commenters overwhelmingly signaled their support for these provisions by supporting the Bureau's implementation of the statutory exception. Two trade associations representing credit unions did specifically express support for the proposed interpretation of the statutory language as referring only to a change to a disclosure under § 1016.6(a)(2) through (5) and (9).

The Bureau now adopts § 1016.5(e)(1)(ii) as proposed, providing that, to qualify for the annual notice exception, a financial institution must not have changed its policies and practices with regard to disclosing nonpublic personal information from the policies and practices that were disclosed to the customer under § 1016.6(a)(2) through (5) and (9) in the most recent privacy notice the financial institution provided.

Paragraphs (1) through (9) of § 1016.6(a) list the specific information that must be included in privacy notices. Section 1016.6(a)(2) through (5) and (9) require a financial institution to include information related to its policies and practices with regard to disclosing nonpublic personal information, but § 1016.6(a)(1) (information collection) and § 1016.6(a)(8) (confidentiality and security) do not.[41] Accordingly, the Bureau believes that only changes to an institution's policies and practices that would require changes to any of the disclosures required by § 1016.6(a)(2) through (5) and (9) would cause a financial institution to be unable to use the exception in § 1016.5(e)(1)(ii).[42]

Section 1016.6(a)(7) requires that any disclosure an institution makes under FCRA section 603(d)(2)(A)(iii), which describes a consumer's ability to opt out of disclosures of information among affiliates, be included on the privacy notice. The Bureau believes that the statute is ambiguous as to whether a financial institution that changes the disclosure required under § 1016.6(a)(7) from the most recent notice sent to consumers would satisfy GLBA section 503(f)(2). In the proposed rule, the Bureau sought comment on whether proposed § 1016.5(e)(1)(ii) should include changes to disclosures required by § 1016.6(a)(7) and on how frequently institutions change that disclosure. The Bureau further sought comment on whether institutions would prefer to inform customers of these changes

[38] The sharing described in these provisions includes, among other things, sharing involving third party service providers, joint marketing arrangements, maintaining and servicing accounts, securitization, law enforcement and compliance, and reporting to consumer reporting agencies.

[39] 15 U.S.C. 1681s–3(b); 12 CFR 1022.23(b).

[40] *See* 15 U.S.C. 1681a(d)(2)(A)(iii); 12 CFR 1022.21, 1022.27; 72 FR 62910, 62930 (Nov. 7, 2007).

[41] The information specified in § 1016.6(a)(6) describes the consumer's right pursuant to Regulation P to opt out of an institution's disclosure of information and would be inapplicable where a financial institution qualifies for the annual notice exception.

[42] To have used the Bureau's former alternative delivery method, the information a financial institution was required to convey on its annual privacy notice pursuant to § 1016.6(a)(1) through (5), (8), and (9) was required not to have changed from the information disclosed in the most recent privacy notice provided to the consumer. See removed 12 CFR 1016.9(c)(2)(D). Thus, changes to the information a financial institution was required to convey pursuant to § 1016.6(a)(1) and (8) would have prevented a financial institution from using the alternative delivery method but such changes will not prevent a financial institution from satisfying § 1016.5(e)(1)(ii) for the annual notice exception. Because institutions that include information on their privacy notice pursuant to § 1016.6(a)(7) (which relates to opt-out notices provided pursuant to the FCRA) were not permitted to use the alternative delivery method in any case, § 1016.6(a)(7) was not listed as a type of information that if changed would have prevented a financial institution from using the alternative delivery method.

through sending an annual privacy notice or through sending a disclosure describing only the FCRA section 603(d)(2)(A)(iii) opt-outs, if applicable, and also sought comment on the impact on consumers of these two methods.

All the commenters who addressed these issues stated that changes to the disclosures required by FCRA section 603(d)(2)(A)(iii) should not affect the availability of the annual notice exception. A State-wide trade association representing credit unions indicated that the presence or absence of FCRA disclosures on a credit union's privacy notice, and subsequent changes to those FCRA sharing practices, should not impact whether an institution qualifies for the annual notice exception. This trade association stated, without providing data, that it believed that changes by credit unions in its State to FCRA section 603(d)(2)(A)(iii) information disclosures are infrequent, and that few such credit unions share data in a way that trigger a FCRA opt-out in the first place. Other commenters who discussed the 603(d)(2)(A)(iii) information disclosures stated that allowing changes to disqualify financial institutions from the annual notice exception would interfere with the burden reduction intended, and that FCRA has its own disclosure requirements.

Given the structure of the statute, the Bureau does not interpret GLBA section 503(f)(2) to preclude financial institutions that make changes to disclosures required by § 1016.6(a)(7) from qualifying for the exception. The Bureau also notes that a change in the 603(d)(2)(A)(iii) information disclosures only requires a one-time notice and opt out. The Bureau does not believe that consumers would be materially benefited by requiring this one-time notice to be included in a privacy notice under Regulation P, especially where it is required in a separate notice required by the FCRA.

In addition to the discussion of 603(d)(2)(A)(iii) information disclosures, the Bureau noted in the proposed rule that a financial institution would satisfy § 1016.5(e)(1)(ii) if it changes its disclosures describing policies and practices with regard to disclosing nonpublic personal information that are included in the institution's privacy notice without being required by the GLBA or § 1016.6 (*e.g.,* disclosures describing sharing with affiliates under FCRA section 624 or voluntary disclosures and opt-outs). The Bureau sought comment on whether changes to disclosures that are not required to be included in privacy notices by the GLBA or § 1016.6 should cause an institution not to satisfy § 1016.5(e)(1)(ii).

The Bureau received few comments on this issue. A trade association representing credit unions stated that later changes to initial voluntary disclosures should not trigger the need to send annual privacy notices. The commenter suggested that imposing such a requirement would dissuade institutions from making voluntary disclosures. A banking and insurance trade association stated that affiliate marketing policy changes should not impact the availability of the exception. A trade association representing banks stated that changes to disclosures that are not required to be included in privacy notices should not trigger non-compliance. The trade association believed it would be costly and burdensome to add additional disclosures.

As indicated in the preamble to the proposed rule, the Bureau has determined that disclosures describing sharing with affiliates under FCRA section 624 or voluntary disclosures and opt-outs will not affect a financial institution's eligibility for the annual privacy notice exception under GLBA § 503(f). The Bureau believes that the alternative interpretation could discourage the use of voluntary disclosures while adding unnecessary burden.

5(e)(2) Delivery of Annual Privacy Notice After Financial Institution No Longer Meets Requirements for Exception

New GLBA section 503(f) states that a financial institution that meets the requirements for the annual notice exception will not be required to provide annual notices ''until such time'' as the financial institution fails to comply with the criteria described in section 503(f)(1) and 503(f)(2), which are now implemented in § 1016.5(e)(1)(i) and (ii). A financial institution will no longer meet the requirements for the exception either by beginning to share nonpublic personal information in ways that trigger rights to opt-out notices under the GLBA and Regulation P, or by otherwise changing its policies and practices with regard to disclosing nonpublic personal information from the policies and practices that were disclosed to the customer under § 1016.6(a)(2) through (5) and (9) in the most recent privacy notice the financial institution provided.

Financial institutions that no longer meet the conditions for the exception must provide customers with annual privacy notices. However, the GLBA, including new GLBA section 503(f), does not clearly specify when institutions must provide these notices. Thus, the statute is ambiguous on the point. It could be read to require the financial institution to provide an annual privacy notice by the time it changes its policies or practices in such a way that it no longer qualifies for the exception. Alternatively, it could be read to subject the financial institution, at the time it changes its policies or practices in such a way that it no longer qualifies for the exception, to the requirement to provide an annual privacy notice while being silent as to the timing for providing that notice.

Pursuant to its authority in GLBA section 504 to issue rules to implement the GLBA, the Bureau proposed to resolve this ambiguity by adopting this second reading and issuing standards for when institutions must provide these notices. Specifically, in proposed § 1016.5(e)(2)(i) and (ii), the Bureau proposed to use its rulemaking authority under GLBA section 504(a) to establish timing requirements for providing an annual notice in these circumstances. The Bureau proposed to establish these requirements to ensure that delivery of the annual privacy notice in these circumstances is consistent with the existing timing requirements for privacy notices in the regulation, where applicable, and to provide clarity to financial institutions regarding these requirements.

In developing the proposed framework, the Bureau looked to existing requirements under the statute and regulation because they already address circumstances in which a financial institution might change its policies and procedures in a way that affects the content of the notices. Specifically, § 1016.8 requires that the financial institution provide a revised notice to consumers *before* implementing certain types of changes; in other cases, the statute and regulation currently contemplate that a change in policy and procedure that affects the content of the notices would simply be reflected on the next regular annual notice provided to the customer. The Bureau is therefore proposing different timing requirements for the resumption of the annual notice requirement depending on whether the change at issue would trigger the requirement for a revised notice under § 1016.8 prior to the change taking effect.

Accordingly, the timing requirements in proposed § 1016.5(e)(2)(i) and (ii) would differ depending on whether the change that causes the financial institution to no longer satisfy the conditions for the annual notice

exception also triggers a requirement under existing Regulation P to deliver a revised notice. Section 1016.8 currently requires that financial institutions provide revised notices to consumers before the institutions share nonpublic personal information with a nonaffiliated third party if their sharing would be different from what the institution described in the initial notice it delivered. After delivering the revised notice, the financial institution must also give the consumer a reasonable opportunity to opt out of any new information sharing beyond the Regulation P exceptions before the new sharing occurs.

Three-fifths of all industry commenters on the proposed rule specifically addressed the proposed timing requirements. The comments on the timing requirements viewed the requirement in § 1016.5(e)(2)(i) and that in § 1016.5(e)(2)(ii) very differently, as will be discussed below in regard to those sections. In regard to the overall timing requirements, one trade association representing credit unions expressed appreciation for the Bureau's proposal, stating that such clarification will eliminate confusion surrounding delivery requirements after a financial institution no longer meets the requirements for the exception. A trade association representing banks supported the proposed timing requirements, asserting that institutions will not find it difficult to comply with the suggested conditions. This commenter also requested clarification that once notices are sent and there are no further privacy changes, an institution will be able to again qualify for the exception, thus excepting them from having to send further annual notices.

The Bureau is adopting the timing provisions largely as proposed, with a change to the duration of the timing requirement in § 1016.5(e)(2)(ii), as discussed below. The Bureau is also adding another example to § 1016.5(e)(2)(iii) to clarify whether a financial institution again qualifies for the annual notice exception after delivering an annual notice under § 1016.5(e)(2).

5(e)(2)(i) Changes Preceded by a Revised Privacy Notice

For changes to a financial institution's policies or practices that cause it to no longer satisfy the conditions for the exception and also trigger an obligation to send a revised notice prior to the change, the Bureau proposed in § 1016.5(e)(2)(i) that financial institutions would be required to resume delivery of their subsequent regular annual notices pursuant to the existing timing requirements that govern delivery of annual notices generally. Because the revised notice would inform the customer of the institution's changed policies and practices before any new sharing occurs, the Bureau believed that there is no clear urgency regarding delivery of the first annual notice subsequent to implementation of the new policies and procedures.

Specifically, § 1016.4(a)(1) generally requires a financial institution to provide an initial notice to an individual who becomes the institution's customer no later than when it establishes a customer relationship. Section 1016.5(a) requires a financial institution to provide a privacy notice to its customers ''not less than annually'' during the continuation of any customer relationship. Section 1016.5(a)(1) defines annually to mean ''at least once in any period of 12 consecutive months.'' It further provides that a financial institution ''may define the 12-consecutive-month period, but [] must apply it to the customer on a consistent basis.'' Section 1016.5(a)(2) provides an example of the meaning of ''annually'' in relation to the delivery of the first annual notice after the initial notice:

> You provide a notice annually if you define the 12-consecutive-month period as a calendar year and provide the annual notice to the customer once in each calendar year following the calendar year in which you provided the initial notice. For example, if a customer opens an account on any day of year 1, you must provide an annual notice to that customer by December 31 of year 2.

The example in § 1016.5(a)(2) provides financial institutions with the flexibility to select a specific date during the year to provide annual notices to all customers, regardless of when a particular customer relationship began. This flexibility avoids burdening institutions with either having to provide annual notices on the anniversary of initial notices, or alternatively providing two notices in the first year of the customer relationship to get all accounts originated in a given calendar year on the same cycle for delivering subsequent annual notices.

The Bureau proposed that the approach to timing of the annual notice in § 1016.5(a)(2) be applied if a financial institution makes a change that causes it to lose the exception and triggers the requirement to deliver a revised notice prior to the change. Under the proposed approach, if a financial institution provides a revised notice on any day of year 1 in advance of changing its policies or practices such that it loses the exception, that revised notice would be treated as analogous to an initial notice in § 1016.5(a)(2). Assuming that the financial institution defines the 12-month period as the calendar year, the financial institution would have to provide the first annual notice after losing the exception by December 31 of year 2.

The Bureau invited comment on the timing conditions proposed in § 1016.5(e)(2)(i). Few commenters separately discussed § 1016.5(e)(2)(i). All commenters who explicitly addressed the proposed timing requirements under § 1016.5(e)(2)(i) agreed with the Bureau's proposed approach. No industry commenters suggested alternative timing conditions. One credit union asserted that the proposed timing condition would incentivize credit unions to plan and notify their members in advance of making changes to privacy policies. Two trade associations representing banks and credit unions supported the timing requirement because it would prevent institutions from having to send out multiple notices within the same year. The trade association representing credit unions asserted that redundant notices provide no benefit to consumers and pose a burden and expense on credit unions.

The Bureau now adopts § 1016.5(e)(2)(i) as proposed. The Bureau believes that using the same approach in § 1016.5(e)(2)(i) as in existing § 1016.5(a)(2) is appropriate for two reasons. First, customers will receive a revised notice informing them of the change in the financial institution's policies or practices before the change occurs, and thus customers will not be harmed by the financial institution taking a longer period of time in which to deliver the first annual notice after the annual notice exception has been lost. Second, this approach will preserve flexibility for financial institutions and avoid requiring them to deliver a revised notice and an annual notice in the same year, and allowing them to use a convenient delivery date for annual notices for all customers. The Bureau believes this flexibility is justified because a financial institution that is required to deliver a revised privacy notice pursuant to § 1016.8 may have continuing annual notice obligations after the exception is lost. Such an institution could be sharing other than as described in the Regulation P exceptions and thus fail to satisfy § 1016.5(e)(1)(i), making the annual notice exception unavailable in future years.

5(e)(2)(ii) Changes Not Preceded by a Revised Privacy Notice

For financial institutions that change their policies and practices in such a way as to lose the § 503(f) exception, but do not share information in a way that triggers the requirement under § 1016.8 to deliver a revised notice prior to the change, the Bureau proposed that a financial institution must deliver the annual notice within 60 days after the change that caused the institution to lose the exception. The Bureau proposed this 60-day period for providing the annual notice in this situation because customers would not receive a revised notice from the financial institution prior to the institution's change in policies or practices.

The Bureau requested comment on whether 60 days is an appropriate period for delivering annual notices in these circumstances or if another period would be more appropriate. Approximately half of all commenters specifically addressed the timing conditions proposed under § 1016.5(e)(2)(ii). These commenters generally opposed the 60-day requirement, advocating instead for an increased amount of time for institutions to deliver the revised notice. The majority of these commenters requested at least 90 days to deliver the notice.

Trade associations representing credit unions cited cost concerns with the 60-day requirement, asserting that because they send quarterly statements to many consumers, the timing requirement would require institutions to send out an additional notice. Some of these commenters suggested that 90 days was a more appropriate timeframe, as it would allow institutions to minimize costs by sending the revised notice with the next quarterly statement. One of these trade associations representing credit unions also asserted that 60 days was too brief, particularly for small credit unions addressing inadvertent changes. This commenter suggested 90 to 120 days to allow credit unions the opportunity to include the notice with the quarterly periodic statement, and noted that while all members may not receive monthly statements, most receive account statements quarterly.

Other industry commenters suggested 120 days as an appropriate time to deliver the annual notice. A few of these commenters cited the same above-mentioned cost concerns that are associated with separate mailers. These commenters asserted that 120 days would allow the notice to be included with regularly scheduled member statements, therefore eliminating the need for an additional mailer. One industry commenter representing credit unions noted that a separate mailer would be especially costly for smaller credit unions with fewer resources.

Industry commenters who suggested 120 days also stated, without specific explanation, that the proposed 60-day requirement did not provide institutions enough time to perform. A few of these industry commenters asserted that smaller credit unions, particularly those with fewer resources, would find the 60-day time frame too short. Some of those same commenters thought that larger credit unions with numerous departments working to consolidate information would also struggle to meet the 60-day requirement. Several trade associations representing credit unions stated that a longer time frame would allow credit unions time to organize logistics, educate staff, and command the resources necessary to draft and send the required notice. One industry commenter stated that an extension would not negatively impact consumers because prior notice is still required when changes allow sharing with third parties of non-public personal information and the option to opt out in advance.

One trade association commenter representing credit unions suggested at least 180 days, citing the fact that § 1016.8 does not require a revised privacy notice under the circumstances described in § 1016.5(e)(2)(ii). This commenter also suggested that to combat costs, financial institutions should have the option to include a message on periodic statements or mailers that there has been a change to the privacy notice, and direct the recipient to the financial institution's website to view and download an electronic copy of the revised notice.

The Bureau now adopts the timing provision in § 1016.5(e)(2)(ii) with a 100 calendar day period during which the financial institution must provide the annual privacy notice. The unanimous industry objection to the 60-day period suggests that the proposal likely would have imposed costs that the Bureau had not anticipated. The 100-day period will accommodate the inclusion of the notice with quarterly statements. The Bureau believes that providing 10 days in addition to the 90 days many commenters requested is appropriate because most calendar quarters are slightly longer than 90 days, and a short additional period should be allowed for administrative activities and to provide flexibility if the end date falls on a weekend or holiday. The Bureau does not believe that consumers will be harmed by this extension of the time period from the proposal.

However, the Bureau notes that the commenters requesting 120 or 180 days provided no specific reason why allowing such additional time would contribute to cost savings beyond allowing the notice to be included in quarterly statements. The Bureau is not aware of any other reason, and therefore declines to adopt a longer period.

The Bureau believes that the 100-day deadline will not impose undue or unreasonable costs on financial institutions, particularly since the delivery requirement is effectively a one-time burden absent additional changes to a financial institution's policies and practices. Specifically, after providing the one annual notice, the financial institution will likely once again meet both of the conditions for the exception—it will not be sharing nonpublic personal information with nonaffiliates other than as described in a Regulation P exception to the opt-out requirements and its policies and practices will not have changed since it provided the annual notice. Because the financial institution likely will once again meet the conditions for the exception, it likely will not be required to provide future annual notices. In other words, these financial institutions will likely lose the exception for only a single year. The Bureau is including an additional example in § 1016.5(e)(2)(iii)(B) for clarity. Given that financial institutions delivering notices pursuant to § 1016.5(e)(2)(ii) will likely have no continuing obligation to send annual notices, they likely will not need flexibility in choosing a convenient delivery date for future annual notices, beyond the 100 days of flexibility being provided for a single privacy notice.[43]

In regard to the comment that the regulation should allow financial institutions to include a message on periodic statements or mailers directing customers to an electronic copy of the annual notice, the Bureau believes that any reduction in costs would be minimal because the financial institution is likely not required to provide more than one notice. In addition, the Bureau did not propose or request comment on such an option.

The Bureau also notes that financial institutions have substantial flexibility in managing the burden involved in sending the one annual notice because institutions can generally choose when

[43] If the financial institution were to make changes in the future to its practices and policies, these changes could trigger a new obligation to provide annual privacy notices.

they change their policies or practices. Accordingly, an institution can choose when to make the change triggering the commencement of the 100-day period for delivery of the annual notice, so that the date of delivery can be as convenient and low-cost as possible.

5(e)(2)(iii) Examples

In order to facilitate compliance with proposed § 1016.5(e)(2), the Bureau proposed § 1016.5(e)(2)(iii) to provide an example for when an institution must provide an annual notice after changing its policies or practices such that it no longer meets the requirements for the annual notice exception set forth in proposed § 1016.5(e)(1).

The Bureau did not receive any comments specifically discussing the example provided in § 1016.5(e)(2)(iii). Because the Bureau believes that the example will provide clarity and facilitate compliance, it is now being made final in § 1016.5(e)(2)(iii)(A), with a minor change due to the alteration of the time frame in § 1016.5(e)(2)(ii). In addition, the Bureau is providing a second example, in § 1016.5(e)(2)(iii)(B), to facilitate compliance when a financial institution must only provide one annual notice before it again qualifies for the § 1016.5(e)(1) exception.

Section 1016.5(e)(2)(iii)(A) provides an example for when an institution must provide an annual notice after changing its policies or practices such that it no longer meets the requirements for the annual notice exception in § 1016.5(e)(1). The Bureau believes this example will facilitate compliance with § 1016.5(e)(2). The example assumes that an institution changes its policies or practices effective April 1 of year 1 and defines the 12-consecutive-month period pursuant to § 1016.5(a)(1) as a calendar year. Section 1016.5(e)(2)(iii)(A) states that the institution must provide an annual notice by December 31 of year 2 if the institution was required to provide a revised notice prior to the change and provided that revised notice on March 1 of year 1 in advance of the change. Section 1016.5(e)(2)(iii)(A) further states that the institution must provide an annual notice by July 9 of year 1 if the institution was not required to provide a revised notice prior to the change.

The Bureau is also providing a second example, in § 1016.5(e)(2)(iii)(B), to facilitate compliance when a financial institution must provide only one annual notice before it again qualifies for the § 1016.5(e)(1) exception, as discussed above in relation to § 1016.5(e)(2)(ii). The example assumes that a financial institution changes its policies and practices in such a way that it no longer meets the requirements of § 1016.5(e)(1), and so provides an annual notice to its customers. The example further assumes that after providing the annual notice to its customers, the financial institution once again meets the requirements of § 1016.5(e)(1) for an exception to the annual notice requirement. The example explains that the financial institution does not need to provide additional annual notices to its customers until such time as it no longer meets the requirements of § 1016.5(e)(1).

Section 1016.9 Delivering Privacy and Opt Out Notices

9(c)(2) Alternative Delivery Method for Providing Certain Annual Notices

As discussed in Part II, the Bureau amended Regulation P in October 2014 to allow financial institutions that met certain criteria to deliver annual notices pursuant to the ''alternative delivery method.'' Because financial institutions that met the conditions in Regulation P to use the alternative delivery method will also meet the conditions for the statutory exception in section 503(f), the Bureau proposed to remove the alternative delivery method from Regulation P by removing § 1016.9(c)(2) and renumbering existing § 1016.9(c)(1) as § 1016.9(c).

Commenters generally expressed support for the proposed removal of the alternative delivery method. Ten commenters addressed the issue, with eight supporting the proposal and two opposing it.

Some commenters welcomed elimination of the alternative delivery method, asserting that the conditions associated with the 2014 provision deterred institutions from taking advantage of the intended relief. A debt collector organization stated that the alternative delivery method did not provide a solution for many debt collectors and consumers. This commenter asserted that the alternative delivery required model form created a significant risk of class action litigation because of claims that the language conflicts with the Fair Debt Collection Practices Act's prohibitions on third-party disclosure. A commenter representing several trade associations stated that the alternative delivery method requirement to post the notice online eliminated any benefits from the 2014 rule.

Two trade associations agreed that the alternative delivery method would no longer be useful in light of the statutory exception to the annual notice requirement, and one of these trade associations stated that it was unlikely that financial institutions would continue to use a complex means of compliance when a simpler one was available.

Several commenters discussed benefits associated with eliminating the alternative delivery method. One trade association stated that removing the alternative delivery method would eliminate confusion between the rule and the statute. Another trade association representing banks expressed appreciation of the elimination of the alternative delivery method, arguing that it would remove the confusion of having both an exception from the annual privacy notice and an alternative to the delivery requirement. One trade association stated that consumers will benefit from the elimination of the method, as they will experience decreasing information overload.

One trade association representing banks requested clarification that institutions that qualify for the exception but still keep a copy of the privacy policy on their websites will not be criticized or penalized.

Two trade association commenters representing the consumer credit industry and credit unions did not support removal of the alternative delivery method. These commenters stated that their customers or members prefer to receive communications electronically. Both commenters cited cost burdens associated with mailing privacy notices.

The trade association representing the consumer credit industry stated that several of their member financial institutions, particularly those that provide indirect auto loans, do not qualify for the statutory exception to the annual notice requirement because the institutions share consumer information with nonaffiliated third parties other than as described in §§ 1016.13, 14 and 15. These institutions are required under § 1016.10 of Regulation P to inform consumers through the institution's annual privacy notice that the consumer has a right to opt out of that information sharing. The trade association representing the consumer credit industry encouraged expansion of the alternative delivery method, highlighting the cost effectiveness of electronic delivery and stating that many institutions upgraded systems to implement the alternative delivery method under the 2014 rule. This commenter also urged the Bureau to consider allowing institutions that share with nonaffiliated third parties to deliver their privacy notices electronically, such as via website

posting, similar to the method permitted by the alternative delivery method.

After considering the comments, the Bureau now adopts the proposed change, removing the alternative delivery method from Regulation P by removing § 1016.9(c)(2) and renumbering former § 1016.9(c)(1) as § 1016.9(c).

Any financial institution that met the conditions to use the alternative delivery method will also meet the conditions to be excepted from delivering an annual privacy notice pursuant to new GLBA section 503(f). First, new GLBA section 503(f)(1) is substantively identical to the first requirement for using the alternative delivery method: [44] That the financial institution share nonpublic personal information about customers with nonaffiliated third parties only in ways that do not give rise to the customer's right to opt out of that sharing.[45] Second, new GLBA section 503(f)(2) is similar to the fourth requirement for using the alternative delivery method: that the institution must not have changed its policies and practices with regard to disclosing nonpublic personal information from those that were disclosed to the customer in the most recent privacy notice.[46] Accordingly, any financial institution that would have met the requirements in former § 1016.9(c)(2) will also meet the requirements of section 503(f).

The Bureau believes that a financial institution that has both options available to it would choose not to send the annual privacy notice at all, rather than to deliver it pursuant to the alternative delivery method, so that it can eliminate rather than merely reduce the cost of providing annual notices. Given that any financial institution that qualifies to use the alternative delivery method for its annual notices also meets the qualifications for the new annual notice exception, the Bureau believes that including the alternative delivery method in Regulation P is no longer useful.

The Bureau notes that financial institutions that delivered annual notices using the alternative delivery method while it was in effect delivered those notices using a method that was in compliance with Regulation P, notwithstanding that the alternative delivery method provision is now being removed from the regulation. The Bureau further notes that financial institutions that qualify for the new annual notice exception may still choose to post privacy notices on their websites, deliver privacy notices to consumers who request them, and notify consumers of the notices' availability. Such activities will not affect a financial institution's eligibility for the new 503(f) exception.

The Bureau has considered the comments suggesting that it retain and expand the alternative delivery method for providing annual privacy notices. In this rulemaking, the Bureau is implementing the FAST Act amendments to the GLBA, which eliminate the requirement that financial institutions provide an annual privacy notice if certain conditions are met. In making these amendments to the GLBA, Congress did not address the delivery method financial institutions must or may use if they continue to be required to provide an annual privacy notice, including where financial institutions have not changed their privacy policies since their last privacy notice and they share information with nonaffiliated third parties other than as described in §§ 1016.13, .14, and .15. Because Congress did not address these issues in the FAST Act amendments to the GLBA, the Bureau declines to address them in this rulemaking to implement those amendments.

V. Dodd-Frank Act Section 1022(b)(2) Analysis

A. Overview

In developing the final rule, the Bureau has considered the potential benefits, costs, and impacts as required by section 1022(b)(2) of the Dodd-Frank Act.[47] The Bureau requested comment on the preliminary analysis as well as the submission of additional data that could inform the Bureau's analysis of the benefits, costs, and impacts of the rule. The Bureau received one comment on the preliminary analysis, which it has considered in developing this final analysis. In addition, the Bureau has consulted and coordinated with the SEC, CFTC, FTC, and NAIC, and consulted with or offered to consult with the OCC, Federal Reserve Board, FDIC, NCUA, and HUD, including regarding consistency with any prudential, market, or systemic objectives administered by such agencies.

This final rule implements the December 2015 amendment to the GLBA by amending § 1016.5 of Regulation P to provide that a financial institution is not required to deliver an annual privacy notice if it:

(1) Provides nonpublic personal information to nonaffiliated third parties only in accordance with the provisions of § 1016.13, § 1016.14, or § 1016.15; and

(2) Has not changed its policies and practices with regard to disclosing nonpublic personal information from the policies and practices that were disclosed to the customer under § 1016.6(a)(2) through (5) and (9) in the most recent privacy notice provided.

In considering the potential benefits, costs, and impacts of the rule, the Bureau takes as the baseline for the analysis the legal regime that existed prior to the FAST Act's amendment of the GLBA.[48] This regime includes the current provisions of Regulation P. The Bureau assumes that all financial institutions that can use the alternative delivery method provided in § 1016.9(c)(2) are doing so.

B. Potential Benefits and Costs to Consumers and Covered Persons

The impact on consumers of § 1016.5(e) depends on whether the particular consumer prefers or would otherwise benefit from receiving an annual privacy notice that does not offer the consumer an opt-out under the GLBA and is largely unchanged[49] from previous notices. Under § 1016.5(e), financial institutions that meet the requirements for the annual notice exception would not be required to provide consumers with annual privacy notices, and the Bureau anticipates that most institutions would decide not to provide notices in these circumstances.

[44] See removed 12 CFR 1016.9(c)(2)(i)(A).

[45] This sharing is pursuant to GLBA section 503(b)(2) and (e), which correspond to Regulation P §§ 1016.13, 1016.14, and 1016.15.

[46] See removed 12 CFR 1016.9(c)(2)(i)(D). The requirement in former § 1016.9(c)(2)(i)(D) was somewhat more restrictive because it required a financial institution not to have changed its practices with respect to disclosing nonpublic personal information and protecting the confidentiality and security of nonpublic personal information whereas section 503(f)(2) requires that the institution not have changed its policies only with respect to disclosing nonpublic personal information. *See* the section-by-section analysis of § 1016.5(e)(1)(ii) for further discussion.

[47] Specifically, section 1022(b)(2)(A) of the Dodd-Frank Act calls for the Bureau to consider the potential benefits and costs of a regulation to consumers and covered persons, including the potential reduction of access by consumers to consumer financial products or services; the impact on depository institutions and credit unions with $10 billion or less in total assets as described in section 1026 of the Dodd-Frank Act; and the impact on consumers in rural areas.

[48] The proposal referred to this as the ''regulatory regime that currently exists.'' 81 FR at 44808. However, the baseline the Bureau is using did not and does not reflect that the FAST Act has taken effect. The Bureau has discretion in each rulemaking to choose the relevant provisions to discuss and to choose the most appropriate baseline for that particular rulemaking.

[49] As discussed in part IV in the section-by-section analysis of § 1016.5(e)(1)(ii), certain changes to an institution's policies or practices would not cause the institution to lose the annual notice exception.

While there is no data available on the number of consumers who are indifferent to (or dislike) receiving unchanged privacy notices every year, the limited use of opt-outs and anecdotal evidence suggest that there are such consumers.[50] For this group of consumers, § 1016.5(e) might provide a benefit because it would be available to some institutions that cannot use the alternative delivery method, so that more consumers would stop receiving mailed annual privacy notices.

For other consumers who would prefer or otherwise benefit from receiving the annual notices, there will be some cost because many institutions that previously delivered notices—whether through the standard delivery methods or through the alternative delivery method that includes posting on the institution's website—will no longer deliver annual notices. Consumers may be less informed about opportunities to limit a financial institution's information sharing practices if the financial institution meets the requirements for the annual notice exception and chooses not to provide annual notices. For example, some consumers will receive fewer notices in which a financial institution offers *voluntary* opt-outs, *i.e.,* opt-outs that the financial institution is not required by Regulation P to offer (because, for example, the type of sharing the financial institution does is covered by an exception) but that the institution decides to provide anyway via the annual privacy notice. Voluntary opt-outs do not appear to be common, however.[51] Further, institutions may continue to offer voluntary opt-outs and may offer them through other mechanisms even if they do not provide annual privacy notices.

If financial institutions choose not to provide notices pursuant to the annual notice exception, consumers may also be less informed of their opt-out rights under the FCRA. Section 503(c)(4) of the GLBA and Regulation P require financial institutions providing initial and annual privacy notices to incorporate into them any notification and opt-out disclosures provided pursuant to section 603(d)(2)(A)(iii) of the FCRA.[52] Section 624 of the FCRA and Regulation V also permit (but do not require) financial institutions providing initial and annual privacy notices under Regulation P to incorporate any opt-out disclosures provided under section 624 of the FCRA and subpart C of Regulation V into those notices.[53] Because financial institutions will likely decide not to provide annual notices pursuant to the exception in proposed § 1016.5(e), consumers may be less informed of their opt-out rights pursuant to these sections of the FCRA to the extent that institutions use less effective methods to convey information about these rights to consumers.[54] Consumers also may be less informed about a financial institution's data collection practices and its policies and practices with respect to protecting the confidentiality and security of nonpublic personal information.

Regarding benefits and costs to covered persons, the primary effect of the rule will be burden reduction achieved by lowering the costs to industry of providing annual privacy notices. Section 1016.5(e) imposes no new compliance requirements on any financial institution. Any institution that could use the alternative delivery method will meet the requirements for the annual notice exception pursuant to § 1016.5(e).[55] A financial institution that is in compliance with current law will not be required to take any different or additional action unless it chooses to take advantage of the annual notice exception and thus will be required to separately meet its opt-out obligations, if any, pursuant to the FCRA.[56] This analysis assumes that no financial institution will do so unless the net result of the choice is burden reducing.

The expected cost savings to financial institutions from the revisions to § 1016.5(e) depend on whether the financial institution uses the alternative delivery method under the baseline. Financial institutions that currently use the alternative delivery method will likely cease complying with the requirements in current § 1016.9(c)(2) since they necessarily meet the requirements of the exception to the annual notice requirement and thus will no longer be required to deliver an annual notice.[57] However, the Bureau expects that financial institutions that change from using the alternative delivery method to provide annual notices to not providing these notices at all will achieve little cost savings.[58] Financial institutions that currently do not use the alternative delivery method are expected to use the proposed annual notice exception if the expected costs of any changes required to use the exception and the costs of any consequences of not providing the annual disclosure will be lower than the costs of complying with current Regulation P. The Bureau believes that few such financial institutions will find it in their interests to change their information sharing practices in order to use the annual notice exception. Thus, the Bureau takes the information sharing practices of financial institutions as given and considers how many financial institutions that do not currently meet the requirements to use the alternative delivery method can use the annual notice exception.[59] As a practical matter, the Bureau identifies these institutions solely by their

[50] One early analysis of the use of the opt-outs reported at most 5% of consumers make use of them in any year, and likely fewer. *See* Jeffrey M. Lacker, *The Economics of Financial Privacy: To Opt Out or Opt In?,* 88/3 Fed. Res. Bank Rich. Econ. Q., at 11 (Summer 2002), *available at https://www.richmondfed.org/-/media/richmondfedorg/publications/research/economic_quarterly/2002/summer/pdf/lacker.pdf.* One commenter on the proposed rule also estimated that 5% of consumers use opt-outs. AFSA Comment letter, August 10, 2016.

[51] *See* Lorrie Faith Cranor et al., *Are They Actually Any Different? Comparing Thousands of Financial Institutions' Privacy Practices, available at http://www.econinfosec.org/archive/weis2013/papers/CranorWEIS2013.pdf* (submitted as part of The Twelfth Workshop on the Economics of Information Security (WEIS 2013), June 11–12, 2013, Georgetown University, Washington, DC). Their findings (Table 2) imply that at most 15% of the 3,422 FDIC insured depositories that post the model privacy form on their websites offer at least one voluntary opt-out. Data from a much larger group of financial institutions analyzed by Cranor et al. (undated) imply (Table 2) that at most 27% of the 6,191 financial institutions that post the model privacy form on their websites offer at least one voluntary opt-out.

[52] 15 U.S.C. 6803(c)(4); 12 CFR 1016.6(a)(7).

[53] 15 U.S.C. 1681s–3(b); 12 CFR 1022.23(b).

[54] As explained in the section-by-section analysis of § 1016.5(e)(1)(i) in part IV, the annual notice exception in § 1016.5(e) does not relieve financial institutions of the obligation to provide consumers with the information that is required under FCRA sections 603(d)(2)(A)(iii) or 624.

[55] Any financial institution that meets the conditions to use the alternative delivery method will also meet the conditions to be excepted from delivering an annual privacy notice pursuant to new GLBA section 503(f) because the two conditions for section 503(f) are closely related to conditions for using the alternative delivery method. See the section-by-section analysis of § 1016.9(c) for further explanation.

[56] See the section-by-section analysis to § 1016.5(e)(1)(i) in part IV for an explanation of the interaction between the annual notice exception and the opt-outs provided under FCRA sections 603(d)(2)(A)(iii) and 624.

[57] *See supra* note 52.

[58] The Bureau believes that the alternative delivery method imposes little ongoing cost to financial institutions that have adopted it. These costs derive from the additional text on an account statement, coupon book, notice or disclosure the institution already provides; maintaining a webpage dedicated to the annual privacy notice; responding to telephone calls from a very small number of consumers requesting that the model form be mailed; and mailing the forms prompted by these calls.

[59] Because the Bureau takes institutions' sharing practices as given and because the cost savings estimate is based on a single year, the expected cost savings for institutions does not account for a reduction or increase in aggregate cost savings that may occur if any institutions change their sharing practices in the future such that they no longer meet the requirements for the annual notice exception or they begin to meet those requirements.

information sharing practices: That is to say, the Bureau identifies the financial institutions whose current information sharing practices do not meet the standards in § 1016.9(c)(2) but will meet the standards in § 1016.5(e). The Bureau then estimates the ongoing savings in costs to these financial institutions from no longer sending the annual privacy notice.[60]

For the 2014 Annual Privacy Notice Rule, the Bureau collected a sample of privacy policies from banks and credit unions and estimated both the number of financial institutions that would adopt the alternative delivery method and the aggregate cost savings that would result.[61] Specifically, the Bureau examined the privacy policies of 19 banks with assets over $100 billion as well as the privacy policies of 106 additional banks selected through random sampling. The Bureau previously concluded that 80% of banks could use the alternative delivery method that was set forth in § 1016.9(c)(2). For the current rulemaking, the Bureau re-analyzed this sample to identify banks with information sharing practices that do not meet the standard in § 1016.9(c)(2) but will meet the standard in § 1016.5(e). In the re-analysis, the Bureau finds that 48% of banks that could not use the alternative delivery method can use the proposed exception to the annual notice requirement. Most of these banks were not able to use the alternative delivery method because they offered opt-outs to consumers pursuant to FCRA section 603(d)(2)(A)(iii); a financial institution can meet the requirements for the annual notice exception in § 1016.5(e) even if it offers such opt-outs. Specifically, the Bureau previously estimated that approximately 1,350 banks could not use the alternative delivery method and our re-analysis shows that 650 of these banks (48%) will be able to use the annual notice exception.[62] For banks with assets over $10 billion, 70% of those that could not use the alternative delivery method can use the annual notice exception. For banks with assets of $10 billion or less and banks with assets of $500 million or less, the respective figures are 47% and 40%.

The Bureau also previously examined the privacy policies of the four credit unions with assets over $10 billion as well as the privacy policies of 50 additional credit unions selected through random sampling. The Bureau previously concluded that 46% of credit unions could use the alternative delivery method. The information evaluated in the re-analysis shows that none of the credit unions that could not use the alternative delivery method will be able to use the exception to the annual notice requirement. Credit unions that clearly could not use the alternative delivery method generally shared information with nonaffiliated third parties other than as specified in the exceptions in §§ 1016.13, 1016.14, and 1016.15. However, there are a number of cases in which the Bureau could not readily evaluate the information sharing practices of the sampled credit union because it did not have a website, did not post the privacy notice on its website, or did not use the model form.[63] In the proposal, the Bureau requested data and other factual information on the use of the alternative delivery method by credit unions and the likely use of the proposed annual notice exception by credit unions that cannot use the alternative delivery method. No comments provided data in response to this request.[64]

Regarding the number of non-depository financial institutions that will benefit from the exception to the annual notice requirement, the Bureau uses the same basic methodology as in its prior analysis. Specifically, the Bureau assumes that the fraction of non-depository financial institutions that cannot use the alternative delivery method but can use the new annual notice exception is the same for non-depository institutions as for banks (9.5%).[65]

Having identified the financial institutions that will benefit from the exception to the annual notice requirement, the Bureau estimates the benefit using the same basic methodology as in its prior analysis.[66] For banks, the Bureau allocated the total burden of providing the annual privacy notices to asset-size groups in proportion to the share of assets in the group. The Bureau then estimated an amount of burden reduction specific to each asset-size group using the results from the privacy notice analysis described above. The total burden reduction is then the sum of the burden reductions in each asset-size group. The estimated reduction in burden for banks using this methodology is approximately $3.158 million annually. The estimated reduction in burden for non-depository financial institutions is an additional $231,000 annually.[67] Thus, the Bureau believes that the total reduction in burden is approximately $3.389 million dollars annually.[68] This represents about 28% of the total $12.162 million annual cost of providing the annual privacy notice under Regulation P.

The Bureau requested comment on the preliminary presentation of this analysis as well as the submission of additional data that could inform the Bureau's consideration of the cost savings to financial institutions. No comments addressed this request.

[60] The Bureau assumes that a financial institution used the alternative delivery method whenever the Bureau can obtain the annual privacy notice from the website of the financial institution and the Bureau concludes from the information on the privacy notice that the information sharing practices of the financial institution comply with removed § 1016.9(c)(2). If a financial institution did not use the model form, the Bureau assumes that the financial institution would have adopted the model form if the information sharing practices complied with § 1016.9(c)(2). This methodology overstates the number of these financial institutions that could have used the alternative delivery method, because some of these financial institutions might not have met all of the requirements of § 1016.9(c)(2), and therefore understates the benefits of the annual notice exception to these financial institutions. On the other hand, if a financial institution does not have a website, the Bureau cannot (as a practical matter) obtain and evaluate its information sharing practices. In this case, the Bureau assumes that the financial institution cannot use either the alternative delivery method or the annual notice exception. This also tends to understate the benefits of the annual notice exception to these financial institutions, since none of them could have used the alternative delivery method but some might be able to use the annual notice exception.

[61] *See* 79 FR 64057, 64076–64077 (Oct. 28, 2014). Note that the term ''banks'' as used throughout this rule includes savings associations.

[62] While these 650 banks are just 9.5% of all banks, this percentage does not take into account the fact that the majority of banks could not potentially benefit from the exception to the annual privacy notice requirement since (by our previous analysis) they already use the alternative delivery method.

[63] One or more of these conditions held for a number of credit unions with assets of $500 million or less. As explained above, if a financial institution did not have a website or did not post the privacy notice on their website, the Bureau made the conservative assumption that it did not benefit from the alternative delivery method and will not benefit from the new annual notice exception. *See also* 79 FR 64057, 64076 (Oct. 28, 2014).

[64] Although no credit unions or credit union advocates commented or provided data, one State trade association representing banks stated that many financial institutions will appreciate and take advantage of the exception, but it will not create additional costs or harm to consumers. That commenter did not provide data.

[65] For further discussion, *see id.* at 64077.

[66] *See id.* at 64076–64077.

[67] Note that this figure excludes auto dealers. Auto dealers are regulated by the FTC and will not be directly impacted by this amendment to Regulation P.

[68] Some of these banks and non-depository financial institutions that currently include on their annual privacy notice the opt-out notices pursuant to FCRA section 603(d)(2)(A)(iii) or FCRA section 624 and the Affiliate Marketing Rule may now be required to deliver these notices separately. The Bureau does not have the data necessary to estimate the frequency with which these opt-out notices will be delivered separately or to subtract the cost of delivering them separately from the savings from no longer providing the annual privacy notice.

The Regulation P exception to the annual notice requirement implements a December 2015 statutory amendment to the GLBA. The Bureau considered alternatives to the timeline for delivery of annual notices when a financial institution that qualified for the annual exception changes its policies or practices such that it no longer qualifies. Because the estimates of costs and benefits to consumers and covered persons take institutions' sharing policies and practices as given, the alternatives with respect to the timeline for delivery of annual notices do not impact those estimates. Further, even if the estimates allowed for changes in sharing policies and practices that can cause institutions to meet or fail to meet the requirements for the annual notice exception, the aggregate annual benefits and costs of delivery will not likely be significantly impacted by the timeline for delivery of annual notices. The Bureau does note, however, that changing from 60 to 100 days for delivery of the annual privacy notice under § 1016.5(e)(2)(ii) should result in a small burden reduction from the proposal, as financial institutions will be able to send the notice with quarterly statements as they requested.

C. Impact on Depository Institutions With No More Than $10 Billion in Assets

The Bureau currently estimates that approximately 600 banks with $10 billion or less in assets cannot use the alternative delivery method but can use the annual notice exception. This constitutes 47% of banks with $10 billion or less in assets that do not use the alternative delivery method and 8.8% of all banks with $10 billion or less in assets. As reported above, 70% of banks with more than $10 billion in assets that do not use the alternative delivery method can use the proposed exception to the annual notice requirement. This is 55% of all banks with more than $10 billion in assets. Thus, the rule may have different impacts on federally insured depository institutions with $10 billion or less in assets as described in section 1026 of the Dodd-Frank Act. The Bureau currently believes that no credit unions of any size that could not use the alternative delivery method will be able to use the exception to the annual notice requirement.

D. Impact on Access to Credit and on Consumers in Rural Areas

The Bureau does not believe that the rule will reduce consumers' access to consumer financial products or services or have a unique impact on rural consumers.

VI. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires each agency to consider the potential impact of its regulations on small entities, including small businesses, small governmental units, and small not-for-profit organizations. The RFA defines a ''small business'' as a business that meets the size standard developed by the Small Business Administration pursuant to the Small Business Act. The RFA generally requires an agency to conduct an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) of any rule subject to notice-and-comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.[69] The Bureau also is subject to certain additional procedures under the RFA involving the convening of a panel to consult with small business representatives prior to proposing a rule for which an IRFA is required.[70]

At the proposed rule stage, the Bureau determined that an IRFA was not required because the proposal, if adopted, would not have a significant economic impact on a substantial number of small entities. For this final rule, the Bureau continues to believe that that determination is accurate. The Bureau does not expect the rule to impose costs on small entities. All methods of compliance under current law will remain available to small entities when this rule is adopted. Thus, a small entity that is in compliance with current law need not take any different or additional action under the new rule. In addition, based on the data analysis described previously, the Bureau believes that the annual notice exception will allow some small institutions to stop sending the annual notice and to thereby reduce costs.

Accordingly, the undersigned certifies that this rule will not have a significant economic impact on a substantial number of small entities.

VII. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA),[71] Federal agencies are generally required to seek Office of Management and Budget (OMB) approval for information collection requirements prior to implementation. This proposal would amend Regulation P, 12 CFR part 1016. The collections of information related to Regulation P have been previously reviewed and approved by OMB in accordance with the PRA and assigned OMB Control Number 3170–0010. Under the PRA, the Bureau may not conduct or sponsor, and, notwithstanding any other provision of law, a person is not required to respond to an information collection, unless the information collection displays a valid control number assigned by OMB.

As explained below, the Bureau has determined that this rule does not contain any new or substantively revised information collection requirements other than those previously approved by OMB. The rule will implement the December 2015 amendment to the GLBA and amend § 1016.5 of Regulation P to provide that a financial institution is not required to deliver an annual privacy notice if it:

(1) Provides nonpublic personal information to nonaffiliated third parties only in accordance with the provisions of § 1016.13, § 1016.14, or § 1016.15 and;

(2) Has not changed its policies and practices with regard to disclosing nonpublic personal information from the policies and practices that were disclosed to the customer under § 1016.6(a)(2) through (5) and (9) in the most recent privacy notice provided.

Under Regulation P, the Bureau generally accounts for the paperwork burden for the following respondents pursuant to its enforcement/supervisory authority: Federally insured depository institutions with more than $10 billion in total assets, their depository institution affiliates, and certain non-depository institutions. The Bureau and the FTC generally both have enforcement authority over non-depository institutions subject to Regulation P. Accordingly, the Bureau has allocated to itself half of the final rule's estimated reduction in burden on non-depository financial institutions subject to Regulation P. Other Federal agencies, including the FTC, are responsible for estimating and reporting to OMB the paperwork burden for the institutions for which they have enforcement and/or supervision authority. They may use the Bureau's burden estimation methodology, but need not do so.

The Bureau does not believe that this final rule will impose any new or substantively revised collections of information as defined by the PRA, and instead believes that it will have the overall effect of reducing the previously approved estimated burden on industry for the information collections

[69] 5 U.S.C. 603 through 605.

[70] 5 U.S.C. 609.

[71] 44 U.S.C. 3501 through 3558.

associated with the Regulation P annual privacy notice. Using the Bureau's burden estimation methodology, the reduction in the estimated ongoing burden will be approximately 62,197 hours annually for the roughly 13,500 banks and credit unions subject to the rule, including Bureau respondents, and the roughly 29,400 entities regulated by the FTC also subject to the rule (*i.e.,* entities over which the FTC has Regulation P administrative enforcement authority). The reduction in estimated ongoing costs from the reduction in ongoing burden will be approximately $3.389 million annually.[72]

The Bureau believes that the one-time cost of adopting the annual notice exception for financial institutions that adopt it will be *de minimis.* The Bureau's methodology for estimating the reduction in ongoing burden was discussed above. The method is similar to that described in the PRA analysis in the 2014 Annual Privacy Notice Rule. The only difference is that instead of estimating the fraction of institutions that will be able to use the alternative delivery method, the Bureau estimates the fraction of institutions that will be able to use the annual notice exception and are not already using the alternative delivery method, to compute the reduction in burden relative to the baseline.[73]

The Bureau takes all of the reduction in ongoing burden from banks and credit unions with assets $10 billion and above and half the reduction in ongoing burden from the non-depository institutions subject to the FTC enforcement authority that are subject to the Bureau's Regulation P. The total reduction in ongoing burden taken by the Bureau is 53,216 hours or $3.058 million annually.[74]

The Bureau has determined that the final rule does not contain any new or substantively revised information collection requirements as defined by the PRA and that the burden estimate for the previously approved information collections should be revised as explained above. The Bureau requested comments on these determinations or any other aspect of the proposal for purposes of the PRA, but received none.

SUMMARY OF BURDEN CHANGES

Information collections	Previously approved total burden hours	Net change in burden hours	New total burden hours
Notices and disclosures	366,134	−53,216	312,917

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Bureau will submit a report containing this rule and other required information to the United States Senate, the United States House of Representatives, and the Comptroller General of the United States prior to the rule taking effect. The Office of Information and Regulatory Affairs (OIRA) has designated this rule as not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 12 CFR Part 1016

Banks, Banking, Consumer protection, Credit, Credit unions, Foreign banking, Holding companies, National banks, Privacy, Reporting and recordkeeping requirements, Savings associations, Trade practices.

Authority and Issuance

For the reasons set forth in the preamble, the Bureau amends Regulation P, 12 CFR part 1016, as set forth below:

PART 1016—PRIVACY OF CONSUMER FINANCIAL INFORMATION (REGULATION P)

■ 1. The authority citation for part 1016 continues to read as follows:

Authority: 12 U.S.C. 5512, 5581; 15 U.S.C. 6804.

■ 2. Section 1016.3 is amended by revising paragraph (s)(1) to read as follows:

§ 1016.3 Definitions.

* * * * *

(s)(1) *You* means a financial institution for which the Bureau has rulemaking authority under section 504(a)(1)(A) of the GLB Act (15 U.S.C. 6804(a)(1)(A)).

* * * * *

Subpart A—Privacy and Opt Out Notices

■ 3. Section 1016.5 is amended by revising the first sentence of paragraph (a)(1) and adding paragraph (e) to read as follows:

§ 1016.5 Annual privacy notice to customers required.

(a)(1) * * * Except as provided by paragraph (e) of this section, you must provide a clear and conspicuous notice to customers that accurately reflects your privacy policies and practices not less than annually during the continuation of the customer relationship. * * *

* * * * *

(e) *Exception to annual privacy notice requirement.* (1) *When exception available.* You are not required to deliver an annual privacy notice if you:

(i) Provide nonpublic personal information to nonaffiliated third parties only in accordance with the provisions of § 1016.13, § 1016.14, or § 1016.15; and

(ii) Have not changed your policies and practices with regard to disclosing nonpublic personal information from the policies and practices that were disclosed to the customer under § 1016.6(a)(2) through (5) and (9) in the most recent privacy notice provided pursuant to this part.

(2) *Delivery of annual privacy notice after financial institution no longer meets requirements for exception.* If you have been excepted from delivering an annual privacy notice pursuant to paragraph (e)(1) of this section and change your policies or practices in such a way that you no longer meet the requirements for that exception, you must comply with paragraph (e)(2)(i) or (e)(2)(ii) of this section, as applicable.

(i) *Changes preceded by a revised privacy notice.* If you no longer meet the requirements of paragraph (e)(1) of this section because you change your policies or practices in such a way that

[72] The total hours and costs consist of: (a) 51,230 hours at banks and credit unions evaluated at $61.65/hour; and (b) 10,967 hours at entities regulated by the FTC also subject to the rule, evaluated at $21.07/hour.

[73] *See* 79 FR 64057, 64080 (Oct. 28, 2014).

[74] The total hours and costs consist of: (a) 47,733 hours at banks and credit unions evaluated at $61.65/hour; and (b) 5,484 hours at entities regulated by the FTC also subject to the rule, evaluated at $21.07/hour.

§ 1016.8 requires you to provide a revised privacy notice, you must provide an annual privacy notice in accordance with the timing requirements in paragraph (a) of this section, treating the revised privacy notice as an initial privacy notice.

(ii) *Changes not preceded by a revised privacy notice.* If you no longer meet the requirements of paragraph (e)(1) of this section because you change your policies or practices in such a way that § 1016.8 does not require you to provide a revised privacy notice, you must provide an annual privacy notice within 100 days of the change in your policies or practices that causes you to no longer meet the requirements of paragraph (e)(1) of this section.

(iii) *Examples.* (A) You change your policies and practices in such a way that you no longer meet the requirements of paragraph (e)(1) of this section effective April 1 of year 1. Assuming you define the 12-consecutive-month period pursuant to paragraph (a) of this section as a calendar year, if you were required to provide a revised privacy notice under § 1016.8 and you provided that notice on March 1 of year 1, you must provide an annual privacy notice by December 31 of year 2. If you were not required to provide a revised privacy notice under § 1016.8, you must provide an annual privacy notice by July 9 of year 1.

(B) You change your policies and practices in such a way that you no longer meet the requirements of paragraph (e)(1) of this section, and so provide an annual notice to your customers. After providing the annual notice to your customers, you once again meet the requirements of paragraph (e)(1) of this section for an exception to the annual notice requirement. You do not need to provide additional annual notices to your customers until such time as you no longer meet the requirements of paragraph (e)(1) of this section.

■ 4. Section 1016.9 is amended by revising paragraph (c) to read as follows:

§ 1016.9 Delivering privacy and opt out notices.

* * * * *

(c) *Annual notices only.* You may reasonably expect that a customer will receive actual notice of your annual privacy notice if:

(1) The customer uses your website to access financial products and services electronically and agrees to receive notices at the website, and you post your current privacy notice continuously in a clear and conspicuous manner on the website; or

(2) The customer has requested that you refrain from sending any information regarding the customer relationship, and your current privacy notice remains available to the customer upon request.

* * * * *

Dated: August 9, 2018.

Mick Mulvaney,

Acting Director, Bureau of Consumer Financial Protection.

[Docket No. FAA–2018–0303; Product Identifier 2018–NM–006–AD; Amendment 39–19360; AD 2018–17–06]

RIN 2120–AA64

Airworthiness Directives; Fokker Services B.V. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Fokker Services B.V. Model F28 Mark 0070 and 0100 airplanes. This AD was prompted by a report that the retraction actuator eye-end of a Goodrich main landing gear (MLG) failed. This AD requires a one-time general visual inspection of the left-hand (LH) and right-hand (RH) MLG retraction actuators and replacement if necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective September 21, 2018.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of September 21, 2018.

ADDRESSES: For service information identified in this final rule, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88–6280–350; fax +31 (0)88–6280–111; email *technicalservices@fokker.com;* internet *http://www.myfokkerfleet.com.* You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0303.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0303; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the regulatory evaluation, any comments received, and other information. The address for Docket Operations (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3226.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Fokker Services B.V. Model F28 Mark 0070 and 0100 airplanes. The NPRM published in the **Federal Register** on April 27, 2018 (83 FR 18488). The NPRM was prompted by a report that the retraction actuator eye-end of a Goodrich MLG failed. The NPRM proposed to require a one-time general visual inspection of the LH and RH MLG retraction actuators and replacement if necessary.

We are issuing this AD to address failure of the retraction actuator eye-end of a Goodrich MLG, which could prevent retraction of the MLG and/or its complete extension, possibly resulting in damage to the airplane during landing, and consequent injury to occupants.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2018–0001, dated January 4, 2018 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Fokker Services B.V. Model F28 Mark 0070 and 0100 airplanes. The MCAI states:

> An occurrence was reported where, following take-off after gear up selection, the retraction actuator eye-end (P/N [part number] 41518–3) of a Goodrich MLG failed. After the LG UNSAFE indication, the flight crew successfully selected gear down and locked by applying the alternate extension

procedure, and an uneventful landing was made. Investigation results showed that the final overload fracture of the eye-end was preceded by fatigue cracks, believed to have been caused by interference between the MLG retraction actuator eye-end and the actuator bracket. It was also highlighted that the affected eye-end had been installed incorrectly, *i.e.* with the grease nipple located on the lower side, thus causing damage to the eye-end due to interference with the bracket. Further investigations revealed other occurrences of interference between retraction actuator eye-end and bracket with resulting damage.

This condition, if not detected and corrected, could prevent retraction of the MLG and/or its complete extension, possibly resulting in damage to the aeroplane during landing, and consequent injury to occupants.

To address this potential unsafe condition, Fokker Services published SBF100–32–168 to provide inspection and replacement instructions.

For the reasons described above, this AD requires a one-time [general visual] inspection [for deficiencies] (check the eye-end for presence of interference/damage and for orientation of the greasing nipple) of the MLG retraction actuators, left-hand (LH) and right-hand (RH) sides, and, depending on findings, replacement.

You may examine the MCAI in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0303.

Comments

We gave the public the opportunity to participate in developing this final rule. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this final rule as proposed, except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for addressing the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

Fokker Services B.V. has issued Fokker Service Bulletin SBF100–32–168, dated May 22, 2017. This service information describes procedures for a one-time general visual inspection for deficiencies of the Goodrich MLG retraction actuators and replacement of the actuator if necessary (*e.g.,* if the retraction actuator greasing nipple is not located on the upper side MLG retraction actuator eye-end or if interference damage or evidence of removed damage is present on the eye-end of the MLG retraction actuator). This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 5 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	1 work-hour × $85 per hour = $85 per inspection cycle.	$0	$85 per inspection cycle	$425 per inspection cycle.

We estimate the following costs to do any necessary replacements that would be required based on the results of the inspection. We have no way of determining the number of aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement	1 work-hour × $85 per hour = $85	$0	$85

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes and associated appliances to the Director of the System Oversight Division.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2018–17–06 Fokker Services B.V.: Amendment 39–19360; Docket No. FAA–2018–0303; Product Identifier 2018–NM–006–AD.

(a) Effective Date

This AD is effective September 21, 2018.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Fokker Services B.V. Model F28 Mark 0070 and 0100 airplanes, certificated in any category, all serial numbers, if equipped with Goodrich main landing gear (MLG), part number (P/N) 41050-x (all dashes) or P/N 41060-x (all dashes).

(d) Subject

Air Transport Association (ATA) of America Code 32, Landing gear.

(e) Reason

This AD was prompted by a report that the retraction actuator eye-end of a Goodrich MLG failed. We are issuing this AD to address failure of the retraction actuator eye-end of a Goodrich MLG, which could prevent retraction of the MLG and/or its complete extension, possibly resulting in damage to the airplane during landing, and consequent injury to occupants.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definition

For the purposes of this AD, a ''serviceable part'' is a serviceable retraction actuator with an eye-end that does not have any indication of interference or damage, as specified in the Accomplishment Instructions of Fokker Service Bulletin SBF100–32–168, dated May 22, 2017.

(h) Inspection and Corrective Action

Within 12 months after the effective date of this AD, perform a general visual inspection of the left-hand (LH) and right-hand (RH) MLG retraction actuators for deficiencies (*i.e.,* check for the presence of interference damage, including evidence of removed damage, and for the orientation of the greasing nipple), in accordance with the Accomplishment Instructions of Fokker Service Bulletin SBF100–32–168, dated May 22, 2017. If any deficiency is found, before further flight, replace the affected MLG retraction actuator with a serviceable part, in accordance with the Accomplishment Instructions of Fokker Service Bulletin SBF100–32–168, dated May 22, 2017.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, International Section, Transport Standards Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Section, send it to the attention of the person identified in paragraph (j)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) Contacting the Manufacturer: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Section, Transport Standards Branch, FAA; or the European Aviation Safety Agency (EASA); or Fokker Services B.V.'s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2018–0001, dated January 4, 2018, for related information. This MCAI may be found in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0303.

(2) For more information about this AD, contact Tom Rodriguez, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3226.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Fokker Service Bulletin SBF100–32–168, dated May 22, 2017.

(ii) Reserved.

(3) For service information identified in this AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88–6280–350; fax +31 (0)88–6280–111; email *technicalservices@fokker.com;* internet *http://www.myfokkerfleet.com.*

(4) You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Des Moines, Washington, on August 7, 2018.

Michael Kaszycki,

Acting Director, System Oversight Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2018–0259; Product Identifier 2018–NE–09–AD; Amendment 39–19358; AD 2018–17–04]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce Corporation Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Rolls-Royce Corporation (RRC) AE 2100D2A and AE 2100D3 model turboprop engines and AE 3007A2 model turbofan engines. This AD was prompted by the possibility of a low-cycle fatigue failure on certain turbine wheels. This AD requires removing the affected turbine wheels at the next engine shop visit or before reaching the new reduced life limit, whichever occurs first, and replacing them with parts eligible for installation. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective September 21, 2018.

The Director of the Federal Register approved the incorporation by reference

of certain publications listed in this AD as of September 21, 2018.

ADDRESSES: For service information identified in this final rule, contact Rolls-Royce Corporation, 450 South Meridian Street, Indianapolis, IN 46225; phone: 317–230–3774. You may view this service information at the FAA, Engine and Propeller Standards Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call 781–238–7759. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0259.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0259; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the regulatory evaluation, any comments received, and other information. The address for Docket Operations (phone: 800–647–5527) is Docket Operations, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Kyri Zaroyiannis, Aerospace Engineer, Chicago ACO Branch, FAA, 2300 E. Devon Ave., Des Plaines, IL 60018; phone: 847–294–7836; fax: 847–294–7834; email: *kyri.zaroyiannis@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain RRC AE 2100D2A and AE 2100D3 model turboprop engines and AE 3007A2 model turbofan engines. The NPRM published in the **Federal Register** on April 30, 2018 (83 FR 18751). The NPRM was prompted by the possibility of a low-cycle fatigue failure on certain turbine wheels. The affected turbine wheels include 1st-stage gas generator turbine wheels, installed on AE 2100D2A and AE 2100D3 model turboprop engines, and 1st-stage high-pressure turbine (HPT) wheels, installed on AE 3007A2 turbofan engines. The NPRM proposed to require removing the affected turbine wheels at the next engine shop visit or before reaching the new reduced life limit, whichever occurs first, and replacing them with parts eligible for installation. We are issuing this AD to address the unsafe condition on these products.

Comments

We gave the public the opportunity to participate in developing this final rule. We have considered the comment received. RRC supported the NPRM.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this final rule as proposed.

Related Service Information Under 1 CFR Part 51

We reviewed RRC Alert Service Bulletin (ASB) AE 2100D2–A–72–090, Revision 1, dated July 11, 2014, and RRC ASB AE 2100D3–A–72–286, Revision 1, dated July 11, 2014 (one document, referred to herein as ''RRC ASB AE 2100D2–A–72–090/AE 2100D3–A–72–286''), and RRC ASB AE 3007A–A–72–419, Revision 2, dated December 4, 2017. RRC ASB AE 2100D2–A–72–090/AE 2100D3–A–72–286 provides removal and replacement instructions and a new life limit for the affected 1st-stage gas generator turbine wheels installed on RRC AE 2100D2A and AE 2100D3 model turboprop engines. ASB AE 3007A–A–72–419 provides removal and replacement instructions and a new life limit for 1st-stage HPT wheels installed on RRC AE 3007A2 model turbofan engines. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects nine engines installed on airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replace turbine wheels	0 work-hours × $85 per hour = $0	$160,829	$160,829	$1,447,461

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to engines, propellers, and associated appliances to the Manager, Engine and Propeller Standards Branch, Policy and Innovation Division.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2018–17–04 Roll-Royce Corporation (Type Certificate previously held by Allison Engine Company): Amendment 39–19358; Docket No. FAA–2018–0259; Product Identifier 2018–NE–09–AD.

(a) Effective Date

This AD is effective September 21, 2018.

(b) Affected ADs

None.

(c) Applicability

This AD applies to:

(1) Rolls-Royce Corporation (RRC) AE 2100D2A turboprop engines with 1st-stage gas generator turbine wheels, part number (P/N) 23089692, with serial numbers (S/Ns) MW65898 or MW68310, installed.

(2) RRC AE 2100D3 turboprop engines with 1st-stage gas generator turbine wheels, P/N 23088906, with S/Ns MW65895, MW65896, MW65900, MW65901, MW65903, MW68305, MW68306, MW68307, MW68312, MW68314, MW68316, MW68318, or MW68319, installed.

(3) RRC AE 3007A2 turbofan engines with 1st-stage high-pressure turbine (HPT) wheels, P/N 23088906, with S/Ns MW65894, MW68303, or MW68315, installed.

(d) Subject

Joint Aircraft System Component (JASC) Code 7250, Turbine section.

(e) Unsafe Condition

This AD was prompted by the possibility of steel inclusions in the turbine wheel forging. We are proposing this AD to prevent a low-cycle fatigue failure of a 1st-stage gas generator turbine wheel or 1st-stage HPT wheel. The unsafe condition, if not addressed, could result in uncontained turbine wheel release, damage to the engine, and damage to the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) Remove the affected 1st-stage gas generator turbine wheel and replace with a part eligible for installation at the next engine shop visit or before exceeding the life limit of 4,800 engine cycles, whichever occurs first, in accordance with the Accomplishment Instructions, Paragraph 2, of RRC Alert Service Bulletin (ASB) AE 2100D2–A–72–090, Revision 1, dated July 11, 2014, and RRC ASB AE 2100D3–A–72–286, Revision 1, dated July 11, 2014 (co-published as one document).

(2) Remove the affected 1st-stage HPT wheel and replace with a part eligible for installation at the next engine shop visit or before exceeding the life limit of 5,600 engine cycles, whichever occurs first, in accordance with the Accomplishment Instructions, Paragraph 2, of RRC ASB AE 3007A–A–72–419, Revision 2, dated December 4, 2017.

(h) Definition

For the purpose of this AD, an ''engine shop visit'' is the induction of an engine into the shop for maintenance involving the separation of pairs of major mating engine flanges, except that the separation of engine flanges solely for the purposes of transportation without subsequent engine maintenance is not an engine shop visit.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Chicago ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

For more information about this AD, contact Kyri Zaroyiannis, Aerospace Engineer, Chicago ACO Branch, FAA, 2300 E. Devon Ave., Des Plaines, IL, 60018; phone: 847–294–7836; fax: 847–294–7834; email: *kyri.zaroyiannis@faa.gov*.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Rolls-Royce Corporation (RRC) Alert Service Bulletin (ASB) AE 2100D2–A–72–090, Revision 1, dated July 11, 2014, and RRC ASB AE 2100D3–A–72–286, Revision 1, dated July 11, 2014 (co-published as one document).

(ii) RRC ASB AE 3007A–A–72–419, Revision 2, dated December 4, 2017.

(3) For RRC service information identified in this AD, contact Rolls-Royce Corporation, 450 South Meridian Street, Indianapolis, IN, 46225; phone: 317–230–3774.

(4) You may view this service information at FAA, Engine and Propeller Standards Branch, 1200 District Avenue, Burlington, MA, 01803. For information on the availability of this material at the FAA, call 781–238–7759.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Burlington, Massachusetts, on August 13, 2018.

Karen M. Grant,

Acting Manager, Engine and Propeller Standards Branch, Aircraft Certification Service.

Airworthiness Directives; ATR—GIE Avions de Transport Régional Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: We are superseding Airworthiness Directive (AD) 2017–24–01, which applied to certain ATR—GIE Avions de Transport Régional Model ATR42–500 airplanes and Model ATR72–212A airplanes. AD 2017–24–01 required an inspection for routing attachments of electrical harness bundles and for wire damage, and corrective actions if necessary. This new AD adds additional airplanes to the applicability. This AD was prompted by a determination that additional airplanes are affected by the unsafe condition. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective September 4, 2018.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of September 4, 2018 .

We must receive comments on this AD by October 1, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact ATR—GIE Avions de Transport Régional, 1 Allée Pierre Nadot, 31712 Blagnac Cedex, France; telephone +33 (0) 5 62 21 62 21; fax +33 (0) 5 62 21 67 18; email *continued.airworthiness@atr-aircraft.com; http://www.atr-aircraft.com.* You may view this referenced service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0712.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0712; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800–647–5527) is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Shahram Daneshmandi, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–321–3220.

SUPPLEMENTARY INFORMATION:

Discussion

We issued AD 2017–24–01, Amendment 39–19105 (82 FR 55755, November 24, 2017) (''AD 2017–24–01''), which applied to certain Model ATR42–500 airplanes and Model ATR72–212A airplanes. AD 2017–24–01 was prompted by reports of electrical harness bundle chafing with a window blinding panel in the fuselage due to missing routing attachments. AD 2017–24–01 required an inspection for routing attachments (*i.e.,* brackets) of electrical harness bundles and for wire damage, and corrective actions if necessary. We issued AD 2017–24–01 to detect and correct missing routing attachments of fuselage electrical harness bundles, which could result in wire failure (cut or shorted) and, in case of several failures in combination, the loss of systems, possibly resulting in reduced control of the airplane.

Since we issued AD 2017–24–01, we have determined that additional airplanes are affected by the unsafe condition.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2018–0105, dated May 08, 2018 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Model ATR42–500 airplanes and Model ATR72–212A airplanes. The MCAI states:

> An event was reported of several spurious alarms on a recently delivered ATR 72 aeroplane. During subsequent trouble-shooting, damage was found on the electrical harness wire bundle (Route 1M), due to chafing with a window blinding panel located on the left-hand (LH) side of the fuselage, zone 231. A bracket, necessary to maintain the harness wire bundle close to the structure of the fuselage and avoid chafing, was missing. The same bracket was also found missing on the right-hand (RH) side of the fuselage, zone 232, Route 2M, although without damage on the harness wire bundle. A quality investigation revealed another aeroplane on the production line where same brackets were not installed.
>
> This condition, if not detected and corrected, may lead to wire failure (cut or shorted) and, in case of several failures in combination, to loss of systems, possibly resulting in reduced control of the aeroplane.
>
> To address this potential unsafe condition, ATR published the applicable SB [service bulletin] to provide inspection instructions. Consequently, EASA issued AD 2017–0118 [which corresponds to FAA AD 2017–24–01] to require verification of the installation of the brackets, a one-time inspection of the wire bundles, and depending on findings, accomplishment of applicable corrective action(s).
>
> Since that [EASA] AD was issued, an occurrence was reported of engine intermittent auto-feather, caused by damage on the electrical harness bundle Route 1M. The affected aeroplane MSN [manufacturer serial number] was not identified in the Applicability of EASA AD 2017–0118.
>
> For the reason described above, this [EASA] AD retains the requirements of EASA AD 2017–0118, which is superseded, and expands the Applicability to include additional aeroplanes, identified by MSN in Group 2 as specified in section 'Definitions' of this [EASA] AD.

The MCAI includes MSNs 1071, 1141, 1341, 1367, and 1377 in its applicability, but those MSNs are not identified in the definitions for the affected groups. Those MSNs are not affected by the identified unsafe condition. Therefore, we have not included those MSNs in our applicability. You may examine the MCAI on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0712.

Related Service Information Under 1 CFR Part 51

ATR has issued Service Bulletin ATR42–92–0033, Revision 02, dated April 12, 2018; and Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018. This service information describes procedures for an inspection of routing attachments (*i.e.,* brackets) of electrical harness bundles and for wire damage, and corrective actions if necessary. These documents are distinct since they apply to different airplane models. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all pertinent information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

FAA's Justification and Determination of the Effective Date

There are currently no domestic operators of this product. Therefore, we good cause find that notice and opportunity for prior public comment are unnecessary and that, for the same reason, good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2018–0712; Product Identifier 2018–NM–089–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

Currently, there are no affected U.S.-registered airplanes. If an affected airplane is imported and placed on the U.S. Register in the future, we provide the following cost estimates to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product
Inspection	3 work-hours × $85 per hour = $255	$0	$255

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes to the Director of the System Oversight Division.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing airworthiness directive (AD) 2017–24–01, Amendment 39–19105 (82 FR 55755, November 24, 2017), and adding the following new AD:

2018–17–07 ATR—GIE Avions de Transport Régional: Amendment 39–19361; Docket No. FAA–2018–0712; Product Identifier 2018–NM–089–AD.

(a) Effective Date

This AD is effective September 4, 2018.

(b) Affected ADs

This AD replaces AD 2017–24–01, Amendment 39–19105 (82 FR 55755, November 24, 2017) (''AD 2017–24–01'').

(c) Applicability

This AD applies to the ATR—GIE Avions de Transport Régional airplanes identified in paragraphs (c)(1) and (c)(2) of this AD, certificated in any category.

(1) Model ATR42–500 airplanes, manufacturer serial numbers (MSNs) 1001 through 1014 inclusive, 1016 through 1019 inclusive, and 1201 through 1212 inclusive.

(2) Model ATR72–212A airplanes, MSNs 1048 through 1070 inclusive, 1072 through 1140 inclusive, 1142 through 1200 inclusive, 1220 through 1340 inclusive, 1342 through 1353 inclusive, 1355 through 1366 inclusive, 1368 through 1376 inclusive, 1378 through 1380 inclusive, 1382, 1385, and 1388.

(d) Subject

Air Transport Association (ATA) of America Code 92, Electric.

(e) Reason

This AD was prompted by reports of electrical harness bundle chafing with a window blinding panel in the fuselage due to missing routing attachments and by a determination that additional airplanes that were not identified in AD 2017–24–01 are affected by the unsafe condition. We are issuing this AD to detect and correct missing

routing attachments of fuselage electrical harness bundles, which could result in wire failure (cut or shorted), and, in case of several failures in combination, the loss of systems, possibly resulting in reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

(1) For the purposes of this AD, Group 1 airplanes are identified as the following: MSNs 1014, 1016 through 1019 inclusive, 1165 through 1212 inclusive, 1220 through 1340 inclusive, 1342 through 1353 inclusive, 1355 through 1366 inclusive, 1368 through 1376 inclusive, 1378 through 1380 inclusive, 1382, 1385 and 1388.

(2) For the purposes of this AD, Group 2 airplanes are identified as the following: MSNs 1001 through 1013 inclusive, 1048 through 1070 inclusive, 1072 to 1140 inclusive 1142 through 1164 inclusive.

(h) Retained Inspection With New Service Information and Revised Compliance Language

This paragraph restates the requirements of paragraph (g) of AD 2017–24–01, with new service information and revised compliance language. For Group 1 airplanes: Within 6 months or 500 flight hours after December 11, 2017 (the effective date of AD 2017–24–01), whichever occurs first, do a detailed inspection for missing brackets and damage (including but not limited to chafing and electrical shorting) to wire bundles of the Route 1M and Route 2M electrical harness, in accordance with the flowchart in paragraph 1.C., ''Description,'' and the Accomplishment Instructions of ATR Service Bulletin ATR42–92–0033, Revision 02, dated April 12, 2018 (for Model ATR42–500 airplanes); or ATR Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018 (for Model ATR72–212A airplanes); as applicable. Although ATR Service Bulletin ATR42–92–0033, Revision 02, dated April 12, 2018; and ATR Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018; specify reporting, this AD does not include that requirement.

(i) New Requirement of This AD: Inspection

For Group 2 airplanes: Within 6 months or 500 flight hours after the effective date of this AD, whichever occurs first, do a detailed inspection for missing brackets and damage (including but not limited to chafing and electrical shorting) to wire bundles of the Route 1M and Route 2M electrical harness, in accordance with the flowchart in paragraph 1.C., ''Description,'' and the Accomplishment Instructions of ATR Service Bulletin ATR42–92–0033, Revision 02, dated April 12, 2018 (for Model ATR42–500 airplanes); or ATR Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018 (for Model ATR72–212A airplanes); as applicable. Although ATR Service Bulletin ATR42–92–0033, Revision 02, dated April 12, 2018; and ATR Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018; specify reporting, this AD does not include that requirement.

(j) New Requirements of This AD: Corrective Action

If the inspection required by paragraph (h) or (i) of this AD reveals that any bracket is missing or any wire is damaged, before further flight, do applicable corrective actions, in accordance with the flowchart in paragraph 1.C., ''Description,'' and the Accomplishment Instructions of ATR Service Bulletin ATR42–92–0033, Revision 02, dated April 12, 2018 (for Model ATR42–500 airplanes); or ATR Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018 (for Model ATR72–212A airplanes); as applicable. Where ATR Service Bulletin ATR42–92–0033, Revision 02, dated April 12, 2018; and ATR Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018; specify to contact ATR–GIE Avions de Transport Régional for appropriate action, before further flight, accomplish corrective actions in accordance with the procedures specified in paragraph (l)(2) of this AD.

(k) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (h), (i), and (j) of this AD, if those actions were performed before the effective date of this AD using ATR Service Bulletin ATR42–92–0033, dated May 3, 2017, or Revision 01, dated July 20, 2017; or ATR Service Bulletin ATR72–92–1044, dated May 3, 2017, or Revision 01, dated July 20, 2017, as applicable. ATR Service Bulletin ATR42–92–0033, dated May 3, 2017; and ATR72–92–1044, dated May 3, 2017, were previously incorporated by reference in AD 2017–24–01. ATR Service Bulletin ATR42–92–0033 Revision 01, dated July 20, 2017; and ATR72–92–1044, Revision 01, dated July 20, 2017, were not previously incorporated by reference.

(l) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, International Section, Transport Standards Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Section, send it to the attention of the person identified in paragraph (m)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) Contacting the Manufacturer: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Section, Transport Standards Branch, FAA; or, the European Aviation Safety Agency (EASA); or, ATR—GIE Avions de Transport Régional's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(m) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2018–0105, dated May 08, 2018, for related information. This MCAI may be found in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0712.

(2) For more information about this AD, contact Shahram Daneshmandi, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–321–3220.

(3) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (n)(3) and (n)(4) of this AD.

(n) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) ATR Service Bulletin ATR42– 92–0033, Revision 02, dated April 12, 2018.

(ii) ATR Service Bulletin ATR72–92–1044, Revision 02, dated April 12, 2018.

(3) For service information identified in this AD, contact ATR—GIE Avions de Transport Régional, 1 Allée Pierre Nadot, 31712 Blagnac Cedex, France; telephone +33 (0) 5 62 21 62 21; fax +33 (0) 5 62 21 67 18; email *continued.airworthiness@atr-aircraft.com;* internet *http://www.atr-aircraft.com.*

(4) You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Des Moines, Washington, on August 8, 2018.

Michael Kaszycki,

Acting Director, System Oversight Division, Aircraft Certification Service.

[FR Doc. 2018–17661 Filed 8–16–18; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 73

[Docket No. FAA–2018–0728; Airspace Docket No. 18–ASO–2]

RIN 2120–AA66

Amendment of Multiple Restricted Area Boundary Descriptions; Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; technical amendment.

SUMMARY: This action makes minor adjustments to the boundary descriptions of restricted areas R–2905A and R–2905B, Tyndall AFB, FL; R–2914B, and R–2919B, Valparaiso, FL; R–2915A and R–2915C, Eglin AFB, FL. The changes are needed because the FAA has adopted updated digital data that more precisely define maritime limits and other geophysical features used in the boundary descriptions. This requires minor changes to certain latitude/longitude points in the boundary descriptions of the above restricted areas in order to match the updated data and ensure accurate boundary depiction on aeronautical charts.

DATES: *Effective date:* 0901 UTC, November 8, 2018.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Policy Group, AJV–11, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it supports updating certain boundary coordinates for restricted areas Tyndall AFB, FL, Valparaiso, FL, and, Eglin AFB, FL.

Background

Some restricted area boundary descriptions use maritime limits, such as references to the shoreline of the U.S., to identify the shape of the area (*e.g.,* ''3 nautical miles from and parallel to the shoreline''). These boundary descriptions contain latitude/longitude coordinates that were intended to intersect a line running 3 NM from, and parallel to, the shoreline. In other cases, boundaries are defined with reference to geophysical features such as a railroad track or highway.

For a variety of reasons, maritime limits change over time. The FAA has received updated digital data for maritime limits from the National Oceanic and Atmospheric Administration (NOAA). Digital data are more precise than measurements used in the past. The FAA, through the implementation of its data-driven charting process, was able to utilize this new data to accurately update the U.S. maritime limit boundaries used for aeronautical charting. Prior to the update, the maritime limit boundary data used for charting were over 25 years old. In applying the updated data, FAA found that some restricted area boundary descriptions that were based on the maritime limits, did not correspond to the updated shoreline data. Consequently, there are minor mismatches between some restricted area latitude/longitude coordinates and the actual shoreline position. Similarly, more accurate digital data is available for railroads and highways and the FAA is applying that information as well.

This rulemaking action updates the affected boundary coordinates of restricted areas R–2905A, R–2905B, R–2914B, R–2915C, and R–2919B, in Florida to ensure that the published boundaries match the actual relation to the U.S. shoreline, and maintain aeronautical chart accuracy. R–2915A is amended to reflect digital positional data for the L and N Railroad and the Navarre-Milton Highway, which form part of that restricted area's boundary.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) part 73 by making minor updates to certain latitude/longitude coordinates in the descriptions of restricted areas R–2905A, R–2905B, R–2914B, R–2915A, R–2915C, and R–2919B, in Florida. The changes are needed because the FAA has adopted the use of digital data for aeronautical charting. This more precise digital plotting of points revealed minor mismatches between some current restricted area boundary coordinates and the updated digital data for those points. The specific restricted area boundary updates are shown below:

R–2905A: The point ''lat. 29°56′01″ N, long. 85°33′00″ W'' is amended to ''lat. 29°56′06″ N, long. 85°32′57″ W.'' The point ''lat. 29°59′01″ N, long. 85°36′30″ W'' is amended to ''lat. 29°59′05″ N, long. 85°36′24″ W.'' These changes reflect updated digital shoreline data.

R–2905B: The point ''lat. 29°54′01″ N, long. 85°27′00″ W'' is amended to ''lat. 29°54′09″ N, long. 85°27′00″ W.'' The point ''lat. 29°56′01″ N, long. 85°33′00″ W'' is amended to ''lat. 29°56′06″ N, long. 85°32′57″ W.'' These changes reflect updated digital shoreline data.

R–2914B: The point ''lat. 30°11′01″ N, long. 85°56′00″ W'' is amended to ''lat. 30°11′08″ N, long. 85°56′00″W.'' The point ''lat. 30°15′01″ N, long. 86°06′15″ W'' is amended to ''lat. 30°15′18″ N, long. 86°06′19″ W.'' These changes reflect updated digital shoreline data.

R–2915A: The point ''lat. 30°33′41″ N, long. 86°55′00″ W'' is amended to ''lat. 30°33′30″ N, long. 86°55′00″ W.'' The point ''lat. 30°38′46″ N, long. 86°55′00″ W'' is amended to ''lat. 30°38′52″ N, long. 86°55′00″ W.'' The point ''lat. 32°42′46″ N, long. 86°45′45″ W'' is amended to ''lat. 30°42′46″ N, long. 86°45′23″ W.'' The point ''lat. 30°26′31″ N, long. 86°52′20″ W'' is amended to ''lat. 30°26′31″ N, long. 86°52′00″ W.'' These amended points are based on digital data for the L and N Railroad and the Navarre-Milton Highway.

R–2915C: The point ''lat. 30°20′51″ N, long. 86°38′50″ W'' is amended to ''lat. 30°20′47″ N, long. 86°38′51″ W.'' The point ''lat. 30°19′31″ N, long. 86°51′30″ W'' is amended to ''lat. 30°19′45″ N, long. 86°51′30″ W.'' These changes reflect updated digital shoreline data.

R–2919B: The point ''lat. 30°15′01″ N, long. 86°06′15″ W'' is amended to ''lat. 30°15′18″ N, long. 86°06′19″ W.'' The point ''lat. 30°19′46″ N, long. 86°23′45″ W'' is amended to ''lat. 30°19′41″ N, long. 86°23′46″ W.'' These changes reflect updated digital shoreline data.

These minor editorial changes update existing restricted area boundaries with more precise digital information. It does not affect the location, designated altitudes, or activities conducted within the restricted areas; therefore, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

Regulatory Notices and Analyses

The FAA has determined that this action only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ''significant regulatory action'' under

Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action of making minor adjustments to the boundary descriptions of restricted areas R–2905A and R–2905B, Tyndall AFB, FL; R–2914B, Valparaiso, FL; R–2915A and R–2915C, Eglin AFB, FL; and R–2919B, Valparaiso, FL qualifies for categorical exclusion under the National Environmental Policy Act and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5–6.5.d, Modification of the technical description of special use airspace (SUA) that does not alter the dimension, altitudes, or times of designation of the airspace. This airspace action makes minor updates to certain boundary coordinates of restricted areas R–2905A and R–2905B, Tyndall AFB, FL; R–2914B, Valparaiso, FL; R–2915C, Eglin AFB, FL; and R–2919B, Valparaiso, FL, to match the more precise digital shoreline data received from the National Oceanic and Atmospheric Administration (NOAA). This ensures that the affected boundaries continue to match the NOAA-defined position of the U.S. shoreline, and more accurate digital data for geophysical references. It does not alter the location, altitudes, or activities conducted within the airspace; therefore, it is not expected to cause any potentially significant environmental impacts. In accordance with FAA Order 1050.1F, paragraph 5–2 regarding Extraordinary Circumstances, the FAA has reviewed this action for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis. The FAA has determined that no extraordinary circumstances exist that warrant preparation of an environmental assessment or environmental impact study.

List of Subjects in 14 CFR Part 73

Airspace, Prohibited areas, Restricted areas.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 73, as follows:

PART 73—SPECIAL USE AIRSPACE

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 73.29 [Amended]

■ 2. Section 73.29 is amended as follows:

* * * * *

R–2905A Tyndall AFB, FL [Amended]

By removing the current boundaries and adding in its place the following:

Boundaries. Beginning at lat. 30°01′31″ N, long. 85°32′30″ W; to lat. 30°01′16″ N, long. 85°30′00″ W; to lat. 29°56′06″ N, long. 85°32′57″ W; thence 3 nautical miles from and parallel to the shoreline to lat. 29°59′05″ N, long. 85°36′24″ W; to the point of beginning.

R–2905B Tyndall AFB, FL [Amended]

By removing the current boundaries and adding in its place the following:

Boundaries. Beginning at lat. 30°01′16″ N, long. 85°30′00″ W; to lat. 30°01′01″ N, long. 85°27′00″ W; to lat. 29°54′09″ N, long. 85°27′00″ W; thence 3 nautical miles from and parallel to the shoreline to lat. 29°56′06″ N, long. 85°32′57″ W; to the point of beginning.

R–2914B Valparaiso, FL [Amended]

By removing the current boundaries and adding in its place the following:

Boundaries. Beginning at lat. 30°22′01″ N, long. 86°08′00″ W; to lat. 30°19′16″ N, long. 85°56′00″ W; to lat. 30°11′08″ N, long. 85°56′00″ W; thence 3 nautical miles from and parallel to the shoreline to lat. 30°15′18″ N, long. 86°06′19″ W; to the point of beginning.

R–2915A Eglin AFB, FL [Amended]

By removing the current boundaries and adding in its place the following:

Boundaries. Beginning at lat. 30°33′30″ N, long. 86°55′00″ W; to lat. 30°38′52″ N, long. 86°55′00″ W; thence along the L and N Railroad to lat. 30°42′46″ N, long. 86°45′23″ W; to lat. 30°42′51″ N, long. 86°38′02″ W; to lat. 30°29′02″ N, long. 86°38′02″ W; to lat. 30°26′31″ N, long. 86°51′30″ W; to lat. 30°26′31″ N, long. 86°52′00″ W; thence along the Navarre-Milton Highway to the point of beginning.

R–2915C Eglin AFB, FL [Amended]

By removing the current boundaries and adding in its place the following:

Boundaries. Beginning at lat. 30°22′47″ N, long. 86°51′30″ W; thence along the shoreline to lat. 30°23′46″ N, long. 86°38′15″ W; to lat. 30°20′47″ N, long. 86°38′51″ W; thence 3 nautical miles from and parallel to the shoreline to lat. 30°19′45″ N, long. 86°51′30″ W; to the point of beginning.

R–2919B Valparaiso, FL [Amended]

By removing the current boundaries and adding in its place the following:

Boundaries. Beginning at lat. 30°25′01″ N, long. 86°22′26″ W; to lat. 30°22′01″ N, long. 86°08′00″ W; to lat. 30°15′18″ N, long. 86°06′19″ W; thence 3 NM from and parallel to the shoreline to lat. 30°19′41″ N, long. 86°23′46″ W; to the point of beginning.

Issued in Washington, DC, on August 13, 2018.

Rodger A. Dean, Jr.,

Manager, Airspace Policy Group.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31207; Amdt. No. 3812]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide for the safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective August 17, 2018. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of August 17, 2018.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops–M30, 1200 New Jersey

Avenue SE, West Bldg., Ground Floor, Washington, DC 20590–0001;

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA).

For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center online at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedure Standards Branch (AFS–420) Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082 Oklahoma City, OK. 73125) telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14, Code of Federal Regulations, part 97 (14 CFR part 97) by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (NFDC)/Permanent Notice to Airmen (P–NOTAM), and is incorporated by reference under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained on FAA form documents is unnecessary.

This amendment provides the affected CFR sections, and specifies the SIAPs and Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP and Takeoff Minimums and ODP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP and Takeoff Minimums and ODP as modified by FDC permanent NOTAMs.

The SIAPs and Takeoff Minimums and ODPs, as modified by FDC permanent NOTAM, and contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for these SIAP and Takeoff Minimums and ODP amendments require making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making these SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air Traffic Control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on July 27, 2018.

Rick Domingo,

Executive Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal regulations, part 97, (14 CFR part 97), is amended by amending Standard Instrument Approach Procedures and Takeoff Minimums and ODPs, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedure Standards Branch (AFS–420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, part 97 (14 CFR part 97), by establishing, amending, suspending, or removes SIAPS, Takeoff Minimums and/or ODPS. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part 97.20. The applicable FAA forms are FAA Forms 8260–3, 8260–4,

8260–5, 8260–15A, and 8260–15B when required by an entry on 8260–15A.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPS, Takeoff Minimums and/or ODPS as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on July 27, 2018.

Rick Domingo,

Executive Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 803

[Docket No. FDA–2017–N–6730]

Medical Devices and Device-Led Combination Products; Voluntary Malfunction Summary Reporting Program for Manufacturers

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification; order granting alternative.

SUMMARY: The Food and Drug Administration's (FDA, Agency, or we) Center for Devices and Radiological Health and Center for Biologics Evaluation and Research are announcing that the Agency is granting an alternative that permits manufacturer reporting of certain device malfunction medical device reports (MDRs) in summary form on a quarterly basis. We refer to this alternative as the ''Voluntary Malfunction Summary Reporting Program.'' This voluntary program reflects goals for streamlining malfunction reporting outlined in the commitment letter agreed to by FDA and industry and submitted to Congress, as referenced in the Medical Device User Fee Amendments of 2017 (MDUFA IV Commitment Letter).

DATES: This voluntary program applies only to reportable malfunction events that manufacturers become aware of on or after August 17, 2018. See further discussion in section IV.F. ''Submission Schedule and Logistics.''

FOR FURTHER INFORMATION CONTACT: Michelle Rios, Center for Devices and Radiological Health (CDRH), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 3222, Silver Spring, MD 20993, 301–796–6107, *MDRPolicy@fda.hhs.gov;* or Stephen Ripley, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911; or CBER, Office of Communication, Outreach, and Development (OCOD), 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002; or by calling 1–800–835–4709 or 240–402–8010; or email: *ocod@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

Every year, FDA receives hundreds of thousands of MDRs of suspected device-associated deaths, serious injuries, and malfunctions. The Agency's MDR program is one of the postmarket surveillance tools FDA uses to monitor device performance, detect potential device-related safety issues, and contribute to benefit-risk assessments. Malfunction reports represent a substantial fraction of the MDRs FDA receives on an annual basis.

Medical device reporting requirements for manufacturers are set forth in section 519 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360i) and the regulations contained in part 803 (21 CFR part 803). Among other things, part 803 requires the submission of an individual MDR when a manufacturer becomes aware of information, from any source, which reasonably suggests that one of its marketed devices malfunctioned and the malfunction of the device or a similar device marketed by the manufacturer would be likely to cause or contribute to a death or serious injury if the malfunction were to recur (§§ 803.10(c)(1) and 803.50(a)(2). Throughout this document, we refer to such malfunctions as ''reportable malfunctions'' or ''reportable malfunction events.''

The Food and Drug Administration Amendments Act of 2007 (FDAAA)

(Pub. L. 110–85) amended section 519(a) of the FD&C Act related to the reporting of device malfunctions. FDAAA did not alter the malfunction reporting requirements for class III devices and those class II devices that are permanently implantable, life supporting, or life sustaining. Under section 519(a)(1)(B)(i) of the FD&C Act, as amended by FDAAA, manufacturers of those devices must continue to submit malfunction reports in accordance with part 803 (or successor regulations), unless FDA grants an exemption or variance from, or an alternative to, a requirement under such regulations under § 803.19. However, FDAAA amended the FD&C Act to require that malfunction MDRs for class I and those class II devices that are not permanently implantable, life supporting, or life sustaining—other than any type of class I or II device that FDA has, by notice, published in the **Federal Register** or by letter to the person who is the manufacturer or importer of the device, indicated should be subject to part 803 in order to protect the public health—be submitted in accordance with the criteria established by FDA. The criteria require the malfunction reports to be in summary form and made on a quarterly basis (section 519(a)(1)(B)(ii) of the FD&C Act). In the **Federal Register** of March 8, 2011 (76 FR 12743), FDA explained that, pending further notice from the Agency, all class I devices and those class II devices that are not permanently implantable, life supporting, or life sustaining would remain subject to individual reporting requirements under part 803 to protect the public health, pursuant to section 519(a)(1)(B)(i)(III) of the FD&C Act. Consequently, unless granted an exemption, variance, or alternative, manufacturers of those devices have continued to be required to submit individual malfunction reports under part 803. Under § 803.19, FDA may grant exemptions or variances from, or alternatives to, any or all of the reporting requirements in part 803, and may change the frequency of reporting to quarterly, semiannually, annually, or other appropriate time period. FDA may grant such modifications upon request or at its discretion, and when granting such modifications, FDA may impose other reporting requirements to ensure the protection of the public health. (See § 803.19(c))

In the **Federal Register** of December 26, 2017 (82 FR 60922), FDA issued a notification outlining FDA's proposal to grant an alternative under § 803.19 to permit manufacturer reporting of certain device malfunctions in summary form on a quarterly basis, subject to certain conditions, and requested comments (2017 Proposal). As explained in the 2017 Proposal, the Voluntary Malfunction Summary Reporting Program is intended to reflect goals for streamlining malfunction reporting that FDA and industry agreed to in the MDUFA IV Commitment Letter (Ref. 1). The 2017 Proposal also summarized FDA's previous experience with summary reporting programs, key findings from an FDA pilot program for the submission of MDRs in summary format on a quarterly basis (see 80 FR 50010, August 18, 2015), additional background regarding the development of the proposal, and the anticipated benefits of summary reporting under the proposal. Interested persons were given the opportunity to submit comments by February 26, 2018.

II. Comments on the Proposed Alternative and FDA's Response

In response to the 2017 Proposal, FDA received 24 comments from industry, professional societies, trade organizations, and individual consumers by the close of the comment period, each containing one or more comments on one or more issues. A summary of the comments to the docket and our responses follow. To make it easier to identify comments and our responses, the word ''Comment'' appears in parentheses before the comment's description, and the word ''Response'' in parentheses precedes the response. The comments are grouped based on common themes and numbered sequentially.

A. General Comments

(Comment 1) Three comments suggested that the proposal was inconsistent with amendments made by section 227 of FDAAA to section 519(a) of the FD&C Act regarding malfunction reporting requirements. Two of these comments specifically recommended that FDA immediately implement summary, quarterly malfunction reporting under section 519(a)(1)(B)(ii) of the FD&C Act for all class I devices and those class II devices that are not permanently implantable, life supporting, or life sustaining.

(Response 1) FDA disagrees with these comments. As discussed in the 2017 Proposal, currently, there are still reportable malfunctions for which submission of individual malfunction reports on a prompter basis than quarterly is necessary to protect the public health—for example, when remedial action is needed to prevent an unreasonable risk of substantial harm to the public health. Those situations may involve class I devices and class II devices that are not permanently implantable, life supporting, or life sustaining, and it is not feasible for FDA to provide notice in the **Federal Register** or by letter to individual manufacturers, pursuant to section 519(a)(1)(B)(i)(III) of the FD&C Act, each time one of these situations arises. For example, FDA may not become aware of the situation until it receives an MDR from a manufacturer. Therefore, in accordance with section 519(a)(1)(B)(i)(III) of the FD&C Act, manufacturers of class I devices and those class II devices that are not permanently implantable, life supporting, or life sustaining remain subject to individual reporting requirements in part 803, unless granted an exemption, variance, or alternative, to protect the public health. However, FDA does believe that malfunction summary reporting on a quarterly basis, in accordance with the conditions described in section IV, will reduce burden on FDA and manufacturers and allow FDA to effectively monitor many devices. Accordingly, the Agency is granting an alternative under section 519(a)(1)(B)(i) of the FD&C Act and § 803.19 to permit manufacturers of those devices to submit summary, quarterly malfunction reports, with certain conditions.

(Comment 2) Several comments raised concerns that the proposed program would be unable to provide FDA with critical information on adverse event reporting. Many of the comments from individual consumers also raised concerns that the proposed program would limit transparency of malfunction event data that is publicly available to patients and physicians, including transparency regarding the number of reported malfunctions. However, another comment indicated that the proposed program would minimize burden while maintaining patient safety. That same comment further indicated that the proposed malfunction summary reporting format would enhance public visibility into the events and associated investigation compared to a format previously used for the Alternative Summary Reporting (ASR) program.

(Response 2) FDA disagrees with the comments suggesting that the Voluntary Malfunction Summary Reporting Program will negatively affect patient safety and the transparency of malfunction reports. Summary, quarterly reporting in accordance with this program will result in some malfunction reports being submitted to FDA and added to the publicly available Manufacturer and User Facility Device Experience (MAUDE) database later

than this occurs under FDA's current individual reporting requirements. However, as explained in our 2017 Proposal, we believe this reporting format and schedule will also yield benefits for FDA and the public, such as helping FDA process malfunction reports more efficiently and helping both FDA and the public more readily identify malfunction trends.

While summary malfunction reports submitted under this program will change the format in which information is presented to FDA, we do not believe there will be an adverse impact on the content of information provided to FDA. The format for summary reporting described in section IV.D includes a narrative section for describing malfunctions, similar to the narrative section required for individual reporting. In addition, each narrative section is required to include a sentence specifying the number of malfunction events summarized in the report, providing transparency for the public regarding the number of events that a summary report available in MAUDE represents. Therefore, we agree with the comment that the summary reporting format will improve transparency for the public when compared to some past summary reports submitted to FDA, such as reports submitted under the ASR program (Ref. 2).

(Comment 3) One comment requested clarification as to whether a manufacturer would need to apply or obtain permission to participate in the program and asked FDA to clarify how the proposed program would work with other alternative summary reporting situations. Another comment asked FDA to clarify whether manufacturers can still apply for an exemption or variance to be granted under § 803.19 for their devices that do not fall under an eligible product code.

(Response 3) FDA is clarifying in the description of the alternative that manufacturers do not need to submit a request or application to FDA before participating in the Voluntary Malfunction Summary Reporting Program. For devices that fall within eligible product codes, the alternative that FDA is granting under § 803.19 provides that manufacturers may choose or ''self-elect'' to participate, subject to the program conditions identified in section IV. If a manufacturer wishes to request a different exemption, variance, or alternative under § 803.19 (including for devices in product codes that are eligible for the Voluntary Malfunction Summary Reporting Program) the manufacturer may submit a request to FDA. For more information regarding the recommended content of such requests, see section 2.27 of the Agency's guidance entitled ''Medical Device Reporting for Manufacturers: Guidance for Industry and Food and Drug Administration Staff'' (MDR Guidance) (Ref. 3).

Whether participation in the Voluntary Malfunction Summary Reporting Program will have an impact on a manufacturer being granted a different exemption, variance, or alternative under § 803.19 will depend on the scope of the other exemption, variance, or alternative. FDA will make a case-by-case determination on requests for an exemption, variance, or alternative submitted under § 803.19(b).

B. Scope of Program

(Comment 4) Several comments also discussed the scope of product codes that should be eligible for the proposed program. One comment expressed concern about including class III devices and class II devices that are permanently implantable, life-supporting, or life-sustaining in the program and urged FDA to issue another **Federal Register** notice with the list of eligible product codes for these categories of devices for public comment before allowing summary, quarterly malfunction reporting for those devices. In contrast, another comment asserted that all devices should be eligible for malfunction summary reporting, unless there is an express determination, subject to public input, that permitting summary reporting for a device would present public health concerns. Other comments recommended that all device product codes should be eligible for summary, quarterly malfunction reporting, with the exception of product codes for class III devices and class II devices that are permanently implantable, life supporting, or life sustaining when those product codes have been in existence for less than 2 years.

(Response 4) FDA disagrees that it should publish another **Federal Register** notice for public comment listing product codes that would be eligible or ineligible for the program. Among other reasons, the Agency expressly requested comment on the product codes that should be eligible for the proposed program, and many commenters submitted proposed lists of eligible product codes or identified specific devices about which they had concerns. FDA has considered these comments and has also conducted an extensive review of all product codes, regardless of device class, to determine whether each product code would be eligible. In addition, consistent with its 2017 Proposal, product codes that have been in existence for less than 2 years are not included in the list of eligible product codes, unless the new product code was created solely for administrative reasons. In FDA's experience, this 2-year period is an important period for having more timely, detailed information to monitor malfunction events. That 2-year timeframe for new product codes is also consistent with the MDUFA IV Commitment Letter (Ref. 1).

(Comment 5) Three comments recommended that importers be included within the scope of the proposed program and indicated that FDA should provide a rationale for not including them. One of those comments suggested that without more information, it appeared arbitrary that FDA did not include importers and user facilities in the summary reporting program.

(Response 5) FDA disagrees with these comments. Unlike manufacturers, device user facilities are not required to submit malfunction reports under part 803. User facilities, such as hospitals or nursing homes, are required to submit MDRs to FDA and/or the manufacturer *only* for reportable death or serious injury events. (See section 519(b) of the FD&C Act; § 803.30(a)).

Importers are also subject to different requirements for reporting device malfunctions than those for manufacturers under part 803. Under § 803.40, importers are required to submit a report to the device manufacturer, not to FDA, within 30 days after becoming aware of a reportable malfunction event. Manufacturers then determine the reportability of the information received from the importer and accordingly submit those reports to FDA. This program specifically addresses malfunction summary reporting to FDA. In addition, we believe it is important for importers to continue to submit individual malfunction MDRs to device manufacturers in accordance with § 803.40 so that manufacturers receive detailed information necessary to conduct adequate investigations and follow up related to malfunction events.

C. Individual Reporting Conditions

(Comment 6) One comment suggested that when requesting that a manufacturer submit a 5-day report, FDA should have an objective and documented basis for making such a request, as well as an opportunity for manufacturers to appeal. Other comments asked FDA to define the term ''substantially similar'' as used in describing the program condition regarding 5-day reports and to clarify

what constitutes an ''imminent hazard'' and whether this is analogous to reportable malfunctions requiring a 5-day report.

(Response 6) The circumstances in which a 5-day report is required are defined under § 803.53, and those circumstances remain unchanged for manufacturers participating in the Voluntary Malfunction Summary Reporting Program. As stated in the 2017 Proposal, the reporting requirements at § 803.53 will continue to apply to manufacturers of devices in eligible product codes who participate in this program. We have added a separate heading to the description of the alternative to clarify this point further. For more information regarding the handling of a 5-day report, please see section 2.20 of the Agency's MDR Guidance (Ref. 3).

The first individual reporting condition requires that if a manufacturer submits a 5-day report for an event or events that require remedial action to prevent an unreasonable risk of substantial harm to public health, all subsequent reportable malfunctions of the same nature that involve substantially similar devices must be submitted as individual MDRs in accordance with §§ 803.50 and 803.52 until the date that the remedial action has been resolved to FDA's satisfaction. For purposes of this individual reporting condition, a ''substantially similar'' device could be, for example, a device that is the same except for certain performance characteristics or a device that is the same except for certain cosmetic differences in color or shape.

Regarding the term ''imminent hazard,'' FDA notes that the term is used to describe one of the general overarching principles for summary reporting, but is not included in the descriptions of any of the individual reporting conditions. For purposes of these overarching principles, we intend ''imminent hazard'' to capture situations in which a device poses a significant risk to health and creates a public health situation that should be addressed immediately to prevent injury. Use of that term in one of the overarching principles was not intended to indicate any change in the standard for a 5-day report under § 803.53.

(Comment 7) One comment indicated that there should be objective and documented criteria for when FDA would provide written notice that manufacturers must submit an individual, 30-day malfunction report in accordance with the proposed program conditions, along with an opportunity for appeal. The comment further asserted that due process considerations need to be made regarding these reporting requirements, including notice, a written justification for the request, and a process to appeal.

(Response 7) FDA disagrees that there should be fixed criteria for notifying a manufacturer that it must submit an individual, 30-day malfunction report in accordance with the program conditions. Manufacturers who are notified to submit individual reports in accordance with the individual reporting conditions will need to comply with MDR requirements to which they would otherwise be subject if not granted this alternative under § 803.19. FDA has provided examples of when it would make these notifications, but public health issues that require submission of individual MDRs to monitor device safety are not uniform and may arise in various ways.

FDA will provide written notice to manufacturers when they need to submit individual MDRs pursuant to individual reporting conditions 3 and 4, as described in section IV.B. In addition, the Agency already has a process in place for stakeholders to request review of decisions made by CDRH employees. For more information, refer to the FDA Guidance entitled ''Center for Devices and Radiological Health Appeals Processes'' (Ref. 4).

(Comment 8) Some comments disagreed with the proposed program condition that would have required manufacturers to submit individual, 30-day MDRs for reportable malfunction events that are the subject of any ongoing device recall and suggested that the condition be modified or removed. The comments cited several different reasons for objecting to this condition, including that the condition is not mentioned in the MDUFA IV Commitment Letter, that the condition may discourage manufacturers from conducting voluntary or class III recalls, that the condition is duplicative of information that FDA receives during a recall, and that it may be difficult for manufacturers to manage the requirements (*e.g.,* new events may be uncovered during a product investigation leading to confusion and multiple reports for the same incident). Suggestions from the commenters regarding this individual reporting condition included the following: (a) The condition should only apply to mandatory or FDA-initiated recalls, and summary reporting should be permitted for voluntary or low-risk class III recalls and for incidents related to remedial action after the first (parent) MDR is submitted, unless a death or serious injury is associated; (b) FDA should clarify how to handle malfunction events that were not submitted as individual MDRs, but subsequently, prior to the next summary reporting date, are identified to be the result of an issue addressed by a recall; (c) the timeframe for submitting individual MDRs should be changed from 90 days past the date of the termination of the recall to 90 days past the date of the recall; and (d) FDA should clarify what it means by ''malfunction events of the same nature.''

(Response 8) FDA disagrees with the comments recommending removal of this individual reporting condition. Recall classification takes into account both the severity of harm and the likelihood of occurrence, and it is important for FDA to have access to more timely information on malfunctions related to certain recalls to ensure that the recall has been appropriately classified and that the recall strategy is effective.

FDA also provides the following responses to the additional specific issues raised in the comments: (a) For the reasons discussed above, FDA continues to believe that it is important for malfunctions related to certain recalls to be reported as individual MDRs. However, after considering the comments, FDA has determined that this individual reporting condition should only apply to reportable malfunctions that are the subject of a recall involving a correction or removal that must be reported to FDA under part 806 (21 CFR part 806). Under part 806, manufacturers and importers are required to make a written report to FDA of any correction or removal of a device if the correction or removal was initiated to reduce a risk to health posed by the device or to remedy a violation of the FD&C Act caused by the device that may present a risk to health, unless the information has already been submitted to FDA in accordance with other reporting requirements. (See § 806.10(a) and (f).) Because the definition of ''risk to health'' under part 806 tracks the definitions of class I and class II recalls in § 7.3(m) (21 CFR 7.3(m)), reports of corrections and removals are required for actions that meet the definition of class I and class II recalls. However, under part 806, manufacturers and importers need not report events that are categorized as class III recalls under § 7.3(m) (see 62 FR 27183, May 19, 1997). Therefore, an action that meets the definition of a class III recall would not, on its own, trigger the requirement to submit individual reports under the Voluntary Malfunction Summary Reporting Program.

(b) FDA agrees that it is important to provide clarity regarding when the requirement to submit individual MDRs is triggered under this individual reporting condition and the events to which that requirement applies. Therefore, FDA is revising the alternative to clarify that, as of the date a manufacturer submits a required report of a correction or removal under part 806 (or the date that the manufacturer submits a report of the correction or removal under 21 CFR part 803 or part 1004 instead, as permitted under § 806.10(f)), the manufacturer must submit reportable malfunction events related to that correction or removal as individual MDRs in accordance with §§ 803.50 and 803.52. We believe these revisions will help provide manufacturers with a clear date on which this individual reporting obligation is triggered.

With respect to malfunction events that were identified for inclusion in a summary report but are subsequently identified as the subject of a reportable correction or removal prior to the end of the relevant summary reporting period, FDA is revising the alternative to state that a summary MDR must be submitted for those reportable malfunctions within 30 calendar days of when the manufacturer submits the required report of correction or removal. In the summary report, the manufacturer must include a check on the box for ''Recall'' in SECTION H.7 of the electronic Form FDA 3500A. We have similarly revised the description of individual reporting conditions 3 and 4 to clarify the requirements for handling malfunction events identified for inclusion in a summary report (but not yet submitted) prior to the date that individual reporting is triggered.

(c) As part of its recall termination process, FDA considers MDR information, including reported malfunctions to help evaluate the effectiveness of the recall. Therefore, FDA disagrees with the suggestion to limit the duration of individual reporting under this condition to 90 days past the date of a recall. However, after considering the comments, we do not believe it is necessary to receive individual MDRs for reportable malfunction events that are the subject of a recall after FDA has terminated the recall. We have revised the alternative accordingly (see Section IV.B.2.). For similar reasons, we have revised the first individual reporting condition to state that individual MDRs associated with a 5-day report are only required until the remedial action at issue is resolved to FDA's satisfaction.

(d) By ''malfunction events of the same nature,'' FDA means additional reportable malfunction events involving the same malfunction that prompted the recall.

(Comment 9) One comment, regarding proposed individual reporting condition 3, suggested that FDA provide information on the timing for when the Agency will provide written notice to a manufacturer that the manufacturer can resume participation in the Voluntary Malfunction Summary Reporting Program.

(Response 9) FDA cannot provide a uniform timeframe for when the Agency would notify manufacturers submitting individual reports due to an identified public health issue that they can resume submission of summary, quarterly malfunction reports for those devices because the timing and resolution of public health issues is specific to each situation.

(Comment 10) Three comments recommended that FDA clarify what constitutes a ''new type of reportable malfunction'' that is exempt from summary reporting. One of these comments indicated that FDA should provide additional information regarding when a manufacturer can begin submitting summary reports for these new types of device malfunctions.

(Response 10) FDA disagrees that the meaning of the phrase ''new type of reportable malfunction'' was unclear in the proposal. Manufacturers are required under § 820.198 (21 CFR 820.198) to evaluate complaints to determine if they represent events that must be reported to FDA under part 803 or if an investigation is required. Through this process, if a manufacturer identifies a new type of reportable malfunction that has not previously been reported to FDA over the life of that device, this information must be submitted to FDA as an individual MDR in accordance with §§ 803.50 and 803.52 and may not be reported to FDA in a summary malfunction report. This will allow FDA and manufacturers to better understand and address emergent issues with medical devices. We have revised this individual reporting condition to clarify that after manufacturers submit an individual MDR for the initial occurrence of a previously unreported type of reportable malfunction for a device, subsequent reports for that same type of malfunction for that device may be in summary form, unless they are subject to individual reporting for another reason.

D. Reporting Format

(Comment 11) Some comments suggested that FDA allow manufacturers to ''bundle together'' reportable malfunction events in a summary report by product code or product family and allow the use of International Medical Device Regulators Forum's (IMDRF) Level 1,2 codes to bundle like events in a summary report.

(Response 11) FDA disagrees with the suggestion that manufacturers be permitted to bundle reportable malfunction events by product code or product family for purposes of submitting a summary report. Each unique combination of device brand name (corresponding to SECTION D1 of the Form FDA 3500A), device model, and device problem code(s) (corresponding to SECTION F10/H6 of the Form FDA 3500A) can be summarized together in reports submitted under this program. (Comments regarding the number of brand names that should be included in each summary report are further addressed in the response to Comment 16 below, and we have made corrections to the summary reporting instructions for SECTION D.4 to be clear that each summary malfunction report should summarize events for a single device model.) Bundling together malfunction reports by product codes or device families would make summarizing and interpreting the information in a summary report difficult for manufacturers, FDA, and the public because a product code or product family could contain several devices with different functions, components, and modes of operation that are important for purposes of understanding malfunction events and the causes of those events. The intent of the Voluntary Malfunction Summary Reporting Program is to streamline reporting of events that are the same or similar, yet not to over bundle reports such that important details regarding device performance are obscured.

The IMDRF (Ref. 5) is working towards harmonization of all medical device coding, including device problem codes. To harmonize medical device coding globally, device problem codes have been organized in a hierarchical arrangement, such that higher level codes (*e.g.,* electrical issue) describe more general device problems, while lower level codes (*e.g.,* insulation issue) provide more granularity into the type of device problem described. For purposes of grouping device issues for reports submitted under this Voluntary Malfunction Summary Reporting Program, we recommend that all coding

be grouped at the lowest level of coding available, when IMDRF codes are available. Based on our experience, FDA does not believe grouping by the lowest level of coding will eliminate the efficiency benefits of summary reporting. FDA does not specify a specific level of coding, but expects the most specific appropriate code to be used.

(Comment 12) One comment noted that it was unclear whether a summary malfunction report will be available in MAUDE or another database. Another comment recommended that FDA allow Excel spreadsheets with malfunction report data to be uploaded to MAUDE.

(Response 12) FDA plans to make summary reports submitted under the Voluntary Malfunction Summary Reporting Program publicly available in MAUDE. However, FDA will not upload Excel spreadsheets to MAUDE because they are incompatible with the MAUDE interface.

(Comment 13) One comment indicated that FDA should consider amending the requirement that an individual process the complaints twice—once for reporting assessment and then quarterly.

(Response 13) FDA disagrees with this comment. FDA is granting an alternative to the individual reporting requirements under part 803 for certain reportable malfunction events. The Quality System (QS) regulation requires manufacturers to evaluate all complaints to determine if they represent events that must be reported to FDA under part 803 (§ 820.198(a)). If a complaint represents an MDR reportable event, then the manufacturer must, among other things, investigate it and submit an MDR to FDA. (See §§ 803.10(c), 803.50, and 820.198(d)) The difference for manufacturers that have been granted the alternative described in this document is that they could choose to report certain malfunction events to FDA as a summary report instead of as an individual report.

(Comment 14) One comment requested that FDA provide more detail concerning the terms ''similar device'' and ''similar complaint,'' as used in the discussion of the rationale for the proposed summary reporting format.

(Response 14) The term ''similar device'' is used in FDA's MDR regulations to describe malfunction events for which manufacturers must submit a report to FDA. (see *e.g.,* § 803.50(a)(2)) As used in this alternative, the term ''similar device'' is intended to have the same meaning as it does for purposes of part 803. FDA's MDR Guidance (Ref. 3), provides more information regarding the factors that FDA and manufacturers may consider in determining if a device is ''similar'' to another device.

FDA does not believe it is necessary to provide a formal definition of the term ''similar complaint'' for purposes of this alternative because that term is not used in describing any of the conditions of the Voluntary Malfunction Summary Reporting Program, including the required reporting format. Whether a complaint constitutes a ''similar complaint'' for purposes of conducting an investigation under FDA's QS regulation is outside the scope of this alternative.

(Comment 15) One comment asked FDA to provide further information on how a manufacturer is to provide supplemental information, including whether FDA expects such information to be shared with the Agency. Some comments also noted that FDA should explain how a previously submitted summary malfunction report should be updated with new information, including how to handle new information regarding a previously reported event that would change the categorization of the event (*e.g.,* if the manufacturer subsequently became aware that a serious injury was associated with a previously reported malfunction event).

(Response 15) FDA understands the need for clarification of how to handle additional information and supplemental reporting under this program and has revised the alternative to address this issue. A manufacturer participating in the Voluntary Malfunction Summary Reporting Program must submit an initial summary report within the Summary Malfunction Reporting Schedule timeframe described in table 1. Supplemental reports to a summary malfunction report must also be submitted within that timeframe. For example, if a manufacturer submits a summary report for certain malfunction events of which it became aware in January to March and in May of that same year becomes aware of additional information that would have been required in the initial summary report if it had been known to the manufacturer, then the manufacturer must submit a supplemental report with that additional information by July 31. Manufacturers do not need to submit a supplemental report for new information if they would not have been required to report that information had it been known or available at the time of filing the initial summary malfunction report.

However, this timing for supplemental reports would not apply when additional information is learned about an event or events included in a previously submitted summary report that triggers individual reporting requirements. For example, if the manufacturer becomes aware of additional information reasonably suggesting that a previously reported malfunction meets the criteria for a reportable serious injury or death event, then the manufacturer must submit an initial, individual MDR for the identified serious injury or death within 30 calendar days of becoming aware of the additional information. The manufacturer must simultaneously submit a supplement to the initial MDR summary report reducing the number of events summarized by 1, so that the total number of events remains the same. The alternative has been revised to reflect that these are requirements for participating in the Voluntary Malfunction Summary Reporting Program.

(Comment 16) One comment stated that Form FDA 3500A is not an optimal format because it is only used for single event reporting. Other comments made specific recommendations and/or raised issues regarding the proposed summary reporting format using Form FDA 3500A, including the following: (a) In Form FDA 3500A, SECTIONS B.5 and H.10, FDA should request that information be entered in a summary, high-level form, rather than requiring detailed descriptions or itemized investigation findings; (b) clarify the most ''up to date'' information that is expected to be received in the report; (c) clarify that only one brand name per product code should be entered in the field with additional brand names being provided in a separate attachment (SECTION D.1); (d) inclusion of patient age, weight, and breakdown of gender and race is inappropriate for summary malfunction reporting, and it is not clear if such information is required in a summary malfunction report; (e) clarify that manufacturers can submit summary malfunction reports for devices manufactured at multiple manufacturing sites (SECTION D.3); (f) the summary format should permit a serial number to be used instead of a lot number to identify the devices that are the subject of a summary report (SECTION D.4); and (g) address how a manufacturer should link a device problem code with a method code, result code, and evaluation conclusion code (if different) for a single summary report that includes more than one device problem.

(Response 16) FDA does not believe the summary reporting format should be changed to use a new form. The

Voluntary Malfunction Summary Reporting Program aims to, among other things, consolidate reporting of same or similar events into a single summary report to reduce the overall volume of reports, while still providing critical content to FDA. While the Form FDA 3500A was developed for individual MDRs, manufacturers successfully used the Form FDA 3500A to submit summary malfunction reports in FDA's pilot program. In addition, as explained in our 2017 Proposal, for purposes of streamlining changes that FDA and manufacturers must make to process or submit summary reports under the Voluntary Malfunction Summary Reporting Program, we believe that using the Form FDA 3500A is the most efficient approach. We provide the following responses to the specific recommendations/issues raised regarding the summary reporting format: (a) FDA continues to believe that it is important for summary malfunction reports submitted under this program to provide a similar level of detail in text narratives as is available in an individual report to allow for sufficient understanding of the malfunction, any circumstances that led to the malfunction, and any follow-up steps the manufacturer has taken to investigate, correct, and prevent the malfunction from happening again. These narrative text fields are key to helping ensure that summary reporting under this program streamlines malfunction reporting without reducing the reporting of important details regarding device performance and transparency to the public. (b) Each summary report must be ''up to date,'' meaning that it must include all required information available, as of the close of the quarterly time period listed in the Summary Malfunction Reporting Schedule (see table 1). FDA has clarified this in section IV.F. (c) FDA disagrees that separate attachments with additional brand names should be permitted to accompany a summary malfunction report. Each summary malfunction report may only summarize malfunction events for a single brand name. We further clarified this in the instructions for the summary reporting format at section IV.D. Including multiple brand names in an attachment to a single summary report would, among other things, result in FDA having difficulty identifying the specific malfunction event to the exact device brand. (d) FDA agrees that information summarizing patient age, weight, gender, race, and ethnicity may not be relevant for many summary malfunction reports. FDA is revising the description of the summary reporting format to clarify that inclusion of this information in Section B.5 is not a required entry for the form. However, FDA recommends including descriptors such as patient weight or race in a text narrative for a malfunction summary report if the information is available and indicates that a malfunction is more likely to affect a specific group of patients. (e) FDA is revising the description of the summary reporting format to clarify that multiple manufacturing sites could be entered in SECTION G.1 if the device is manufactured at multiple sites. We note that depending on their roles, each manufacturing site may be responsible for submitting MDRs. (See *e.g.,* section 2.17 of FDA's MDR Guidance (Ref. 3), which provides additional information regarding reporting obligations for contract manufacturers.) (f) FDA agrees that a serial number may be included in SECTION D.4 and has added ''serial number'' to the reporting format instructions for that section. (g) The summary reporting format requires firms to identify the method, result, and conclusion codes in Block H6 of the Form FDA 3500A, including as many codes as are necessary to describe the event problem and evaluation for the reportable malfunction events that are being summarized. If the report summarizes reportable events that involved more than one type of device problem (see *e.g.,* Case Scenario #2, Report #3 in Appendix A (Ref. 6)), differences in the conclusion code according to the different device problems can be explained in SECTION H.10.

E. Consideration of Combination Products

(Comment 17) Some comments raised issues regarding the application of the malfunction summary reporting for combination products that contain a device constituent part but that are marketed under drug or biological product marketing authorization pathways (referred to in this document as drug and biologic-led combination products), as opposed to those under device marketing authorization pathways (device-led combination products). Issues raised in these comments include: Concerns about a device product code-based eligibility approach for drug and biologic-led combination products because such products may not have a device product code; the quarterly schedule proposed because it would create redundancies for drug and biologic-led combination products, which are subject to periodic reporting; the format proposed because it might not be compatible with the reporting systems for drugs or biological products that are utilized for drug and biologic-led combination products; and development of a single report that includes malfunction summary reporting and satisfies other combination product reporting requirements.

(Response 17) Among other things, the final rule on postmarketing safety reporting (PMSR) for combination products (81 FR 92603, December 20, 2016), codified in part 4, subpart B (21 CFR part 4, subpart B), clarified that all combination product applicants must comply with malfunction reporting requirements as described in part 803 if their combination product contains a device constituent part. Accordingly, in the 2017 Proposal, FDA requested comment on how the Voluntary Malfunction Summary Reporting Program might be implemented for combination products, including drug and biologic-led combination products. Shortly after the issuance of the proposal for this program, FDA also published a draft guidance entitled, ''Postmarketing Safety Reporting for Combination Products; Guidance for Industry and FDA Staff'' (PMSR draft guidance) (Ref. 7) regarding compliance with the final rule on PMSR for combination products, and an Immediately in Effect guidance announcing FDA's compliance policy for that rule (Ref. 8). The PMSR draft guidance noted that the Agency was proposing the Voluntary Malfunction Summary Reporting Program and stated that the Agency intends to update the PMSR draft guidance if combination products are included in the program. The compliance policy guidance announced the Agency's intent to delay enforcement of certain provisions of the rule, including malfunction reporting requirements for drug and biologic-led combination products, to provide applicants with additional time to consider Agency recommendations and technical specifications as they update their systems and procedures to comply with those provisions.

Applicants of device-led combination products must submit MDRs in accordance with part 803 (see § 4.104 (21 CFR 4.104)), and therefore, they report malfunctions using the same system as device manufacturers. Thus, FDA believes the eMDR data system and instructions support use of the Voluntary Malfunction Summary Reporting Program for such products. Accordingly, we are including device-led combination products in the Voluntary Malfunction Summary Reporting Program. However, combination product applicants for drug

and biologic-led combination products with a device constituent part must submit malfunction reports under a different system. Under § 4.104(b), malfunction reports must be submitted in accordance with 21 CFR 314.80(g) or 600.80(h)) for these combination products. Additional considerations, including the issues raised in comments as discussed above, need to be addressed before drug and biologic-led combination products could be included in the Voluntary Malfunction Summary Reporting Program. As noted above, the Agency intends to delay enforcement of the malfunction reporting requirements for drug and biologic-led combination products under the PMSR final rule. FDA will consider all relevant comments submitted on the 2017 Proposal as well as those submitted on the PMSR draft guidance in developing an approach for voluntary malfunction summary reporting for such combination products.

F. Submission Schedule and Logistics

(Comment 18) One comment recommended that FDA permit manufacturers to submit individual reports for each adverse event within 90 calendar days from the date they become aware of the reportable event, while using the summary format. The comment also suggested that FDA provide an additional 30 days for the submission of summary reports because the manufacturer may need more than a month between the end of the reporting period and the due date to aggregate reports.

(Response 18) FDA disagrees with this comment. Permitting manufacturers to submit individual reports using the summary format within 90 calendar days would delay the submission of malfunction information to FDA without providing the anticipated benefits of summary reporting that FDA identified in the 2017 Proposal, such as increased efficiency in processing malfunction reports and more readily apparent malfunction trends. While we recognize that a manufacturer may become aware of some reportable malfunction events toward the end of a quarter, manufacturers will have at least 30 days from that time to prepare and submit summary malfunction reports. FDA does not believe that manufacturers will need an additional 30 days beyond the reporting schedule outlined in the 2017 Proposal to aggregate malfunction reports into a summary report. Therefore, we have retained the Summary Malfunction Reporting Schedule that was included in the 2017 Proposal (see table 1).

(Comment 19) One comment suggested that FDA use a more generic reporting number format or a completely different reporting number format.

(Response 19) FDA disagrees with this comment. The required reporting number format for this program uses the existing common format that manufacturers must use to submit individual reports through their electronic reporting systems under part 803. Therefore, we believe there is no need for a separate MDR reporting number format to identify summary reports.

(Comment 20) One comment suggested that FDA clarify what the manufacturer should do if an investigation is not completed within the reported timeframe.

(Response 20) As discussed in response to Comment 15, FDA has revised the alternative to include instructions regarding supplemental reporting for summary reports submitted under this voluntary program. In situations where a manufacturer is not able to complete its investigation regarding a reportable malfunction by the deadline for submitting a summary report, the manufacturer is still required to report the event within the timeframes specified in the Summary Malfunction Reporting Schedule (see table 1). If additional information becomes known or available to the manufacturer after submission of a summary report, including additional information that becomes known through an investigation, the manufacturer is required to submit supplemental reports amending its initial submission as needed.

G. Addition of Product Codes to the Program

(Comment 21) Some comments suggested that FDA should explain more clearly how industry would make a request under § 803.19(b) and provide a mechanism for industry to request an exemption, when appropriate, for product codes that may be newly assigned within the first 2 years.

(Response 21) FDA is not making any changes to the alternative in response to this comment. As discussed in section VI, FDA intends to periodically assess the eligibility of product codes after they have been in existence for 2 years and will update the FDA's Product Classification database accordingly. Manufacturers can also send a request for a product code to be added to the list of eligible product codes and for manufacturers of devices within that product code to be granted the same alternative for malfunction events associated with those devices. Information about where to send such requests is provided in section VI.

H. Other Comments

(Comment 22) One comment stated that the average Paperwork Reduction Act (PRA) burden on manufacturers of 6 minutes per response appears to be a very low estimate.

(Response 22) FDA disagrees with this comment. The estimation of time is the amount of time needed to submit a summary malfunction report. It is essentially the same amount of time needed to submit an individual report because the event narrative should be similar, with the exception of one additional line that is entered that indicates the number of adverse events represented by the report. It does not include the time needed to evaluate and investigate complaints that may represent reportable malfunction events.

(Comment 23) Two comments suggested that FDA should provide clarity on how the program will apply with national competent authorities via the National Competent Authority Report (NCAR) exchange program.

(Response 23) FDA disagrees with this comment. The NCAR exchange program is separate from FDA's MDR reporting requirements. Malfunction summary reporting under this program does not change the information shared through the NCAR exchange program, and the NCAR program is currently outside the scope of the Voluntary Malfunction Summary Reporting Program.

(Comment 24) One comment suggests that FDA should use IBM's Watson Platform for Health GxP (Watson) to conduct an analysis to identify the product codes that represent the largest opportunity described in the business case for patients, industry, and FDA instead of other database systems.

(Response 24) FDA disagrees with this comment. Among other reasons, the IBM Watson Platform is not an FDA-owned resource; therefore, it is not logistically feasible for FDA to use this platform to identify product codes eligible for the Voluntary Malfunction Summary Reporting Program at this time.

III. Principles for Malfunction Summary Reporting

Informed by the findings from the Pilot Program for Medical Device Reporting on Malfunctions, FDA identified the following overarching principles for summary reporting of malfunctions:

- The collection of information in summary format should allow FDA to

collect sufficient detail to understand reportable malfunction events.

- To increase efficiency, summary malfunction reporting should occur in a common format for the electronic reporting system used.
- Information about reportable malfunctions should be transparent to FDA and to the public, regardless of whether the information is reported as an individual MDR or a summary report. Information contained in a summary malfunction report that is protected from public disclosure under applicable disclosure laws would be redacted prior to release of the report.
- Manufacturers should communicate information regarding an imminent hazard at the earliest time possible.
- Summary reporting is meant to streamline the process of reporting malfunctions. It does not change regulatory requirements for MDR-related investigations or recordkeeping by manufacturers. (For example, manufacturers participating in the Voluntary Malfunction Summary Reporting Program remain subject to requirements for establishing and maintaining MDR event files under § 803.18. In addition, under the QS regulation, manufacturers must evaluate, review, and investigate any complaint that represents an MDR reportable event (see § 820.198).
- Summary reporting information should not be duplicative of information received through other MDR reporting processes.

IV. Voluntary Malfunction Summary Reporting Program

For the reasons discussed in the 2017 Proposal and in section II, the Agency has determined that, at this time, pursuant to section 519(a)(1)(B)(i)(III) of the FD&C Act, all devices should remain subject to the reporting requirements of part 803, to protect the public health. However, based on the findings from the 2015 Pilot Program, the Agency's experience with summary reporting programs, its experience with MDR reporting generally, and the comments received on 2017 Proposal, FDA has determined that for many devices, it is appropriate to permit manufacturers to submit malfunction summary reports on a quarterly basis, for certain malfunctions, instead of individual, 30-day malfunction reports.

Therefore, under § 803.19, FDA is granting the manufacturers of devices within eligible product codes, as identified in FDA's Product Classification Database (*https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm*) on August 17, 2018, an alternative to the reporting requirements at §§ 803.10(c)(1), 803.20(b)(3)(ii), 803.50(a)(2), 803.52, and 803.56 with respect to reportable malfunction events associated with those devices. The list reflects FDA's consideration of a list proposed by industry representatives, consistent with the MDUFA IV Commitment Letter, as well as the comments received on the 2017 Proposal regarding eligible product codes. To assist manufacturers and the public in identifying which product codes are eligible for participation in this voluntary program, FDA's searchable Product Classification Database (*https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm*) has been updated to reflect such eligibility. As discussed in section II, FDA is also making some changes to the conditions of the alternative after considering the comments received on the 2017 Proposal.

The alternative permits manufacturers of devices within eligible product codes to submit malfunction reports in summary format on a quarterly basis for those devices, subject to the conditions of the alternative described in the remainder of this section. Such manufacturers ''self-elect'' to participate by submitting summary malfunction reports in accordance with the conditions of the alternative. They do not need to submit a separate application to FDA to participate.[1]

The remainder of this section describes the following conditions that manufacturers must follow if they choose to submit summary malfunction reports for devices within eligible product codes under the alternative: (1) The conditions under which individual malfunction reports are required; (2) submission of supplemental reports; (3) the format for summary malfunction reports; (4) considerations for combination products; and (5) the schedule and other logistics for submission of summary reports. Because this is an alternative, if a manufacturer does not submit summary reports for reportable malfunction events in accordance with the conditions described in this section, including the reporting schedule and format, then the manufacturer must submit individual malfunction reports in compliance with all requirements under part 803 (unless the manufacturer has been granted a different exemption, variance, or alternative that applies).

A. Events Outside the Scope of This Alternative

The Voluntary Malfunction Summary Reporting Program does not apply to reportable death or serious injury events, which are still required to be reported to FDA within the mandatory 30-calendar-day timeframe, under §§ 803.50 and 803.52, or within the 5-work day timeframe under § 803.53. Thus, if a manufacturer participating in the program becomes aware of information reasonably suggesting that a device that it markets may have caused or contributed to a death or serious injury, then the manufacturer must submit an individual MDR for that event because it involves a reportable death or serious injury.

The reporting requirements at § 803.53 also continue to apply to manufacturers participating in the program. Under § 803.53(a), a 5-day report must be filed if a manufacturer becomes aware of an MDR reportable event that necessitates remedial action to prevent an unreasonable risk of substantial harm to the public health. Further, under § 803.53(b), if FDA has made a written request for the submission of a 5-day report, the manufacturer must submit, without further requests, a 5-day report for all subsequent reportable malfunctions of the same nature that involve substantially similar devices for the time period specified in the written request. FDA may extend the time period stated in the original written request if the Agency determines it is in the interest of the public health (see § 803.53(b)).

B. Individual Reporting Conditions

Manufacturers of devices in eligible product codes may continue submitting individual, 30-day malfunction reports in compliance with §§ 803.50 and 803.52 if they choose to do so. However, those manufacturers may submit all reportable malfunction events for devices in eligible product codes in the summary format and according to the schedule described below in section IV.D and F, unless one of the following individual reporting conditions applies:

1. A Reportable Malfunction Is Associated With a 5-Day Report

After submitting a 5-day report required under § 803.53(a), all subsequent reportable malfunctions of the same nature that involve substantially similar devices must be submitted as individual MDRs in

[1] We note that the Voluntary Malfunction Summary Reporting Program does not apply to importers or device user facilities. Therefore, requirements under part 803 for importers and device user facilities are unaffected by this alternative. For example, importers will continue to submit individual MDRs to the manufacturer under § 803.40.

compliance with §§ 803.50 and 803.52 until the date that the remedial action has been terminated to FDA's satisfaction. Summary reporting of malfunctions may then resume on the regularly scheduled summary reporting cycle. Submission of reportable malfunctions associated with 5-day reports in this manner will assist FDA in monitoring the time course and resolution of the issue presenting an unreasonable risk of substantial harm to the public health.

2. A Reportable Malfunction Is the Subject of Certain Device Recalls

When a device is the subject of a recall involving the correction or removal of the device to address a malfunction and that correction or removal is required to be reported to FDA under part 806,[2] all reportable malfunction events of the same nature that involve the same device or a similar device marketed by the manufacturer must be submitted as individual MDRs in accordance with §§ 803.50 and 803.52 until the date that the recall is terminated. After the recall is terminated, summary reporting may resume on the regularly scheduled summary reporting cycle. The requirement to submit individual reports under this condition is triggered on the date that the manufacturer submits a report of a correction or removal required under part 806 (or the date that the manufacturer submits a report of the correction or removal under part 803 or part 1004 instead, as permitted under § 806.10(f)). This will allow FDA to monitor the frequency of reportable malfunctions associated with the recall and effectiveness of the recall strategy.

If a manufacturer becomes aware of reportable malfunction events before the date that the requirement to submit individual reports is triggered and a summary report for those events has not yet been submitted to FDA, then the manufacturer must submit any of those malfunction events related to the recall in a summary MDR format within 30 calendar days of submitting the required report of correction or removal. In the summary MDR, the manufacturer must include a check box of recall in section H.7 of the electronic Form FDA 3500A.

3. FDA Has Determined That Individual MDR Reporting Is Necessary To Address a Public Health Issue

If FDA has determined that individual malfunction reports are necessary to provide additional information and more rapid reporting for an identified public health issue involving certain devices, manufacturers must submit reportable malfunction events for those devices as individual MDRs in compliance with §§ 803.50 and 803.52. Under these circumstances, FDA will provide written notification to manufacturers of relevant devices that individual MDR submissions are necessary. FDA will provide further written notice when manufacturers of those devices may resume participation in summary malfunction reporting.

The requirement to submit individual reports under this condition is triggered on the date the manufacturer receives the written notification from FDA. If a manufacturer became aware of reportable malfunction events before the date that the requirement to submit individual reports is triggered and a summary report for those events has not yet been submitted to FDA, then the manufacturer must submit any of those malfunction events for the identified devices to FDA within 30 calendar days of receiving notification from FDA.

4. FDA Has Determined That a Device Manufacturer May Not Report in Summary Reporting Format

FDA may determine that a specific manufacturer is no longer allowed to participate in the Voluntary Malfunction Summary Reporting Program for reasons including, but not limited to, failure to comply with applicable MDR requirements under part 803, failure to follow the conditions of the program, or the need to monitor a public health issue. In that case, FDA will provide written notification to the device manufacturer to submit individual malfunction reports in compliance with §§ 803.50 and 803.52. The requirement to submit individual reports under this condition is triggered on the date the manufacturer receives the written notification from FDA. If a manufacturer became aware of reportable malfunction events before the date that the requirement to submit individual reports is triggered under this condition and a summary report for those events has not yet been submitted to FDA, then the manufacturer must submit those malfunction events within 30 calendar days of receiving notification from FDA.

5. A New Type of Reportable Malfunction Occurs for a Device

If a manufacturer becomes aware of information reasonably suggesting a reportable malfunction event has occurred for a device that the manufacturer markets and the reportable malfunction is a new type of malfunction that the manufacturer has not previously reported to FDA for that device, then the manufacturer must submit an individual report for that reportable malfunction in compliance with §§ 803.50 and 803.52. After the manufacturer submits this initial individual report, subsequent malfunctions of this type may be submitted in summary form according to the reporting schedule in table 1, unless another individual reporting condition applies.

C. Supplemental Reports

In general, if a manufacturer obtains information required in a malfunction summary report (see section IV.D. describing the required content of a summary report), that the manufacturer did not provide because it was not known or was not available when the manufacturer submitted the initial summary malfunction report, the manufacturer must submit the supplemental information to FDA in an electronic format in accordance with § 803.12(a). The supplemental information must be submitted to FDA by the submission deadline described in the Summary Malfunction Reporting Schedule (table 1), according to the date on which the manufacturer becomes aware of the supplemental information. Manufacturers must continue to follow the requirements for the content of supplemental reports set forth at § 803.56(a) thorough (c), meaning that on a supplemental or follow up report, the manufacturer must: (a) Indicate that the report being submitted is a supplemental or follow up report; (b) submit the appropriate identification numbers of the report that you are updating with the supplemental information (*e.g.,* your original manufacturer report number and the user facility or importer report number of any report on which your report was based), if applicable; and (c) include only the new, changed, or corrected information.

However, if a manufacturer submits a summary malfunction report and subsequently becomes aware of information reasonably suggesting that

[2] FDA regulations provide that ''[e]ach device manufacturer or importer shall submit a written report to FDA of any correction or removal of a device initiated by such manufacturer or importer if the correction or removal was initiated: (1) To reduce a risk to health posed by the device or (2) to remedy a violation of the act caused by the device which may present a risk to health unless the information has already been provided as set forth in paragraph (f) of this section or the corrective or removal action is exempt from the reporting requirements under § 806.1(b).'' We note that under part 806, manufacturers and importers are not required to report a correction or removal that meets the definition of a class III recall under 21 CFR part 7. (See 21 CFR 7.3(g) and (m), 806.2(d) and (j) through (k), and 806.10; see also 62 FR 27183 at 27184.)

an event (or events) summarized therein represents a reportable serious injury or death event, or a new type of reportable malfunction, then the manufacturer must submit reports as follows: The manufacturer must submit an initial, individual MDR for the identified serious injury, death, or new type of reportable malfunction event within 30 calendar days of becoming aware of the additional information. The manufacturer must simultaneously submit a supplement to the initial malfunction summary report reducing the number of events summarized accordingly, so that the total number of events remains the same.

D. Malfunction Reporting Summary Format

Manufacturers of devices in eligible product codes who elect to participate in the Voluntary Malfunction Summary Reporting Program must submit summary malfunction reports in the format described below. As detailed in the 2017 Proposal and Appendix, the format largely adopts the format that was tested in FDA's Pilot Program for Medical Device Reporting on Malfunctions and is compatible with the Form FDA 3500A (Ref. 9), which allows manufacturers to submit MDRs using the same electronic submission form that they use to submit individual MDRs, in accordance with the eMDR Final Rule (79 FR 8832, February 14, 2014). Because summary malfunction reports represent a grouping of malfunction events for a specific model of a device, the summary reporting format would require an additional element in the summary text narrative to identify the number of reportable malfunctions that each report represents. As described below, the XML tags ''<NOE>'' and ''<NOE/>'' are placed on both sides of the number of events (NOE) to make the number extractable from the report. FDA believes that submission of summary reports in the format described below will provide the most compact and efficient reporting mechanism for streamlining malfunction reporting that still provides sufficient detail for FDA to monitor devices effectively.

Format Instructions: Separate summary malfunction reports must be submitted for each unique combination of brand name, device model, and problem code(s). (See Appendix A for case examples of how to report (Ref. 6).) Each summary malfunction report must include at least the following information collected on Form FDA 3500A and must be submitted in an electronic format:

- SECTION B.5: Describe Event or Problem—To distinguish this report as a summary malfunction report, the first sentence of the device event narrative must read: ''This report summarizes <NOE> XXX </NOE> malfunction events,'' where XXX is replaced by the number of malfunction events being summarized.

The device event narrative must then include a detailed description of the nature of the events and, if relevant and available, we recommend including a range of patient age and weight and a breakdown of patient gender, race, and ethnicity.

- SECTION D.1: Brand Name.
- SECTION D.2 and D.2.b: Common Device Name and Product Code. Include the common name of the device and Product Classification Code (Procode).
- SECTION D.3: Manufacturer Name, City, and State.
- SECTION D.4: Device Identification—Enter the model and/or catalog number and lot number(s) and/or serial number(s) for the devices that are the subject of the MDR. Include any device identifier (DI) portion of the unique device identifier (UDI) for the device version or model that is the subject of the MDR.
- SECTION G.1: Contact Office (and Manufacturing Site(s) for Devices)—Enter the name, address, and email of the manufacturer reporting site (contact office), including the contact name for the summary report being submitted. Enter the name and address of the manufacturing site(s) for the device, if different from the contact office.
- SECTION G.2: Phone Number of Contact Office.
- SECTION G.5: Combination Products—If applicable, indicate that the report involves a combination product (see section IV.E.).
- SECTION H.1: Type of Reportable Event—Check ''Malfunction'' in this box.
- SECTION H.6: Event Problem and Evaluation Codes—
  - Enter the device problem code(s). (See Appendix A for case examples of how to report (Ref. 6).)
  - Enter the evaluation code(s) for the following categories: Method, Results, Conclusion.
  - Enter a Conclusion Code, even if the device was not evaluated.
- SECTION H.10: Additional Manufacturer Narrative—Provide a summary of the results of the investigation for the reported malfunctions, including any follow up actions taken, and any additional information that would be helpful in understanding how the manufacturer addressed the malfunction events summarized in the report. Enter a breakdown of the malfunction events summarized in the report, including the number of devices that were returned, the number of devices that were labeled ''for single use'' (if any), and the number of devices that were reprocessed and reused (if any).

E. Combination Product Considerations

As noted in the response to comment 17 above, device-led combination products are included in this alternative that we are granting under § 803.19 to permit voluntary malfunction summary reporting. The eMDR data system and instructions support use of the Voluntary Malfunction Summary Reporting Program for device-led combination products. However, as discussed in response to comment 17 above, additional considerations need to be addressed before drug and biologic-led combination products could be included in the Voluntary Malfunction Summary Reporting Program. As noted in Response 17, the Agency intends to delay enforcement of the malfunction reporting requirements for drug and biologic-led combination products under the PMSR final rule. FDA will consider the relevant comments received on the 2017 Proposal, as well as any additional, relevant comments relating to malfunction reporting for drug and biologic-led combination products submitted in relation to the PMSR draft guidance in developing an approach for voluntary malfunction summary reporting for such combination products.

F. Submission Schedule and Logistics

Manufacturers submitting malfunction summary reports or supplemental reports to a malfunction summary report must use electronic reporting (Ref. 10) to submit those reports on a quarterly basis according to the schedule in table 1. The summary malfunction report must include the MDR Number, which consists of the registration number of the manufacturer, the year in which the event is being reported, and a 5-digit sequence number. Information included in a malfunction summary report must be current as of the last date of the quarterly timeframe identified in the first column of table 1.

TABLE 1—SUMMARY MALFUNCTION REPORTING SCHEDULE

Reportable malfunctions or supplemental information that you become aware of during these timeframes:	Must be submitted to FDA by:
January 1–March 31	April 30.
April 1–June 30	July 31.
July 1–September 30	October 31.
October 1–December 31	January 31.

The Voluntary Malfunction Summary Reporting Program applies only to reportable malfunction events that manufacturers become aware of on or after August 17, 2018. The deadline for FDA accepting the first round of quarterly reports for this program is October 31, 2018.

Under §§ 803.17 and 803.18, manufacturers are required to develop, maintain, and implement written MDR procedures and establish and maintain MDR event files, and those requirements remain applicable for manufacturers that elect to participate in this program. Among other things, a manufacturer must develop, maintain, and implement MDR procedures that provide for timely transmission of complete MDRs to FDA. (See § 803.17(a)(3)). Manufacturers participating in the Voluntary Malfunction Summary Reporting Program will need to update their internal MDR processes and procedures to provide for submitting summary malfunction reports within the Summary Malfunction Reporting Schedule.

V. Implementation Strategy

The goal of the Voluntary Malfunction Summary Reporting Program is to permit manufacturers of devices under certain product codes to report malfunctions on a quarterly basis and in a summary format, as outlined in the MDUFA IV Commitment Letter (Ref. 1), in a manner that provides for effective monitoring of devices and is beneficial for FDA, industry, and the public. An important part of this voluntary program is providing clarification to manufacturers regarding the product codes eligible for the program.

Consistent with the MDUFA IV Commitment Letter (Ref. 1), FDA has identified eligible product codes for the Voluntary Malfunction Summary Reporting Program in FDA's Product Classification Database, available on FDA's website, as part of granting the alternative (see *https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm*). Manufacturers that choose to participate in quarterly, summary reporting through this program will remain responsible for complying with applicable MDR requirements under part 803 (*e.g.,* requirements to establish and maintain MDR event files under § 803.18) and QS requirements under part 820 (21 CFR part 820) (*e.g.,* the requirement to evaluate, review, and investigate any complaint that represents an MDR reportable event under § 820.198).

If FDA determines that individual malfunction reports are necessary from a specific manufacturer or for specific devices, FDA will notify relevant manufacturers that they must submit individual reports and provide an explanation for that decision and, as appropriate, the steps necessary to return to summary, quarterly reporting. The Agency also notes that, under § 803.19(d), it may revoke or modify in writing an exemption, variance, or alternative reporting requirement if it determines that revocation or modification is necessary to protect the public health.

VI. Updating Product Codes for Inclusion Into the Program

FDA recognizes that new product codes will be created after the date of granting the Voluntary Malfunction Summary Reporting Program alternative under § 803.19. In general, FDA does not intend to consider devices under product codes in existence for less than 2 years to be eligible for the program, unless the new product code was issued solely for administrative reasons. Any product code in existence after the publication date will be initially ineligible to participate in the program. However, FDA will periodically evaluate new product codes after they have been in existence for 2 years to determine whether they should be added to the list of product codes eligible for the Voluntary Malfunction Summary Reporting Program. If FDA determines that a new product code should be added, then it will grant manufacturers of devices within that product code the same alternative under § 803.19 for malfunction events associated with those devices and update FDA's Product Classification database accordingly to reflect the changes.

Manufacturers can send a request for a product code to be added to the list of eligible product codes and for manufacturers of devices within that product code to be granted the same alternative for malfunction events associated with those devices to the *MDRPolicy@fda.hhs.gov* mailbox. You may also mail your written request to MDR Policy Branch, Division of Postmarket Surveillance, Office of Surveillance and Biometrics, Center for Devices and Radiological Health, 10903 New Hampshire Ave., Bldg. 66, Rm. 3217, Silver Spring, MD 20993–0002.

VII. Conclusion

In accordance with section 519(a)(1)(B)(i) of the FD&C Act and § 803.19, FDA is granting the alternative described in section IV to manufacturers of devices in eligible product codes, as identified in the FDA Product Classification Database (*https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPCD/classification.cfm*) on August 17, 2018. FDA believes that for the devices in eligible product codes, quarterly, summary reporting in accordance with the conditions of the alternative will be as effective as the current MDR regulatory requirements for purposes of identifying and monitoring potential device safety concerns and device malfunctions. The Voluntary Malfunction Summary Reporting Program will allow manufacturers to submit summary reports with event narratives that will help FDA more efficiently process malfunction reports and identify malfunction trends. In addition, FDA's determination of product code eligibility and the conditions of participation in the program will require submission of individual 30-day or 5-day malfunction reports in circumstances where such reports are necessary to protect public health.

VIII. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.30(h) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IX. Paperwork Reduction Act of 1995

The Voluntary Malfunction Summary Reporting Program described in this Notice contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). These provisions have been approved under OMB control number 0910–0437.

This document also refers to previously approved collections of information. These collections of information are subject to review by the OMB under the PRA (44 U.S.C. 3501–3520). The collections of information in part 4, subpart B, regarding postmarketing safety reporting for combination products have been approved under OMB control number 0910–0834; the collections of information in part 803, regarding medical device reporting, have been approved under OMB control number 0910–0437; the collections of information in 806, regarding corrections and removals, have been approved under OMB control number 0910–0359; the collections of information in 21 CFR part 807, subpart E, regarding premarket notification, have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 814, subparts A through E, regarding premarket approval, have been approved under OMB control number 0910–0231; the collections of information in 21 CFR part 810, regarding medical device recall authority, have been approved under OMB control number 0910–0432; the collections of information in part 820, regarding quality system regulations, have been approved under OMB control number 0910–0073; the collections of information in 21 CFR parts 1002 through 1050, regarding radiological health, have been approved under OMB control number 0910–0025; the collections of information regarding the MedWatch: The Food and Drug Administration Medical Products Reporting Program have been approved under OMB control number 0910–0291; and the collections of information regarding the Adverse Event Program for Medical Devices (Medical Product Safety Network (MedSun)) have been approved under OMB control number 0910–0471.

BILLING CODE 4164–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2018–0775]

Drawbridge Operation Regulation; Columbia River, Portland, OR and Vancouver, WA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Interstate 5 (I–5) Bridges across the Columbia River, mile 106.5, between Portland, Oregon, and Vancouver, Washington. The deviation is necessary to facilitate the presence of participants in the Hands Across the Bridge Project. This deviation allows the bridges to remain in the closed-to-navigation position during the event.

DATES: This deviation is effective from 11 a.m. to 2 p.m. on September 3, 2018.

ADDRESSES: The docket for this deviation, USCG–2018–0775 is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Steven Fischer, Bridge Administrator, Thirteenth Coast Guard District; telephone 206–220–7282, email *d13-pf-d13bridges@uscg.mil.*

SUPPLEMENTARY INFORMATION: Oregon Department of Transportation (bridge owner) requested a temporary deviation from the operating schedule for the I–5 Bridges, mile 106.5, across the Columbia River between Vancouver, WA, and Portland, OR, to facilitate safe passage of participants in the Hands Across the Bridge Project. The I–5 Bridges provides three designated navigation channels with vertical clearances ranging from 39 to 72 feet above Columbia River Datum 0.0 while the lift spans are in the closed-to-navigation position. The normal operating schedule for the I–5 Bridges is 33 CFR 117.869. The subject bridges need not open to marine vessels during

the deviation period from 11 a.m. to 2 p.m. on September 3, 2018. The bridge shall operate in accordance with 33 CFR 117.869 at all other times. Waterway usage on this part of the Columbia River includes vessels ranging from large commercial ships, tug and tow vessels to recreational pleasure craft.

Vessels able to pass under the bridges in the closed-to-navigation positions may do so at any time. Both bridges will be able to open for emergencies, and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: August 9, 2018.

Steven M. Fischer,

Bridge Administrator, Thirteenth Coast Guard District.

[FR Doc. 2018–17801 Filed 8–16–18; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2018–0676]

Drawbridge Operation Regulation; Willamette River at Portland, OR

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation; modification.

SUMMARY: The Coast Guard has modified a temporary deviation from the operating schedule that governs the Hawthorne Bridge crosses the Willamette River, mile 13.1, at Portland, OR. The deviation is necessary to accommodate a filming event for a movie. This modified deviation changes the period the bridge is authorized to remain in the closed-to-navigation position.

DATES: This modified deviation is effective from 6 p.m. on September 8, 2018, to 12:01 a.m. on September 9, 2018.

ADDRESSES: The docket for this deviation, USCG–2018–0676 is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this modification, call or email Mr. Steven Fischer, Bridge Administrator, Thirteenth Coast Guard District; telephone 206–220–7282, email *d13-pf-d13bridges@uscg.mil.*

SUPPLEMENTARY INFORMATION: On July 19, 2018, we published a temporary deviation entitled ''Drawbridge Operation Regulation; Willamette River at Portland, OR'' in the **Federal Register** (83 FR 34041). That temporary deviation allowed the subject bridge to not open to marine vessels from 6 p.m. on September 1, 2018 to 12:01 a.m. on September 2, 2018. Multnomah County, the bridge owner, requested a modification of the current published deviation to the following times: 6 p.m. on September 8, 2018, to 12:01 a.m. on September 9, 2018. This change is due to scheduling issues with the filming crew for a movie.

The Hawthorne Bridge provides a vertical clearance of 49 feet in the closed-to-navigation position referenced to the vertical clearance above Columbia River Datum 0.0. The subject bridge operates per 33 CFR 117.897(c)(3)(v). Waterway usage on this part of the Willamette River includes vessels ranging from commercial tug and barge to small pleasure craft. The Coast Guard requested objections to this modification from local mariners via email. No objections were submitted to us. Waterway usage on this part of the Willamette River includes vessels ranging from commercial tug and barge to small pleasure craft.

Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. The bridge will be able to open for emergencies, and there is no immediate alternate route for vessels to pass. The Coast Guard will inform the users of the waterway, through our Local and Broadcast Notices to Mariners, of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: August 9, 2018.

Steven M. Fischer,

Bridge Administrator, Thirteenth Coast Guard District.

[FR Doc. 2018–17800 Filed 8–16–18; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 9 and 721

[EPA–HQ–OPPT–2017–0414; FRL–9971–37]

RIN 2070–AB27

Significant New Use Rules on Certain Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is promulgating significant new use rules (SNURs) under the Toxic Substances Control Act (TSCA) for 27 chemical substances which were the subject of premanufacture notices (PMNs). The chemical substances are subject to Orders issued by EPA pursuant to section 5(e) of TSCA. This action requires persons who intend to manufacture (defined by statute to include import) or process any of these 27 chemical substances for an activity that is designated as a significant new use by this rule to notify EPA at least 90 days before commencing that activity. The required notification initiates EPA's evaluation of the intended use within the applicable review period. Persons may not commence manufacture or processing for the significant new use until EPA has conducted a review of the notice, made an appropriate determination on the notice, and has taken such actions as are required with that determination.

DATES: This rule is effective on October 16, 2018. For purposes of judicial review, this rule shall be promulgated at 1 p.m. (e.s.t.) on August 31, 2018.

Written adverse comments on one or more of these SNURs must be received on or before September 17, 2018 (see Unit VI. of the **SUPPLEMENTARY INFORMATION**). If EPA receives written adverse comments on one or more of these SNURs before September 17, 2018, EPA will withdraw the relevant sections of this direct final rule before its effective date.

For additional information on related reporting requirement dates, see Units I.A., VI., and VII. of the **SUPPLEMENTARY INFORMATION**.

ADDRESSES: Submit your comments, identified by docket identification (ID)

number EPA–HQ–OPPT–2017–0414, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Kenneth Moss, Chemical Control Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–9232; email address: *moss.kenneth@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you manufacture, process, or use the chemical substances contained in this rule. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Manufacturers or processors of one or more subject chemical substances (NAICS codes 325 and 324110), *e.g.,* chemical manufacturing and petroleum refineries.

This action may also affect certain entities through pre-existing import certification and export notification rules under TSCA. Chemical importers are subject to the TSCA section 13 (15 U.S.C. 2612) import certification requirements promulgated at 19 CFR 12.118 through 12.127 and 19 CFR 127.28. Chemical importers must certify that the shipment of the chemical substance complies with all applicable rules and orders under TSCA. Importers of chemicals subject to these SNURs must certify their compliance with the SNUR requirements. The EPA policy in support of import certification appears at 40 CFR part 707, subpart B. In addition, any persons who export or intend to export a chemical substance that is the subject of this rule on or after September 17, 2018 are subject to the export notification provisions of TSCA section 12(b) (15 U.S.C. 2611(b)) (see § 721.20), and must comply with the export notification requirements in 40 CFR part 707, subpart D.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. Background

A. What action is the Agency taking?

1. *Direct Final Rule.* EPA is promulgating these SNURs using direct final procedures. These SNURs will require persons to notify EPA at least 90 days before commencing the manufacture or processing of a chemical substance for any activity designated by these SNURs as a significant new use. Receipt of such notices obligates EPA to assess risks that may be associated with the significant new uses under the conditions of use and, if appropriate, to regulate the proposed uses before they occur.

2. *Proposed Rule.* In addition to this Direct Final Rule, elsewhere in this issue of the **Federal Register**, EPA is issuing a Notice of Proposed Rulemaking for this rule. If EPA receives no adverse comment, the Agency will not take further action on the proposed rule and the direct final rule will become effective as provided in this action. If EPA receives adverse comment on one or more of SNURs in this action by September 17, 2018 (see Unit VI. of the **SUPPLEMENTARY INFORMATION**), the Agency will publish in the **Federal Register** a timely withdrawal of the specific SNURs that the adverse comments pertain to, informing the public that the actions will not take effect. EPA would then address all adverse public comments in a response to comments document in a subsequent final rule, based on the proposed rule.

B. What is the Agency's authority for taking this action?

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a ''significant new use.'' EPA must make this determination by rule after considering all relevant factors, including the four bulleted TSCA section 5(a)(2) factors listed in Unit III. Once EPA determines that a use of a chemical substance is a significant new use, TSCA section 5(a)(1)(B) requires persons to submit a significant new use notice (SNUN) to EPA at least 90 days before they manufacture or process the chemical substance for that use (15 U.S.C. 2604(a)(1)(B)(i)). TSCA furthermore prohibits such manufacturing or processing from commencing until EPA has conducted a review of the notice, made an appropriate determination on the notice, and taken such actions as are required in association with that determination (15 U.S.C. 2604(a)(1)(B)(ii)). As described in Unit V., the general SNUR provisions are found at 40 CFR part 721, subpart A.

C. Applicability of General Provisions

General provisions for SNURs appear in 40 CFR part 721, subpart A. These provisions describe persons subject to the rule, recordkeeping requirements, exemptions to reporting requirements, and applicability of the rule to uses occurring before the effective date of the rule. Provisions relating to user fees appear at 40 CFR part 700. According to § 721.1(c), persons subject to these SNURs must comply with the same SNUN requirements and EPA regulatory procedures as submitters of PMNs under TSCA section 5(a)(1)(A). In particular, these requirements include the information submission requirements of TSCA section 5(b) and 5(d)(1), the exemptions authorized by TSCA section 5(h)(1), (h)(2), (h)(3), and (h)(5), and the regulations at 40 CFR part 720. Once

EPA receives a SNUN, EPA must either determine that the significant new use is not likely to present an unreasonable risk of injury or take such regulatory action as is associated with an alternative determination before the manufacture or processing for the significant new use can commence. If EPA determines that the significant new use is not likely to present an unreasonable risk, EPA is required under TSCA section 5(g) to make public, and submit for publication in the **Federal Register**, a statement of EPA's findings.

III. Significant New Use Determination

Section 5(a)(2) of TSCA states that EPA's determination that a use of a chemical substance is a significant new use must be made after consideration of all relevant factors, including:

- The projected volume of manufacturing and processing of a chemical substance.
- The extent to which a use changes the type or form of exposure of human beings or the environment to a chemical substance.
- The extent to which a use increases the magnitude and duration of exposure of human beings or the environment to a chemical substance.
- The reasonably anticipated manner and methods of manufacturing, processing, distribution in commerce, and disposal of a chemical substance.

In addition to these factors enumerated in TSCA section 5(a)(2), the statute authorizes EPA to consider any other relevant factors.

To determine what would constitute a significant new use for the chemical substances that are the subject of these SNURs, EPA considered relevant information about the toxicity of the chemical substances, likely human exposures and environmental releases associated with possible uses, and the four bulleted TSCA section 5(a)(2) factors listed in this unit.

IV. Substances Subject to This Rule

EPA is establishing significant new use and recordkeeping requirements for 27 chemical substances in 40 CFR part 721, subpart E. In this unit, EPA provides the following information for each chemical substance:

- PMN number.
- Chemical name (generic name, if the specific name is claimed as CBI).
- Chemical Abstracts Service (CAS) Registry number (if assigned for non-confidential chemical identities).
- Basis for the TSCA section 5(e) Order.
- Information identified by EPA that would help characterize the potential health and/or environmental effects of the chemical substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use designated by the SNUR.

This information may include testing required in a TSCA section 5(e) Order to be conducted by the PMN submitter, as well as testing not required to be conducted but which would also help characterize the potential health and/or environmental effects of the PMN substance. Any recommendation for information identified by EPA was made based on EPA's consideration of available screening-level data, if any, as well as other available information on appropriate testing for the chemical substance. Further, any such testing identified by EPA that includes testing on vertebrates was made after consideration of available toxicity information, computational toxicology and bioinformatics, and high-throughput screening methods and their prediction models. EPA also recognizes that whether testing/further information is needed will depend on the specific exposure and use scenario in the SNUN. EPA encourages all SNUN submitters to contact EPA to discuss any potential future testing. See Unit VIII. for more information.

- CFR citation assigned in the regulatory text section of this rule.

The regulatory text section of each rule specifies the activities designated as significant new uses. Certain new uses, including exceedance of production volume limits (*i.e.,* limits on manufacture volume) and other uses designated in this rule, may be claimed as CBI. Unit IX. discusses a procedure companies may use to ascertain whether a proposed use constitutes a significant new use.

These rules include 27 PMN substances that are subject to Orders issued under TSCA section 5(e)(1)(A)(ii)(I) where EPA determined that it has insufficient information to conduct a reasoned evaluation and the activities associated with the PMN substances may present unreasonable risk to human health or the environment. Those Orders require protective measures to limit exposures or otherwise mitigate the potential unreasonable risk. The SNURs identify as significant new uses any manufacturing, processing, use, distribution in commerce, or disposal that does not conform to the restrictions imposed by the underlying Orders, consistent with TSCA section 5(f)(4).

Where EPA determined that the PMN substance may present an unreasonable risk of injury to human health via inhalation exposure, the underlying TSCA section 5(e) Order usually requires, among other things, that potentially exposed employees wear specified respirators unless actual measurements of the workplace air show that air-borne concentrations of the PMN substance are below a New Chemical Exposure Limit (NCEL) that is established by EPA to provide adequate protection to human health. In addition to the actual NCEL concentration, the comprehensive NCELs provisions in TSCA section 5(e) Orders, which are modeled after Occupational Safety and Health Administration (OSHA) Permissible Exposure Limits (PELs) provisions, include requirements addressing performance criteria for sampling and analytical methods, periodic monitoring, respiratory protection, and recordkeeping. However, no comparable NCEL provisions currently exist in 40 CFR part 721, subpart B, for SNURs. Therefore, for these cases, the individual SNURs in 40 CFR part 721, subpart E, will state that persons subject to the SNUR who wish to pursue NCELs as an alternative to the § 721.63 respirator requirements may request to do so under § 721.30. EPA expects that persons whose § 721.30 requests to use the NCELs approach for SNURs that are approved by EPA will be required to comply with NCELs provisions that are comparable to those contained in the corresponding TSCA section 5(e) Order for the same chemical substance.

PMN Numbers: P–12–277, P–12–278, P–12–280, P–12–281, P–12–282, P–12–283, and P–12–284

Chemical names: Alkanes, $C_{20–28}$, chloro (P–12–277), Slack waxes (petroleum), chloro (P–12–278), Hexacosane, chloro derivs. and octacosane, chloro derivs. (P–12–280), Alkanes, $C_{20–24}$, chloro (P–12–281), Alkanes, $C_{14–16}$, chloro (P–12–282), Tetradecane, chloro derivs. (P–12–283), and Octadecane, chloro derivs. (P–12–284).

CAS numbers: 2097144–43–7 (P–12–277), 2097144–44–8 (P–12–278), 2097144–46–0 and 2097144–47–1 (P–12–280), 2097144–45–9 (P–12–281), 1372804–76–6 (P–12–282), 198840–65–2 (P–12–283), 2097144–48–2 (P–12–284).

Effective date of TSCA section 5(e) Order: June 5, 2017.

Basis for TSCA section 5(e) Order: The PMNs state that the PMN substances will be used as flame retardants and plasticizers in polyvinyl chloride (PVC), polymers, and rubber; flame retardants, plasticizers, and

lubricants in adhesives, caulk, sealants, and coatings; additives in lubricants including metalworking fluids; and flame retardants and waterproofers in textiles. Based on the physical/chemical properties of the PMN substances (as described in the New Chemical Program's PBT category at 64 FR 60194; November 4, 1999; FRL–6097–7) and test data on structurally similar medium-chain chlorinated paraffins (MCCP), the PMN substances are a potentially persistent, bioaccumulative, and toxic (PBT) chemicals. EPA estimates that the PMN substances will persist in the environment more than 2 months and estimates a bioaccumulation factor of greater than or equal to 1,000. Based on data on MCCP, EPA has identified concerns for systemic toxicity as well as aquatic and terrestrial toxicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health or the environment. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the representative congener groups prior to exceeding a certain time period specified in the Order.

2. Use of the PMN substances only for the uses specified in the Order: Flame retardants and plasticizers in PVC, polymers, and rubber; flame retardants, plasticizers, and lubricants in adhesives, caulk, sealants, and coatings; additives in lubricants including metalworking fluids; and flame retardants and waterproofers in textiles.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the fate, and terrestrial and aquatic toxicity of the PMN substances may be potentially useful to characterize the effects of the PMN substances in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed a certain time limit without performing chronic aquatic and terrestrial toxicity and biodegradation testing.

CFR citations: 40 CFR 721.11068 (P–12–277), 40 CFR 721.11069 (P–12–278), 40 CFR 721.11070 (P–12–280), 40 CFR 721.11071 (P–12–281), 40 CFR 721.11072 (P–12–282 and P–14–684), 40 CFR 721.11073 (P–12–283 and P–14–683), and 40 CFR 721.11074 (P–12–284).

PMN Numbers: P–12–433, P–12–453, and P–12–505

Chemical names: Alkanes, $C_{18–20}$, chloro (P–12–433), Alkanes, $C_{14–17}$, chloro (P–12–453) and Alkanes, $C_{22–30}$, chloro (P–12–505).

CAS numbers: 106262–85–3 (P–12–433), 85535–85–9 (P–12–453) and 288260–42–4 (P–12–505).

Effective date of TSCA section 5(e) Order: June 5, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the PMN substances will be used as flame retardants and plasticizers in PVC, polymers, and rubber; flame retardants, plasticizers, and lubricants in adhesives, caulk, sealants, and coatings; additives in lubricants including metalworking fluids; and flame retardants and waterproofers in textiles. Based on the physical/chemical properties of the PMN substances (as described in the New Chemical Program's PBT category at 64 FR 60194; November 4, 1999; FRL–6097–7) and test data on structurally similar medium-chain chlorinated paraffins (MCCP), the PMN substances are potentially persistent, bioaccumulative, and toxic (PBT) chemicals. EPA estimates that the PMN substances will persist in the environment more than 2 months and estimates a bioaccumulation factor of greater than or equal to 1,000. Based on test data on MCCP EPA has identified concerns for systemic toxicity as well as aquatic and terrestrial toxicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health or the environment. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the representative congener groups prior to exceeding a certain time period specified in the Order.

2. Use of the PMN substances only for the uses specified in the Order: Flame retardants and plasticizers in PVC, polymers, and rubber; flame retardants, plasticizers, and lubricants in adhesives, caulk, sealants, and coatings; additives in lubricants including metalworking fluids; and flame retardants and waterproofers in textiles.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the fate, and terrestrial and aquatic toxicity of the PMN substances may be potentially useful to characterize the effects of the PMN substances in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed a certain time limit without performing chronic aquatic and terrestrial toxicity and biodegradation testing.

CFR citations: 40 CFR 721.11075 (P–12–433), 40 CFR 721.11076 (P–12–453), 40 CFR 721.11077 (P–12–505).

PMN Numbers: P–14–683 and P–14–684

Chemical names: Tetradecane, chloro derivs. (P–14–683) and Alkanes, $C_{14–16}$, chloro (P–14–684).

CAS numbers: 198840–65–2 (P–14–683) and 1372804–76–6 (P–14–684).

Effective date of TSCA section 5(e) Order: May 17, 2017.

Basis for TSCA section 5(e) Order: The PMNs state that the substances will be used as flame retardants and plasticizers in PVC, polymers, and rubber; flame retardants, plasticizers, and lubricants in adhesives, caulk, sealants, and coatings; additives in lubricants including metalworking fluids; and flame retardants and waterproofers in textiles. Based on the physical/chemical properties of the PMN substances (as described in the New Chemical Program's PBT category at 64 FR 60194; November 4, 1999; FRL–6097–7) and test data on structurally similar medium-chain chlorinated paraffins (MCCP), the PMN substances are potentially persistent, bioaccumulative, and toxic (PBT) chemicals. EPA estimates that the PMN substances will persist in the environment more than 2 months and estimates a bioaccumulation factor of greater than or equal to 1,000. Further, EPA has identified concerns for systemic toxicity, as well as aquatic and terrestrial toxicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health or the environment. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the representative congener groups prior to exceeding a certain time period specified in the Order.

2. Use of the PMN substances only for the uses specified in the Order: Flame retardants and plasticizers in PVC, polymers, and rubber; flame retardants, plasticizers, and lubricants in adhesives, caulk, sealants, and coatings; additives in lubricants including metalworking fluids; and flame retardants and waterproofers in textiles.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the fate, and terrestrial and aquatic toxicity of the PMN substances may be potentially useful to characterize the effects of the PMN substances in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed a certain time limit without performing chronic aquatic and terrestrial toxicity and biodegradation testing.

CFR citations: 40 CFR 721.11072 (P–12–282 and P–14–684), 40 CFR 721.11073 (P–12–283 and P–14–683).

PMN Number: P–16–150

Chemical name: Chloroflurocarbon (generic).

CAS number: Not available.

Effective date of TSCA section 5(e) Order: May 31, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the substance will be as an intermediate. Based on test data on the PMN substance, EPA identified concerns for acute human toxicity. Based on analogue data EPA identified concerns for toxicity to aquatic and terrestrial organisms. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I), 5(a)(3)(B)(ii)(II) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment and that the substance will be produced in substantial quantities and may be reasonably anticipated to enter the environment in substantial quantities. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the substance prior to exceeding the production limits specified in the Order.

2. Use of personal protective equipment to prevent dermal exposure (where there is a potential for dermal exposure).

3. Use of a National Institute of Occupational Safety and Health (NIOSH)-certified respirator with an assigned protection factor (APF) of at least 1000 (where there is a potential for inhalation exposure) in conjunction with a minimum set of engineering controls described in the PMN, or compliance with a new chemical exposure limit (NCEL) of 170 parts per billion (ppb) as an 8-hour time-weighted average to prevent inhalation exposure.

4. Use of engineering controls to limit worker exposure and air release of the PMN substance to the environment.

5. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the Safety Data Sheet (SDS).

6. Manufacture, processing, and use in an enclosed process.

7. Use only as a chemical intermediate.

8. No release of the substance resulting in surface water concentrations that exceed 240 ppb.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health and aquatic toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the confidential production limit without performing specific target organ toxicity testing, reproductive and developmental toxicity testing, and acute and chronic aquatic toxicity testing.

CFR citation: 40 CFR 721.11078.

PMN Number: P–16–379

Chemical name: Silane, 1,1′-(1,2-ethanediyl)bis[1,1-dichloro-1-methyl]-, hydrolysis products with chloroethenyldimethylsilane.

CAS number: 1485477–78–8.

Effective date of TSCA section 5(e) Order: June 8, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the substance is as a chemical intermediate for polymer synthesis. Based on SAR analysis of test data on analogous substances, EPA has identified concerns for liver toxicity and mutagenicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health and the environment. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the substance prior to exceeding the confidential production volume limit specified in the Order.

2. Use of personal protective equipment including impervious gloves and clothing which covers any other exposed areas of the arms, legs and torso (where there is a potential for dermal exposure).

3. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

4. No domestic manufacture of the substance.

5. Use of the substance only for the confidential uses specified in the Order.

6. No use involving application methods that generate a dust, mist, vapor, or aerosol.

7. Disposal of the substance only by water or landfill.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the confidential production limit without performing specific target organ toxicity and mutagenicity testing. In addition, EPA has determined that the results of other specific target organ toxicity testing of the PMN substance may be potentially useful in characterizing the health effects of the PMN substance. Although the Order does not require this additional testing, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11079.

PMN Number: P–16–410

Chemical name: Silicophosphonate—sodium silicate (generic).

CAS number: Not available.

Effective date of TSCA section 5(e) Order: May 4, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the substance will be as an automotive engine fluid additive. Based on test data on the PMN substance, EPA has identified concerns for skin and eye irritation, corrosion, and systemic toxicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to human health. To protect against these risks, the Order requires:

1. No domestic manufacture of the substance.

2. Use of the substance in formulations containing no greater than 0.2% of the chemical substance and for the confidential uses specified in the Order.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substance may be potentially useful to characterize the effects of the substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of irritation testing may be potentially useful in characterizing the health effects of the PMN substance. Although the Order does not require these tests, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11080.

PMN Number: P–16–438

Chemical name: 3-Butenenitrile, 2-(acetyloxy)-.

CAS number: 15667–63–7.

Effective date of TSCA section 5(e) Order: June 23, 2017.

Basis for TSCA section 5(e) Order: The PMN states the substance will be used as a chemical intermediate for a pesticide inert. Based on test data on the PMN substance, EPA identified concerns for acute toxicity, irritation to all tissues, developmental toxicity, and neurotoxicity. EPA identified concerns for aquatic organism toxicity based on submitted data. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment. Further, based on SAR analysis of test data on analogous vinyl/allyl esters vinyl/allyl esters nitriles and test data on the PMN substance, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 8 ppb in surface waters. To protect against these risks, the Order requires:

1. Submission of monitoring data on the substance.

2. Use of personal protective equipment including impervious gloves and protective clothing (where there is a potential for dermal exposures) and a NIOSH-certified powered air purifying particulate respirator with an Assigned Protection Factor (APF) of at least 1000 (where there is a potential for inhalation exposures).

3. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

4. Manufacture, process, and use of the substance in a closed system as specified in the PMN.

5. Use of the substance only as a chemical intermediate.

6. No release of the substance into the surface waters of the United States.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the aquatic toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of chronic aquatic toxicity testing of the PMN substance may be potentially useful in characterizing the environmental effects of the PMN substance. Although the Order does not require these tests, the Order's restrictions on manufacture, processing, distribution in commerce, and use will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11081.

PMN Number: P–16–543

Chemical name: Halogenophosphoric acid metal salt (generic).

CAS number: Not available.

Effective date of TSCA section 5(e) Order: May 24, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use will be as a battery ingredient. Based on test data on the PMN substance and an analogue, EPA has identified concerns for irritation, corrosion, acute toxicity, immunotoxicity, developmental toxicity, neurotoxicity, and cancer. Further, based on test data on the PMN substance, EPA identified concerns for aquatic organism toxicity at surface water concentrations that exceed 3 ppb. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment. To protect against these risks, the Order requires:

1. Submission of monitoring data as specified in the Order.

2. Use of personal protective equipment as specified in the Order (where there is a potential for dermal exposure).

3. Use of a NIOSH-certified respirator with an APF of at least 1000 (where there is a potential for inhalation exposure).

4. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

5. No domestic manufacture of the substance.

6. Use of the substance only in an enclosed process.

7. Use of the substance only for the confidential uses specified in the Order.

8. Manufacture, process, or use of the substance without the engineering controls required by the Order to control dermal and inhalation exposure.

9. Disposal of the substance by hazardous waste incineration except when in wastewater.

10. No release of the substance resulting in surface water concentrations that exceed 3 ppb.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity, human exposure, aquatic toxicity, and fate of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed to conduct an exposure monitoring program for employees who are reasonably likely to be exposed to the PMN substance and a hydrolysis product of the PMN substance. In addition, EPA has determined that the results of specific target organ toxicity, acute aquatic toxicity, and biodegradation testing of the PMN substance may be potentially useful in characterizing the health and environmental effects of the PMN substance. Although the Order does not require this additional testing, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines

is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11082.

PMN Number: P–16–596

Chemical names: Alkenoic acid, reaction products with polyethylene glycol ether with hydroxyalkyl substituted alkane (generic).

CAS numbers: Not available.

Effective date of TSCA section 5(e) Order: June 5, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the substance will be used as a site-limited intermediate used for production of ultraviolet (UV) curable coating resin. Based on SAR analysis on structurally similar substances, EPA has identified concerns for irritation, sensitization, developmental toxicity, liver and kidney effects, and oncogenicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health and the environment. EPA's estimates indicate that variations of the parameters (including batch size, number of processing sites, days per year of operation) of the uses identified below would not result in inhalation exposure. To protect against these risks, the Order requires:

1. Submission of test data on the substance prior to exceeding the confidential production volume limit specified in the Order.

2. Use of personal protective equipment including impervious gloves (where there is a potential for dermal exposure).

3. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

4. No domestic manufacture of the substance.

5. Use of the substance only as a site-limited intermediate for the production of UV curable coating resin.

6. No release of the substance to surface waters of the United States.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substances in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of a reproductive/developmental toxicity testing may be potentially useful in characterizing the health effects of the PMN substance. The submitter has agreed not to manufacture beyond a certain production volume limit without performing reproductive/developmental toxicity testing.

CFR citation: 40 CFR 721.11083.

PMN Number: P–17–10

Chemical name: Alkyl substituted alkenoic acid, alkyl ester, polymer with alkyl substituted alkenoate and alkenoic acid, hydroxy substituted[(oxoalkyl)oxy]alkyl ester, reaction products with alkanoic acid, dipentaerythritil and isocyanate substituted carbomonocycle, compds. with alkylamine (generic).

CAS number: Not available.

Effective date of TSCA section 5(e) Order: June 31, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the substance will be used as a UV curable coating resin. Based on test data on structurally similar substances, EPA has identified concerns for irritation, sensitization, developmental effects, internal organ effects (liver and kidney), and cancer. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment. To protect against these risks, the Order requires:

1. Use of personal protective equipment including impervious gloves to prevent dermal exposure (where there is a potential for dermal exposure).

2. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

3. No domestic manufacture of the substance.

4. No manufacture, process, or use of the substance that results in generation of a vapor, mist, or aerosol.

5. No manufacture of the substance where there is more than 0.1% residual isocyanate by weight.

6. Use of the substance only as a UV curable coating resin.

7. Only import the substance in totes.

8. Manufacture of the substance to have an average molecular weight of greater than 2,000 daltons.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substances in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of reproductive/developmental toxicity testing may be potentially useful in characterizing the health effects of the PMN substance. Although the Order does not require these tests, the Order's restrictions on manufacture, processing, distribution in commerce, and use will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11084.

PMN Number: P–17–15

Chemical name: Heteromonocycle ester with alkanediol (generic).

CAS numbers: Not available.

Effective date of TSCA section 5(e) Order: June 13, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the PMN substance is a precursor for a photochromatic substance. Based on SAR analysis of test data on analogous esters, EPA has identified concerns for irritation to skin, eye, and mucous membrane, and systemic toxicity. Further, based on SAR analysis of test data on analogous nonionic esters, EPA predicts toxicity to aquatic organisms may occur at concentrations that exceed 3 ppb of the PMN substance in surface waters. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health and the environment. EPA's estimates indicate that variations of the parameters (including batch size, number of processing sites, days per year of operation of the uses identified below) would not result in inhalation exposure. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the substance prior to exceeding the confidential production volume limit specified in the Order.

2. Use of personal protective equipment including impervious gloves to prevent dermal exposure (where there is a potential for dermal exposure).

3. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

4. No domestic manufacture of the substance.

5. No use of the substance other than other than for the confidential uses identified in the Order.

6. No release of the substance resulting in surface water concentrations that exceed 3 ppb.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health and aquatic toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the confidential production limit without performing reproductive/developmental toxicity and acute aquatic toxicity testing.

CFR citation: 40 CFR 721.11085.

PMN Number: P–17–29

Chemical name: Substituted carbomonocycle, polymer with (aminoalkyl)-alkanediamine, (haloalkyl)oxirane, dialkyl-alkanediamine and alkyl-alkanamine, reaction products with dialkanolamine and [[(alkyl)oxy]alkyl]oxirane (generic).

CAS number: Not available.

Effective date of TSCA section 5(e) Order: May 10, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the substance is an intermediate prepolymer. Based on the physical/chemical properties of the substance and SAR analysis of test data on analogous aliphatic amines, EPA has identified concerns for irritation, lung effects, and aquatic toxicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the substance prior to exceeding the confidential production volume limit specified in the Order.

2. Use of personal protective equipment including impervious gloves to prevent dermal exposure (where there is a potential for dermal exposure).

3. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

4. No use other than for the confidential uses identified in the Order.

5. No use involving an application method that generates a vapor, mist, or aerosol.

6. No domestic manufacture of the substance.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health and aquatic toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the confidential production limit without performing irritation and acute aquatic toxicity testing. In addition, EPA has determined that the results of a pulmonary effects testing of the PMN substance may be potentially useful in characterizing the health effects of the PMN substance. Although the Order does not require this additional testing, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11086.

PMN Numbers: P–17–154, P–17–155, and P–17–156

Chemical names: Carboxylic acid amine (1:1) (generic) (P–17–154), Mix fatty acids compd. with amine (1:1) (generic) (P–17–155), and Mix fatty acids compd. with amine (1:1) (generic) (P–17–156).

CAS number: Not available.

Effective date of TSCA section 5(e) Order: June 15, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the substances is as a coating. Based on physical/chemical properties of the substances and SAR analysis of test data on amines, EPA identified concerns for irritation, corrosion, developmental toxicity, reproductive toxicity, neurotoxicity, and thyroid toxicity. Further, based on test data on analogous anionic surfactants and aliphatic amines, EPA identified concern for toxicity to aquatic organisms at surface water concentrations that exceed 240 ppb. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health and the environment. EPA's estimates indicate that variations of the parameters (including batch size, number of processing sites, days per year of operation) of the uses for the chemical substance would not result in increased inhalation exposure. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the substances prior to exceeding the confidential production volume limit specified in the Order.

2. Use of personal protective equipment to prevent dermal exposure (where there is a potential for dermal exposure).

3. Establishment and use of a hazard communication program, including human health and environmental precautionary statements on each label and in the SDS.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substances may be potentially useful to characterize the effects of the PMN substances in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed to not exceed a confidential production volume without performing reproductive/developmental toxicity testing.

CFR citation: 40 CFR 721.11087 (P–17–154), 40 CFR 721.11088 (P–17–155), 40 CFR 721.11089 (P–17–156).

PMN Number: P–17–218

Chemical name: Bicyclo[2.2.1]heptane-1-methanesulfonic acid, 7,7-dimethyl-2-oxo-, compd. with N,N-diethylethanamine (1:1).

CAS number: 67019–84–5.

Effective date of TSCA section 5(e) Order: May 19, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the substance is a processing aid for membrane production. Based on SAR analysis of test data on structurally similar respirable particles, EPA identified concerns for corrosivity, irritation, sensitization, developmental toxicity, specific target organ toxicity, and neurotoxicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the substance prior to

exceeding the confidential production volume limit specified in the Order.

2. Use of personal protective equipment including impervious gloves to prevent dermal exposure (where there is a potential for dermal exposure).

3. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

4. No manufacture, processing, or use involving an application method that generates a vapor, mist, aerosol, or dust.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the confidential production limit without performing a skin sensitization study. In addition, EPA has determined that the results of reproductive/developmental toxicity testing of the PMN substance may be potentially useful in characterizing the health effects of the PMN substance. Although the Order does not require this additional testing, the Order's restrictions on manufacture, processing, distribution in commerce, and use will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11090.

PMN Number: P–17–226

Chemical name: Manganese(2+), bisoctahydro-1,4,7-trimethyl-1H-1,4,7-triazonine-.kappa.N1,.kappa.N4,.kappa.N7)tri-.mu.-oxidi-, hexafluorophosphate(1-) (1:2).

CAS number: 116633–52–4.

Effective date of TSCA section 5(e) Order: June 15, 2017.

Basis for TSCA section 5(e) Order: The PMN states the generic (non-confidential) use of the substance will be as a detergent additive. Based on test data on the substance and analogue test data, EPA has identified concerns for eye irritation, thyroid, blood, and liver toxicity, male reproductive toxicity, neurotoxicity, immunosuppression, respiratory sensitization, and mutagenicity. Based on test data on the substance and test data on analogous neutral organics, EPA identified concern for toxicity to aquatic organisms at surface water concentrations that exceed 240 ppb. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment. To protect against these risks, the Order requires:

1. Use of personal protective equipment to prevent dermal exposure (where there is a potential for dermal exposure).

2. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

3. No use other than the confidential use allowed in the Order.

4. No domestic manufacture of the substance.

5. No processing without appropriate engineering controls to prevent inhalation exposure, including dust removal with 99.9% efficiency when loading or unloading the substance in powder form.

6. No release of the substance resulting in surface water concentrations that exceed 240 ppb.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of specific target organ toxicity testing of the PMN substance may be potentially useful in characterizing the health effects of the PMN substance. Although the Order does not require this additional testing, the Order's restrictions on manufacture, processing, distribution in commerce, and use will remain in effect until the Order is modified or revoked by EPA based on submission of this or other information that EPA determines is relevant and needed to evaluate a modification request.

CFR citation: 40 CFR 721.11091.

PMN Numbers: P–17–228 and P–17–229

Chemical names: 2′-Fluoro-4″-alkyl-4-propyl-1,1′:4′1″-terphenyl (generic) (P–17–228) and 4-ethyl-2′-fluoro-4″-alkyl-1,1′:4′1″-terphenyl (generic) (P–17–229).

CAS numbers: Not available.

Effective date of TSCA section 5(e) Order: May 18, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the generic (non-confidential) use of the substances is a coating for displays. Based on the physical/chemical properties of the substances (as described in the New Chemical Program's PBT category at 64 FR 60194; November 4, 1999; FRL–6097–7) and test data on structurally similar substances, the substances are potentially persistent, bioaccumulative, and toxic (PBT) chemicals. EPA estimates that the substances will persist in the environment more than 2 months and estimates a bioaccumulation factor of greater than or equal to 1,000. Further, based on test data on structurally similar chemicals, EPA has identified concerns for reproductive effects, adrenal and liver toxicity. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substances may present an unreasonable risk of injury to health and the environment. To protect against these risks, the Order requires:

1. Use of personal protective equipment including impervious gloves to prevent dermal exposure (where there is a potential for dermal exposure).

2. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

3. No manufacture beyond the confidential annual production volume limit specified in the Order.

4. No processing or use of the substances in an application method that generates a dust, mist, or aerosol.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the fate and human health toxicity of the PMN substances may be potentially useful to characterize the effects of the PMN substances in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. EPA has determined that the results of biodegradation and reproductive/developmental toxicity testing of the PMN substances may be potentially useful in characterizing the health effects of the PMN substances. Although the Order does not require this additional testing, the Order's restrictions on manufacture, processing, distribution in commerce, use, and disposal will remain in effect until the Order is modified or revoked by EPA based on submission of this or other

information that EPA determines is relevant and needed to evaluate a modification request.

CFR citations: 40 CFR 721.11092 (P–17–228) and 40 CFR 721.11093 (P–17–229).

PMN Number: P–17–261

Chemical name: Poly(oxy-1,2-ethanediyl),-.alpha.-(2-benzoylbenzoyl)-.omega.-[(2-benzoylbenzoyl)oxy]-.

CAS number: Not available.

Effective date of TSCA section 5(e) Order: June 19, 2017.

Basis for TSCA section 5(e) Order: The PMN states that the substance will be used as a difunctional type II photoinitiator for use in inks and coatings. Based on physical/chemical properties, SAR analysis and test data on analogous esters with branched polyols, EPA has identified concerns for corrosion of the skin, eyes, and mucous membranes, developmental toxicity, systemic toxicity, and blood effects. The Order was issued under TSCA sections 5(a)(3)(B)(ii)(I) and 5(e)(1)(A)(ii)(I), based on a finding that the substance may present an unreasonable risk of injury to health and the environment. EPA's estimates indicate that variations of the parameters (including batch size, number of processing sites, days per year of operation) of the uses identified for the chemical substance would not result in increased inhalation exposure. To protect against these risks, the Order requires:

1. Submission of certain toxicity testing on the substance prior to exceeding the confidential production volume limit specified in the Order.

2. Use of personal protective equipment including impervious gloves (where there is a potential for dermal exposure).

3. Establishment and use of a hazard communication program, including human health precautionary statements on each label and in the SDS.

4. No domestic manufacture of the substance.

The SNUR would designate as a ''significant new use'' the absence of these protective measures.

Potentially useful information: EPA has determined that certain information about the human health toxicity of the PMN substance may be potentially useful to characterize the effects of the PMN substance in support of a request by the PMN submitter to modify the Order, or if a manufacturer or processor is considering submitting a SNUN for a significant new use that will be designated by this SNUR. The submitter has agreed not to exceed the confidential production limit in the Order without performing irritation testing.

CFR citation: 40 CFR 721.11094.

V. Rationale and Objectives of the Rule

A. Rationale

During review of the PMNs submitted for the chemical substances that are subject to these SNURs, EPA concluded that for all 27 chemical substances regulation was warranted under TSCA section 5(e), pending the development of information sufficient to make reasoned evaluations of the health or environmental effects of the chemical substances. The basis for such findings is outlined in Unit IV. Based on these findings, TSCA section 5(e) Orders requiring the use of appropriate exposure controls were negotiated with the PMN submitters.

The SNURs identify as significant new uses any manufacturing, processing, use, distribution in commerce, or disposal that does not conform to the restrictions imposed by the underlying Orders, consistent with TSCA section 5(f)(4).

B. Objectives

EPA is issuing these SNURs for specific chemical substances which have undergone premanufacture review because the Agency wants to achieve the following objectives with regard to the significant new uses designated in this rule:

- EPA will receive notice of any person's intent to manufacture or process a listed chemical substance for the described significant new use before that activity begins.
- EPA will have an opportunity to review and evaluate data submitted in a SNUN before the notice submitter begins manufacturing or processing a listed chemical substance for the described significant new use.
- EPA will be able to either determine that the prospective manufacture or processing is not likely to present an unreasonable risk, or to take necessary regulatory action associated with any other determination, before the described significant new use of the chemical substance occurs.
- EPA will identify as significant new uses any manufacturing, processing, use, distribution in commerce, or disposal that does not conform to the restrictions imposed by the underlying Orders, consistent with TSCA section 5(f)(4).

Issuance of a SNUR for a chemical substance does not signify that the chemical substance is listed on the TSCA Chemical Substance Inventory (TSCA Inventory). Guidance on how to determine if a chemical substance is on the TSCA Inventory is available on the internet at *http://www.epa.gov/opptintr/existingchemicals/pubs/tscainventory/index.html.*

VI. Direct Final Procedures

EPA is issuing these SNURs as direct final rules. The effective date of these rules is September 17, 2018 without further notice, unless EPA receives written adverse comments before September 17, 2018.

If EPA receives written adverse comments on one or more of these SNURs before September 17, 2018, EPA will withdraw the relevant sections of this direct final rule before its effective date.

This rule establishes SNURs for a number of chemical substances. Any person who submits adverse comments must identify the chemical substance and the new use to which it applies. EPA will not withdraw a SNUR for a chemical substance not identified in the comment.

VII. Applicability of the Significant New Use Designation

To establish a significant new use, EPA must determine that the use is not ongoing. The chemical substances subject to this rule have undergone premanufacture review. In cases where EPA has not received a notice of commencement (NOC) and the chemical substance has not been added to the TSCA Inventory, no person may commence such activities without first submitting a PMN. Therefore, for chemical substances for which an NOC has not been submitted EPA concludes that the designated significant new uses are not ongoing.

When chemical substances identified in this rule are added to the TSCA Inventory, EPA recognizes that, before the rule is effective, other persons might engage in a use that has been identified as a significant new use. However, TSCA section 5(e) Orders have been issued for all of the chemical substances, and the PMN submitters are prohibited by the TSCA section 5(e) Orders from undertaking activities which will be designated as significant new uses. The identities of 13 of the 27 chemical substances subject to this rule have been claimed as confidential and EPA has received no post-PMN *bona fide* submissions (per §§ 720.25 and 721.11) for a chemical substance covered by this action. Based on this, the Agency believes that it is highly unlikely that any of the significant new uses described in the regulatory text of this rule are ongoing.

Therefore, EPA designates *August 17, 2018* as the cutoff date for determining whether the new use is ongoing. The objective of EPA's approach has been to ensure that a person could not defeat a SNUR by initiating a significant new use before the effective date of the direct final rule.

Persons who begin commercial manufacture or processing of the chemical substances for a significant new use identified as of that date will have to cease any such activity upon the effective date of the final rule. To resume their activities, these persons will have to first comply with all applicable SNUR notification requirements and wait until EPA has conducted a review of the notice, made an appropriate determination on the notice, and has taken such actions as are required with that determination.

VIII. Development and Submission of Information

EPA recognizes that TSCA section 5 does not require developing any particular new information (*e.g.,* generating test data) before submission of a SNUN. There is an exception: Development of test data is required where the chemical substance subject to the SNUR is also subject to a rule, order or consent agreement under TSCA section 4 (see TSCA section 5(b)(1)).

In the absence of a TSCA section 4 test rule covering the chemical substance, persons are required only to submit information in their possession or control and to describe any other information known to or reasonably ascertainable by them (see 40 CFR 720.50). However, upon review of PMNs and SNUNs, the Agency has the authority to require appropriate testing. Unit IV. lists potentially useful information for all of the listed SNURs. Descriptions of this information are provided for informational purposes. EPA strongly encourages persons, before performing any testing, to consult with the Agency pertaining to protocol selection. Furthermore, pursuant to TSCA section 4(h), which pertains to reduction of testing in vertebrate animals, EPA encourages consultation with the Agency on the use of alternative test methods and strategies (also called New Approach Methodologies, or NAMs), if available, to generate the recommended test data. EPA encourages dialog with Agency representatives to help determine how best the submitter can meet both the data needs and the objective of TSCA section 4(h). To access the OCSPP test guidelines referenced in this document electronically, please go to *http://www.epa.gov/ocspp* and select ''Test Methods and Guidelines.'' The Organisation for Economic Co-operation and Development (OECD) test guidelines are available from the OECD Bookshop at *http://www.oecdbookshop.org* or SourceOECD at *http://www.sourceoecd.org.*

In certain of the TSCA section 5(e) Orders for the chemical substances regulated under this rule, EPA has established production volume limits in view of the lack of data on the potential health and environmental risks that may be posed by the significant new uses or increased exposure to the chemical substances. These limits cannot be exceeded unless the PMN submitter first submits the results of specified tests that would permit a reasoned evaluation of the potential risks posed by these chemical substances. Under recent TSCA section 5(e) Orders, each PMN submitter is required to submit each study at least 14 weeks (earlier TSCA section 5(e) Orders required submissions at least 12 weeks) before reaching the specified production limit. The SNURs contain the same production volume limits as the TSCA section 5(e) Orders. Exceeding these production limits is defined as a significant new use. Persons who intend to exceed the production limit must notify the Agency by submitting a SNUN at least 90 days in advance of commencement of non-exempt commercial manufacture or processing.

Any request by EPA for the triggered and pended testing described in the Orders was made based on EPA's consideration of available screening-level data, if any, as well as other available information on appropriate testing for the PMN substances. Further, any such testing request on the part of EPA that includes testing on vertebrates was made after consideration of available toxicity information, computational toxicology and bioinformatics, and high-throughput screening methods and their prediction models.

Potentially useful information identified in Unit IV. may not be the only means of addressing the potential risks of the chemical substance. However, submitting a SNUN without any test data or other information may increase the likelihood that EPA will take action under TSCA section 5(e), particularly if satisfactory test results have not been obtained from a prior PMN or SNUN submitter. EPA recommends that potential SNUN submitters contact EPA early enough so that they will be able to generate useful information.

SNUN submitters should be aware that EPA will be better able to evaluate SNUNs which provide detailed information on the following:

- Human exposure and environmental release that may result from the significant new use of the chemical substances.
- Information on risks posed by the chemical substances compared to risks posed by potential substitutes.

IX. Procedural Determinations

By this rule, EPA is establishing certain significant new uses which have been claimed as CBI subject to Agency confidentiality regulations at 40 CFR part 2 and 40 CFR part 720, subpart E. Absent a final determination or other disposition of the confidentiality claim under 40 CFR part 2 procedures, EPA is required to keep this information confidential. EPA promulgated a procedure to deal with the situation where a specific significant new use is CBI, at § 721.1725(b)(1).

Under these procedures a manufacturer or processor may request EPA to determine whether a proposed use would be a significant new use under the rule. The manufacturer or processor must show that it has a *bona fide* intent to manufacture or process the chemical substance and must identify the specific use for which it intends to manufacture or process the chemical substance. If EPA concludes that the person has shown a *bona fide* intent to manufacture or process the chemical substance, EPA will tell the person whether the use identified in the *bona fide* submission would be a significant new use under the rule. Since most of the chemical identities of the chemical substances subject to these SNURs are also CBI, manufacturers and processors can combine the *bona fide* submission under the procedure in § 721.1725(b)(1) with that under § 721.11 into a single step.

If EPA determines that the use identified in the *bona fide* submission would not be a significant new use, *i.e.,* the use does not meet the criteria specified in the rule for a significant new use, that person can manufacture or process the chemical substance so long as the significant new use trigger is not met. In the case of a production volume trigger, this means that the aggregate annual production volume does not exceed that identified in the *bona fide* submission to EPA. Because of confidentiality concerns, EPA does not typically disclose the actual production volume that constitutes the use trigger. Thus, if the person later intends to exceed that volume, a new *bona fide* submission would be necessary to determine whether that higher volume would be a significant new use.

X. SNUN Submissions

According to § 721.1(c), persons submitting a SNUN must comply with the same notification requirements and EPA regulatory procedures as persons submitting a PMN, including submission of test data on health and environmental effects as described in 40 CFR 720.50. SNUNs must be submitted on EPA Form No. 7710–25, generated using e-PMN software, and submitted to the Agency in accordance with the procedures set forth in 40 CFR 720.40 and 721.25. E-PMN software is available electronically at *http://www.epa.gov/opptintr/newchems.*

XI. Economic Analysis

EPA has evaluated the potential costs of establishing SNUN requirements for potential manufacturers and processors of the chemical substances subject to this rule. EPA's complete economic analysis is available in the docket under docket ID number EPA–HQ–OPPT–2017–0414.

XII. Statutory and Executive Order Reviews

A. Executive Order 12866

This action establishes SNURs for several new chemical substances that were the subject of PMNs and TSCA section 5(e) Orders. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993).

B. Paperwork Reduction Act (PRA)

According to PRA (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9, and included on the related collection instrument or form, if applicable. EPA is amending the table in 40 CFR part 9 to list the OMB approval number for the information collection requirements contained in this action. This listing of the OMB control numbers and their subsequent codification in the CFR satisfies the display requirements of PRA and OMB's implementing regulations at 5 CFR part 1320. This Information Collection Request (ICR) was previously subject to public notice and comment prior to OMB approval, and given the technical nature of the table, EPA finds that further notice and comment to amend it is unnecessary. As a result, EPA finds that there is ''good cause'' under section 553(b)(3)(B) of the Administrative Procedure Act (5 U.S.C. 553(b)(3)(B)) to amend this table without further notice and comment.

The information collection requirements related to this action have already been approved by OMB pursuant to PRA under OMB control number 2070–0012 (EPA ICR No. 574). This action does not impose any burden requiring additional OMB approval. If an entity were to submit a SNUN to the Agency, the annual burden is estimated to average between 30 and 170 hours per response. This burden estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete, review, and submit the required SNUN.

Send any comments about the accuracy of the burden estimate, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques, to the Director, Collection Strategies Division, Office of Environmental Information (2822T), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001. Please remember to include the OMB control number in any correspondence, but do not submit any completed forms to this address.

C. Regulatory Flexibility Act (RFA)

On February 18, 2012, EPA certified pursuant to RFA section 605(b) (5 U.S.C. 601 *et seq.*), that promulgation of a SNUR does not have a significant economic impact on a substantial number of small entities where the following are true:

1. A significant number of SNUNs would not be submitted by small entities in response to the SNUR.

2. The SNUR submitted by any small entity would not cost significantly more than $8,300.

A copy of that certification is available in the docket for this action.

This action is within the scope of the February 18, 2012 certification. Based on the Economic Analysis discussed in Unit XI. and EPA's experience promulgating SNURs (discussed in the certification), EPA believes that the following are true:

- A significant number of SNUNs would not be submitted by small entities in response to the SNUR.
- Submission of the SNUN would not cost any small entity significantly more than $8,300.

Therefore, the promulgation of the SNUR would not have a significant economic impact on a substantial number of small entities.

D. Unfunded Mandates Reform Act (UMRA)

Based on EPA's experience with proposing and finalizing SNURs, State, local, and Tribal governments have not been impacted by these rulemakings, and EPA does not have any reasons to believe that any State, local, or Tribal government will be impacted by this action. As such, EPA has determined that this action does not impose any enforceable duty, contain any unfunded mandate, or otherwise have any effect on small governments subject to the requirements of UMRA sections 202, 203, 204, or 205 (2 U.S.C. 1501 *et seq.*).

E. Executive Order 13132

This action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999).

F. Executive Order 13175

This action does not have Tribal implications because it is not expected to have substantial direct effects on Indian Tribes. This action does not significantly nor uniquely affect the communities of Indian Tribal governments, nor does it involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000), do not apply to this action.

G. Executive Order 13045

This action is not subject to Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because this is not an economically significant regulatory action as defined by Executive Order 12866, and this action does not address environmental health or safety risks disproportionately affecting children.

H. Executive Order 13211

This action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), because this action is not expected to affect energy supply, distribution, or use and because this

action is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

In addition, since this action does not involve any technical standards, NTTAA section 12(d) (15 U.S.C. 272 note), does not apply to this action.

J. Executive Order 12898

This action does not entail special considerations of environmental justice related issues as delineated by Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

XIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects

40 CFR Part 9

Environmental protection, Reporting and recordkeeping requirements.

40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: August 3, 2018.

Mark A. Hartman,

Acting Director, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR parts 9 and 721 are amended as follows:

PART 9—[AMENDED]

■ 1. The authority citation for part 9 continues to read as follows:

Authority: 7 U.S.C. 135 *et seq.,* 136–136y; 15 U.S.C. 2001, 2003, 2005, 2006, 2601–2671; 21 U.S.C. 331j, 346a, 348; 31 U.S.C. 9701; 33 U.S.C. 1251 *et seq.,* 1311, 1313d, 1314, 1318, 1321, 1326, 1330, 1342, 1344, 1345(d) and (e), 1361; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp. p. 973; 42 U.S.C. 241, 242b, 243, 246, 300f, 300g, 300g–1, 300g–2, 300g–3, 300g–4, 300g–5, 300g–6, 300j–1, 300j–2, 300j–3, 300j–4, 300j–9, 1857 *et seq.,* 6901–6992k, 7401–7671q, 7542, 9601–9657, 11023, 11048.

■ 2. In § 9.1, add the following sections in numerical order under the undesignated center heading ''Significant New Uses of Chemical Substances'' to read as follows:

§ 9.1 OMB approvals under the Paperwork Reduction Act.

PART 721—[AMENDED]

■ 3. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

■ 4. Add § 721.11068 to subpart E to read as follows:

§ 721.11068 Alkanes, $C_{20–28}$, chloro.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as alkanes, $C_{20–28}$, chloro (PMN P–12–277, CAS No. 2097144–43–7) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 5. Add § 721.11069 to subpart E to read as follows:

§ 721.11069 Slack waxes (petroleum), chloro.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as slack waxes (petroleum), chloro (PMN P–12–278, CAS No. 2097144–44–8) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 6. Add § 721.11070 to subpart E to read as follows:

§ 721.11070 Hexacosane, chloro derivs. and octacosane, chloro derivs.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as hexacosane, chloro derivs. and octacosane, chloro derivs. (PMN P–12–280, CAS Nos. 2097144–46–0 and 2097144–47–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 7. Add § 721.11071 to subpart E to read as follows:

§ 721.11071 Alkanes, $C_{20–24}$, chloro.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as alkanes, $C_{20–24}$, chloro (PMN P–12–281, CAS No. 2097144–45–9) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 8. Add § 721.11072 to subpart E to read as follows:

§ 721.11072 Alkanes, $C_{14–16}$, chloro.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as alkanes, $C_{14–16}$, chloro (PMNs P–12–282 and P–14–684, CAS No. 1372804–76–6) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 9. Add § 721.11073 to subpart E to read as follows:

§ 721.11073 Tetradecane, chloro derivs.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as tetradecane, chloro derivs. (PMNs P–12–283 and P–14–683, CAS No. 198840–65–2) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 10. Add § 721.11074 to subpart E to read as follows:

§ 721.11074 Octadecane, chloro derivs.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as octadecane, chloro derivs. (PMN P–12–284, CAS No. 2097144–48–2) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 11. Add § 721.11075 to subpart E to read as follows:

§ 721.11075 Alkanes, $C_{18–20}$, chloro.

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified as alkanes, $C_{18–20}$, chloro (PMN P–12–433, CAS No. 106262–85–3) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 12. Add § 721.11076 to subpart E to read as follows:

§ 721.11076 Alkanes, $C_{14–17}$, chloro.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as alkanes, $C_{14–17}$, chloro (PMN P–12–453, CAS No. 85535–85–9) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 13. Add § 721.11077 to subpart E to read as follows:

§ 721.11077 Alkanes, $C_{22–30}$, chloro.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as alkanes, $C_{22–30}$, chloro (PMN P–12–505, CAS No. 288260–42–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(k) (flame retardants and plasticizers in polyvinyl chloride, polymers, and rubber; flame retardant, plasticizer, and lubricant in adhesives, caulk, sealants, and coatings; additive in lubricants including metalworking fluids; and flame retardant and waterproofer in textiles). It is a significant new use to manufacture the chemical substance more than 5 years.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 14. Add § 721.11078 to subpart E to read as follows:

§ 721.11078 Chloroflurocarbon (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as chloroflurocarbon (PMN P–16–150) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (3), and (4), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(5) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor (APF) of at least 1,000), (a)(6) (liquid), and (c).

(A) As an alternative to the respirator requirements in paragraph (a)(2)(i) of this section, a manufacturer or processor may choose to follow the new chemical exposure limit (NCEL) provision listed in the TSCA section 5(e) Order for this substance. The NCEL is 170 ppb as an 8-hour time weighted average. Persons who wish to pursue NCELs as an alternative to § 721.63 respirator requirements may request to do so under § 721.30. Persons whose § 721.30 requests to use the NCELs approach are approved by EPA will be required to follow NCELs provisions comparable to those contained in the corresponding TSCA section 5(e) Order.

(B) [Reserved]

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (d), (f), (g)(1) (fatal if inhaled), (g)(2)(ii), (iv), (use respiratory protection or maintain workplace airborne concentrations at or below an 8-hour time-weighted average of 170 ppb), (g)(2)(v), (g)(3)(i), (ii), (g)(4) (release to water restrictions apply), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(a) through (c), (g), and (q). It is a significant new use to manufacture, process, or use the PMN substance without the engineering controls described in the corresponding TSCA section 5(e) Order to prevent worker and environmental exposures. It is a significant new use to manufacture the chemical substance more than one year.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N = 240.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 15. Add § 721.11079 to subpart E to read as follows:

§ 721.11079 Silane, 1,1′-(1,2-ethanediyl)bis[1,1-dichloro-1-methyl]-, hydrolysis products with chloroethenyldimethylsilane.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as Silane, 1,1′-(1,2-ethanediyl)bis[1,1-dichloro-1-methyl]-, hydrolysis products with chloroethenyldimethylsilane (PMN P–16–379, CAS No. 1485477–78–8) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (iv), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(6)(particulate), (a)(6)(v), (vi), (b)(concentration set at 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e)(concentration set at 1.0%), (f), (g)(1) (liver toxicity), (mutagenicity), (g)(2)(i), (ii), (iii), (v), (g)(4)(i), (do not incinerate), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), (q), (y)(1) and (2).

(iv) *Disposal.* Requirements as specified in § 721.85(a) (water), (a)(2), (b) (water), (b)(2), (c) (water), and (c)(2).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (j) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 16. Add § 721.11080 to subpart E to read as follows:

§ 721.11080 Silicophosphonate—sodium silicate (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as silicophosphonate—sodium silicate (PMN P–16–410) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f) and (k). A significant new use is any use in formulations containing greater than 0.2% of the chemical substance.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(i) of this section.

■ 17. Add § 721.11081 to subpart E to read as follows:

§ 721.11081 3-Butenenitrile, 2-(acetyloxy).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 3-butenenitrile, 2-(acetyloxy) (PMN P–16–438, CAS No. 15667–63–7) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (ii), (iii), (a)(3), (a)(4), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(5)(respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor (APF) of at least 1000), (a)(6)(particulate), (a)(6)(v), (vi), (b)(concentration set at 1.0%), and (c). It is a significant new use to manufacture, process or use the substance without following the monitoring procedure as specified in the worker protection section of the corresponding TSCA section 5(e) Order.

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e)(concentration set at 1.0%), (f), (g)(1) (fatal if swallowed), (fatal if in contact with skin), (toxic if inhaled), (g)(2)(i), (ii), (iii), (iv), (v), (g)(3)(i), (ii), (g)(4)(i), (ii), (iii), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g). It is a significant new use to manufacture or use the substance other than in an enclosed system as described in the PMN.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 18. Add § 721.11082 to subpart E to read as follows:

§ 721.11082 Halogenophosphoric acid metal salt (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as halogenophosphoric acid metal salt (PMN P–16–543) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(the confidential dermal protection described in the corresponding TSCA section 5(e) Order ''the Order''), (a)(2)(ii), (iii), (iv), (a)(3), (a)(4), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) and (4), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(5) (respirators must provide a National Institute for Occupational Safety and Health (NIOSH) assigned protection factor of at least 1,000), (a)(6) (particulate), (a)(6)(v), (vi), (b)(concentration set at 0.1%), and (c). It is a significant new use to manufacture, process or use the substance without following the monitoring procedure as specified in the worker protection section of the Order.

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 0.1%), (f), (g)(1)(i), (ii), (iii), (iv), (v), (vii), (viii), (ix), (g)(2)(i), (ii), (iii), (use protective engineering controls or equipment for dermal and inhalation protection, (g)(3)(i), (ii), (g)(4)(i), (ii), (water release restrictions apply), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(c), (f), and (k). It is a significant new use to vary or alter, the manufacturing, processing, and use, distribution/transportation, treatment and disposal processes, process equipment, engineering controls, and handling practices (including worker activities and cleaning procedures) described in the PMN in such a way as to increase the magnitude of inhalation exposure.

(iv) *Disposal.* Requirements as specified in § 721.85. It is a significant new use to dispose of the substance other than by hazardous waste incineration according to 40 CFR parts 260 through 299 unless the substance is in waste water. When the substance is in wastewater it may be disposed of as required in paragraph (a)(2)(v) of this section.

(v) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=3.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraphs (a)(2)(i) and (iii) of this section.

■ 19. Add § 721.11083 to subpart E to read as follows:

§ 721.11083 Alkenoic acid, reaction products with polyethylene glycol ether with hydroxyalkyl substituted alkane (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as alkenoic acid, reaction products with polyethylene glycol ether with hydroxyalkyl substituted alkane (PMN P–16–596) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (b) (concentration set at 0.1%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72 (a) through (e)(concentration set at 0.1%), (f), (g)(1)(i), (dermal sensitization), (g)(1)(iv), (cancer, if inhaled), (g)(1)(ix), (g)(2)(i), (ii), (iii), (v), (g)(4)(iii), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (q).

(iv) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 20. Add § 721.11084 to subpart E to read as follows:

§ 721.11084 Alkyl substituted alkenoic acid, alkyl ester, polymer with alkyl substituted alkenoate and alkenoic acid, hydroxy substituted[(oxoalkyl)oxy]alkyl ester, reaction products with alkanoic acid, dipentaerythritil and isocyanate substituted carbomonocycle, compds. with alkylamine (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as alkyl substituted alkenoic acid, alkyl ester, polymer with alkyl substituted alkenoate and alkenoic acid, hydroxy substituted[(oxoalkyl)oxy]alkyl ester, reaction products with alkanoic acid, dipentaerythritil and isocyanate substituted carbomonocycle, compds. with alkylamine (PMN P–17–10) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1), engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(6)(particulate), (a)(6)(v), (vi), (b) (concentration set at 0.1%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 0.1%), (f), (g)(1)(i), (sensitization), (g)(1)(vii), (systemic effects), (g)(1)(ix), (g)(2)(i), (ii), (iii), (v), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k) (ultraviolet curable coating resin), and (y)(1). It is a significant new use to manufacture the chemical substance with an average molecular weight below 2,000 daltons or containing greater than 0.1% residual isocyanate. It is a significant new use to import the substance other than in totes.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

■ 21. Add § 721.11085 to subpart E to read as follows:

§ 721.11085 Heteromonocycle ester with alkanediol (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as heteromonocycle ester with alkanediol (PMN P–17–15) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (iii), (iv), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (b) (concentration set at 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0%), (f), (g)(1)(i), (g)(2)(i), (ii), (iii), (v), (g)(3)(i), (ii), (g)(4) (release to water restrictions apply), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), and (q).

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=3.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 22. Add § 721.11086 to subpart E to read as follows:

§ 721.11086 Substituted carbomonocycle, polymer with (aminoalkyl)-alkanediamine, (haloalkyl)oxirane, dialkyl-alkanediamine and alkyl-alkanamine, reaction products with dialkanolamine and [[(alkyl)oxy]alkyl]oxirane (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as substituted carbomonocycle, polymer with (aminoalkyl)-alkanediamine, (haloalkyl)oxirane, dialkyl-alkanediamine and alkyl-alkanamine, reaction products with dialkanolamine and [[(alkyl)oxy]alkyl]oxirane (PMN P–17–29) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (ii), (iii), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (b) (concentration set at 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0%), (f), (g)(1)(i), (eye irritation), (g)(1)(ii), (g)(2)(i), (ii), (iii), (v), (g)(3)(i), (ii), (g)(4)(iii), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f), (k), (q), and (y)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 23. Add § 721.11087 to subpart E to read as follows:

§ 721.11087 Carboxylic acid amine (1:1) (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as carboxylic acid amine (1:1) (PMN P–17–154) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (ii), (iv), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(6) (particulate), (a)(6)(v), (vi), (b) (concentration set at 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0%), (f), (g)(1)(i), (ii), (iii), (thyroid effects), (g)(1)(vi), (ix), (g)(2)(i), (ii), (iii), (v), (g)(3)(i), (ii), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 24. Add § 721.11088 to subpart E to read as follows:

§ 721.11088 Mix fatty acids compd with amine (1:1) (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as mix fatty acids compd with amine (1:1) (PMN P–17–155) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the PMN substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (ii), (iv), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(6) (particulate), (a)(6)(v), (vi), (b) (concentration set at 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e)(concentration set at 1.0%), (f), (g)(1)(i), (ii), (iii), (thyroid effects), (g)(1)(vi), (ix), (g)(2)(i), (ii), (iii), (v), (g)(3)(i), (ii), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 25. Add § 721.11089 to subpart E to read as follows:

§ 721.11089 Mix fatty acids compd with amine (1:1) (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as mix fatty acids compd with amine (1:1) (PMN P–17–156) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (iii), (iv), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(6) (particulate), (a)(6)(v), (vi), (b) (concentration set a 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e)(concentration set at 1.0%), (f), (g)(1)(i), (ii), (iii), (thyroid effects), (g)(1)(vi), (ix), (g)(2)(i), (ii), (iii), (v), (g)(3)(i), (ii), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 26. Add § 721.11090 to subpart E to read as follows:

§ 721.11090 Bicyclo[2.2.1]heptane-1-methanesulfonic acid, 7,7-dimethyl-2-oxo-, compd. with N,N-diethylethanamine (1:1).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as bicyclo[2.2.1]heptane-1-methanesulfonic acid, 7,7-dimethyl-2-oxo-, compd. with N,N-diethylethanamine (1:1) (PMN P–17–218. CAS No. 67019–84–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(6) (particulate), (a)(6)(v), (vi), (b) (concentration set 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0%), (f), (g)(1)(i), (corrosivity), (sensitization), (g)(1)(iii), (iv), (ix), (g)(2)(i), (ii), (iii), (v), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q), (y)(1) and (2).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions

of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 27. Add § 721.11091 to subpart E to read as follows:

§ 721.11091 Manganese (2+), bisoctahydro-1,4,7-trimethyl-1H–1,4,7-triazonine-.kappa.N1,.kappa.N4,.kappa.N7) tri-.mu.-oxidi-, hexafluorophosphate(1-) (1:2).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as manganese (2+), bisoctahydro-1,4,7-trimethyl-1H–1,4,7-triazonine-.kappa.N1,.kappa.N4,.kappa.N7) tri-.mu.-oxidi-, hexafluorophosphate(1-) (1:2) (1:1) (PMN P–17–226, CAS No. 116633–52–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (ii), (iii), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (a)(6) (particulate), (b) (concentration set at 0.1%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 0.1%), (f), (g)(1) (eye irritation), (respiratory sensitization), (g)(1)(iii), (iv), (vi), (vii), (viii), (g)(2)(i), (ii), (iii), (v), (g)(3)(i), (ii), (g)(4) (release to water provisions apply), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f) and (k). It is a significant new use to process or use the substance without engineering controls to prevent exposure, including dust removal with 99.9% efficiency when loading or unloading the substance in powder form.

(iv) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=240.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 28. Add § 721.11092 subpart E to read as follows:

§ 721.11092 2′-Fluoro-4″-alkyl-4-propyl-1,1′:4′1″-terphenyl (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as 2′-fluoro-4″-alkyl-4-propyl-1,1′:4′1″-terphenyl (PMN P–17–228) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (b) (concentration set at 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e)(concentration set at 1.0%), (f), (g)(1)(vi), (adrenal effects), (liver effects), (g)(2)(i), (ii), (iii), (v), and (g)(5). Alternative hazard and warning statements that meet the criteria of the Globally Harmonized System (GHS) and OSHA Hazard Communication Standard may be used.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(t) and (y)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 29. Add § 721.11093 to subpart E to read as follows:

§ 721.11093 4-ethyl-2′-fluoro-4″-alkyl-1,1′:4′,1″-terphenyl (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as 4-ethyl-2′-fluoro-4″-alkyl-1,1′:4′,1″-terphenyl (PMN P–17–229) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (b) (concentration set 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set 1.0%), (f), (g)(1)(vi), (adrenal effects), (liver effects), (g)(2)(i), (ii), (iii), (v), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(t) and (y)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

■ 30. Add § 721.11094 to subpart E to read as follows:

§ 721.11094 Poly(oxy-1,2-ethanediyl),alpha-(2-benzoyl)-omega-[(2-benzoylbenzoyl)oxy]-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as poly(oxy-1,2-ethanediyl),alpha-(2-benzoyl)-omega-[(2-benzoylbenzoyl)oxy]- (PMN P–17–261) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. The requirements of this section do not

apply to quantities of the substance after they have been reacted (cured).

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63(a)(1), (a)(2)(i), (a)(3), when determining which persons are reasonably likely to be exposed as required for § 721.63(a)(1) engineering control measures (*e.g.,* enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.,* workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible, (b) (concentration set at 1.0%), and (c).

(ii) *Hazard communication.* Requirements as specified in § 721.72(a) through (e) (concentration set at 1.0%), (f), (g)(1) (irritation), (photosensitization), (g)(2)(i), (ii), (iii), (v), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f) and (q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(iii) of this section.

[FR Doc. 2018–17348 Filed 8–16–18; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2018–0272; FRL–9981–09–Region 9]

Air Plan Approval; California; San Joaquin Valley Unified Air Pollution Control District; Reasonably Available Control Technology Demonstration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions to the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD or ''District'') portion of the California State Implementation Plan (SIP). These revisions concern the District's 2014 demonstration regarding Reasonably Available Control Technology (RACT) requirements for the 2008 8-hour ozone National Ambient Air Quality Standard (NAAQS). We are also taking final action to approve into the California SIP the following documents that help support the District's RACT demonstration: SJVUAPCD's supplement to its 2014 RACT SIP demonstration, which contains SJVUAPCD's negative declarations where the District concludes it has no sources subject to certain Control Techniques Guidelines (CTG) documents and relevant permit conditions to implement RACT level requirements for J.R. Simplot's Nitric Acid plant in Helm, California (CA); and SJVUAPCD's 2016 Ozone Plan for the 2008 8-Hour Ozone Standard—Chapter 3.4 and Appendix C only. We are approving local SIP revisions to demonstrate that RACT is implemented as required under the Clean Air Act (CAA or the ''the Act'').

DATES: This rule will be effective on September 17, 2018.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2018–0272. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Stanley Tong, EPA Region IX, (415) 947–4122, *tong.stanley@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA.

Table of Contents

I. Proposed Action

On May 17, 2018 (83 FR 22908), the EPA proposed to approve SJVUACPD's ''2014 Reasonably Available Control Technology (RACT) Demonstration for the 8-Hour Ozone State Implementation Plan (SIP)'' (*2014 RACT SIP*), submitted to the EPA by the California Air Resources Board (CARB) on July 18, 2014,[1] for approval as a revision to the California SIP.

In addition to the *2014 RACT SIP,* our May 17, 2018 proposed rule was also based on our evaluation of the public draft version of SJVUAPCD's ''Supplement to the 2014 Reasonably Available Control Technology (RACT) State Implementation Plan (SIP) for the 2008 8-hour Ozone Standard'' (*Supplement to the 2014 RACT SIP*) that was transmitted by CARB on May 4, 2018, along with a request for parallel processing.[2] The District's *Supplement to the 2014 RACT SIP* contained relevant RACT permit conditions in a permit to operate for J.R. Simplot's Nitric Acid plant in Helm, CA, and negative declarations where the District concluded it had no sources subject to the following CTG source categories: Surface coating of insulation of magnetic wire; manufacture of synthesized pharmaceutical products; manufacture of pneumatic rubber tires; leaks from synthetic organic chemical polymer and resin manufacturing equipment; volatile organic compound (VOC) emissions from manufacture of high-density polyethylene, polypropylene and polyester resins; VOC emissions from air oxidation processes in synthetic organic chemical manufacturing industry (SOCMI); VOC emissions from reactor processes and distillation operations in SOCMI; and surface coating operations at shipbuilding and ship repair facilities.[3] We indicated that we would not take final action on the *Supplement to the 2014 RACT SIP* until CARB submitted the final adopted version to the EPA as a SIP revision. On June 21, 2018, the SJVUAPCD held a public hearing and adopted the *Supplement to the 2014 RACT SIP.*[4] On June 29, 2018, CARB

[1] The SJVUAPCD adopted its *2014 RACT SIP* on June 19, 2014.

[2] CARB's May 4, 2018 transmittal letter contained a public draft version of the *Supplement to the 2014 RACT SIP* along with a request that the EPA provide parallel processing of the documents concurrently with the state's public process. See footnote 1 in our May 17, 2018 proposed rule.

[3] *See Supplement to the 2014 RACT SIP,* Appendix B.

[4] On June 21, 2018, the SJVUAPCD Governing Board adopted ''Revision to the State Implementation Plan (SIP) to Address Federal Clean Air Act Requirements for Reasonably Available Control Technology (RACT)''. Appendix A: ''J.R. Simplot Permit Conditions'' and Appendix B: ''Negative Declarations'', as contained in the adopted document, are substantially similar to the versions contained in the District's parallel processing request which the EPA proposed to

submitted the *Supplement to the 2014 RACT SIP* to the EPA for approval as a revision to the California SIP.[5] The final adopted version of the *Supplement to the 2014 RACT SIP* includes non-substantive changes from the public draft version that was the basis for our May 17, 2018 proposed rule. These changes include streamlining J.R. Simplot's introductory section listing the plant's major equipment to just state ''Nitric Acid Plant''; restoring a permit condition that EPA Reference Method 7 will be used to determine compliance with oxides of nitrogen (NO_X) limits; and removing reference citations to a local rule and federal regulations that were inadvertently left in the permit. The NO_X emission limits remain unchanged from the version of the permit included in our May 17, 2018 proposed rule. In addition, when comparing the public draft version included in our May 17, 2018 proposed rule and the final version adopted by the District on June 21, 2018, we noted minor editorial changes in the text preceding the list of negative declarations. The primary substance of the District's negative declarations, that is, recertification of three prior negative declarations, and the adoption of five new negative declarations, remain unchanged. We therefore consider these editorial changes to also be non-substantive. On July 11, 2018, we found the *Supplement to the 2014 RACT SIP,* including the relevant operating permit conditions to implement NO_X RACT for J.R. Simplot's Nitric Acid Plant in Helm, CA, and several negative declarations, met the completeness criteria in 40 CFR part 51, appendix V.

We are also approving portions of SJVUAPCD's ''2016 Ozone Plan for the 2008 8-Hour Ozone Standard'' (*2016 Ozone Plan*), which help to supplement the District's *2014 RACT SIP.* The plan was adopted by the District on June 16, 2016, and submitted by CARB to the EPA on August 24, 2016, as a revision to the California SIP. Specifically, as discussed in our May 17, 2018 proposed rule, Chapter 3.4 of the *2016 Ozone Plan* states that ''the District updated the RACT evaluation and included VOC sources in the evaluation in Appendix C.'' Appendix C of the *2016 Ozone Plan,* which is titled, ''Stationary and Area Source Control Strategy Evaluations,'' includes evaluations of individual rules for RACT. We are only approving Chapter 3.4 and Appendix C of the *2016 Ozone Plan* in order to demonstrate VOC RACT for all applicable sources for the 2008 NAAQS.

As discussed in our proposed rule, the District's *2014 RACT SIP* contains its analysis of NO_X RACT for the 2008 NAAQS. For more background information and a more extensive discussion of the *2014 RACT SIP,* the *Supplement to the 2014 RACT SIP,* Chapter 3.4 and Appendix C of the *2016 Ozone Plan,* and our evaluation of them for compliance with CAA RACT requirements, please see our proposed rule and related technical support document.

II. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. During this period, we received one anonymous comment that was outside the scope of this rulemaking. The comment was not germane to our evaluation of the submitted SJVUAPCD documents to demonstrate that the District's stationary sources are subject to RACT requirements.

III. EPA Action

No comments were submitted that change our assessment of the submitted documents as described in our proposed action. Therefore, as authorized in section 110(k)(3) of the Act, the EPA is fully approving the following documents into the California SIP: SJVUAPCD's *2014 RACT SIP*; the *Supplement to the 2014 RACT SIP* including relevant permit conditions for J.R. Simplot's Nitric Acid Plant in Helm, CA and negative declarations for the CTG source categories: Surface coating of insulation of magnetic wire; manufacture of synthesized pharmaceutical products; manufacture of pneumatic rubber tires; leaks from synthetic organic chemical polymer and resin manufacturing equipment; VOC emissions from manufacture of high-density polyethylene, polypropylene and polyester resins; VOC emissions from air oxidation processes in SOCMI; VOC emissions from reactor processes and distillation operations in SOCMI; and surface coating operations at shipbuilding and ship repair facilities; and the *2016 Ozone Plan*—only Chapter 3.4 and Appendix C.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of certain permit conditions for the J.R. Simplot Nitric Acid Plan in Helm, CA and described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents available through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

approve on May 17, 2018. We will reference the District's June 21, 2018 adopted document as ''*Supplement to the 2014 RACT SIP*'' to maintain consistency with how this action was referenced in our May 17, 2018 proposed rulemaking.

[5] As explained in our May 17, 2018 proposed rulemaking, the EPA is following its regulatory procedures for parallel processing. See 40 CFR part 51, appendix V. These procedures allow the EPA to approve a state's submittal, following parallel state and federal comment periods, provided the final provision adopted at the state level has no significant changes from the proposal.

• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

• Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

• Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 16, 2018. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 12, 2018.

Michael Stoker,

Regional Administrator, Region IX.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraphs (c)(449)(ii)(D), (c)(496)(ii)(B), and (c)(507) to read as follows:

§ 52.220 Identification of plan—in part.

* * * * *

(c) * * *

(449) * * *

(ii) * * *

(D) San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD).

(*1*) SJVUAPCD ''2014 Reasonably Available Control Technology (RACT) Demonstration for the 8-Hour Ozone State Implementation Plan (SIP),'' dated June 19, 2014, as adopted by the SJVUAPCD on June 19, 2014.

* * * * *

(496) * * *

(ii) * * *

(B) San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD).

(*1*) SJVUAPCD ''2016 Ozone Plan for 2008 8-Hour Ozone Standard,'' dated June 16, 2016, Chapter 3.4 and Appendix C only, as adopted by the SJVUAPCD on June 16, 2016.

* * * * *

(507) New regulations for the following APCD were submitted on June 29, 2018 by the Governor's designee.

(i) *Incorporation by reference.* (A) San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD).

(*1*) Permit #C–705–3–19, J.R. Simplot Company, Nitric Acid Plant, Helm, CA, adopted by the SJVUAPCD, Resolution No.18–06–14, June 21, 2018.

(ii) *Additional materials.* (A) San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD).

(*1*) SJVUAPCD ''Appendix B Negative Declarations For Proposed Revision to the State Implementation Plan (SIP) to Address Federal Clean Air Act Requirements for Reasonably Available Control Technology (RACT) June 21, 2018,'' containing negative declarations, as adopted by the SJVUAPCD on June 21, 2018.

■ 3. Section 52.222 is amended by adding paragraph (a)(8)(iii) to read as follows:

§ 52.222 Negative declarations.

(a) * * *

(8) * * *

(iii) The following negative declarations for the 2008 NAAQS were adopted by the San Joaquin Valley Unified Air Pollution Control District on June 21, 2018, and submitted to the EPA on June 29, 2018.

NEGATIVE DECLARATIONS FOR THE 2008 OZONE NAAQS

RIN 3090–AK02

Civilian Board of Contract Appeals; Rules of Procedure for Contract Disputes Act Cases

AGENCY: Civilian Board of Contract Appeals; General Services Administration (GSA).

ACTION: Final rule.

SUMMARY: The Civilian Board of Contract Appeals (Board) amends its rules of procedure for cases arising under the Contract Disputes Act, and for disputes between insurance companies and the Department of Agriculture's Risk Management Agency in which decisions of the Federal Crop Insurance Corporation are brought before the Board under the Federal Crop Insurance Act. The Board's current rules were issued in 2008 and were last amended in 2011. After considering the one responsive comment received, the Board now promulgates its final rules of procedure.

DATES: September 17, 2018.

FOR FURTHER INFORMATION CONTACT: Mr. J. Gregory Parks, Chief Counsel, Civilian Board of Contract Appeals, 1800 M Street NW, Suite 600, Washington, DC 20036; at 202–606–8787; or email at *greg.parks@cbca.gov,* for clarification of content. For information pertaining to the status or publication schedules, contact the Regulatory Secretariat at 202–501–4755. Please cite BCA Case 2018–61–1.

SUPPLEMENTARY INFORMATION:

A. Background

The Board was established within GSA by section 847 of the National Defense Authorization Act for Fiscal Year 2006, Public Law 109–163. Board members are administrative judges appointed by the Administrator of General Services under 41 U.S.C. 7105(b)(2). Among its other functions, the Board hears and decides contract disputes between Government contractors and most civilian Executive agencies under the Contract Disputes Act, 41 U.S.C. 7101–7109, and its implementing regulations, and disputes pursuant to the Federal Crop Insurance Act, 7 U.S.C. 1501 *et seq.,* between insurance companies and the Department of Agriculture's Risk Management Agency (RMA) involving actions of the Federal Crop Insurance Corporation (FCIC).

The Board's rules of procedure for Contract Disputes Act cases and Federal Crop Insurance Act cases were adopted in May 2008 (73 FR 26947) and were last amended in August 2011 (76 FR 50926). The Board published in the **Federal Register** at 83 FR 13211, March 28, 2018, proposed, amended rules of procedure along with a notice inviting comments on those rules. This notice announced the intention to promulgate final rules, following the Board's review and consideration of all comments.

The period for comments closed on May 29, 2018. The Board has considered all comments received, revising the proposed rules, in part, as explained in part B below, and now promulgates its final rules of procedure. These rules simplify and modernize access to the Board by establishing a preference for electronic filing, increase conformity between the Board's rules and the Federal Rules of Civil Procedure, streamline the wording of the Board's rules, and clarify current rules and practices. In addition, the time for filing is amended from 4:30 p.m. to midnight Eastern Time, and the stated monetary limitations for electing the accelerated and small claims procedures are deleted and replaced with references to the requirements stated in the Contract Disputes Act.

B. Comments and Changes

The Board received comments from two commenters. Commenters included one attorney from a Federal agency and one anonymous source. Comments from the anonymous source concerned matters wholly unrelated to the proposed rule, and the concerns noted by the attorney were already addressed in the proposed rule. The Board carefully considered the comments but has not revised its proposed rule based on issues the commenters raised. The final rule incorporates minor, non-substantive corrections to the proposed rule. The corrections are addressed below.

Part 6101

Sections 6101.1, 6101.3, 6101.4, 6101.12, and 6101.23 are amended to correct spelling, grammatical, or spacing errors; include a cross-reference; and clarify a phrase.

C. Regulatory Flexibility Act

GSA certifies that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 602 *et seq.,* and the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, because the final rule does not impose any additional costs on small or large businesses.

D. Paperwork Reduction Act

The Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.,* does not apply because this final rule does not impose any information collection requirements that require the approval of the Office of Management and Budget.

E. Congressional Review Act

The final rule is exempt from Congressional review under Public Law 104–121 because it relates solely to agency organization, procedure, and practice and does not substantially affect the rights or obligations of non-agency parties.

F. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of

harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993, or E.O. 13563, Improving Regulation and Regulatory Review, dated January 18, 2011. This final rule is not a major rule under 5 U.S.C. 804.

G. Executive Order 13771

This final rule is not an E.O. 13771 regulatory action because this rule is not significant under E.O. 12866.

List of Subjects in 48 CFR Parts 6101 and 6102

Administrative practice and procedure; Government procurement; Agriculture.

Dated: August 6, 2018.

Jeri Kaylene Somers,

Chair, Civilian Board of Contract Appeals, General Services Administration.

Therefore, GSA revises 48 CFR parts 6101 and 6102 to read as follows:

PART 6101—RULES OF PROCEDURE OF THE CIVILIAN BOARD OF CONTRACT APPEALS

Sec.

Authority: 41 U.S.C. 7101–7109.

6101.1 General information; definitions [Rule 1].

(a) *Scope.* The rules of this chapter govern cases filed with the Board on or after September 17, 2018, and all further proceedings in cases then pending, unless the Board decides that using the rules in this part in a case pending on their effective date would be inequitable or infeasible. The Board may alter these procedures on its own initiative or on request of a party to promote the just, informal, expeditious, and inexpensive resolution of a case.

(b) *Definitions.*

Appeal; appellant. ''Appeal'' means a contract dispute filed with the Board under the Contract Disputes Act (CDA), 41 U.S.C. 7101–7109, or under a disputes clause in a non-CDA contract that allows for Board review. An ''appellant'' is the contractor filing an appeal.

Appeal file. ''Appeal file'' means the submissions to the Board under Rule 4 (48 CFR 6101.4).

Application; applicant. ''Application'' means a submission to the Board under Rule 30 (48 CFR 6101.30) of a request for an award of fees and other expenses under the Equal Access to Justice Act (EAJA), 5 U.S.C. 504, or another provision authorizing such an award. An ''applicant'' is a party filing an application.

Attorney. ''Attorney'' means a person licensed to practice law in a State, commonwealth, or territory of the United States or in the District of Columbia.

Board judge; judge. ''Board judge'' or ''judge'' means a member of the Board.

Business days and hours. The Board's business days are days other than Saturdays, Sundays, Federal holidays, days on which the Board is required to close before 4:30 p.m., or days on which the Board does not open for any reason, such as inclement weather. The Board's business hours are 8 a.m. to 4:30 p.m. Eastern Time.

Case. ''Case'' means an appeal, petition, or application.

Clerk of the Board. The ''Clerk'' of the Board receives filings, dockets cases, and prepares official correspondence for the Board.

Efile; efiling. The Clerk accepts electronic filings (''efilings''), meaning documents submitted through the Board's email system (''efiled''). Parties may efile documents by sending an email (usually with attachments) to *cbca.efile@cbca.gov,* except for documents that are classified or submitted *in camera* or under protective order (Rule 9). Efiling occurs upon receipt by the Board's email server, except that attachments must be in .pdf format and 18 megabytes (MB) or smaller or they will be rejected.

Electronically stored information. ''Electronically stored information'' means information created, manipulated, communicated, stored, and best used in digital form with computer hardware and software.

Equal Access to Justice Act (EAJA), 5 U.S.C. 504. This statute governs applications for awards of fees and other expenses in certain cases.

Facsimile (fax) transmissions. The Board sends and accepts facsimile transmissions. A document is filed by fax at the time the Board receives all of it. The Board does not automatically extend filing deadlines if its fax machine is busy or otherwise unavailable.

Filing. A notice of appeal or application is filed upon the earlier of its receipt by the Clerk or, if mailed through the United States Postal Service (USPS), the date it is mailed to the Board. A USPS postmark is prima facie evidence of a mailing date. Any other document is filed upon receipt by the Clerk.

Party. ''Party'' means an appellant, applicant, petitioner, or respondent.

Petition; petitioner. ''Petition'' means a request that the Board direct a contracting officer to issue a written decision on a claim. A ''petitioner'' is a party submitting a petition.

Receipt. The Board deems a party's ''receipt'' of a document to occur upon the earlier of the emailing of the document to the party's email address of record (without notice of delivery failure) or the party's possession of a document sent by other means.

Respondent. A ''respondent'' is the government agency whose decision,

action, or inaction is the subject of an appeal, petition, or application.

(c) *Construction.* The Board construes this part to promote the just, informal, expeditious, and inexpensive resolution of every case. The Board may apply principles of the Federal Rules of Civil Procedure (28 U.S.C. App.) to resolve issues not covered by this part.

(d) *Panels.* The Board assigns each case to a panel of three judges, one of whom presides. The presiding judge sets the case schedule, oversees discovery, and conducts conferences, hearings, and other proceedings. The presiding judge may without participation by other panel members decide any appeal under the small claims procedure of Rule 52, any nondispositive motion, or any petition, and may dismiss a case as permitted by Rule 12(c) (48 CFR 6101.12(c)). The Board decides all other matters by majority vote of a panel unless the full Board decides a matter under Rule 28 (48 CFR 6101.28). Only panel and full Board decisions are precedential.

(e) *Location and addresses.* The Board is physically located at 1800 M Street NW, 6th Floor, Washington, DC 20036. The mailing address is 1800 F Street NW, Washington, DC 20405. The Clerk's telephone number is (202) 606–8800. The Clerk's fax number is (202) 606–0019. The Clerk's email address for efiling is *cbca.efile@cbca.gov.* The Board's website is *http://www.cbca.gov.*

(f) *Clerk's office hours.* The Clerk's office is open to the public and for physical deliveries during business hours (Rule 1(b) (48 CFR 6101.1(b)). Efilings received after midnight are considered filed the next business day. The Clerk's office is closed when the Board's physical address is closed for any reason, including any closure of the Federal Government in the Washington, DC, metropolitan area.

6101.2 Filing appeals, petitions, and applications; consolidation [Rule 2].

(a) *Filing an appeal.* A notice of appeal shall be in writing; signed by the appellant, the appellant's attorney, or an authorized representative (see Rule 5 (48 CFR 6101.5)); and filed with the Board, with a copy to the contracting officer who received or issued the claim, or the successor contracting officer. A notice of appeal should include:

(1) The name, telephone number, and mailing and email addresses of the appellant and/or its attorney or authorized representative;

(2) The contract number;

(3) The name of the contracting officer who received or issued the claim, with that person's telephone number, mailing address, and email address;

(4) A copy of the claim with any certification; and

(5) A copy of the contracting officer's decision on the claim or a statement that the appeal is from a failure to issue a decision (''a deemed denial'').

(b) *Filing a petition.* A petition shall be in writing; signed by the petitioner, the petitioner's attorney, or an authorized representative (see Rule 5 (48 CFR 6101.5)); and filed with the Board, with a copy to the contracting officer who received the claim, or the successor contracting officer. A petition shall ask the Board to order the contracting officer to issue a decision and should include:

(1) The name, telephone number, and mailing and email addresses of the petitioner and/or its attorney or authorized representative;

(2) The contract number;

(3) The name of the contracting officer who received the claim, with that person's telephone number, mailing address, and email address; and

(4) A copy of the claim with any certification.

(c) *Filing an EAJA application.* See Rule 30 (48 CFR 6101.30).

(d) *Time limits.* (1) Under the CDA, a notice of appeal must be filed within 90 calendar days after the date of receipt of a contracting officer's decision on a claim.

(2) Alternatively, under the CDA, a contractor may appeal when a contracting officer has not issued a decision on a claim within the time allowed by the CDA or the time set by a tribunal acting on a petition.

(3) Under the CDA, a petition may be filed in the period between—

(i) Receipt of notice from a contracting officer, within 60 days after the submission of a claim, that the contracting officer intends to issue a decision on the claim more than 60 days after its submission, and

(ii) The due date stated by the contracting officer.

(4) Under EAJA, an application must be filed within 30 days after the date that the decision in the underlying appeal becomes no longer subject to appeal.

(e) *Notice of docketing.* Upon receipt of a notice of appeal, a petition, or an application, the Clerk issues a written notice of docketing to all parties.

(f) *Consolidation.* The Board may consolidate cases wholly or in part if they involve common questions of law or fact.

6101.3 Computing and extending time [Rule 3].

(a) *Computing time.* Consistent with Rule 6 of the Federal Rules of Civil Procedure: In computing any time period, omit the day of the event from which the period begins to run. Omit nonbusiness days only if the period is less than 11 days; otherwise include them. A period ends on a business day. If a computed period would otherwise end on a nonbusiness day, it ends on the next business day.

(b) *Extensions.* Parties should act sooner than required whenever practicable. However, the Board extends time when appropriate. A motion for an extension shall be in writing and shall state the other party's position on the motion or describe the movant's effort to learn the other party's position. The Board cannot extend statutory deadlines.

6101.4 Appeal file [Rule 4].

(a) *Filing.* Within 30 days after receiving the Board's docketing notice, the respondent shall file and serve all documents relevant to the appeal, including:

(1) The contracting officer's decision on the claim;

(2) The contract, including all pertinent specifications, amendments, plans, drawings, and incorporated proposals or parts thereof;

(3) All correspondence between the parties relevant to the appeal;

(4) The claim with any certification;

(5) Relevant affidavits, witness statements, or transcripts of testimony taken before the appeal;

(6) All documents relied on by the contracting officer to decide the claim; and

(7) Relevant internal memoranda, reports, and notes.

(b) *Organization of electronic appeal file.* (1) Unless otherwise ordered, parties shall file the appeal file and supplements thereto in an electronic storage medium (*e.g.,* hard disk or solid state drive, compact disc (CD), or digital versatile disc (DVD)), labeled with the docket number, case name, and range of exhibit numbers.

(2) A party may efile an appeal file or a supplement thereto by permission of the Board.

(3) Appeal file exhibits shall be in .pdf format or will be rejected. The appeal file index and each exhibit shall be separate documents, without embedded documents.

(4) Appeal file exhibits shall be complete, legible, arranged in chronological order, numbered, and indexed. Parties shall avoid filing duplicative exhibits and shall number exhibits continuously and consecutively from one filing to the next, so that a complete appeal file consists of one set of consecutively numbered exhibits.

(5) Parties shall number the pages of each exhibit consecutively, unless an exhibit is already paginated in another logical manner.

(6) The appeal file index shall describe each exhibit by date and content.

(7) Parties may file documents *in camera* only by permission of the Board.

(c) *Organization of paper appeal file.* (1) Appeal files and supplements thereto may be filed on paper only by permission of the Board.

(2) Appeal file exhibits shall be complete, legible, arranged in chronological order, tabbed, and indexed. Parties shall avoid filing duplicative exhibits and shall number exhibits continuously and consecutively from one filing to the next, so a complete appeal file consists of one set of consecutively tabbed exhibits.

(3) Parties shall number the pages of each paper exhibit consecutively, unless an exhibit is already paginated in another logical manner.

(4) Parties shall file exhibits in 3-ring binders with spines no wider than 3 inches, labeled on the cover and spine with the name of the appeal, CBCA number, and tab numbers in each binder. Include in each binder the index of the entire filing.

(5) The appeal file index shall describe each exhibit by date and content.

(6) Parties shall separately file and index documents submitted *in camera* or under a protective order. However, documents may be submitted *in camera* only by permission of the Board.

(d) *Supplements.* Within 30 days after the respondent files the appeal file, the appellant may file non-duplicative documents relevant to the claim, organized as instructed in Rule 4(b) or (c) (paragraph (b) or (c) of this section), starting with the next available exhibit number.

(e) *Classified or protected material.* Neither classified nor protected material may be efiled.

(f) *Submission by order.* The Board may order a party to supplement the appeal file, including by filing an exhibit in another format.

(g) *Status of exhibits.* The Board considers appeal file exhibits part of the record for decision under Rule 9(a) unless a party objects to an exhibit within the time set by the Board and the Board sustains the objection.

(h) *Other procedures.* The Board may postpone or waive the filing of an appeal file.

6101.5 Appearing; notice of appearance [Rule 5].

(a) *Appearing before the Board*—(1) *Appellant; petitioner; applicant.* An appellant, petitioner, or applicant may appear before the Board through an attorney. An individual appellant, petitioner, or applicant may appear for himself or herself. A corporation, trust, or association may appear by one of its officers. A limited liability corporation, partnership, or joint venture may appear by one of its members. Each individual appearing on behalf of an appellant, petitioner, or applicant must have legal authority to appear.

(2) *Respondent.* A respondent may appear before the Board through an attorney or, if allowed by the agency, by the contracting officer or the contracting officer's authorized representative.

(3) *Others.* The Board may permit a special or limited appearance of or for a nonparty, such as an *amicus curiae.*

(b) *Notice of appearance.* The Board deems the person who signed a notice of appeal, petition, or application to have appeared for the appellant, petitioner, or applicant. The Board deems the head of the respondent's litigation office to have appeared for the respondent unless otherwise notified. Other participating attorneys shall file notices of appearance including all of the information required by the sample notice of appearance posted on the Board's website. Attorneys representing parties before the Board shall list their bar numbers or other identifying data for each State bar to which they are admitted.

(c) *Withdrawal of appearance.* Anyone who has filed a notice of appearance and wishes to withdraw from a case must file a motion identifying by name, telephone number, mailing address, and email address the person who will assume responsibility for representing the party in question. The motion must state grounds for withdrawal, unless the motion represents that the party in question will meet the existing case schedule.

6101.6 Pleadings; amending pleadings [Rule 6].

(a) *Complaint.* Within 30 days after receiving the notice of docketing, the appellant shall file a complaint stating in simple, concise, and direct terms the factual basis for each claim and the amount in controversy. Alternatively, the appellant or the Board may designate as a complaint the notice of appeal, a claim submission, or any other document containing the information required in a complaint. The Board may in its discretion order a respondent asserting a claim to file a complaint.

(b) *Answer.* Within 30 days after receiving the complaint or a designation of a complaint, the respondent (or the appellant, if so ordered) shall file an answer stating in simple, concise, and direct terms its responses to the allegations of the complaint and any affirmative defenses it chooses to assert.

(c) *Amendments.* A party may amend a pleading once, before a responsive pleading is filed, with permission of the other party. Amending a pleading restarts the time to respond, if any. The Board may allow a party to amend a pleading in other circumstances.

(d) *Motion in lieu of answer.* The Board may allow a party to file a dispositive motion or to move for a more definite statement in lieu of filing an answer.

6101.7 Service of documents [Rule 7].

A party filing any document not submitted *in camera* (see Rule 9(c)(2) (48 CFR 6101.9(c)(2)) shall send a copy to the other party by a method at least as fast as the filing method. The filing party shall indicate the method and address of service, otherwise the Board may consider a document not served and not properly filed.

6101.8 Motions [Rule 8].

(a) *Generally.* A party may make a motion for a Board action orally on the record in the presence of the other party or in a written filing. A written motion shall be a document titled as a motion and shall state the relief sought and the legal basis (see Rule 23(b) (48 CFR 6101.23(b)). Except for joint or dispositive motions, all motions shall represent that the movant tried to resolve the motion with the other party before filing. The Board may hold oral argument on a motion.

(b) *Jurisdictional motions.* A party challenging the Board's jurisdiction should file such a motion promptly.

(c) *Procedural motions.* A party may move for an extension of time (Rule 3(b) (48 CFR 6101.3(b)). The Board may in its discretion consider motions on other procedural matters. A procedural motion shall state the other party's position on the motion or describe the movant's effort to learn the other party's position.

(d) *Discovery motions.* See Rule 13(e) (48 CFR 6101.13(e)).

(e) *Motions to dismiss for failure to state a claim.* A party may move to dismiss all or part of a claim for failure to state grounds on which the Board could grant relief. In deciding such motions, the Board looks to Rule 12(b)(6) of the Federal Rules of Civil Procedure for guidance.

(f) *Summary judgment motions.* A party may move for summary judgment on all or part of a claim or defense if the party believes in good faith it is entitled to judgment as a matter of law based on

undisputed material facts. In deciding motions for summary judgment, the Board looks to Rule 56 of the Federal Rules of Civil Procedure for guidance.

(1) *Statement of undisputed material facts.* The movant shall file with its summary judgment motion a separate document titled, ''Statement of Undisputed Material Facts.'' This document shall set forth facts supporting the motion in separate, numbered paragraphs, citing appeal file exhibits, admissions in pleadings, and/or evidence filed with the motion.

(2) *Statement of genuine issues.* The opposing party shall file with its opposition a separate document titled, ''Statement of Genuine Issues.'' This document shall respond to specific paragraphs of the movant's Statement of Undisputed Material Facts by identifying material facts in genuine dispute, citing appeal file exhibits, admissions in pleadings, and/or evidence filed with the opposition.

(g) *Briefing.* A party may file a brief in opposition to a motion under Rule 26, Rule 27, Rule 28, or Rule 29 (48 CFR 6101.26, 6101.27, 6101.28, or 6101.29) only by permission of the Board. Unless otherwise ordered, a brief in opposition to any other nonprocedural motion is due 30 days after receipt of the motion, and a movant's reply brief is due 15 days after receipt of an opposition brief. A nonmovant may file a surreply only by permission of the Board. Unless otherwise ordered, a brief in opposition to a procedural motion is due 5 days after receipt of the motion, and there shall be no reply.

(h) *Effect of pending motion.* Unless otherwise stated in this part, the filing of a motion does not affect a party's obligations under the Board's rules or orders.

6101.9 Record; content and access [Rule 9].

(a) *Record for decision.* The record on which the Board will decide a case includes the following:

(1) *Evidence.* Evidence in a case includes:

(i) Rule 4 (48 CFR 6101.4) appeal file exhibits other than those to which an objection is sustained;

(ii) Other documents or parts thereof admitted as evidence;

(iii) Tangible things admitted as evidence;

(iv) Transcripts or recordings of testimony before the Board; and

(v) Factual stipulations and factual admissions.

(2) *Other material.* The Board may also rely on to decide a case:

(i) The notice of appeal, petition, or application;

(ii) The complaint, answer, and amendments thereto;

(iii) Motions and briefs on motions;

(iv) Other briefs;

(v) Demonstrative hearing exhibits; and

(vi) Anything else the Board may expressly admit or take notice of.

(b) *Other contents of case file.* The Board's administrative record may be broader than the record for decision. Material in the Board's case file that is not listed in Rule 9(a) (48 CFR 6101.9(a)) is part of the administrative record but is not part of the record for decision.

(c) *Enlarging or reopening the record.* The Board may enlarge or reopen the record for decision on terms fair to the parties.

(d) *Protected and in camera submissions.* The Board may limit access to specified material in a record for decision.

(1) *Protective orders.* The Board may limit access to specified material in a record for decision if the Board finds good cause to treat the material as privileged, confidential, or otherwise sensitive.

(2) *In camera submissions.* The Board may allow a party to submit a document solely for the Board's review *in camera* if:

(i) The party submits the document to explain a discovery dispute;

(ii) The Board denies a motion for protective order, and the movant asks that the record include a document that the party would have used in the case with a protective order, for possible later review of the Board's denial; or

(iii) Good cause exists to find that *in camera* review may limit or prevent needless harm to a party, witness, or other person.

(3) *Status in record.* A document submitted and accepted under a protective order or *in camera* is part of the record for decision. If the Board's decision is judicially reviewed, the Board will endeavor to preserve the protected or *in camera* nature of the document to the extent consistent with judicial review.

(e) *Review and copying.* The Clerk makes records for decision, except evidence submitted under a protective order or *in camera,* available for review on reasonable notice during business hours, and provides copies of such available documents for a reasonable fee. The Clerk will not relinquish possession of material in the Board's files.

6101.10 Admissibility of evidence [Rule 10].

The Board may in its discretion receive any evidence to which no party objects. In ruling on evidentiary objections, the Board is guided but not bound by the Federal Rules of Evidence, except that the Board generally admits hearsay unless the Board finds it unreliable.

6101.11 Conferences [Rule 11].

The Board may order a conference of the parties for any purpose. Conferences are usually telephonic and are rarely recorded or transcribed. No one may record a conference by any means without Board approval. If the Board issues a memorandum or order memorializing a conference, a party has 5 days from receipt of the memorandum or order to object in writing to the memorialization.

6101.12 Stays and dismissals [Rule 12].

(a) *Stays.* The Board may stay a case for a specific duration, or until a specific event, for good cause.

(b) *Dismissals*—(1) *Generally.* The Board may dismiss a case or part of a case either on motion of a party or after permitting a response to an order to show cause. Dismissal is with prejudice unless a Board order or other applicable law provides otherwise.

(2) *Voluntary dismissal.* Subject to Rule 12(b)(3) (paragraph (b)(3) of this section), the Board will dismiss all or part of a case on the terms requested if the appellant, petitioner, or applicant moves for dismissal with prejudice or moves jointly with the respondent for dismissal with or without prejudice.

(3) *For lack of jurisdiction.* If the Board finds that it lacks jurisdiction to decide all or part of a case, the Board will dismiss the case or the part of the case, regardless of the parties' positions on jurisdiction or dismissal.

(4) *For failure to prosecute.* The Board may dismiss all or part of a case for failure to prosecute.

(c) *Dismissal orders and decisions.* The presiding judge acting alone may stay a case or grant voluntary dismissal with or without prejudice. A panel or the full Board may dismiss a case on other grounds.

(d) *Admonition.* Dismissal of a party's case without prejudice does not necessarily mean that the party may later refile the case at the Board or in another forum under the jurisdictional and procedural laws applicable to the case.

6101.13 Discovery generally [Rule 13].

(a) *Methods.* Parties may obtain discovery by depositions, interrogatories, requests for production, and requests for admission.

(b) *Scope.* Unless otherwise ordered, the scope of discovery is the same as

under Rule 26(b)(1) of the Federal Rules of Civil Procedure.

(c) *Limits.* The Board may limit the frequency or extent of discovery for a reason stated in Rule 26(b)(2) of the Federal Rules of Civil Procedure.

(d) *Timing.* The Board encourages parties to agree on a discovery plan that the Board may adopt in a scheduling order. The Board may modify an agreed discovery plan.

(e) *Disputes*—(1) *Objections.* A party objecting to a written discovery request must make the objection in writing no later than the date that its response to the discovery request is due.

(2) *Duty to cooperate.* Parties shall try in good faith to resolve objections to discovery requests without involving the Board. The Board may impose an appropriate sanction under Rule 35 (48 CFR 6101.35) on a party that does not meet its discovery obligations.

(3) *Motions to compel.* A party may move to compel a response or a supplemental response to a discovery request. The movant shall attach to its motion a copy of each discovery request and response at issue, and shall represent in the motion that the movant complied with Rule 13(e)(2) (paragraph (e)(2) of this section).

(f) *Subpoenas.* A party may request a subpoena under Rule 16 (48 CFR 6101.16).

6101.14 Interrogatories; requests for production; requests for admission [Rule 14].

(a) *Generally.* Interrogatories, requests for production, requests for admission, and responses thereto shall be in writing and served on the other party.

(b) *Interrogatories.* Interrogatories shall be answered or objected to separately in writing, under signed oath, within 30 days of service. A party may answer an interrogatory by specifying records from which the answer may be derived or ascertained when that response would be allowed under Rule 33(d) of the Federal Rules of Civil Procedure.

(c) *Requests for production.* Responses and objections to requests for production, inspection, and/or copying of documents, electronically stored information, or tangible things are due within 30 days of service of the requests and shall state when and how the responding party will make responsive material available.

(d) *Requests for admission*—(1) *Content.* A party may serve requests for admission that would be proper under Rule 36(a)(1) of the Federal Rules of Civil Procedure.

(2) *Responses and failure to respond.* Responses and objections shall comply with Rule 36(a)(4) and (5) of the Federal Rules of Civil Procedure. If the served party does not respond within 30 days of service of a request, the Board may on motion deem a matter admitted and conclusively established solely for the pending case.

(3) *Relief from admission.* The Board may allow a party to withdraw or amend an admission for good cause.

(e) *Altering time to respond.* The parties may agree to alter deadlines to respond to discovery requests. The Board may alter the deadlines to meet the needs of a case.

(f) *Supplementing and correcting responses.* A party must supplement or correct a response to a discovery request if and when this action would be required by Rule 26(e)(1) of the Federal Rules of Civil Procedure.

6101.15 Depositions [Rule 15].

(a) *Generally.* Unless otherwise ordered, parties may take depositions after service of the answer. If the parties agree in writing on the deponent, time, place, recording method, and maximum duration of a deposition, no formal deposition notice is needed. The Board may order a deposition on motion under Rule 8 (48 CFR 6101.8) or by subpoena under Rule 16 (48 CFR 6101.16).

(b) *Use.* Parties may use deposition testimony in a case to the extent that would be permitted by Rule 32(a) of the Federal Rules of Civil Procedure.

(c) *To perpetuate testimony.* If the Board has decided a case, and either the time to appeal has not expired or an appeal has been taken, the Board may for good cause grant leave to take a deposition as if the case were still before the Board in order to preserve testimony for possible further proceedings before the Board.

6101.16 Subpoenas [Rule 16].

(a) *Expectation of cooperation in lieu of subpoena.* Subpoenas should rarely be necessary, as the Board expects parties to respond cooperatively to discovery requests and to try in good faith to secure the cooperation of third parties who have or may have evidence responsive to discovery requests.

(b) *Generally.* The Board may issue a subpoena for a purpose for which a United States district court may issue a subpoena under Rule 45(a)(1) of the Federal Rules of Civil Procedure. Parties and the Board shall take all reasonable steps to avoid imposing undue burden on a person subject to a subpoena.

(c) *How requested; form.* A party may ask the Board to issue a subpoena by motion under Rule 8 (48 CFR 6101.8), substantially before the proposed compliance date. The movant shall attach to its motion a completed subpoena form for signing by a Board judge, and shall explain in the motion why the proposed subpoena scope is reasonable and how the evidence sought is relevant to the case.

(d) *Production cost.* The Board's policy is to require a requesting party to advance a subpoenaed person the reasonable cost of producing subpoenaed material.

(e) *Service.* The requesting party shall serve a subpoena and provide proof of service as would be required by Rule 45(b) of the Federal Rules of Civil Procedure.

(f) *Motion to quash or modify.* On or before the date specified for compliance, a subpoenaed person may file a motion to quash or modify the subpoena for a reason stated in Rule 45(d)(3) of the Federal Rules of Civil Procedure. The Board may rule on the motion any time after the party that served the subpoena receives the motion.

(g) *Enforcement.* As necessary, the Board may ask the Attorney General of the United States to petition a United States district court to enforce a Board subpoena.

(h) *Letter rogatory in lieu of subpoena.* If a person to be subpoenaed resides in a foreign country, the Board may facilitate the issuance of a letter rogatory to the person by the United States Department of State under 28 U.S.C. 1781–1784.

6101.17 Exhibits [Rule 17].

(a) *Marking exhibits.* Unless otherwise ordered, parties shall, to the fullest extent practicable, submit exhibits for inclusion in the appeal file before a hearing starts under Rule 20 (48 CFR 6101.20) or before the first brief is filed when a case is submitted on the written record under Rule 19 (48 CFR 6101.19). Parties shall mark any exhibits offered in evidence thereafter as sequential additions to the appeal file. Such exhibits shall become part of the appeal file if admitted as evidence.

(b) *Copies.* The Board expects all document exhibits to be true, complete, and legible copies rather than originals. The Board may order a party to substitute a better copy or to make an original document available for inspection.

(c) *Withdrawal.* The Board may allow a party to withdraw an exhibit from the appeal file and the record for decision on terms fair to the other party.

(d) *Disposition.* Unless the Board advises the parties of another deadline, the Board may discard physical (non-electronic) exhibits in its possession 90 days after the time to appeal the Board's decision in the case expires.

6101.18 Election of hearing or record submission [Rule 18].

(a) *Generally.* The Board will hold a hearing in a case if the Board must find facts and either party elects a hearing. A party may elect to submit its case for decision on the written record under Rule 19 (48 CFR 6101.19). The presiding judge will set the deadline for an election under this rule.

(b) *Hybrid election.* A party may elect to submit its case on the written record under Rule 19 (48 CFR 6101.19) and also elect to appear at a hearing, solely to cross-examine the other party's witnesses and to object to evidence offered at the hearing.

6101.19 Record submission without a hearing [Rule 19].

(a) *Generally.* If a party elects to submit its case on the record without a hearing, the Board will set a schedule for the parties to complete the evidentiary record and file briefs.

(b) *Evidence and objections.* When a party elects submission on the record without a hearing, that party may submit material for inclusion in the record no later than the date the party files its initial brief. Unless otherwise ordered, the other party may object to the admission of such material as evidence within 5 days after receiving the submission. If one party elects a hearing and the other party elects record submission (or makes a hybrid election under Rule 18(b) (48 CFR 6101.18(b)), the evidentiary record shall close at the end of the hearing. The Board may rule on objections either before or in its decision.

(c) *Briefs and argument.* The Board may receive briefs and/or oral argument on a record submission. If one party elects a hearing and the other party elects record submission, the first brief of the party submitting its case on the record shall be due no later than the start of the hearing.

6101.20 Scheduling hearings [Rule 20].

(a) *Generally.* The Board will set the time, place, duration, and subject matter of a hearing in a written order after consulting with the parties.

(b) *Subject matter.* The Board may schedule for hearing all or some of the claims or issues in a case, or all or some of the claims, issues, or questions of fact or law common to more than one case.

(c) *Unexcused absence.* If a party fails without good excuse to appear at a hearing of which it received notice under this rule, the Board will deem that party to have elected to submit its case on the record under Rule 19.

6101.21 Hearing procedures [Rule 21].

(a) *Generally.* The Board generally holds hearings in public hearing rooms. Except as necessary under a protective order or *in camera* procedures, hearings are open to the public. The Board entrusts the conduct of hearings to the discretion of the presiding judge.

(b) *Witnesses, evidence, other exhibits.* A party that intends to offer testimony, other evidence, or other material for the record at a hearing shall arrange for the witness, evidence, or other material to be present in the hearing room. The Board may in its discretion allow testimony by telephone or video.

(c) *Exclusion of witnesses.* The Board may exclude witnesses from a hearing, other than one designated representative for each party or a person authorized by statute to be present, so that witnesses are not influenced by the testimony of other witnesses.

(d) *Sworn testimony.* Hearing witnesses shall testify under oath or affirmation. If a person called as a witness refuses to so swear or affirm, the Board may receive the person's testimony under penalty of making a materially false statement in a Federal proceeding under 18 U.S.C. 1001. Alternatively, the Board may disallow the testimony and may draw inferences from the person's refusal to swear or affirm.

6101.22 Transcripts [Rule 22].

The Board arranges transcription of hearings, other than hearings under the small claims procedure of Rule 52 (48 CFR 6101.52). The Board may, but generally does not, arrange transcription of conferences or other proceedings. No one may record or transcribe a Board proceeding without the Board's permission. The Board may order or acknowledge corrections to an official transcript. Each party is responsible for obtaining its own copy of a transcript.

6101.23 Briefs [Rule 23].

(a) *Generally.* The Board may order or invite briefs on any issue in a case at any time. Briefs shall be formatted for 8.5 by 11-inch paper, double spaced, with body and footnote text no smaller than 13 point.

(b) *Prehearing, post-hearing, and other briefs.* Prehearing and post-hearing briefs, briefs filed under Rule 19, and briefs on non-procedural motions shall cite record evidence for factual statements and legal authority for legal arguments.

6101.24 Closing the record [Rule 24].

(a) *Closing the evidentiary record.* Unless otherwise ordered, the evidence as defined in Rule 9(a)(1) (48 CFR 6101.9(a)(1)) is closed at the end of a hearing under Rule 20 or at the start of merits briefing when a case is submitted on the record under Rule 19 (48 CFR 6101.19).

(b) *Closing the record for decision.* Unless otherwise ordered, the record for decision as defined in Rule 9(a) (48 CFR 6101.9(a)) is closed when the Board receives the final scheduled brief on the matters to be decided.

6101.25 Decisions and settlements [Rule 25].

(a) *Decisions.* The Board issues decisions in writing, except as allowed by Rule 52 (48 CFR 6101.52). The Board will send a copy of a decision to each party, requesting confirmation of receipt (see Rule 1 (48 CFR 6101.1)), and will post the decision on its website. If a decision reserves any part of a case for later proceedings, it is conclusive as to the matters it resolves, except as provided in Rules 26 and 28 (48 CFR 6101.26 and 6101.28).

(b) *Settlements.* Parties may settle a case by stipulating to an award. The Board may issue a decision making the stipulated award if:

(1) The Board is satisfied that it has jurisdiction; and

(2) The stipulation states that no party will seek reconsideration of, seek relief from, or appeal the Board's decision.

6101.26 Reconsideration [Rule 26].

(a) *Grounds.* The Board may on motion reconsider a decision or order for a reason recognized in Rule 59 of the Federal Rules of Civil Procedure. Arguments and evidence previously presented are not grounds for reconsideration.

(b) *Time limit for motion.* A party may move for reconsideration of a decision or order on an appeal or petition within 30 days after that party receives the decision or order. A party may move for reconsideration of a decision or order on an application within 7 days after receiving the decision or order. The Board does not extend these time limits.

(c) *Effect of motion.* A pending reconsideration motion does not affect any obligation to comply with a decision or order.

6101.27 Relief from decision or order [Rule 27].

(a) *Grounds.* The Board may grant relief, for a reason recognized in Rule 60 of the Federal Rules of Civil Procedure, from a decision or order that, alone or in conjunction with prior decisions or orders, resolves all of an appeal, petition, or application.

(b) *Time limit for motion.* A party may move for relief under this rule within

120 days after that party receives the decision or order at issue.

(c) *Effect of motion.* A pending motion for relief under this rule does not affect any obligation to comply with a decision or order.

6101.28 Full Board consideration [Rule 28].

(a) *By motion.* The full Board may consider a decision or order when necessary to maintain uniformity of Board decisions or if the matter is exceptionally important. Motions for full Board consideration are disfavored and are decided by a majority of the Board. A party may move for full Board consideration within 10 days after that party receives the decision or order at issue. An order granting full Board consideration will include concurring or dissenting opinions, if any.

(b) *By Board initiative.* A majority of the Board may initiate full Board consideration of any matter in a case, up to 10 days after a judge or panel issues a decision or order on that matter. The full Board will inform the parties by order of the matter or matters to be considered. The order will include concurring or dissenting opinions, if any.

(c) *Full Board decision.* The full Board decides matters by majority vote. A full Board decision will include concurring or dissenting opinions, if any.

(d) *Effect of motion.* A pending motion for full Board consideration does not affect any obligation to comply with a decision or order.

6101.29 Clerical mistakes; harmless error [Rule 29].

(a) *Clerical mistakes.* The Board may correct clerical mistakes while a case is pending, or within 60 days thereafter if a decision has not been appealed. If a Board decision is appealed, the Board may correct clerical mistakes only by leave of the appellate Court.

(b) *Harmless error.* The Board disregards errors that do not affect a substantive right of a party. No error in a ruling, order, or decision of the Board will be grounds for a new hearing or for vacating, reconsidering, modifying, or otherwise disturbing a decision or order unless refusing to correct the error will prejudice a party or work a substantial injustice.

6101.30 Award of fees and other expenses [Rule 30].

(a) *Application for fees and other expenses.* A party in an appeal may apply for an award of fees and other expenses as permitted under EAJA or any other provision that may entitle the party to such an award.

(b) *Time for filing.* A party may file an application for fees and other expenses only after the time to seek appellate review of a Board decision has expired. A party may file an application within 30 calendar days after that date.

(c) *Application requirements.* An application for fees and other expenses shall:

(1) Specify the applicant, appeal, and amount sought;

(2) Explain why the applicant is legally eligible for an award;

(3) Provide a schedule of fees and expenses with supporting documentation;

(4) Be signed by the applicant or a person appearing for the applicant, with a declaration under penalty of perjury that the information in the application is correct;

(5) Provide evidence of the applicant's small business status or net worth; and

(6) Justify any request for attorney fees exceeding the statutory rate.

(d) *Proceedings.* (1) Within 30 days after receiving an application, the respondent may file an answer with any objections to the award requested, supported by facts and legal analysis.

(2) The Board may order further proceedings if necessary for a full and fair resolution of issues arising from an application.

(e) *Decision.* The Board will issue a written decision on an application.

6101.31 Payment of award [Rule 31].

When permitted by law, Board awards under contracts may be paid from the permanent indefinite judgment fund under 31 U.S.C. 1304 and 31 CFR part 256. An EAJA award is paid from funds of the respondent.

6101.32 Appeal from Board decision [Rule 32].

(a) *Notice.* A party filing a notice of appeal with the United States Court of Appeals for the Federal Circuit (or with a district court in an admiralty case) shall provide a copy of the notice to the Board.

(b) *Record on review.* The record on appellate review is the record for decision under Rule 9(a) (48 CFR 6101.9(a)) and any other material in a case file that the appellate Court may require.

(c) *Certified list.* The Clerk will provide the clerk of the appellate Court a certified list as required by the Court's rules.

(d) *Inspection or copying of record.* The Clerk will make a record on appeal available for inspection and copying in accordance with the rules of the appellate Court.

6101.33 Remand from appellate Court [Rule 33].

If a Court remands a case to the Board for further proceedings, each party shall, within 30 days of receipt of the appellate mandate, recommend procedures to comply with the remand order. The Board will then issue an order on further proceedings.

6101.34 Ex parte communications [Rule 34].

No member of the Board or of the Board's staff will communicate with a party about any material issue in a case outside of the presence of the other party, and no one shall attempt such communications on behalf of a party. This rule does not bar such communications about the Board's administrative functions or procedures.

6101.35 Standards of conduct; sanctions [Rule 35].

(a) *Standards of conduct.* All parties and their representatives, attorneys, and any expert or consultant retained by them or their attorneys shall obey directions and orders of the Board and adhere to standards of conduct applicable to such parties and persons. Standards applying to an attorney include the rules of professional conduct and ethics of the jurisdictions in which the attorney is licensed to practice, to the extent that those rules are relevant to conduct affecting the integrity of the Board, its process, or its proceedings.

(b) *Sanctions.* If a party or its representative, attorney, expert, or consultant fails to comply with any direction or order of the Board (including an order to provide or permit discovery) or engages in misconduct affecting the Board, its process, or its proceedings, the Board may make such orders as are just, including the imposition of appropriate sanctions. Sanctions may include, but are not limited to:

(1) Taking the facts pertaining to the matter in dispute to be established for the purpose of the case in accordance with the contention of the party who is not at fault;

(2) Forbidding the challenge of the accuracy of any evidence;

(3) Refusing to allow the party to support or oppose designated claims or defenses;

(4) Prohibiting the party from introducing into evidence designated claims or defenses;

(5) Striking pleadings or parts thereof, or staying further proceedings until the order is obeyed;

(6) Dismissing the case or any part thereof;

(7) Enforcing the protective order and disciplining individuals subject to such order for violation thereof, including disqualifying a party's representative, attorney, expert, or consultant from further participation in the case;

(8) Drawing evidentiary inferences adverse to the party; or

(9) Imposing such other sanctions as the Board deems appropriate.

(c) *Denial of access to protected material.* The Board may in its discretion deny access to protected material to any person found to have previously violated a protective order, regardless of who issued the order.

(d) *Disciplinary proceedings*—(1) *Sanctions.* The Board may discipline individual party representatives, attorneys, experts, or consultants for violating any Board order, direction, or standard of conduct if the violation seriously affects the integrity of the Board, its process, or its proceedings. Sanctions may be public or private, and may include admonishment, reprimand, disqualification from a particular matter, referral to an appropriate licensing authority, or other action that circumstances may warrant.

(2) *Suspension.* The Board may suspend an individual from appearing before the Board as a party representative, attorney, expert, or consultant, if, after affording such individual notice and opportunity to be heard, a majority of the members of the full Board determine such a sanction is warranted.

6101.36 Board seal [Rule 36].

The seal of the Board is a circular logo with ''Civilian Board of Contract Appeals'' on the outer margin. The seal is a means of authenticating records, notices, orders, dismissals, opinions, subpoenas, and certificates issued by the Board.

6101.37–6101.50 [Reserved]

6101.51 Alternative procedures [Rule 51].

An appellant in an eligible case may elect the small claims procedure under Rule 52 (48 CFR 6101.52) or the accelerated procedure under Rule 53 (48 CFR 6101.53). Parties may jointly elect alternative dispute resolution under Rule 54 (48 CFR 6101.54).

6101.52 Small claims procedure [Rule 52].

(a) *Election.* The small claims procedure is available solely at an appellant's election and is limited to appeals in which there is a monetary amount in dispute and the requirements for expedited disposition set forth in the Contract Disputes Act, 41 U.S.C. 7106(b), are met. An appellant may elect the small claims procedure up to 30 days after receiving the respondent's answer.

(b) *Procedure.* The respondent may object to an election, on the grounds that Rule 52(a) (paragraph (a) of this section) is not satisfied, within 10 days after receiving the election. If the small claims procedure is used, the Board will set a schedule for timely resolution of the appeal. The schedule may restrict or eliminate pleadings, discovery, and other prehearing activities.

(c) *Decision.* The presiding judge may issue a decision in summary form. A decision is final and conclusive, shall not be set aside except for fraud, and is not precedential. If possible, the Board will resolve the appeal within 120 days after the appellant elects the small claims procedure. The Board may extend the appeal schedule if an appellant does not adhere to the established schedule.

6101.53 Accelerated procedure [Rule 53].

(a) *Election.* The accelerated procedure is available solely at an appellant's election and is limited to appeals in which there is a monetary amount in dispute and the requirements for accelerated disposition set forth in the Contract Disputes Act, 41 U.S.C. 7106(a), are met. The appellant may elect the accelerated procedure up to 30 days after receiving the respondent's answer.

(b) *Procedure.* The respondent may object to an election, on the grounds that Rule 53(a) (paragraph (a) of this section) is not satisfied, within 10 days after receiving the election. If the accelerated procedure is used, the Board will set a schedule for timely resolution of the appeal. The schedule may restrict or eliminate pleadings, discovery, and other prehearing activities.

(c) *Decision.* The presiding judge may issue a decision with the concurrence of at least one panel member. If the presiding judge and a panel member disagree, the panel will decide the appeal. If possible, the Board will resolve the appeal within 180 days after the appellant elects the accelerated procedure. The Board may extend the appeal schedule if an appellant does not adhere to the established schedule.

6101.54 Alternative dispute resolution [Rule 54].

(a) *Availability.* The CDA requires boards of contract appeals to provide to the fullest extent practicable informal, expeditious, and inexpensive resolution of disputes. Resolution of a dispute at the earliest stage feasible, by the fastest and least expensive method possible, benefits both parties. The Board provides alternative dispute resolution (ADR) services for pre-claim and pre-final decision matters, as well as appeals pending before the Board. The Board may also conduct ADR proceedings for any Federal agency. The use of ADR proceedings does not toll any statutory time limits.

(b) *Procedures for requesting ADR.* Parties may jointly ask the Board Chair to appoint a judge as an ADR Neutral. The parties may request a particular judge or judges, to include the presiding judge. To facilitate full, frank, and open participation, a Neutral will not discuss the substance of the case or the parties' conduct in ADR with other Board personnel, and a Neutral who participates in a nonbinding ADR procedure that does not resolve the dispute is recused from further participation in the matter unless the parties agree otherwise in writing and the Board concurs.

(c) *Confidentiality.* Written material prepared for use in ADR, oral presentations made in ADR, and all discussions between the parties and the Neutral are confidential, subject to 5 U.S.C. 574, and, unless otherwise specifically agreed by the parties, inadmissible as evidence in any Board proceeding, although evidence otherwise admissible before the Board is not rendered inadmissible merely because of its use in ADR.

(d) *ADR agreement.* Parties shall agree in writing to an ADR method and the procedures and requirements for implementing it. The ADR agreement shall provide that the parties and counsel will not subpoena the Neutral in any legal action or administrative proceeding of any kind to provide documents or testimony relating to the ADR.

(e) *Types of ADR.* Parties and the Board may agree on any type of binding or nonbinding ADR suited to a dispute.

PART 6102—CROP INSURANCE CASES

Sec.

Authority: 7 U.S.C. 1501 *et seq.;* 41 U.S.C. 438(c)(2).

6102.201 Scope of rules [Rule 201].

These procedures govern the Board's resolution of disputes between insurance companies and the Department of Agriculture's Risk Management Agency (RMA) involving actions of the Federal Crop Insurance Corporation (FCIC). Prior to the creation of this Board, the Department of Agriculture Board of Contract Appeals resolved this variety of dispute pursuant

to statute, 7 U.S.C. 1501 *et seq.* (the Federal Crop Insurance Act), and regulation, 7 CFR 24.4(b) and 400.169. The Board has this authority under an agreement with the Secretary of Agriculture, as permitted under section 42(c)(2) of the Office of Federal Procurement Policy Act, 41 U.S.C. 438(c)(2).

6102.202 Rules for crop insurance cases [Rule 202].

The rules of procedure for these cases are the same as the rules of procedure for Contract Disputes Act appeals, with these exceptions:

(a) *Rule 1(b)(48 CFR 6101.1(b)).* (1) The term ''appeal'' means a dispute between an insurance company that is a party to a Standard Reinsurance Agreement (or other reinsurance agreement) and the RMA, and the term ''appellant'' means the insurance company filing an appeal.

(2) A notice of appeal is filed upon its receipt by the Office of the Clerk of the Board, not when it is mailed.

(3) The terms ''petition'' and ''petitioner'' do not apply to FCIC cases.

(b) *Rule 2 (48 CFR 6101.2).* (1) Rule 2(a) (48 CFR 6101.2(a)) is replaced with the following for FCIC cases: A notice of appeal shall be in writing and shall be signed by the appellant or by the appellant's attorney or authorized representative. If the appeal is from a determination by the Deputy Administrator of Insurance Services regarding an action alleged not to be in accordance with the provisions of a Standard Reinsurance Agreement (or other reinsurance agreement), or if the appeal is from a determination by the Deputy Administrator of Compliance concerning a determination regarding a compliance matter, the notice of appeal should describe the determination in enough detail to enable the Board to differentiate that decision from any other; the appellant can satisfy this requirement by attaching to the notice of appeal a copy of the Deputy Administrator's determination. If an appeal is taken from the failure of the Deputy Administrator to make a timely determination, the notice of appeal should describe in detail the matter that the Deputy Administrator has failed to determine; the appellant can satisfy this requirement by attaching to the notice of appeal a copy of the written request for a determination it sent to the Deputy Administrator.

(2) In Rule 2(a) (48 CFR 6101.2(a)), the references to ''contracting officer'' are references to ''Deputy Administrator.''

(3) Rule 2(b) (48 CFR 6101.2(b)) does not apply to FCIC cases.

(4) In Rule 2(d)(1) (48 CFR 6101.2(d)(1)), an appeal from a determination of a Deputy Administrator shall be filed no later than 90 calendar days after the date the appellant receives that determination. The Board is authorized to resolve only those appeals that are timely filed.

(5) In Rule 2(d)(2) (48 CFR 6101.2(d)(2)), an appeal may be filed with the Board if the Deputy Administrator fails or refuses to issue a determination within 90 days after the appellant submits a request for a determination.

(c) *Rule 4 (48 CFR 6101.4).* (1) In Rule 4, the references to ''contracting officer'' are references to ''Deputy Administrator.''

(2) In Rule 4(a), paragraphs (1) through (7) (48 CFR 6101.4(a)(1) through (7)), describing materials included in the appeal file, are replaced by the following:

(i) The determination of the Deputy Administrator that is the subject of the dispute;

(ii) The reinsurance agreement (with amendments or modifications) at issue in the dispute;

(iii) Pertinent correspondence between the parties that is relevant to the dispute, including prior administrative determinations and related submissions;

(iv) Documents and other tangible materials on which the Deputy Administrator relied in making the underlying determination; and

(v) Any additional material pertinent to the authority of the Board or the resolution of the dispute.

(3) The following subsection is added to Rule 4 (48 CFR 6101.4): Media on which appeal file is to be submitted. All appeal file submissions, including the index, shall be submitted in two forms: Paper and in a text or .pdf format submitted on a compact disk. Each compact disk shall be labeled with the name and docket number of the case. The judge may delay the submission of the compact disk copy of the appeal file until the close of the evidentiary record.

(d) *Rule 5 (48 CFR 6101.5).* In Rule 5(a)(2) (48 CFR 6101.5(a)(2)), the references to ''contracting officer'' are references to ''Deputy Administrator.''

(e) *Rule 15 (48 CFR 6101.15).* In Rule 15(c) (48 CFR 6101.15(c)), the final sentence does not apply to FCIC cases.

(f) *Rule 16 (48 CFR 6101.16).* Rules 16 (b) through (h) (48 CFR 6101.16(b) through (h)) do not apply to FCIC cases. Instead, upon the written request of any party filed with the Office of the Clerk of the Board, or upon the initiative of a judge, a judge is authorized by delegation from the Secretary of Agriculture to request the appropriate United States Attorney to apply to the appropriate United States District Court for the issuance of subpoenas pursuant to 5 U.S.C. 304.

(g) *Rule 25 (48 CFR 6101.25).* In Rule 25(a) (48 CFR 6101.25(a)), the phrase, ''except as allowed by Rule 52,'' does not apply to FCIC cases.

(h) *Rule 32 (48 CFR 6101.32).* Rule 32 (a) through (c) (48 CFR 6101.32(a) through (c)) are replaced with the following for FCIC cases:

(1) *Finality of Board decision.* A decision of the Board is a final administrative decision.

(2) *Appeal permitted.* An appellant may file suit in the appropriate United States District Court to challenge the Board's decision. An appellant filing such a suit shall provide the Board with a copy of the complaint.

(i) *Rule 52 (48 CFR 6101.52).* Rule 52 does not apply to FCIC cases.

(j) *Rule 53 (48 CFR 6101.52).* Rule 53 does not apply to FCIC cases.

BILLING CODE 6820–AL–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 120815345–3525–02]

RIN 0648–XG420

Snapper-Grouper Fishery of the South Atlantic; 2018 Commercial Accountability Measure and Closure for the Other Jacks Complex

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements an accountability measure (AM) for the Other Jacks Complex commercial sector in the exclusive economic zone (EEZ) of the South Atlantic for the 2018 fishing year through this temporary rule. The Other Jacks Complex is composed of the lesser amberjack, almaco jack, and banded rudderfish. NMFS projects that commercial landings of the Other Jacks Complex will reach the combined commercial annual catch limit (ACL) by August 22, 2018. Therefore, NMFS closes the commercial sector for this complex in the South Atlantic EEZ, on August 22, 2018, and it will remain closed until the start of the next fishing year on January 1, 2019. This closure is

necessary to protect the lesser amberjack, almaco jack, and banded rudderfish resources.

DATES: This temporary rule is effective at 12:01 a.m., local time, on August 22, 2018, until 12:01 a.m., local time, on January 1, 2019.

FOR FURTHER INFORMATION CONTACT: Mary Vara, NMFS Southeast Regional Office, telephone: 727–824–5305, email: *mary.vara@noaa.gov.*

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery of the South Atlantic includes lesser amberjack, almaco jack, and banded rudderfish, which combined are the Other Jacks Complex. The Other Jacks Complex is managed under the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP). The FMP was prepared by the South Atlantic Fishery Management Council and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

The combined commercial ACL for the Other Jacks Complex is 189,422 lb (85,920 kg), round weight. Under 50 CFR 622.193(l)(1)(i), NMFS is required to close the commercial sector for the Other Jacks Complex when the commercial ACL has been reached, or is projected to be reached, by filing a notification to that effect with the Office of the Federal Register. NMFS has determined that the commercial sector for this complex is projected to reach its ACL by August 22, 2018. Therefore, this temporary rule implements an AM to close the commercial sector for the Other Jacks Complex in the South Atlantic, effective at 12:01 a.m., local time, on August 22, 2018.

The operator of a vessel with a valid commercial permit for South Atlantic snapper-grouper having lesser amberjack, almaco jack, or banded rudderfish on board must have landed and bartered, traded, or sold such species prior to 12:01 a.m., local time, on August 22, 2018. During the commercial closure, the recreational bag limit specified in 50 CFR 622.187(b)(8) and the possession limits specified in 50 CFR 622.187(c) apply to all harvest or possession of lesser amberjack, almaco jack, or banded rudderfish in or from the South Atlantic EEZ, while the recreational sector is open. These recreational bag and possession limits apply in the South Atlantic on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, regardless of whether such species were harvested in state or Federal waters. During the commercial closure, the sale or purchase of lesser amberjack, almaco jack, or banded rudderfish taken from the South Atlantic EEZ is prohibited.

Classification

The Regional Administrator for the NMFS Southeast Region has determined this temporary rule is necessary for the conservation and management of the fish in the Other Jacks Complex, a component of the South Atlantic snapper-grouper fishery, and is consistent with the Magnuson-Stevens Act and other applicable laws.

This action is taken under 50 CFR 622.193(l)(1)(i) and is exempt from review under Executive Order 12866.

These measures are exempt from the procedures of the Regulatory Flexibility Act because the temporary rule is issued without opportunity for prior notice and public comment.

This action responds to the best scientific information available. The Assistant Administrator for NOAA Fisheries (AA) finds that the need to immediately implement this action to close the commercial sector for the Other Jacks Complex constitutes good cause to waive the requirements to provide prior notice and opportunity for public comment pursuant to the authority set forth in 5 U.S.C. 553(b)(B), as such procedures are unnecessary and contrary to the public interest. Such procedures are unnecessary because the rule implementing the AM itself has been subject to notice and comment, and all that remains is to notify the public of the closure. Such procedures are contrary to the public interest because of the need to immediately implement this action to protect the species in the Other Jacks Complex, since the capacity of the fishing fleet allows for rapid harvest of the commercial ACL. Prior notice and opportunity for public comment would require time and would potentially result in a harvest well in excess of the established commercial ACL.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 13, 2018.

Margo B. Schulze-Haugen,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[Docket No. 170816769–8162–02]

RIN 0648–XG402

Fisheries of the Exclusive Economic Zone Off Alaska; Sablefish in the West Yakutat District of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting retention of sablefish by vessels using trawl gear in the West Yakutat District of the Gulf of Alaska (GOA). This action is necessary because the 2018 total allowable catch of sablefish allocated to vessels using trawl gear in the West Yakutat District of the GOA will be reached.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), August 14, 2018, through 2400 hours, A.l.t., December 31, 2018.

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2018 total allowable catch (TAC) of sablefish allocated to vessels using trawl gear in the West Yakutat District of the GOA is 240 metric tons (mt) as established by the final 2018 and 2019 harvest specifications for groundfish of the GOA (83 FR 8768, March 1, 2018).

In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2018 TAC of sablefish allocated to vessels using trawl gear in the West Yakutat District of the GOA will be reached. Therefore, NMFS is requiring that sablefish caught by vessels using trawl gear in the West Yakutat District of the GOA be treated as prohibited species in accordance with § 679.21(b).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay prohibiting the retention of sablefish by vessels using trawl gear in the West Yakutat District of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of August 13, 2018.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by §§ 679.20 and 679.21 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 14, 2018.

Margo B. Schulze-Haugen,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2018–17798 Filed 8–14–18; 4:15 pm]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 170816769–8162–02]

RIN 0648–XG400

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Ocean Perch in the West Yakutat District of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific ocean perch in the West Yakutat District of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2018 total allowable catch of Pacific ocean perch in the West Yakutat District of the GOA.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), August 14, 2018, through 2400 hours, A.l.t., December 31, 2018.

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2018 total allowable catch (TAC) of Pacific ocean perch in the West Yakutat District of the GOA is 3,371 metric tons (mt) as established by the final 2018 and 2019 harvest specifications for groundfish of the GOA (83 FR 8768, March 1, 2018).

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2018 TAC of Pacific ocean perch in the West Yakutat District of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 3,271 mt, and is setting aside the remaining 100 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific ocean perch in the West Yakutat District of the GOA. While this closure remains effective the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the closure of directed fishing for Pacific ocean perch in the West Yakutat District of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of August 13, 2018.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 14, 2018.

RIN 2120–AA66

Proposed Amendment of VOR Federal Airways V–18, V–102, and V–278 in the Vicinity of Guthrie, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend VHF Omnidirectional Range (VOR) Federal airways V–18, V–102, and V–278 in the vicinity of Guthrie, TX. The modifications are necessary due to the planned decommissioning of the Guthrie, TX, VOR/Tactical Air Navigation (VORTAC) navigation aid (NAVAID), which provides navigation guidance for portions of the affected air traffic service (ATS) routes. The Guthrie VORTAC is being decommissioned as part of the FAA's VOR Minimum Operational Network (MON) program.

DATES: Comments must be received on or before October 1, 2018.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: (800) 647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2018–0769; Airspace Docket No. 18–ASW–10 at the beginning of your comments. You may also submit comments through the internet at *http://www.regulations.gov.*

FAA Order 7400.11B, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *http://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11B at NARA, call (202) 741–6030, or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Airspace Policy Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2018–0769; Airspace Docket No. 18–ASW–10) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at *http://www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2018–0769; Airspace Docket No. 18–ASW–10.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *http://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *http://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Operations Support Group, Central Service Center, Federal Aviation Administration, 10101 Hillwood Blvd., Fort Worth, TX 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11B, Airspace Designations and Reporting Points, dated August 3, 2017, and effective September 15, 2017. FAA Order

7400.11B is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11B lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

The FAA is planning decommissioning activities for the Guthrie, TX, VORTAC in 2019 as one of the candidate VORs identified for discontinuance by the FAA's VOR MON program and listed in the final policy statement notice, ''Provision of Navigation Services for the Next Generation Air Transportation System (NextGen) Transition to Performance-Based Navigation (PBN) (Plan for Establishing a VOR Minimum Operational Network),'' published in the **Federal Register** of July 26, 2016 (81 FR 48694), Docket No. FAA–2011–1082. Although the VOR portion of the Guthrie, TX, VORTAC NAVAID is planned for decommissioning, the Distance Measuring Equipment (DME) portion is being retained. The ATS routes effected by the Guthrie VORTAC are VOR Federal airways V–18, V–102, and V–278.

With the planned decommissioning of the Guthrie VORTAC, the remaining ground-based NAVAID coverage in the area is insufficient to enable the continuity of the affected airways. As such, proposed modifications to V–18, V–102, and V–278 would result in gaps in the route structures. To overcome the gaps, instrument flight rules (IFR) traffic could use adjacent VOR Federal airways V–14 and V–114 between the Lubbock, TX, VORTAC and Wichita Falls, TX, VORTAC; Federal airways V–14, V–114, and V–355 between the Lubbock, TX, VORTAC and Bowie, TX, VORTAC; or Federal airways V–62 and V–66 between the Lubbock, TX, VORTAC and Millsap, TX, VORTAC to circumnavigate the affected area. Additionally, IFR traffic could file point to point through the affected area using fixes that will remain in place, or receive air traffic control (ATC) radar vectors through the area. Visual flight rules pilots who elect to navigate via the airways through the affected area could also take advantage of the adjacent VOR Federal airways or ATC services listed previously.

The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 by modifying VOR Federal airways V–18, V–102, and V–278. The planned decommissioning of the Guthrie, TX, VORTAC has made these actions necessary. The proposed VOR Federal airway changes are outlined below.

V–18: V–18 currently extends between the Guthrie, TX, VORTAC and the Charleston, SC, VORTAC. The FAA proposes to remove the airway segment between the Guthrie, TX, VORTAC and the Millsap, TX, VORTAC. The unaffected portions of the existing airway would remain as charted.

V–102: V–102 currently extends between the Salt Flat, TX, VORTAC and the Wichita Falls, TX, VORTAC. The FAA proposes to remove the airway segment between the Lubbock, TX, VORTAC and the Wichita Falls, TX, VORTAC. The unaffected portions of the existing airway would remain as charted.

V–278: V–278 currently extends between the Texico, NM, VORTAC and the Vulcan, AL, VORTAC. The FAA proposes to remove the airway segment between the Plainview, TX, VOR/DME and the Bowie, TX, VORTAC. The unaffected portions of the existing airway would remain as charted.

VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.11B dated August 3, 2017, and effective September 15, 2017, which is incorporated by reference in 14 CFR 71.1. The VOR Federal airways listed in this document would be subsequently published in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11B, Airspace Designations and Reporting Points, dated August 3, 2017 and effective September 15, 2017, is amended as follows:

Paragraph 6010(a) Domestic VOR Federal Airways.

* * * * *

V–18 [Amended]

From Millsap, TX; Glen Rose, TX; Cedar Creek, TX; Quitman, TX; Belcher, LA; Monroe, LA; Magnolia, MS; Meridian, MS; Crimson, AL; Vulcan, AL; Talladega, AL; Atlanta, GA; Colliers, SC; to Charleston, SC.

* * * * *

V–102 [Amended]

21 CFR Parts 876, 878, and 886

[Docket No. FDA–2018–N–3066]

Medical Devices; Classification of Accessories Distinct From Other Devices; Proposed List of Accessories Suitable for Class I; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification; request for comments.

SUMMARY: As required by the FDA Reauthorization Act of 2017 (FDARA), the Food and Drug Administration (FDA or Agency) has identified a list of accessories for which the Agency believes general controls alone are sufficient to provide reasonable assurance of safety and effectiveness, so the accessories could be in class I. FDA is publishing this document proposing to classify these accessories into class I and distinct from other devices, as well as seek public comment in accordance with procedures established by FDARA. This document does not represent FDA's final determination with respect to the proposed accessories listed in this document.

DATES: Submit either electronic or written comments on the document by October 16, 2018.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before October 16, 2018 The *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of October 16, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–3066 for ''Medical Devices; Classification of Accessories Distinct from Other Devices; Proposed List of Accessories Suitable for Class I; Request for Comments.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Ian Ostermiller, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5454, Silver Spring, MD 20993–0002, 301–796–5678.

SUPPLEMENTARY INFORMATION:

I. Background

On August 18, 2017, FDARA was signed into law (Pub. L. 115–52). Section 707 of FDARA amended section 513(f) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) and, among other amendments, created a process for FDA to propose a list of accessories suitable for distinct classification into class I (see section 513(f)(6)(D)(i) of the FD&C Act (21 U.S.C. 360c(f)(6)(D)(i))). Section 707 of FDARA mandated that FDA make the first such proposal within a year of enactment of FDARA, and FDA is publishing this document in accordance with this statutory mandate.

Section 201(h) of the FD&C Act defines ''device'' to include, among other articles, an ''accessory'' (see 21 U.S.C. 321(h)). As such, all articles that meet the definition of ''device'', including accessories, are regulated under the FD&C Act. Based on sections 201(h) and 513(f)(6) of the FD&C Act, we have described our current thinking on which devices we would generally consider to be accessories in the guidance document, ''Medical Device Accessories—Describing Accessories and Classification Pathways,'' available at *https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/UCM429672* (''Accessories Guidance''). That

guidance defines an accessory as a ''finished device that is intended to support, supplement, and/or augment the performance of one or more parent devices.''

Section 513 of the FD&C Act defines three classes of devices, reflecting the regulatory controls needed to provide reasonable assurance of their safety and effectiveness. The three classes of devices are class I (general controls), class II (special controls), and class III (premarket approval). Some accessories may be granted marketing authorization as part of a submission for another device with which they are intended to be used and in class II or III that, if considered distinctly from another device (such as the parent device), may be suitable for classification into class I if general controls alone are sufficient to provide a reasonable assurance of safety and effectiveness of the accessory.

Section 513(h)(1) defines general controls as the controls authorized by or under sections 501, 502, 510, 516, 518, 519, and 520 of the FD&C Act. These controls include, but are not limited to, provisions related to adulteration and misbranding, registration and listing, records and reports on devices, and good manufacturing practices. The regulations for good manufacturing practices are under 21 CFR part 820, the Quality System regulation. Subject to the exceptions identified in § 820.30(a)(2) (21 CFR 820.30(a)(2)) for specific devices and those automated with computer software, design controls under § 820.30 do not generally apply to a class I device.

This document represents FDA's compliance with FDARA's requirement to identify the first list of accessories suitable for distinct classification into class I. As required by FDARA, we are providing you with the opportunity to provide comment. Once the comment period ends, we will consider the comments and publish in the **Federal Register** a final action classifying such suitable accessories into class I.

II. Factors for Consideration

The classification of each accessory will be based on the risks of the accessory when used as intended and the level of regulatory controls necessary to provide a reasonable assurance of safety and effectiveness of the accessory, notwithstanding the classification of any other device with which such accessory is intended to be used (see section 513(f)(6)(A) of the FD&C Act).

In general, we considered an accessory to be eligible for classification into class I distinct from another device if the accessory: (1) Is not for use in supporting or sustaining human life, or of substantial importance in preventing impairment to human health; (2) does not represent a potential unreasonable risk of illness or injury; and (3) general controls alone would be sufficient to provide a reasonable assurance of safety and effectiveness of the accessory.

Note that by regulation, design controls apply to class I devices only if the devices are automated with computer software or are listed under § 820.30(a)(2)(ii). Thus, if an accessory is not automated with computer software but would require design controls to provide reasonable assurance of safety and effectiveness, we did not consider it eligible for classification through the final action based on this document.

You may wish to propose additional accessories as suitable for distinct classification into class I using the factors described above where the accessories are otherwise eligible for classification under section 513(f)(6)(D)(i) of the FD&C Act. Should you wish to propose additional accessories, your comment should briefly explain why you think general controls alone will provide reasonable assurance of safety and effectiveness. Conversely, should you disagree with any of the proposed accessories for class I, your comments should briefly explain why additional regulatory controls, such as premarket review through a 510(k) submission or premarket approval (PMA), are necessary to provide reasonable assurance of safety and effectiveness.

III. Policy Clarification for Classification of Certain Accessories Used in Orthopedic Surgery

Certain manual orthopedic instruments that are for use with other devices in orthopedic surgery meet FDA's definition of an accessory described in the Accessories Guidance. Accordingly, we are clarifying our intended regulatory approach for certain accessories used in orthopedic surgery to distinguish which accessories may be candidates for classification per section 513(f)(6)(D)(i) of the FD&C Act.

Instruments for use in orthopedic surgery vary widely from general manual surgical instruments used to manipulate tissue to more complex accessories specifically designed for use with a parent device/system. Orthopedic manual surgical instruments are classified in § 888.4540 (21 CFR 888.4540), and many ''general use'' instruments fall within this classification. This regulation pertains to ''nonpowered hand-held device[s] intended for medical purposes to manipulate tissue, or for use with other devices in orthopedic surgery.'' These devices are class I, subject to general controls, and exempt from premarket notification procedures, subject to the limitations of exemptions in 21 CFR 888.9. This classification was based upon recommendations provided to FDA by the Orthopedic Device Classification Panel (the Panel) in October 1977 regarding classification of medical devices in commercial distribution before May 28, 1976. The Panel identified the following risks to health for this device type: ''Tissue damage and adverse tissue reaction: Inadequate mechanical properties, such as lack of material strength of the device, may result in device fracture and possible tissue damage and, if fragments of the fractured device remain in the tissue, an adverse tissue reaction may result'' (47 FR 29052).

FDA agreed that class I was appropriate because general controls alone were sufficient to mitigate the risk of tissue damage and adverse tissue reaction associated with inadequate mechanical properties and provide a reasonable assurance of the safety and effectiveness of these devices. Over time, manufacturers have developed and sought to market orthopedic instrumentation with designs unique to a device system, and these types of instruments may present new or different risks compared to inadequate mechanical properties. For example, certain device-specific instruments are accessories and require precise technical specifications or design characteristics to function as intended to support, supplement or augment the parent device, and if not designed appropriately, could cause implant malpositioning or migration. Accordingly, FDA considers design controls (see § 820.30) to be an important element in the regulation of device-specific accessories, among other regulatory controls, to ensure appropriate compatibility between the accessory and the parent device. In contrast, class I orthopedic manual surgical instruments do not require such controls.

Instruments that are ''device-specific,'' or designed for use with a specific parent device/system and thus are accessories, have historically been reviewed in the same premarket submission as the parent device. In an effort to ensure a common understanding as to which orthopedic accessories fall under the existing class I regulation (§ 888.4540), and which devices do not and, therefore, may be candidates for classification under section 513(f)(6)(D)(i) of the FD&C Act,

we propose the following definition: A device-specific orthopedic instrument is considered to be an accessory designed specifically for appropriate implantation or placement of the parent device, based upon unique dimensions, geometry, and/or deployment. In these cases, design specifications are critical to the proper use of the accessory in supporting, supplementing, and/or augmenting the performance of the parent device and/or a specific system. This excludes general use orthopedic instruments that are provided as a part of a system.

It is often necessary for orthopedic instruments to be described in a premarket submission (*e.g.,* 510(k), PMA) to evaluate that the parent device functions as intended. Such orthopedic instruments may be appropriately classified in an existing class I regulation (§ 888.4540) if they do not meet the definition of a device-specific orthopedic accessory above and their risk profile and necessary regulatory controls are commensurate with that of orthopedic manual surgical instruments. If they do meet the definition of a device-specific orthopedic accessory above, then such orthopedic accessories may still be eligible for classification under section 513(f)(6)(D)(ii) of the FD&C Act.

We welcome comments to help identify accessories in other product areas where the classification of the accessory relative to the parent device may be unclear and would benefit from this type of policy clarification.

IV. Proposed List of Accessories That May Be Suitable for Distinct Classification Into Class I

We are proposing the following accessories, which have been granted marketing authorization as part of a premarket submission (*i.e.,* 510(k), De Novo classification request, or PMA) for another device with which they are intended to be used, as suitable for distinct classification into class I (see Table 1). When we publish the final list of accessories based on this list and the factors in section II, we will consider those accessories classified into class I, distinct from other devices, through such action.

We would place each of these accessories in 21 CFR part 876, 878, or 886, as appropriate. Each of these accessories would be class I, exempt from the premarket notification procedures in 21 CFR part 807, subject to the applicable limitations of exemption (*i.e.,* 21 CFR 876.9, 878.9, or 886.9). We intend to make conforming changes to existing classification regulations as appropriate.

TABLE 1—PROPOSED ACCESSORIES FOR CLASSIFICATION INTO CLASS I AND DISTINCT FROM OTHER DEVICES

Current status of accessory		Proposed device type identification
Current classification regulation (21 CFR)	Device type (existing product code)	
876.1075	Gastroenterology-urology accessories to a biopsy instrument (FCG).	Accessories used to remove a specimen of tissue for microscopic examination by cutting or aspiration. This generic type of device includes a syringe for specimen aspiration and a biopsy channel adaptor. This device does not include accessories to biopsy instruments used in other medical specialty areas.
876.3350 and 876.3630	Penile implant surgical accessories (JCW and FHW).	Manual devices designed to be used for surgical procedures associated with the implantation of a penile inflatable implant or penile rigidity implant. This generic type of device includes the cylinder sizer, cylinder insertion tool, connector assembly tool, incision closing tool, corporeal dilator, tubing passer, measurement tool or tape, temporary tubing plug, and hemostat shod tubing.
876.4620	Ureteral stent accessories (FAD) ..	Accessories that aid in the insertion of the ureteral stent that is placed into the ureter to provide ureteral rigidity and allow the passage of urine. This generic type of device includes the stent positioner, wire guide, and pigtail straightener.
876.5010	Biliary stent, drain, and dilator accessories (FGE).	Manual devices that aid in the introduction and connection of biliary stents, drains, or dilators. This generic type of device includes the guiding catheter, pushing catheter, pigtail straightener, flap protector, nasal transfer tube, and drainage connecting tube.
876.5090	Suprapubic catheter accessories (KOB).	Manual devices that are used to facilitate the placement of a suprapubic catheter. This generic type of device includes the introducer, access dilator, and peel-away sheath.
876.5280	Implanted mechanical/hydraulic urinary continence device surgical accessories (EZY).	Manual devices designed to be used for surgical procedures associated with the implantation of an implanted mechanical/hydraulic urinary continence device. This generic type of device includes the measurement tool or tape, connector assembly tool, temporary tubing plug, incision closing tool, tubing passer, and hemostat shod tubing.
878.5070	Air-handling apparatus accessory (FYD).	Supplementary device that is intended to be used with an air-handling apparatus for a surgical operating room. This device provides an interface between the components of the device or can be used to switch electrical power. This generic type of device includes fittings, adapters, couplers, remote switches, and footswitches.
No corresponding CFR Section	Corneal inlay inserter handle (LQE).	Hand-held device intended to be used as an accessory to a corneal inlay inserter. The device extends the length of the inlay inserter to aid in delivering the inlay implant.

Proposed Removal of Temporary Regulations on a Partner's Share of a Partnership Liability for Disguised Sale Purposes; Hearing Cancellation

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Cancellation of notice of public hearing on proposed rulemaking.

SUMMARY: This document cancels a public hearing on proposed regulations concerning how partnership liabilities are allocated for disguised sale purposes.

DATES: The public hearing, originally scheduled for August 21, 2018 at 10:00 a.m. is cancelled.

FOR FURTHER INFORMATION CONTACT: Regina Johnson of the Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel (Procedure and Administration) at (202) 317–6901 (not a toll-free number).

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking and notice of public hearing that appeared in the **Federal Register** on Tuesday, June 19, 2018 (83 FR 28397) announced that a public hearing was scheduled for August 21, 2018 at 10:00 a.m. in the IRS Auditorium, Internal Revenue Service Building, 1111 Constitution Avenue NW, Washington, DC. The subject of the public hearing is under section 707 of the Internal Revenue Code.

The public comment period for these regulations expired on July 19, 2018. The notice of proposed rulemaking and notice of hearing instructed those interested in testifying at the public hearing to submit a request to speak and an outline of the topics to be discussed. The outline of topics to be discussed was due by August 3, 2018. As of August 3, 2018, no one has requested to speak. Therefore, the public hearing scheduled for August 21, 2018 at 10:00 a.m. is cancelled.

Martin V. Franks,

Branch Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel (Procedure and Administration).

TRICARE; Extended Care Health Option (ECHO) Respite Care

AGENCY: Office of the Secretary, Department of Defense (DoD).

ACTION: Proposed rule.

SUMMARY: This proposed rule requests public comment on a proposed revision to the TRICARE Extended Care Health Option (ECHO) respite care benefit. Under the current program, TRICARE beneficiaries enrolled in ECHO are eligible for 16 hours of respite care per month in any month during which the beneficiary receives another ECHO authorized benefit (other than the EHHC benefit). This proposed rule seeks to eliminate the concurrent ECHO benefit requirement and allow beneficiaries enrolled in ECHO to receive a maximum of 16 hours of respite care per month, regardless of whether another ECHO benefit is received in the same month.

DATES: Written comments received at the address indicated below by October 16, 2018 will be accepted.

ADDRESSES: You may submit comments, identified by docket number or Regulatory Information Number (RIN) and title, by either of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Department of Defense, Office of the Deputy Chief Management Officer, Directorate for Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name and docket number or RIN for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Ms. Trish Reilly, Defense Health Agency, TRICARE Clinical Policy Division, telephone (619) 236–5332.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose of the Proposed Rule

This proposed rule seeks to amend the TRICARE ECHO program regulation to expand beneficiary access to ECHO respite care services. This proposed rule, if implemented, would eliminate the concurrent ECHO benefit requirement and allow beneficiaries enrolled in ECHO to receive a maximum of 16 hours of respite care per month, regardless of whether another ECHO benefit is received in the same month.

This regulation is proposed under the authority of 5 U.S.C. 301 which allows

the Secretary of Defense to prescribe regulations for the government of DoD and 10 U.S.C. 1079(d) and (e), which directs the Secretary of Defense to establish a program to provide extended benefits for eligible active duty dependents, which may include the provision of comprehensive health care services, including case management services, to assist in the reduction of the disabling effects of a qualifying condition of an eligible dependent. The Department is authorized to provide ''respite care for the primary caregiver of the eligible dependent'' as one of the specifically enumerated extended benefits under the ECHO program pursuant to 10 U.S.C. 1079(e)(6). The ECHO program has been implemented through regulation at 32 CFR 199.5.

B. Summary of the Major Provisions of the Proposed Rule

Per 32 CFR 199.5(c)(7), ECHO beneficiaries are eligible for a maximum of 16 hours of respite care per month in any month during which the beneficiary otherwise receives an ECHO benefit(s). This requirement for a concurrent ECHO benefit was originally implemented to ensure optimal medical management of the beneficiary's ECHO-qualifying condition. TRICARE proposes to eliminate the requirement for a beneficiary to receive a concurrent ECHO benefit in order to qualify for respite care. This change will expand access to respite care services (as recommended by the Military Compensation and Retirement Modernization Commission (MCRMC)), allowing families to access those hours without receiving another ECHO benefit during the same month the respite care is received.

C. Expected Costs

The proposed rule is estimated to cost the Department of Defense $5.7 million annually (based on FY17 data). If the proposed rule is implemented, it is anticipated that 2,924 ECHO beneficiaries will participate in the respite care program at an average cost of $1,937 per beneficiary (this number does not include homebound beneficiaries who receive respite care under the ECHO Home Health Care (EHHC) program). These beneficiaries are already in ECHO and, therefore, have completed all registration requirements. This expansion of the benefit requires nothing additional from the beneficiaries and will not result in an increased burden to the public. Currently, beneficiaries may not access ECHO respite care services if they are not utilizing another ECHO benefit during the same month, and this rulemaking action will eliminate this barrier to care.

II. Discussion of the Proposed Rule

A. Background

Military families face unique challenges in caring for family members with special medical or educational needs that are complicated by frequent moves and repeated deployments. Support for these families involves a multi-faceted system coordinated across numerous functional areas within the Department of Defense and Military Services to include: The Military Health System (MHS); military personnel support services; housing programs; dependents' education programs; child and youth services; morale, welfare, and recreation activities; and community support activities, among others.

The Exceptional Family Member Program (EFMP) is designed to identify active duty military family members with special medical and/or educational needs to ensure coordination of care and continuity of benefits throughout the military assignment and relocation process. EFMP provides additional support to these active duty military families to alleviate some of the challenges associated with frequent family relocations and deployments of their sponsoring service member as required by military duties. EFMP family support services have traditionally included respite care provided by certified day care providers in order to provide temporary relief to military family members who are responsible for the regular care of dependent family members with special needs. The Office of the Under Secretary of Defense for Personnel and Readiness published a proposed rule entitled ''Exceptional Family Member Program (EFMP)'' in the **Federal Register** (80 FR 76881–76889) on December 11, 2015, that provides additional details. The Assistant Secretary of Defense for Health Affairs is tasked with advising on the availability of specialized medical services to families with special needs in the Military Health System and ensuring there is a medical case management program to support eligible beneficiaries' medical needs.

Active Duty families enrolled in EFMP may be eligible, based on qualifying conditions, for TRICARE Extended Health Care Option (ECHO) expanded benefits. ECHO is a supplemental program to the TRICARE Basic Program that provides eligible Active Duty Family Members extended benefits to include comprehensive health care services (including services necessary to maintain, or minimize or prevent deterioration of function of the patient) and case management services with respect to the qualifying condition which include serious physical disabilities and extraordinary physical or psychological conditions as defined in 32 CFR 199.2. The purpose of ECHO is to provide an additional financial resource for an integrated set of services and supplies designed to assist in the reduction of the disabling effects of the beneficiary's qualifying condition. The ECHO program provides coverage for medical, habilitative, and rehabilitative services and supplies not covered under the TRICARE Basic Program; durable medical equipment, including adaptation and maintenance; assistive technologies devices and training to use the devices; comprehensive home health care services (*e.g.*, ventilator support, medication administration); and other services to support eligible family members.

The final rule implementing the ECHO Program (which was previously called the Program for Persons with Disabilities (PFPWD) from 1997–2004, and before that the Program for the Handicapped (PFTH) from origination in 1966–1997), amended the TRICARE regulations governing the PFPWD and was published in the **Federal Register** (69 FR 44947) on July 28, 2004.

ECHO-registered beneficiaries who are not receiving ECHO Home Health Care (EHHC) services currently are eligible to receive a maximum of 16 hours of respite care in any calendar month in which they also receive any other ECHO authorized benefit other than the EHHC benefit. Respite care consists of providing skilled and non-skilled health care services for the covered beneficiary such that in the absence of the primary caregiver, management of the beneficiary's ECHO qualifying condition and safety are provided. In order to assure the quality of care for beneficiaries enrolled in ECHO, all ECHO respite care services must be provided by Medicare or Medicaid certified Home Health Agencies (HHAs) who have in effect at the time of services a valid agreement to participate in the TRICARE program. The ECHO respite care program (which provides health care services by a home health agency) should not be considered a substitute for EFMP respite care (which provides day care services by a certified day care provider), because not all EFMP family members qualify for ECHO or require specific health care services in the absence of the primary caregiver. The goal is to ensure that these families have access to the appropriate services to meet their specific needs while still ensuring

fiscally prudent expenditures of appropriated funds.

In addition to EFMP respite care and ECHO respite care, there is a third type of respite care, EHHC respite care. The EHHC benefit provides coverage of home health care services and respite care services for ECHO eligible beneficiaries who require more than intermittent or part-time home health services covered under the TRICARE Basic Program. This would include ventilator-dependent beneficiaries and others with extraordinary physical conditions. EHHC beneficiaries whose plan of care includes frequent interventions by the primary caregiver(s) (*e.g.,* frequent suctioning, tube feeding, medication administration etc.) are eligible for respite services under EHHC in lieu of the ECHO general respite benefit. EHHC respite care may include a maximum of 8 hours per day, 5 days per week, by a TRICARE-authorized home health agency. The Department is not proposing any changes to the robust EHHC respite care benefit as part of this proposed rule, but includes a description of the program in order to clarify the full spectrum of respite care programs available to active duty military families with special needs.

B. Proposed Change to the ECHO Respite Care Benefit

The Department of Defense remains committed to supporting Service members and their family members with special needs. Together, the Office of Community Support for Military Families with Special Needs, the Services, and the MHS, are working to enhance and improve support for these families, including everything from complex medical management to non-clinical case management and family support services. The Department is also committed to eliminating unnecessary requirements that act as barriers to care. Consistent with these principles, the Department is proposing this specific amendment to the existing regulations governing the ECHO program.

The requirement to receive a concurrent ECHO benefit in order to be entitled to ECHO respite care was originally imposed as a medical management tool. We now conclude that this specific requirement is no longer necessary and may serve as an inappropriate barrier to receipt of respite services for some families. Even in those months where no other ECHO services are provided (where all needed care may already be covered under the Basic Program or under demonstration authority), there may still be some health care services rendered to the beneficiary enrolled in ECHO by the primary caregiver for which respite care provided by a home health agency is warranted.

We note that the January 2015 Report of the MCRMC cited a need to improve support for military members with special needs dependents and made a number of recommendations. We have already implemented or are taking steps to implement several of their specific recommendations, including the recommendation to allow families to access ECHO respite care without receiving another ECHO benefit during the same month that respite care is received which is proposed in this rule. The Department is still studying some of the other recommendations that were made in order to identify and implement, as appropriate, ECHO enhancements that will be of greatest benefit to our beneficiaries. Finally, we believe some of the recommendations fall outside the purview of the ECHO program specifically, and the Military Health System in general, and are more appropriately directed to the Office of Community Support for Military Families with Special Needs, including the provision of respite care that does not involve health care services (*i.e.,* EFMP respite).

We propose that elimination of the requirement for a simultaneous ECHO benefit will provide maximum flexibility to families without sacrificing the goal of ensuring the safe and effective management of the beneficiary's ECHO qualifying condition. First, we note that TRICARE beneficiaries with complex medical needs may receive case management services including medical management, disease management and chronic care coordination, under the TRICARE Basic Program, regardless of whether the beneficiary is an ECHO eligible beneficiary. As the TRICARE program has evolved over time, continuing to require an ECHO eligible beneficiary to receive a concurrent ECHO benefit as a medical management tool is no longer necessary. Based on our current program structure, beneficiaries should already be receiving medical management services and the receipt of any ECHO benefit, including ECHO respite care, provides an additional opportunity to ensure the safe and effective management of the beneficiary's qualifying condition. Furthermore, in accordance with 32 CFR 199.5(h)(3), all ECHO benefits, including ECHO respite care, require authorization prior to receipt of such benefits. Paragraph (i) discusses required documentation as a prerequisite to authorizing ECHO benefits. As a practical matter, the home health agency providing the respite services must document the health care services needed by the ECHO beneficiary in the absence of the family caregiver and the schedule for the services during the provision of respite care in order to ensure an appropriately trained provider is sent and the beneficiary's needs are met. If this regulatory change is enacted, after public comment, additional details regarding required documentation to be provided to the Managed Care Support Contractor and home health agency for authorization of ECHO respite services will be published in the TRICARE Policy Manual available at *http://manuals.tricare.osd.mil.* We believe that this approach will provide greater flexibility and eliminate unnecessary barriers for families to access to ECHO respite care services while still ensuring the safe and effective medical management of the beneficiary's medical condition(s).

III. Regulatory Procedures

Executive Order 12866, ''Regulatory Planning and Review'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. A regulatory impact analysis must be prepared for major rules with economically significant effects ($100 million or more in any one year). This rulemaking is neither ''economically significant'' as measured by the $100 million threshold, nor is it otherwise significant.

Executive Order 13771, ''Reducing Regulation and Controlling Regulatory Costs''

This proposed rule is not expected to be an E.O. 13771 regulatory action because it is not significant under E.O. 12866.

Congressional Review Act, 5 U.S.C. 804(2)

Under the Congressional Review Act, a major rule may not take effect until at least 60 days after submission to Congress of a report regarding the rule.

A major rule is one that would have an annual effect on the economy of $100 million or more or have certain other impacts. This proposed rule is not a major rule under the Congressional Review Act.

Public Law 96–354, ''Regulatory Flexibility Act'' (RFA), (Title 5, U.S.C., Sec. 601)

The Regulatory Flexibility Act requires that each Federal agency analyze options for regulatory relief of small businesses if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. This proposed rule is not an economically significant regulatory action, and it will not have a significant impact on a substantial number of small entities. Therefore, this rule is not subject to the requirements of the RFA.

Public Law 104–4, Sec. 202, ''Unfunded Mandates Reform Act''

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any one year of $100 million in 1995 dollars, updated annually for inflation. That threshold level is currently approximately $140 million. This final rule will not mandate any requirements for state, local, or tribal governments or the private sector.

Public Law 96–511, ''Paperwork Reduction Act'' (Title 44, U.S.C., Chapter 35)

This rule will not impose significant additional information collection requirements on the public under the Paperwork Reduction Act of 1995 (44 U.S.C. 3502–3511). Existing information collection requirements of the TRICARE and Medicare programs will be utilized. TRICARE ECHO respite care providers will be coding and filing claims in the same manner as they currently are with TRICARE.

Executive Order 13132, ''Federalism''

This rule has been examined for its impact under E.O. 13132, and it does not contain policies that have federalism implications that would have substantial direct effects on the States, on the relationship between the national Government and the States, or on the distribution of powers and responsibilities among the various levels of Government. Therefore, consultation with State and local officials is not required.

List of Subjects in 32 CFR Part 199

Claims, Dental health, Health care, Health insurance, Individuals with disabilities, Military personnel.

Accordingly, 32 CFR part 199 is proposed to be amended as follows:

PART 199—CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES (CHAMPUS)

■ 1. The authority citation for part 199 continues to read as follows:

Authority: 5 U.S.C. 301; 10 U.S.C. chapter 55.

■ 2. Revise § 199.5(c)(7) introductory text to read as follows:

§ 199.5 TRICARE Extended Care Health Option (ECHO).

* * * * *

(c) * * *

(7) *Respite care.* TRICARE beneficiaries enrolled in ECHO are eligible for a maximum of 16 hours of respite care per month. Respite care in defined is § 199.2. Respite care services will be provided by a TRICARE-authorized home health agency and will be designed to provide health care services for the covered beneficiary, and not baby-sitting or child-care services for other members of the family. The benefit will not be cumulative, that is, any respite hours not used in one month will not be carried over or banked for use on another occasion.

Coast Guard

33 CFR Part 100

[Docket Number USCG–2018–0577]

RIN 1625–AA08

Special Local Regulation; Choptank River, Talbot and Dorchester Counties, MD

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish special local regulations for certain navigable waters of the Choptank River. This action is necessary to provide for the safety of life on these waters near Oxford, MD, from October 7, 2018, through October 15, 2018, during a sailboat regatta. This proposed rule would prohibit persons and vessels from being in the regulated area unless authorized by the Captain of the Port Maryland-National Capital Region or the Coast Guard Patrol Commander. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before September 17, 2018.

ADDRESSES: You may submit comments identified by docket number USCG–2018–0577 using the Federal eRulemaking Portal at *http://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Mr. Ronald Houck, U.S. Coast Guard Sector Maryland-National Capital Region; telephone 410–576–2674, email *Ronald.L.Houck@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
PATCOM Patrol Commander
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

On February 13, 2018, the Tred Avon Yacht Club of Oxford, MD, notified the Coast Guard through submission of a marine event application that it is planning to conduct a sailboat regatta from October 5, 2018, through October 15, 2018, the 2018 Star World Championship. Race activities on navigable waters are planned each afternoon of the regatta beginning on October 7th. The regatta consists of approximately 100 2-person, 23-foot long International Star Class sailboats. These vessels will operate along a designated and marked 2.5 nautical mile long course. The course is located on the Choptank River, in Talbot and Dorchester Counties, near Oxford, MD. Hazards from the sailboat regatta include participants operating within and adjacent to a designated navigation channel and interfering with vessels intending to operate within that channel, as well as injury to persons and damage to property that involve

vessel mishaps during sailboat regattas conducted on navigable waters. The Captain of the Port Maryland-National Capital Region (COTP) has determined that potential hazards associated with the sailboat regatta would be a safety concern for anyone intending to operate in or near the race area.

The purpose of this rulemaking is to protect event participants, spectators, and transiting vessels on waters in and near the race area before, during, and after the scheduled event. The Coast Guard proposes this rulemaking under authority in 33 U.S.C. 1233, which authorizes the Coast Guard to establish special local regulations to promote the safety of life on navigable waters during regattas or marine parades.

III. Discussion of Proposed Rule

The COTP Maryland-National Capital Region is proposing to establish special local regulations that would be enforced from 11:30 a.m. until 5:30 p.m., each day, from October 7, 2018, through October 15, 2018. The proposed regulated area is rectangular in shape, measuring approximately six nautical miles in length by four nautical miles in width. The area would cover all navigable waters of the Choptank River, within an area bounded by the following coordinates: commencing at latitude 38°41′39.02″ N, longitude 076°11′19.18″ W, thence south to latitude 38°37′28.68″ N, longitude 076°11′19.18″ W, thence west to latitude 38°37′28.68″ N, longitude 076°18′18.35″ W, thence north to latitude 38°41′39027″ N, longitude 076°18′18.35″ W, thence east to point of origin, located near Oxford, MD.

This proposed rule provides additional information about an area within the regulated area, the ''Race Area'', and its definition.

The proposed duration of the special local regulations and size of the regulated area are intended to ensure the safety of life on these navigable waters before, during, and after races, scheduled from noon until 5 p.m. on October 7, 8, 9, 10, 11, 12, 13, 14, and 15, 2018. The COTP and PATCOM would have authority to forbid and control the movement of vessels and persons, including event participants, in the regulated area. When hailed or signaled by an official patrol, a vessel or person in the regulated area would be required to immediately comply with directions given by the COTP or PATCOM. If a person or vessel fails to follow such directions, the Coast Guard may expel them from the area, issue them a citation for failure to comply, or both.

Except for 2018 Star World Championship participants, a vessel or person would be required to get permission from the COTP or PATCOM before entering the regulated area. Vessel operators can request permission to enter and transit through the regulated area by contacting the PATCOM on VHF–FM channel 16. Vessel traffic would be able to safely transit the regulated area once the PATCOM deems it safe to do so. A person or vessel not registered with the event sponsor as a participant or assigned as official patrols would be considered a spectator. Official Patrols are any vessel assigned or approved by the Commander, Coast Guard Sector Maryland-National Capital Region with a commissioned, warrant, or petty officer on board and displaying a Coast Guard ensign.

If permission is granted permission by the COTP or PATCOM, a person or vessel would be allowed to enter the regulated area or pass directly through the regulated area as instructed. Vessels would be required to operate at a safe speed that minimizes wake while within the regulated area. Official patrol vessels will direct spectator vessels while within the regulated area. Vessels would be prohibited from loitering within the navigable channel.

The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, duration and location of the regulated area. Vessel traffic would be able to safely transit around this regulated area, which would impact a small designated area of the Choptank River for 54 hours. The Coast Guard would issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the status of the regulated area. Moreover, the rule would allow vessels to seek permission to enter the regulated area, and vessel traffic would be able to safely transit the regulated area once the PATCOM deems it safe to do so.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the regulated area may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves implementation of regulations within 33 CFR part 100 applicable to organized marine events on the navigable waters of the United States. The temporary regulated area that would be enforced daily during a nine-day period during the sailboat regatta.. Normally such actions are categorically excluded from further review under paragraph L61 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 01. A preliminary Memorandum For Record for Categorically Excluded Actions supporting this determination is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *http://www.regulations.gov.* If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, visit *http://www.regulations.gov/privacyNotice.*

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at *http://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 33 CFR 1.05–1.

■ 2. Add § 100.501T05–0577 to read as follows:

§ 100.501T05–0577 Special Local Regulation; Choptank River, Talbot and Dorchester Counties, MD.

(a) *Definitions.* As used in this section:

Captain of the Port (COTP) Maryland-National Capital Region means the Commander, U.S. Coast Guard Sector Maryland-National Capital Region or any Coast Guard commissioned, warrant or petty officer who has been authorized by the COTP to act on the COTP's behalf.

Coast Guard Patrol Commander (PATCOM) means a commissioned, warrant, or petty officer of the U.S. Coast Guard who has been designated by the Commander, Coast Guard Sector Maryland-National Capital Region.

Official Patrol means a vessel assigned or approved by the Commander, Coast Guard Sector Maryland-National Capital Region with a commissioned, warrant, or petty officer on board and displaying a Coast Guard ensign.

Participant means a person or vessel registered with the event sponsor as participating in the 2018 Star World Championship regatta or otherwise designated by the regatta's sponsor as having a function tied to the event.

Spectator means a person or vessel not registered with the event sponsor as a participant or assigned as an official patrol.

(b) *Locations.* All coordinates reference Datum NAD 1983.

(1) *Regulated area.* All navigable waters of the Choptank River, bounded by a line connecting the following coordinates: Commencing at latitude 38°41′39.02″ N, longitude 076°11′19.18″ W, thence south to latitude 38°37′28.68″ N, longitude 076°11′19.18″ W, thence west to latitude 38°37′28.68″ N, longitude 076°18′18.35″ W, thence north to latitude 38°41′39027″ N, longitude 076°18′18.35″ W, thence east to point of origin, located near Oxford, MD. The

following location is within the regulated area:

(2) *Race Area.* The race area is a circle in shape with its center located at position latitude 38°39′48.00″ N, longitude 076°15′03.42″ W. The area is bounded by a line measuring approximately 2.5 nautical miles in diameter.

(c) *Special local regulations:* (1) The COTP Maryland-National Capital Region or PATCOM may forbid and control the movement of all vessels and persons, including event participants, in the regulated area. When hailed or signaled by an official patrol, a vessel or person in the regulated area must immediately comply with the directions given by the patrol. Failure to do so may result in the Coast Guard expelling the person or vessel from the area, issuing a citation for failure to comply, or both. The COTP Maryland-National Capital Region or PATCOM may terminate the event, or a participant's operations at any time the COTP Maryland-National Capital Region or PATCOM believes it necessary to do so for the protection of life or property.

(2) Except for participants and vessels already at berth, a person or vessel within the regulated area at the start of enforcement of this section must immediately depart the regulated area.

(3) A spectator must contact the PATCOM to request permission to either enter or pass through the regulated area. The PATCOM, and official patrol vessels enforcing this regulated area, can be contacted on marine band radio VHF–FM channel 16 (156.8 MHz) and channel 22A (157.1 MHz). If permission is granted, the spectator may enter the regulated area or pass directly through the regulated area as instructed by PATCOM. A vessel within the regulated area must operate at a safe speed that minimizes wake. A spectator vessel must not loiter within the navigable channel while within the regulated area.

(4) Only participant vessels and official patrol vessels are allowed to enter the race area.

(5) A person or vessel that desires to transit, moor, or anchor within the regulated area must first obtain authorization from the COTP Maryland-National Capital Region or PATCOM. A person or vessel seeking such permission can contact the PATCOM on Marine Band Radio, VHF–FM channel 16 (156.8 MHz).

(6) The Coast Guard will publish a notice in the Fifth Coast Guard District Local Notice to Mariners and issue a marine information broadcast on VHF–FM marine band radio announcing specific event date and times.

(d) *Enforcement periods.* This section will be enforced during each of the following times:

(1) From 11:30 a.m. until 5:30 p.m. on October 7, 2018.

(2) From 11:30 a.m. until 5:30 p.m. on October 8, 2018.

(3) From 11:30 a.m. until 5:30 p.m. on October 9, 2018.

(4) From 11:30 a.m. until 5:30 p.m. on October 10, 2018.

(5) From 11:30 a.m. until 5:30 p.m. on October 11, 2018.

(6) From 11:30 a.m. until 5:30 p.m. on October 12, 2018.

(7) From 11:30 a.m. until 5:30 p.m. on October 13, 2018.

(8) From 11:30 a.m. until 5:30 p.m. on October 14, 2018.

(9) From 11:30 a.m. until 5:30 p.m. on October 15, 2018.

Dated: August 13, 2018.

Joseph B. Loring,

Captain, U.S. Coast Guard, Captain of the Port Maryland-National Capital Region.

Special Local Regulation; Breton Bay, Leonardtown, MD

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish special local regulations for certain waters of the Breton Bay. This action is necessary to provide for the safety of life on these navigable waters of Breton Bay, at Leonardtown, MD, on October 6, 2018 and October 7, 2018. This proposed rulemaking would prohibit persons and vessels from being in the regulated area unless authorized by the Captain of the Port Maryland-National Capital Region or a designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before September 17, 2018.

ADDRESSES: You may submit comments identified by docket number USCG–2018–0225 using the Federal eRulemaking Portal at *http://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email MST2 Dane Grulkey, U.S. Coast Guard Sector Maryland-National Capital Region; telephone 410–576–2570, email *Dane.M.Grulkey@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
Pub. L. Public Law
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

On January 22, 2018, the Southern Maryland Boat Club notified the Coast Guard that they will be conducting their fall regatta from 8 a.m. to 5 p.m. on October 6, 2018, and October 7, 2018. The regatta consists of approximately 40 boats, participating in an exhibition of vintage outboard racing V-hull boats; the regatta is not a competition but rather a demonstration of the vintage race craft. Hazards from the regatta include vessels reaching speeds of 90 mph and include risks of injury or death resulting from near or actual contact among participant vessels and spectator vessels or waterway users if normal vessel traffic were to interfere with the event. The COTP Maryland-National Capital Region has determined that potential hazards associated with the regatta would be a safety concern for anyone intending to operate within specified waters.

The purpose of this rulemaking is to protect marine event participants, spectators and transiting vessels on specified waters of Breton Bay before, during, and after the scheduled event. The Coast Guard proposes this rulemaking under authority in 33 U.S.C. 1233, which authorize the Coast Guard to establish and define special local regulations.

III. Discussion of Proposed Rule

The COTP Maryland-National Capital Region proposes to establish special local regulations to be enforced from 7:30 a.m. to 5:30 p.m. on October 6, 2018, and from 7:30 a.m. to 5:30 p.m. on October 7, 2018. The regulated area would include all navigable waters within Breton Bay, from shoreline to shoreline, within an area bound by a line drawn along latitude 38°16′43″ N;

and bounded to the west by a line drawn along longitude 76°38′29.5″ W, located at Leonardtown, MD. This rule provides additional information about designated areas within the regulated area, including ''Race Area'', ''Buffer Zone'' and ''Spectator Area(s).'' The duration of the regulated area is intended to ensure the safety of event participants and vessels within the specified navigable waters before, during, and after the regatta, scheduled to occur between 8 a.m. to 5 p.m. each day of the event. Except for participants, no vessel or person would be permitted to enter the regulated area without obtaining permission from the COTP Maryland-National Capital Region or the Coast Guard Patrol Commander.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size and duration of the regulated area, which would impact a small designated area of Breton Bay during October 6–7, 2018, for a total of 18 hours. The Coast Guard would issue a Broadcast Notice to Mariners via marine band radio VHF–FM channel 16 about the status of the regulated area. Moreover, the rule would allow vessel operators to request permission to enter the regulated area for the purpose of safely transiting the regulated area if deemed safe to do so by the Coast Guard Patrol Commander.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV–A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves the creation of a special local regulation to be enforced a total of 18 hours over two days. This category of marine event water activities includes but is not limited to sail boat regattas, boat parades, power boat racing, swimming events, crew racing, canoe and sail board racing. Normally such actions are categorically excluded from further review under paragraph L61 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 01. A preliminary Memorandum For Record for Categorically Excluded Actions is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER**

INFORMATION CONTACT section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *http://www.regulations.gov.* If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, visit *http://www.regulations.gov/privacyNotice.*

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at *http://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. Add § 100.501T05–0225 to read as follows:

§ 100.501T05–0225 Special Local Regulation; Breton Bay, Leonardtown, MD.

(a) *Definitions.* (1) *Captain of the Port Maryland-National Capital Region* means the Commander, U.S. Coast Guard Sector Maryland-National Capital Region or a Coast Guard commissioned, warrant or petty officer who has been authorized by the Captain of the Port to act on his behalf.

(2) *Coast Guard Patrol Commander* means a commissioned, warrant, or petty officer of the U.S. Coast Guard who has been designated by the Commander, Coast Guard Sector Maryland-National Capital Region.

(3) *Official Patrol* means any vessel assigned or approved by Commander, Coast Guard Sector Maryland-National Capital Region with a commissioned, warrant, or petty officer on board and displaying a Coast Guard ensign.

(4) *Spectator* means any person or vessel not registered with the event sponsor as a participant or an official patrol vessel.

(5) *Participant* means any person or vessel participating in the Southern Maryland Boat Club Fall Regatta event under the auspices of the Marine Event Permit issued to the event sponsor and approved by Commander, Coast Guard Sector Maryland-National Capital Region.

(b) *Regulated area.* All coordinates reference Datum NAD 1983.

(1) *Coordinates:* The following location is a regulated area: All navigable waters within Breton Bay, MD, immediately adjacent to Leonardtown, MD shoreline, from shoreline to shoreline, within an area bounded to the east by a line drawn along latitude 38°16′43″ N and bounded to the west by a line drawn along longitude 076°38′29.5″ W, located at Leonardtown, MD.

(2) *Race area:* Located within the waters of Breton Bay, MD in an area bound by a line commencing at position latitude 38°17′07.2″ N, longitude 076°38′17.3″ W, thence southeast to latitude 38°16′55.3″ N, longitude 076°37′48″ W, thence southwest to latitude 38°16′50.1″ N, longitude 076°37′51.3″ W, thence northwest to latitude 38°17′01.9″ N, longitude 076°38′21″ W, thence northeast to point of origin.

(3) *Buffer zone:* Located within the waters of Breton Bay, MD. The area surrounds the entire race area described in the preceding paragraph of this section. This area is rectangular in shape and provides a buffer of approximately 125 yards around the perimeter of the race area. The area is bounded by a line commencing at position latitude 38°17′12″ N, longitude 076°38′19.6″ W; thence southeast to latitude 38°16′57″ N, longitude 076°37′40.5″ W; thence southwest to latitude 38°16′44.8″ N, longitude 076°37′48.2″ W; thence northwest to latitude 38°17′00.2″ N, longitude 076°38′27.8″ W; thence northeast to point of origin.

(4) *Spectator areas:* (i) *Spectator area A.* The area is bounded by a line commencing at position latitude 38°16′52.1″ N, longitude 076°38′14.2″ W; thence northeast to latitude 38°16′54″ N, longitude 076°38′12.5″ W; thence southeast to latitude 38°16′48.6″ N, longitude 076°37′59.3″ W; thence south to latitude 38°16′47.4″ N, longitude 076°37′59.3″ W; thence northwest along the shoreline to point of origin.

(ii) *Spectator area B.* The area is bounded by a line commencing at position latitude 38°16′59.1″ N, longitude 076°37′45.6″ W; thence southeast to latitude 38°16′57.1″ N, longitude 076°37′40.2″ W; thence southwest to latitude 38°16′54.3″ N, longitude 076°37′41.9″ W; thence southeast to latitude 38°16′51.8″ N, longitude 076°37′36.4″ W; thence northeast to latitude 38°16′55.2″ N, longitude 076°37′34.2″ W; thence northwest to latitude 38°16′59.2″ N, longitude 076°37′37.2″ W; thence west to latitude 38°17′01.7″ N, longitude 076°37′43.7″ W; thence south to point of origin.

(iii) *Spectator area C.* The area is bounded by a line commencing at position latitude 38°16′47.2″ N, longitude 076°37′54.8″ W; thence south to latitude 38°16′43.3″ N, longitude 076°37′55.2″ W; thence east to latitude 38°16′43.2″ N, longitude 076°37′47.8″ W; thence north to latitude 38°16′44.7″ N, longitude 076°37′48.5″ W; thence northwest to point of origin.

(c) *Special local regulations:* (1) The Captain of the Port Maryland-National Capital Region or the Coast Guard Patrol Commander may forbid and control the movement of all vessels and persons, including event participants, in the regulated area. When hailed or signaled by an official patrol, a vessel or person in the regulated area shall immediately comply with the directions given. Failure to do so may result in expulsion from the area, citation for failure to comply, or both.

(2) The operator of any vessel in the regulated area shall:

(i) Stop the vessel immediately when directed to do so by any Official Patrol and then proceed only as directed.

(ii) All persons and vessels shall comply with the instructions of the Official Patrol.

(iii) When authorized to transit the regulated area, all vessels shall proceed at the minimum speed necessary to maintain a safe course that minimizes wake near the race course.

(3) The Coast Guard Patrol Commander may terminate the event, or the operation of any participant, at any time it is deemed necessary for the protection of life or property.

(4) The Race Area is an area described by a line bounded by coordinates provided in latitude and longitude that outlines the boundary of a Race Area within the regulated area defined in paragraph (b)(2) of this section. The actual placement of the race course will be determined by the marine event sponsor but must be located within the designated boundaries of the Race Area. Only participants and official patrol vessels are allowed to enter the Race Area.

(5) The Buffer Zone is an area that surrounds the perimeter of the Race Area within the regulated area defined in paragraph (b)(3) of this section. The purpose of a Buffer Zone is to minimize potential collision conflicts with participants and spectators or nearby transiting vessels. This area provides separation between the Race Area and Spectator Area or other vessels that are operating in the vicinity of the regulated area defined in paragraph (b)(1) of this section. Only participants and official patrol vessels are allowed to enter the Buffer Zone.

(6) The Spectator Area is an area described by a line bounded by coordinates provided in latitude and longitude that outlines the boundary of a spectator area within the regulated area defined in paragraph (b)(4) of this section. Spectators are only allowed inside the regulated area if they remain within the Spectator Area. All spectator vessels shall be anchored or operate at a no-wake speed while transiting within the Spectator Area. Spectators may contact the Coast Guard Patrol Commander to request permission to either enter the Spectator Area or pass through the regulated area. If permission is granted, spectators must enter the Spectator Area or pass directly through the regulated area as instructed at safe speed and without loitering.

(7) The Coast Guard Patrol Commander and official patrol vessels enforcing this regulated area can be contacted on marine band radio VHF–FM channel 16 (156.8 MHz) and channel 22A (157.1 MHz). Persons and vessels desiring to transit, moor, or anchor within the regulated area must obtain authorization from Captain of the Port Maryland-National Capital Region or Coast Guard Patrol Commander. The Captain of the Port Maryland-National Capital Region can be contacted at telephone number 410–576–2693 or on Marine Band Radio, VHF–FM channel 16 (156.8 MHz). The Coast Guard Patrol Commander can be contacted on Marine Band Radio, VHF–FM channel 16 (156.8 MHz).

(8) The Coast Guard will publish a notice in the Fifth Coast Guard District Local Notice to Mariners and issue a marine information broadcast on VHF–FM marine band radio.

(d) *Enforcement periods.* This section will be enforced from 7:30 a.m. to 5:30 p.m. on October 6, 2018 and from 7:30 a.m. to 5:30 p.m. on October 7, 2018.

Dated: August 13, 2018.

Joseph B. Loring,

Captain, U.S. Coast Guard, Captain of the Port Maryland-National Capital Region.

[FR Doc. 2018–17763 Filed 8–16–18; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R08–0AR–2018–0530; FRL–9982–03—Region 8]

Approval and Promulgation of Air Quality Implementation Plans; State of Colorado; Motor Vehicle Inspection and Maintenance Program and Associated Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing approval of two State Implementation Plan (SIP) revisions submitted by the State of Colorado. The revisions involve amendments to Colorado's Regulation Number 11, ''Motor Vehicle Emissions Inspection Program.'' The revisions enhance the use of Regulation Number 11's Clean Screen Program, allow self-inspecting vehicle fleets to use the On-Board Diagnostics (OBD) testing procedure, provide corrections to the Low Emitter Index (LEI) component of the Clean Screen Program, clarify existing provisions, correct administrative errors, delete obsolete language, establish inspection procedures for when emission control equipment tampering is detected, and make several other minor associated revisions. These actions are being taken under section 110 of the Clean Air Act (CAA).

DATES: Written comments must be received on or before September 17, 2018.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R08–OAR–2018–0530, to the Federal Rulemaking Portal: *https://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *www.regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

Docket: All documents in the docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *www.regulations.gov* or in hard copy at the Air Program, Environmental Protection Agency (EPA), Region 8, 1595 Wynkoop Street, Denver, Colorado 80202–1129. The EPA requests that if at all possible, you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view the hard copy of the docket. You may view the hard copy of the docket Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Tim Russ, Air Program, EPA, Region 8, Mail-code 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129, (303) 312–6479, or *russ.tim@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document wherever ''we,'' ''us,'' or ''our'' is used, we mean the EPA.

I. Background

Colorado's Regulation Number 11 (hereafter ''Reg. No. 11'') addresses the implementation of the State's motor vehicle inspection and maintenance (I/M) program. The I/M program consists of an ''enhanced'' component that

utilizes a dynamometer-based EPA IM240 [1] test for 1982 and newer light-duty gasoline vehicles and a two-speed idle test (TSI) [2] for 1981 and older light-duty gasoline vehicles. To improve motorist convenience and reduce program implementation costs, the State also administers a remote sensing-based ''Clean Screen'' component of the I/M program. Remote sensing is a method for measuring vehicle emissions, while simultaneously photographing the license plate, when a vehicle passes through infrared or ultraviolet beams of light. Owners of vehicles meeting the Clean Screen criteria are notified by the County Clerk that their vehicles have passed the motor vehicle inspection process and are exempt from their next regularly scheduled IM240 test.

The Clean Screen program component of Colorado's Reg. No. 11 was originally approved, for implementation in the Metro-Denver area, with the Denver carbon monoxide redesignation to attainment and maintenance plan (see: 66 FR 64751, December 14, 2001). The Clean Screen criteria that was approved in 2001 by the EPA required two valid passing remote sensing readings on different days or from different sensors, that met the applicable emissions reading requirements in Part F of Reg. No. 11, within a 12-month period to clean-screen a vehicle (see 66 FR 44097, August 22, 2001).

Colorado revised Reg. No. 11 to expand the definition and requirements for a ''clean-screened vehicle'' to also include vehicles identified as low emitting vehicles in the state-determined LEI which have one passing remote sensing reading prior to the vehicle's registration renewal date. As part of the LEI process, the Colorado Department of Public Health and Environment, Air Pollution Control Division (APCD) develops an LEI on or before July 1 of each year. The LEI is based on a tabulation of the previous calendar year's IM240 inspection program results for specific make, model, and model year vehicles that passed IM240 vehicle inspections the previous year at a minimum rate of 98%.

Beginning in January 2015, Colorado also began implementing an OBD test for certain model year vehicles. An OBD I/M test essentially means the electronic retrieval, by connecting an OBD test analyzer to the computer port data link in the vehicle, of information from a vehicle's computer system. The electronic information retrieved includes stored readiness status, diagnostic trouble codes (DTC), malfunction indicator light (MIL) illumination and other data. If emission related DTCs are present or the MIL is commanded on, that would indicate an emissions related malfunction.[3]

In addition, Colorado also extended the Reg. No. 11 exemption from I/M testing for new vehicles from 4 years to 7 years. This revision was based on Colorado's gathering of emissions testing information over a period of several years, which demonstrated that historically new and newer vehicles typically did not fail the IM240 or OBD emissions test within the first seven years of the vehicle's life.

II. What action is the Agency taking?

As explained below, the EPA is proposing to approve various revisions to Colorado's Reg. No. 11 that the State submitted to the EPA on February 20, 2015, and on May 14, 2018. Most of the revisions involve minor updates to several sections of Reg. No. 11 and the deletion of obsolete language. More specifically, the substantive SIP revisions involve:

a. Addition of a definition of ''Tampering'' to Part A.II.

b. Revisions to Part B.IV.B to require span gases to be labelled in accordance with Attachment VI of Appendix A.

c. Revisions to Part A.II.16 and Part C.XII. (A.3 and C.2) to increase clean screening efficiency by removing the requirement that two qualifying clean screen observations must be made on different days or at different locations.

d. Revisions to Part C.II.B.4 to remove incomplete and obsolescent qualifying criteria for certain vehicles that are unable to be tested on the IM240 chassis dynamometer.

e. Revisions to Part C.II.C to allow self-inspecting gasoline vehicle fleets to utilize the more effective and more convenient OBD II testing procedure on all 1996 model year and newer vehicles.

f. Revisions to Part C.II.C.3 regarding acceptable readiness criteria for OBD sensors and monitors.

g. Revisions to Part C.II.C.9 and C.10 regarding I/M240 tests and tampering associated with OBD tests.

h. Revisions to Part C.VIII and IX to clarify and modernize provisions for issuance of emissions repair, diagnostic and economic hardship waivers.

i. Revisions to Part D.I.B. 5, 6, and 7 to remove obsolete language regarding dwell meters, timing lights, and idle adjustment.

j. Revisions to Part F.VI.B, the roadside remote sensing clean screen LEI, to allow for greater utilization of this component of the I/M program.

k. Revisions to Part F.VII with regard to OBD testing criteria.

l. Revisions to Appendix A, Attachment IV, Section 2.2, and the deletion of Appendix B in its entirety such as to remove obsolete specifications and procedures for vehicle inspection analyzer calibration gasses.

m. Corrections of typographical, grammatical, and formatting errors throughout Reg. No. 11.

We note that the specific basis for our proposed action and our analyses and findings are discussed in this proposed rulemaking. Technical information that we relied upon in this proposal is contained in the docket, available at *http://www.regulations.gov,* Docket No. EPA–R08–OAR–2018–0530.

III. What was the State's process?

Section 110(a)(2) of the CAA requires that a state provide reasonable notice and public hearing before adopting a SIP revision and submitting it to us.

The State's February 20, 2015 SIP Submittal

On October 16, 2014, the Colorado Air Quality Control Commission (AQCC) conducted a public hearing to consider the adoption of revisions and additions to the Colorado SIP. The revisions affecting the SIP involved the Reg. No. 11 revisions noted above and as discussed below in section IV. There were no public comments. After conducting a public hearing, the AQCC adopted the proposed revisions to Reg. No 11 on October 16, 2014. The SIP revisions became State effective on November 30, 2014.

We evaluated the State's February 20, 2015 SIP submittal for Reg. No. 11 and determined that the State met the requirements for reasonable notice and public hearing under section 110(a)(2)

[1] See 40 CFR part 51, subpart S for a complete description of EPA's IM240 test. The IM240 test is essentially an enhanced motor vehicle emissions test to measure mass tailpipe emissions while the vehicle follows a computer generated driving cycle trace for 240 seconds and while the vehicle is on a dynamometer.

[2] See 40 CFR part 51, subpart S for a complete description of EPA's two-speed idle test. The two-speed idle test essentially measures the mass tailpipe emissions of a stationary vehicle; one reading is at a normal idle of approximately 700 to 800 engine revolutions per minute (RPM) and one reading at 2,500 RPM.

[3] The EPA required that OBD II testing requirements be in place by January 1, 2002 (66 FR 18156; April 5, 2001). All 1996 and newer model year light duty gasoline and alternate fuel passenger cars and trucks are required to have OBD II systems. OBD–II is an improvement over OBD–I in both capability and standardization. The OBD–II standard specifies the type of diagnostic connector and its pinout, the electrical protocols available, and the messaging format. The OBD–II standard provides a list of standardized DTCs. OBD–II standardization was prompted to simplify diagnosis of increasingly complicated emissions equipment.

of the CAA. By operation of law under section 110(k)(1)(B) of the CAA, the State's February 20, 2015 submittal was deemed complete on August 20, 2015.

The State's May 14, 2018 SIP Submittal

On May 17, 2017, the AQCC conducted a public hearing to consider the adoption of revisions and additions to the Colorado SIP. The revisions affecting the SIP involved the Reg. No. 11 revisions noted above and as discussed below in section V. There were no public comments. After conducting a public hearing, the AQCC adopted the proposed revisions to Reg. No. 11 on May 17, 2017. The SIP revisions became State effective on September 30, 2017.

We evaluated the State's May 14, 2018 SIP submittal for Reg. No. 11 and determined that the State met the requirements for reasonable notice and public hearing under section 110(a)(2) of the CAA. In addition, our evaluation of the SIP revisions submittal also concluded that it met the minimum ''completeness'' criteria found in 40 CFR part 51, Appendix V.

IV. EPA's Evaluation of the State's 2015 Revisions to Part A, Part B, Part C, Part F, Appendix A and Appendix B

The sections of Reg. No. 11 that were revised with the State's February 20, 2015 submittal were as follows:

1. *Part A, section II:* Add a new definition number 50, ''Tampering.'' Renumber definitions number 51 and higher. The new definition is consistent with the prohibitions in CAA section 203(a)(3)(A).

2. *Part B, section IV:* Modify section IV.B to require span gases to be labelled in accordance with Attachment VI of Appendix A and to require span and calibration gas suppliers to be approved by the Colorado Automobile Inspection and Readjustment (AIR) Program Standards Lab.

3. *Part C, section II:* Modify section II.B.4 to replace specific criteria for eligibility for an alternative test to the IM240 test with an eligibility list that is maintained in the Colorado APCD Emission Technical Center Procedures Manual.

4. *Part C, section II:* Modify section II.C to indicate that effective July 1, 2015, 1996 and newer light duty vehicles that are owned by a fleet that operates a Fleet Inspection Station shall administer an OBD test as specified in 40 CFR 85.2222.

5. *Part C, section VIII:* Modify sections VIII.B.1 to require, as part of eligibility for an emissions test waiver, there are no visible smoke emissions from the vehicle's exhaust, there has been no tampering, and VIII.B.3 (renumbered to VIII.B.2) to clarify requirements for expenditures needed to qualify for an emissions test waiver. Remove prior sections VIII.B.2, VIII.B.4, and VIII.B.5. We note that section VIII.B.2 involved certain aspects of the basic I/M program that are obsolete and sections VIII.B.4 and VIII.B.5 contained emissions reduction and operating parameter requirements that are not required under 40 CFR 51.360 for waivers.

6. *Part C, section VIII:* Modify section VIII.C to require a vehicle to be evaluated via an IM240 test if the OBD MIL remains illuminated even after the maximum expenditure for repairs has been met.

7. *Part C, section VIII:* Modify section VIII.D.1 to add failure for an OBD test.

8. *Part C, section VIII:* Modify section VIII.F to remove unnecessary language regarding the generation of an emissions sticker and removal of the prior emissions sticker by an emissions inspector.

9. *Part C, section IX:* Remove this section in its entirety to delete obsolete language regarding engine and emissions equipment adjustment procedures. These procedures are no longer performed by inspectors; instead, if a vehicle does not pass the owner must have the necessary repairs done before the vehicle is retested.

10. *Part C, section X:* Modify section X.A and X.B to include provisions for emissions related repairs that are necessary to extinguish the OBD MIL light.

11. *Part C, section X:* Modify section X.C to state the specific requirements to meet the emissions maximum expenditure for repairs cost limit, with respect to an OBD test, in order for a vehicle to be eligible to apply for a waiver.

12. *Part F, section VI:* The State modified section VI.B.3 to remove a 98% passing criteria for Clean Screen vehicles and instead indicate the passing criteria would be based on sound scientific evidence. The EPA is not acting on this revision in the State's February 20, 2015 SIP submittal, as it has been superseded by the 2018 revisions.

13. *Part F, section VI:* The State added section VI.B.4 to include that the State would establish the low emitting vehicle index, without review by the EPA or the public, and would retain the low emitting vehicle index in the State's Emission Technical Center Procedures Manual. The EPA is not acting on this revision in the State's February 20, 2015 SIP submittal, as it has been superseded by the May 14, 2018 submitted revisions.

14. *Appendix A, Technical Specifications:* Modify section 2.11 to remove a reference to gas blender specifications in the obsolete Appendix B and change to indicate as approved by the Colorado APCD.

15. *Appendix A, Technical Specifications, Attachment IV:* Modify section IV.2.2 to indicate that the Colorado97 procedure shall use two tri-blend span gas blends that meet the California BAR97 span gas low (blend 31) and high (blend 34) specifications.

16. *Appendix A, Technical Specifications, Attachment IV:* Modify section IV.2.3 to indicate that audit gases shall meet the California BAR97 audit gas specification.

17. *Appendix A, Technical Specifications, Attachment VI:* Modify section VI to revise the label figure to indicate that it represents the Colorado-approved calibration span gas.

18. *Appendix B, Standards and Specifications for Calibration/Span Gas Suppliers:* Appendix B was removed by the State in its entirety as it contained obsolete specifications and procedures for inspection analyzer calibration gases.

V. EPA's Evaluation of the State's 2018 Revisions to Part C, Part D, Part F and Appendix A

The sections of Reg. No. 11 that were revised with the State's May 14, 2018 submittal were as follows:

1. *Part C, section II:* Modify section II.C.3.a to replace the existing monitor readiness evaluation with a monitor readiness evaluation that ensures that the oxygen sensor and/or heated oxygen sensor monitor(s) shall be ready if supported, the catalyst monitor shall be ready if supported, 2001 and newer vehicles shall only be allowed to have one supported monitor in a not ready status, and 2000 and older vehicles shall only be allowed to have two supported monitors in a not ready status. In addition, if the above criteria are not met and the vehicle's MIL light is commanded off, then the vehicle will be required to be evaluated via an IM240 test.

2. *Part C, section II:* Modify section II.C.9 to indicate that for the 5 percent vehicles that are selected at random from the OBD test for a subsequent IM240 test, the IM240 test shall be the pass/fail determination for these vehicles.

3. *Part C, section II:* New section II.C.10 that states if the vehicle's OBD responds that the catalyst readiness monitor is not supported and that all readiness monitors are supported, or if any other OBD tampering indicators are present, then the OBD test will be failed.

4. *Part D, section I:* Modify sections I.B to remove sections I.B.5, I.B.6 and I.B.7 to delete obsolete terms and renumber the remaining sections in I.B.

5. *Part D, section I:* Modify renumbered section I.B.10 to indicate that renumbered sections I.B.5 and I.B.6 are not required for licensing as an inspection-only station or inspection-only facility.

6. *Part D, section I:* Remove prior numbered section I.B.15 as it contains obsolete language.

7. *Part F, section VI:* Modify section VI.B.1 to remove the restricting term ''IM240'' which then allows all types of test results to be evaluated.

8. *Part F, section VI:* Modify section VI.B.2 to remove the unnecessary term ''exhaust.''

9. *Part F, section VI:* Modify section VI.B.3 to remove the minimum 98% passing rate criteria for the LEI and instead require that the passing rate criteria ensures equivalent air quality benefits as a second remote sensing test.

10. *Part F, section VI:* Modify section VI.B.4 to remove prior language and to add that the passing rate criteria for the LEI, as established by the APCD, will be maintained and contained in the APCD's Emissions Technical Center Procedures Manual, and will be submitted to the EPA on or before July 1 of each year.

11. *Part F, section VII:* Modify section VII to remove the obsolete sections VII.E and VII.F.

12. *Appendix A, Technical Specifications, Attachment V:* Modify Attachment V ''Specifications for Colorado On-Board Diagnostic (OBD) Stand-Alone Analyzer'' to remove the obsolete language regarding readiness criteria for a vehicle's oxygen sensor, catalyst sensor and the allowable number of not-ready sensors for 2001 and newer vehicles and 2000 and older vehicles. The revised language now contains overall requirements for OBD readiness such that if the readiness evaluation indicates that a vehicle has more than one unset (not ready) readiness monitor, and the MIL is commanded off, then the inspection is automatically aborted with the reason printed out on the Vehicle Inspection Report.

VI. Conclusion

Our review of the State's Reg. No. 11 revisions, as presented above in sections IV and V, involved numerous revisions to Reg. No. 11 Parts A, B, C, D, F, Appendix A, the deletion of Appendix B, and overall formatting, correction of typographic errors and other non-substantive changes. Based on our review and evaluation discussed above, we propose that the Reg. No. 11 SIP revisions, submitted by the State in letters dated February 20, 2015, and May 14, 2018, sufficiently address applicable provisions in 40 CFR part 51, subpart S, 40 CFR part 85, subpart W, and that our approval is warranted.

VII. Consideration of Section 110(1) of the Clean Air Act

Section 110(1) of the CAA states that a SIP revision cannot be approved if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress towards attainment of a National Ambient Air Quality Standard or any other applicable requirement of the CAA. In view of the evaluations presented in sections IV and V above, the EPA proposes that the revisions to Colorado's Reg. No. 11 that are contained in the State's SIP submittals dated February 20, 2015, and May 14, 2018 will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA.

VIII. Proposed Action

The EPA is proposing approval of the February 20, 2015, submitted SIP revisions to Colorado's Regulation Number 11, Part A, Part B, Part C, Part F, Appendix A and the deletion of Appendix B. The EPA notes that revisions to Part F, sections VI.B.3 and VI.B.4 were also provided with the State's February 20, 2015 submittal. The EPA is not proposing action on these sections of Part F for the reasons noted above in section IV of this action.

In addition, the EPA is proposing approval of the May 14, 2018, submitted SIP revisions to Regulation Number 11, Part C, Part D, Part F and Appendix A.

IX. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the amendments described in sections IV and V, above. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 8 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

X. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices provided that they meet the criteria of the CAA. Accordingly, this action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

RIN 2070–AB27

Significant New Use Rules on Certain Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing significant new use rules (SNURs) under the Toxic Substances Control Act (TSCA) for 27 chemical substances which were the subject of premanufacture notices (PMNs). The chemical substances are subject to Orders issued by EPA pursuant to section 5(e) of TSCA. This action would require persons who intend to manufacture (defined by statute to include import) or process any of these 27 chemical substances for an activity that is designated as a significant new use by these rules to notify EPA at least 90 days before commencing that activity. The required notification initiates EPA's evaluation of the intended use within the applicable review period. Persons may not commence manufacture or processing for the significant new use until EPA has conducted a review of the notice, made an appropriate determination on the notification, and has taken such actions as are required with that determination. In addition to this notice of proposed rulemaking, EPA is issuing the action as a direct final rule elsewhere in this issue of the **Federal Register**.

DATES: Comments must be received on or before September 17, 2018.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2017–0414, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Kenneth Moss, Chemical Control Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–9232; email address: *moss.kenneth@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION: In addition to this Notice of Proposed Rulemaking, EPA is issuing the action as a direct final rule elsewhere in this issue of the **Federal Register**. For further information about the proposed significant new use rules, please see the information provided in the direct final action, with the same title, that is located in the ''Rules and Regulations'' section of this issue of the **Federal Register**.

[NIOSH Docket 094]

World Trade Center Health Program; Petition 019—Irritable Bowel Syndrome; Finding of Insufficient Evidence

AGENCY: Centers for Disease Control and Prevention, HHS.

ACTION: Denial of petition for addition of a health condition.

SUMMARY: On May 17, 2018, the Administrator of the World Trade Center (WTC) Health Program received a petition (Petition 019) to add irritable bowel syndrome (IBS) to the List of WTC-Related Health Conditions (List). Upon reviewing the scientific and medical literature, including information provided by the petitioner, the Administrator has determined that the available evidence does not have the potential to provide a basis for a decision on whether to add IBS to the List. The Administrator also finds that insufficient evidence exists to request a recommendation of the WTC Health Program Scientific/Technical Advisory Committee (STAC), to publish a proposed rule, or to publish a determination not to publish a proposed rule.

DATES: The Administrator of the WTC Health Program is denying this petition for the addition of a health condition as of August 17, 2018.

ADDRESSES: Visit the WTC Health Program website at *https://www.cdc.gov/wtc/received.html* to review Petition 019.

FOR FURTHER INFORMATION CONTACT: Rachel Weiss, Program Analyst, 1090 Tusculum Avenue, MS: C–48, Cincinnati, OH 45226; telephone (855) 818–1629 (this is a toll-free number); email *NIOSHregs@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

A. WTC Health Program Statutory Authority

Title I of the James Zadroga 9/11 Health and Compensation Act of 2010 (Pub. L. 111–347, as amended by Pub. L. 114–113), added Title XXXIII to the Public Health Service (PHS) Act,[1] establishing the WTC Health Program within the Department of Health and Human Services (HHS). The WTC Health Program provides medical monitoring and treatment benefits to eligible firefighters and related personnel, law enforcement officers, and rescue, recovery, and cleanup workers who responded to the September 11, 2001, terrorist attacks in New York City, at the Pentagon, and in Shanksville, Pennsylvania (responders), and to eligible persons who were present in the dust or dust cloud on September 11, 2001, or who worked, resided, or attended school, childcare, or adult daycare in the New York City disaster area (survivors).

All references to the Administrator of the WTC Health Program (Administrator) in this document mean the Director of the National Institute for Occupational Safety and Health (NIOSH) or his designee.

Pursuant to section 3312(a)(6)(B) of the PHS Act, interested parties may petition the Administrator to add a health condition to the List in 42 CFR 88.15. Within 90 days after receipt of a valid petition to add a condition to the List, the Administrator must take one of the following four actions described in section 3312(a)(6)(B) of the PHS Act and § 88.16(a)(2) of the Program regulations: (1) Request a recommendation of the STAC; (2) publish a proposed rule in the **Federal Register** to add such health condition; (3) publish in the **Federal Register** the Administrator's determination not to publish such a proposed rule and the basis for such determination; or (4) publish in the **Federal Register** a determination that insufficient evidence exists to take action under (1) through (3) above.

B. Procedures for Evaluating a Petition

In addition to the regulatory provisions, the WTC Health Program has developed policies to guide the review of submissions and petitions,[2] as well as the analysis of evidence supporting the potential addition of a non-cancer health condition to the List.[3]

A valid petition must include sufficient medical basis for the association between the September 11, 2001, terrorist attacks and the health condition to be added; in accordance with WTC Health Program policy, reference to a peer-reviewed, published, epidemiologic study about the health condition among 9/11-exposed populations or to clinical case reports of health conditions in WTC responders or survivors may demonstrate the required medical basis.[4] Studies linking 9/11 agents to the petitioned health condition may also provide sufficient medical basis for a valid petition.

After the Program has determined that a petition is valid, the Administrator must direct the Program to conduct a review of the scientific literature to determine if the available scientific information has the potential to provide a basis for a decision on whether to add the health condition to the List.[5] The literature review includes a search for peer-reviewed, published, epidemiologic studies (including direct observational studies in the case of health conditions such as injuries) about the health condition among 9/11-exposed populations. The Program evaluates the scientific quality of each peer-reviewed, published, epidemiologic study of the health condition identified in the literature search; the Program then compiles the scientific results of each study to assess whether a causal relationship between 9/11 exposures and the health condition is supported, and evaluates whether the results of the studies are representative of the 9/11-exposed population of responders and survivors. A health condition may be added to the List if peer-reviewed, published, epidemiologic studies provide support that the health condition is substantially likely[6] to be causally associated with 9/11 exposures. If the evaluation of evidence provided in peer-reviewed, published, epidemiologic studies of the health condition in 9/11 populations demonstrates a high, but not substantial, likelihood of a causal association between the 9/11 exposures and the health condition, then the Administrator may consider additional highly relevant scientific evidence regarding exposures to 9/11 agents[7] from sources using non-9/11-exposed populations. If that additional assessment establishes that the health condition is substantially likely to be causally associated with 9/11 exposures among 9/11-exposed populations, the health condition may be added to the List.

C. Petition 019

On May 17, 2018, the Administrator received a petition (Petition 019) from a WTC survivor who was caught in the dust cloud near Ground Zero, requesting the addition of ''irritable bowel syndrome (IBS)'' to the List.[8] The petition included one scientific article, by Marynowski *et al.* [2015],[9] reviewing the findings of peer-reviewed, published epidemiologic studies concerning the association of IBS with environmental pollution (including particulate matter, a 9/11 agent). Although the Marynowski article on its own did not provide a sufficient medical basis for the submission to be considered a valid petition, the article referenced a peer-reviewed, published study by Kaplan *et al.* [2012][10] regarding IBS symptoms in non-9/11-exposed populations. Kaplan *et al.* conducted an epidemiologic study to evaluate the association between daily concentrations of air pollutants, including particulate matter, with emergency department visits for non-specific abdominal pain, a symptom necessary for a diagnosis of IBS. The inclusion of a reference to this study provides sufficient medical basis for the submission to be considered a valid petition.

D. Review of Scientific and Medical Information and Administrator Determination

In response to Petition 019, and pursuant to the Program policy on the

[1] Title XXXIII of the PHS Act is codified at 42 U.S.C. 300mm to 300mm–61. Those portions of the James Zadroga 9/11 Health and Compensation Act of 2010 found in Titles II and III of Public Law 111–347 do not pertain to the WTC Health Program and are codified elsewhere.

[2] *See* WTC Health Program [2014], *Policy and Procedures for Handling Submissions and Petitions to Add a Health Condition to the List of WTC-Related Health Conditions,* May 14, 2014, *http://www.cdc.gov/wtc/pdfs/WTCHPPPPetitionHandlingProcedures14May2014.pdf.*

[3] *See* WTC Health Program [2017], *Policy and Procedures for Adding Non-Cancer Conditions to the List of WTC-Related Health Conditions,* February 14, 2017, *https://www.cdc.gov/wtc/pdfs/WTCHP_PP_Adding_NonCancers_14_February_2017.pdf.*

[4] *See supra* note 2.

[5] *See supra* note 3.

[6] The ''substantially likely'' standard is met when the scientific evidence, taken as a whole, demonstrates a strong relationship between the 9/11 exposures and the health condition.

[7] 9/11 agents are chemical, physical, biological, or other hazards reported in a published, peer-reviewed exposure assessment study of responders, recovery workers, or survivors who were present in the New York City disaster area, or at the Pentagon site, or the Shanksville, Pennsylvania site, as those locations are defined in 42 CFR 88.1, as well as those hazards not identified in a published, peer-reviewed exposure assessment study, but which are reasonably assumed to have been present at any of the three sites.

[8] *See* Petition 019, WTC Health Program: Petitions Received, *http://www.cdc.gov/wtc/received.html.*

[9] Marynowski M, Likońska A, Zatorski H, Fichna J [2015], *Role of Environmental Pollution in Irritable Bowel Syndrome,* World J Gastroentero 21(40):11371–11378.

[10] Kaplan GG, Szyszkowicz M, Fichna J, Rowe BH, Porada E, Vincent R, Madsen K, Ghosh S, Storr M [2012], *Non-Specific Abdominal Pain and Air Pollution: A Novel Association,* PLOS ONE 7(10).

addition of non-cancer health conditions to the List,[11] the Program conducted a review of the scientific literature on IBS.[12] The Program was unable to identify any references to the petitioned health condition, IBS, in 9/11-exposed populations for further scientific evaluation based on the literature search. Since Kaplan *et al.* [2012] is not an epidemiologic study of IBS in 9/11-exposed populations, it does not meet the threshold for evaluation established in Program policy; therefore, the article was not further reviewed.

E. Administrator's Final Decision on Whether To Propose the Addition of IBS to the List

The Administrator has determined that insufficient evidence is available to take further action at this time, including proposing the addition of IBS to the List (pursuant to PHS Act, sec. 3312(a)(6)(B)(ii) and 42 CFR 88.16(a)(2)(ii)) or publishing a determination not to publish a proposed rule in the **Federal Register** (pursuant to PHS Act, sec. 3312(a)(6)(B)(iii) and 42 CFR 88.16(a)(2)(iii)). The Administrator has also determined that requesting a recommendation from the STAC (pursuant to PHS Act, sec. 3312(a)(6)(B)(i) and 42 CFR 88.16(a)(2)(i)) is unwarranted.

For the reasons discussed above, the Petition 019 request to add IBS to the List of WTC-Related Health Conditions is denied.

F. Approval To Submit Document to the Office of the Federal Register

The Secretary, HHS, or his designee, the Director, Centers for Disease Control and Prevention (CDC) and Administrator, Agency for Toxic Substances and Disease Registry (ATSDR), authorized the undersigned, the Administrator of the WTC Health Program, to sign and submit the document to the Office of the Federal Register for publication as an official document of the WTC Health Program. Robert Redfield M.D., Director, CDC, and Administrator, ATSDR, approved this document for publication on August 10, 2018.

Dated: August 10, 2018.

Frank J. Hearl,

Chief of Staff, National Institute for Occupational Safety and Health, Delegated the duties of the Administrator, World Trade Center Health Program and Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, Department of Health and Human Services.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Docket No. AMS–LPS–17–0046]

United States Standards for Grades of Pork Carcasses

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice.

SUMMARY: This Notice informs the public that the U.S. Department of Agriculture's (USDA) Agricultural Marketing Service (AMS) will not proceed with revisions to the United States Standards for Grades of Pork Carcasses (pork standards) at this time.

DATES: August 17, 2018.

ADDRESSES: USDA, AMS, Livestock and Poultry Program (LP), Quality Assessment Division (QAD); 1400 Independence Ave. SW; Room 3932–S, STOP 0258; Washington, DC 20250–0258.

FOR FURTHER INFORMATION CONTACT: David Bowden, Chief, Standardization Branch; USDA, AMS, LP, QAD; 1400 Independence Avenue SW; Room 3932–S, STOP 0258; Washington, DC 20250–0258; phone (202) 690–3148; or via email at *David.Bowden@ams.usda.gov.*

SUPPLEMENTARY INFORMATION: Official USDA grade standards and associated voluntary, fee-for-service grading programs are authorized under the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq.*) (the Act). Specifically, section 203(c) of the Act directs and authorizes the Secretary of Agriculture ''to develop and improve standards of quality, condition, quantity, grade, and packaging and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices'' (7 U.S.C. 1622(c)). AMS is committed to carrying out this authority in a manner that facilitates the marketing of agricultural products. Accordingly, the primary purpose of USDA grade standards is to divide the population of a commodity into uniform groups (of similar quality, yield, value, etc.) to facilitate marketing. Currently, AMS maintains standards for a wide variety of commodities and in many cases, applies those standards to commodities on a fee-for-service basis.

AMS recognizes that the pork standards must be relevant to be of value to stakeholders and, therefore, recommendations for changes in the standards may be initiated by AMS or by interested parties at any time to achieve that goal. AMS originally posted this Notice seeking comment on the revised pork standards on October 23, 2017, with a closing date of December 22, 2017. Subsequently, AMS reopened the Notice for an additional 60-day comment period, ending March 19, 2018.

Comments

In all, 47 comments were received: There were 19 comments in favor of updating the pork standards, while 24 were opposed; 2 only requested extending the comment period; and 2 commenters did not clearly state a position. Responses received were representative of the pork industry and stakeholders, with the most comments coming from pork industry associations, packers, and producers.

The 19 commenters in support of revised pork standards said that changes were needed in the pork industry to revitalize domestic consumer demand and that the updated standards may be helpful in addressing the decline in purchases of fresh pork products, citing data that the average American consumer buys fresh pork only seven times a year. Some commenters expressed that a revised standard could lead to a USDA fee-for-service grading program, which would enhance uniformity of pork quality and build consumer confidence in pork purchasing decisions. Commenters also said that the revisions were scientifically sound and applicable to pork quality attributes that are consumer-recognized and tied to an improved eating experience. While some recognized the challenge of implementing the proposed standards revisions via a grading program in the modern processing environment, they expressed support for a standardized, objective carcass grading system focused more on quality than percent lean.

Most of the 24 comments against the proposed revisions were similar in nature and asserted the new grades would not add value for pork producers. Some commenters noted that the pork industry and individual companies have worked for many years to improve product quality attributes and promote their efforts through product branding and ''niche'' marketing, and the revised pork standards would endanger these efforts. Further, some commenters noted that proposed nomenclature of Prime, Choice, and Select, if implemented for pork, could result in devaluation of the established beef grading system. Pork packers and processors expressed concern that implementation of the revised pork standards would be impractical, in part because the technology available to accurately assess quality factors for pork is not yet effective while maintaining today's processing line speeds. Commenters opposed to the revisions also expressed concern that implementation at this time would cause disruption to existing producer-packer relationships and established logistics. Others were concerned that application of the standard specifically to the loin primal without positive correlation with the remaining carcass parts would be misleading, and that any premium generated by applying the standards would not offset the cost of implementing a USDA fee-for-service grading program in the plant.

A few commenters provided responses that were both for and against the revisions, outlining opportunities and challenges similar to those discussed above. All comments are available at the following website: *https://www.regulations.gov/docketBrowser?rpp=25&so=DESC&sb=commentDueDate&po=0&dct=PS&D=AMS-LPS-17-0046.*

Based on the responses received from the Notices, AMS will not pursue any revisions to the pork standards at this time. AMS stands ready to assist agricultural industries in establishing voluntary standards and grading programs for commodities for which it has authority to do so; the pork industry retains this option should the need arise.

Dated: August 13, 2018.

Bruce Summers,

Administrator, Agricultural Marketing Service.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Supplemental Nutrition Assistance Program (SNAP), Store Applications, Forms FNS–252, FNS–252–E, FNS–252–FE, FNS–252–R, FNS–252–2 and FNS–252–C

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on the proposed collection. This is a revision of a currently approved collection in the Supplemental Nutrition Assistance Program and concerns Retail Store Applications (Forms FNS–252; FNS–252–E; FNS–252–FE; FNS–252–R; FNS–252–2; and FNS–252–C).

DATES: Written comments must be received on or before October 16, 2018.

ADDRESSES: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology.

Comments may be sent to: Nicole Budzius, Chief, Retailer Administration Branch, Supplemental Nutrition Assistance Program, Retailer Policy and Management Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Room 422, Alexandria, VA 22302. Comments may be faxed to the attention of Ms. Budzius at (703) 305–1863 or via email to: *RPMDHQ-WEB@fns.usda.gov.* Comments will also be accepted through the Federal eRulemaking Portal. Go to *http://www.regulations.gov,* and follow the online instructions for submitting comments electronically. All written comments will be open for public inspection at the FNS office located at 3101 Park Center Drive, Room 422, Alexandria, Virginia 22302, during regular business hours (8:30 a.m. to 5 p.m. Monday through Friday).

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Nicole Budzius at *RPMDHQ-WEB@fns.usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Supplemental Nutrition Assistance Program (SNAP)—Store Applications.

Form Number: FNS–252; 252–E; 252–FE; 252–R; 252–2; and 252–C.

OMB Number: 0584–0008.

Expiration Date: January 31, 2021.

Type of Request: Revision of a currently approved collection of information.

Abstract: Section 9(a) of the Food and Nutrition Act of 2008, as amended, (the Act) (7 U.S.C. 2011 *et seq.*) requires that FNS determine the eligibility of retail food stores and certain food service organizations to accept SNAP benefits and to monitor them for compliance and continued eligibility and to ensure Program integrity.

FNS is also responsible for requiring updates to application information and reviewing retail food store applications at least once every five years to ensure that each firm is under the same ownership and continues to meet eligibility requirements. The Act specifies that only those applicants whose participation will ''effectuate the purposes of the program'' should be authorized.

There are six forms associated with this approved Office of Management and Budget (OMB) information collection number 0584–0008—the Supplemental Nutrition Assistance Program Application for Stores, Forms FNS–252 (English and Spanish) and FNS–252–E (paper and online version respectively); Farmer's Market Application, Form FNS–252–FE; Meal Service Application, Form FNS–252–2; Reauthorization Application, Form FNS–252–R; and the Corporation Supplemental Application, Form FNS–252–C used for individual (chain) stores under a corporation. For new authorizations, the majority of applicants use form FNS–252 or FNS–252–E (paper or online, respectively). FNS is responsible for reviewing retail food store applications at least once every five years to ensure that each firm is under the same ownership and continues to meet eligibility guidelines. In order to accomplish this regulatory requirement, form FNS–252–R is used for reauthorization. In addition to these forms, during authorization or reauthorization, FNS may conduct an on-site store visit of the firm. The store visit of the firm helps FNS confirm that the information provided on the application is correct. An FNS representative or store visit contractor obtains permission to fill in the store visit checklist, photograph the store and asks the store owner or manager about the continued ownership of the store.

Applicants using form FNS–252–E or FNS–252–FE must also first self-register for a Level 1 access account through the USDA eAuthentication system in order to start an online application. USDA eAuthentication facilitates the electronic authentication of an individual.

The Agricultural Act of 2014 (2014 Farm Bill) amended the Food and Nutrition Act of 2008 (the Act) and the Supplemental Nutrition Assistance Program (SNAP) revised all retailer application forms (paper and electronic) in January, 2018, as a result of regulatory changes required by the Act and amended by the 2014 Farm Bill. Such changes to the Act amended the definition of ''retail food store'' to clarify when a retailer is a restaurant rather than a retail food store. Among the changes made to the SNAP retailer application form(s), the Food and Nutrition Service (FNS) added a new question, Question 18, concerning restaurant licensing, and revised Question 22, regarding total retail sales on Form FNS–252. Currently, respondents select a Yes or No response if they have or are applying for a restaurant license for their store in Question 18. Question 22 currently asks retailers to enter their total retail sales by category in dollars for a one year period. Sales categories include gasoline, lottery, tobacco, alcohol, other nonfood, and hot foods, cold prepared foods, accessory foods, and staple foods. Due to concern with the manner in which FNS is currently asking for retailer sales data, FNS is updating the retailer application question regarding sales. FNS is also removing the question concerning restaurant licensing and the requirement for businesses located in community property states to provide spousal information for each owner. Question 22 will revert back to asking

for percentages for each category as opposed to exact dollar amounts. FNS will also change from asking for individual sales amounts for each non-food category to asking for the percentage of total sales in gasoline and an aggregate percentage of all other total non-foods sold by the firm.

FNS intends to (1) rename Question 3, ''Doing Business As (if different from Store Name)'' to ''Legal Business Name (if different from Store Name)'', (2) update Question 14 to remove the sentence requiring spousal information for businesses located in community property states, and in the Business Title section remove the word ''spouse'' in questions 14a–14d, (3) delete Question 18 regarding restaurant licensing, (4) revise Question 22 concerning total retail sales in the following manner: (a) Respondents will provide a response for either estimated or actual sales for a one year period. If actual sales are provided, the respondent will indicate the applicable tax year for this information. FNS also added back in the option to provide estimated retail sales per day, week, month, or year for total retail sales in Question 22b, and (b) provide a percentage of total retail sales for each category of product sold: Staple foods; accessory foods; hot foods, cold foods prepared on site; gasoline, and other non-food items, (5) add a new sentence to the Certification and Signature Statement to more clearly outline the risk for owners that are disqualified or fined for violation of Program rules; and (6) where appropriate, re-number the questions and update assistance material such as the General and Specific Instructions sections and on-line help screens. With the exception of the question identified in 4(b) above, no new questions or data information is being asked.

A draft of the proposed revision to Question 22 is provided in Attachment A. FNS also shared a draft of the proposed changes with our stakeholders. The proposed revision incorporates the feedback FNS received with the exception of any changes that would render FNS unable to make an eligibility decision or complete retailer monitoring activities. FNS would like to take this opportunity to clarify that while cold foods prepared on-site, such as at an in-store deli or salad bar, are eligible for purchase with SNAP benefits, collection of the percentage sales information is still necessary for FNS to make a restaurant determination. Additionally, all information provided on the application is information ''provided by the retailer'' and is protected under Section 9(c) of the Food and Nutrition Act of 2008, as amended, (the Act) (7 U.S.C. 2011 *et seq.*) and as such, not subject to release under the Freedom of Information Act (FOIA). The feedback FNS incorporated includes asking for sales percentages as opposed to an exact sales amount for each category, removing the requirement to provide individual sales figures for lottery, tobacco, and alcohol, rewording ''cold prepared foods'' to ''cold food prepared on site,'' continuing to separate hots foods from cold foods, and clarifying the instructions for Question 22. The aggregated percentages of non-food sales, of accessory sales, and of gas sales, in particular, will provide FNS with an indicator as to whether a criteria B eligibility or restaurant assessment are necessary.

FNS estimates that the hourly burden time per response associated with this information collection for respondents remains unchanged from our previous submission. The revisions to the application(s) are due to program adjustments and the update to Question 3, the removal of a sentence in Question 14, the deletion of Question 18, the reformatting of information collected in Question 22; and the revision to the Certification and Signature Statement.

FNS used FY 2017 data in our calculation of burden estimates associated with this information collection as this was the most complete data available to us at this time. Table A below clarifies the burden of this information collection.

As currently approved by OMB, the hourly burden rate per response varies by the type of application used and the response time per respondent varies from 1 minute to 19 minutes. We estimate the new burden, on average, to be 9.13 minutes per respondent. There is no recordkeeping burden associated with these forms.

Affected Public: Business for Profit; Retail food stores; Farmers' Markets, Military Commissaries and Meal Services.

Estimated Number of Respondents: The total estimated number of respondents is 143,354 annually.

Estimated Number of Responses per Respondent: Respondents complete either 1 application form at initial authorization or 1 reauthorization application, as appropriate, for a total of 1 response each.

Estimated Total Annual Responses: 143,354.

Estimated Time per Response: 9.13 minutes (0.1534941). The estimated time response varies from 1 minute to 19 minutes depending on respondent group, as shown in the table below:

TABLE A—REPORTING ESTIMATE OF HOUR BURDEN

[Summary of burden—#0584–0008]

Affected public	Respondent type	(a) Description of collection activity	(b) Form No.	(c) Number of respondents	(d) Number of responses per respondent	(e) Total annual responses (cxd)	(f) Hours per response	(g) Total burden (exf)

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Forest Service

Humboldt-Toiyabe National Forest; Clark Counties, Nevada; Lee Canyon Notice of Availability

AGENCY: Forest Service, USDA.

ACTION: Notice of Availability of the Draft Environmental Impact Statement for the Lee Canyon Ski Area Master Development Plan Phase I and Public Comment Period for the Associated Forest Plan Amendment.

SUMMARY: The Humboldt-Toiyabe National Forest is issuing this notice to advise the public of the 45-day public comment period for the Draft Environmental Impact Statement (EIS) for the Lee Canyon Ski Area Master Development Plan Phase I (Lee Canyon Project) and the addition of a proposed project-specific amendment to the Toiyabe National Forest Land and Resource Management Plan (Forest Plan) for the Proposed Action and alternatives other than the No Action alternative. The Notice of Intent for the Lee Canyon Project was published in the **Federal Register** on March 23, 2017 (82 FR 14865). Today's notice has been published to ensure all persons and entities interested in the Lee Canyon Project are aware of the addition of the proposed amendment and to identify the Forest Service planning rule provisions likely to be directly related and, therefore, applicable to the Forest Plan amendment. The public is advised that during the 45 day comment period for the Lee Canyon Project Draft EIS, comments may also be submitted regarding the substantive requirements that are likely to be directly related to the amendment and the scope and scale to which the substantive requirements would apply. Comments will be considered in the preparation of the Final EIS and Draft Record of Decision for the Lee Canyon Project.

DATES: The comment period ends 45 days after today's Notice of Availability or 45 days after the Environmental Protection Agency's Notice of Availability is published in the **Federal Register**, whichever is later. All relevant comments received during the public comment period related to the substantive requirements that would likely be directly related to the proposed Forest Plan amendment and the scope and scale of the proposed Forest Plan amendment will be considered in the preparation of the Final EIS and Draft Record of Decision (ROD).

ADDRESSES: Comments may be submitted by any one of the following methods:

- *Electronic Submissions:* Comments can be filed electronically at: *leecanyoneis@fs.fed.us.* Electronic comments must be submitted as part of the email message or as an attachment in plain text (.txt), Microsoft Word (.doc), rich text format (.rtf), or portable document format (.pdf). Emails submitted to addresses other than the one listed above, or in formats other than those listed or containing viruses, will be rejected.
- *Mail:* Written, specific comments must be submitted to Donn Christiansen, Area Manager, Spring Mountains National Recreation Area, 701 Torrey Pines Dr., Las Vegas, NV 89130.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period may not be considered by the Forest. All comments received are part of the public record and will generally be posted for public viewing without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible.

FOR FURTHER INFORMATION CONTACT: Chris Linehan, Interdisciplinary Team Leader, at (702) 515–5401, or via email at *clinehan@fs.fed.us.* Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday. Information about the Lee Canyon Project may be found on the Forest Service website at *http://www.fs.usda.gov/project/?project=50649.*

SUPPLEMENTARY INFORMATION: The purpose and need for the proposed Lee Canyon Project, as described in the Notice of Intent, is to address the length of time since the resort's facilities have been upgraded and emerging trends in winter recreation. Specific details of these needs are described in Draft EIS. The purpose and need for the proposed plan amendment is to ensure consistency between the Forest Plan and the proposed Lee Canyon Project. As described in the Draft EIS, the need was identified for exempting the Lee Canyon Project from the following Standards of the 1996 Spring Mountains National Recreation Area (SMNRA) General

Management Plan (GMP) (Amendment five of the Forest Plan):

SMNRA-wide Standards and Guidelines: (GMP Standard 0.31) New roads, administrative facilities, and developed recreation sites other than low-impact facilities (trails, trailhead parking, signs, restrooms, etc.) will be outside a 100-yard buffer zone around known Clokey's eggvetch and rough angelica populations or potential habitat, and outside biodiversity hotspots (defined as areas of particular diversity or sensitivity).

The need for this Forest Plan amendment is that in the Lee Canyon Proposed Action new service roads, and ski area facilities would occur within the 100-yard buffer zone established around known Clokey's eggvetch and rough angelica populations or potential habitat. These areas have been thoroughly inventoried for these species and none were found within the project foot print. This project-specific Forest Plan amendment will allow development within the 100-yard buffer zones for these two-species established in the Standard GMP 0.31 (p. 18) to allow for construction of service roads and ski area facilities.

Under the Proposed Action and other action alternatives, Standard GMP 0.31 would be amended to allow new service roads and developed recreation sites to be placed within the 100-yard buffer zone around known Clokey's eggvetch and rough angelica populations or potential habitat, and within biodiversity hotspots in the Lee Canyon Special Use Permit Boundary.

Management Area 11: (11.57) Allow limited expansion of ski area in Lee Canyon and enhancement of skiing opportunities and facilities within the scope of an approved master development plan and under the following constraints:

1. Expansion occurs within the existing sub-basin.
2. Does not impact any threatened, endangered, or sensitive species or species of concern or its habitat.
3. Expansion is commensurate with development of additional parking in the lower Lee Canyon area and shuttle services.
4. Expansion incorporates defensible space design and fire safe facilities.
5. Where consistent with other standards and guidelines.

The need for this Forest Plan amendment is that the Proposed Action and other action alternatives include development of ski runs, mountain coasters, zip lines, mountain bike trails, parking areas, and access roads within the Lee Canyon Ski Area permitted boundary. As the Mount Charleston Blue Butterfly was listed as a endangered species in 2015 and the designated critical habitat for the butterfly includes portions of the Lee Canyon Ski Area, Constraint #2 from the standard cannot be met. The Proposed Action and other action alternatives also include the addition of a 500 vehicle parking lot at the ski area to accommodate increased visitor use without the development of additional parking in lower Lee Canyon or shuttle services. The project-specifc Forest Plan Amendment would exempt the project from the requirements under Constraint #2 and Constraint #3.

The substantive requirements of the 2012 Planning Rule (36 CFR part 219) likely to be directly related and, therefore, applicable to the Forest Plan amendment for the Lee Canyon Project are in 36 CFR 219.9(b) regarding threatened and endangered species and 36 CFR 219.10(a)(1), (3), and (7) regarding integrated resource management for multiple use. The scope and scale to which these substantive requirements would apply are the scope and scale of the Lee Canyon Project. The amendment would not apply to any other projects or activities.

Responsible Official

The Responsible Official for the Lee Canyon Project and the Forest Plan amendment is William A. Dunkelberger, Forest Supervisor, Humboldt-Toiyabe National Forest Supervisor's Office, 1200 Franklin Way, Sparks, Nevada 89431, phone (775) 355–5310.

Decision To Be Made

In consideration of the stated purpose and need and the analysis of environmental effects documented in this EIS, the Responsible Official will review the proposed action and alternatives in order to make the following decisions:

- Whether to authorize the proposed action or an alternative, including the required no-action alternative, all or in part;
- What design criteria and mitigation measures to require as a condition of the authorization;
- What evaluation methods and documentation to require for monitoring project implementation and mitigation effectiveness; and
- Whether to amend the Forest Plan to exempt the project from Standard GMP 0.31 and from Constraints #2 and #3 of Standard GMP Management Area 11.57.

Administrative Review

The Lee Canyon Project and the Forest Plan amendment will be subject to objection under 36 CFR part 218.

Dated: May 7, 2018.

Chris French,

Associate Deputy Chief, National Forest System.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Rural Business-Cooperative Service

Rural Housing Service

Rural Utilities Service

Rural Development Cooperative Agreement Program

AGENCY: Rural Development USDA.

ACTION: Notice.

SUMMARY: The Assistant to the Secretary for Rural Development (Agency) is seeking applications to support regional economic development planning efforts in rural communities under the Rural Economic Development Innovation (REDI) initiative. This funding opportunity will be administered by the Rural Development Innovation Center, in partnership with the Rural Business-Cooperative Service. The Agency is announcing up to $750,000 in competitive cooperative agreement funds in fiscal year (FY) 2018. Rural Development Agency may select one, multiple, or no award recipients. The Agency reserves the right to withhold the awarding of any funds if no application receives a score of at least 60 points.

This Notice lists the information needed to submit an application for these funds. This Notice announces that the Agency is accepting FY 2018 applications to support REDI.

DATES: The deadline for receipt of a complete application is midnight Eastern Standard Time on Wednesday, September 5, via *www.grants.gov.* The Agency will not consider any application received after the deadline. After an applicant submits an application via *grants.gov*, all applicants must email *RD.Innovation@osec.usda.gov* to confirm application and receipt of the application package. Applicants who have been selected for funding will receive a letter of official notification and will be awarded a cooperative agreement authorized under 7 U.S.C. 2204b(b)(4). Pending funding availability, all awards will be made no later than September 30, 2018.

Applicants should plan their projects based on a start date of September 30, 2018 and must be completed within 24 months.

ADDRESSES: The deadline for receipt of an application is midnight Eastern Standard Time on Wednesday, September 5, 2018. Applications may be submitted electronically through the *Grants.gov* system or through email to *RD.Innovation@osec.usda.gov.* Note that there are registration requirements for submitting applications using the *Grants.gov* system. We recommend that you review the instructions for registering as soon as possible, but at least two weeks before you plan to submit your application. The requirements can be viewed at: *http://grants.gov/applicants/organization_registration.jsp.* Your application will be rejected by *Grants.gov* if you miss the deadline and the Agency will not consider any application received after the deadline.

FOR FURTHER INFORMATION CONTACT: Question about this announcement can be directed to Christine Sorensen, Regional Coordinator, via 202–568–9832 or *Christine.Sorensen@wdc.usda.gov.*

SUPPLEMENTARY INFORMATION:

Preface

The Agency encourages applications that will support recommendations made in the Rural Prosperity Task Force report to help improve life in rural America (*www.usda.gov/ruralprosperity*). Applicants are encouraged to consider projects that provide measurable results in helping rural communities build robust and sustainable economies through strategic investments in infrastructure, partnerships, and innovation. Key strategies include:

- Achieving e-Connectivity for Rural America.
- Developing the Rural Economy.
- Harnessing Technological Innovation.
- Supporting a Rural Workforce.
- Improving Quality of Life.

Paperwork Reduction Act

It is anticipated that the anticipated number of respondents affected by this information collection is less than 10 entities and therefore, this Notice contains no reporting or recordkeeping provisions requiring Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Overview

Federal Agency Name: U.S. Department of Agriculture, Rural Development.

Funding Opportunity Title: Rural Development Cooperative Agreement Program.

Announcement Type: Notice of Funding Availability (NOFA).

Catalog of Federal Domestic Assistance (CFDA) Number: 10.890.

Application Due Date: All required application documents must be submitted by midnight Eastern Standard Time on Wednesday, September 5 electronically via *www.grants.gov.* Applicants submitting proposals must also confirm receipt and email *RD.Innovation@osec.usda.gov* to confirm application and receipt of the application package. Applicants who have been selected for funding will receive a letter of official notification. Pending funding availability, all awards will be made no later than September 30, 2018. Applicants should plan their projects based on a start date of September 30, 2018 and must be completed within 24 months.

For More Information: Questions about this announcement can be directed to Christine Sorensen, Regional Coordinator, via 202–568–9832 or *Christine.Sorensen@wdc.usda.gov.*

A. Program Description

USDA Rural Development (RD) is authorized to administer cooperative agreement awards in accordance with 7 U.S.C. 2204b(b)(4). Rural Economic Development Innovation (REDI) aims to strengthen the capacity of rural communities (50,000 people or less in the United States plus Tribes and territories) in implementing strategic community and economic development plans as referenced in Section 379H of the Consolidated Farm and Rural Development Act (7 U.S.C. 2008v). The goal of this funding announcement is to solicit applications to provide cooperative agreement funding to eligible applicants to enable them to provide technical assistance and training and actionable planning of implementation of strategic community and economic development plans. Supporting regional economic development plans help rural communities overcome multi-jurisdictional challenges and better leverage Federal, state, local or private funding.

For purposes of this proposal, a quality regional economic plan will include but not be limited to the following:

- Evidence-based understanding of community assets, challenges and opportunities.
- Goals are focused, logical, targeted and timely with tasks identified and with a responsible party assigned.
- The plan was created through broad community participation, public input and buy-in.
- The format must be persuasive in a non-technical manner.
- The plan makes clear how each of its strategies is intended to help produce, either directly or indirectly, improvements in the local and regional economy.
- Regional economic development plans developed through REDI assistance should identify possible projects to be funded through RD programs and/or other Federal, state, local or private sector resources.

This funding opportunity expands rural communities' ability to access planning resources to convene, identify needs, create actionable economic development plans, and implement project priorities to improve quality of life in rural communities. Quality of life is a measure of human well-being that can be identified though economic and social indicators. Modern utilities, affordable housing, efficient transportation and reliable employment are economic indicators that must be integrated with social indicators like access to medical services, public safety, education and community resilience to empower rural communities to thrive. Economic development plans developed through this funding opportunity should focus on one or more of these economic and/or social indicators.

Applicants are encouraged to consider regional planning projects that provide measurable results in helping rural communities built robust and sustainable economies through strategic investments in infrastructure, partnerships, and innovation. Such projects should also support rural communities' ability to qualify for priority funding under Section 379H of the Consolidated Farm and Rural Development Act [7 U.S.C. 2008v].

This approach to comprehensive rural community development is unique in its attempt to improve rural communities in a way that is (1) rooted in emphasizing partnerships and collaboration among multiple public agencies and community partners and (2) focused on combining state resources to make wide-ranging quality-of-life impacts as opposed to separate, piecemeal, incremental improvements.

B. Federal Award Information

1. *Estimated Funding:* Interested applicants shall only propose applications with scope of work/budget that does not exceed $750,000 in Federal funding.

2. *Start Date and Performance Period:* Projects may be up to 2 years in duration. Applicants should plan their projects based on a project start date of September 30, 2018 and a project end date of no later than September 30, 2020.

3. *Type of Federal Award:* Cooperative Agreement. Rural Development will be substantially involved in the work performed under each approved cooperative agreement. Substantial involvement may include but is not limited to collaboration, participation, oversight, and control of the following:

i. Authority to suspend work if specification or work statements are not met;

ii. Review and approval of one stage of work before another may begin;

iii. Review and approval of substantive provisions of proposed sub-grants or contracts;

iv. Prior review and approval of key personnel; and

v. Agency collaboration and coordination with respect to deliverables and execution of the work plan. At a minimum, applicants should anticipate Agency participation in the selection of communities to receive regional planning assistance; the convening of community members, partners, and stakeholders; the delivery of training on RD programs and/or economic development principles; and the review/approval of regional economic development plans for purposes of priority funding under Section 379H of the Consolidated Farm and Rural Development Act (7 U.S.C. 2008v).

4. *Number of Awards:* The Agency anticipates that it may select one, multiple, or no award recipients from this notice of funding availability. The Agency reserves the right to withhold the awarding of any funds if no application receives a minimum score of at least 60 points.

5. *Eligibility of renewal or Supplemental Project Applications:* Applications for renewal or supplementation of any existing Federal awards are not eligible for this new Federal award. An application for renewal means a proposal submitted to continue an existing agreement by adding components to an existing agreement in order to meet the objectives of this solicitation.

C. Eligibility Information

Applicants must meet all of the following eligibility requirements by the application deadline. Applications which fail to meet any of these requirements by the application deadline will be deemed ineligible and will not be evaluated further and will not receive a Federal award.

1. *Applicant Eligibility:* Federally-recognized Tribes, institutions of higher education, nonprofit organizations, or private organizations with a demonstrated *national structure and/or capacity* to deliver and support multiple rural planning activities across the nation are eligible applicants. Entities are not eligible if they have been debarred or suspended or otherwise excluded from or ineligible for participation in Federal assistance programs under Executive Order 12549, ''Debarment and Suspension.'' In addition, an applicant will be considered ineligible for a cooperative agreement due to an outstanding judgment obtained by the U.S. in a Federal Court (other than U.S. Tax Court), is delinquent on the payment of Federal income taxes, or is delinquent on Federal debt.

2. *Eligible Project Purposes:* The Project purpose must be to strengthen the capacity of rural communities (50,000 people or less in the United States plus Tribes and territories) in developing and implementing regional plans for economic development as referenced in Section 379H of the Consolidated Farm and Rural Development Act. Eligible project purposes must include the two facets of technical assistance:

i. *Planning Technical Assistance:* The proposed project should provide planning technical assistance to rural communities by assisting in the development of regional economic development plans. Proposals should include descriptions on how technical assistance will result in actionable steps to support implementation of these plans. The proposed project should also provide technical assistance to expand rural communities' ability to access funding and planning resources to convene community members.

ii. *Implementation Technical Assistance:* The proposed project should provide technical assistance toward implementation of the project priorities emerging from the regional economic development plans. The technical assistance should include strategies for enhancing communities' efforts at leveraging Federal, state, local, and/or private funding to build resilient communities and improve quality of life. The applicant will demonstrate how their proposal will utilize partnerships outside of RD. The applicant will identify such partnerships and will demonstrate how they will provide access to such partnerships to support implementation of projects identified through development of regional economic development plans. The proposed project should also describe how it will support implementation of multi-jurisdictional and/or multi-sector regional economic development plans, as described in Section 379H of the Consolidated Farm and Rural Development Act.

3. *Cost Sharing or Matching Requirements:* There is a dollar or in-kind matching requirement that is at least equal to the amount of the cooperative agreement award. If this matching fund requirement is not met, the application will be deemed ineligible. Matching requirements are cash, confirmed funding commitments and/or third party in-kind contributions as defined in 2 CFR 200.96. that are at least equal to the cooperative agreement amount and committed for a period of not less than the cooperative agreement performance period. Applicants must recruit one or more private and/or public partner(s) to match one-for-one (in cash and/or in-kind contributions) the applicant's proposed funding request. Cost sharing/matching must be committed at the time of application submission. Applications must include written verification of commitments of cost sharing or matching support (including both cash and in-kind contributions) from third parties. Cost sharing or matching funds must meet the criteria stated at 2 CFR 200.306 and be valued in accordance with 2 CFR 200.306(d).

Additional details about cost sharing or matching funds/contributions is located at 2 CFR 200.306. Applicant matching funds must be included in the budget narrative. For matching funds offered by project partners, a separate commitment letter is required for each cash and/or in-kind match contribution. Commitment letters must be signed by the authorized organizational representative of the contributing organization and the applicant organization, which must include: (i) The name, address, and telephone number of the contributor; (ii) the name of the applicant organization; (iii) the title of the project for which the contribution is made, (iv) the dollar amount of the contribution; and (v) a statement that the contributor commits to furnish the contribution during the cooperative agreement period.

Applications without signed written commitments are deemed incomplete and will be ineligible. The value of applicant contributions to the project is established according to Federal cost principles. Applicants should refer to 2 CFR 200.306 for additional guidance on matching funds, in-kind contributions, and allowable costs.

4. Substantial Involvement: Proposed project must include a component that allows for active participation by the Agency in the majority of tasks. Examples of substantial involvement include but are not limited to the following: Joint-selection of communities to receive regional planning assistance; joint-convening of community members, partners, and stakeholders; joint-delivery of training on RD programs and/or economic development principles; and joint-review/approval of regional economic development plans for purposes of priority funding under Section 6025 Strategic Economic and Community Development. It is the intent of this project to engage Agency and state RD staff in the development of regional economic development plans and it is the responsibility of the applicant to identify tasks where RD staff can provide substantial involvement in the project. If you do not identify those tasks, your application is not eligible for funding.

5. *Use of Funds:* Use of project funds (including Federal and matching) must be consistent with the project purpose to strengthen the capacity of rural communities in developing and implementing regional plans for economic development. A non-exclusive list of eligible fund uses include: Costs incurred for the services of personnel actually engaged in the project, including share of employee benefits, travel and per diem expenses, costs of expendable supplies, and travel and per diem expenses associated with travel to USDA Headquarters in Washington, DC to coordinate and collaborate on project tasks. Use of funds must be allowable in adherence with 2 CFR part 200.

If you include funds in your budget that are unallowable, RD will consider the application for funding only if the unallowable costs total 10 percent or less of the total project budget, including Federal and matching funds. However, if the application is successful, those unallowable costs must be removed from the budget before RD will make an award. If RD cannot determine the percentage of unallowable costs or the amount of those costs exceeds 10 percent of the total project budget, the application will not be considered for funding.

6. *Rural Area:* The project must directly benefit a rural area. All ultimate beneficiaries and/or subrecipients must be located in rural areas, and any activities or tasks must occur in rural areas. The term 'rural area' means the Rural Business Service's Rural Area definition as out lined in Section 343(a)(13)(A)(i) of the Consolidated Farm and Rural Development Act which states: Any area other than: (1) A city or town that has a population of greater than 50,000 inhabitants; and (2) any urbanized area contiguous and adjacent to such a city or town.

7. *Number of Applications:* You cannot submit more than one application for this Notice.

D. Application and Submission Information

1. *Address to Request Application Page.* All necessary forms can be found within the *Grants.gov* ''Application Package.''

2. *Content and Form of Application Submission.* There is no pre-application process for this announcement. All checklist, application, and standard forms necessary for submission are included in the *Grants.gov* application package. Applications that are incomplete or fail to comply with the required content and formatting requirements will not be considered for funding.

i. *Content and Format:* Each page must be on numbered, letter-sized (8½ x 11) paper utilizing a white background that has 1″ margins; and the text of the application must be typed, single spaced, black, and in a font no smaller than 12 point.

ii. *Executive Summary (1-page maximum):* On a single page, provide the applicant entity name, duration of project in months, amount of Federal funding requested, amount of non-Federal cost-share/match funding committed, and project title. Identify geographic locations, and describe in non-technical language the issue or problem rural communities have in accessing economic development planning resources, the objectives to address this issue, the innovative approach to be employed (including the role of participating partners), how impact will be quantified, and the predicted benefits or deliverables of the project.

iii. *Standard Application Form:* Standard Form 424, ''Application for Federal Assistance'' is included as part of the application package posted on *Grants.gov*. Instructions for completing the form are also included.

iv. *Applicant Qualifications (1–2 pages):* Summary of the qualifications of the applicant organization is required. Interested applicant must have the organizational capacity, experience, and knowledge of rural planning needs and must meet the following minimum requirements:

a. Demonstrate *national structure and/or capacity* to support multiple rural planning activities across the nation;

b. Demonstrate *knowledge and prior experience* in regional planning, particularly related to rural issues;

c. Demonstrate *capacity* to assist rural communities to develop regional plans such as access to data for needs assessment and planners and other technical capacity on staff; and

d. Demonstrate *knowledge and prior experience* of leveraging other community-driven plans or projects such as Comprehensive Economic Development Strategies (CEDS) or other Federally-recognized regional economic development plans.

v. *Key Personnel Qualifications (1–2 pages):* Summary of the qualifications of each key person, including the project director, is required. Resumes or CVs will not be accepted. The summary should include relevant education, years of relevant experience, a description of skills relevant to the person's work on the proposed project, and the person's key accomplishments. If you expect to contract out a portion of the proposed work, but have not hired the contractor, you must include a summary of the qualifications you will require from the contractor.

vi. *Project Proposal (15-page maximum):* The project proposal must include a proposed Work Plan, along with the following information in order:

a. Project Background.

b. Project Objectives.

c. Project Approach/Methods.

d. Theory of Change.

e. Geographic Locations or Project Areas.

f. Project Management (Applicants are required to include a Work Plan Chart that lists each major Task by Key Personnel involved, Time Period of the task, Substantial Involvement of Rural Development staff, Deliverables, and Budget associated with each task).

g. Performance Metrics.

h. Graphics, References, Citations (Do not count against the 15-page maximum).

A Work Plan Chart template is available for applicants as part of this funding opportunity on *grants.gov*.

vii. *Budget Information (10-page maximum):* The budget portion of the application consists of two parts as described below:

a. *Standard Form (SF) 424A, ''Budget Information'':* Non-Construction Programs. The SF–424A is included as part of the application package posted on *Grants.gov*.

b. *Detailed Budget Narrative:* Provide a detailed narrative in support of the budget for the project, broken down by task. Discuss how the budget specifically supports the proposed activities. Justify the project cost effectiveness and include justification for personnel and consultant salaries with a description of duties. Statement(s) of work for any subcontractors and consultants must be included as part of the application. The budget narrative should include both the Federal funds requested and the applicant's matching funds. The format of the budget narrative can be in a chart, spreadsheet, table, etc. It should be readable on letter-size, printable pages. The information needs to be presented in such a way that the reviewers can readily understand what expenses are incurred to support the project.

viii. *Certifications:* All proposals must include the following signed certification forms, which are available at *Grants.gov*:

a. AD–3030, ''Representations Regarding Felony Conviction and Tax Delinquent Status for Corporate Applicants.'' The AD–3030 must be submitted if entity is a corporate non-profit or for-profit corporation as indicated in the applicants SAM registration.

b. AD–3030, ''Representations Regarding Felony Conviction and Tax Delinquent Status for Corporate Applicants.'' The AD–3030 must be submitted if entity is a corporate non-profit or for-profit corporation as indicated in the applicants SAM registration.

c. SF–424B, ''Assurances for Non-Construction Programs.'' The SF–242B must be completed by all applicants.

d. SF–424B, ''Assurances for Non-Construction Programs.'' The SF–242B must be completed by all applicants.

ix. *Verification of Matching Funds.* You must provide verification of all matching funds that will be contributed to the project. You must include a letter signed by the donating organization's authorized representative on the organization's letterhead that identifies the amount of matching funds, the time period during which matching funds will be available, and the source of the funds (*e.g.,* cash on hand, etc.). See Section Eligibility Information (C 3) for more information.

x. *Risk Review:* The Agency may request additional documentation from selected applicants in order to evaluate the financial, management, and performance risk posed by awardees as required by 2 CFR 200.205. Based on this risk review, the Agency may apply special conditions that correspond to the degree of risk assessed.

xi. *National Environmental Policy Act:* This Notice has been reviewed in accordance with 7 CFR part 1970, ''Environmental Policies and Procedures.'' We have determined that an Environmental Impact Statement is not required because the issuance of regulations and instructions, as well as amendments to them, describing administrative and financial procedures for processing, approving, and implementing the Agency's financial programs is categorically excluded in the National Environmental Policy Act (NEPA) regulation found at 7 CFR 1970.53(f). We have determined that this Notice does not constitute a major Federal action significantly affecting the quality of the human environment.

xii. *Civil Rights Compliance Requirements:* All awards made under this Notice are subject to Title VI of the Civil Rights Act of 1964 as required by 7 CFR part 15, subpart A and Section 504 of the Rehabilitation Act of 1973.

3. *Unique entity identifier and System for Award Management (SAM).* DUNS and SAM Numbers: Each applicant (unless the applicant is an individual excepted from those requirements under 2 CFR 25.110(b) or (c), or has an exception approved by the Federal awarding agency under 2 CFR 25.110(d)) is required to: (i) Be registered in SAM before submitting its application; (ii) provide a valid unique entity identifier (Data Universal Numbering System (DUNS) number) in its application; and (iii) continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by a Federal awarding agency. The Agency may not make a Federal award to an applicant until the applicant has complied with all applicable unique entity identifier and SAM requirements and, if an applicant has not fully complied with the requirements by the time Agency is ready to make a Federal award, Agency may determine that the applicant is not qualified to receive a Federal award and use that determination as a basis for making a Federal award to another applicant. Applicants must obtain a DUNS and register in SAM prior to registering with *Grants.gov*. Applicants are strongly encouraged to apply early for their DUNS number and SAM registration.

i. *Data Universal Numbering System (DUNS) Number:* A DUNS number is a unique, nine-digit sequence recognized as the universal standard for identifying and keeping track of over 70 million businesses worldwide. Applicants must obtain a DUNS number. Information on how to obtain a DUNS number can be found at *http://fedgov.dnb.com/webform* or by calling 1–866–705–5711. Please note that the registration may take up to 14 business days to complete.

ii. *System for Award Management (SAM) Registration:* SAM is the official Federal system that consolidated the capabilities of Central Contractor Registry, Federal Agency Registration, Online Representations and Certifications Application, and Excluded Parties List System. To register, go to: *https://www.sam.gov/portal/public/SAM/.* Please allow a minimum of 5 days to complete the SAM registration.

4. *Submission Dates and Times.* Midnight Eastern Standard Time on September 5, 2018. You must submit your application using *Grants.gov* by the deadline date and time. Note that there are registration requirements for submitting applications using the *Grants.gov* system. We recommend that you review the instructions for registering as soon as possible, but at least two weeks before you plan to submit your application. The requirements can be viewed at: *http://grants.gov/applicants/organization_registration.jsp*. Your application will be rejected by *Grants.gov* if you miss the deadline. We will not accept it in a different format, and we will not consider it for funding.

i. *Acknowledgement of receipt: Grants.gov* provides receipt of application submissions. The Agency acknowledges receipt of proposals received by the submission deadline via email. An applicant who does not receive such an email acknowledgement within 5 business days of the submission deadline, but believes the proposal was submitted within the submission deadline, must contact the Agency at 202–568–9832 or *Christine.Sorensen@wdc.usda.gov* within 10 business days of the submission deadline. Failure to do so may result in the proposal not being considered.

ii. *Withdrawal:* Proposals may be withdrawn by written notice at any time before award execution. Written notice of withdrawal must be signed by the applicant or an authorized representative.

All required application documents must be submitted by midnight Eastern Standard Time on Wednesday,

September 5 via *www.grants.gov* AND by emailing *RD.Innovation@osec.usda.gov.*

Submitting an application through *www.grants.gov* requires completing a variety of tasks and steps. There are also several preliminary registration steps before the applicant can submit the application. To register in the *Grants.gov* system, go to *www.grants.gov,* click on ''Applicants'', then click on ''Get Registered.'' If you have completed a prior *Grants.gov* application, you may already have completed the registration process.

Please allow sufficient time to register in *Grants.gov*, and for possible system delays. Below are instructions for accessing the forms necessary to complete an application in *Grants.gov:*

i. Go to *www.grants.gov.* Information about submitting an application using *Grants.gov* is located on the *Grants.gov* website, along with supplementary materials.

ii. Select the ''Applicant'' tab.

iii. Select the ''Apply for Grants'' heading.

iv. Click on ''Get Application Package.'' Follow all steps.

v. Provide the ''Funding Opportunity Number'' or return to the ''Search Grants'' section.

vi. All necessary forms are included within the *Grants.gov* ''Application Package.''

Applications not received through *Grants.gov* by the submission due date and time are not accepted for consideration. The emailed application must be assembled into one pdf file document in the order specified in section IV, part A. All applications must contain all of the elements of a complete package and meet the requirements described in this announcement. *Grants.gov* provides instructions for submitting the required application items through the portal. Application receipt date and time will be determined by the respective system-generated documentation of receipt date and time (*Grants.gov* provides date and time stamps for all proposals submitted through the portal).

The Agency is not responsible for any technical malfunctions or website problems related to *Grants.gov* or emailed submissions. If you encounter issues with *Grants.gov*, please contact the *Grants.gov* help desk at (800) 518–4726 or *support@grants.gov.* The applicant assumes the risk of any delays in application submission through *Grants.gov*.

5. *Intergovernmental Review.* Intergovernmental Review: Executive Order (E.O.) 12372, Intergovernmental Review of Federal Programs, applies to this program. This E.O. requires that Federal agencies provide opportunities for consultation on proposed assistance with State and local governments. Many States have established a Single Point of Contact (SPOC) to facilitate this consultation. A list of States that maintain an SPOC may be obtained at: *http://www.whitehouse.gov/omb/grants_spoc.* If your State has an SPOC, you must submit your application directly for review. Any comments obtained through the SPOC must be provided to us for consideration as part of your application. If your State has not established an SPOC, we will submit your application to the appropriate agency or agencies at our discretion. Applications from Federally-recognized Indian Tribes are not subject to Intergovernmental Review.

6. *Funding Restrictions.*

i. Pre-award Costs. Pre-award costs are not authorized.

ii. Use of Funds. Award funds may be used to pay up to 50 percent of the project costs.

iii. Period of Performance. The maximum Period of Performance is 2 years. Applicants should anticipate a Period of Performance beginning September 30, 2018 and ending no later September 30, 2020.

iv. Indirect Cost Rate. The indirect cost rate is limited to 10 percent of direct charges for all nonprofit institutions, including institutions of higher education. All other organizations must use the rate identified in their Negotiated Indirect Cost Rate Approval (NICRA). If you do not have a NICRA, you may elect to charge only direct costs to the award. If you have never had a NICRA, you may also choose to use a de minimis rate of 10 percent of modified total direct costs in accordance with 2 CFR 200.414(f). Your indirect cost rate must be included on Form SF–424A.

v. Program Income. If you expect to earn Program Income during the Period of Performance, you must identify the amount and how you expect to use it (*e.g.* Matching Funds) in your application. If your application is funded, unexpected Program Income or Program Income earned in excess of the amount you identify in your application will be deducted from the Federal share of the project in accordance with 2 CFR 200.307(e)(1).

vi. Prohibited Costs. In addition to costs identified as unallowable by 2 CFR part 200, the following costs are prohibited for this program. Neither award funds nor matching funds can be used to pay for the following types of expenses.

a. Duplicating services currently provided;

b. Funding a revolving loan fund;

c. Construction (in any form);

d. Salaries for positions involved in construction, renovations, rehabilitation, and any oversight of these types of activities;

e. Intermediary preparation of strategic plans for recipients;

f. Funding prostitution, gambling, or any illegal activities;

g. Grants to individuals;

h. Funding a grant where there may be a conflict of interest, or an appearance of a conflict of interest, involving any action by the Agency;

i. Providing assistance to only one individual, organization, or business;

j. Paying obligations incurred before the beginning date without prior Agency approval or after the ending date of the cooperative agreement;

k. Purchasing real estate;

l. Improvement or renovation of the recipient's office space or for the repair or maintenance of privately owned vehicles;

m. Any purpose prohibited in 2 CFR part 200 or 400;

n. Using cooperative agreement assistance or matching funds for Individual Development Accounts;

o. Purchasing vehicles.

V. Application Review Information

Applications will first be reviewed to determine if they meet the eligibility requirements and comply with the funding restrictions in this Notice. If we determine that your application is ineligible, we will discontinue processing it, which means that we will not evaluate it further or provide any scoring information. We will notify you in writing regarding the reason(s) for ineligibility, and we will provide a description of your options if you believe that our determination is incorrect. Note that in the event that our determination is reversed, either due to the discovery of an Agency error or through a formal appeal, funding is restricted to available fiscal year 2018 funds.

If your application is determined to be eligible, we will further evaluate it based on the following criteria. All applications will be competitively ranked and the minimum score requirements for a cooperative agreement award under this Notice is 60 points.

1. *Evaluation Criteria:* We will only use the information that you provide in your application to evaluate your proposed project. We will not review references to websites or publications, so we encourage you to fully address each criterion.

i. Soundness of Approach (0–20 points). The applicant can receive up to 20 points for soundness of approach. The maximum 20 points for this criterion will be based on the following:

a. The objectives must be clearly stated in the proposal and the applicant must define how this proposal will be implemented. The applicant must demonstrate how the proposal will strengthen the capacity of rural communities in developing and implementing regional plans for economic development. The applicant must demonstrate how the proposed technical assistance includes both the planning and implementation components referenced in Section C. The applicant must also demonstrate how the proposed technical assistance will expand rural communities' ability to access funding and planning resources to convene community members. The applicant must also demonstrate how the proposal will support implementation of regional economic development plans and should include descriptions on how proposed technical assistance will result in actionable steps to support implementation of these plans. (10 points)

b. The applicant clearly outlines their ability to provide the proposed technical assistance based on clearly stated and well-documented prior accomplishments. (5 points)

c. The proposal clearly outlines how it will implement activities to support alignment with one or more of the five key strategies (achieving e-connectivity, developing the rural economy, harnessing technological innovation, supporting a rural workforce, and improving quality of life in Rural America) the Agriculture and Rural Prosperity Task Force Report. (5 points)

ii. Partnerships (0–25 points). The applicant can receive up to 25 points for quality of the applicant's existing partnerships and proposed new partnerships for this effort. The applicant must recruit one or more private and/or public partners to meet match requirements and maximize leveraging of regional economic development plans developed through this project. The maximum 25 points for this criterion will be based on the following:

a. The applicant demonstrates how their proposal will focus on the quantity and quality of partnerships, including the ability to leverage new partners that have previously had limited engagement with RD projects or priorities to leverage resources, enhance technical assistance, and/or increase reach to underserved areas. The proposal must demonstrate that partners with shared missions and goals will be engaged to amplify reach in rural areas. (10 points)

b. The applicant demonstrates how their proposal will support the quantity and quality of match commitments to support this project, and percentage of match in cash form versus in-kind contributions. (5 points)

c. The applicant will demonstrate how their proposal will support the ability of applicant to leverage other community-driven plans or projects such as Comprehensive Economic Development Strategies (CEDS) or other Federally-recognized regional economic development plans. (5 points)

d. The applicant will demonstrate how their proposal will utilize partnerships outside of RD. The applicant will identify such partnerships and will demonstrate how they will provide access to such partnerships to support implementation of projects identified through development of regional economic development plans. (10 points)

iii. Innovation (0–10 points). The applicant can receive up to 10 points for innovative methods and practices to support development of regional economic development plans. The maximum 10 points for this criterion will be based on the following:

a. The applicant's proposal should demonstrate the ability of the applicant to propose methods and practices to utilize unique and innovative planning methods that are currently not being implemented at scale. (5 points)

b. The applicant's proposal should demonstrate the ability of the applicant to demonstrate that the proposed innovative methods and practices have been field-tested and ready to scale. (5 points) We are looking for unique and innovative ideas that are not currently being implemented at scale, so projects that propose innovative solutions that haven't been readily deployed before will receive higher points.

iv. Organizational Capacity & Qualifications (0–15 points). The applicant can receive up to 15 points based on organizational capacity and qualifications. The maximum 15 points for this criterion will be based on the following:

a. The applicant's proposal should demonstrate that the applicant has knowledge and prior experience in regional planning, particularly related to rural issues. The applicant should specify years of experience, types of communities served, and outcomes achieved. (10 points)

b. The applicant's proposal should demonstrate that the applicant has identified appropriate key personnel, both in terms of number of personnel and qualifications of personnel, to carry out the approach identified. Capacity of personnel to access data for needs assessments and access to planners and other technical experts will be evaluated. (5 points)

v. Work Plan (0–15 points). The applicant can receive up to 15 points based on the quality of the proposed work plan and approach. The maximum 15 points for this criterion will be based on the following:

a. Applicants should use the approved work plan template to include the following information: Description of objective, background approach, timeframe for key tasks along with substantial involvement, budget and deliverables that are necessary to implement project to support regional economic development planning in rural communities. Reasonableness and appropriateness of key tasks will be evaluated based on proposed project approach. (5 points)

b. The applicant's proposal should include a description of the types and general locations of rural communities to be served through this project, including the ability to support multiple rural planning activities across the nation and the reasonableness of effectively serving these communities based on key personnel, established timeframes, and budget. (5 points)

c. The applicant's proposal should include a description and appropriateness of the tasks to incorporate active participation from RD staff. (5 points)

vi. Performance Outcomes (0–15 points). The applicant can receive up to 15 points based on the quality of the proposed performance measures to evaluate progress and impacts of proposed project. The maximum 15 points for this criterion will be based on the following:

a. The applicant's proposal should include a description for how the results of the technical assistance will be measured, including the benchmarks to be used to measure effectiveness. Benchmarks should be specific and quantifiable. (10 points)

b. The applicant's proposal should include a description of benchmarks and outcomes achieved during previously deployed planning efforts. (5 points)

2. *Review and Selection Process:* All eligible applications will be evaluated based on the process described below.

i. Review Process. All eligible applications will be evaluated by an Application Review Panel using the criteria described in Section E.1 of this Notice. Panel members will be

appointed by the Agency and they will be qualified to evaluate the applications, based on the type of work proposed by the applicant.

ii. Selection Process. Applications will be ranked in descending order, according to the scores awarded by the Panel. Applications will be funded in rank order, until all available funds have been expended. Applications at or near the funding line may be funded in part, if the Agency believes an appropriate benefit can result from partial funding and if the applicant agrees to the amount of partial funding. In the event the Agency considers partial funding to be appropriate, we will contact the applicant and negotiate the final work plan and budget prior to approving an award.

iii. Anticipated Announcement and Award Dates. All awards must be obligated by September 30, 2018.

VI. Award Administration Information

1. Federal Award Notices:

i. Successful applicants. Successful applicants will be notified in writing by *the Agency* with a Letter of Conditions (LOC). The LOC is a notice of selection and does not indicate that an award has been approved, nor is it an authorization to begin performance on the award. While there may be special conditions that apply on a case-by-case basis, the following conditions are standard for all successful applicants.

a. Complete Form RD 1942–46, ''Letter of Intent to Meet Conditions.''

b. Complete Form RD 1940–1, ''Request for Obligation of Funds.''

c. Complete FMMI Vendor Code Request Form.

d. Provide a copy of your organization's Negotiated Indirect Cost Rate Agreement.

e. Certify that all work completed for the award will benefit a rural area.

f. Certify that you will comply with the Federal Funding Accountability and Transparency Act of 2006 and report information about subawards and executive compensation.

g. Certify that the U.S. has not obtained an outstanding judgement against your organization in a Federal Court (other than in the United States Tax Court).

h. Execute Form SF–424B, ''Assurances—Non-Construction Programs.''

i. Execute Form SF–LLL, ''Disclosure Form to Report Lobbying,'' if applicable or certify that your organization does not lobby.

j. Execute Form AD–1047, ''Certification Regarding Debarment, Suspension, and Other Responsibility Matters-Primary Covered Transactions.''

k. Obtain a certification on Form AD–1048, ''Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions,'' from anyone you do business with as a result of this award.

l. Execute Form AD–1049, ''Certification Regarding a Drug-Free Workplace Requirements (Grants).''

m. Execute Form AD–3031, ''Assurance Regarding Felony Conviction or Tax Delinquent Status for Corporate Applicants.''

n. Execute Form RD 400–4, ''Assurance Agreement.''

Once the conditions described in the LOC have been met, the award will be approved through the execution of Form RD 4280–2 in conjunction with the RDCA Program Attachment. If an applicant is unable to meet the conditions of the award within 90 calendar days, the award will be withdrawn.

ii. Unsuccessful applicants. Unsuccessful applicants will be notified in writing no later than October 31, 2018.

2. Administrative and National Policy Requirements. The terms of the award are available at: *http://forms.sc.egov.usda.gov/efcommon/eFileServices/eForms/RD4280-2.PDF.*

3. Reporting Requirements. The following reporting requirements apply to awards made through this program.

i. *Performance Reports:* Form SF–PPR, ''Performance Progress Report,'' must be submitted quarterly based on the following time periods: January 1–March 31, April 1–June 30, July 1–September 30, and October 1–December 31. Quarterly reports are due within 30 calendar days of the end of the reporting period. A final report is due within 90 calendar days of the completion of the project or the end of the period of performance, whichever comes first. Both quarterly and final performance reports must be submitted electronically to 202–568–9832 or *Christine.Sorensen@wdc.usda.gov.*

ii. *Financial Report:* Form SF–425, ''Federal Financial Report'' must be submitted quarterly based on the following time periods: January 1–March 31, April 1–June 30, July 1–September 30, October 1–December 31. Quarterly reports are due within 30 calendar days of the end of the reporting period. A final report is due within 90 calendar days of the completion of the project or the end of the period of performance, whichever is comes first. Both quarterly and final reports must be submitted electronically to *Christine.Sorensen@wdc.usda.gov.*

iii. *Report Suitable for Public Distribution:* A report suitable for public distribution that describes the accomplishments of the project is due within 90 calendar days of the completion of the project. There is no format prescribed for this report, but it is expected that it will be 1–2 pages in length and describe the project in such a way that a member of the public not familiar with the project would gain an understanding of the impact of the project.

VII. Federal Awarding Agency Contact

If you have questions, you may contact Christine Sorensen at 202–568–9832 or *Christine.Sorensen@wdc.usda.gov.*

VIII. Notice to Applicants

The Federal Government is not obligated to make any Federal award as a result of this announcement. Only authorized Federal officials can bind the Federal Government to the expenditure of funds.

IX. Nondiscrimination Statement

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program. Political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARTET Center at (202) 720–2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at: *http://www.ascr.usda.gov/complaint_filing_cust.html,* and at any USDA office or write a letter addressed to USDA and provide in the letter all of the

information requested in the form. To request a copy of a complaint form, call, (866) 632–9992. Submit your completed form or letter to USDA by:

1. *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410;

2. *Fax:* (202) 690–7442; or

3. *Email at: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Dated: August 10, 2018.

Anne Hazlett,

Assistant to the Secretary, USDA Rural Development.

DEPARTMENT OF AGRICULTURE

Rural Housing Service

Establishment of Maximum Interest Rate

AGENCY: Rural Housing Service, USDA.

ACTION: Request for information.

SUMMARY: The Rural Housing Service (RHS or Agency) seeks public comments on updating the provisions of the Single Family Housing Guaranteed Loan Program (SFHGLP), specifically regarding the maximum interest rate, its impact on loan making to potential SFHGLP borrowers, and possible changes to the interest rate cap. RHS is soliciting input regarding the maximum interest rate to help the Agency determine whether the interest rate cap should be modified in order to support the agency's mission to offer applicants, who are unable to secure the credit necessary for such housing from other sources under conventional credit terms, an opportunity to acquire new or existing housing for use as a primary residence; finance the repair and rehabilitation costs associated with the purchase of the home; and refinance an existing Section 502 loan to lower the interest rate.

These opportunities are provided to applicants under terms and conditions which the applicant can reasonably be expected to fulfill.

DATES: Written Comments: Interested parties must submit written comments on or before October 16, 2018.

ADDRESSES: Submit comments in either paper or electronic format by the following methods:

- Federal eRulemaking Portal at *http://www.regulations.gov.* Follow instructions for submitting comments.
- *Postal Mail/Commercial Delivery:* Please send your comments addressed to Kate Jensen, Finance and Loan Analyst, Single Family Housing Guaranteed Loan Program, USDA Rural Development, 1400 Independence Avenue, STOP 0784, Room 2250, Washington, DC 20250–1522.

FOR FURTHER INFORMATION CONTACT: Kate Jensen, Finance and Loan Analyst, at *kate.jensen@wdc.usda.gov* or (503) 894–2382.

SUPPLEMENTARY INFORMATION:

Background

RHS delivers programs authorized by the Housing Act of 1949, as amended (42 U.S.C. 1472 *et seq.*) (Housing Act). The preamble to the Housing Act declares that every American deserves a ''decent home and a suitable living environment.'' RHS guarantees a variety of housing loans for home purchases, repair, and rental housing development in rural areas. The SFHGLP provides low- and moderate-income borrowers access to mortgage credit by guaranteeing loans issued by agency-approved private sector lenders. Loans may finance the full construction and acquisition cost of a property up to 100 percent of the appraised value. Mortgages have 30-year terms and fixed rates negotiated with the lender that cannot exceed an interest rate cap that is determined by the Agency. Financing may also be used to refinance existing USDA guaranteed or direct loans. The program maintains its neutral or slightly negative subsidy status through guarantee and annual loan fees.

Request for Comment

Stakeholder input is vital to ensure that the maximum interest rate continues to support the agency's mission and not overly burden SFHGLP lenders and their customers. Currently, the maximum allowable interest rate is defined in Section 7.3.B of the program handbook (available at *https://www.rd.usda.gov/files/3555-1chapter07.pdf*) as the current Fannie Mae posted yield for 90-day delivery (Actual/Actual), plus one percent for 30-year fixed rate conventional loans, rounded up to the nearest one quarter of one percent. The Agency is considering whether to modify the maximum interest rate and would like stakeholder feedback on the issue.

The following questions and discussion items are posed to guide stakeholder comments. Where possible, RHS requests that comments include specific suggestions regarding ways to improve existing programs and delivery mechanisms and eliminate or minimize the duplication of RHS's regulation and policies with work performed by other entities, including federal, state, and local agencies. RHS welcomes pertinent comments that are beyond the scope of these questions.

1. Should the Agency continue with the requirement that the maximum allowable interest rate shall not exceed the current Federal National Mortgage Association posted yield for 90-day delivery (Actual/Actual) plus one percent for 30-year fixed rate conventional loans, rounded up to the nearest one quarter of one percent?

2. Should the Agency consider indexing the maximum allowable interest rate to a source other than the Federal National Mortgage Association?

3. Should a higher maximum allowable interest rate cap be established? If so, what maximum rate is recommended, and why?

4. Does the current maximum interest rate create any barriers to loan making in eligible rural areas? If so, how and under what circumstances?

5. What effect would increasing or eliminating the maximum interest rate have for loan originators and borrowers in underserved populations and rural communities?

6. If the maximum allowable interest rate cap were to be increased or

eliminated, what protections exist to prevent consumers from being overcharged?

7. If the maximum allowable interest rate is raised or removed, what steps should the Agency take to monitor lenders to ensure that borrowers are not overcharged?

Non-Discrimination Statement

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720–2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *http://www.ascr.usda.gov/complaint_filing_cust.html* and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410;

(2) *Fax:* (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Dated: August 13, 2018.

Joel C. Baxley,

Administrator, Rural Housing Service.

BILLING CODE 3410–XV–P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Delaware Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of monthly planning meetings.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a planning meeting of the Delaware State Advisory Committee to the Commission will convene by conference call, on Monday, September 17, 2018 at 10:00 a.m. (EDT). The purpose of the meeting is to discuss preparation of the Committee's report on implicit bias and policing in communities of color in Delaware.

DATES: Monday, September 17, 2018, at 10:00 a.m. (EDT).

ADDRESSES: *Public Call-In Information:* Conference call number: 1–800–210–9006 and conference call ID: 4124362.

FOR FURTHER INFORMATION CONTACT: Ivy L. Davis, at *ero@usccr.gov* or by phone at 202–376–7533.

SUPPLEMENTARY INFORMATION: Interested members of the public may listen to the discussion by calling the following toll-free conference call number: 1–800–210–9006 and conference call ID: 4124362. Please be advised that before placing them into the conference call, the conference call operator may ask callers to provide their names, their organizational affiliations (if any), and email addresses (so that callers may be notified of future meetings). Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number herein.

Persons with hearing impairments may also follow the discussion by first calling the Federal Relay Service at 1–800–877–8339 and providing the operator with the toll-free conference call number: 1–800–210–9006 and conference call ID: 4124362.

Members of the public are invited to submit written comments; the comments must be received in the regional office approximately 30 days after each scheduled meeting. Written comments may be mailed to the Eastern Regional Office, U.S. Commission on Civil Rights, 1331 Pennsylvania Avenue, Suite 1150, Washington, DC 20425, or emailed to Evelyn Bohor at *ero@usccr.gov.* Persons who desire additional information may contact the Eastern Regional Office at (202) 376–7533.

Records and documents discussed during the meeting will be available for public viewing as they become available at *http://facadatabase.gov/committee/meetings.aspx?cid=240;* click the ''Meeting Details'' and ''Documents'' links. Records generated from this meeting may also be inspected and reproduced at the Eastern Regional Office, as they become available, both before and after the meetings. Persons interested in the work of this advisory committee are advised to go to the Commission's website, *www.usccr.gov,* or to contact the Eastern Regional Office at the above phone number, email or street address.

BILLING CODE P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–533–839]

Carbazole Violet Pigment 23 From India: Rescission of Countervailing Duty Administrative Review; 2016

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is rescinding the administrative review of the countervailing duty (CVD) order on carbazole violet pigment 23 (CVP–23) from India for the period January 1, 2016, through December 31, 2016.

DATES: Applicable August 17, 2018.

FOR FURTHER INFORMATION CONTACT: Gene H. Calvert, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3586.

SUPPLEMENTARY INFORMATION:

Background

On December 4, 2017, Commerce published a notice of opportunity to request an administrative review of the CVD order on CVP–23 from India for the period of review (POR) January 1, 2016, through December 31, 2016.[1] On

[1] *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity*

Continued

December 5, 2017, Commerce received a timely-filed request to conduct an administrative review of the CVD order from Pidilite Industries Limited (Pidilite).[2] Based on this request, and in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), Commerce initiated an administrative review of the CVD order on CVP–23 from India.[3] On March 16, 2018, Pidilite timely withdrew its request for an administrative review.[4] No other party requested an administrative review.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the party that requested the review withdraws its request for review within 90 days of the date of publication of the notice of initiation of the requested review. In this case, Pidilite timely withdrew its request for review within the 90-day deadline, and no other party requested an administrative review of the CVD order. Therefore, in accordance with 19 CFR 351.213(d)(1), Commerce is rescinding this administrative review in its entirety.

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess countervailing duties on all appropriate entries. Because Commerce is rescinding this administrative review in its entirety, entries of CVP–23 from India during the period January 1, 2016, through December 31, 2016, shall be assessed countervailing duties at rates equal to the cash deposit of estimated countervailing duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP 15 days after the publication of this notice in the **Federal Register**.

Notification Regarding Administrative Protective Order

This notice serves as a final reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: August 13, 2018.

James Maeder,

Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the duties of Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XG414

Mid-Atlantic Fishery Management Council (MAFMC); Public Hearings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council), jointly with the Atlantic States Marine Fisheries Commission (Commission's) Summer Flounder, Scup, and Black Sea Bass Board (Board), will hold 10 public hearings, including one webinar hearing, to solicit public comments on the Draft Summer Flounder Commercial Issues and Goals and Objectives Amendment to the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan (FMP).

DATES: Written public comments must be received on or before 11:59 p.m. EST, October 12, 2018. The meetings will be held between September 10, 2018 and September 27, 2018. For specific dates and times, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The hearing documents are accessible electronically via the internet at: *http://www.mafmc.org/actions/summer-flounder-amendment* or by request to Dr. Chris Moore, Executive Director, Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331.

Meeting addresses: The public hearings will be held in Bourne, MA; Narragansett, RI; Old Lyme, CT; Stony Brook, NY; Toms River, NJ; Dover, DE; Berlin, MD; Newport News, VA; and Washington, NC. One additional hearing will be held by internet webinar. For specific locations, see **SUPPLEMENTARY INFORMATION.**

Public comments: Written comments may be sent by any of the following methods:

- *Email to: nmfs.flukeamendment@noaa.gov;* Include ''Summer Flounder Commercial Issues Amendment Comments'' in the subject line.
- *Submit via webform at: www.mafmc.org/comments/summer-flounder-amendment.*
- *Mail to:* Dr. Christopher M. Moore, Executive Director, Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901. Mark the outside of the envelope ''Summer Flounder Commercial Issues Amendment Comments.''
- *Fax to:* (302) 674–5399.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The Mid-Atlantic Fishery Management Council and the Atlantic States Marine Fisheries Commission have been preparing an amendment to the Summer Flounder, Scup, and Black Sea Bass FMP, known as the ''Summer Flounder Commercial Issues and Goals and Objectives Amendment.'' This amendment considers modifications to the qualification criteria for Federal commercial moratorium summer flounder permits, the current allocation of summer flounder commercial quota, and the current list of frameworkable items in the FMP (specifically, it considers adding a framework provision for commercial landings flexibility). An additional purpose of the action is to revise the FMP goals and objectives for summer flounder only. Additional information and amendment documents are available at: *http://www.mafmc.org/actions/summer-flounder-amendment.*

The Council and Board will hold 10 public hearings on this amendment, during which Council or Commission staff will brief the public on the contents of the amendment documents and alternatives under consideration, prior to opening the hearing for public comments. The hearings schedule is as follows:

1. *Monday, September 10, 2018 at 7 p.m.:* Connecticut Department of Energy and Environmental Protection Marine

Headquarters Boating Education Center (Rear Building), 333 Ferry Road, Old Lyme, CT 06371.

2. *Wednesday, September 12, 2018 at 6 p.m.:* North Carolina Division of Marine Fisheries Washington Regional Office, 943 Washington Square Mall, US Highway 17, Washington, NC 27889.

3. *Thursday, September 13, 2018 at 6 p.m.:* Delaware Dept. of Natural Resources & Environmental Control Auditorium, Richardson & Robbins Building, 89 Kings Highway, Dover, DE 19901.

4. *Thursday, September 13, 2018 at 6 p.m.:* Virginia Marine Resources Commission, 2600 Washington Avenue, 4th Floor, Newport News, VA 23607.

5. *Wednesday, September 19, 2018 at 5:30 p.m.:* Bourne Community Center, Room #2, 239 Main Street, Buzzards Bay, MA 02532.

6. *Wednesday, September 19, 2018 at 6 p.m.:* University of Rhode Island Bay Campus, Corless Auditorium, South Ferry Road, Narragansett, RI 02882.

7. *Monday, September 24, 2018 at 6 p.m.:* Ocean County Administrative Building, 101 Hooper Ave., Toms River, NJ 08753.

8. *Tuesday, September 25, 2018 at 6 p.m.:* Ocean Pines Library, 11107 Cathell Rd., Berlin, MD 21811.

9. *Thursday, September 27, 2018 at 6:30 p.m.:* New York State Department of Environmental Conservation, School of Marine and Atmospheric Sciences (SOMAS), Room 120 Endeavor; Stony Brook University, Stony Brook, NY 11794.

10. *Thursday, September 27, 2018 at 6:30 p.m.:* Internet webinar. Connection information to be posted at *www.mafmc.org* prior to the meeting.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to M. Jan Saunders at the Mid-Atlantic Council Office, (302) 526–5251, at least 5 days prior to the meeting date.

Dated: August 14, 2018.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DATES: The Pacific Council and its advisory entities will meet September 5–12, 2018. The Pacific Council meeting will begin on Friday, September 7, 2018 at 10 a.m. Pacific Daylight Time (PDT), reconvening at 8 a.m. each day through Wednesday, September 12, 2018. All meetings are open to the public, except a closed session will be held from 8 a.m. to 10 a.m., Friday, September 7 to address litigation and personnel matters. The Pacific Council will meet as late as necessary each day to complete its scheduled business.

ADDRESSES: Meetings of the Pacific Council and its advisory entities will be held at the Doubletree by Hilton Hotel Seattle Airport, 18740 International Blvd., Seattle, WA; telephone: (206) 246–8600.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220. Instructions for attending the meeting via live stream broadcast are given under **SUPPLEMENTARY INFORMATION**, below.

FOR FURTHER INFORMATION CONTACT: Mr. Chuck Tracy, Executive Director; telephone: (503) 820–2280 or (866) 806–7204 toll-free; or access the Pacific Council website, *http://www.pcouncil.org* for the current meeting location, proposed agenda, and meeting briefing materials.

SUPPLEMENTARY INFORMATION: The September 7–12, 2018 meeting of the Pacific Council will be streamed live on the internet. The broadcasts begin initially at 10 a.m. PDT Friday, September 7, 2018 and continue at 8 a.m. daily through Wednesday, September 12, 2018. Broadcasts end daily at 5 p.m. PDT or when business for the day is complete. Only the audio portion and presentations displayed on the screen at the Pacific Council meeting will be broadcast. The audio portion is listen-only; you will be unable to speak to the Pacific Council via the broadcast. To access the meeting online, please use the following link: *http://www.gotomeeting.com/online/webinar/join-webinar* and enter the September Webinar ID, 530–089–227, and your email address. You can attend the webinar online using a computer, tablet, or smart phone, using the GoToMeeting application. It is recommended that you use a computer headset to listen to the meeting, but you may use your telephone for the audio-only portion of the meeting. The audio portion may be attended using a telephone by dialing the toll number 1–562–247–8321 (not a toll-free number), audio access code 240–052–611, and entering the audio pin shown after joining the webinar.

The following items are on the Pacific Council agenda, but not necessarily in this order. Agenda items noted as ''Final Action'' refer to actions requiring the Council to transmit a proposed fishery management plan, proposed plan amendment, or proposed regulations to the U.S. Secretary of Commerce, under Sections 304 or 305 of the Magnuson-Stevens Fishery Conservation and Management Act. Additional detail on agenda items, Council action, advisory entity meeting times, and meeting rooms are described in Agenda Item A.5, Proposed Council Meeting Agenda, and will be in the advance September 2018 briefing materials and posted on the Pacific Council website at *www.pcouncil.org* no later than Monday, August 20, 2018.

A. Call to Order
1. Opening Remarks
2. Council Member Appointments
3. Roll Call
4. Executive Director's Report
5. Approve Agenda

B. Open Comment Period
1. Comments on Non-Agenda Items

C. Coastal Pelagic Species
1. Amendment 17: Live Bait Fishery Allowance

D. Habitat
1. Current Habitat Issues

E. Salmon
1. Salmon Methodology Review—Final Topic Selection
2. Update on Salmon Rebuilding Plans

F. Administrative
1. Research and Data Needs Document—Final Adoption
2. Legislative Matters
3. Electronic Monitoring Program Review and Cost Allocation Procedural Directive
4. Fiscal Matters
5. Approval of Council Meeting Record

6. Membership Appointments and Council Operating Procedures
7. Future Council Meeting Agenda and Workload Planning

G. Ecosystem Management
1. West Coast Ecosystem-Based Fishery Management Roadmap Implementation
2. Fishery Ecosystem Plan Five-Year Review—Scoping
3. Climate and Communities Initiative Update

H. Highly Migratory Species
1. National Marine Fisheries Service Report
2. Final Recommendations on Non-Deep-Set Buoy Gear Exempted Fishing Permits (EFPs)
3. Recommend International Management Activities
4. Biennial Harvest Specifications and Management Measures
5. Drift Gillnet Performance Metrics Methodology
6. Swordfish Monitoring and Management Plan

I. Groundfish Management
1. National Marine Fisheries Service Report
2. Amendment 28—Essential Fish Habitat and Rockfish Conservation Area—Implementation Update
3. Endangered Species Act Consultation on Eulachon
4. Stock Assessment Terms of Reference—Final Action
5. Methodology Review—Preliminary Topic Selection
6. Science Improvement Report
7. Five-Year Catch Share Follow On Action—Preliminary Action
8. Continuing Midwater Trawl and Gear EFP and Salmon Bycatch Provisions in New EFPs
9. Omnibus Workload Planning Process
10. Inseason Adjustments—Final Action

J. Pacific Halibut Management
1. 2019 Catch Sharing Plan and Annual Regulations

Advisory Body Agendas

Advisory body agendas will include discussions of relevant issues that are on the Pacific Council agenda for this meeting, and may also include issues that may be relevant to future Council meetings. Proposed advisory body agendas for this meeting will be available on the Pacific Council website *http://www.pcouncil.org/council-operations/council-meetings/current-briefing-book/* no later than Monday, August 20, 2018.

Schedule of Ancillary Meetings

Day 1—Wednesday, September 5, 2018

Scientific and Statistical Committee Ecosystem Subcommittee: 8 a.m.

Day 2—Thursday, September 6, 2018

Coastal Pelagic Species Advisory Subpanel: 8 a.m.
Coastal Pelagic Species Management Team: 8 a.m.
Ecosystem Advisory Subpanel: 8 a.m.
Ecosystem Workgroup: 8 a.m.
Habitat Committee: 8 a.m.
Scientific and Statistical Committee: 8 a.m.
Legislative Committee: 10 a.m.
Budget Committee: 1 p.m.

Day 3—Friday, September 7, 2018

California State Delegation: 7 a.m.
Oregon State Delegation: 7 a.m.
Washington State Delegation: 7 a.m.
Ecosystem Advisory Subpanel: 8 a.m.
Ecosystem Plan Development Team: 8 a.m.
Highly Migratory Species Advisory Subpanel: 8 a.m.
Highly Migratory Species Management Team: 8 a.m.
Enforcement Consultants: 8 a.m.
Scientific and Statistical Committee: 8 a.m.

Day 4—Saturday, September 8, 2018

California State Delegation: 7 a.m.
Oregon State Delegation: 7 a.m.
Washington State Delegation: 7 a.m.
Groundfish Advisory Subpanel: 8 a.m.
Groundfish Management Team: 8 a.m.
Highly Migratory Species Advisory Subpanel: 8 a.m.
Highly Migratory Species Management Team: 8 a.m.
Enforcement Consultants: Ad Hoc

Day 5—Sunday, September 9, 2018

California State Delegation: 7 a.m.
Oregon State Delegation: 7 a.m.
Washington State Delegation: 7 a.m.
Groundfish Advisory Subpanel: 8 a.m.
Groundfish Management Team: 8 a.m.
Enforcement Consultants: Ad Hoc

Day 6—Monday, September 10, 2018

California State Delegation: 7 a.m.
Oregon State Delegation: 7 a.m.
Washington State Delegation: 7 a.m.
Groundfish Advisory Subpanel: 8 a.m.
Groundfish Management Team: 8 a.m.
Enforcement Consultants: Ad Hoc

Day 7—Tuesday, September 11, 2018

California State Delegation: 7 a.m.
Oregon State Delegation: 7 a.m.
Washington State Delegation: 7 a.m.
Groundfish Advisory Subpanel: 8 a.m.
Groundfish Management Team: 8 a.m.
Enforcement Consultants: Ad Hoc

Day 8—Wednesday, September 12, 2018

California State Delegation: 7 a.m.
Oregon State Delegation: 7 a.m.
Washington State Delegation: 7 a.m.

Although non-emergency issues not contained in this agenda may come before the Pacific Council for discussion, those issues may not be the subject of formal Council action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Pacific Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820–2280, ext. 411 at least ten business days prior to the meeting date.

Dated: August 14, 2018.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XG415–X

Marine Mammals; File No. 22222

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Tamara McGuire, 310 W 123rd Ave., Anchorage, AK 99515, has applied in due form for a permit to conduct research on endangered Cook Inlet beluga whales.

DATES: Written, telefaxed, or email comments must be received on or before September 17, 2018.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the ''Features'' box on the Applications and Permits for Protected Species (APPS) home page, *https://apps.nmfs.noaa.gov,* and then selecting File No. 22222 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources,

NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713–0376, or by email to *NMFS.Pr1Comments@noaa.gov*. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Hapeman or Sara Young, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Ms. McGuire requests a 5-year permit to conduct research on endangered Cook Inlet beluga whales (*Delphinapterus leucas*), in Cook Inlet, AK. The purpose of the research is to (1) continue to build and maintain the species' photo-identification catalog, (2) describe the population's characteristics, and (3) determine life history characteristics of the species. Research may result in up to 6,800 annual takes of whales by Level B harassment during vessel surveys for observation, photography, and photo-identification. Up to 100 harbor seals (*Phoca vitulina*) annually could be incidentally disturbed during surveys.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: August 14, 2018.

Julia Marie Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

RIN 0648–XG403

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The North Pacific Fishery Management Council (Council) Science and Statistical Committee Subgroup (SSC Subgroup) will hold a public meeting.

DATES: The meeting will be held on Monday, September 10, 2018 from 9 a.m. to 4 p.m.

ADDRESSES: The meeting will be held in Room 2079, at the Alaska Fisheries Science Center (AFSC), 7700 Sand Point Way NE, Seattle, WA 98115.

Council address: North Pacific Fishery Management Council, 605 W 4th Ave., Suite 306, Anchorage, AK 99501–2252; telephone: (907) 271–2809.

FOR FURTHER INFORMATION CONTACT: Stephani Zador, AFSC staff; telephone: (206) 526–4693.

SUPPLEMENTARY INFORMATION:

Agenda

Monday, September 10, 2018

The agenda will include: (a) AFSC review of Alaska surveys and budget considerations; (b) discussion of alternatives for survey planning based on different budget scenarios; (c) develop recommendations for the SSC and Council; (d) other business. The Agenda is subject to change, and the latest version will be posted at *http://www.npfmc.org/upcoming-meetings/.*

Public Comment

Public comment letters will be accepted until the start of the meeting, and should be submitted either electronically to Diana Evans, Council staff: *diana.evans@noaa.gov* or through the mail: North Pacific Fishery Management Council, 605 W 4th Ave., Suite 306, Anchorage, AK 99501–2252. In-person oral public testimony will be accepted at the discretion of the chair.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shannon Gleason at (907) 271–2809 at least 7 working days prior to the meeting date.

Dated: August 14, 2018.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XG346

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 61 in-person Data/Assessment Workshop for Gulf of Mexico Red Grouper.

SUMMARY: The SEDAR 61 assessment of the Gulf of Mexico Red Grouper will consist of one in-person Data/Assessment Workshop and a series of webinars. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 61 Data/Assessment Workshop will be held from 9 a.m. until 5 p.m. on September 11, 2018, from 8:30 a.m. until 5 p.m. on September 12, 2018, and from 8:30 a.m. until 1 p.m. on September 13, 2018.

ADDRESSES:

Meeting address: The SEDAR 61 Data/Assessment Workshop will be held at the Hilton St. Petersburg Bayfront, 333 1st Street S, St. Petersburg, FL 33701; telephone: 1–800–445–8667.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571–4366. Email: *Julie.neer@safmc.net*.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data/Assessment Workshop, and (2) a series of webinars. The product of the Data/Assessment Workshop is a report which compiles and evaluates potential

datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Data/Assessment Workshop are as follows:

1. An assessment data set and associated documentation will be developed during the workshop.

2. Participants will evaluate proposed data and select appropriate sources for providing information on life history characteristics, catch statistics, discard estimates, length and age composition, and fishery dependent and fishery independent measures of stock abundance.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 14, 2018.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Addition and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed addition to and deletions from the Procurement List.

SUMMARY: The Committee is proposing to add a product to the Procurement List that will be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities, and deletes products and services previously furnished by such agencies.

DATES: Comments must be received on or before: September 16, 2018.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 603–2117, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Addition

If the Committee approves the proposed addition, the entities of the Federal Government identified in this notice will be required to procure the product listed below from nonprofit agency employing persons who are blind or have other severe disabilities.

The following product is proposed for addition to the Procurement List for production by the nonprofit agency listed:

Product

NSN(s)—Product Name(s): 7360–00–139–0480—Disposable Dinnerware Kit
Mandatory Source of Supply: Expanco, Inc., Fort Worth, TX
Contracting Activity: Defense Logistics Agency Troop Support

Deletions

The following products and services are proposed for deletion from the Procurement List:

Products

NSN(s)—Product Name(s):
COE001—Blazer
COE002—Blazer
COE004—Shirt
COE005—Shirt
COE006—Shirt
COE007—Shirt
COE008—Tab Bow
COE009—Tie
COE010—Tie Tac
COE011—pants

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Deletions from the Procurement List.

SUMMARY: This action deletes products and services from the Procurement List previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Date deleted from the Procurement List:* September 16, 2018.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S Clark Street, Suite 715, Arlington, Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT: Michael R. Jurkowski, Telephone: (703) 603–2117, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Deletions

On 7/6/2018 (83 FR 130) and 7/13/2018 (83 FR 135), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products and services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services deleted from the Procurement List.

End of Certification

Accordingly, the following products and services are deleted from the Procurement List:

Products

NSN(s)—Product Name(s):
7930–01–648–5018—Floor Finish/Sealer, Black, Water-Based, Slip-Resistant, Asphalt Floors, 5 Gal. Can
7930–01–648–6105—Floor Finish/Sealer, Black, Water-Based, Slip-Resistant, Asphalt Floors, 4/1 Gal. Bottles
Mandatory Source(s) of Supply: Lighthouse for the Blind of Houston, Houston, TX
Contracting Activity: General Services Administration, Fort Worth, TX

NSN(s)—Product Name(s): 530–01–611–6426—Steno Book, 60 Pages, 6″x9″, Green
Mandatory Source(s) of Supply: Alabama Industries for the Blind, Talladega, AL
Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s): 7510–00–307–7885—Refill, Eraser, Mechanical Pencil, Grey
Mandatory Source(s) of Supply: San Antonio Lighthouse for the Blind, San Antonio, TX
Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s):
8415–01–581–6578—Liner, Parka, US Navy, Coyote Brown, Medium/XX-Long
8415–01–588–8415—Liner, Parka, US Navy, Coyote Brown, Medium/XX-Long
Mandatory Source(s) of Supply: Winston-Salem Industries for the Blind, Inc., Winston-Salem, NC
Bestwork Industries for the Blind, Inc., Cherry Hill, NJ
Contracting Activity: W6QK ACC–APG NATICK, NATICK, MA

NSN(s)—Product Name(s): 8415–01–588–8415—Liner, Parka, US Navy, Coyote Brown, Medium/XX-Long
Mandatory Source(s) of Supply: Bestwork Industries for the Blind, Inc., Cherry Hill, NJ
Contracting Activity: Defense Logistics Agency Troop Support

Services

Service Type: Operation of Postal Service Center Service
Mandatory for: Eglin Air Force Base: East of Memorial Trail (excluding the airfield) Eglin, FL
Mandatory Source(s) of Supply: Lakeview Center, Inc., Pensacola, FL
Contracting Activity: DEPT OF THE AIR FORCE, FA2823 AFTC PZIO

Service Type: Furniture Service
Mandatory for: MCALF Bogue Field, HWY 70, Bogue, NC, MCAS Cherry Point, Hwy. 101, Cherry Point, NC, MCOLF Atlantic Field, Air Base Road, Atlantic, NC

BILLING CODE 6353–01–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2012–0030]

Proposed Extension of Approval of Information Collection; Comment Request—Testing and Recordkeeping Requirements for Carpets and Rugs

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: Pursuant to the Paperwork Reduction Act of 1995, the Consumer Product Safety Commission (CPSC) requests comments on a proposed extension of approval of information collection requirements for manufacturers and importers of carpets and rugs under the Standard for the Surface Flammability of Carpets and Rugs and the Standard for the Surface Flammability of Small Carpets and Rugs. The CPSC will consider all comments received in response to this notice before requesting an extension of this collection of information from the Office of Management and Budget (OMB).

DATES: Submit written or electronic comments on the collection of information by October 16, 2018.

ADDRESSES: You may submit comments, identified by Docket No. CPSC–2012–0030, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *http://www.regulations.gov.* Follow the instructions for submitting comments. The CPSC does not accept comments submitted by electronic mail (email), except through *www.regulations.gov.* The CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal, as described above.

Written Submissions: Submit written submissions by mail/hand delivery/courier to: Office of the Secretary, Consumer Product Safety Commission, Room 820, 4330 East-West Highway, Bethesda, MD 20814; telephone (301) 504–7923.

Instructions: All submissions received must include the agency name and docket number for this notice. All comments received may be posted without change, including any personal identifiers, contact information, or other personal information provided, to: *http://www.regulations.gov.* Do not submit confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If furnished at all, such information should be submitted in writing.

Docket: For access to the docket to read background documents or comments received, go to: *http://www.regulations.gov,* and insert the docket number CPSC–2012–0030, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Bretford Griffin, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; (301) 504–7037, or by email to: *bgriffin@cpsc.gov.*

SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Safety Standard for the Flammability of Carpets and Rugs and Standard for the Flammability of Small Carpets and Rugs.

OMB Number: 3041–0017.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of carpets and rugs.

Estimated Number of Respondents: Out of 215 domestic manufacturers, approximately half, or 108 manufacturers, elect to issue a guaranty of compliance with the FFA. Additionally, of the approximately 6,000 firms that import carpets and rugs, approximately 1,500 elect to issue guaranties of compliance. Staff estimates that the average firm issuing a continuing guarantee under the FFA is required to conduct, at most, 200 tests per year, although the actual number of tests required by a given firm may vary from one to 200, depending upon the number of carpet styles and the annual production volume. To estimate burden, we selected the midpoint, 100 tests per year.

Estimated Time per Response: 2.5 hours to conduct each test, and to establish and maintain test records.

Total Estimated Annual Burden: The time required to conduct each test is estimated to be 2.5 hours, including the time required to establish and maintain the test records. We estimate the total annualized cost/burden to respondents could be as many as 160,800 tests per year (1,608 firms × 100 tests), at 2.5 hours per test, or 402,000 hours.

Total Estimated Annual Cost to Respondents: The total annualized costs to all respondents for the hour burden for collection of information is estimated to be as high as $27,830,460, using a mean hourly employer cost-per-hour-worked of $69.23 (Bureau of Labor Statistics: Total compensation rates for management, professional, and related occupations in private goods-producing industries, March 2018) (402,000 hours × $69.23).

General Description of Collection: The Standard for the Surface Flammability of Carpets and Rugs (16 CFR part 1630) and the Standard for the Surface Flammability of Small Carpets and Rugs (16 CFR part 1631) establish requirements to reduce the flammability of carpets and rugs. The standards' provisions include requirements for testing and recordkeeping for manufacturers and importers who furnish guaranties subject to the carpet and rug flammability standards. Separate from the guaranties, the Consumer Product Safety Improvement Act of 2008 (CPSIA) established product certification requirements for applicable consumer product safety standards and rules. 15 U.S.C. 2063(g).

Request for Comments

The CPSC solicits written comments from all interested persons about the proposed collection of information. The CPSC specifically solicits information relevant to the following topics:

—Whether the collection of information described is necessary for the proper performance of the CPSC's functions, including whether the information would have practical utility;
—Whether the estimated burden of the proposed collection of information is accurate;
—Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
—Whether the burden imposed by the collection of information could be minimized by use of automated, electronic, or other technological collection techniques, or other forms of information technology.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

[FR Doc. 2018–17720 Filed 8–16–18; 8:45 am]

BILLING CODE 6355–01–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2012–0024]

Proposed Extension of Approval of Information Collection; Comment Request; Notification Requirements for Coal and Wood Burning Appliances

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: Pursuant to the Paperwork Reduction Act (PRA) of 1995, the

Consumer Product Safety Commission (CPSC) requests comments on a proposed extension of approval of information collection regarding notification requirements for coal and wood burning appliances. The CPSC will consider all comments received in response to this notice, before requesting an extension of this collection of information from the Office of Management and Budget (OMB).

DATES: Submit written or electronic comments on the collection of information by October 16, 2018.

ADDRESSES: You may submit comments, identified by Docket No. CPSC–2012–0024, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *http://www.regulations.gov.* Follow the instructions for submitting comments. The CPSC does not accept comments submitted by electronic mail (email), except through *www.regulations.gov.* The CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal, as described above.

Written Submissions: Submit written submissions by mail/hand delivery/courier to: Office of the Secretary, Consumer Product Safety Commission, Room 820, 4330 East-West Highway, Bethesda, MD 20814; telephone (301) 504–7923.

Instructions: All submissions received must include the agency name and docket number for this notice. All comments received may be posted without change, including any personal identifiers, contact information, or other personal information provided, to: *http://www.regulations.gov.* Do not submit confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If furnished at all, such information should be submitted in writing.

Docket: For access to the docket to read background documents or comments received, go to: *http://www.regulations.gov,* and insert the docket number CPSC–2012–0024, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Bretford Griffin, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; (301) 504–7037, or by email to: *bgriffin@cpsc.gov.*

SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Notification Requirements for Coal and Wood Burning Appliances.

OMB Number: 3041–0040.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of coal and wood burning appliances.

Estimated Number of Respondents: An estimated five submissions annually.

Estimated Time per Response: Three hours per submission and 30 minutes for collecting and mailing the information to the CPSC.

Total Estimated Annual Burden: 17.5 hours (5 submissions × 3.5 hours).

Total Estimated Annual Cost to Respondents: $1,212, based on an average total hourly employee compensation rate of $69.23 for management, professional, and related occupations (Bureau of Labor Statistics: Total compensation rates for management, professional, and related occupations in private goods-producing industries, March 2018) (17.5 hours × $69.23).

General Description of Collection: 16 CFR part 1406, Coal and Wood Burning Appliances—Notification of Performance and Technical Data requires that manufacturers and importers provide consumers with written notification regarding certain technical and performance information related to safety on each coal and wood burning appliance. Manufacturers are also required to provide to the CPSC a copy of the notification to consumers and an explanation of all clearance distances contained in the notification. For existing models, all known manufacturers have complied with the requirements. Accordingly, there is no new burden associated with the requirements of 16 CFR part 1406, except in cases where existing models are changed, or new models are introduced. Less than five submissions are estimated annually from new stove models coming into the market, or new firms entering the market.

Request for Comments

The CPSC solicits written comments from all interested persons about the proposed collection of information. The CPSC specifically solicits information relevant to the following topics:

—Whether the collection of information described is necessary for the proper performance of the CPSC's functions, including whether the information would have practical utility;

—Whether the estimated burden of the proposed collection of information is accurate;

—Whether the quality, utility, and clarity of the information to be collected could be enhanced; and

—Whether the burden imposed by the collection of information could be minimized by use of automated, electronic, or other technological collection techniques, or other forms of information technology.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Department of the Air Force

[Docket ID: USAF–2018–HQ–0002]

Submission for OMB Review; Comment Request

AGENCY: Department of the Air Force, DoD.

ACTION: 30-Day information collection notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by September 17, 2018.

ADDRESSES: Comments and recommendations on the proposed information collection should be emailed to Ms. Jasmeet Seehra, DoD Desk Officer, at *oira_submission@omb.eop.gov*. Please identify the proposed information collection by DoD Desk Officer, Docket ID number, and title of the information collection.

FOR FURTHER INFORMATION CONTACT: Fred Licari, 571–372–0493, or *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil*.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: National Defense Science and Engineering Graduate (NDSEG) Fellowships Program; OMB Number 0701–0154.

Type of Request: Extension.

Number of Respondents: 3,577.

Responses per Respondent: 1.

Annual Responses: 3,577.

Average Burden per Response: 12 Hours.

Annual Burden Hours: 42,924.

Needs and Uses: The information collection requirement is necessary to obtain Support of Science, Mathematics, and Engineering Education to 10 U.S.C.

2191 which states that ''the Secretary of Defense shall prescribe regulations providing for the award of fellowships to citizens and nationals of the United States who agree to pursue graduate degrees in science, engineering or other fields of study designated by the Secretary (of Defense) to be of priority interest to the DoD. The DoD is committed to increasing the number and quality of the nation's scientists and engineers. The NDSEG fellowships allow recipients to pursue their graduate studies at whichever United States institution they choose to attend. The goal is to provide the United States with talented, doctorally trained, American men and women who will lead state of the art research projects in disciplines having the greatest payoff to national defense requirements. Recipients shall be selected on the basis of a nationwide competition. Application information will be used for evaluation and selection of students to be awarded fellowships.

Affected Public: Individuals or Households.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number, and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Mr. Frederick Licari.

Requests for copies of the information collection proposal should be sent to Mr. Licari at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Dated: August 14, 2018.

Shelly E. Finke,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DOD–2018–OS–0054]

Proposed Collection; Comment Request

AGENCY: Under Secretary of Defense for Research and Engineering, DoD.

ACTION: Information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Defense Technical Information Center (DTIC) announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by October 16, 2018.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Chief Management Officer, Directorate for Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24 Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Defense Technical Information Center, ATTN: Ms. Vakare Valaitis, 8725 John J. Kingman Road, Ft. Belvoir, VA 22060–6218, or call (703) 767–9159.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Defense User Registration System (DURS); OMB Control Number 0704–0546.

Needs and Uses: DTIC requires all eligible users to be registered for access to DTIC's repository of access-controlled scientific and technical information documents. This system is called the Defense User Registration System, or DURS. The registration of a user enforces validation of an individual's identity, as well as that individual's persona (*i.e.,* whether the individual is DoD, Federal government, or a contractor supporting the DoD or another federal agency) and that individual's authority to access limited and classified documents with distribution controls. A role-based environment based on a user's identification ensures security for DTIC's electronic information collection while the online systems increase availability of information to each user based on his or her mission needs.

Affected Public: Federal Government; Individuals or Households; Business or Other For-Profit; Not-For-Profit Institutions.

Annual Burden Hours: 1,325 hours.

Number of Respondents: 6,625.

Responses per Respondent: 1.

Annual Responses: 6,625.

Average Burden per Response: 0.2 hours.

Frequency: On occasion.

Dated: August 14, 2018.

Office of the Secretary

[Docket ID: DOD–2018–OS–0053]

Proposed Collection; Comment Request

AGENCY: Under Secretary of Defense for Acquisition and Sustainment, DoD.

ACTION: Information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Defense Logistics Agency (DLA) announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by October 16, 2018.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Chief Management Officer, Directorate for Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24 Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to: The Defense Logistics Agency, Office of Small Business Programs, ATTN: Sherry Savage, 8725 John J. Kingman Road, Fort Belvoir, VA 22060 or write to *sherry.savage@dla.mil* or call (571) 767–1656.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Procurement Technical Assistance Center Cooperative Agreement Performance Report; DLA Form 1806; OMB Control Number 0704–0320.

Needs and Uses: This information collection by the Defense Logistics Agency (DLA) gathers data to be used in measuring, on a quarterly basis, cooperative agreement recipients' performance against goals and objectives established by awards. The Department of Defense (DoD) Procurement Technical Assistance (PTA) Cooperative Agreement Program was established by Congress in 1985 to assist state and local governments, tribal organizations, tribal economic enterprises, and other non-profit entities in establishing or maintaining PTA activities to help business firms market their goods and services to the DoD, other federal agencies, and state and local governments. Administrative requirements for the program are established by the DoD Grant and Agreement Regulations (DoDGARS).

Affected Public: State, Local, or Tribal Government; Not-for-Profit Institutions.

Annual Burden Hours: 1,900.

Number of Respondents: 95.

Responses per Respondent: 4.

Annual Responses: 380.

Average Burden per Response: 5 hours.

Frequency: Quarterly.

Dated: August 14, 2018.

Shelly E. Finke,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DOD–2018–OS–0052]

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness, DoD.

ACTION: Information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Office of the Undersecretary of Defense for Personnel and Readiness announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by October 16, 2018.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Chief Management Officer, Directorate for Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24 Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Office of the Under Secretary of Defense (Personnel and Readiness) (FE&T), Office of Financial Readiness, ATTN: Mr. Andrew Cohen, 4000 Defense Pentagon, Washington, DC 20301–4000, or telephone Mr. Cohen at (703) 692–5286.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Mandatory Disclosures as Part of Limitations on Terms of Consumer Credit Extended to Service Members and Dependents; OMB Control Number 0704–0444.

Needs and Uses: With respect to any extension of consumer credit to a covered borrower, a creditor is required to provide to the borrower a statement of Military Annual Percentage Rate (MAPR). The required information would be included in standard account agreements. Additionally, a creditor may, at its discretion, identify the status of a consumer-applicant, as permitted under 32 CFR, 232.5(b) of the Final Rule and, in the event that the information indicates that consumer-applicant is not a covered borrower, take advantage of a safe harbor from liability under 10 U.S.C. 987 by retaining a record of the information so obtained. This includes Military Annual Percentage Rate (MAPR) applicable to the extension of consumer credit, and the total dollar amount of all charges included in the MAPR.

Affected Public: Business or other for-profit.

Annual Burden Hours: 2,000,000.

Number of Respondents: 37,500.

Responses per Respondent: Varies by type of respondent.

Annual Responses: 238,000,000.

Average Burden per Response: 30 seconds.

Frequency: As required.

Respondents are creditors extending consumer credit as defined in the Final

Rule (32 CFR, 232.3(f)) to covered borrowers (32 CFR, 232.3(g)) property. Each response is a statutory requirement that obligates creditors to provide a clear description of the payment obligation of the covered member or dependent, as applicable. A payment schedule may satisfy this requirement.

The creditor shall provide the disclosures in writing in a form the covered borrower can keep. The creditor also shall provide the required disclosures orally. In mail and internet transactions, the creditor satisfies this requirement by providing a toll-free telephone number on or with the written disclosures that consumers may use to obtain oral disclosures. One disclosure for each transaction involving consumer credit; one covered-borrower check for each transaction involving consumer credit.

Dated: August 14, 2018.

Shelly E. Finke,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2018–17746 Filed 8–16–18; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2018–ICCD–0086]

Agency Information Collection Activities; Comment Request; Federal Family Educational Loan Program—Servicemembers Civil Relief Act (SCRA)

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before October 16, 2018.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2018–ICCD–0086. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 550 12th Street SW, PCP, Room 9081, Washington, DC 20202–0023.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Ian Foss, 202–377–3681.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Federal Family Educational Loan Program—Servicemembers Civil Relief Act (SCRA).

OMB Control Number: 1845–0093.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Private Sector.

Total Estimated Number of Annual Responses: 16,731.

Total Estimated Number of Annual Burden Hours: 50,115.

Abstract: The Department is requesting a revision of the current information collection. These Federal Family Education Loan (FFEL) Program regulations require a loan holder to match its database against the Defense Manpower Data Center (DMDC) and automatically apply the interest rate limitation, as appropriate, to borrowers under the Servicemembers Civil Relief Act (SCRA). There has been no change in the statute or in the regulations. The Department is revising downward the overall collection burden due to the decreasing number of FFEL loan holders and affected loans. Additionally, the Department is removing the minimal burden previously assessed individuals as a separate form was created subsequent to the initial information collection and the burden on individuals is more appropriate linked to that information collection.

Dated: August 14, 2018.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2018–ICCD–0085]

Agency Information Collection Activities; Comment Request; Servicemembers Civil Relief Act (SCRA): Interest Rate Limitation Request

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before October 16, 2018.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2018–ICCD–0085. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 550 12th Street SW, PCP, Room 9086, Washington, DC 20202–0023.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection

activities, please contact Ian Foss, 202–377–3681.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Servicemembers Civil Relief Act (SCRA): Interest Rate Limitation Request.

OMB Control Number: 1845–0135.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 200.

Total Estimated Number of Annual Burden Hours: 67.

Abstract: The Servicemembers Civil Relief Act (SCRA) provides that those on active duty military service are entitled to have an interest rate in excess of 6% be capped at 6% for the duration of their qualifying military service. The Department is requesting am extension of the currently approved information collection. These Federal Family Education Loan (FFEL) Program and Direct Loan Program regulations have not changed. The regulations require a loan holder to match its database against the Department of Defense's Defense Manpower Data Center (DMDC) and automatically apply the interest rate limitation, as appropriate, to borrowers under the Servicemembers Civil Relief Act. The form in this collection would only be used in limited cases where the borrower is not found in the Defense Manpower Data Center, or does not have a copy of military orders, but still wishes to receive benefits under the SCRA.

Dated: August 14, 2018.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL18–192–000]

North Carolina Electric Membership Corporation v. Duke Energy Progress, LLC; Notice of Complaint

Take notice that on August 10, 2018, pursuant to section 206 of the Federal Power Act, 16 U.S.C. 824e, Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206 (2018), and section 16.1 of the Fifth Amended and Restated Power Supply and Coordination Agreement between Duke Energy Progress, LLC (DEP or Respondent) and the North Carolina Electric Membership Corporation (NCEMC or Complainant), FERC Rate Schedule No. 182, NCEMC filed a formal complaint against DEP alleging that the Respondent's Fixed Demand Rate, Variable Demand Rate, and the formula production rate that will go into effect January 1, 2020, are excessive, unjust and unreasonable, and not cost-based as required by the Respondent's Market-Based Rate Tariff, as more fully explained in the complaint.

The Complainant certifies that copies of the complaint were served on the contacts for the Respondent listed on the Commission's list of Corporate Officials and on the North Carolina Utilities Commission and the South Carolina Public Service Commission.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on August 30, 2018.

Dated: August 13, 2018.

Kimberly D. Bose,

Secretary.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Sunshine Act Meetings

TIME AND DATE: Friday, August 24, 2018, 9:00 a.m. Eastern Time.

PLACE: Jacqueline A. Berrien Training Center on the First Floor of the EEOC Office Building, 131 ''M'' Street NE, Washington, DC 20507.

STATUS: The meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Closed Session

The Associate Legal Counsel has certified that, in her opinion, exemption 10 of the Sunshine Act, 5 U.S.C. 552b(c)(10) and 29 CFR 1612.4(j), permits consideration of the scheduled matters at the closed meeting.

Agency Adjudication and Determination on Federal Agency Discrimination Complaint Appeals:

The Commission will be considering four (4) cases.

Note: Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the **Federal Register**, the Commission also provides information about Commission meetings on its website, *www.eeoc.gov.,* and provides a recorded announcement a week in advance on future Commission sessions.)

Please telephone (202) 663–7100 (voice) and (202) 663–4074 (TTY) at any time for information on these meetings. The EEOC provides sign language interpretation and Communication Access Realtime Translation (CART) services at Commission meetings for the hearing impaired. Requests for other reasonable accommodations may be made by using the voice and TTY numbers listed above.

CONTACT PERSON FOR FURTHER INFORMATION: Bernadette B. Wilson, Executive Officer on (202) 663–4077.

Dated: August 15, 2018.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–3357–FN]

Medicare and Medicaid Program; Application From DNV GL—Healthcare (DNV GL) for Continued Approval of Its Hospital Accreditation Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final notice.

SUMMARY: This final notice announces our decision to approve the DNV GL—Healthcare for continued recognition as a national accrediting organization for hospitals that wish to participate in the Medicare or Medicaid programs.

DATES: This decision is effective August 17, 2018 through September 26, 2022.

FOR FURTHER INFORMATION CONTACT: Karena Meushaw (410) 786–6609, or Monda Shaver (410) 786–3410.

SUPPLEMENTARY INFORMATION:

I. Background

Under the Medicare program, eligible beneficiaries may receive covered services from a hospital, provided that certain requirements are met. Section 1861(e) of the Social Security Act (the Act), establishes distinct criteria for facilities seeking designation as a hospital. Regulations concerning provider agreements are at 42 CFR part 489 and those pertaining to activities relating to the survey and certification of facilities are at 42 CFR part 488. The regulations at 42 CFR part 482 specify the minimum conditions that a hospital must meet to participate in the Medicare program.

Generally, to enter into an agreement, a hospital must first be certified by a State survey agency as complying with the conditions or requirements set forth in part 482 of our regulations. Thereafter, the hospital is subject to regular surveys by a State survey agency to determine whether it continues to meet these requirements. There is an alternative, however, to surveys by State agencies.

Section 1865(a)(1) of the Act provides that, if a provider entity demonstrates through accreditation by an approved national accrediting organization that all applicable Medicare conditions are met or exceeded, we may deem those provider entities as having met the requirements. Accreditation by an accrediting organization is voluntary and is not required for Medicare participation.

If an accrediting organization is recognized by the Secretary of the Department of Health and Human Services as having standards for accreditation that meet or exceed Medicare requirements, any provider entity accredited by the national accrediting body's approved program may be deemed to meet the Medicare conditions. A national accrediting organization applying for approval of its accreditation program under part 488, subpart A, must provide the Centers for Medicare and Medicaid Services (CMS) with reasonable assurance that the accrediting organization requires the accredited provider entities to meet requirements that are at least as stringent as the Medicare conditions. Our regulations concerning the approval of accrediting organizations are set forth at § 488.5. The regulations at § 488.5(e)(2)(i) require accrediting organizations to reapply for continued approval of its accreditation program

every 6 years or sooner as determined by CMS. DNV GL's current term of approval for their hospital accreditation program expires September 26, 2018.

II. Application Approval Process

Section 1865(a)(3)(A) of the Act provides a statutory timetable to ensure that our review of applications for CMS-approval of an accreditation program is conducted in a timely manner. The Act provides us 210 days after the date of receipt of a complete application, with any documentation necessary to make the determination, to complete our survey activities and application process. Within 60 days after receiving a complete application, we must publish a notice in the **Federal Register** that identifies the national accrediting body making the request, describes the request, and provides no less than a 30-day public comment period. At the end of the 210-day period, we must publish a notice in the **Federal Register** approving or denying the application.

III. Provisions of the Proposed Notice

In the April 17, 2018 **Federal Register** (83 FR 16862), we published a proposed notice announcing DNV GL's request for continued approval of its Medicare hospital accreditation program. In the proposed notice, we detailed our evaluation criteria. Under section 1865(a)(2) of the Act and in our regulations at § 488.5, we conducted a review of DNV GL's Medicare hospital accreditation renewal application in accordance with the criteria specified by our regulations, which include, but are not limited to the following:

- An onsite administrative review of DNV GL's: (1) Corporate policies; (2) financial and human resources available to accomplish the proposed surveys; (3) procedures for training, monitoring, and evaluation of its hospital surveyors; (4) ability to investigate and respond appropriately to complaints against accredited hospitals; and, (5) survey review and decision-making process for accreditation.
- The comparison of DNV GL's Medicare hospital accreditation program standards to our current Medicare hospitals Conditions of Participation (CoPs).
- A documentation review of hospital's survey process to:

++ Determine the composition of the survey team, surveyor qualifications, and DNV GL's ability to provide continuing surveyor training.

++ Compare DNV GL's processes to those we require of state survey agencies, including periodic resurvey and the ability to investigate and respond appropriately to complaints against accredited hospitals.

++ Evaluate DNV GL's procedures for monitoring hospitals it has found to be out of compliance with DNV GL's program requirements. (This pertains only to monitoring procedures when DNV GL identifies non-compliance. If noncompliance is identified by a state survey agency through a validation survey, the state survey agency monitors corrections as specified at § 488.9(c)).

++ Assess DNV GL's ability to report deficiencies to the surveyed hospital and respond to the hospital's plan of correction in a timely manner.

++ Establish DNV GL's ability to provide us with electronic data and reports necessary for effective validation and assessment of the organization's survey process.

++ Determine the adequacy of DNV GL's staff and other resources.

++ Confirm DNV GL's ability to provide adequate funding for performing required surveys.

++ Confirm DNV GL's policies with respect to surveys being unannounced.

++ Obtain DNV GL's agreement to provide us with a copy of the most current accreditation survey together with any other information related to the survey as we may require, including corrective action plans.

In accordance with section 1865(a)(3)(A) of the Act, the April 17, 2018 proposed notice also solicited public comments regarding whether DNV GL's requirements met or exceeded the Medicare CoPs for hospitals. We received two comments in response to our proposed notice. All of the comments received expressed unanimous support for DNV GL's hospital accreditation program.

IV. Provisions of the Final Notice

A. Differences Between DNV GL's Standards and Requirements for Accreditation and Medicare Conditions and Survey Requirements

We compared DNV GL's hospital accreditation program requirements and survey process with the Medicare CoPs at 42 CFR part 482, and the survey and certification process requirements of Parts 488 and 489. Our review and evaluation of DNV GL's hospital application, which were conducted as described in section III of this final notice, yielded the following areas where, as of the date of this notice, DNV GL has revised its standards and certification processes in order to meet the requirements at:

- Section 482.11 through 482.58, to ensure its standards replace the use of the word ''shall'' to ''must'' in all situations where CMS regulations use the word ''must'' or, clarify in DNV's glossary the intended definition of the word ''shall'' means ''must.''
- State Operations Manual, Section 3012, to ensure that DNV GL's policies related to the timeframe(s) for follow-up activities, including follow-up surveys, for facilities that have previously demonstrated non-compliance at the condition level.
- Section 488.5(a)(4)(iv), to ensure that the hospital and provider-based locations (or a sample when allowed) are included in the hospital survey and deficiencies cited under the appropriate CoPs.
- Section 488.5(a)(11)(ii), to ensure that the data submitted in to CMS is timely, complete and accurate.
- Section 488.5(a)(12), to ensure a clearly defined complaint investigation process is in place that meets the requirements in the State Operations Manual Chapter 5 Section 5010 and Chapter 5 Section 5075.2 that includes the following:

++ Complete and accurate tracking of complaints as well as a process for maintaining a documented record of contacts made (for example, phone, email and United States mail) with the complainant, and others, if applicable;

++ Define the number of contact attempts required before closing out a complaint, if the complainant does not respond;

++ Educate DNV GL complaint intake staff that when complaint allegations could potentially result in condition-level non-compliance affecting the health and safety of patients, a survey is to be considered regardless if the allegation also involves payment related allegations; and,

++ The complaint must be investigated onsite within an appropriate timeframe.

- Section 488.26(b), to ensure that DNV GL survey documentation includes a detailed deficiency statement that clearly supports the manner and degree of non-compliance and that all observed non-compliance is cited at the appropriate level (condition verses standard level).
- Section 488.26(c)(4), to ensure that DNV GL surveyors review a sufficient number of inpatient and outpatient medical records during the survey process; the appropriate number of documents, logs, personnel and credentialing files are reviewed during the survey process; the document sources are clearly identified in the survey file; and that DNV GL surveyors have been appropriately trained and determined by DNV GL to be competent in identifying Immediate Jeopardy (IJ)

situations and appropriateness of facility actions to mitigate IJ risk factors prior to the exit of the survey team.

- Section 488.28(a), to ensure that the corrective action plan submitted by hospitals fully addresses the deficiencies cited and that the hospital's corrective actions are hospital wide and not focused solely on the area in which the deficiency was identified.
- Section 488.28(d), to ensure that all corrective action plans contain an expected correction completion date, consistent with CMS requirements.
- Section 488.18(a), to ensure all observations of non-compliance are adequately documented in the survey report and ensure corrective action is required by the hospital.

B. Term of Approval

Based on our review and observations described in section III of this final notice, we approve DNV GL as a national accreditation organization for hospitals that request participation in the Medicare program, effective August 17, 2018 through September 26, 2022.

To verify DNV GL's continued compliance with the provisions of this final notice, CMS will conduct a follow-up corporate on-site visit and survey observation within 18 months of the publication date of this notice.

V. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: August 6, 2018.

Seema Verma,

Administrator, Centers for Medicare & Medicaid Services.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects: LIHEAP Household Report FRN1 Clearance.

Title: Annual Report on Households Assisted by the Low Income Home Energy Assistance (LIHEAP).

OMB No.: 0970–0060.

Description: This report is an annual activity required by statute (42 U.S.C. 8629) and Federal regulations (45 CFR 96.92) for the Low Income Home Energy Assistance Program (LIHEAP). Submission of the completed report is one requirement for LIHEAP grantees applying for Federal LIHEAP block grant funds.

States, the District of Columbia, and the Commonwealth of Puerto Rico are required to report statistics for the previous Federal fiscal year on:

- Assisted and applicant households, by type of LIHEAP assistance;
- Assisted and applicant households, by type of LIHEAP assistance and poverty level;
- Assisted households receiving nominal payments of $50 or less;
- Assisted households receiving only utility payment assistance; this information will automatically be transferred to the grantee's Performance Data Form.
- Assisted households, regardless of the type(s) of LIHEAP assistance, excluding households that only receive nominal payments of $50 or less;
- Assisted households, by type of LIHEAP assistance, having at least one vulnerable member who is at least 60 years or older, disabled, or five years old or younger;
- Assisted households, by type of LIHEAP assistance, with at least one member age 2 years or under;
- Assisted households, by type of LIHEAP assistance, with at least one member ages 3 years through 5 years; and
- Assisted households, regardless of the type(s) of LIHEAP assistance, having at least one member 60 years or older, disabled, or five years old or younger. Insular areas (other than the Commonwealth of Puerto Rico) and Indian Tribal Grantees are required to submit data only on the number of households receiving heating, cooling, energy crisis, and/or weatherization benefits.

The information is being collected for the Department's annual LIHEAP Report to Congress. The data also provides information about the need for LIHEAP funds. Finally, the data are used in the calculation of LIHEAP performance measures under the Government Performance and Results Act of 1993. The data elements will allow the accuracy of measuring LIHEAP targeting performance and LIHEAP cost efficiency.

Respondents: State Governments, Tribal Governments, Insular Areas, and the District of Columbia.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Assisted Household Report-Long Form	56	1	39	2,184
Assisted Household Report-Short Form	160	1	1	160
Estimated Total Annual Burden Hours	.....	.....	.....	2,344

In compliance with the requirements of the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chap. 35), the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW, Washington, DC 20201. Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov*. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or

other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects: LIHEAP Carryover and Reallotment Report FRN1 Clearance.

Title: Low Income Home Energy Assistance Program (LIHEAP) Carryover and Reallotment Report.

OMB No.: 0970–0106.

Description: The LIHEAP statute and regulations require LIHEAP grantees to report certain information to HHS concerning funds forwarded and funds subject to reallotment. The 1994 reauthorization of the LIHEAP statute, the Human Service Amendments of 1994 (Pub. L. 103–252), requires that the carryover and reallotment report for one fiscal year be submitted to HHS by the grantee before the Allotment for the next fiscal year may be awarded.

We are requesting no changes in the collection of data with the Carryover and Reallotment Report for FY 2018, a form for the collection of data, and the Simplified Instructions for Timely Obligations of FY 2019 LIHEAP Funds and Reporting Funds for Carryover and Reallotment. The form clarifies the information being requested and ensures the submission of all the required information. The form facilitates our response to numerous queries each year concerning the amounts of obligated funds. Use of the form is voluntary. Grantees have the option to use another format.

Respondents: State, Local or Tribal Government.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Carryover & Reallotment	177	1	3	531
Estimated Total Annual Burden Hours				531

In compliance with the requirements of the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chap 35), the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW, Washington DC 20201. Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Food and Drug Administration

[Docket No. FDA–2018–N–0001]

Science and Regulation of Live Microbiome-Based Products Used To Prevent, Treat, or Cure Diseases in Humans; Public Workshop

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop.

SUMMARY: The Food and Drug Administration (FDA) Center for Biologics Evaluation and Research and the National Institutes of Health, National Institute of Allergy and Infectious Diseases (NIAID) are announcing a public workshop entitled ''Science and Regulation of Live Microbiome-Based Products Used to Prevent, Treat, or Cure Diseases in Humans.'' The purpose of the public workshop is to exchange information with the scientific community about the clinical, manufacturing, and regulatory considerations associated with live microbiome-based products, when administered to prevent, treat, or cure a disease or condition in humans. The public workshop will bring together government Agencies, academia, industry, and other stakeholders involved in research, development, and regulation of live microbiome-based products for such uses.

DATES: The public workshop will be held on September 17, 2018, from 9 a.m. to 5 p.m. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: The public workshop will be held at the NIAID Conference Center, 5601 Fishers Lane, Rm. 1D13, Rockville, MD 20852. Entrance for public workshop participants is through the lobby, where routine security check procedures will be performed. For parking and security information, please refer to *https://www.niaid.nih.gov/about/visitor-information.*

FOR FURTHER INFORMATION CONTACT: Loni Warren Henderson or Sherri Revell, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 1118, Silver Spring, MD 20993, 240–402–8010, email: *CBERPublicEvents@fda.hhs.gov* (subject

line: Live Microbiome-Based Products Workshop).

SUPPLEMENTARY INFORMATION:

I. Background

Live microbiome-based products used to prevent, treat, or cure a disease or condition in humans are biological products. There is increasing interest in the use of such products for the treatment and/or prevention of conditions such as necrotizing enterocolitis and diarrhea. Historically, these products have presented with unique scientific and regulatory challenges.

II. Topics for Discussion at the Public Workshop

The topics for discussion at the public workshop include the clinical, manufacturing, and regulatory considerations for live microbiome-based products to prevent, treat, or cure a disease or condition in humans, and the objective is to provide a forum for the exchange of information and perspectives on these topics.

III. Participating in the Public Workshop

Registration: To register for the public workshop, please visit the following website: *https://www.eventbrite.com/e/science-and-regulation-of-live-microbiome-based-products-used-to-prevent-treat-or-cure-diseases-in-tickets-44649072578.* Please provide complete contact information for each attendee, including name, title, affiliation, address, email, and telephone.

Registration is free and based on space availability, with priority given to early registrants. Persons interested in attending this public workshop must register by August 28, 2018, midnight Eastern Time. Early registration is recommended because seating is limited; therefore, FDA may limit the number of participants from each organization. There will be no onsite registration.

If you need special accommodations due to a disability, please contact Loni Warren Henderson or Sherri Revell no later than September 10, 2018 (See **FOR FURTHER INFORMATION CONTACT**).

Dated: August 13, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–D–1592]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Guidance for Industry: Controlled Correspondence Related to Generic Drug Development

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by September 17, 2018.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, Fax: 202–395–7285, or emailed to *oira_submission@omb.eop.gov.* All comments should be identified with the OMB control number 0910–0797. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10a.m.–12 midnight, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–5733, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Guidance for Industry: Controlled Correspondence Related to Generic Drug Development

OMB Control Number 0910–0797—Extension

This information collection supports the above captioned Agency guidance. FDA has agreed to specific program enhancements and performance goals specified in the Generic Drug User Fee Reauthorization (GDUFA II) Commitment Letter. One of the performance goals applies to controlled correspondence related to generic drug development. The GDUFA II Commitment Letter includes details on FDA's commitment to respond to questions submitted as controlled correspondence within certain timeframes. To support these program goals, we have developed the guidance entitled ''Controlled Correspondence Related to Generic Drug Development.'' The guidance document is intended to facilitate FDA's prompt consideration of controlled correspondence and to assist in meeting the prescribed timeframes by providing procedural recommendations to include the following information in the inquiry: (1) Name, title, address, phone number, and entity of the person submitting the inquiry; (2) a letter of authorization, if applicable; (3) the FDA-assigned control number and submission date of any previous, related controlled correspondence that was accepted for substantial review and response, if any, as well as a copy of that previous controlled correspondence and FDA's response, if any; (4) the relevant reference listed drug(s), as applicable, including the application number, proprietary (brand) name, manufacturer, active ingredient, dosage form, and strength(s); (5) a statement that the controlled correspondence is related to a potential abbreviated new drug application (ANDA) submission to the Office of Generic Drugs and the ANDA number, if applicable; (6) a concise statement of the inquiry; (7) a recommendation of the appropriate FDA review discipline; and (8) relevant prior research and supporting materials.

The GDUFA II Commitment Letter also includes details on FDA's commitment to respond to requests to clarify ambiguities in FDA's controlled correspondence response within certain timeframes. To facilitate FDA's prompt consideration of the request and to assist in meeting the prescribed timeframes, the guidance document recommends including the following information in the inquiry: (1) Name, title, address, phone number, and entity of the person submitting the inquiry; (2) a letter of authorization, if applicable; (3) the FDA-assigned control number, submission date of the controlled correspondence on which the requestor is seeking clarification, a copy of that previous controlled correspondence, and FDA's response to the controlled correspondence; and (4) the clarifying questions and the corresponding section(s) of FDA's controlled correspondence response on which the requestor is seeking clarification.

In the **Federal Register** of May 22, 2018, (83 FR 23692), we published a 60-day notice requesting public comment on the proposed collection of

information. No comments were received.

We estimate the burden of the information collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Submission of controlled correspondence	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Generic drug manufacturers, related industry, and representatives	390	3.8	1,496	5	7,480

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

This is the first extension of the information collection. We base our estimate on a review of Agency data of Fiscal Year submissions for 2014, 2015, and 2016, which reflects an increase in submissions that we attribute to an increase in generic drug development. Accordingly, we estimate 390 generic drug manufacturers and related industry (*e.g.,* contract research organizations conducting bioanalytical or bioequivalence clinical trials) or their representatives will each submit an average of 3.8 inquiries annually for a total of 1,496 inquiries [1,496 ÷ 390 = 3.8]. Information submitted with each inquiry varies widely in content, depending on the complexity of the request. Inquiries that are defined as controlled correspondence may range from a simple inquiry on generic drug labeling to a more complex inquiry for a formulation assessment for a specific proposed generic drug product. As a result, these inquiries can vary between 1 and 10 burden hours.

Because the content of inquiries considered controlled correspondence is widely varied, we are providing an average burden hour for each inquiry. We estimate that it will take an average of 5 hours per inquiry for industry to gather necessary information, prepare the request, and submit the request to FDA. As a result, we estimate that it will take an average of 7,480 hours annually for industry to prepare and submit inquiries considered controlled correspondence.

Dated: August 10, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–D–2310]

Process To Request a Review of Food and Drug Administration's Decision Not To Issue Certain Export Certificates for Devices; Draft Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the draft guidance entitled ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices; Draft Guidance for Industry and Food and Drug Administration Staff.'' FDA is issuing this draft guidance to comply with changes to the Federal Food, Drug, and Cosmetic Act (FD&C Act) as amended by the FDA Reauthorization Act of 2017 (FDARA), to specify the process afforded to persons denied a Certificate to Foreign Government (CFG) for a device. This draft guidance describes the information that the Center for Devices and Radiological Health (CDRH) and the Center for Biologics Evaluation and Research (CBER) will provide to a person whose request for a CFG for a device is denied, and the process for seeking review of such a denial. This draft guidance is not final nor is it in effect at this time.

DATES: Submit either electronic or written comments on the draft guidance by October 16, 2018 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov*. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov*.
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–D–2310 for ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices; Draft Guidance for Industry and Food and Drug Administration Staff.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9

a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov*. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf*.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the draft guidance entitled ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices; Draft Guidance for Industry and Food and Drug Administration Staff '' to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002 or the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Joann Belt, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 3658, Silver Spring, MD 20993–0002, *exportcert@cdrh.fda.gov*, 301–796–7400, option 3; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is issuing this draft guidance to comply with section 704 of FDARA (Pub. L. 115–52), which amended section 801 of the FD&C Act, to specify the process afforded to persons denied a CFG for a device. This draft guidance describes the information that CDRH and CBER will provide to a person whose request for a CFG for a device is denied, and the process for seeking review of such a denial. This draft guidance applies to the process for persons denied CFGs requested pursuant to section 801(e)(4)(A) of the FD&C Act (21 U.S.C. 381(e)(4)(A) for devices manufactured in an establishment registered under section 510 of the FD&C Act (21 U.S.C. 360) (*i.e.,* FDA-approved, cleared, or exempted devices) that are exported from the United States. This draft guidance supplements the FDA's guidance ''FDA Export Certificates,'' which is available at: *https://www.fda.gov/RegulatoryInformation/Guidances/ucm125789.htm*. This draft guidance is not final nor is it in effect at this time.

II. Significance of Guidance

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on the process for persons denied a certificate to foreign government for a device. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

III. Electronic Access

Persons interested in obtaining a copy of the draft guidance may do so by downloading an electronic copy from the internet. A search capability for all CDRH guidance documents is available at *https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm*. This guidance document is also available at *https://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/default.htm* or *https://www.regulations.gov*. Persons unable to download an electronic copy of ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices; Draft Guidance for Industry and Food and Drug Administration Staff'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number 17044 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in sections 801(e) and 802 (21 U.S.C. 382) of the FD&C Act have been approved under OMB control number 0910–0498; the collections of information in 21 CFR part 807, subparts A through E, have been approved under OMB control number 0910–0625; the collections of information in 21 CFR part 820 have been approved under OMB control number 0910–0073; and the collections of information in the guidance ''Center for Devices and Radiological Health Appeals Processes'' have been approved under OMB control number 0910–0738.

Dated: August 13, 2018.

Leslie Kux,

Associate Commissioner for Policy.

[FR Doc. 2018–17796 Filed 8–16–18; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–1896]

Quality Metrics Site Visit Program for Center for Drug Evaluation and Research and Center for Biologics Evaluation and Research Staff; Information Available to Industry; Extension of the Proposal Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; extension of the proposal period.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is extending the proposal period for the ''Quality Metrics Site Visit Program for Center for Drug Evaluation and Research and Center for Biologics Evaluation and Research Staff,'' published in the **Federal Register** of June 29, 2018. FDA is extending the proposal period to allow interested persons additional time to submit an electronic or written proposal.

DATES: FDA is extending the proposal period on the notice published June 29, 2018 (83 FR 30751). Submit either an electronic or written proposal by December 17, 2018 directly to Tara Gooen Bizjak or Stephen Ripley (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Tara Gooen Bizjak, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 2109, Silver Spring, MD 20993–0002, 301–796–3257, email: *Tara.Gooen@fda.hhs.gov,* or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of June 29, 2018 (83 FR 30751), FDA announced the availability of a notice for industry entitled ''Quality Metrics Site Visit Program for Center for Drug Evaluation and Research and Center for Biologics Evaluation and Research Staff.'' Interested persons were originally given until August 28, 2018, to submit a proposal to the Quality Metrics Site Visit Program per the notice. The Agency believes that extending the proposal period for an additional 120 days from the date of publication of this notice will allow adequate time for interested persons to submit proposals for FDA's consideration. The Site Visit Program is to provide experiential and firsthand learning opportunities to FDA staff involved in the development of the FDA Quality Metrics Program and to provide stakeholders with an opportunity to explain the advantages and challenges associated with implementing and managing a robust Quality Metrics Program. The program and information to be included in the proposal are explained more fully in the original notice.

II. Electronic Access

Persons with access to the internet may obtain the information about the FDA Quality Metrics for Drug Manufacturing Program, including this Quality Metric Site Visit Program, at *https://www.fda.gov/drugs/developmentapprovalprocess/manufacturing/ucm526869.htm.*

Dated: August 10, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–0990–0279]

Agency Information Collection Activities; Proposed Collection; Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before October 16, 2018.

ADDRESSES: Submit your comments to *Sherette.Funn@hhs.gov* or by calling (202) 795–7714.

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 0990–New–60D and project title for reference, to *Sherrette.funn@hhs.gov,* or call the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Information Collection Request Title: 0990–0279—Extension Institutional Review Board Registration Form

Abstract: Assistant Secretary for Health, Office for Human Research Protections is requesting an extension on a currently approved information collection by the Office of Management and Budget, on the Protection of Human Subjects, on the Institutional Review Board (IRB) Form. The purpose of the IRB Registration Form is to provide a simplified procedure for institutions engaged in research conducted or supported by HHS to satisfy the (1) HHS regulations for the protection of human subjects at 45 CFR 46.103((b), 45 CFR 46.107, and 45 CFR 46, subpart E, Registration of Institutional Review Boards; and, the Food and Drug Administration (FDA) regulations for institutional review boards at 21 CFR 56.106.

Likely Respondents: Institutions or organizations operating IRBs that review human subjects research conducted or supported by HHS, or, in the case of FDA's requirements, each IRB in the United States that reviews clinical investigations regulated by FDA under sections 505(i) or 520(g) of the Federal Food, Drug and Cosmetic Act; and each IRB in the United States that reviews clinical investigations that are intended to support applications for research or marketing permits for FDA-regulated products.

ESTIMATE ANNUALIZED BURDEN IN HOURS TABLE

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
IRB Registration 0990–0279	5,650	2	1	11,300
	350	2	1.5	525
Total				11,825

Terry Clark,

Asst. Information Collection Clearance Officer.

Request for Information To Solicit Feedback on the Brain Research Through Advancing Innovative Neurotechnologies (BRAIN) Initiative

AGENCY: National Institutes for Health, HHS.

ACTION: Notice.

SUMMARY: The purpose of this Request for Information (RFI) is to solicit input on how best to accomplish the ambitious vision for the Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative® set forth in BRAIN 2025: A Scientific Vision. NIH is soliciting input from all interested stakeholders, including members of the scientific community, trainees, academic institutions, the private sector, health professionals, professional societies, advocacy groups, and patient communities, as well as other interested members of the public.

DATES: The Request for Information is open for public comment. To assure consideration, your responded must be received by November 15, 2018, 11:59 p.m.

ADDRESSES: Responses to this RFI must be submitted electronically using the web-based form at *https://www.braininitiative.nih.gov/rfi.aspx.*

FOR FURTHER INFORMATION CONTACT: Please direct all inquiries to Samantha White, Ph.D., National Institute of Neurological Disorders and Stroke, 301–496–1675; *BRAINFeedback@nih.gov* with ''BRAIN RFI'' in the subject line.

SUPPLEMENTARY INFORMATION:

Background

The BRAIN Initiative aims to develop new tools and technologies to understand and manipulate networks of cells in the brain. BRAIN 2025: A Scientific Vision serves as the strategic plan for the BRAIN Initiative at NIH and outlines an overarching vision, seven high level scientific priorities, and many specific goals. Designed to be achieved over at least a decade, the first five years of BRAIN 2025 emphasizes development of tools and technology, and the next five years shifts emphasis to using these tools to make fundamental discoveries about how brain circuits work and what goes wrong in disease.

The BRAIN Initiative is well underway (see *http://www.braininitiative.nih.gov*), and we are now approaching the midpoint. At this time, NIH is seeking feedback on the BRAIN Initiative's progress and on opportunities moving forward given the current state of the science. NIH has established a new BRAIN Initiative Advisory Committee of the NIH Director (ACD) Working Group that will provide scientific guidance to the ACD on how best to continue to accelerate the ambitious vision for the BRAIN Initiative.

The ACD–WG will use the responses to this RFI, along with information gathered through a series of public workshops, to help inform their discussions of the BRAIN Initiative's progress and potential updates to the plan moving forward.

Information Requested

Anyone wishing to submit a response is asked to include:

- Ideas for new tools and technologies that have the potential to transform brain circuit research.
- Suggestions for fundamental questions about brain circuit function in

humans or animal models that could be addressed with new technologies.

- Considerations for data sharing infrastructure and policies.
- Areas and topics for research on the ethical implications of BRAIN Initiative-supported emerging neurotechnologies and advancements and their applications.
- Approaches for disseminating new tools and technologies as well as training the broader neuroscience research community.
- Any other topic relevant to the strategic plan of the BRAIN Initiative.

Responses to this RFI are voluntary. Any personal identifiers will be removed when responses are compiled. Individual feedback will not be provided to any responder. Proprietary, classified, confidential, or sensitive information should not be included in your response. This Request for Information (RFI) is for planning purposes only and is not a solicitation for applications or an obligation on the part of the United States (U.S.) Government to provide support for any ideas identified in response to it. Please note that the U.S. Government will not pay for the preparation of any comment submitted or for its use of that comment.

Dated: August 10, 2018.

Lawrence A. Tabak,

Deputy Director, National Institutes of Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institutes of Health (NIH) Office of Science Policy (OSP) Recombinant or Synthetic Nucleic Acid Research: Proposed Changes to the NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (NIH Guidelines)

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Institutes of Health (NIH) seeks public comment on its proposal to amend the *NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (NIH Guidelines)* to streamline oversight for human gene transfer clinical research protocols and reduce duplicative reporting requirements already captured within the existing regulatory framework. Specifically, NIH proposes amendments to: Delete the NIH protocol registration submission and reporting requirements under Appendix M of the *NIH Guidelines,* and modify the roles and responsibilities of entities that involve human gene transfer or the Recombinant DNA Advisory Committee (RAC).

DATES: To ensure consideration, comments must be submitted in writing by October 16, 2018.

ADDRESSES: Comments may be submitted electronically by visiting: *https://osp.od.nih.gov/comment-form-nih-guidelines/.* Comments may also be sent via fax to 301–496–9839, or by mail to the Office of Science Policy, National Institutes of Health, 6705 Rockledge Drive, Suite 750, Bethesda, Maryland 20892–7985. All written comments received in response to this notice will be available for public inspection at NIH Office of Science Policy (OSP), 6705 Rockledge Drive, Suite 750, Bethesda, MD 20892–7985, weekdays between the hours of 8:30 a.m. and 5 p.m. and may be posted without change, including any personal information, to the NIH OSP website.

FOR FURTHER INFORMATION CONTACT: If you have questions, or require additional background information about these proposed changes, please contact the NIH by email at *SciencePolicy@od.nih.gov*, or telephone at 301–496–9838. You may also contact Jessica Tucker, Ph.D., Director of the Division of Biosafety, Biosecurity, and Emerging Biotechnology Policy, Office of Science Policy, NIH, at 301–451–4431 or *Jessica.Tucker@nih.gov.*

SUPPLEMENTARY INFORMATION: NIH is proposing a series of actions to the *NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (NIH Guidelines)* to streamline oversight of human gene transfer research (HGT), and to focus the *NIH Guidelines* more specifically on biosafety issues associated with research involving recombinant or synthetic nucleic acid molecules. The field of HGT has recently experienced a series of advances that have resulted in the translation of research into clinical practice, including U.S. Food and Drug Administration (FDA) approvals for licensed products. Additionally, oversight mechanisms for ensuring HGT proceeds safely have sufficiently evolved to keep pace with new discoveries in this field.

At this time, there is duplication in submitting protocols, annual reports, amendments, and serious adverse events for HGT clinical protocols to both NIH and FDA that does not exist for other areas of clinical research. Historically, this duplication was conceived as harmonized reporting, enabling FDA to provide regulatory oversight while NIH provided a forum for open dialogue and transparency. However, since these complementary functions were first envisioned, we have now seen several converging systems emerge that provide some of these functions. For instance, *ClinicalTrials.gov* has been instituted, which provides a transparent and searchable database for clinical trials. In addition, the protection of human research subjects was improved through changes that updated provisions of the Common Rule. In 2018, FDA released a suite of draft guidance documents pertaining to gene therapy that includes new guidance on manufacturing issues, long-term follow-up, and pathways for clinical development in certain areas, including hemophilia, ophthalmologic indications, and rare diseases.

While the science and oversight system have evolved, HGT protocols continue to receive special oversight that is not afforded to other areas of clinical research. This observation was also noted in a 2014 Institute of Medicine of the National Academies report, *Oversight and Review of Clinical Gene Transfer Protocols: Assessing the Role of the Recombinant DNA Advisory Committee,* in which it was recommended that NIH begin to limit RAC review to only exceptional HGT protocols that meet certain criteria and that would significantly benefit from RAC review. As very few protocols have been assessed by NIH to merit review under this new system, NIH asserts it is an opportune time to make changes to the *NIH Guidelines* to make oversight of HGT commensurate with oversight afforded to other areas of clinical research given the robust infrastructure in place to oversee this type of research.

Briefly to summarize, NIH proposes amending the *NIH Guidelines* to:

1. Eliminate RAC review and reporting requirements to NIH for HGT protocols.

2. Modify roles and responsibilities of investigators, institutions, IBCs, the RAC, and NIH to be consistent with these goals including:

a. Modifying roles of IBCs in reviewing HGT to be consistent with review of other covered research, and

b. Eliminating references to the RAC, including its roles in HGT and biosafety.

NIH suggests that the series of changes proposed in this Notice is a rational next step in the process of considering appropriate oversight of HGT. Consistent with these proposed changes to the *NIH Guidelines,* Section I–A, the Purpose of the *NIH Guidelines,* is proposed to be amended to clarify that the focus of the policy is biosafety

oversight of research involving recombinant or synthetic nucleic acid molecules. NIH notes that some of the duties of Institutional Biosafety Committees (IBCs) as currently written in the *NIH Guidelines* (*e.g.,* review of informed consent documents) are duplicative with the oversight provided by FDA or Institutional Review Boards (IRBs). NIH proposes that IBCs retain responsibility to review and approve HGT protocols; however, NIH proposes that these responsibilities be modified to be similar to those responsibilities IBCs currently have for review and approval of other research subject to the *NIH Guidelines.*

With the proposed elimination of the requirements for safety reporting under Appendix M, IBC oversight should be completed immediately after the last participant is administered the final dose of product. Additionally, the role of IBC review is proposed to be amended to be consistent with FDA's current guidance regarding individual patient expanded access to investigational drugs. In this way, the role of the IBCs will be focused on providing local biosafety oversight of basic and clinical research involving recombinant or synthetic nucleic acids. In particular, NIH seeks comment on whether the expectations of IBCs, in light of these proposed changes, have been articulated clearly in the proposed revisions to the *NIH Guidelines.*

Notably, the roles and responsibilities of the RAC are proposed to be removed from the *NIH Guidelines.* NIH recognizes the value of the RAC in discussions of science, safety, and ethics. In an effort to use the RAC as a public forum to advise on issues associated with emerging biotechnologies, the RAC's charter will be modified to change the committee's focus from research solely involving recombinant or synthetic nucleic acids to emerging biotechnologies research. In light of this modification to the committee, NIH proposes eliminating references to the RAC in the *NIH Guidelines,* though NIH may continue to seek advice from the RAC on biosafety issues that fall under the purview of the *NIH Guidelines.* Similarly, NIH may choose to seek advice from internal working groups or Federal Advisory Committees on a variety of issues, when warranted.

The proposed changes outlined above will require amendment of multiple portions of the *NIH Guidelines.* Sections and appendices proposed to be deleted from the current *NIH Guidelines* may be accessed at *https://osp.od.nih.gov/biotechnology/nih-guidelines/.* Following deletions, sections and appendices will be relabeled to proceed consecutively throughout the *NIH Guidelines.*

Proposed Amendments to the *NIH Guidelines*

Section I–A currently states:

Section I–A. Purpose

The purpose of the *NIH Guidelines* is to specify the practices for constructing and handling: (i) Recombinant nucleic acid molecules, (ii) synthetic nucleic acid molecules, including those that are chemically or otherwise modified but can base pair with naturally occurring nucleic acid molecules, and (iii) cells, organisms, and viruses containing such molecules.

Section I–A is proposed to be amended as follows:

Section I–A. Purpose

The purpose of the *NIH Guidelines* is to specify the biosafety practices and containment principles for constructing and handling: (i) Recombinant nucleic acid molecules, (ii) synthetic nucleic acid molecules, including those that are chemically or otherwise modified but can base pair with naturally occurring nucleic acid molecules, and (iii) cells, organisms, and viruses containing such molecules.

Section I–A–1 currently states:

Section I–A–1. Any nucleic acid molecule experiment, which according to the *NIH Guidelines* requires approval by NIH, must be submitted to NIH or to another federal agency that has jurisdiction for review and approval. Once approvals, or other applicable clearances, have been obtained from a federal agency other than NIH (whether the experiment is referred to that agency by NIH or sent directly there by the submitter), the experiment may proceed without the necessity for NIH review or approval. (See exception in Section I–A–1-a regarding requirement for human gene transfer protocol registration.)

Section I–A–1 is proposed to be amended as follows:

Section I–A–1. Any nucleic acid molecule experiment, which according to the *NIH Guidelines* requires approval by NIH, must be submitted to NIH or to another federal agency that has jurisdiction for review and approval. Once approvals, or other applicable clearances, have been obtained from a federal agency other than NIH (whether the experiment is referred to that agency by NIH or sent directly there by the submitter), the experiment may proceed without the necessity for NIH review or approval.

Section I–A–1–a currently states:

Section I–A–1–a. For experiments involving the deliberate transfer of recombinant or synthetic nucleic acid molecules, or DNA or RNA derived from recombinant or synthetic nucleic acid molecules, into human research participants (human gene transfer), no research participant shall be enrolled (see definition of enrollment in Section I–E–7) until the NIH protocol registration process has been completed (see Appendix M–I–B, *Selection of Individual Protocols for Public RAC Review and Discussion*); Institutional Biosafety Committee (IBC) approval (from the clinical trial site) has been obtained; Institutional Review Board (IRB) approval has been obtained; and all applicable regulatory authorization(s) have been obtained.

For a clinical trial site that is added after the completion of the NIH protocol registration process, no research participant shall be enrolled (see definition of enrollment in Section I–E–7) at the clinical trial site until IBC approval and IRB approval from that site have been obtained. Within 30 days of enrollment (see definition of enrollment in Section I–E–7) at a clinical trial site, the following documentation shall be submitted to NIH OSP: (1) Institutional Biosafety Committee approval (from the clinical trial site); (2) Institutional Review Board approval; (3) Institutional Review Board-approved informed consent document(s); and (4) NIH grant number(s) if applicable.

Section I–A–1–a is proposed to be amended as follows:

Section I–A–1–a. For experiments involving the deliberate transfer of recombinant or synthetic nucleic acid molecules, or DNA or RNA derived from recombinant or synthetic nucleic acid molecules, into human research participants (human gene transfer), no human gene transfer experiment shall be initiated (see definition of initiation in Section I–E–7) until Institutional Biosafety Committee (IBC) approval (from the clinical trial site) has been obtained; and all other applicable institutional and regulatory authorization(s) and approvals have been obtained.

Section I–E. General Definitions is proposed to be amended to delete the current definitions I–E–4, I–E–7 through I–E–12 and to include a new definition for ''initiation.''

Section I–E–4 is proposed to be amended to define initiation as the following: ''Initiation'' of research is the introduction of recombinant or synthetic nucleic acid molecules into organisms, cells, or viruses.

Section III currently states:

Section III. Experiments Covered by the *NIH Guidelines*

This section describes six categories of experiments involving recombinant or synthetic nucleic acid molecules: (i) Those that require Institutional Biosafety Committee (IBC) approval, RAC review, and NIH Director approval before initiation (see Section III–A), (ii) those that require NIH OSP and Institutional Biosafety Committee approval before initiation (see Section III–B), (iii) those that require Institutional Biosafety Committee and Institutional Review Board approvals and RAC review before research participant enrollment (see Section III–C), (iv) those that require Institutional Biosafety Committee approval before initiation (see Section III–D), (v) those that require Institutional Biosafety Committee notification simultaneous with initiation (see Section III–E), and (vi) those that are exempt from the *NIH Guidelines* (see Section III–F).

Note: If an experiment falls into Sections III–A, III–B, or III–C and one of the other sections, the rules pertaining to Sections III–A, III–B, or III–C shall be followed. If an experiment falls into Section III–F and into either Sections III–D or III–E as well, the experiment is considered exempt from the *NIH Guidelines.*

Any change in containment level, which is different from those specified in the *NIH Guidelines,* may not be initiated without the express approval of NIH OSP (see Section IV–C–1–b–(2) and its subsections, Minor Actions).

Section III is proposed to be amended as follows:

Section III. Experiments Covered by the *NIH Guidelines*

This section describes six categories of experiments involving recombinant or synthetic nucleic acid molecules: (i) Those that require Institutional Biosafety Committee (IBC) approval and NIH Director approval before initiation (see Section III–A), (ii) those that require NIH OSP and Institutional Biosafety Committee approval before initiation (see Section III–B), (iii) those that require Institutional Biosafety Committee approval before initiation of human gene transfer (see Section III–C), (iv) those that require Institutional Biosafety Committee approval before initiation (see Section III–D), (v) those that require Institutional Biosafety Committee notification simultaneous with initiation (see Section III–E), and (vi) those that are exempt from the *NIH Guidelines* (see Section III–F).

Note: If an experiment falls into Sections III–A, III–B, or III–C and one of the other sections, the rules pertaining to Sections III–A, III–B, or III–C shall be followed. If an experiment falls into Section III–F and into either Sections III–D or III–E as well, the experiment is considered exempt from the *NIH Guidelines.*

Any change in containment level, which is different from those specified in the *NIH Guidelines,* may not be initiated without the express approval of NIH OSP (see Section IV–C–1–b–(2) and its subsections, Minor Actions).

Section III–A currently states:

Section III–A. Experiments That Require Institutional Biosafety Committee Approval, RAC Review, and NIH Director Approval Before Initiation (See Section IV–C–1–b–(1), Major Actions).

Experiments considered as *Major Actions* under the *NIH Guidelines* cannot be initiated without submission of relevant information on the proposed experiment to the Office of Science Policy, National Institutes of Health, preferably by email to: *NIHGuidelines@od.nih.gov*, the publication of the proposal in the **Federal Register** for 15 days of comment, review by RAC, and specific approval by NIH. The containment conditions or stipulation requirements for such experiments will be recommended by RAC and set by NIH at the time of approval. Such experiments require Institutional Biosafety Committee approval before initiation. Specific experiments already approved are included in Appendix D, *Major Actions Taken under the NIH Guidelines,* which may be obtained from the Office of Science Policy, National Institutes of Health, preferably by submitting a request for this information to: *NIHGuidelines@od.nih.gov*; additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*).

Section III–A–1–a. The deliberate transfer of a drug resistance trait to microorganisms that are not known to acquire the trait naturally (see Section V–B, *Footnotes and References of Sections I–IV*), if such acquisition could compromise the ability to control disease agents in humans, veterinary medicine, or agriculture, will be reviewed by the RAC.

Consideration should be given as to whether the drug resistance trait to be used in the experiment would render that microorganism resistant to the primary drug available to and/or indicated for certain populations, for example children or pregnant women.

At the request of an Institutional Biosafety Committee, NIH OSP will make a determination regarding whether a specific experiment involving the deliberate transfer of a drug resistance trait falls under Section III–A–1-a and therefore requires RAC review and NIH Director approval. An Institutional Biosafety Committee may also consult with NIH OSP regarding experiments that do not meet the requirements of Section III–A–1–a but nonetheless raise important public health issues. NIH OSP will consult, as needed, with one or more experts, which may include the RAC.

Section III–A is proposed to be amended as follows:

Section III–A. Experiments That Require Institutional Biosafety Committee Approval and NIH Director Approval Before Initiation (See Section IV–C–1–b–(1), Major Actions).

Section III–A–1. Major Actions Under the *NIH Guidelines*

Experiments considered as *Major Actions* as defined in Section III–A–1-a under the *NIH Guidelines* cannot be initiated without submission of relevant information on the proposed experiment to the Office of Science Policy, National Institutes of Health, preferably by email to: *NIHGuidelines@od.nih.gov*, the publication of the proposal in the **Federal Register** for 15 days of comment, and specific approval by NIH. The containment conditions or stipulation requirements for such experiments will be set by NIH at the time of approval. Such experiments require Institutional Biosafety Committee approval before initiation. Specific experiments already approved are included in Appendix D, *Major Actions Taken under the NIH Guidelines,* which may be obtained from the Office of Science Policy, National Institutes of Health, preferably by submitting a request for this information to: *NIHGuidelines@od.nih.gov*; additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*).

Section III–A–1-a. The deliberate transfer of a drug resistance trait to microorganisms that are not known to acquire the trait naturally (see Section V–B, *Footnotes and References of Sections I–IV*), if such acquisition could compromise the ability to control disease agents in humans, veterinary medicine, or agriculture, will require NIH Director approval.

Consideration should be given as to whether the drug resistance trait to be used in the experiment would render that microorganism resistant to the primary drug available to and/or indicated for certain populations, for example children or pregnant women.

At the request of an Institutional Biosafety Committee, NIH OSP will

make a determination regarding whether a specific experiment involving the deliberate transfer of a drug resistance trait falls under Section III–A–1-a and therefore requires NIH Director approval. An Institutional Biosafety Committee may also consult with NIH OSP regarding experiments that do not meet the requirements of Section III–A–1-a but nonetheless raise important public health issues.

Section III–C currently states:

Section III–C. Experiments that Require Institutional Biosafety Committee and Institutional Review Board Approvals and RAC Review (if applicable) Before Research Participant Enrollment

Section III–C–1. Experiments Involving the Deliberate Transfer of Recombinant or Synthetic Nucleic Acid Molecules, or DNA or RNA Derived from Recombinant or Synthetic Nucleic Acid Molecules, into One or More Human Research Participants

Human gene transfer is the deliberate transfer into human research participants of either:

1. Recombinant nucleic acid molecules, or DNA or RNA derived from recombinant nucleic acid molecules, or

2. Synthetic nucleic acid molecules, or DNA or RNA derived from synthetic nucleic acid molecules that meet any one of the following criteria:

a. Contain more than 100 nucleotides; or

b. Possess biological properties that enable integration into the genome (*e.g., cis* elements involved in integration); or

c. Have the potential to replicate in a cell; or

d. Can be translated or transcribed.

No research participant shall be enrolled (see definition of enrollment in Section I–E–7) until the NIH protocol registration process has been completed (see Appendix M–I–B, *Selection of Individual Protocols for Public RAC Review and Discussion*).

In its evaluation of human gene transfer protocols, NIH will make a determination, following a request from one or more oversight bodies involved in the review at an initial site(s), whether a proposed human gene transfer experiment meets the requirements for selecting protocols for public RAC review and discussion (See Appendix M–I–B). The process of public RAC review and discussion is intended to foster the safe and ethical conduct of human gene transfer experiments. Public review and discussion of a human gene transfer experiment (and access to relevant information) also serves to inform the public about the technical aspects of the proposal, the meaning and significance of the research, and any significant safety, social, and ethical implications of the research.

Public RAC review and discussion of a human gene transfer experiment will be initiated in two exceptional circumstances: (1) Following a request for public RAC review from one or more oversight bodies involved in the review at an initial site(s), the NIH concurs that (a) the individual protocol would significantly benefit from RAC review and (b) that the submission meets one or more of the following NIH RAC review criteria: (i) The protocol uses a new vector, genetic material, or delivery methodology that represents a first-in-human experience, thus presenting an unknown risk; (ii) the protocol relies on preclinical safety data that were obtained using a new preclinical model system of unknown and unconfirmed value; or (iii) the proposed vector, gene construct, or method of delivery is associated with possible toxicities that are not widely known and that may render it difficult for oversight and federal regulatory bodies to evaluate the protocol rigorously. However, if one or more oversight bodies involved in the review at an initial site(s) requests public RAC review, but NIH does not concur that (a) the individual protocol would significantly benefit from RAC review and (b) that the submission meets one or more of the RAC review criteria (listed in i, ii, or iii), then the NIH OSP will inform, within 10 working days, the requesting and other oversight bodies involved in the review at an initial site(s) that public RAC review is not warranted. (2) The NIH Director, in consultation (if needed) with appropriate regulatory authorities, determines that the submission: (a) Meets one or more of the NIH RAC review criteria (listed in i, ii, or iii) and that public RAC review and discussion would provide a clear and obvious benefit to the scientific community or the public; or (b) raises significant scientific, societal, or ethical concerns.

For a clinical trial site that is added after the completion of the NIH protocol registration process, no research participant shall be enrolled (see definition of enrollment in Section I–E–7) at the clinical trial site until IBC approval and IRB approval from that site have been obtained. Within 30 days of enrollment (see definition of enrollment in Section I–E–7) at a clinical trial site, the following documentation shall be submitted to NIH OSP: (1) Institutional Biosafety Committee approval (from the clinical trial site); (2) Institutional Review Board approval; (3) Institutional Review Board-approved informed consent document(s); and (4) NIH grant number(s) if applicable.

In order to maintain public access to information regarding human gene transfer (including protocols that are not publicly reviewed by the RAC), the NIH OSP will maintain the documentation described in Appendices M–I through M–II. The information provided in response to Appendix M should not contain any confidential commercial or financial information or trade secrets, enabling all aspects of RAC review to be open to the public.

Note: For specific directives concerning the use of retroviral vectors for gene delivery, consult Appendix B–V–1, *Murine Retroviral Vectors.*

Section III–C is proposed to be amended as follows:

Section III–C. Experiments Involving Human Gene Transfer That Require Institutional Biosafety Committee Approval Prior to Initiation

Section III–C–1. Experiments Involving the Deliberate Transfer of Recombinant or Synthetic Nucleic Acid Molecules, or DNA or RNA Derived From Recombinant or Synthetic Nucleic Acid Molecules, into One or More Human Research Participants

Human gene transfer is the deliberate transfer into human research participants of either:

1. Recombinant nucleic acid molecules, or DNA or RNA derived from recombinant nucleic acid molecules, or

2. Synthetic nucleic acid molecules, or DNA or RNA derived from synthetic nucleic acid molecules that meet any one of the following criteria:

a. Contain more than 100 nucleotides; or

b. Possess biological properties that enable integration into the genome (*e.g., cis* elements involved in integration); or

c. Have the potential to replicate in a cell; or

d. Can be translated or transcribed.

Research cannot be initiated until Institutional Biosafety Committee and all other applicable institutional and regulatory authorization(s) and approvals have been obtained.

An individual patient expanded access IND is not research subject to the *NIH Guidelines* and thus does not need to be submitted to an IBC, if the following conditions are met: (i) A PI is submitting an individual patient expanded access IND using Form FDA 3926; (ii) the PI selects the appropriate box on that form to request a waiver under 21 CFR 56.105 of the requirements in 21 CFR 56.108(c); and (iii) the FDA concludes that such a waiver is appropriate.

Section III–D–7–b currently states:

Section III–D–7–b. Highly Pathogenic Avian Influenza H5N1 strains within the Goose/Guangdong/96-like H5 lineage (HPAI H5N1). Experiments involving influenza viruses containing a majority of genes and/or segments from a HPAI H5N1 influenza virus shall be conducted at BL3 enhanced containment, (see Appendix G–II–C–5, Biosafety Level 3 Enhanced for Research Involving Risk Group 3 Influenza Viruses). Experiments involving influenza viruses containing a minority of genes and/or segments from a HPAI H5N1 influenza virus shall be conducted at BL3 enhanced unless a risk assessment performed by the IBC determines that they can be conducted safely at biosafety level 2 and after they have been excluded pursuant to 9 CFR 121.3(e). NIH OSP is available to IBCs to provide consultation with the RAC and influenza virus experts when risk assessments are being made to determine the appropriate biocontainment for experiments with influenza viruses containing a minority of gene/segments from HPAI H5N1. Such experiments may be performed at BL3 enhanced containment or containment may be lowered to biosafety level 2, the level of containment for most research with other influenza viruses. (USDA/APHIS regulations and decisions on lowering containment also apply). In deciding to lower containment, the IBC should consider whether, in at least two animal models (*e.g.,* ferret, mouse, Syrian golden hamster, cotton rat, non-human primates), there is evidence that the resulting influenza virus shows reduced replication and virulence compared to the parental RG3 virus at relevant doses. This should be determined by measuring biological indices appropriate for the specific animal model (*e.g.,* severe weight loss, elevated temperature, mortality or neurological symptoms).

Section III–D–7–b is proposed to be amended as follows:

Section III–D–7–b. Highly Pathogenic Avian Influenza H5N1 strains within the Goose/Guangdong/96-like H5 lineage (HPAI H5N1). Experiments involving influenza viruses containing a majority of genes and/or segments from a HPAI H5N1 influenza virus shall be conducted at BL3 enhanced containment, (see Appendix G–II–C–5, Biosafety Level 3 Enhanced for Research Involving Risk Group 3 Influenza Viruses). Experiments involving influenza viruses containing a minority of genes and/or segments from a HPAI H5N1 influenza virus shall be conducted at BL3 enhanced unless a risk assessment performed by the IBC determines that they can be conducted safely at biosafety level 2 and after they have been excluded pursuant to 9 CFR 121.3(e). NIH OSP is available to IBCs to provide consultation with influenza virus experts when risk assessments are being made to determine the appropriate biocontainment for experiments with influenza viruses containing a minority of gene/segments from HPAI H5N1. Such experiments may be performed at BL3 enhanced containment or containment may be lowered to biosafety level 2, the level of containment for most research with other influenza viruses. (USDA/APHIS regulations and decisions on lowering containment also apply). In deciding to lower containment, the IBC should consider whether, in at least two animal models (*e.g.,* ferret, mouse, Syrian golden hamster, cotton rat, non-human primates), there is evidence that the resulting influenza virus shows reduced replication and virulence compared to the parental RG3 virus at relevant doses. This should be determined by measuring biological indices appropriate for the specific animal model (*e.g.,* severe weight loss, elevated temperature, mortality or neurological symptoms).

Section III–D–7–d currently states:

Section III–D–7–d. Antiviral Susceptibility and Containment. The availability of antiviral drugs as preventive and therapeutic measures is an important safeguard for experiments with 1918 H1N1, HPAI H5N1, and human H2N2 (1957–1968). If an influenza virus containing genes from one of these viruses is resistant to both classes of current antiviral agents, adamantanes and neuraminidase inhibitors, higher containment may be required based on the risk assessment considering transmissibility to humans, virulence, pandemic potential, alternative antiviral agents if available, etc.

Experiments with 1918 H1N1, human H2N2 (1957–1968) or HPAI H5N1 that are designed to create resistance to neuraminidase inhibitors or other effective antiviral agents (including investigational antiviral agents being developed for influenza) would be subject to Section III–A–1 (*Major Actions*) and require RAC review and NIH Director approval. As per Section I–A–1 of the *NIH Guidelines,* if the agent is a Select Agent, the NIH will defer to the appropriate federal agency (HHS or U.S. Department of Agriculture (USDA) Select Agent Divisions) on such experiments.

Section III–D–7–d is proposed to be amended as follows:

Section III–D–7–d. Antiviral Susceptibility and Containment. The availability of antiviral drugs as preventive and therapeutic measures is an important safeguard for experiments with 1918 H1N1, HPAI H5N1, and human H2N2 (1957–1968). If an influenza virus containing genes from one of these viruses is resistant to both classes of current antiviral agents, adamantanes and neuraminidase inhibitors, higher containment may be required based on the risk assessment considering transmissibility to humans, virulence, pandemic potential, alternative antiviral agents if available, etc.

Experiments with 1918 H1N1, human H2N2 (1957–1968) or HPAI H5N1 that are designed to create resistance to neuraminidase inhibitors or other effective antiviral agents (including investigational antiviral agents being developed for influenza) would be subject to Section III–A–1 (*Major Actions*) and NIH Director approval. As per Section I–A–1 of the *NIH Guidelines,* if the agent is a Select Agent, NIH will defer to the appropriate Federal agency (HHS or USDA Select Agent Divisions) on such experiments.

Section III–F–6 currently states:

Section III–F–6. Those that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent. A list of such exchangers will be prepared and periodically revised by the NIH Director with advice of the RAC after appropriate notice and opportunity for public comment (see Section IV–C–1–b–(1)–(c), *Major Actions*). See Appendices A–I through A–VI, *Exemptions under Section III–F–6—Sublists of Natural Exchangers,* for a list of natural exchangers that are exempt from the *NIH Guidelines.*

Section III–F–6 is proposed to be amended as follows:

Section III–F–6. Those that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent. A list of such exchangers will be prepared and periodically revised by the NIH Director after appropriate notice and opportunity for public comment (see Section IV–C–1–b–(1)–(c), *Major Actions*). See Appendices A–I through A–VI, *Exemptions under Section III–F–6—Sublists of Natural Exchangers,* for a list of natural exchangers that are exempt from the *NIH Guidelines.*

Section III–F–8 currently states:

Section III–F–8. Those that do not present a significant risk to health or the

environment (see Section IV–C–1–b–(1)–(c), *Major Actions*), as determined by the NIH Director, with the advice of the RAC, and following appropriate notice and opportunity for public comment. See Appendix C, *Exemptions under Section III–F–8* for other classes of experiments which are exempt from the *NIH Guidelines.*

Section III–F–8 is proposed to be amended as follows:

Section III–F–8. Those that do not present a significant risk to health or the environment (see Section IV–C–1–b–(1)–(c), *Major Actions*), as determined by the NIH Director, and following appropriate notice and opportunity for public comment. See Appendix C, *Exemptions under Section III–F–8* for other classes of experiments which are exempt from the *NIH Guidelines.*

Section IV–B–1–f currently states:

Section IV–B–1–f. Ensure that when the institution participates in or sponsors recombinant or synthetic nucleic acid molecule research involving human subjects: (i) The Institutional Biosafety Committee has adequate expertise and training (using *ad hoc* consultants as deemed necessary), (ii) all aspects of Appendix M have been appropriately addressed by the Principal Investigator; and (iii) no research participant shall be enrolled (see definition of enrollment in Section I–E–7) in a human gene transfer experiment until the NIH protocol registration process has been completed (see Appendix M–I–B, *Selection of Individual Protocols for Public RAC Review and Discussion*), Institutional Biosafety Committee approval has been obtained, Institutional Review Board approval has been obtained, and all applicable regulatory authorizations have been obtained. Institutional Biosafety Committee approval must be obtained from the clinical trial site.

Section IV–B–1–f is proposed to be amended as follows:

Section IV–B–1–f. Ensure that when the institution participates in or sponsors recombinant or synthetic nucleic acid molecule research involving human subjects: (i) The Institutional Biosafety Committee has adequate expertise and training (using *ad hoc* consultants as deemed necessary), and (ii) no human gene transfer experiment shall be initiated until Institutional Biosafety Committee approval has been obtained, and all other applicable institutional and regulatory authorization(s) and approvals have been obtained. Institutional Biosafety Committee approval must be obtained from the clinical trial site.

None of the other sub-sections under Section IV–B–1. General Information are proposed to be amended.

Section IV–B–2–a–(1) currently states:

Section IV–B–2–a–(1). The Institutional Biosafety Committee must be comprised of no fewer than five members so selected that they collectively have experience and expertise in recombinant or synthetic nucleic acid molecule technology and the capability to assess the safety of recombinant or synthetic nucleic acid molecule research and to identify any potential risk to public health or the environment. At least two members shall not be affiliated with the institution (apart from their membership on the Institutional Biosafety Committee) and who represent the interest of the surrounding community with respect to health and protection of the environment (*e.g.,* officials of state or local public health or environmental protection agencies, members of other local governmental bodies, or persons active in medical, occupational health, or environmental concerns in the community). The Institutional Biosafety Committee shall include at least one individual with expertise in plant, plant pathogen, or plant pest containment principles when experiments utilizing Appendix P, *Physical and Biological Containment for Recombinant or Synthetic Nucleic Acid Molecule Research Involving Plants,* require prior approval by the Institutional Biosafety Committee. The Institutional Biosafety Committee shall include at least one scientist with expertise in animal containment principles when experiments utilizing Appendix Q, *Physical and Biological Containment for Recombinant or Synthetic Nucleic Acid Molecule Research Involving Animals,* require Institutional Biosafety Committee prior approval. When the institution conducts recombinant or synthetic nucleic acid molecule research at BL3, BL4, or Large Scale (greater than 10 liters), a Biological Safety Officer is mandatory and shall be a member of the Institutional Biosafety Committee (see Section IV–B–3, *Biological Safety Officer*). When the institution participates in or sponsors recombinant or synthetic nucleic acid molecule research involving human research participants, the institution must ensure that: (i) The Institutional Biosafety Committee has adequate expertise and training (using *ad hoc* consultants as deemed necessary); (ii) all aspects of Appendix M have been appropriately addressed by the Principal Investigator; (iii) no research participant shall be enrolled (see definition of enrollment in Section I–E–7) in a human gene transfer experiment until the NIH protocol registration process has been completed (see Appendix M–I–B, *Selection of Individual Protocols for Public RAC Review and Discussion*); and (iv) final IBC approval is granted only after the NIH protocol registration process has been completed (see Appendix M–I–B, *Selection of Individual Protocols for Public RAC Review and Discussion*). Institutional Biosafety Committee approval must be obtained from the clinical trial site.

Section IV–B–2–a–(1) is proposed to be amended as follows:

Section IV–B–2–a–(1). The Institutional Biosafety Committee must be comprised of no fewer than five members so selected that they collectively have experience and expertise in recombinant or synthetic nucleic acid molecule technology and the capability to assess the safety of recombinant or synthetic nucleic acid molecule research and to identify any potential risk to public health or the environment. At least two members shall not be affiliated with the institution (apart from their membership on the Institutional Biosafety Committee) and who represent the interest of the surrounding community with respect to health and protection of the environment (*e.g.,* officials of state or local public health or environmental protection agencies, members of other local governmental bodies, or persons active in medical, occupational health, or environmental concerns in the community). The Institutional Biosafety Committee shall include at least one individual with expertise in plant, plant pathogen, or plant pest containment principles when experiments utilizing Appendix P, *Physical and Biological Containment for Recombinant or Synthetic Nucleic Acid Molecule Research Involving Plants,* require prior approval by the Institutional Biosafety Committee. The Institutional Biosafety Committee shall include at least one scientist with expertise in animal containment principles when experiments utilizing Appendix Q, *Physical and Biological Containment for Recombinant or Synthetic Nucleic Acid Molecule Research Involving Animals,* require Institutional Biosafety Committee prior approval. When the institution conducts recombinant or synthetic nucleic acid molecule research at BL3, BL4, or Large Scale (greater than 10 liters), a Biological Safety Officer is mandatory and shall be a member of the Institutional Biosafety Committee (see Section IV–B–3, *Biological Safety Officer*). When the institution participates in or sponsors

recombinant or synthetic nucleic acid molecule research involving human research participants, the institution must ensure that the Institutional Biosafety Committee has adequate expertise and training (using *ad hoc* consultants as deemed necessary). Institutional Biosafety Committee approval must be obtained from the clinical trial site.

Section IV–B–2–b–(1) currently states:

Section IV–B–2–b–(1). Reviewing recombinant or synthetic nucleic acid molecule research conducted at or sponsored by the institution for compliance with the *NIH Guidelines* as specified in Section III, *Experiments Covered by the NIH Guidelines,* and approving those research projects that are found to conform with the *NIH Guidelines.* This review shall include: (i) Independent assessment of the containment levels required by the *NIH Guidelines* for the proposed research; (ii) assessment of the facilities, procedures, practices, and training and expertise of personnel involved in recombinant or synthetic nucleic acid molecule research; (iii) ensuring that all aspects of Appendix M have been appropriately addressed by the Principal Investigator; (iv) ensuring that no research participant is enrolled (see definition of enrollment in Section I–E–7) in a human gene transfer experiment until the NIH protocol registration process has been completed (see Appendix M–I–B, *Selection of Individual Protocols for Public RAC Review and Discussion*), Institutional Biosafety Committee approval (from the clinical trial site) has been obtained, Institutional Review Board approval has been obtained, and all applicable regulatory authorizations have been obtained; (v) for human gene transfer protocols selected for public RAC review and discussion, consideration of the issues raised and recommendations made as a result of this review and consideration of the Principal Investigator's response to the recommendations; (vi) ensuring that final IBC approval is granted only after the NIH protocol registration process has been completed (see Appendix M–I–B, *Selection of Individual Protocols for Public RAC Review and Discussion*); and (vii) ensuring compliance with all surveillance, data reporting, and adverse event reporting requirements set forth in the *NIH Guidelines.*

Section IV–B–2–b–(1) is proposed to be amended as follows:

Section IV–B–2–b–(1). Reviewing recombinant or synthetic nucleic acid molecule research conducted at or sponsored by the institution for compliance with the *NIH Guidelines* as specified in Section III, *Experiments Covered by the NIH Guidelines,* and approving those research projects that are found to conform with the *NIH Guidelines.* This review shall include: (i) Independent assessment of the containment levels required by the *NIH Guidelines* for the proposed research; (ii) assessment of the facilities, procedures, practices, and training and expertise of personnel involved in recombinant or synthetic nucleic acid molecule research; (iii) for recombinant or synthetic nucleic acid molecule research involving human research participants, assessment focused on biosafety issues (*e.g.,* administration, shedding).

Section IV–B–2–b–(8) currently states:

Section IV–B–2–b–(8). The Institutional Biosafety Committee may not authorize initiation of experiments which are not explicitly covered by the *NIH Guidelines* until NIH (with the advice of the RAC when required) establishes the containment requirement.

Section IV–B–2–b–(8) is proposed to be amended as follows:

Section IV–B–2–b–(8). The Institutional Biosafety Committee may not authorize initiation of experiments which are not explicitly covered by the *NIH Guidelines* until NIH establishes the containment requirement.

None of the other sub-sections under Section IV–B–2. Institutional Biosafety Committee (IBC) are proposed to be amended.

Section IV–B–6 currently states:

Section IV–B–6. Human Gene Therapy Expertise

When the institution participates in or sponsors recombinant or synthetic nucleic acid molecule research involving human subjects, the institution must ensure that: (i) The Institutional Biosafety Committee has adequate expertise and training (using *ad hoc* consultants as deemed necessary) and (ii) all aspects of Appendix M, *Points to Consider in the Design and Submission of Protocols for the Transfer of Recombinant or Synthetic Nucleic Acid Molecules into One or More Human Subjects (Points to Consider*), have been appropriately addressed by the Principal Investigator prior to its approval.

Section IV–B–6 is proposed to be amended as follows:

Section IV–B–6. Human Gene Transfer Expertise

When the institution participates in or sponsors recombinant or synthetic nucleic acid molecule research involving human subjects, the institution must ensure that the Institutional Biosafety Committee has adequate expertise and training (using *ad hoc* consultants as deemed necessary).

Section IV–B–7 currently states:

Section IV–B–7. Principal Investigator (PI)

On behalf of the institution, the Principal Investigator is responsible for full compliance with the *NIH Guidelines* in the conduct of recombinant or synthetic nucleic acid molecule research. A Principal Investigator engaged in human gene transfer research may delegate to another party, such as a corporate sponsor, the reporting functions set forth in Appendix M, with written notification to the NIH OSP of the delegation and of the name(s), address, telephone, and fax numbers of the contact. The Principal Investigator is responsible for ensuring that the reporting requirements are fulfilled and will be held accountable for any reporting lapses.

Section IV–B–7 is proposed to be amended as follows:

Section IV–B–7. Principal Investigator (PI)

On behalf of the institution, the Principal Investigator is responsible for full compliance with the *NIH Guidelines* in the conduct of recombinant or synthetic nucleic acid molecule research.

Section IV–B–7–b–(6) is proposed to be deleted in its entirety

Section IV–B–7–e–(5) is proposed to be deleted in its entirety

None of the other sub-sections under Section IV–B–7. Principal Investigator are proposed to be amended.

Section IV–C currently states:

Section IV–C. Responsibilities of the National Institutes of Health (NIH)

Section IV–C–1. NIH Director

The NIH Director is responsible for: (i) Establishing the *NIH Guidelines,* (ii) overseeing their implementation, and (iii) their final interpretation. The NIH Director has responsibilities under the *NIH Guidelines* that involve OSP and RAC. OSP's responsibilities under the *NIH Guidelines* are administrative. Advice from RAC is primarily scientific, technical, and ethical. In certain circumstances, there is specific opportunity for public comment with published response prior to final action.

Section IV–C–1-a. General Responsibilities

The NIH Director is responsible for:

Section IV–C–1–a–(1). Promulgating requirements as necessary to implement the *NIH Guidelines;*

Section IV–C–1–a–(2). Establishing and maintaining RAC to carry out the responsibilities set forth in Section IV–C–2, *Recombinant DNA Advisory Committee* (RAC membership is specified in its charter and in Section IV–C–2);

Section IV–C–1–a–(3). Establishing and maintaining NIH OSP to carry out the responsibilities defined in Section IV–C–3, *Office of Science Policy;*

Section IV–C–1–a–(4). Conducting and supporting training programs in laboratory safety for Institutional Biosafety Committee members, Biological Safety Officers and other institutional experts (if applicable), Principal Investigators, and laboratory staff.

Section IV–C–1–a–(5). Establishing and convening Gene Therapy Policy Conferences as described in Appendix L, *Gene Therapy Policy Conferences.*

Section IV–C–1–b. Specific Responsibilities

In carrying out the responsibilities set forth in this section, the NIH Director, or a designee shall weigh each proposed action through appropriate analysis and consultation to determine whether it complies with the *NIH Guidelines* and presents no significant risk to health or the environment.

Section IV–C–1–b–(1). Major Actions

To execute *Major Actions,* the NIH Director shall seek the advice of RAC and provide an opportunity for public and federal agency comment. Specifically, the Notice of Meeting and *Proposed Actions* shall be published in the **Federal Register** at least 15 days before the RAC meeting. The NIH Director's decision/recommendation (at his/her discretion) may be published in the **Federal Register** for 15 days of comment before final action is taken. The NIH Director's final decision/recommendation, along with responses to public comments, shall be published in the **Federal Register**. The RAC and Institutional Biosafety Committee Chairs shall be notified of the following decisions:

Section IV–C–1–b–(1)–(a). Changing containment levels for types of experiments that are specified in the *NIH Guidelines* when a *Major Action* is involved;

Section IV–C–1–b–(1)–(b). Assigning containment levels for types of experiments that are not explicitly considered in the *NIH Guidelines* when a *Major Action* is involved;

Section IV–C–1–b–(1)–(c). Promulgating and amending a list of classes of recombinant or synthetic nucleic acid molecules to be exempt from the *NIH Guidelines* because they consist entirely of DNA segments from species that exchange DNA by known physiological processes or otherwise do not present a significant risk to health or the environment;

Section IV–C–1–b–(1)–(d). Permitting experiments specified by Section III–A, *Experiments that Require Institutional Biosafety Committee Approval, RAC Review, and NIH Director Approval Before Initiation;*

Section IV–C–1–b–(1)–(e). Certifying new host-vector systems with the exception of minor modifications of already certified systems (the standards and procedures for certification are described in Appendix I–II, *Certification of Host-Vector Systems*). Minor modifications constitute (*e.g.,* those of minimal or no consequence to the properties relevant to containment); and

Section IV–C–1–b–(1)–(f). Adopting other changes in the *NIH Guidelines.*

Section IV–C–1–b–(2). Minor Actions

NIH OSP shall carry out certain functions as delegated to it by the NIH Director (see Section IV–C–3, *Office of Science Policy*). *Minor Actions* (as determined by NIH OSP in consultation with the RAC Chair and one or more RAC members, as necessary) will be transmitted to RAC and Institutional Biosafety Committee Chairs:

Section IV–C–1–b–(2)–(a). Changing containment levels for experiments that are specified in Section III, *Experiments Covered by the NIH Guidelines* (except when a *Major Action* is involved);

Section IV–C–1–b–(2)–(b). Assigning containment levels for experiments not explicitly considered in the *NIH Guidelines;*

Section IV–C–1–b–(2)–(c). Revising the *Classification of Etiologic Agents* for the purpose of these *NIH Guidelines* (see Section V–A, *Footnotes and References of Sections I–IV*).

Section IV–C–1–b–(2)–(d). Interpreting the *NIH Guidelines* for experiments to which the *NIH Guidelines* do not specifically assign containment levels;

Section IV–C–1–b–(2)–(e). Setting containment under Sections III–D–1–d, *Experiments Using Risk Group 2, Risk Group 3, Risk Group 4, or Restricted Agents as Host-Vector Systems,* and III–D–2–b, *Experiments in which DNA from Risk Group 2, Risk Group 3, Risk Group 4, or Restricted Agents is Cloned into Nonpathogenic Prokaryotic or Lower Eukaryotic Host-Vector Systems;*

Section IV–C–1–b–(2)–(f). Approving minor modifications of already certified host-vector systems (the standards and procedures for such modifications are described in Appendix I–II, *Certification of Host-Vector Systems*);

Section IV–C–1–b–(2)–(g). Decertifying already certified host-vector systems;

Section IV–C–1–b–(2)–(h). Adding new entries to the list of molecules toxic for vertebrates (see Appendix F, *Containment Conditions for Cloning of Genes Coding for the Biosynthesis of Molecules Toxic for Vertebrates*); and

Section IV–C–1–b–(2)–(i). Determining appropriate containment conditions for experiments according to case precedents developed under Section IV–C–1–b–(2)–(c).

Section IV–C is proposed to be amended as follows:

Section IV–C. Responsibilities of the National Institutes of Health (NIH)

Section IV–C–1. NIH Director

The NIH Director is responsible for: (i) Establishing the *NIH Guidelines,* (ii) overseeing their implementation, and (iii) their final interpretation. The NIH Director has responsibilities under the *NIH Guidelines* that involve OSP. OSP's responsibilities under the *NIH Guidelines* are administrative. In certain circumstances, there is specific opportunity for public comment with published response prior to final action.

Section IV–C–1–a. General Responsibilities

The NIH Director is responsible for:

Section IV–C–1–a–(1). Promulgating requirements as necessary to implement the *NIH Guidelines;*

Section IV–C–1–a–(2). Establishing and maintaining NIH OSP to carry out the responsibilities defined in Section IV–C–3, *Office of Science Policy;*

Section IV–C–1–a–(3). Conducting and supporting training programs in laboratory safety for Institutional Biosafety Committee members, Biological Safety Officers and other institutional experts (if applicable), Principal Investigators, and laboratory staff.

Section IV–C–1–b. Specific Responsibilities

In carrying out the responsibilities set forth in this section, the NIH Director or a designee shall weigh each proposed action through appropriate analysis and consultation to determine whether it complies with the *NIH Guidelines* and presents no significant risk to health or the environment.

Section IV–C–1–b–(1). Major Actions

To execute *Major Actions,* the NIH Director shall provide an opportunity for public and Federal agency comment. The NIH Director's decision/recommendation (at his/her discretion) may be published in the **Federal Register** for 15 days of comment before final action is taken. The NIH Director's final decision/recommendation, along with responses to public comments, shall be published in the **Federal Register**. Institutional Biosafety Committee Chairs shall be notified of the following decisions:

Section IV–C–1–b–(1)–(a). Changing containment levels for types of experiments that are specified in the *NIH Guidelines* when a *Major Action* is involved;

Section IV–C–1–b–(1)–(b). Assigning containment levels for types of experiments that are not explicitly considered in the *NIH Guidelines* when a *Major Action* is involved;

Section IV–C–1–b–(1)–(c). Promulgating and amending a list of classes of recombinant or synthetic nucleic acid molecules to be exempt from the *NIH Guidelines* because they consist entirely of DNA segments from species that exchange DNA by known physiological processes or otherwise do not present a significant risk to health or the environment;

Section IV–C–1–b–(1)–(d). Permitting experiments specified by Section III–A, *Experiments that Require Institutional Biosafety Committee Approval, and NIH Director Approval Before Initiation;*

Section IV–C–1–b–(1)–(e). Certifying new host-vector systems with the exception of minor modifications (*e.g.,* those of minimal or no consequence to the properties relevant to containment) of already certified systems (the standards and procedures for certification are described in Appendix I–II, *Certification of Host-Vector Systems;* and

Section IV–C–1–b–(1)–(f). Adopting other changes in the *NIH Guidelines.*

Section IV–C–1–b–(2). Minor Actions

NIH OSP shall carry out certain functions as delegated to it by the NIH Director (see Section IV–C–3, *Office of Science Policy*). *Minor Actions* will be transmitted to Institutional Biosafety Committee Chairs:

Section IV–C–1–b–(2)–(a). Changing containment levels for experiments that are specified in Section III, *Experiments Covered by the NIH Guidelines* (except when a *Major Action* is involved);

Section IV–C–1–b–(2)–(b). Assigning containment levels for experiments not explicitly considered in the *NIH Guidelines;*

Section IV–C–1–b–(2)–(c). Revising the *Classification of Etiologic Agents* for the purpose of these *NIH Guidelines* (see Section V–A, *Footnotes and References of Sections I–IV*).

Section IV–C–1–b–(2)–(d). Interpreting the *NIH Guidelines* for experiments to which the *NIH Guidelines* do not specifically assign containment levels;

Section IV–C–1–b–(2)–(e). Setting containment under Sections III–D–1–d, *Experiments Using Risk Group 2, Risk Group 3, Risk Group 4, or Restricted Agents as Host-Vector Systems,* and III–D–2–b, *Experiments in which DNA from Risk Group 2, Risk Group 3, Risk Group 4, or Restricted Agents is Cloned into Nonpathogenic Prokaryotic or Lower Eukaryotic Host-Vector Systems;*

Section IV–C–1–b–(2)–(f). Approving minor modifications of already certified host-vector systems (the standards and procedures for such modifications are described in Appendix I–II, *Certification of Host-Vector Systems*);

Section IV–C–1–b–(2)–(g). Decertifying already certified host-vector systems;

Section IV–C–1–b–(2)–(h). Adding new entries to the list of molecules toxic for vertebrates (see Appendix F, *Containment Conditions for Cloning of Genes Coding for the Biosynthesis of Molecules Toxic for Vertebrates*); and

Section IV–C–1–b–(2)–(i). Determining appropriate containment conditions for experiments according to case precedents developed under Section IV–C–1–b–(2)–(c).

Section IV–C–2. Recombinant DNA Advisory Committee (RAC) is proposed to be deleted in its entirety.

Section IV–C–3. Office of Science Policy (OSP) is proposed to be amended as follows:

Sections IV–C–3–a through IV–C–3–f are proposed to be deleted in their entirety. Section IV–C–3–h is proposed to be deleted in its entirety. Section IV–C–3–g will be renumbered to Section IV–C–3–a. Section IV–C–i will be renumbered to Section IV–C–3–b; Section IV–C–3–i–(1), Section IV–C–3–i–(2) and Section IV–C–3–i–(3) are proposed to be deleted in their entirety. Section IV–C–3–j will be renumbered to Section IV–C–3–c.

Section IV–C–3 is proposed to be amended as follows:

Section IV–C–3. Office of Science Policy (OSP)

OSP shall serve as a focal point for information on recombinant or synthetic nucleic acid molecule activities and provide advice to all within and outside NIH including institutions, Biological Safety Officers, Principal Investigators, Federal agencies, state and local governments, and institutions in the private sector. OSP shall carry out such other functions as may be delegated to it by the NIH Director. OSP's responsibilities include (but are not limited to) the following:

Section IV–C–3–a. Reviewing and approving experiments involving the cloning of genes encoding for toxin molecules that are lethal for vertebrates at an LD_{50} of less than or equal to 100 nanograms per kilogram body weight in organisms other than *Escherichia coli* K–12 (see Section III–B–1, *Experiments Involving the Cloning of Toxin Molecules with LD_{50} of Less than 100 Nanograms Per Kilogram Body Weight,* Appendix F, *Containment Conditions for Cloning of Genes Coding for the Biosynthesis of Molecules Toxic for Vertebrates*);

Section IV–C–3–b. Publishing in the **Federal Register**, as needed.

Section IV–C–3–c. Reviewing and approving the membership of an institution's Institutional Biosafety Committee, and where it finds the Institutional Biosafety Committee meets the requirements set forth in Section IV–B–2, *Institutional Biosafety Committee (IBC),* giving its approval to the Institutional Biosafety Committee membership.

Section IV–D–5 currently states:

Section IV–D–5. Protection of Proprietary Data—Voluntary Compliance

Section IV–D–5–a. General

In general, the Freedom of Information Act requires federal agencies to make their records available to the public upon request. However, this requirement does not apply to, among other things, ''trade secrets and commercial or financial information that is obtained from a person and that is privileged or confidential.'' Under 18 U.S.C. 1905, it is a criminal offense for an officer or employee of the U.S. or any federal department or agency to publish, divulge, disclose, or make known ''in any manner or to any extent not authorized by law any information coming to him in the course of his employment or official duties or by reason of any examination or investigation made by, or return, report or record made to or filed with, such department or agency or officer or employee thereof, which information concerns or relates to the trade secrets, (or) processes . . . of any person, firm, partnership, corporation, or association.'' This provision applies to all employees of the federal government, including special Government

employees. Members of RAC are ''special Government employees.''

Section IV–D–5 is proposed to be amended as follows:

Section IV–D–5–a. General

In general, the Freedom of Information Act requires federal agencies to make their records available to the public upon request. However, this requirement does not apply to, among other things, ''trade secrets and commercial or financial information that is obtained from a person and that is privileged or confidential.'' Under 18 U.S.C. 1905, it is a criminal offense for an officer or employee of the United States or any federal department or agency to publish, divulge, disclose, or make known ''in any manner or to any extent not authorized by law any information coming to him in the course of his employment or official duties or by reason of any examination or investigation made by, or return, report or record made to or filed with, such department or agency or officer or employee thereof, which information concerns or relates to the trade secrets, (or) processes . . . of any person, firm, partnership, corporation, or association.'' This provision applies to all employees of the federal government, including special Government employees.

None of the other sub-sections under Section IV are proposed to be amended.

Section V currently states:

Section V. Footnotes and References of Sections I through IV

Section V–A. The NIH Director, with advice of the RAC, may revise the classification for the purposes of the *NIH Guidelines* (see Section IV–C–1–b–(2)–(e), *Minor Actions*). The revised list of organisms in each Risk Group is reprinted in Appendix B, *Classification of Human Etiologic Agents on the Basis of Hazard.*

Section V–B. Section III, *Experiments Covered by the NIH Guidelines,* describes a number of places where judgments are to be made. In all these cases, the Principal Investigator shall make the judgment on these matters as part of his/her responsibility to ''make the initial determination of the required levels of physical and biological containment in accordance with the *NIH Guidelines*'' (see Section IV–B–7–c–(1)). For cases falling under Sections III–A through III–E, *Experiments Covered by the NIH Guidelines,* this judgment is to be reviewed and approved by the Institutional Biosafety Committee as part of its responsibility to make an ''independent assessment of the containment levels required by the *NIH Guidelines* for the proposed research'' (see Section IV–B–2–b–(1), *Institutional Biosafety Committee*). The Institutional Biosafety Committee may refer specific cases to NIH OSP as part of NIH OSP's functions to ''provide advice to all within and outside NIH'' (see Section IV–C–3). NIH OSP may request advice from the RAC as part of the RAC's responsibility for ''interpreting the *NIH Guidelines* for experiments to which the *NIH Guidelines* do not specifically assign containment levels'' (see Section IV–C–1–b–(2)–(f), *Minor Actions*).

Section V is proposed to be amended as follows:

Section V–A. The NIH Director may revise the classification for the purposes of the *NIH Guidelines* (see Section IV–C–1–b–(2)–(e), *Minor Actions*). The revised list of organisms in each Risk Group is reprinted in Appendix B, *Classification of Human Etiologic Agents on the Basis of Hazard.*

Section V–B. Section III, *Experiments Covered by the NIH Guidelines,* describes a number of places where judgments are to be made. In all these cases, the Principal Investigator shall make the judgment on these matters as part of his/her responsibility to ''make the initial determination of the required levels of physical and biological containment in accordance with the *NIH Guidelines*'' (see Section IV–B–7–c–(1)). For cases falling under Sections III–A through III–E, *Experiments Covered by the NIH Guidelines,* this judgment is to be reviewed and approved by the Institutional Biosafety Committee as part of its responsibility to make an ''independent assessment of the containment levels required by the *NIH Guidelines* for the proposed research'' (see Section IV–B–2–b–(1), *Institutional Biosafety Committee*). The Institutional Biosafety Committee may refer specific cases to NIH OSP as part of NIH OSP's functions to ''provide advice to all within and outside NIH'' (see Section IV–C–3).

Appendix A currently states:

Appendix A. Exemptions Under Section III–F–6—Sublists of Natural Exchangers

Certain specified recombinant or synthetic nucleic acid molecules that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent are exempt from these *NIH Guidelines* (see Section III–F–6, *Exempt Experiments*). Institutional Biosafety Committee registration is not required for these exempt experiments. A list of such exchangers will be prepared and periodically revised by the NIH Director with advice from the RAC after appropriate notice and opportunity for public comment (see Section IV–C–1-b-(1)-(c), *NIH Director—Specific Responsibilities*). For a list of natural exchangers that are exempt from the *NIH Guidelines,* see Appendices A–I through A–VI, *Exemptions under Section III–F–6 Sublists of Natural Exchangers.* Section III–F–6, *Exempt Experiments,* describes recombinant or synthetic nucleic acid molecules that are: (1) Composed entirely of DNA segments from one or more of the organisms within a sublist, and (2) to be propagated in any of the organisms within a sublist (see *Classification of Bergey's Manual of Determinative Bacteriology;* 8th edition, R.E. Buchanan and N.E. Gibbons, editors, Williams and Wilkins Company; Baltimore, Maryland 1984). Although these experiments are exempt, it is recommended that they be performed at the appropriate biosafety level for the host or recombinant/synthetic organism (see Biosafety in Microbiological and Biomedical Laboratories, 5th edition, 2007, U.S. DHHS, Public Health Service, Centers for Disease Control and Prevention, Atlanta, Georgia, and NIH Office of Biosafety, Bethesda, Maryland).

Appendix A is proposed to be amended as follows:

Appendix A. Exemptions Under Section III–F–6—Sublists of Natural Exchangers

Certain specified recombinant or synthetic nucleic acid molecules that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent are exempt from these *NIH Guidelines* (see Section III–F–6, *Exempt Experiments*). Institutional Biosafety Committee registration is not required for these exempt experiments. A list of such exchangers will be prepared and periodically revised by the NIH Director after appropriate notice and opportunity for public comment (see Section IV–C–1-b-(1)-(c), *NIH Director—Specific Responsibilities.* For a list of natural exchangers that are exempt from the *NIH Guidelines,* see Appendices A–I through A–VI, *Exemptions under Section III–F–6 Sublists of Natural Exchangers.* Section III–F–6, *Exempt Experiments,* describes recombinant or synthetic nucleic acid molecules that are: (1) Composed entirely of DNA segments from one or more of the organisms within a sublist, and (2) to be propagated in any of the organisms within a sublist (see *Bergey's Manual of Systematic Bacteriology;* 2nd edition, Springer-Verlag; New York, NY). Although these experiments are exempt, it is recommended that they be performed at the appropriate biosafety level for the host or recombinant/synthetic organism (see Biosafety in Microbiological and Biomedical Laboratories, 5th edition, 2007, U.S. DHHS, Public Health Service, Centers for Disease Control and Prevention, Atlanta, Georgia, and NIH Office of Biosafety, Bethesda, Maryland).

Appendix C–IX–A currently states:

Appendix C–IX–A

The NIH Director, with advice of the RAC, may revise the classification for the purposes of these *NIH Guidelines* (see Section IV–C–

1–b–(2)–(b), *Minor Actions*). The revised list of organisms in each Risk Group is located in Appendix B.

Appendix C–IX–A is proposed to be amended as follows:

Appendix C–IX–A

The NIH Director may revise the classification for the purposes of these *NIH Guidelines* (see Section IV–C–1–b–(2)–(b), *Minor Actions*). The revised list of organisms in each Risk Group is located in Appendix B.

None of the other sub-sections under Appendix C–IX. Footnotes and References of Appendix C are proposed to be amended.

Appendix D currently states in part:

Appendix D. Major Actions Taken Under the NIH Guidelines

As noted in the subsections of Section IV–C–1–b–(1), the Director, NIH, may take certain actions with regard to the *NIH Guidelines* after the issues have been considered by the RAC. Some of the actions taken to date include the following:

Appendix D is proposed to be amended as follows:

Appendix D. Major Actions Taken Under the NIH Guidelines

As noted in the subsections of Section IV–C–1–b–(1), the Director, NIH, may take certain actions with regard to the *NIH Guidelines.* (Entries up to and including D–118 were approved using a process that involved the RAC.) Some of the actions taken to date include the following:

Appendix I–II currently states:

Appendix I–II. Certification of Host-Vector Systems

Appendix I–II–A. Responsibility

Host-Vector 1 systems (other than *Escherichia coli* K–12) and Host-Vector 2 systems may not be designated as such until they have been certified by the NIH Director. Requests for certification of host-vector systems may be submitted to the Office of Science Policy, National Institutes of Health, preferably by email to: *NIHGuidelines@od.nih.gov;* additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*). Proposed host-vector systems will be reviewed by the RAC (see Section IV–C–1–b–(1)–(f), *Major Actions*). Initial review will based on the construction, properties, and testing of the proposed host-vector system by a subcommittee composed of one or more RAC members and/or *ad hoc* experts. The RAC will evaluate the subcommittee's report and any other available information at the next scheduled RAC meeting. The NIH Director is responsible for certification of host-vector systems, following advice of the RAC. Minor modifications to existing host-vector systems (*i.e.,* those that are of minimal or no consequence to the properties relevant to containment) may be certified by the NIH Director without prior RAC review (see Section IV–C–1–b–(2)–(f), *Minor Actions*). Once a host-vector system has been certified by the NIH Director, a notice of certification will be sent by NIH OSP to the applicant and to the Institutional Biosafety Committee Chairs. A list of all currently certified host-vector systems is available from the Office of Science Policy, National Institutes of Health, preferably by submitting a request for this information to: *NIHGuidelines@od.nih.gov;* additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*). The NIH Director may rescind the certification of a host-vector system (see Section IV–C–1–b–(2)–(g), *Minor Actions*). If certification is rescinded, NIH will instruct investigators to transfer cloned DNA into a different system or use the clones at a higher level of physical containment level, unless NIH determines that the already constructed clones incorporate adequate biological containment. Certification of a host-vector system does not extend to modifications of either the host or vector component of that system. Such modified systems shall be independently certified by the NIH Director. If modifications are minor, it may only be necessary for the investigator to submit data showing that the modifications have either improved or not impaired the major phenotypic traits on which the containment of the system depends. Substantial modifications to a certified host-vector system requires submission of complete testing data.

Appendix I–II–B. Data To Be Submitted for Certification

Appendix I–II–B–1. Host-Vector 1 Systems Other than *Escherichia coli* K–12

The following types of data shall be submitted, modified as appropriate for the particular system under consideration: (i) A description of the organism and vector; the strain's natural habitat and growth requirements; its physiological properties, particularly those related to its reproduction, survival, and the mechanisms by which it exchanges genetic information; the range of organisms with which this organism normally exchanges genetic information and the type of information is exchanged; and any relevant information about its pathogenicity or toxicity; (ii) a description of the history of the particular strains and vectors to be used, including data on any mutations which render this organism less able to survive or transmit genetic information; and (iii) a general description of the range of experiments contemplated with emphasis on the need for developing such an Host-Vector 1 system.

Appendix I–II–B–2. Host-Vector 2 Systems

Investigators planning to request Host-Vector 2 systems certification may obtain instructions from NIH OSP concerning data to be submitted (see Appendices I–III–N and O, *Footnotes and References of Appendix I*). In general, the following types of data are required: (i) Description of construction steps with indication of source, properties, and manner of introduction of genetic traits; (ii) quantitative data on the stability of genetic traits that contribute to the containment of the system; (iii) data on the survival of the host-vector system under non-permissive laboratory conditions designed to represent the relevant natural environment; (iv) data on transmissibility of the vector and/or a cloned DNA fragment under both permissive and non-permissive conditions; (v) data on all other properties of the system which affect containment and utility, including information on yields of phage or plasmid molecules, ease of DNA isolation, and ease of transfection or transformation; and (vi) in some cases, the investigator may be asked to submit data on survival and vector transmissibility from experiments in which the host-vector is fed to laboratory animals or one or more human subjects. Such *in vivo* data may be required to confirm the validity of predicting *in vivo* survival on the basis of *in vitro* experiments. Data shall be submitted 12 weeks prior to the RAC meeting at which such data will be considered by the Office of Science Policy, National Institutes of Health, preferably by email to: *NIHGuidelines@od.nih.gov;* additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*). Investigators are encouraged to publish their data on the construction, properties, and testing of proposed Host Vector 2 systems prior to consideration of the system by the RAC and its subcommittee. Specific instructions concerning the submission of data for proposed *Escherichia coli* K–12 Host-Vector 2 system (EK2) involving either plasmids or bacteriophage in *Escherichia coli* K–12, are available from the Office of Science Policy, National Institutes of Health, preferably by submitting a request for this information to: *NIHGuidelines@od.nih.gov;*additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*).

Appendix I–II is proposed to be amended as follows:

Appendix I–II. Certification of Host-Vector Systems

Appendix I–II–A. Responsibility

Host-Vector 1 systems (other than *Escherichia coli* K–12) and Host-Vector 2 systems may not be designated as such until they have been certified by the NIH Director. Requests for certification of host-vector systems may be submitted to the Office of Science Policy, National Institutes of Health, preferably by email to: *NIHGuidelines@od.nih.gov;* additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*). Proposed host-vector systems will be reviewed based on the construction, properties, and testing of the proposed host-vector system by *ad hoc* experts. The NIH Director is responsible for certification of host-vector systems. Once a host-vector system has been certified by the NIH Director, a notice of certification will be sent by NIH OSP to the applicant and to the Institutional Biosafety Committee Chairs. A list of all currently certified host-vector systems is available from the Office of Science Policy, National Institutes of Health, preferably by submitting a request for this information to: *NIHGuidelines@od.nih.gov;*

additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*). The NIH Director may rescind the certification of a host-vector system (see Section IV–C–1–b–(2)–(g), *Minor Actions*). If certification is rescinded, NIH will instruct investigators to transfer cloned DNA into a different system or use the clones at a higher level of physical containment level, unless NIH determines that the already constructed clones incorporate adequate biological containment. Certification of a host-vector system does not extend to modifications of either the host or vector component of that system. Such modified systems shall be independently certified by the NIH Director. If modifications are minor, it may only be necessary for the investigator to submit data showing that the modifications have either improved or not impaired the major phenotypic traits on which the containment of the system depends. Substantial modifications to a certified host-vector system requires submission of complete testing data.

Appendix I–II–B. Data To Be Submitted for Certification

Appendix I–II–B–1. Host-Vector 1 Systems Other than *Escherichia coli* K–12

The following types of data shall be submitted, modified as appropriate for the particular system under consideration: (i) A description of the organism and vector; the strain's natural habitat and growth requirements; its physiological properties, particularly those related to its reproduction, survival, and the mechanisms by which it exchanges genetic information; the range of organisms with which this organism normally exchanges genetic information and the type of information is exchanged; and any relevant information about its pathogenicity or toxicity; (ii) a description of the history of the particular strains and vectors to be used, including data on any mutations which render this organism less able to survive or transmit genetic information; and (iii) a general description of the range of experiments contemplated with emphasis on the need for developing such an Host-Vector 1 system.

Appendix I–II–B–2. Host-Vector 2 Systems

Investigators planning to request Host-Vector 2 systems certification may obtain instructions from NIH OSP concerning data to be submitted (see Appendices I–III–N and O, *Footnotes and References of Appendix I*). In general, the following types of data are required: (i) Description of construction steps with indication of source, properties, and manner of introduction of genetic traits; (ii) quantitative data on the stability of genetic traits that contribute to the containment of the system; (iii) data on the survival of the host-vector system under non-permissive laboratory conditions designed to represent the relevant natural environment; (iv) data on transmissibility of the vector and/or a cloned DNA fragment under both permissive and non-permissive conditions; (v) data on all other properties of the system which affect containment and utility, including information on yields of phage or plasmid molecules, ease of DNA isolation, and ease of transfection or transformation; and (vi) in some cases, the investigator may be asked to submit data on survival and vector transmissibility from experiments in which the host-vector is fed to laboratory animals or one or more human subjects. Such *in vivo* data may be required to confirm the validity of predicting *in vivo* survival on the basis of *in vitro* experiments. Data shall be submitted to the Office of Science Policy, National Institutes of Health, preferably by email to: *NIHGuidelines@od.nih.gov;* additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*). Investigators are encouraged to publish their data on the construction, properties, and testing of proposed Host Vector 2 systems prior to consideration of the system by NIH. Specific instructions concerning the submission of data for proposed *Escherichia coli* K–12 Host-Vector 2 system (EK2) involving either plasmids or bacteriophage in *Escherichia coli* K–12, are available from the Office of Science Policy, National Institutes of Health, preferably by submitting a request for this information to: *NIHGuidelines@od.nih.gov;* additional contact information is also available here and on the OSP website (*www.osp.od.nih.gov*).

Appendix L, GENE THERAPY POLICY CONFERENCES (GTPCS), is proposed to be deleted in its entirety.

Appendix M, Points to Consider in the Design and Submission of Protocols for the Transfer of Recombinant or Synthetic Nucleic Acid Molecules into One or More Human Research Participants (Points to Consider), is proposed to be deleted in its entirety.

Dated: August 7, 2018.

Lawrence A. Tabak,

Deputy Director, National Institutes of Health.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR–17–144: Limited Competition: National Primate Research Centers (P51).

Date: September 11–14, 2018.

Time: 8:00 a.m. to 12:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hotel Vintage Portland, 422 SW Broadway, Portland, OR 97205.

Contact Person: Brian H. Scott, Ph.D., Scientific Review Officer, National Institutes of Health, Center for Scientific Review, 6701 Rockledge Drive, Bethesda, MD 20892, 301–827–7490, *brianscott@mail.nih.gov.*

Name of Committee: Brain Disorders and Clinical Neuroscience Integrated Review Group; Pathophysiological Basis of Mental Disorders and Addictions Study Section.

Date: September 13–14, 2018.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Renaissance Orlando at SeaWorld, 6677 Sea Harbor Drive, Orlando, FL 32821.

Contact Person: Boris P. Sokolov, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5217A, MSC 7846, Bethesda, MD 20892, 301–408–9115, *bsokolov@csr.nih.gov.*

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: August 13, 2018.

Sylvia L. Neal,

Program Analyst, Office of Federal Advisory Committee Policy.

Draft Report on Carcinogens Monograph on Night Shift Work and Light at Night; Availability of Document; Request for Comments; Notice of Peer-Review Meeting

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Toxicology Program (NTP) announces a meeting to peer review the Draft Report on Carcinogens Monograph on Night Shift Work and Light at Night. NTP has conducted a literature-based assessment to determine whether night shift work (*e.g.,* working at least three hours between 12 a.m. and 6 a.m.) and light at night are cancer hazards and should

be listed the Report on Carcinogens. The peer-review meeting will be held at the National Institute of Environmental Health Sciences (NIEHS) in Research Triangle Park, NC and is open to the public. Registration is requested for attendance at the meeting either in-person or by webcast and to present oral comments. Information about the meeting and registration is available at *https://ntp.niehs.nih.gov/go/36051.*

DATES:

Meeting: Scheduled for October 5, 2018, 8:30 a.m. to adjournment at approximately 5:00 p.m. Eastern Daylight Time (EDT). The preliminary agenda is available at *https://ntp.niehs.nih.gov/go/36051* and will be updated one week before the meeting.

Document Availability: The draft RoC monograph should be available by August 24, 2018, at *https://ntp.niehs.nih.gov/go/36051.*

Written Public Comment Submissions: Deadline is September 21, 2018.

Registration for Oral Comments: Deadline is September 21, 2018.

Registration To Attend Meeting In-Person or To View Webcast: Deadline is October 5, 2018.

ADDRESSES:

Meeting Location: Rodbell Auditorium, Rall Building, NIEHS, 111 T.W. Alexander Drive, Research Triangle Park, NC 27709.

Meeting Web Page: The draft RoC monograph, preliminary agenda, registration, and other meeting materials will be available at *https://ntp.niehs.nih.gov/go/36051.*

Webcast: The URL for viewing the peer-review meeting webcast will be provided to registrants.

FOR FURTHER INFORMATION CONTACT: Kate Helmick, ICF, 2635 Meridian Parkway, Suite 200, Durham, NC, USA 27713. Phone: (919) 293–1673, Fax: (919) 293–1645, Email: *NTP-Meetings@icf.com.*

SUPPLEMENTARY INFORMATION:

Background: The invention of electric light transformed society, from one in which people's activities and sleep patterns were limited by the natural light: Dark cycle to a culture in which people now work, sleep, eat, and receive goods or services throughout the 24-hour day. Through lifestyle choices, home location, and work schedule, people are exposed to different patterns and types of light, including electric light at night (LAN), which may lead to cancer and other adverse health effects. These health effects may arise from misalignment of daily physiological and behavioral cycles (*i.e.,* circadian rhythms) with external stimuli or with each other (*i.e.,* circadian disruption). Circadian rhythms can include processes and behaviors like sleep-wake cycles, eating, and body temperature, among others.

NTP has conducted a literature-based assessment and applied the *Report on Carcinogens (RoC) listing criteria* to this assessment to determine whether night shift work (*e.g.,* working at least three hours between midnight and 6 a.m.) and light at night are cancer hazards. As circadian disruption is thought to be a key intermediate step, NTP has also reviewed the literature on this topic.

The monograph assesses the evidence from cancer studies in humans and experimental animals and mechanistic data and provides NTP's preliminary recommendation regarding whether night shift work and or light at night should be listed in the Report on Carcinogens, and if so, how the two exposure scenarios should be defined. The listing categories include *known or reasonably anticipated to be a human carcinogen.*

Meeting Attendance Registration: The meeting is open to the public with time set aside for oral public comment; in-person attendance at the NIEHS is limited by the space available (~100 attendees). Registration for in-person attendance is on a first-come, first-served basis. After the first 100 registrants, persons will be placed on a wait list and notified should an opening become available. Registration to attend the meeting in-person or view the webcast is by October 5, 2018, at *https://ntp.niehs.nih.gov/go/36051.* The URL for the webcast will be provided in the email confirming registration. Visitor and security information for those attending in person is available at *https://www.niehs.nih.gov/about/visiting/index.cfm.* Individuals with disabilities who need accommodation to view the webcast should contact Kate Helmick by phone: (919) 293–1673 or email: *NTP-Meetings@icf.com.* TTY users should contact the Federal TTY Relay Service at (800) 877–8339. Requests should be made at least five business days in advance of the event.

Public Comment Registration: NTP invites written and oral public comments on the draft RoC monograph that address scientific/technical issues. Guidelines for public comments are available at *https://ntp.niehs.nih.gov/ntp/about_ntp/guidelines_public_comments_508.pdf.*

The deadline for submission of written comments is September 21, 2018. Written public comments should be submitted through the meeting website. Persons submitting written comments should include name, affiliation, mailing address, phone, email, and sponsoring organization (if any). Written comments received in response to this notice will be posted on the NTP website and the submitter will be identified by name, affiliation, and sponsoring organization (if any). Comments that address scientific/technical issues will be forwarded to the peer-review panel and NTP staff prior to the meeting.

The agenda allows for one oral public comment period (up to 12 commenters, up to 5 min per speaker). Registration to provide oral comments is September 21, 2018, at *https://ntp.niehs.nih.gov/go/36051.* Registration is on a first-come, first-served basis. Each organization is allowed one time slot. Oral comments may be presented in person at NIEHS or by teleconference line. The access number for the teleconference line will be provided to registrants by email prior to the meeting. Commenters will be notified after September 21, 2018, the deadline to register for oral public comments, about the actual time allotted per speaker.

If possible, oral public commenters should send a copy of their slides and/or statement or talking points to Kate Helmick by email: *NTP-Meetings@icf.com* by September 21, 2018.

Meeting Materials: The draft RoC monograph and preliminary agenda will be available on the NTP website at *https://ntp.niehs.nih.gov/go/36051.* The draft RoC monograph should be available by August 24, 2018. Additional information will be posted when available or may be requested in hardcopy, contact Kate Helmick by phone: (919) 293–1673 or email: *NTP-Meetings@icf.com.* The preliminary meeting agenda will be available on the meeting web page and will be updated one week before the meeting. Individuals are encouraged to access the meeting web page to stay abreast of the most current information regarding the meeting.

Following the meeting, a report of the peer review will be prepared and made available on the NTP website.

Background Information on the RoC: Published biennially, each edition of the RoC is cumulative and consists of substances newly reviewed in addition to those listed in previous editions. For each listed substance, the RoC contains a substance profile, which provides information on cancer studies that support the listing—including those in humans and animals and studies on possible mechanisms of action, information about potential sources of exposure to humans, and current Federal regulations to limit exposures. The 14th RoC, the latest edition, was published on November 3, 2016

(available at *https://ntp.niehs.nih.gov/go/roc14*).

Background Information on NTP Peer-Review Panels: NTP panels are technical, scientific advisory bodies established on an ''as needed'' basis to provide independent scientific peer review and advise NTP on agents of public health concern, new/revised toxicological test methods, or other issues. These panels help ensure transparent, unbiased, and scientifically rigorous input to the program for its use in making credible decisions about human hazard, setting research and testing priorities, and providing information to regulatory agencies about alternative methods for toxicity screening. NTP welcomes nominations of scientific experts for upcoming panels. Scientists interested in serving on an NTP panel should provide their current curriculum vitae to Kate Helmick by email: *NTP-Meetings@icf.com.* The authority for NTP panels is provided by 42 U.S.C. 217a; section 222 of the Public Health Service Act, as amended. The panel is governed by the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees.

Dated: August 8, 2018.

Brian R. Berridge,

Associate Director, National Toxicology Program.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2018–0565]

Lifejacket Approval Harmonization

AGENCY: Coast Guard, DHS.

ACTION: Notice and request for comments.

SUMMARY: The Coast Guard announces that it is harmonizing personal flotation device (PFD) standards between the United States and Canada by accepting a new standard for approval of PFDs. Specific elements of the new standard are contained in a policy letter and deregulatory savings analysis, on which we are requesting public comment, and are intended to promote the Coast Guard's maritime safety and stewardship missions.

DATES: Comments must be submitted to the online docket via *http://www.regulations.gov,* or reach the Docket Management Facility, on or before October 16, 2018.

ADDRESSES: You may submit comments identified by docket number USCG–2018–0565 using the Federal eRulemaking Portal at *http://www.regulations.gov*. See the ''Public Participation and Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: For information about this document call or email Jacqueline Yurkovich, Coast Guard; telephone 202–372–1389, email *Jacqueline.M.Yurkovich@uscg.mil*.

SUPPLEMENTARY INFORMATION:

Public Participation and Comments

We encourage you to submit comments on the lifejacket approval harmonization policy letter entitled, ADOPTION OF ANSI/CAN/UL 12402–5 AND –9, and the deregulatory savings analysis entitled, ''Approval for Personal Floatation Devices/Adoption of ANSI/CAN/UL 12402–5 and 9,'' which are available in the docket. The policy letter is also available on the USCG website, *https://www.dco.uscg.mil/CG-ENG,* listed as CG–ENG Policy 02–18. We will consider all submissions and may adjust our final action based on your comments. If you submit a comment, please include the docket number for this notice, indicate the specific section of the document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *http://www.regulations.gov*. If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *http://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments or other documents are posted.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Discussion

The United States Coast Guard (USCG) has statutory authority under Title 46, U.S. Code, Sections 3306(a) and (b), 4102(a) and (b), 4302(a), and 4502(a) and (c)(2)(B) to prescribe regulations for the design, construction, performance, testing, carriage, use, and inspection of lifesaving equipment on commercial and recreational vessels. Since 2008, the USCG has been working closely with Transport Canada (TC) and a diverse group of U.S. and Canadian stakeholders to harmonize PFD standards with the current international standard (ISO 12402) to create a single North American standard for PFD approval. A single North American standard will allow manufacturers the opportunity to produce more innovative equipment that meets the approval requirements of both the United States and Canada.

In 2015, Underwriters Laboratories Inc. published bi-national standards [1] to set forth performance requirements and manufacturing standards for PFDs that are being used when vessels are close to shore, or where a rescue may be imminent. UL 12402–5 sets forth the performance requirements for PFDs and, within UL 12402–5, there are two levels of performance: Level 50 and Level 70. A Level 70 PFD provides an equivalent level of safety to a Type III PFD currently approved under 46 CFR 160.064, 160.076, or 160.077–15, and certified to UL 1123 (Marine Buoyant Devices). A Level 50 PFD provides a reduced level of performance, and is not included in this policy. UL 12402–9 sets forth the test methods for determining compliance with UL 12402–5.

In April 2017, the USCG and TC signed a Memorandum of Understanding (MOU) outlining intended cooperation for approval of personal lifesaving appliances that comply with mutually acceptable standards, are tested by mutually accepted conformity assessment bodies or independent test laboratories, and are covered by a mutually acceptable follow-up program. In January 2018, TC published a policy stating it will accept UL 12402–5 as a substitute for its PFD standards in support of the MOU. The policy letter on which we are requesting comment builds on the efforts described above by establishing that the USCG will accept Level 70 PFDs complying

[1] ANSI/CAN/UL 12402–5, Standard for Personal Flotation Devices—Part 5: Buoyancy Aids (Level 50)—Safety Requirements (UL 12402–5), and ANSI/CAN/UL 12402–9, Standard for Personal Flotation Devices—Part 9: Test Methods (UL12402–9).

with UL 12402–5 as equivalent to PFDs meeting the requirements in 46 CFR 160.064 and 160.076, with certain exceptions.

The adoption of this policy marks the culmination of over a decade of dedicated work across the lifejacket and recreational boating safety community and supports National Boating Safety Advisory Council Resolution 2009–83–01, which is available in the docket.[2] This policy also responds to a comment submitted by the Lifejacket Association in response to the Coast Guard's request for public input on ''Evaluation of Existing Coast Guard Regulations, Guidance Documents, Interpretive Documents, and Collections of Information,'' [3] recommending the Coast Guard consider full adoption of UL 12402–5 and UL 12402–9. In order to provide the maximum benefit to the public with minimum delay, the Coast Guard evaluated which elements of the new standards could be implemented without a change to the regulations. Those elements are being adopted by this policy. The remaining elements of the standards that cannot be adopted without a change to the regulations are being considered for possible future regulatory action.

This policy letter allows manufacturers to have their products certified to the new bi-national standard, in lieu of the legacy standards codified in title 46 CFR. This allowance is intended to reduce the burden of maintaining approvals in U.S. and Canadian markets and to make additional types of PFDs available to U.S. and Canadian boaters.

This policy does not impact existing PFD approvals, and does not require any action on the part of boaters or mariners who have approved PFDs onboard. An existing approved PFD will continue to meet the same carriage requirements, as long as it remains in good and serviceable condition.

The Coast Guard has prepared a Deregulatory Savings Analysis for the policy letter that identifies and examines the potential costs and savings associated with implementing the new standards plan and is available in the docket. We request your comments on any concerns that you may have related to the policy changes.

This notice is issued under authority of 5 U.S.C. 552(a).

[2] The Resolution requested the U.S. Coast Guard work cooperatively with stakeholders to devise and implement within 3 years an improved regulatory approach to the testing and approval of personal flotation devices, including life jackets.

[3] 82 FR 26632 (June 8, 2017).

Dated: August 9, 2018.

J.G. Lantz,

Director of Commercial Regulations and Standards, U.S. Coast Guard.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

[Docket ID FEMA–2014–0022]

Technical Mapping Advisory Council

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Committee Management; Notice of Federal Advisory Committee Meeting.

SUMMARY: The Federal Emergency Management Agency (FEMA) Technical Mapping Advisory Council (TMAC) will meet in person on Tuesday, September 25, 2018, and Wednesday, September 26, 2018, in Reston, Virginia. The meeting will be open to the public.

DATES: The TMAC will meet on Tuesday, September 25, 2018, from 8:00 a.m.–5:30 p.m. Eastern Daylight Time (EDT), and Wednesday, September 26, 2018, from 8:00 a.m.–5:30 p.m. EDT. Please note that the meeting will close early if the TMAC has completed its business.

ADDRESSES: The meeting will be held at the United States Geological Survey (USGS) Headquarters at 12201 Sunrise Valley Drive, Reston, VA 20192. Members of the public who wish to attend the meeting must register in advance by sending an email to *FEMA-TMAC@fema.dhs.gov* (Attention: Michael Nakagaki) by 11:00 p.m. EDT on Wednesday, September 19, 2018. Members of the public must follow signs for the Visitor's Entrance on the U.S. Geological Survey Drive entrance of the USGS; once you pull into the Visitor's Entrance, facility security will direct you to parking and where to check in at the front desk of the visitor's entrance at the USGS. Photo identification is required.

For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, contact the person listed below in the **FOR FURTHER INFORMATION CONTACT** as soon as possible.

To facilitate public participation, members of the public are invited to provide written comments on the issues to be considered by the TMAC, as listed in the **SUPPLEMENTARY INFORMATION** section below. Associated meeting materials will be available at *www.fema.gov/TMAC* for review by Wednesday, September 19, 2018. Written comments to be considered by the committee at the time of the meeting must be submitted and received by Friday, September 21, 2018, identified by Docket ID FEMA–2014–0022, and submitted by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email:* Address the email TO: *FEMA-RULES@fema.dhs.gov* and CC: *FEMA-TMAC@fema.dhs.gov.* Include Docket ID FEMA–2014–0022 in the subject line of the message. Include name and contact information in the body of the email.
- *Mail:* Regulatory Affairs Division, Office of Chief Counsel, FEMA, 500 C Street SW, Room 8NE, Washington, DC 20472–3100.

Instructions: All submissions received must include the words ''Federal Emergency Management Agency'' and the docket number for this action. Comments received will be posted without alteration at *http://www.regulations.gov,* including any personal information provided.

Docket: For docket access to read background documents or comments received by the TMAC, go to *http://www.regulations.gov* and search for the Docket ID FEMA–2014–0022.

A public comment period will be held on Tuesday, September 25, 2018, from 4:00 p.m. to 4:30 p.m. EDT and again on Wednesday, September 26, 2018, from 11:30 a.m. to 12:00 p.m. EDT. Speakers are requested to limit their comments to no more than three minutes. The public comment period will not exceed 30 minutes. Please note that the public comment period may end before the time indicated, following the last call for comments. Contact the individual listed below to register as a speaker by close of business on Friday, September 21, 2018.

FOR FURTHER INFORMATION CONTACT: Michael Nakagaki, Designated Federal Officer for the TMAC, FEMA, 400 C Street SW, Washington, DC 20024, telephone (202) 212–2148, and email *michael.nakagaki@fema.dhs.gov.* The TMAC website is: *http://www.fema.gov/TMAC.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the *Federal Advisory Committee Act,* 5 U.S.C. Appendix.

In accordance with the *Biggert-Waters Flood Insurance Reform Act of 2012,* the TMAC makes recommendations to the FEMA Administrator on: (1) How to improve, in a cost-effective manner, the (a) accuracy, general quality, ease of use, and distribution and dissemination of

flood insurance rate maps and risk data; and (b) performance metrics and milestones required to effectively and efficiently map flood risk areas in the United States; (2) mapping standards and guidelines for (a) flood insurance rate maps, and (b) data accuracy, data quality, data currency, and data eligibility; (3) how to maintain, on an ongoing basis, flood insurance rate maps and flood risk identification; (4) procedures for delegating mapping activities to State and local mapping partners; and (5)(a) methods for improving interagency and intergovernmental coordination on flood mapping and flood risk determination, and (b) a funding strategy to leverage and coordinate budgets and expenditures across Federal agencies. Furthermore, the TMAC is required to submit an annual report to the FEMA Administrator that contains: (1) A description of the activities of the Council; (2) an evaluation of the status and performance of flood insurance rate maps and mapping activities to revise and update Flood Insurance Rate Maps; and (3) a summary of recommendations made by the Council to the FEMA Administrator.

Agenda: During the two-day meeting, TMAC members will discuss and conduct a review of the final draft TMAC 2018 Annual Report. The TMAC will also receive public input on the report recommendations and content; the recommendations and summary of content will be posted to the FEMA TMAC website at *http://www.fema.gov/TMAC* prior to the meeting to provide the public an opportunity to review the materials. A public comment period will be held on Tuesday, September 25, 2018, from 4:00 p.m. to 4:30 p.m. EDT and again on Wednesday, September 26, 2018, from 11:30 a.m. to 12:00 p.m. EDT and will occur prior to any vote. The full agenda and related meeting materials will be posted by Friday, September 21, 2018, at *http://www.fema.gov/TMAC.*

David I. Maurstad,

Deputy Associate Administrator for Insurance and Mitigation, Federal Emergency Management Agency.

BILLING CODE 9110–12–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7005–N–15]

60-Day Notice of Proposed Information Collection: Home Equity Conversion Mortgage (HECM) Counseling Standardization and Roster

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* October 16, 2018.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: John Olmstead, Housing Program Specialist, Office of Housing Counseling, Office of Policy and Grant Administration, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email *john.olmstead@hud.gov* or telephone (802) 951–6290. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Application for Home Equity Conversion Mortgage (HECM) Counselor Roster and Certificate of HECM Counseling.

OMB Approval Number: 2502–0586.

Type of Request: Reinstatement, with change, of previously approved collection for which approval will expire. (OMB Expiration Date: August 31, 2018).

Form Numbers: HUD–92902 and HUD–92904.

Description of the need for the information and proposed use: The HECM Counselor examination and Roster application assists HUD in evaluating the knowledge and capacity of individuals interested in providing HECM counseling to potential HECM borrowers thereby reducing the risk to the insurance fund. The collection of information assists HUD in providing and maintaining a current roster of HUD-approved HECM counselors to the general public and interested customers. The transfer of the Certificate of HECM Counseling, form HUD 92900, from OMB Collection 2502–0524 to this collection is needed since the Office of Housing Counseling is responsible for all services offered by HUD-approved housing counselors which includes HECM Roster Counselors. OMB Collection 2502–0524 was recently approved by OMB and has an expiration date of March 31, 2021.

Respondents (*i.e.* affected public): State, Local or Tribal Government.

Estimated Number of Respondents: 1,055.

Estimated Number of Responses: 80,058.50.

Frequency of Response: HUD–92902—Certificate of HECM Counseling: Once HUD 92904—HECM Counseling Roster: 94.11.

Average Hours per Response: 2 hours.

Total Estimated Burden: 120,841.25.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the

collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: July 31, 2018.

Vance T. Morris,

Special Assistant to Assistant Secretary for Housing, Federal Housing Commissioner.

[FR Doc. 2018–17790 Filed 8–16–18; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7001–N–42]

30-Day Notice of Proposed Information Collection: Indian Community Development Block Grant

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for 30 days of public comment.

DATES: *Comments Due Date:* September 17, 2018.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806, Email: *OIRA Submission@omb.eop.gov*.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email *Colette.Pollard@hud.gov,* or telephone 202–402–3400. This is not a toll-free number. Person with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on April 27, 2018 at 83 FR 18585.

A. Overview of Information Collection

Title of Information Collection: Indian Community Development Block Grant.

OMB Approved Number: 2577–0191.

Type of Request: Extension of currently approved collection.

Form Number: HUD–4123, HUD–4125.

Description of the need for the information and proposed use: Title I of the Housing and Community Development Act of 1974 authorizes Indian Community Development Block Grants (ICDBG) and requires that grants be awarded annually on a competitive basis. The purpose of the ICDBG program is to develop viable Indian and Alaska Native communities by creating decent housing, suitable living environments, and economic opportunities primarily for low- and moderate-income persons. Consistent with this objective, not less than 70 percent of the expenditures are to benefit low and moderate-income persons. Eligible applicants include Federally-recognized tribes, which includes Alaska Native communities, and tribally authorized tribal organizations. Eligible categories of funding include housing rehabilitation, land acquisition to support new housing, homeownership assistance, public facilities and improvements, economic development, and microenterprise programs. For a complete description of eligible activities, please refer to 24 CFR part 1003, subpart C.

The ICDBG program regulations are at 24 CFR part 1003. The ICDBG program requires eligible applicants to submit information to enable HUD to select the best projects for funding during annual competitions. Additionally, the information submitted is essential for HUD in monitoring grants to ensure that grantees are complying with applicable statutes and regulations and implementing activities as approved.

ICDBG applicants must submit a complete application package which includes an Application for Federal Assistance (SF–424), Applicant/Recipient Disclosure/Update Report (HUD–2880), Cost Summary (HUD–4123), and Implementation Schedule (HUD–4125). If the applicant has a waiver of the electronic submission requirement and is submitting a paper application, an Acknowledgement of Application Receipt (HUD–2993) must also be submitted. If the applicant is a tribal organization, a resolution from the tribe stating that the tribal organization is submitting an application on behalf of the tribe must also be included in the application package.

ICDBG recipients are required to submit a quarterly Federal Financial Report (SF–425) that describes the use of grant funds drawn from the recipient's line of credit. The reports are used to monitor cash transfers to the recipients and obtain expenditure data from the recipients. (2 CFR 200.327)

The regulations at 24 CFR part 200 require that grantees and sub-grantees take all necessary affirmative steps to assure that minority firms, women's business enterprises, and labor surplus area firms are used when possible. Consistent with these regulations, 24 CFR 1003.506(b) requires that ICDBG grantees report on these activities on an annual basis, with Contract and Subcontract Activity Report being due to HUD on October 10 of each year (HUD–2516).

The regulations at 24 CFR 1003.506 instruct recipients to submit to HUD an Annual Status and Evaluation Report (ASER) that describes the progress made in completing approved activities with a listing of work to be completed; a breakdown of funds expended; and when the project is completed, a program evaluation expressing the effectiveness of the project in meeting community development needs. The ASER is due by November 15 each year and at grant closeout.

The information collected will allow HUD to accurately audit the program.

Respondents: Federally recognized Native American Tribes, Alaska Native communities and corporations, and tribal organizations.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Grant Application (Includes SF–424, HUD–2880, HUD–2993, HUD–4123, HUD–4125)	240.00	1.00	240.00	30.00	7,200.00	$19.23	$138,456.00
Federal Financial Report (SF–425)	100.00	4.00	400.00	0.50	200.00	19.23	3,846.00
Contract and Subcontract Activity Report (HUD–2516)	100.00	1.00	100.00	1.00	100.00	19.23	1,923.00
Annual Status and Evaluation Report (ASER)	100.00	1.00	100.00	4.00	400.00	19.23	7,692.00
Total			840.00		7,900.00		151,917.00

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond: Including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: August 3, 2018.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7001–N–41]

30-Day Notice of Proposed Information Collection: Single Family Mortgage Insurance on Hawaiian Homelands

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for 30 days of public comment.

DATES: *Comments Due Date:* September 17, 2018.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806, Email: *OIRA Submission@omb.eop.gov*

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QMAC, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email *Colette.Pollard@hud.gov,* or telephone 202–402–3400. This is not a toll-free number. Person with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on February 28, 2018 at 83 FR 8694.

A. Overview of Information Collection

Title of Information Collection: Single Family Mortgage Insurance for Hawaiian Homelands.

OMB Approved Number: 2502–0358.

Type of Request: Extension of currently approved collection.

Form Number: None.

Description of the need for the information and proposed use: FHA insures mortgages on single-family dwellings under provisions of the National Housing Act (12 U.S.C. 1709). The Housing and Urban Rural Recovery Act (HURRA), Public Law 98–181, amended the National Housing Act to add Section 247 (12 U.S.C. 1715z–12) to permit FHA to insure mortgages for properties located on Hawaiian Homelands. Under this program, the mortgagor must be a native Hawaiian. In accordance with 24 CFR 203.43i, the collection of information is verification that a loan applicant is a native Hawaiian and that the applicant holds a lease on land in a Hawaiian Homelands area. A borrower must obtain verification of eligibility from Department of Hawaiian Homelands (DHHL) and submit it to the lender. A borrower cannot obtain a loan under these provisions without proof of status as a native Hawaiian. United States citizens living in Hawaii are not eligible for this leasehold program unless they are native Hawaiians. The eligibility document is required to obtain benefits.

In accordance with 24 CFR 203.439(c), lenders must report monthly to HUD and the DHHL on delinquent borrowers and provide documentation to HUD to support that the loss mitigation requirements of 24 CFR 203.602 have been met. To assist the DHHL in identifying delinquent loans, lenders report monthly. A delinquent mortgage that is reported timely would allow DHHL to intervene and prevent foreclosure.

	Number of respond-ents	Frequency of response	Responses per year	Average burden hours per response	Annual burden hours	Hourly cost per response	Total annual cost
Certification that borrower is a native Hawaiian [1]	200.00	1.00	200.00	.08 (5 minutes per loan)	16.00	[3] $23.06	$368.96

	Number of respondents	Frequency of response	Responses per year	Average burden hours per response	Annual burden hours	Hourly cost per response	Total annual cost
Copy of lease on land in Hawaiian Homelands area [1]	200.00	1.00	200.00	.08 (5 minutes per loan)	16.00	23.06	368.96
Notice of Delinquency [2]	46.00	1.00	46.00	.42 (25 minutes per loan)	19.32	23.06	445.51
Totals	446.00	.....	446.00	.....	51.32	.....	1183.43

Notes:
1. Respondents are lenders (The total number of approved lenders equal 15,871).
2. Lenders reporting delinquent loans to DHHL monthly.
3. The $23.06/hour cost is based on a lender's clerical staff average annual salary of $47,960.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond: Including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: August 3, 2018.

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for Neosho Mucket

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and request for public comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of the draft recovery plan for the endangered Neosho mucket. The draft recovery plan includes specific recovery objectives and criteria that must be met in order for us to delist this species under the Endangered Species Act. We request review and comment on this draft recovery plan from local, State, and Federal agencies; Tribes; and the public.

DATES: In order to be considered, comments on the draft recovery plan must be received on or before October 16, 2018.

ADDRESSES:

Obtaining Documents: If you wish to review this draft recovery plan or a list of the references cited in this notice, you may obtain copies by contacting Melvin Tobin, U.S. Fish and Wildlife Service, Arkansas Ecological Services Field Office, 110 S. Amity Road, Suite 300, Conway, AR 72032; tel. (501) 513–4473; or by visiting the Service's Arkansas Field Office website at *http://www.fws.gov/arkansas-es.*

Submitting Comments: If you wish to comment on the draft recovery plan, you may submit your written comments by one of the following methods:

U.S. Mail or Hand-Delivery: Arkansas Ecological Services Field Office (address above).

Fax: 501–513–4480, attn. ''Neosho Mucket Draft Recovery Plan Comment.''

Email: chris_davidson@fws.gov. Please include ''Neosho Mucket Draft Recovery Plan Comment'' in the subject line.

For additional information about submitting comments, see *Request for Public Comments*, below.

FOR FURTHER INFORMATION CONTACT: Melvin Tobin, by telephone at 501–513–4473, or via email at *melvin_tobin@fws.gov.*

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of the draft recovery plan for the endangered Neosho mucket (*Lampsilis rafinesqueana*). The draft recovery plan includes specific recovery objectives and criteria that must be met in order for us to delist this species under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). We request review and comment on this draft recovery plan from local, State, and Federal agencies; Tribes; and the public.

Background

The Neosho mucket is a freshwater mussel. The shell is up to 5 inches (18 cm) long. The species is sexually dimorphic, as is typical of *Lampsilis.* The mantle lure is well developed in young females 2–5 years of age, but may be less developed in older individuals (Oesch 1984; McMurray *et al.* 2012).

Neosho mucket glochidia (larvae) are obligate parasites on smallmouth bass (*Micropterus dolomieu*), largemouth bass (*Micropterus salmoides*), and spotted bass (*Micropterus punctulatus*) (Barnhart and Roberts 1997; Service 2005). The Neosho mucket spawns in late April and May, and female brooding occurs May through August. Little is known about habitat requirements of Neosho mucket. It is associated with shallow riffles and runs comprising gravel substrate and moderate-to-swift currents. The species is most often found in areas with swift current, but in Shoal Creek and the Illinois River it prefers nearshore areas or areas out of the main current (Oesch 1984; Obermeyer 2000). The Neosho mucket does not occur in reservoirs lacking riverine characteristics (Obermeyer *et al.* 1997b).

The ESA specifies five factors for listing species as endangered or threatened. The Neosho mucket is threatened primarily by the destruction, modification, or curtailment of its habitat or range (Listing Factor A of the ESA). Specific threats include impoundment, sedimentation, chemical contaminants, mining, the inadequacy of existing regulatory mechanisms, population fragmentation and isolation, invasive nonindigenous species, and water temperature. Climate change (Listing Factor E) is also likely to have adverse effects on the species due to alteration of hydrologic cycles of rivers that support Neosho mucket, but the extent or magnitude of this threat has not been quantified at this time. We determined that other existing

regulatory mechanisms were inadequate to reduce these threats (Listing Factor D).

As a result of these threats, the Neosho mucket was listed as endangered on the Federal List of Endangered and Threatened Wildlife in title 50 of the Code of Federal Regulations (50 CFR 17.11) on September 17, 2013 (78 FR 57076). A total of 483 river miles (777 river kilometers) in seven rivers and one creek (Elk, Fall, Illinois, Neosho, Spring, North Fork Spring, and Verdigris Rivers and Shoal Creek) has been designated as critical habitat for the Neosho mucket (80 FR 24692, April 30, 2015). Critical habitat as set forth in 50 CFR 17.95(f) is located in Benton and Washington Counties, Arkansas; Allen, Cherokee, Coffey, Elk, Greenwood, Labette, Montgomery, Neosho, Wilson, and Woodson Counties, Kansas; Jasper, Lawrence, McDonald, and Newton Counties, Missouri; and Adair, Cherokee, and Delaware Counties, Oklahoma.

Recovery Plan

Section 4(f) of the ESA requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species. Recovery plans describe actions considered necessary for conservation of the species, establish recovery criteria, and estimate time and cost for implementing recovery measures. Section 4(f) of the ESA also requires us to provide public notice and an opportunity for public review and comment during recovery plan development. We will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. We and other Federal agencies will take these comments into account in the course of implementing approved recovery plans.

The goal of this recovery plan is to ensure the long-term viability of the Neosho mucket in the wild to the point that it can be removed (''delisted'') from the Federal List of Endangered and Threatened Wildlife. To achieve this goal, it will be necessary to establish naturally self-sustaining populations with healthy long-term demographic traits and trends. We are defining the following reasonable delisting criteria based on the best available information on this species. These criteria will be reevaluated as new information becomes available:

Recovery Criteria

The Neosho mucket will be considered for delisting when:

(1) Two of four targeted river basins (Illinois, Verdigris, Neosho, and Spring River basins) contain viable populations with positive or stable basin-wide population trend, as evidenced by a population number measured with sufficient precision to detect change of ±25 percent (Factors A, D, and E);

(2) Spatial distribution of natural or stocked aggregations distributed throughout the basin is sufficient to protect against local catastrophic or stochastic events (Factors A and E);

(3) All life stages are supported by sufficient habitat quantity and quality (see Primary Constituent Elements in the *Species Biological Report for Neosho Mucket*) and appropriate presence and abundance of fish hosts necessary for recruitment (Factors A, D, and E); and

(4) Threats and causes of decline have been reduced or eliminated (Factors A, D, and E).

A viable population is defined as a wild, naturally reproducing population that is able to persist and maintain sufficient genetic variation to evolve and respond to natural changes and stochastic events without further human intervention. Viable populations are expected to be large and genetically diverse, include at least five age classes with at least one cohort ≤7 years of age, and recruit at sufficient rates to maintain or increase population size.

Request for Public Comments

We request written comments on the draft recovery plan. We will consider all comments we receive by the date specified in **DATES** prior to final approval of the plan.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533 (f).

Dated: August 10, 2018.

Indian Gaming; Approval of Tribal-State Class III Gaming Compact Amendments in the State of Oklahoma

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The State of Oklahoma entered into compact amendments with the Absentee Shawnee Tribe, Cherokee Nation, Chickasaw Nation, Citizen Potawatomi Nation, Eastern Shawnee Tribe of Oklahoma, Iowa Tribe of Oklahoma, Kaw Nation, Muscogee (Creek) Nation, Seneca-Cayuga Nation, Wichita and Affiliated Tribes, and Wyandotte Nation of Oklahoma governing certain forms of class III gaming; this notice announces the approval of the State of Oklahoma Gaming Compact Non-house-Banked Table Games Supplement between the State of Oklahoma and the Absentee Shawnee Tribe, Cherokee Nation, Citizen Potawatomi Nation, Eastern Shawnee Tribe of Oklahoma, Iowa Tribe of Oklahoma, Kaw Nation, Muscogee (Creek) Nation, Seneca-Cayuga Nation, Wichita and Affiliated Tribes, and Wyandotte Nation.

DATES: The compact amendments take effect on August 17, 2018.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Deputy Assistant Secretary—Policy and Economic Development, Washington, DC 20240, (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA) Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by IGRA and 25 CFR 293.4, all compacts and amendments are subject to review and approval by the Secretary. The compact amendments authorize the Tribes to engage in certain additional class III gaming activities, provide for the application of existing revenue sharing agreements to the additional forms of class III gaming, and designate how the State will distribute revenue sharing funds.

Dated: August 9, 2018.

Tara Sweeney,

Assistant Secretary—Indian Affairs.

Indian Gaming; Approval of Tribal-State Class III Gaming Compact Amendments in the State of Oklahoma

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The State of Oklahoma entered into compact amendments with the Choctaw Nation of Oklahoma and with the Fort Sill Apache Tribe of Oklahoma governing certain forms of class III gaming; this notice announces the approval of the State of Oklahoma Gaming Compact Non-house-Banked Table Games Supplement between the State of Oklahoma and the Choctaw Nation of Oklahoma and the Fort Sill Apache Tribe of Oklahoma.

DATES: The compact amendments take effect on August 17, 2018.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Deputy Assistant Secretary—Policy and Economic Development, Washington, DC 20240, (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA) Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by IGRA and 25 CFR 293.4, all compacts and amendments are subject to review and approval by the Secretary. The compact amendments authorize the Tribes to engage in certain additional class III gaming activities, provide for the application of existing revenue sharing agreements to the additional forms of class III gaming, and designate how the State will distribute revenue sharing funds.

Rate Adjustments for Indian Irrigation Projects

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Indian Affairs (BIA) owns or has an interest in irrigation projects located on or associated with various Indian reservations throughout the United States. We are required to establish irrigation assessment rates to recover the costs to administer, operate, maintain, and rehabilitate these projects. We are notifying you that we have adjusted the irrigation assessment rates at several of our irrigation projects and facilities to reflect current costs of administration, operation, maintenance, and rehabilitation.

DATES: The irrigation assessment rates are current as of January 1, 2018.

FOR FURTHER INFORMATION CONTACT: For details about a particular BIA irrigation project or facility, please use the tables in the **SUPPLEMENTARY INFORMATION** section to identify contacts at the regional or local office at which the project or facility is located.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rate Adjustment was published in the **Federal Register** on January 18, 2018 (83 FR 2662) to propose adjustments to the irrigation assessment rates at several BIA irrigation projects. The public and interested parties were provided an opportunity to submit written comments during the 60-day period that ended March 19, 2018.

Did BIA defer or change any proposed rate increases?

Yes. The 2019 Operation and Maintenance (O&M) rate for the Wind River Irrigation Project, Units 2, 3, and 4, was proposed in the **Federal Register** at $25.00 per acre. After further review, BIA decided to change the rate to $24.50. Instead of raising the rate by $1.00, the rate will only increase by $.50. Because the rate increased by $1.50 over the two previous years, BIA decided the full $1.00 increase for the 2019 O&M rate is not appropriate. Hence, this notice of rate adjustments reflects a 2019 O&M rate of $24.50 per acre for Units 2, 3, and 4.

Did BIA receive any comments on the proposed irrigation assessment rate adjustments?

Yes. BIA received twelve (12) written comments related to the proposed irrigation rate adjustment for the Flathead Indian Irrigation Project and Wind River Irrigation Project.

What issues were of concern to the commenters?

Commenters raised concerns on the proposed rates about the following issues:

The Following Comments are Specific to the Flathead Indian Irrigation Project (FIIP)

Written comments relating to the proposed rate adjustment were received by letter. BIA's summary of the issues and BIA's responses are provided below.

Comment: Several commenters state a general opposition to the 2019 rate increase, along with a number of specific concerns. These include: A concern that BIA is pursuing a rate increase prior to the FIIP manager's annual meeting with the individual irrigation districts, and concerns with how FIIP management chooses to expend funds obtained through irrigation rate assessments.

Response: As noted when rates were proposed in the **Federal Register** on January 18, 2018 (83 FR 2662), BIA is required to establish irrigation assessment rates that recover the costs to administer, operate, maintain, and rehabilitate our projects. As owner of FIIP, it is BIA's responsibility to ensure adequate resources are made available to meet the requirements noted above. BIA's authority to assess rates dates back to the Act of May 29, 1908, codified at 25 U.S.C. 381 *et seq.,* and is addressed in BIA's regulations at 25 CFR part 171. Additionally, the repayment contracts between the irrigation districts and the Department of the Interior explicitly state that operation and maintenance expenses ''shall be paid . . . as provided . . . by rules made or to be made . . . by the Secretary of the Interior.'' The procedures followed by BIA in adjusting its irrigation assessment rates are consistent with applicable law and past practice.

Regarding the timing of this **Federal Register** notice, BIA makes every effort to publish notice of irrigation O&M rate adjustments prior to the issuance of irrigation bills for the upcoming season, and that process requires BIA to solicit comments on proposed rate adjustments on a timeline that will allow it to

publish by then. The BIA-wide effort seeking comments on proposed irrigation rate adjustments is separate from the Project-specific meetings that are conducted by individual Project Managers consistent with each Project's Operations and Management Guidelines.

Regarding concerns with how FIIP management expends funds, each Project Manager has discretion to assess priorities and address those priorities, subject to available funding. As discussed in more detail below, BIA chose not to implement the full, recommended $7.50 increase in 2017, choosing instead to impose a $3.00 increase. As a result, the FIIP Project Manager had less funding available to address key priorities. It is anticipated that the proposed $4.50 increase will provide the FIIP Project Manager with opportunities to address additional priorities.

Comment: One commenter states an opposition to the $4.50 per acre 2019 O&M rate increase, alleging that BIA has not met BIA operating standards by not meeting monthly with the three irrigation districts and not meeting with the three districts to discuss O&M costs, water storage, and other issues.

Response: The status of the FIIP budget and the need to increase rates were communicated to the Flathead Joint Board of Control (FJBC) and irrigation districts as early as 2014 and have been discussed with the irrigation districts, FJBC, and CSKT numerous times since then. BIA publicly noticed its intent to increase assessment rates in both 2015 and 2016 (see Proposed Rate Adjustments published in the **Federal Register** on June 11, 2015 (80 FR 33279, 33283) and August 5, 2016 (81 FR 51927, 51931)). In January 2017, the FIIP Project Manager met with the FJBC to discuss the proposed 2018 increase, which at the time was proposed to be $7.50. As discussed below, for a number of reasons, BIA chose to implement only a $3.00 increase in 2018, but made it clear that the full $7.50 was warranted and that the remaining $4.50 increase would be included in the 2019 rates. This information was provided at an April 11, 2017 water user meeting and reiterated in meetings with the FJBC on May 9, 2017, June 13, 2017, and July 11, 2017.

The BIA's Operations and Management Guidelines require only an annual meeting with the FJBC. This meeting took place on April 11, 2017. These Guidelines also allow FIIP management to meet with individual irrigation districts on an ad hoc basis; to that end, the FIIP Project Manager met with the chairmen of the three individual irrigation districts on June 15, 2017 to discuss the $4.50 rate increase. The FIIP Project Manager also met with the FJBC on September 12, 2017 and October 10, 2017, but the FJBC did not discuss the rate increase at those meetings.

Comment: One commenter protests the $4.50 per acre increase, stating that farmers will be faced with a 29% increase in irrigation costs in two years. The commenter further contends that BIA has not provided a justification or proposal for utilizing the increase.

Response: The costs associated with operating and maintaining the FIIP consistently exceed the amount paid to the FIIP through O&M assessments. Even during the timeframe when the Cooperative Management Entity operated the FIIP, the O&M assessment rate was increased twice, in 2010 and 2011. Since re-assumption, BIA has made clear the need to increase FIIP assessments rates to address O&M needs, and has publicly noticed the need to raise rates in both 2015 and 2016. The only reason rate increases were not implemented then was as a result of the timeframe necessary to communicate an increase to the counties that collect the O&M assessments. Rate increases have been needed for some time, and FIIP's ability to address its operation and maintenance needs have been severely compromised by not increasing rates since 2011.

In 2017, BIA proposed to increase the 2018 rate by $7.50 and explained in the **Federal Register** notice on April 21, 2017 (82 FR 18770) that the entire $7.50 increase was justified due to the increased costs associated with administering, operating, maintaining, and rehabilitating the FIIP. Because of the timing of the 2017 **Federal Register** proposed rate notice, BIA agreed to impose only a $3.00 increase in 2018 and memorialized that increase in the final rate notice published on August 11, 2017 (82 FR 37604, 37605). At the time, however, BIA made clear that the additional $4.50 would be included in its 2019 rates.

The Following Comments Are Specific to the Wind River Irrigation Project (WRIP)

Written comments relating to the proposed rate adjustment were received by letter. The BIA's summary of the issues and BIA's responses are provided below.

Comment: One commenter objects to increased O&M fees that may idle tribal and allotted lands and decrease the financial viability of agricultural operations.

Response: BIA's projects are important economic contributors to the local communities they serve, and they contribute millions of dollars in crop value annually. Unfortunately, the costs associated with operating and maintaining an irrigation project may increase independently of prices and costs that are realized by the irrigators. Historically, BIA tempered irrigation rates to demonstrate sensitivity to the economic impact on water users, but that past practice resulted in a rate deficiency at some irrigation projects. Therefore, funding to operate and maintain these projects needs to come from the water users served by those projects.

BIA's irrigation program has been the subject of serval Office of Inspector General (OIG) and U.S. Government Accountability Office (GAO) audits. In the most recent OIG audit, No. 96–I–641, March 1996, the OIG concluded:

Operation and maintenance revenues were insufficient to maintain the projects, and some projects had deteriorated to the extent that their continued capability to deliver water was in doubt. This occurred because operation and maintenance rates were not based on the full cost of delivering irrigation water, including the costs of systematically rehabilitating and replacing project facilities and equipment, and because project personnel did not seek regular rate increases to cover the full cost of project operation.

A previous OIG audit performed on one of BIA's largest irrigation projects, the Wapato Irrigation Project, No. 95–I–1402, September 1995, reached the same conclusion.

To address the issues noted in these audits, BIA must systematically review and evaluate irrigation assessment rates and adjust them, when necessary, to reflect the full cost to operate and perform all appropriate maintenance on the irrigation project or facility infrastructure to ensure safe and reliable operation. If this review and adjustment is not accomplished, a rate deficiency can accumulate over time. Rate deficiencies force BIA to raise irrigation assessment rates in larger increments over shorter periods than would have been otherwise necessary.

BIA has projected this proposed rate increase for several years, and anticipated increasing the assessment rates in both 2018 and 2019. The Wind River Irrigation Project (WRIP) Operations and Maintenance (O&M) budget was prepared in accordance with BIA financial guidelines. The intent of the increases is for maintenance of a

reserve fund for contingencies or emergencies.

Based on increased costs associated with administering, operating, maintaining, and rehabilitating WRIP, the need for the proposed rate increase is clear and justified for both 2018 and 2019. For those farm units where BIA determines that our irrigation facilities are not capable of delivering adequate irrigation water, an Annual Assessment Waiver can be granted to waive the O&M assessment.

Comment: Commenters state that no rate increases should occur on WRIP. Specifically, some commenters oppose Unit 6's rate increase because the Ray Canal Water Users Association (RCWUA) efficiently operates the project through a cooperative agreement.

Response: As explained in the previous response, BIA can no longer temper irrigation rates. BIA is required to establish irrigation assessment rates that recover the costs to administer, operate, maintain, and rehabilitate our projects. As owner of WRIP, it is BIA's responsibility to ensure adequate resources are made available to meet the requirements noted above. BIA's authority to assess rates dates back to the Act of May 29, 1908, codified at 25 U.S.C. 381 *et seq.,* and is addressed in BIA's regulations at 25 CFR part 171. In accordance with 25 CFR 171.500, upcoming annual costs are to be estimated through a budgeting process that factors in all categories, including maintenance of a reserve fund.

Of the six WRIP rates, BIA does not set the rates for LeClair District or Riverton Valley Irrigation District. Of the remaining four WRIP rates, BIA is raising each Unit's 2017 rate by $1.00 over the course of two years. Rates for three Units (Unit 6, Crow Heart Unit, and A Canal Unit) are increasing by $1.00 in 2018; these three Units' rates will not increase in 2019. The remaining rate for Units 2, 3, and 4 will be raised by $1 over the course of two years: $0.50 increase in 2018 and $.50 increase in 2019. The rate increases will replenish WRIP's reserve fund; as explained below, the reserve fund is for contingencies or emergencies.

Regarding Unit 6 specifically, RCWUA bases its annual budget on the 85% collection rate minus the BIA direct service cost. The BIA direct service cost is $3.50 per acre and based on a cost per acre of direct services BIA provides to Unit 6 (Ray Canal water users), which includes: (1) Administrative functions for two full-time Accounting Technicians; (2) general office per acre cost; (3) 7.5% of the Project Manager's per acre cost; and (4) 8% of the Equipment Operator's per acre cost. With respect to the last item, BIA's Equipment Operators operate and maintain Washakie Dam, which provides water to the Ray Canal Diversion structure. The Equipment Operators also clean trash racks and maintain the diversion structure for Ray Canal. Operation and maintenance of Washakie Dam and the Ray Canal Diversion structure is captured in BIA's direct service cost of $3.50 per acre.

Although RCWUA may be functioning within its budget to provide O&M within Unit 6, BIA must assess rates based on the entire WRIP. BIA must increase the rate to (1) reflect the full cost of operating and performing all maintenance on the irrigation project or facility infrastructure and (2) maintain a reserve fund to cover emergencies, including critical repairs to avoid potential system failures that occurred in 2017. The reserve fund is used as needed for any Unit within WRIP, including Unit 6. Although BIA receives some non-water user funding for irrigation rehabilitation, each irrigation project needs to maintain a reserve fund for emergencies and equipment purchases. The BIA National Irrigation Handbook's Emergency Reserve Fund Guidelines recommends a reserve of 40% of the annual O&M costs, which is calculated by averaging five years of costs. For WRIP, the recommended reserve amount is $310,000. In addition, irrigation projects should maintain a sinking fund to meet future expenditures for replacement of equipment and vehicles. Currently, the reserve fund and sinking fund combined total is $280,000. The WRIP rate increases will bring in just over $28,000 in 2018 and over $36,000 in the following years for replenishment of WRIP's reserve and sinking funds. Thus, BIA views the modest rate increase here to be necessary and reasonable.

Comment: Commenters expressed a position that the repair costs (both past and future) of the washout of the 37C chute project should not be passed on to the RCWUA water users.

Response: Because of flooding that resulted from the melting of the extensive snowpack that occurred in 2017, a major structure was damaged, a main canal was put at risk of failure, and 37C chute was damaged. RCWUA did not incur any of the costs associated with the 37C chute project. BIA has and will continue to use both O&M funds and the WRIP reserve fund for repairs from the flooding. BIA, Eastern Shoshone Tribe, and Northern Arapaho Tribe requested and secured non-water user funding sources (federal and Tribal funds) to supplement the costs associated with the repair of 37C chute project. Reserve funding may also be used for the structure's repair. Accordingly, BIA must increase O&M rates to replenish the reserve fund to prepare for inevitable failures or damage. Without the necessary O&M rate increases, lack of adequate funds could result in the inability of the project to maintain irrigation system components and deliver water.

Comment: Two commenters state an opposition to the proposed rate adjustments because the Project has only had one BIA part-time secretary. Given that a BIA project position has been vacant for years, salaries from vacant positions should offset any proposed increases.

Response: Presently, WRIP is operating with one full-time Accounting Technician and an Acting Irrigation Project Manager. BIA intends to fill two vacant positions: Accounting Technician and Irrigation Project Manager. We believe that these personnel expenditures are reasonable and appropriate, and well within BIA's authority to manage its personnel to assure that its water deliver obligations are satisfied. Any remaining funds will be utilized toward flood damage and deferred maintenance. Thus, water users will see a significant portion of the increase returned to them in form of repairs and increased maintenance.

Comment: One commenter objects to the proposed rate adjustments because BIA fails to renew leases and act on leasing in a timely manner, which leaves a large amount of agricultural land vacant on WRIP.

Response: Leasing functions fall under the Agency Realty Office, while leases on Tribal land require Tribal approval. Upon receipt of leasing information from the Agency Realty Office, BIA's WRIP staff efficiently perform data entry for O&M billing compilation.

Does this notice affect me?

This notice affects you if you own or lease land within the assessable acreage of one of our irrigation projects or if you have a carriage agreement with one of our irrigation projects.

Where can I get information on the regulatory and legal citations in this notice?

You can contact the appropriate office(s) stated in the tables for the irrigation project that serves you, or you can use the internet site for the Government Printing Office at *www.gpo.gov.*

What authorizes you to issue this notice?

Our authority to issue this notice is vested in the Secretary of the Interior (Secretary) by 5 U.S.C. 301 and the Act of August 14, 1914 (38 Stat. 583; 25 U.S.C. 385). The Secretary has in turn delegated this authority to the Assistant Secretary—Indian Affairs under Part 209, Chapter 8.1A, of the Department of the Interior's Departmental Manual.

Whom can I contact for further information?

The following tables are the regional and project/agency contacts for our irrigation facilities.

Project name	Project/agency contacts
Northwest Region Contacts	
Bodie Shaw, Acting Regional Director, Bureau of Indian Affairs, Northwest Regional Office, 911 NE 11th Avenue, Portland, OR 97232–4169, Telephone: (503) 231–6702.	
Flathead Indian Irrigation Project	Pete Plant, Acting Superintendent, Pete Plant, Irrigation Project Manager, P.O. Box 40, Pablo, MT 59855, Telephones: (406) 675–2700 ext. 1300 Superintendent, (406) 745–2661 ext. 2 Project Manager.
Fort Hall Irrigation Project	David Bollinger, Irrigation Project Manager, Building #2 Bannock Ave., Fort Hall, ID 83203–0220, Telephone: (208) 238–6264.
Wapato Irrigation Project	David Shaw, Superintendent, Larry Nelson, Acting Project Administrator, P.O. Box 220, Wapato, WA 98951–0220, Telephones: (509) 865–2421 Superintendent, (509) 877–3155 Acting Project Administrator.
Rocky Mountain Region Contacts	
Susan Messerly, Acting Regional Director, Bureau of Indian Affairs, Rocky Mountain Regional Office, 2021 4th Avenue North, Billings, MT 59101, Telephone: (406) 247–7943.	
Blackfeet Irrigation Project	Thedis Crowe, Superintendent, Greg Tatsey, Irrigation Project Manager, Box 880, Browning, MT 59417, Telephones: (406) 338–7544, Superintendent, (406) 338–7519, Irrigation Project Manager.
Crow Irrigation Project	Michael Addy, Acting Superintendent, Jim Gappa, Acting Irrigation Project Manager, P.O. Box 69, Crow Agency, MT 59022, Telephones: (406) 638–2672, Superintendent, (406) 247–7998, Acting Irrigation Project Manager.
Fort Belknap Irrigation Project	Dave Hopkins, Acting Superintendent, Jim Gappa, Acting Irrigation Project Manager (BIA), (Project operation & maintenance contracted to Tribes), R.R.1, Box 980, Harlem, MT 59526, Telephones: (406) 353–2901, Superintendent, (406) 353–8454, Irrigation Project Manager (Tribal Office).
Fort Peck Irrigation Project	Howard Beemer, Superintendent, Huber Wright, Acting Irrigation Project Manager, P.O. Box 637, Poplar, MT 59255, Telephones: (406) 768–5312, Superintendent, (406) 653–1752, Irrigation Project Manager.
Wind River Irrigation Project	Norma Gourneau, Superintendent, Jim Gappa, Acting Irrigation Project Manager, P.O. Box 158, Fort Washakie, WY 82514, Telephones: (307) 332–7810, Superintendent, (406) 247–7998, Acting Irrigation Project Manager.
Southwest Region Contacts	
John Halliday, Acting Regional Director, Bureau of Indian Affairs, Southwest Regional Office, 1001 Indian School Road, Albuquerque, NM 87104, Telephone: (505) 563–3100.	
Pine River Irrigation Project	Priscilla Bancroft, Superintendent, Vickie Begay, Irrigation Project Manager, P.O. Box 315, Ignacio, CO 81137–0315, Telephones: (970) 563–4511, Superintendent, (970) 563–9484, Irrigation Project Manager.
Western Region Contacts	
Bryan Bowker, Regional Director, Bureau of Indian Affairs, Western Regional Office, 2600 N Central Ave., 4th Floor Mailroom, Phoenix, AZ 85004, Telephone: (602) 379–6600.	
Colorado River Irrigation Project	Kellie Youngbear Superintendent, Gary Colvin, Irrigation Project Manager, 12124 1st Avenue, Parker, AZ 85344, Telephone: (928) 669–7111.
Duck Valley Irrigation Project	Joseph McDade, Superintendent (Project operation & management compacted to Tribes), 2719 Argent Ave., Suite 4, Gateway Plaza, Elko, NV 89801, Telephone: (775) 738–5165, (208) 759–3100, (Tribal Office).
Yuma Project, Indian Unit	Denni Shields, Superintendent, 256 South Second Avenue, Suite D, Yuma, AZ 85364, Telephone: (928) 782–1202.
San Carlos Irrigation Project (Indian Works and Joint Works).	Ferris Begay, Project Manager, Clarence Begay, Irrigation Manager, 13805 N Arizona Boulevard, Coolidge, AZ 85128, Telephone: (520) 723–6225.
Uintah Irrigation Project	Antonio Pingree, Acting Superintendent, Ken Asay, Irrigation System Manager, P.O. Box 130, Fort Duchesne, UT 84026, Telephone: (435) 722–4300, (435) 722–4344.
Walker River Irrigation Project	Robert Eben, Superintendent, 311 E Washington Street, Carson City, NV 89701, Telephone: (775) 887–3500.

What irrigation assessments or charges are adjusted by this notice?

The rate table below contains the final rates for the 2018 and 2019 calendar years for all irrigation projects where we recover costs of administering, operating, maintaining, and rehabilitating them. An asterisk immediately following the rate category notes the irrigation projects where 2018 rates are different from the 2019 rates.

Project name	Rate category	Final 2017 rate	Final 2018 rate	Final 2019 rate
Northwest Region Rate Table				
Flathead Indian Irrigation Project (See Note #1).	Basic-per acre—A*	$26.00	$29.00	$33.50
	Basic-per acre—B*	13.00	14.50	16.75
	Minimum Charge per tract	75.00	75.00	75.00
Fort Hall Irrigation Project	Basic per acre*	54.00	56.00	58.00
	Minimum Charge per tract*	38.50	39.00	40.00
Fort Hall Irrigation Project—Minor Units	Basic per acre*	32.50	35.00	36.50
	Minimum Charge per tract*	38.50	39.00	40.00
Fort Hall Irrigation Project—Michaud	Basic per acre*	57.50	59.50	62.00
	Pressure per acre*	88.50	92.50	98.00
	Minimum Charge per tract*	38.50	39.00	40.00
Wapato Irrigation Project—Toppenish/Simcoe Units.	Minimum Charge per bill	25.00	25.00	25.00
	Basic per acre	25.00	25.00	25.00
Wapato Irrigation Project—Ahtanum Units	Minimum Charge per bill	30.00	30.00	30.00
	Basic per acre	30.00	30.00	30.00
Wapato Irrigation Project—Satus Unit	Minimum Charge per bill	79.00	79.00	79.00
	"A" Basic per acre	79.00	79.00	79.00
	"B" Basic per acre	85.00	85.00	85.00
Wapato Irrigation Project—Additional Works	Minimum Charge per bill	78.00	80.00	80.00
	Basic per acre	78.00	80.00	80.00
Wapato Irrigation Project—Water Rental	Minimum Charge	86.00	86.00	86.00
	Basic per acre	86.00	86.00	86.00
Rocky Mountain Region Rate Table				
Blackfeet Irrigation Project	Basic-per acre	20.00	20.00	20.00
Crow Irrigation Project—Willow Creek O&M (includes Agency, Lodge Grass #1, Lodge Grass #2, Reno, Upper Little Horn, and Forty Mile Units).	Basic-per acre	28.00	28.00	28.00
Crow Irrigation Project—All Others (includes Bighorn, Soap Creek, and Pryor Units).	Basic-per acre	28.00	28.00	28.00
Crow Irrigation Project—Two Leggins Unit	Basic-per acre	14.00	14.00	14.00

Colorado River Irrigation Project	Basic per acre up to 5.75 acre-feet	54.00	54.00	54.00
	Excess Water per acre-foot over 5.75 acre-feet.	17.000	17.00	17.00
Duck Valley Irrigation Project (See Note #3)	Basic per acre	5.30	5.30	(+)
Yuma Project, Indian Unit (See Note #4)	Basic per acre up to 5.0 acre-feet	118.50	147.00	(+)
	Excess Water per acre-foot over 5.0 acre-feet.	27.50	30.00	(+)
	Basic per acre up to 5.0 acre-feet (Ranch 5)	118.50	147.00	(+)

San Carlos Irrigation Project (Joint Works) (See Note #5).	Basic per acre*	25.00	27.90	31.25
	Final 2017, 2018, 2019 Construction Water Rate Schedule:			
		Off project construction	On project construction—gravity water	On project construction—pump water
	Administrative Fee	300.00	300.00	300.00.
	Usage Fee	250.00 per month.	No Fee	100.00 per acre foot.
	Excess Water Rate†	5.00 per 1,000 gal.	No Charge	No Charge.

Project name	Rate category	Final 2017 rate	Final 2018 rate	Final 2019 rate
San Carlos Irrigation Project (Indian Works) (See Note #6).	Basic per acre*	$81.00	$87.60	$95.40
Uintah Irrigation Project	Basic per acre*	18.00	20.00	21.00
	Minimum Bill	25.00	25.00	25.00
Walker River Irrigation Project	Basic per acre	31.00	31.00	31.00

+ These rates have not yet been determined; BIA will publish a separate notice for these rates at a later date.
† The excess water rate applies to all water used in excess of 50,000 gallons in any one month.
* Notes irrigation projects where 2018 rates are different from 2019 rates.
Note #1: Federal Register Notice on January 18, 2018 (83 FR 2665), finalized the 2018 rate for the Flathead Indian Irrigation Project.
Note #2: These O&M rates may vary yearly based upon the budget submitted by the LeClair District and the Riverton Valley Irrigation District.
Note #3: The annual O&M rate is established by the Shoshone-Paiute Tribes who perform O&M under a self-governance compact.
Note #4: The O&M rate for the Yuma Project, Indian Unit has two components. The first component of the O&M rate is established by the Bureau of Reclamation (BOR), the owner and operator of the Project. BOR's rate, which is based upon the annual budget submitted by BOR, is 143.50 for 2018; and has not been established for 2019. The second component of the O&M rate is established by BIA to cover administrative costs, which includes billing and collections for the Project. The 2018 and 2019 BIA rate component is 3.50/acre.
Note #5: Federal Register Notice on August 11, 2017 (82 FR 37608), established the final 2018 rate for the San Carlos Irrigation Project. The construction water rate schedule identifies the fees assessed for use of irrigation water for non-irrigation purposes.
Note #6: The 2018 and 2019 O&M rates for the San Carlos Irrigation Project—Indian Works has three components. The first component is the O&M rate established by the San Carlos Irrigation Project—Indian Works, the owner and operator of the Project; this rate is 50.00 per acre each year. The second component is for the O&M rate established by the San Carlos Irrigation Project—Joint Works and is determined to be 27.90 per acre for 2018 and 31.25 per acre for 2019. The third component is the O&M rate established by the San Carlos Irrigation Project Joint Control Board and is 9.70 per acre for 2018 and 14.15 per acre for 2019.

Consultation and Coordination With Tribal Governments (Executive Order 13175)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this notice under the Department's consultation policy and under the criteria of Executive Order 13175 and have determined there to be substantial direct effects on federally recognized Tribes because the irrigation projects are located on or associated with Indian reservations. To fulfill its consultation responsibility to Tribes and Tribal organizations, BIA communicates, coordinates, and consults on a continuing basis with these entities on issues of water delivery, water availability, and costs of administration, operation, maintenance, and rehabilitation of projects that concern them. This is accomplished at the individual irrigation project by project, agency, and regional representatives, as appropriate, in accordance with local protocol and procedures. This notice is one component of our overall coordination and consultation process to provide notice to, and request comments from, these entities when we adjust irrigation assessment rates.

Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use (Executive Order 13211)

The rate adjustments are not a significant energy action under the definition in Executive Order 13211. A Statement of Energy Effects is not required.

Regulatory Planning and Review (Executive Order 12866)

These rate adjustments are not a significant regulatory action and do not need to be reviewed by the Office of Management and Budget under Executive Order 12866.

Regulatory Flexibility Act

These rate adjustments are not a rule for the purposes of the Regulatory Flexibility Act because they establish ''a rule of particular applicability relating to rates.'' 5 U.S.C. 601(2).

Unfunded Mandates Reform Act of 1995

These rate adjustments do not impose an unfunded mandate on state, local, or Tribal governments in the aggregate, or on the private sector, of more than $130 million per year. They do not have a significant or unique effect on state, local, or Tribal governments or the private sector. Therefore, the Department is not required to prepare a statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*).

Takings (Executive Order 12630)

These rate adjustments do not effect a taking of private property or otherwise have ''takings'' implications under Executive Order 12630. The rate adjustments do not deprive the public, state, or local governments of rights or property.

Federalism (Executive Order 13132)

Under the criteria in section 1 of Executive Order 13132, these rate adjustments do not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement because they will not affect the States, the relationship

between the national government and the States, or the distribution of power and responsibilities among various levels of government. A federalism summary impact statement is not required.

Civil Justice Reform (Executive Order 12988)

This notice complies with the requirements of Executive Order 12988. Specifically, in issuing this notice, the Department has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct as required by section 3 of Executive Order 12988.

Paperwork Reduction Act of 1995

These rate adjustments do not affect the collections of information which have been approved by the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), under the Paperwork Reduction Act of 1995. The OMB Control Number is 1076–0141 and expires June 30, 2019.

National Environmental Policy Act

The Department has determined that these rate adjustments do not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement is required under the National Environmental Policy Act of 1969, 42 U.S.C. 4321–4370(d), pursuant to 43 CFR 46.210(i). In addition, the rate adjustments do not present any of the 12 extraordinary circumstances listed at 43 CFR 46.215.

Data Quality Act

In developing this notice, we did not conduct or use a study, experiment, or survey requiring peer review under the Data Quality Act (Pub. L. 106–554).

Dated: August 13, 2018.

Tara Sweeney,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[18X 1109AF LLUT930000 L16100000.DS0000.LXSSJ0640000]

Notice of Availability of the Grand Staircase-Escalante National Monument-Grand Staircase, Kaiparowits, and Escalante Canyon Units and Federal Lands Previously Included in the Monument That Are Excluded From the Boundaries Draft Resource Management Plans and Associated Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) Grand Staircase-Escalante National Monument (GSENM) and Kanab Field Office (KFO) have prepared Draft Resource Management Plans (RMPs) and a Draft Environmental Impact Statement (EIS) for the GSENM Grand Staircase, Kaiparowits, and Escalante Canyons Units and Federal lands excluded from the Monument by Proclamation 9682 and by this notice are announcing the opening of the public comment period.

DATES: To ensure that comments will be considered, the BLM must receive written comments on the Draft RMPs/Draft EIS within 90 days of the date the Environmental Protection Agency publishes its Notice of Availability of the Draft RMPs/Draft EIS in the **Federal Register**. The BLM will announce future meetings or hearings and any other public involvement activities at least 15 days in advance through public notices, media releases and/or mailings.

ADDRESSES: You may submit comments on the Draft RMPs/Draft EIS by either of the following methods:

- *Website: https://goo.gl/EHvhbc*
- *Mail:* 669 S Hwy. 89A, Kanab, UT 84741, Attn: Matt Betenson

Copies of the Draft RMPs/Draft EIS are available at the following locations:

- Bureau of Land Management, Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, Utah
- Escalante Interagency Visitor Center, 755 West Main, Escalante, Utah
- Kanab Field Office, 669 South Highway 89A, Kanab, Utah

The Draft RMPs/Draft EIS and accompanying background documents are available on the ePlanning website at: *https://goo.gl/EHvhbc.*

FOR FURTHER INFORMATION CONTACT: Matt Betenson, Associate Monument Manager, telephone (435) 644–1200; address 669 S Hwy. 89A, Kanab, UT 84741; email *BLM_UT_CCD_monuments@blm.gov*. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question for the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: On December 4, 2017, President Donald Trump signed Presidential Proclamation 9682 modifying the boundaries of the GSENM as established by Proclamation 6920 to exclude from designation and reservation approximately 861,974 acres of land. Lands that remain part of the GSENM are included in three units, known as the Grand Staircase, Kaiparowits, and Escalante Canyons Units and are reserved for the care and management of the objects of historic and scientific interest described in Proclamation 6920, as modified by Proclamation 9682. Lands that are excluded from the Monument boundaries are now referred to as the Kanab-Escalante Planning Area (KEPA) and are managed in accordance with the BLM's multiple-use mandate.

The planning area is located in Kane and Garfield Counties, Utah, and encompasses approximately 1.86 million acres of public land. For the GSENM Grand Staircase, Kaiparowits, and Escalante Canyons Units, this planning effort, is needed to identify goals, objectives, and management actions necessary for the conservation, protection, restoration, or enhancement of the resources, objects, and values identified in Proclamation 6920, as modified by Proclamation 9682. For lands excluded from the monument, this planning effort is needed to determine to identify goals, objectives, and management actions necessary to ensure that public lands and their various resource values are utilized in the combination that will best meet the present and future needs of the American people.

The entire planning area is currently managed by the BLM and under the Grand Staircase-Escalante National Monument Management Plan (BLM 1999), as amended. This planning effort would replace the existing Monument Management Plan with four new RMPs.

Within the Draft EIS, the BLM is also considering alternatives related to livestock Grazing on 318,000 acres of land within the Glen Canyon National Recreation Area, 65,500 acres in the Kanab Field Office and 2,300 acres in the Arizona Strip Field Office. The EIS includes information regarding the environmental consequences of implementing various livestock grazing management actions on resources in these areas. At the completion of this planning process, the National Park Service, who is cooperating with the BLM on preparation of the NEPA analysis, may adopt the EIS and prepare a separate decision related to livestock grazing for lands under NPS authority.

The BLM reviewed public scoping comments to identify planning issues that directed the formulation of alternatives and framed the scope of analysis in the Draft RMPs/Draft EIS. Issues identified include management of recreation and access; paleontological and cultural resources; livestock grazing; mineral resources; and wildlife, water, vegetation, and soil resources. This planning effort also considers management of lands with wilderness characteristics and designation of Areas of Critical Environmental Concern (ACECs).

The Draft RMPs/Draft EIS evaluate four alternatives in detail. Alternative A is the No Action alternative, which is a continuation of existing decisions in the Monument Management Plan. Alternative B generally focuses on protection of resources (*e.g.,* wildlife, vegetation, cultural, etc.) while providing for targeted resource use (*e.g.,* rights-of-way, travel, mineral development). Alternative C generally represents a balance of resource protection and resource use. Alternative D generally focuses on maximizing resource use (*e.g.,* rights-of-way, minerals development, livestock grazing) while still providing for resource protection as required by applicable regulations, laws, policies, plans, and guidance, including protection of Monument objects within the GSENM Units. The BLM has identified Alternative D as the preferred alternative for purposes of public comment and review. Identification of this alternative, however, does not represent final agency direction, and the Proposed RMPs/Final EIS may include management actions described in the other analyzed alternatives.

Pursuant to 43 CFR 1610.7–2(b), the BLM is required to publish a notice in the **Federal Register** listing each ACEC proposed and specifying the resource use limitations which would occur if the ACEC were formally designated. This notice announces a concurrent public comment period for potential ACECs. There are no ACECs under Alternative A. There are 14 potential ACECs under Alternative B (totaling 308,044 acres), 5 potential ACECs under Alternative C (totaling 130,997 acres), and no potential ACECs under Alternative D. Pertinent information regarding ACECs, including proposed designation acreage and resource use limitations are included below:

Potential ACEC	Alternative B (acres)	Alternative C (acres)	Relevant and important values	Resource use limitations
Alvey Wash	30,460	Not Designated	Historic and Cultural Values.	• Prohibit exclusive commercial mineral material sites. • Prohibit community mineral material pits larger than five acres in size. • Surface facilities incident to underground mining would be required to avoid known and document archaeological sites. • Stipulations would be necessary to mitigate adverse effects of subsidence. • NSO for fluid mineral leasing. • No rock climbing allowed within 100 meters of archaeological structures. • No casual use collection of fossils or other paleontological materials. • Require inventories of all paleontological resources prior to surface disturbing activities to document significant invertebrate and paleobotanical fossil sites, not just vertebrates.
Bulldog Bench	361	Not Designated	Historic and Cultural Values.	• No casual use collection of fossils or other paleontological materials. • Require inventories of all paleontological resources prior to surface disturbing activities to document significant invertebrate and paleobotanical fossil sites, not just vertebrates.
Butler Valley	15,899	Not Designated	Scenic and Natural Process or System.	• Manage as VRM Class II. • No collection of BLM or State sensitive plants without a research permit. • Prohibit vegetation treatments that are likely to harm, or will not benefit, special status species plants in known suitable habitat.
Circle Cliffs	26,706	26,706	Historic and Cultural, Scenic, and Fish and Wildlife Resources.	• Prohibit exclusive commercial mineral material sites. • Prohibit community mineral material pits larger than five acres in size. • NSO for fluid mineral leasing. • No Casual Collection of petrified Wood. • Avoid surface disturbance and placement of facilities near concentrations of petrified wood or in situ logs.
Cockscomb East	42,182	32,683	Fish and Wildlife Resources, Natural Process or Systems, Scenic, and Historic and Cultural Value.	• No collection of BLM or State sensitive plants without a research permit. • Prohibit vegetation treatments that are likely to harm, or will not benefit, special status species plants in known suitable habitat. • Manage as VRM Class II. • No casual use collection of fossils or other paleontological materials. • Require inventories of all paleontological resources prior to surface disturbing activities to document significant invertebrate and paleobotanical fossil sites, not just vertebrates. • Do not designate new OHV routes. OHV use limited to designated routes.

Potential ACEC	Alternative B (acres)	Alternative C (acres)	Relevant and important values	Resource use limitations
Cockscomb West	40,476	40,476	Natural Process or Systems, Scenic, and Historic and Cultural Values.	• Prohibit exclusive commercial mineral material sites. • Prohibit community mineral material pits larger than five acres in size. • NSO for fluid mineral leasing (Alternative B). • CSU for fluid mineral leasing (Alternative C). • Avoid vegetation treatments that disturb soils in previously untreated areas that are either Semidesert Shallow Loam (Pinyon-Juniper) or Semidesert Shallow Gypsum (Mormontea) Ecological Sites; Limit method to hand-thinning (lop and scatter). • No collection of BLM or State sensitive plants without a research permit. • Manage as VRM Class II.
Collet Top	9,218	Not Designated	Historic and Cultural Values, Scenic, and Natural Process or Systems.	• Prohibit exclusive commercial mineral material sites. • Prohibit community mineral material pits larger than five acres in size. • NSO for fluid mineral leasing. • Surface facilities incident to underground mining would be required to avoid known and document archaeological sites. • Stipulations would be necessary to mitigate adverse effects of subsidence. • No rock climbing allowed within 100 meters of archaeological structures. • Manage as VRM Class II. • No collection of BLM or State sensitive plants without a research permit.
Henderson/Pardner	12,259	Not Designated	Scenic and Historic and Cultural Values.	• Manage as VRM Class II. • No casual use collection of fossils or other paleontological materials. • Require inventories of all paleontological resources prior to surface disturbing activities to document significant invertebrate and paleobotanical fossil sites, not just vertebrates.
Hole in the Rock Trail	61,064	Not Designated	Historic and Cultural Values and Natural Process or System.	• Manage all areas outside WSAs VRM Class II. • Prohibit exclusive commercial mineral material sites. • Prohibit community mineral material pits larger than 5 acres in size. • NSO for fluid mineral leasing. • No collection of BLM or State sensitive plants without a research permit.
Paria River	180	Not Designated	Scenic, Historic and Cultural Values, Fish Wildlife, Natural Process or System.	• Manage all areas outside WSAs VRM Class II. • Closed or limited to designated routes.
Scorpion Flat/Dry Fork	30,691	Not Designated	Scenic	• Manage all areas outside WSAs VRM Class II.
Straight Cliffs/Fifty Mile Bench.	21,357	12,270	Scenic and Historical and Cultural Values.	• Prohibit exclusive commercial mineral material sites. • Prohibit community mineral material pits larger than five acres in size. • NSO for fluid mineral leasing (Alternative B). • CSU for fluid mineral leasing (Alternative C). • Surface facilities incident to underground mining would be required to avoid known and document archaeological sites. • Stipulations would be necessary to mitigate adverse effects of subsidence. • No rock climbing allowed within 100 meters of archaeological structures. • Manage as VRM Class II.
Tibbet Head	19,079	19,079	Historical and Cultural Values and Natural process or System.	• No collection of BLM or State sensitive plants without a research permit. No casual use collection of fossils or other paleontological materials. • Require inventories of all paleontological resources prior to surface disturbing activities to document significant invertebrate and paleobotanical fossil sites, not just vertebrates.
Wahweap Hoodoos	130	Not Designated	Natural Systems or Process.	• Recommend withdrawing from mineral entry. • No rock climbing or rappelling within 100 meters of any hoodoo formation.

The application of the Federal coal unsuitability criteria to portions of the Southern Kaiparowits in the lands excluded from the monument is included in the Draft RMP/Draft EIS. As required by 43 CFR 3461.2–1(a)(2), the public is invited to comment on the results of the application of the criteria and the process used to derive these results.

BLM Utah is soliciting comments on the entire Draft RMPs/Draft EIS. Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at addresses provided in the **ADDRESSES** section of this notice during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may request to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10 and 43 CFR 1610.2.

Edwin L. Roberson,

State Director.

BILLING CODE P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[18X 1109AF LLUT930000 L16100000.DS0000.LXSSJ0650000]

Notice of Availability of the Draft Bears Ears National Monument Indian Creek and Shash Jáa Units Monument Management Plans and Associated Environmental Impact Statement, Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) Canyon Country District Office, in coordination with the United States Forest Service (USFS), Manti-La Sal National Forest, has prepared Draft Monument Management Plans (MMPs) and an Environmental Impact Statement (EIS) for the Bears Ears National Monument (BENM) Indian Creek and Shash Jáa Units. By this Notice, the BLM is announcing the opening of the public comment period.

DATES: To ensure that comments will be considered, the BLM must receive written comments on the BENM Draft MMPs/Draft EIS within 90 days of the date the Environmental Protection Agency publishes its Notice of Availability of the BENM Draft MMPs/Draft EIS in the **Federal Register**. The BLM will announce future meetings or hearings and any other public involvement activities at least 15 days in advance through public notices, media releases and/or mailings.

ADDRESSES: You may submit comments on the BENM Draft MMPs/EIS by either of these methods:

- *Email: blm_ut_monticello_monuments@blm.gov*
- *Mail:* BLM, Canyon Country District Office, 82 East Dogwood, Moab, Utah 84532, Attn: Lance Porter

Copies of the BENM Draft MMPs/Draft EIS are available at the following locations:

- Bureau of Land Management, Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, Utah
- Bureau of Land Management, Monticello Field Office, 365 North Main, Monticello, Utah
- Bureau of Land Management, Canyon Country District Office, 82 E Dogwood, Moab, Utah
- Manti-La-Sal National Forest, 559 West Price River Drive, Price, Utah

The BENM Draft MMPs/Draft EIS and accompanying background documents are available on the ePlanning website at: *https://goo.gl/uLrEae.*

FOR FURTHER INFORMATION CONTACT: Lance Porter, District Manager, BLM Canyon Country District Office, 82 East Dogwood, Moab, UT 84532, telephone 435–259–2100 or email *l50porte@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question for the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: On December 4, 2017, President Donald Trump signed Proclamation 9681 modifying the Bears Ears National Monument designated by Proclamation 9558 to exclude from its designation and reservation approximately 1,150,860 acres of land. The revised BENM boundary includes two units—Shash Jáa and Indian Creek Units—that are reserved for the care and management of the objects of historic and scientific interest within their boundaries. The planning area is located entirely in San Juan County, Utah and encompasses 169,289 acres of BLM-managed lands and 32,587 acres of National Forest System Lands. All of the National Forest System Lands are within the Shash Jáa Unit.

The BLM is the lead agency for the preparation of the EIS, and the Forest Service is participating as a cooperating agency.

This planning effort is needed to identify goals, objectives, and management actions necessary for the conservation, protection, restoration, or enhancement of the resources, objects, and values identified in Proclamation 9558, as modified by Proclamation 9681. The BENM is jointly managed by the BLM and USFS under the Monticello Resource Management Plan (BLM 2008), as amended, and the Manti La-Sal Land and Resource Management Plan (LRMP), as amended (USFS 1986). The MMPs would replace the existing Monticello RMP for the BLM-administered lands within the BENM, and would amend the existing Manti La-Sal LRMP for USFS-administered lands within the BENM.

Each agency will continue to manage their lands within the monument pursuant to their respective applicable legal authorities. The responsible official for the BLM is the Utah State Director; the responsible official for the USFS is the Manti-La Sal Forest Supervisor. The USFS intends to use the BLM's EIS to make its decision for the part of the Shash Jáa Unit MMP it administers. The USFS will use the BLM's administrative review procedures, as provided by the USFS 2012 Planning Rule, at 36 CFR 219.59(b).

The BLM and USFS have reviewed public scoping comments to identify planning issues that directed the formulation of alternatives and framed the scope of analysis in the Draft MMPs/Draft EIS. Issues identified include management of cultural resources, including protection of American Indian sacred sites, traditional cultural properties, and access by members of Indian tribes for traditional cultural and customary uses; recreation and access; livestock grazing; and wildlife, water, vegetation, and soil resources. This planning effort also considers management of lands with wilderness characteristics.

The Draft MMPs/Draft EIS evaluate four alternatives in detail. Alternative A is the No Action alternative, which is a continuation of existing decisions in the Monticello RMP and in the Manti-La Sal Forest Plan, to the extent that those decisions are compatible with the proclamations. Alternative B emphasizes resource protection and conservation. It is the alternative which imposes the greatest restrictions on recreation and other uses. The BLM and USFS would take a more active management approach to ensure that objects and values are conserved, protected and restored. Alternative C represents a balance among levels of restriction on recreation and other uses and emphasizes adaptive management to protect the long-term sustainability of Monument objects and values while providing for other multiple uses. Alternative D is the alternative with the least restrictive management prescriptions and utilizes a more passive management strategy, with the aim of minimizing the number of changes in the BENM. The agencies would focus on management actions that preserve objects and values but do not alter the existing character of the landscape or limit future agency discretion.

The BLM and USFS have identified Alternative D as the preferred

alternative for purposes of public comment and review. Identification of this alternative, however, does not represent final agency direction, and the Proposed MMPs/Final EIS may include management actions described in the other analyzed alternatives.

BLM Utah and the USFS are soliciting comments on the entire Draft MMPs/Draft EIS. Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at addresses provided in the **ADDRESSES** section of this notice during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may request to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10, 43 CFR 1610.2, and 36 CFR 219.59.

Edwin L. Roberson,

State Director.

BILLING CODE 4310–DQ–P

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposed Collection, Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed extension for the collection of the ''BLS Data Sharing Program.'' A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section of this notice on or before October 16, 2018.

ADDRESSES: Send comments to Erin Good, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE, Washington, DC 20212. Written comments may be transmitted by fax to 202–691–5111. (This is not a toll free number.)

FOR FURTHER INFORMATION CONTACT: Erin Good, BLS Clearance Officer, 202–691–7763. (See **ADDRESSES** section.)

SUPPLEMENTARY INFORMATION:

I. Background

An important aspect of the mission of the BLS is to disseminate to the public the maximum amount of information possible. Not all data are publicly available because of the importance of maintaining the confidentiality of BLS data. However, the BLS has opportunities available on a limited basis for eligible researchers to access confidential data for purposes of conducting valid statistical analyses that further the mission of the BLS as permitted in the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA). The BLS makes confidential data available to eligible researchers through three major programs:

1. The Census of Fatal Occupational Injuries (CFOI), as part of the BLS occupational safety and health statistics program, compiles a count of all fatal work injuries occurring in the U.S. in each calendar year. Multiple sources are used in order to provide as complete and accurate information concerning workplace fatalities as possible. A research file containing CFOI data is made available offsite to eligible researchers.

2. The National Longitudinal Surveys of Youth (NLSY) is designed to document the transition from school to work and into adulthood. The NLSY collects extensive information about youths' labor market behavior and educational experiences over time. The NLSY includes three different cohorts: The National Longitudinal Survey of Youth 1979 (NLSY79), the NLSY79 Young Adult Survey, and the National Longitudinal Survey of Youth 1997 (NLSY97). NLSY data beyond the public use data are made available in greater detail through an offsite program to eligible researchers.

3. Additionally, the BLS makes available data from several employment, compensation, prices, and working conditions surveys to eligible researchers for onsite use. Eligible visiting researchers can access these data in researcher rooms at the BLS national office in Washington, DC or at a Federal Statistical Research Data Center (FSRDC).

II. Current Action

Office of Management and Budget clearance is being sought for the BLS Data Sharing Program. In order to provide access to confidential data, the BLS must determine that the researcher's project will be exclusively statistical in nature and that the researcher is eligible based on guidelines set out in CIPSEA, the Office of Management and Budget (OMB) implementation guidance on CIPSEA, and BLS policy. This information collection provides the vehicle through which the BLS will obtain the necessary details to ensure all researchers and projects comply with appropriate laws and policies.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Type of Review: Revision.

Agency: Bureau of Labor Statistics.

Title: BLS Data Sharing Program.

OMB Number: 1220–0180.

Affected Public: Individuals.

Form	Total respondents	Frequency	Total responses	Average time per response (minutes)	Estimated total burden hours
CFOI Application	5	On occasion	5	35	2.9
NLSY Application	126	On occasion	126	30	63
Visiting Researcher Application	30	On occasion	30	30	15
Totals	161		161		80.9

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, on August 10, 2018.

Eric Molina,

Acting Chief, Division of Management Systems, Bureau of Labor Statistics.

BILLING CODE 7590–01–P

PENSION BENEFIT GUARANTY CORPORATION

Proposed Submission of Information Collection for OMB Review; Comment Request; Partitions of Eligible Multiemployer Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of intent to request extension of OMB approval of information collection.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of a collection of information contained in its regulation on Partitions of Eligible Multiemployer Plans. This notice informs the public of PBGC's intent and solicits public comment on the collection of information.

DATES: Comments must be submitted on or before October 16, 2018.

ADDRESSES: Comments may be submitted by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Email:* paperwork.comments@pbgc.gov.
- *Mail or Hand Delivery:* Regulatory Affairs Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW, Washington, DC 20005–4026.

All submissions received must include the agency's name (Pension Benefit Guaranty Corporation, or PBGC) and refer to OMB control number 1212–0068. All comments received will be posted without change to PBGC's website, *http://www.pbgc.gov,* including any personal information provided.

Copies of the collections of information may also be obtained by writing to Disclosure Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW, Washington, DC 20005–4026, or calling 202–326–4040 during normal business hours. TTY users may call the Federal relay service toll-free at 800–877–8339 and ask to be connected to 202–326–4040. PBGC's regulations on

multiemployer plans may be accessed on PBGC's website at *http://www.pbgc.gov.*

FOR FURTHER INFORMATION CONTACT: Melissa Rifkin (*rifkin.melissa@pbgc.gov*), Attorney, Regulatory Affairs Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW, Washington, DC 20005–4026; 202–326–4400, extension 6563. (TTY users may call the Federal relay service toll-free at 800–877–8339 and ask to be connected to 202–326–4400, extension 6563.)

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of a collection of information contained in its regulation on Partitions of Eligible Multiemployer Plans (29 CFR part 4233) (OMB control number 1212–0068; expires December 31, 2018). This notice informs the public of PBGC's intent and solicits public comment on the collection of information.

Sections 4233(a) and (b) of the Employee Retirement Income Security Act of 1974 (ERISA) allow a plan sponsor of a multiemployer plan to apply to PBGC for a partition of the plan and state the criteria that PBGC uses to determine a plan's eligibility for a partition.

PBGC's regulation on Partitions of Eligible Multiemployer Plans (29 CFR part 4233) sets forth the procedures for applying for a partition, the information required to be included in a partition application, and notices to interested parties of the application.

PBGC needs the information to determine whether a plan is eligible for partition and whether a proposed partition would comply with the statutory conditions required before PGBC may order a partition.

The collection of information under the regulation has been approved by OMB control number 1212–0068 (expires December 31, 2018). PBGC intends to request that OMB extend its approval for another three years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that there will be six applications for partition each year for which plan sponsors submit applications under this regulation. The total estimated annual burden of the collection of information is 78 hours and $239,400.

PBGC is soliciting public comments to—

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodologies and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Issued in Washington, DC.

Hilary Duke,

Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation.

POSTAL REGULATORY COMMISSION

[Docket Nos. CP2017–232; CP2017–241; CP2017–243; CP2017–244; CP2017–247; CP2017–251; CP2017–257]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning negotiated service agreements. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* August 21, 2018 and August 22, 2018.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83834; File No. SR–NASDAQ–2018–067]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Delete and Replace the Current Rules on Arbitration

August 13, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 9, 2018, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to delete the current rules on arbitration (''Current Arbitration Rules''), currently under the 10000 Series (Rules 10001 through 10102), and adopt the Nasdaq ISE, LLC (''ISE'') rules on arbitration in Chapter 18 of the ISE's rulebook (''Proposed Arbitration Rules'') into General 6 in the Exchange's rulebook's (''Rulebook'') shell structure.[3]

The text of the proposed rule change is available on the Exchange's website at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to delete the rules on arbitration, currently under the 10000 Series (Rules 10001 through 10102), and adopt the ISE rules on arbitration in Chapter 18 of the ISE's rulebook into General 6 in the Exchange's Rulebook.

The Exchange adopted the Current Arbitration Rules to ensure a fair and efficient manner in which to handle any dispute, claim or controversy arising out of, or in connection with, the business of any Member of the Exchange. To help administer the process of dispute resolution, the Exchange and FINRA are parties to a Regulatory Contract, pursuant to which FINRA has agreed to perform certain functions and provide access to certain services, including: member regulation and registration; non-real time market surveillance; examinations and investigations; and dispute resolution. FINRA currently operates the largest securities dispute resolution forum in the United States,[4] and has given the Exchange access to these services. Under the Current Arbitration Rules, Members and associated persons of a Member are subject to the FINRA Code of Arbitration Procedure.

Because the Affiliated Exchanges are also parties to similar Regulatory Contracts with FINRA that make their members and associated persons of such members subject to the FINRA Code of Arbitration Procedure, the Exchange believes it is pertinent that a common set of rules on arbitration be included in the General section of the Rulebook's shell. These rules will, pursuant to subsequent filings, then replace the existing arbitration rules for each of the Affiliated Exchanges.

As part of the process of harmonizing these rules, staff evaluated the corresponding rules on arbitration at each of the Affiliated Exchanges. Staff have determined that the Proposed Arbitration Rules are the easiest to read and the most accessible, and do not

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Recently, the Exchange added a shell structure to its Rulebook with the purpose of improving efficiency and readability and to align its rules closer to those of its five sister exchanges, Nasdaq BX, Inc.; Nasdaq PHLX LLC; Nasdaq ISE, LLC; Nasdaq GEMX, LLC; and Nasdaq MRX, LLC (''Affiliated Exchanges''). The shell structure currently contains eight (8) Chapters which, once complete, will apply a common set of rules to the Affiliated Exchanges. *See* Securities Exchange Act Release No. 82175 (November 29, 2017), 82 FR 57494 (December 5, 2017) (SR–NASDAQ–2017–125).

[4] *http://www.finra.org/arbitration-and-mediation.*

detract from, or omit, any of the substance of the Current Arbitration Rules.

Therefore, the Exchange will adopt the Proposed Arbitration Rules and place them under the ''General 6 Arbitration'' of the shell's ''General Equity and Options Rules'' section. As mentioned, these rules are already in place on ISE, and also apply to Nasdaq GEMX, LLC and Nasdaq MRX, LLC, which incorporate Chapter 18 of the ISE Rules by reference. Subsequently, the other Affiliated Exchanges plan to adopt these rules also.

The relocation and harmonization of the arbitration rules is part of the Exchange's continued effort to promote efficiency and conformity of its processes with those of its Affiliated Exchanges.[5] The Exchange believes that the adoption and placement of the Proposed Arbitration Rules to their new location in the shell will facilitate the use of the Rulebook by Members [6] of the Exchange who are members of other Affiliated Exchanges. Moreover, the proposed changes are of a conforming nature and will not amend the substance of the adopted rules other than to update the language to that of the Proposed Arbitration Rules, and to make conforming cross-reference changes.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by promoting efficiency and conformity of the Exchange's processes with those of the Affiliated Exchanges and to make the Exchange's Rulebook easier to read and more accessible to its Members. The Exchange believes that the adoption and harmonization of the arbitration rules and cross-reference updates are of a non-substantive nature.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes do not impose a burden on competition because, as previously stated, they are (i) of a non-substantive nature, (ii) intended to harmonize the Exchange's rules with those of its Affiliated Exchanges, and (iii) intended to organize the Rulebook in a way that it will ease the Members' navigation and reading of the rules across the Affiliated Exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [9] and subparagraph (f)(6) of Rule 19b–4 thereunder.[10]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2018–067 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2018–067. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet wedbsite (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2018–067 and should be submitted on or before September 7, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83836; File No. SR–NYSE–2018–31]

Self-Regulatory Organizations; New York Stock Exchange LLC; Order Approving a Proposed Rule Change, as Modified by Amendment No. 1, To Require Certain Member Organizations To Participate in Scheduled Market-Wide Circuit Breaker Testing

August 13, 2018.

I. Introduction

On June 26, 2018, New York Stock Exchange LLC (''Exchange'' or ''NYSE'') filed with the Securities and Exchange Commission (''Commission'') pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to require certain member organizations to participate in scheduled market-wide circuit breaker testing. On July 5, 2018, the Exchange filed Amendment No. 1 to the proposed rule change, which supersedes the original filing in its entirety.[3] The proposed rule change, as amended by Amendment No. 1, was published for comment in the **Federal Register** on July 11, 2018.[4] The Commission has received no comment letters on the proposed rule change. This order approves the proposed rule change.

II. Description of the Proposed Rule Change

The Exchange proposes to amend NYSE Rule 49 to require certain member organizations to participate in scheduled Market-Wide Circuit Breaker (''MWCB'') testing.[5]

The Securities Information Processors (''SIPs'') for the U.S. equity markets have established a quarterly MWCB testing schedule.[6] On the scheduled dates, the Consolidated Tape Association Plan (''CTA Plan'') and the Consolidated Quotation Plan (''CQ'' Plan'') (collectively ''the CTA/CQ Plans''),[7] along with the Nasdaq/UTP Plan,[8] conduct MWCB testing that allows market participants across the securities industry to test their ability to receive messages associated with MWCBs, including decline status, halt, and resume messages. Market participants are also able to participate in testing of re-opening auctions following market-wide circuit breaker halts.

The Exchange states that quarterly MWCB testing is critical to ensure that securities markets halt trading and subsequently re-open in a manner consistent with the MWCB rules.[9] To that end, the Exchange states that certain member organizations should be required to participate in scheduled MWCB tests. The proposed rule would provide the Exchange with authority to require participation by certain member organizations in industry-wide tests to validate that their processing in the event of MWCB is as expected within their systems.

The Exchange also proposes new Rule 49(c)(1), which would provide that each member organization notified of its obligation to participate in mandatory testing pursuant to standards established under paragraphs (b)(1) and (3) of Rule 49 [10] would also be required to participate in scheduled MWCB testing in the manner and frequency specified by the Exchange. The Exchange proposes that future SCI Notices would also include notification to member organizations of their obligation to participate in a scheduled MWCB test.[11]

Finally, proposed Rule 49(c)(2) would provide that member organizations not required to participate in a scheduled MWCB test pursuant to standards established in paragraphs (b)(1) and (3) of Rule 49 would be permitted to participate in a scheduled MWCB test.

The Exchange proposes to implement the proposed rule change at the same time that the Exchange notifies member organizations of required participation in the 2019 Regulation SCI industry test.[12] The 2019 SCI Notice would identify the member organizations that would be required to participate in scheduled MWCB testing. Member organizations notified in the 2019 SCI Notice of their obligation to participate in a scheduled MWCB test would be required to participate in that test on at least one of the testing dates established by the SIPs.[13]

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] In Amendment No. 1, the Exchange proposed to improve the clarity of the proposal and elaborate on the Exchange's statement on burden on competition. *See* Letter from Martha Redding, Associate General Counsel, NYSE, to Brent J. Fields, Secretary, Commission (Jul. 9, 2018), *available at https://www.sec.gov/comments/sr-nyse-2018-31/nyse201831-4016966-167312.pdf.*

[4] *See* Securities Exchange Act Release No. 83601 (Jul. 6, 2018), 83 FR 32172 (Jul. 11, 2018) (''Notice'').

[5] The securities and futures exchanges have procedures for coordinated cross-market trading halts if a severe market price decline reaches levels that may exhaust market liquidity. These procedures, known as market-wide circuit breakers, may halt trading temporarily or, under extreme circumstances, close the markets before the normal close of the trading session. Market-wide circuit breakers provide for cross-market trading halts during a severe market decline as measured by a single-day decrease in the S&P 500 Index. A cross-market trading halt can be triggered at three circuit-breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). These triggers are set by the markets at levels that are calculated daily based on the prior day's closing price of the S&P 500 Index.

[6] *See, e.g., https://www.nyse.com/publicdocs/ctaplan/notifications/trader-update/CTS_CQS%202018_Failover%20Testing_Q1.pdf; https://www.nasdaqtrader.com/TraderNews.aspx?id=utp2017-15.*

[7] The CTA/CQ Plans govern the collection, consolidation, processing, and dissemination of last sale and quotation information for Network A and Network B securities. Network A refers to securities listed on NYSE and Network B refers to securities listed on exchanges other than the Nasdaq Stock Market LLC (''Nasdaq'').

[8] The Joint Self-Regulatory Organization Plan Governing the Collection, Consolidation and Dissemination of Quotation and Transaction Information for Nasdaq-Listed Securities Traded on Exchanges on an Unlisted Trading Privileges Basis (''Nasdaq/UTP Plan'') governs the collection, consolidation, processing, and dissemination of last sale and quotation information for Network C securities. Network C refers to securities listed on Nasdaq.

[9] Pursuant to NYSE Rule 80B (Trading Halts Due to Extraordinary Market Volatility), a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day's closing price of that index. Currently, the triggers are set at three circuit-breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline that triggers a Level 1 or Level 2 circuit breaker after 9:30 a.m. ET and before 3:25 p.m. ET would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. ET would not halt market-wide trading. A market decline that triggers a Level 3 circuit breaker, at any time during the trading day, would halt market-wide trading for the remainder of the trading day.

[10] In 2015, the Exchange adopted rules to require certain member organizations to participate in testing of the operation of the Exchange's business continuity and disaster recovery plans in connection with Regulation Systems Compliance and Integrity (''Regulation SCI''). Paragraph (b)(1) of Rule 49 establishes standards for the designation by the Exchange of member organizations that are necessary to participate in business continuity and disaster recovery plans testing pursuant to Regulation SCI. *See* Securities Exchange Act Release No. 76346 (Nov. 4, 2015), 80 FR 69765 (Nov. 10, 2015). The Exchange believes that, because member organizations required to participate in Regulation SCI testing have already been identified as essential for the maintenance of a fair and orderly market, these same member organizations should also be required to participate in scheduled MWCB testing. *See* Notice, *supra* note 4, 83 FR at 32173.

[11] The Exchange states that the annual Regulation SCI test is currently conducted in October of each calendar year and that it provides at least (3) months advance notice to member organizations that are required to participate in such SCI testing (''SCI Notice'').

[12] The Exchange states that member organizations were notified in April 2018 of their required participation in the Regulation SCI testing scheduled for October 13, 2018. The Exchange notes that, while it encourages all member organizations to participate in MWCB testing voluntarily, implementing the new rule in 2019 would provide member organizations with sufficient time to prepare for a scheduled MWCB test. *See* Notice, *supra* note 4, 83 FR at 32173 n. 8.

[13] *See supra,* note 6 and accompanying text.

III. Discussion and Commission's Findings

After careful review, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[14] In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(5) of the Act,[15] which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and that the rules not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Commission also finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(8) of the Act,[16] which requires that the rules of an exchange not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. As indicated above, the Commission has received no comment letters addressing the proposed rule change.

The Commission believes that amending NYSE Rule 49 to require certain member organizations to participate in scheduled MWCB testing would enable the Exchange, participating member organizations, and others to assess the readiness of participating member organizations to respond in the event of unanticipated market volatility. Member organizations required to participate in MWCB testing pursuant to the proposal would be designated as such using the same standards used by the Exchange in determining which member organizations are subject to mandatory Regulation SCI testing. Because these member organizations have been designated by the Exchange as essential to the maintenance of a fair and orderly market, their demonstrated ability to halt and subsequently re-open trading in a manner consistent with the MWCB rules should contribute to the fairness and orderliness of the market for the benefit of all market participants. The Commission therefore believes that the proposal, as modified by Amendment No. 1, is designed to remove impediments to, and perfect the mechanism of, a free and open market and a national market system, and to protect investors and the public interest.

Accordingly, for the reasons discussed above, the Commission believes that the Exchange's proposal, as modified by Amendment No. 1, is consistent with the Act.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[17] that the proposed rule change (SR–NYSE–2018–31), as modified by Amendment No.1, be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83832; File No. SR–ICC–2018–006]

Self-Regulatory Organizations; ICE Clear Credit LLC; Order Approving Proposed Rule Change Relating To Amending the ICC Clearing Rules Regarding Mark-to-Market Margin

August 13, 2018.

I. Introduction

On June 13, 2018, ICE Clear Credit LLC (''ICC'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the ICC Clearing Rules (the ''ICC Rules'') [3] to more clearly characterize Mark-to-Market Margin payments as settled-to-market rather than collateralized-to-market. The proposed rule change was published in the **Federal Register** on June 29, 2018.[4] The Commission has not received any comments on the proposed rule change. For the reasons discussed below, the Commission is approving the proposed rule change.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *Available at https://www.theice.com/publicdocs/clear_credit/ICE_Clear_Credit_Rules.pdf.* Capitalized terms used herein but not otherwise defined have the meaning set forth in the ICC Rules.

II. Description of the Proposed Rule Change

The proposed rule change would revise Chapters 4, 8, and 20 of the ICC Rules to more clearly characterize Mark-to-Market Margin payments as settlement payments (''settled-to-market'') rather than collateral (''collateralized-to-market'').[5] The proposed rule change would not change the manner in which Mark-to-Market Margin is calculated, or other current ICC operational practices.[6] Rather, the proposed rule change would revise terminology to further clarify the legal characterization that payments of Mark-to-Market Margin represent settlement rather than collateral payments.[7] ICC states that these clarifying changes are the result of ICC's analysis of the legal characterization of Mark-to-Market Margin payments, at the request of its Clearing Participants (''CPs'').[8]

The proposed rule change would revise Rule 401 to reference Mark-to-Market Margin Balance, a new term that is defined in Rule 404 to mean the aggregate amount of Mark-to-Market Margin paid or received.[9] The new definition would be used in several calculations to describe specifics pertaining to the Mark-to-Market Margin calculation.[10] For example, the proposed rule change would amend Rule 401(a), which governs House Margin, to state that ICC calculates a net amount of Mark-to-Market Margin by subtracting a CP's Mark-to-Market Margin Balance from a CP's Mark-to-Market Margin Requirement.[11] The proposed rule change would make corresponding changes to reference

[4] Securities Exchange Act Release No. 34–83513 (June 25, 2018), 83 FR 30802 (June 29, 2018) (SR–ICC–2018–006) (''Notice'').

[5] Under the settled-to-market model, the transfer of Mark-to-Market Margin constitutes a settlement of the contract's outstanding exposure, with the receiving party taking outright title to the Mark-to-Market Margin and the transferring party retaining no rights to such margin. Under the collateralized-to-market model, the transfer of Mark-to-Market Margin constitutes a pledge of collateral, such that the transferring party has a right to reclaim the collateral and the receiving party has an obligation to return the collateral. For further explanation of the settled-to-market model and collateralized-to-market model, *see* Notice, 83 FR at 30803.

[6] Notice, 83 FR at 30803.

[11] Notice, 83 FR at 30803.

Mark-to-Market Margin Balance in Rule 401(b)(ii), which covers Client-Related Mark-to-Market Margin.[12]

As stated above, the proposed rule change would not modify the current calculation of Mark-to-Market Margin, or other operational practices, but, instead, would replace certain specifics relating to ICC's Mark-to-Market Margin calculation with the new defined term Mark-to-Market Margin Balance.[13] In addition, the proposed rule change would not change the manner in which Initial Margin is calculated, posted and held.[14]

Further, the proposed rule change would revise Rule 401(g) to specify that amounts ICC currently pays to CPs as interest on any Mark-to-Market Margin would no longer be considered interest but instead would be treated as a new payment obligation between ICC and CPs and referred to as the ''price alignment amount.'' [15] A price alignment amount would be economically equivalent to the ''interest'' that ICC pays or charges a CP for any net Mark-to-Market Margin transferred between the parties under current Rule 401(g).[16] Because the term interest may be more typically associated with collateral, however, the proposed rule change would refer to such an amount as price alignment to avoid confusion over the proper characterization of Mark-to-Market Margin as settlement payments.[17] ICC states that such change would not affect ICC's operations because ICC would continue to pay or charge a CP an amount, which would serve the same purpose and would be calculated identically, for any net Mark-to-Market Margin transferred between the parties.[18]

The proposed rule change would also clarify in proposed revisions to Rule 401(g) that the rate ICC may pay or charge a CP for a price alignment amount on any Mark-to-Market Margin or interest on any Initial Margin in the form of cash may be negative. This proposed revision is intended by ICC to more clearly address the effect negative market rate environments could have on how such amounts might be paid or charged by ICC to CPs.[19]

The proposed rule change would add and clarify references to amounts that ICC will continue to treat as collateral to avoid confusion over the proper characterization of Mark-to-Market Margin under the ICC Rules. Specifically, the proposed rule change would update Rule 401(h) to provide that CPs may substitute, in accordance with the ICC Procedures and applicable law, Eligible Margin only for an amount of Initial Margin.[20] CPs would no longer be able to substitute Eligible Margin for Mark-to-Market Margin because under the proposed rule change, ICC would take outright title to the Mark-to-Market Margin and CPs would retain no substitution or other rights to such Mark-to-Market Margin. The proposed changes to Rule 402, which governs ICC's rights with respect to the use of margin, would exclude Mark-to-Market Margin from subsections (a) and (b), would remove details relating to Mark-to-Market Margin from subsection (b), and would specify subsection (c)'s applicability to Initial Margin. Because ICC's rights with respect to Mark-to-Market Margin would now be set out in Rule 402(e), it would no longer be necessary to refer to Mark-to-Market Margin in Rule 402(a) and (b). To avoid uncertainty, the proposed rule change would clarify that the requirements set forth in Rule 406(c) regarding collateral for Client-Related Positions apply to Initial Margin.[21]

The proposed rule change would similarly add and clarify references to amounts that ICC would treat as settled to avoid confusion over the proper characterization of Mark-to-Market Margin under the ICC Rules. The proposed rule change would add language to Rule 402(e) to describe ICC's rights with respect to Mark-to-Market Margin and more clearly state that Mark-to-Market Margin payments constitute a settlement. The proposed rule change would also update Rule 401(l) to refer to settlement finality in relation to Mark-to-Market Margin.[22] Further, the proposed rule change would add new subsection (c) to Rule 404 to define Mark-to-Market Margin Balance as a sum equal to the Mark-to-Market Margin value transferred by the CP to ICC minus the Mark-to-Market Margin value transferred by ICC to the CP.[23]

Finally, the proposed rule change would make clarifications and conforming changes to Chapters 8 and 20 of the ICC Rules. The proposed rule change would revise Rule 801(a)(i), which describes how ICC calculates a CP's Required Contribution to the General Guaranty Fund, to refer to the transfer of Mark-to-Market Margin.[24] This change would characterize Mark-to-Market Margin as settled, rather than collateral, by referring to the amount of Mark-to-Market Margin transferred to ICC in respect of a defaulting CP's positions. The proposed rule change would not change ICC's calculation of a CP's Required Contribution, which would continue to take into account the expected loss to ICC associated with a CP's default after the application of Initial Margin and Mark-to-Market Margin.[25]

The proposed rule change would also replace, in the defined term MTM in Rule 808, the phrase ''amount of MTM held by any Participant or ICE Clear Credit'' with a conforming reference to the new defined term Mark-to-Market Margin Balance.[26] This proposed change would not alter the operation of Rule 808, which describes how and when ICC would implement Reduced Gains Distributions.

The proposed rule change would replace terminology in Rule 810(e) that is commonly used in conjunction with collateral by changing the words ''posted'' to ''transferred'' and removing the phrase ''and be offset against''. This change would avoid confusion over the proper characterization of Mark-to-Market Margin as settlement payments.[27] This proposed change would not alter the operation of Rule 810, which describes ICC's termination of clearing operations.

Finally, the proposed rule change would clarify in Rule 20–605(c)(i)(B), which specifies the resources to be used to cover losses with respect to Client-Related Positions, that ICC would use the defaulting CP's Client-Related Mark-to-Market Margin, to the extent not previously applied to pay Mark-to-Market Margin to other CPs.[28] Because Mark-to-Market Margin would be settled with ICC, ICC would obtain outright title to the Mark-to-Market Margin and would be able to use the Mark-to-Market Margin for purposes other than collateralizing a CP's position, in accordance with ICC's Rules and applicable regulatory requirements. The proposed rule change would make this point clear and therefore clarify that Mark-to-Market Margin payments constitute settlement rather than collateral.

III. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to such organization.[29] For the reasons given below, the Commission finds that the proposal is consistent with Section 17A(b)(3)(F) of the Act [30] and Rules 17Ad–22(b)(2) and 17Ad–22(d)(1) thereunder.[31]

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, among other things, that the rules of ICC be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions, as well as to assure the safeguarding of securities and funds which are in the custody or control of ICC or for which it is responsible, and, in general, to protect investors and the public interest.[32]

As described above, the proposed rule change would revise Chapters 4, 8, and 20 of the ICC Rules to more clearly characterize Mark-to-Market Margin payments as settlement payments rather than collateral. To facilitate this characterization, the proposed rule change would introduce a new definition, Mark-to-Market Margin Balance, and a new concept, price alignment amount. Moreover, the proposed rule change would update the terminology used in certain rules, and the application of certain rules to Mark-to-Market Margin, in light of the characterization of Mark-to-Market Margin payments as settlement payments rather than collateral. The proposed rule change would not change the manner in which Mark-to-Market Margin is calculated, or other current ICC operational practices.

The Commission believes that by clarifying the treatment of Mark-to-Market Margin payments, the proposed rule change would help ensure that Mark-to-Market margin is treated as settled payments rather than collateral, consistent with ICC's intention. In doing so, the Commission further believes the proposed rule change would clarify that ICC has all rights and outright title to such Mark-to-Market Margin. The Commission believes the proposed rule change would clarify ICC's interest in and rights to Mark-to-Market Margin, thereby supporting ICC's ability to use Mark-to-Market Margin to cover credit and market losses.

The Commission further believes that in this regard the proposed rule change would remove potential confusion regarding the treatment of Mark-to-Market Margin, thereby helping to improve the operation and effectiveness of ICC's margin system. Given that an effective margin system is necessary to manage ICC's credit exposures to its CPs and the risks associated with clearing security based swap-related portfolios, the Commission believes that the proposed rule change would help improve ICC's ability to avoid the losses that could result from the mismanagement of credit exposures and the risks associated with clearing security based swap-related portfolios. Because such losses could disrupt ICC's ability to promptly and accurately clear security based swap transactions, the Commission believes that the proposed rule change, by improving the operation and effectiveness of ICC's margin system, would thereby help promote the prompt and accurate clearance and settlement of securities transactions.

Similarly, given that mismanagement of ICC's credit exposures to its CPs and the risks associated with clearing security based swap-related portfolios could cause ICC to realize losses on such portfolios and threaten ICC's ability to operate, thereby threatening access to securities and funds in ICC's control, the Commission believes that the proposed rule change would help assure the safeguarding of securities and funds which are in the custody or control of the ICC or for which it is responsible. Finally, for both of these reasons, the Commission believes the Framework would, in general, protect investors and the public interest.

Therefore, the Commission finds that the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions, assure the safeguarding of securities and funds in ICC's custody and control, and, in general, protect investors and the public interest, consistent with the Section 17A(b)(3)(F) of the Act.[33]

B. Consistency With Rule 17Ad–22(b)(2)

Rule 17Ad–22(b)(2) requires that ICC establish, implement, maintain and enforce written policies and procedures reasonably designed to use margin requirements to limit its credit exposures to participants under normal market conditions and use risk-based models and parameters to set margin requirements and review such margin requirements and the related risk-based models and parameters at least monthly.[34]

As described above, the proposed rule change would revise Chapters 4, 8, and 20 of the ICC Rules to more clearly characterize Mark-to-Market Margin payments as settlement payments rather than collateral. Specifically, the Proposed Rule Change would revise Rule 401 to reference Mark-to-Market Margin Balance, a new term that is defined in Rule 404 to mean the aggregate amount of Mark-to-Market Margin paid or received. The new definition would be used in Rule 401(a), regarding House Margin, which would be revised to state that ICC calculates a net amount of Mark-to-Market Margin by subtracting a CP's Mark-to-Market Margin Balance from a CP's Mark-to-Market Margin Requirement. Moreover, under the proposed revised Rule 401(g), ICC would pay or charge a CP price alignment, which would be economically equivalent to interest, on any Mark-to-Market Margin and interest on any cash Initial Margin at a rate that may be negative. The proposed rule change would not modify the current calculation of Mark-to-Market Margin, or other operational practices, but, instead, would replace certain specifics relating to ICC's Mark-to-Market Margin calculation with the new defined term Mark-to-Market Margin Balance.

The Commission believes that by clarifying the treatment of Mark-to-Market Margin payments, the proposed rule change would help ensure that Mark-to-Market margin is treated as settled payments rather than collateral. The Commission believes that in this regard the proposed rule change would help ensure that the margin system is operating consistently for all CPs and in a manner that is consistent with ICC's view on the treatment of Mark-to-Market Margin by confirming that all Mark-to-Market Margin would be treated as settlement payments. In doing so, the Commission further believes the proposed rule change would clarify that ICC has all rights and outright title to such Mark-to-Market Margin. The Commission believes the proposed rule change would thereby clarify ICC's interest in and rights to Mark-to-Market Margin, thereby supporting ICC's ability to use Mark-to-Market to cover credit and market losses. The Commission therefore believes the proposed rule change would help ICC maintain and

[29] 15 U.S.C. 78s(b)(2)(C).

[30] 15 U.S.C. 78q–1(b)(3)(F).

[31] 17 CFR 240.17Ad–22(b)(2), (d)(1).

[32] 15 U.S.C. 78q–1(b)(3)(F).

[33] 15 U.S.C. 78q–1(b)(3)(F).

[34] 17 CFR 240.17Ad–22(b)(2).

enforce written policies and procedures reasonably designed to use margin requirements to limit its credit exposures to participants under normal market conditions.

Moreover, as noted above, the proposed rule change resulted from a request by CPs for ICC to confirm it treats Mark-to-Market Margin as settlement payments. CPs therefore may hesitate to post Mark-to-Market Margin if ICC does not consistently treat such margin as settlement payments. Thus, the Commission believes the proposed rule change would help ICC enforce written policies and procedures reasonably designed to use margin requirements to limit its credit exposures to participants under normal market conditions.

Therefore, for the above reasons the Commission finds that the proposed rule change is consistent with Rule 17Ad–22(b)(2).[35]

C. Consistency With Rule 17Ad–22(d)(1)

Rule 17Ad–22(d)(1) requires that ICC establish, implement, maintain and enforce written policies and procedures reasonably designed to provide for a well-founded, transparent, and enforceable legal framework for each aspect of its activities in all relevant jurisdictions.[36]

As discussed above, the proposed rule change would revise Chapters 4, 8, and 20 of the ICC Rules to more clearly characterize Mark-to-Market Margin payments as settlement payments rather than collateral. The proposed rule change would also revise terminology to further clarify the legal characterization that payments of Mark-to-Market Margin represent settlement rather than collateral payments. These clarifying changes are the result of ICC's analysis of the legal characterization of Mark-to-Market Margin payments, at the request of its CPs.

Thus, ICC intends to treat Mark-to-Market Margin payments as settled rather than collateral, and the Commission believes that the proposed rule change's clarifications and additions would help ensure that ICC's margin system operates consistently with this intention. The Commission further believes that the proposed rule change would help ensure that the margin system is operating consistently for all CPs by confirming that all Mark-to-Market Margin would be treated as settlement payments. In ensuring the consistent treatment of Mark-to-Market Margin, the Commission believes that the proposed rule change would help ensure that the policies and procedures underlying ICC's margin system provide a well-founded, transparent, and enforceable legal framework.

Therefore, for the above reasons the Commission finds that the proposed rule change is consistent with Rule 17Ad–22(d)(1).[37]

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposal is consistent with the requirements of the Act, and in particular, with the requirements of Section 17A(b)(3)(F) of the Act[38] and Rules 17Ad–22(b)(2) and 17Ad–22(d)(1) thereunder.[39]

It is therefore ordered pursuant to Section 19(b)(2) of the Act[40] that the proposed rule change (SR–ICC–2018–006) be, and hereby is, approved.[41]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[42]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83833; File No. SR–BX–2018–037]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Section 7018(a) of the Exchange's Rules

August 13, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 31, 2018, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's transaction fees at Rule 7018(a), as described further below.

While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on August 1, 2018.

The text of the proposed rule change is available on the Exchange's website at *http://nasdaqbx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's transaction fees at Rule 7018 to (i) adjust the volume threshold for a credit associated with orders that access liquidity that are entered by members that access liquidity equal to or in excess of a certain percentage of their [sic] total Consolidated Volume[3] for a month; and (ii) adding two credit tiers for orders entered by members that, during a given month, have a total volume (accessing and providing liquidity) equal to or exceeding 0.50% of total Consolidated Volume, at least 20% more volume during that month (as a percentage of Consolidated Volume) than the member's total volume in July 2018, and where at least 30% of that 20% increase in volume arises from adding liquidity.

[3] Pursuant to Rule 7018(a), the term ''Consolidated Volume'' means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot.

First Change

The Exchange operates on the ''taker-maker'' model, whereby it pays credits to members that take liquidity and charges fees to members that provide liquidity. Currently, the Exchange offers several different credits for orders that access liquidity on the Exchange. Among these credits, the Exchange pays a credit of $0.0015 per share executed for an order that accesses liquidity (excluding orders with Midpoint pegging and excluding orders that receive price improvement and execute against an order with a Non-displayed price) entered by a member that accesses liquidity equal to or exceeding 0.075% of total Consolidated Volume during a month. The Exchange proposes to decrease the Consolidated Volume threshold applicable to this credit to 0.065% of total Consolidated Volume during a month. The Exchange recently had increased this threshold to 0.075%,[4] but it has since determined that this level is too high. It now proposes to recalibrate the threshold downward to make it easier for firms to reach the Consolidated Volume threshold necessary to qualify for the credit.

Second Change

The Exchange presently offers several credits for members whose orders remove liquidity from the Exchange. Among these credits, the Exchange offers a $0.0018 per share executed credit for orders that access liquidity in securities in Tapes A and C (excluding orders with Midpoint pegging and excluding orders that receive price improvement and execute against an order with a Non-displayed price) that are entered by a member that: (i) Accesses liquidity equal to or exceeding 0.20% of total Consolidated Volume during a month; and (ii) accesses 20% more liquidity as a percentage of Consolidated Volume than the member accessed in May 2018. The Exchange also offers a $0.0019 per share executed credit for orders that access liquidity in securities in Tape B (excluding orders with Midpoint pegging and excluding orders that receive price improvement and execute against an order with a Non-displayed price) that are entered by a member that: (i) Accesses liquidity equal to or exceeding 0.20% of total Consolidated Volume during a month; and (ii) accesses 20% more liquidity as a percentage of Consolidated Volume than the member accessed in May 2018.

The Exchange now plans to add two new tiers that will also entitle members to receive credits of $0.0018 and $0.0019 per share executed. The first of these new tiers will offer a member a $0.0018 per share executed credit for its orders that access liquidity in securities in Tapes A and C (excluding orders with Midpoint pegging and excluding orders that receive price improvement and execute against an order with a Non-displayed price) to the extent that the member, during a given month: (i) Has a total volume (including both providing and accessing liquidity) that is equal to or exceeds 0.20% [sic] of total Consolidated Volume during that month; (ii) has a total volume that is at least 20% greater (as a percentage of Consolidated Volume) than its total volume in July 2018; and (iii) of the 20% or more increase in total volume described above, at least 30% is attributable to adding liquidity. The second tier will offer a member a $0.0019 per share executed credit for orders that access liquidity in securities in Tape B (excluding orders with Midpoint pegging and excluding orders that receive price improvement and execute against an order with a Non-displayed price) to members that satisfy these same three conditions.

An example of how these two new credits will work is as follows. Firm X adds and removes 0.60% of total Consolidated Volume in securities in Tape A in July 2018. In August 2018, Firm X adds and removes 0.72% of total Consolidated Volume in securities in the same Tape. The increase in total volume as a percentage of total Consolidated Volume from July to August is 0.12%—which is an increase of approximately [sic] 20%. If at least 30% of that 0.12% increase (0.036%) is attributable to Firm X adding liquidity, then Firm X will qualify for a $0.0018 per share executed credit for its orders that access liquidity in securities in Tape A (excluding orders with Midpoint pegging and excluding orders that receive price improvement and execute against an order with a Non-displayed price).

The Exchange proposes to add these credits to provide new and stronger incentive for members to increase their total volume of activity on the Exchange, provided that at least a certain percentage of that increase in total volume arises from adding liquidity. The Exchange also proposes a higher credit for increasing volume in Tape B than it does in Tapes A or C to specifically target Tape B securities, where the Exchange has seen less activity than it has in Tape A and C securities.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[5] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[6] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [7]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* [8] (''NetCoalition'') the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[9] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [10]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [11] Although the court

and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

First Change

The Exchange believes that it is reasonable to decrease the Consolidated Volume threshold on its credit for orders that access liquidity (excluding orders with Midpoint pegging and excluding orders that receive price improvement and execute against an order with Midpoint pegging [sic]) entered by members that access liquidity equal to or exceeding 0.075% of total Consolidated Volume during a month. The Exchange must, from time to time, assess the effectiveness of its credits in achieving their intended objectives and adjust the levels of such credits based on the Exchange's observations of market participant behavior. In this instance, the Exchange recently had increased the Consolidated Volume threshold to provide a stronger incentive to market participants to improve the market, but the Exchange has since determined that this increase was too high and that the threshold needs to be recalibrated downward to 0.065% to ensure that firms can continue to qualify for the credit. The Exchange believes that the proposed decrease is equitable and is not unfairly discriminatory because it will apply to all similarly situated member firms.

Second Change

Likewise, the Exchange believes that its proposal is reasonable to add new credits for orders that access liquidity (excluding orders with Midpoint pegging and those that receive price improvement and execute against an order with a non-displayed price) that are entered by members that, in a given month, remove and access [sic] liquidity equal to or in excess of 0.50% of Consolidated Volume during the month, have a total volume (as a percentage of Consolidated Volume) that is 20% greater than it was in July 2018, and where at least 30% of the 20% increase in total volume (as a percentage of Consolidated Volume) arises from adding liquidity. This proposal is reasonable because it will provide new and stronger incentive for members to improve the market by both adding and removing liquidity from the Exchange. It will also incent them to increase the extent of this activity on the Exchange relative to their activity levels as of July 2018. The Exchange believes it is reasonable, equitable, and not unfairly discriminatory to propose a higher credit to members that increase volume in securities in Tape B than those that do so in securities in Tapes A and C because the Exchange has experienced less activity in Tape B securities relative to Tapes A and C securities and it wishes to specifically target increased activity with respect to Tape B securities. The Exchange also believes that these proposals are equitable and not unfairly discriminatory because they will apply to all similarly situated member firms.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and credits to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees and credits in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee or credit changes in this market may impose any burden on competition is extremely limited.

In this instance, the Exchange's proposals to add to or modify its credits do not impose a burden on competition because these proposals are reflective of the Exchange's overall efforts to provide greater incentives to market participants that it believes will improve the market, to the benefit of all participants. The Exchange does not believe that any of the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets. Moreover, because there are numerous competitive alternatives to the use of the Exchange, it is likely that BX will lose market share as a result of the changes if they are unattractive to market participants.

Likewise, the Exchange's proposed credits and credit amendments do not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition both from other exchanges and from off-exchange venues. Again, if the proposed credits are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposal will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[12]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2018–037 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2018–037. This file number should be included on the subject line if email is used. To help the Commission process and review your

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83830; File No. SR–ISE–2018–66]

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Schedule of Fees Relating to Crossing Orders and Responses to Crossing Orders in Index Options on the Nasdaq 100 Reduced Value Index

August 13, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 1, 2018, Nasdaq ISE, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's Schedule of Fees to provide further explanation on how the Exchange charges Crossing Orders and Responses to Crossing Orders in index options on the Nasdaq 100 Reduced Value Index (''NQX'').

The text of the proposed rule change is available on the Exchange's website at *http://ise.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange recently adopted transaction fees and rebates for adding or removing liquidity from ISE (*i.e.,* maker/taker fees and rebates) in NQX options, which apply to executions in both the regular and complex order book, according to the following schedule: [3]

Market participant	Maker fee/rebate	Taker fee/rebate
Market Maker	($0.25)	$0.00
Market Maker (for orders sent by Electronic Access Members)	(0.25)	0.00
Non-Nasdaq ISE Market Maker (FarMM)	0.25	0.25
Firm Proprietary/Broker-Dealer	0.25	0.25
Professional Customer	0.25	0.25
Priority Customer	0.00	0.00

In SR–ISE–2018–61, the Exchange stated that the above pricing would apply to all executions in NQX, including Non-Priority Customer [4] Crossing Orders [5] in NQX. The Exchange now proposes to clarify that the taker fee applies to Crossing Orders (*i.e.,* both the originating and contra side of the order) in NQX as well as responses to such orders by noting the following in Section III.B: ''Fee will also apply to the originating and contra side of Crossing Orders, and to Responses to Crossing Orders.'' [6]

The Exchange does not seek to amend the manner in which Crossing Orders in NQX and responses thereto are currently charged, rather the Exchange

[13] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 83639 (July 16, 2018) (SR–ISE–2018–61).

[4] ''Non-Priority Customers'' include Market Makers, Non-Nasdaq ISE Market Makers, Firm Proprietary/Broker-Dealers, and Professional Customers.

[5] A ''Crossing Order'' is an order executed in the Exchange's Facilitation Mechanism, Solicited Order Mechanism, Price Improvement Mechanism (PIM) or submitted as a Qualified Contingent Cross order. For purposes of the fee schedule, orders executed in the Block Order Mechanism are also considered Crossing Orders.

[6] ''Responses to Crossing Order'' is any contra-side interest submitted after the commencement of an auction in the Exchange's Facilitation Mechanism, Solicited Order Mechanism, Block Order Mechanism or PIM.

seeks to more clearly state in its Schedule of Fees that taker pricing applies for such orders. While the Exchange is not aware of any member confusion with respect to this fee, the Exchange believes this specificity will help preclude any potential confusion in how its fees will apply.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[8] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed language relating to the application of taker fees to Crossing Orders and Responses to Crossing Orders in NQX is reasonable because the proposed rule text will bring greater transparency to the manner in which the Exchange charges NQX orders submitted in ISE's various crossing mechanisms. As discussed above, the Exchange charges members the applicable taker fee to both the originating and contra side of Crossing Orders in NQX as well charging the NQX taker pricing for Responses to Crossing Orders. The Exchange believes it is reasonable and appropriate to charge taker and not maker pricing for these orders because the Exchange seeks to encourage market making activity in NQX by providing the $0.25 per contract maker rebate to Market Maker orders that post liquidity in the Exchange's new proprietary product during the initial months of trading. Furthermore, the manner in which the Exchange applies the NQX taker fees in Section III.B is not changing with this proposal, and the proposed changes are intended to bring greater clarity to ISE's Schedule of Fees, to the benefit of all market participants.

The Exchange's proposal to add the clarifying language is also equitable and not unfairly discriminatory because the Exchange will continue to apply the taker fees for Crossing Orders and Responses to Crossing Orders in NQX in a uniform manner for all similarly situated participants. The Exchange also believes that it is equitable and not unfairly discriminatory to assess no taker fees to Market Maker Crossing Orders and Responses to Crossing Orders in NQX as compared to other Non-Priority Customers, who are currently assessed the $0.25 per contract taker fee for such orders. Market Makers, unlike other market participants, take on a number of obligations, including quoting obligations, that other market participants do not have. Further, the Exchange believes that it is equitable and not unfairly discriminatory to assess no transaction fees to Priority Customer[9] Crossing Orders and Responses to Crossing Orders in NQX because Priority Customer order flow enhances liquidity on the Exchange for the benefit of all market participants. Priority Customer liquidity provides more trading opportunities, which attracts Market Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the proposal is intended to eliminate ambiguity from the Schedule of Fees by further explaining how ISE charges the originating and contra side of Crossing Orders in NQX as well as Responses to Crossing Orders in NQX. The proposal does not amend the current manner in which the Exchange assesses fees for Crossing Orders and Responses to Crossing Orders in NQX, and the Exchange will continue to assess the applicable taker fees in Section III.B for such NQX orders in a uniform manner to all market participants. For the foregoing reasons, the Exchange believes that the proposed changes do not impose an undue burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(4) and (5).

[9] A ''Priority Customer'' is a person or entity that is not a broker/dealer in securities, and does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s), as defined in Nasdaq ISE Rule 100(a)(37A).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act[10] and Rule 19b–4(f)(2)[11] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ISE–2018–66 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISE–2018–66. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83835; File No. SR–PEARL–2018–15]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to the Exchange Rule 514 Priority on the Exchange

August 13, 2018.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 1, 2018, MIAX PEARL, LLC (''MIAX PEARL'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rule 514, Priority on the Exchange.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/pearl* at MIAX PEARL's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 514, Priority on the Exchange. Specifically, the Exchange proposes to amend subsection (c), Self-Trade Protection, to broaden the protection afforded under the current rule by giving Members[3] the option to have this protection apply at the market participant identifier (''MPID'')[4] level (*i.e.,* currently existing functionality), or at the firm level. The Exchange believes that this enhancement will provide helpful flexibility for market making firms that wish to prevent trading against all orders entered by their firm under any MPID, instead of just those entered under the same MPID.

Currently, the rule prevents orders entered by a Market Maker[5] via the MEO Interface[6] or the FIX Interface[7] using the same MPID from executing against orders entered on the opposite side of the market by the same Market Maker using the same MPID via the MEO Interface or the FIX Interface.[8] In such a case, the System[9] will cancel the oldest of the orders back to the entering party prior to execution.

Members of the Exchange may either be Market Makers or Electronic Exchange Members.[10] Each Market Maker and Electronic Exchange Member is assigned an MPID by the Exchange for identification purposes. A Member may have multiple Market Maker MPIDs on the Exchange, therefore the possibility exists that a Member may cross its own Market Maker's orders.[11]

The Exchange now proposes to allow members to choose to have this protection applied at either the MPID level, as currently implemented, or at the member firm level. If members choose to have this protection applied at the member firm level, the System will prohibit orders entered from different MPIDs within the Member's firm from trading against one another. The Exchange believes that the proposed enhancement will provide Members with more tailored self-trade functionality that will allow Members to manage their trading as appropriate based on the Member's business needs. While the Exchange believes that some firms will want to restrict trading interest from the same MPID, (as currently implemented), the Exchange believes that other firms will find it helpful to apply self-trade protection across all MPIDs of the same firm.

The Exchange note that similar functionality also exists on the Nasdaq Stock Market (''NASDAQ'') which prevents self-trades by MPID, or alternatively, if selected by the member, self-trade protection for all MPIDs of the firm.[12] Cboe BZX Exchange (''CboeBZX'') also has a similar rule in place which provides members the ability to apply Match Trade Prevention (''MTP'') modifiers (CboeBZX's version

[12] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The term ''Member'' means an individual or organization that is registered with the Exchange pursuant to Chapter II of MIAX PEARL Rules for purposes of trading on the Exchange as an ''Electronic Exchange Member'' or ''Market Maker.'' Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[4] The term ''MPID'' means unique market participant identifier. *See* Exchange Rule 100.

[5] The term ''Market Maker'' or ''MM'' means a Member registered with the Exchange for the purpose of making markets in options contracts traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of the MIAX PEARL Rules. *See* Exchange Rule 100.

[6] The term ''MEO Interface'' means a binary order interface used for submitting certain order types (as set forth in Rule 516) to the MIAX PEARL System. *See* Exchange Rule 100.

[7] The term ''FIX Interface'' means the Financial Information Exchange interface used for submitting certain order types (as set forth in Rule 516) to the MIAX PEARL System. *See* Exchange Rule 100.

[8] *See* Exchange Rule 514(c)(1).

[9] The term ''System'' means the automated trading system used by the Exchange for the trading of securities. *See* Exchange Rule 100.

[10] The term ''Electronic Exchange Member'' or ''EEM'' means the holder of a Trading Permit who is a Member representing as agent Public Customer Orders or Non-Customer Orders on the Exchange and those non-Market Maker Members conducting proprietary trading. Electronic Exchange Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[11] The Exchange notes that if requested by an EEM, orders entered by an EEM via the MEO Interface using the same MPID will not be executed against orders entered on the opposite side of the market by the same EEM using the same MPID via the MEO Interface. In such a case, the System will cancel the oldest of the orders back to the entering party prior to execution. *See* Exchange Rule 514(c)(2).

[12] *See* Nasdaq Stock Market Rule, Chapter VI, Sec. 18(c)(1).

of self-trade protection) based on MPID, Exchange Member, trading group, or Exchange Sponsored Participant identifiers.[13]

The Exchange will announce the implementation date of this functionality via a Regulatory Circular prior to the functionality being available on the Exchange.

2. Statutory Basis

MIAX PEARL believes that its proposed rule changes are consistent with Section 6(b) of the Act[14] in general, and furthers the objectives of Section 6(b)(5) of the Act[15] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes the proposed changes promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system by providing Market Makers with additional flexibility to configure self-trade protections offered by the Exchange. Currently, all Market Makers are provided functionality that prevents orders entered by a Market Maker via the MEO Interface or the FIX Interface using the same MPID from executing against orders entered on the opposite side of the market by the same Market Maker using the same MPID via the MEO Interface or the FIX Interface. While this functionality is helpful, some members would prefer not to trade with orders entered under different MPIDs of the same firm. Therefore, the Exchange is proposing to provide Exchange Members flexibility with respect to how self-trade protections are implemented. Members may continue to use the current functionality, while members who prefer to prevent self-trades across different MPIDs within the same firm will now be provided with functionality that allows them to do so.

Similar functionality exists on the Nasdaq Stock Market and CboeBZX[16] and the Exchange believes that the flexibility to apply self-trade protection at either the MPID or firm level would be useful to Members of MIAX PEARL. The Exchange also believes that the proposed rule change is designed to promote just and equitable principles of trade and will remove impediments to and perfect the mechanisms of a free and open market as it will enhance self-trade protections provided to MIAX PEARL Market Makers similar to those protections provided on other markets.

B. Self-Regulatory Organization's Statement on Burden on Competition

MIAX PEARL does not believe that the proposed rule change will impose any burden on intermarket or intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to enhance the Exchange's current self-trade protection, and will benefit members that wish to protect their orders from trading with orders from other Market Makers within the same firm, rather than the more limited MPID standard currently in use. The new functionality, which is similar to functionality already provided on CboeBZX, is also completely voluntary, and members that wish to use the current functionality may continue to do so. The Exchange does not believe that providing more flexibility to members will have any significant impact on competition. Conversely, the Exchange believes that the proposed rule change will foster competition as Market Makers may send more orders to the Exchange knowing that there is no chance that they will trade with their own orders on the other side of the market. This could result in more order flow and more liquidity on the Exchange.

The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition as self-trade protection is available to all Market Makers on the Exchange. Further, the Exchange does not believe that the proposed rule change will impose any burden on inter-market competition, and rather could potentially promote inter-market competition and result in more competitive order flow to the Exchange by more widely preventing Market Makers from trading with their own orders.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act[17] and Rule 19b–4(f)(6)[18] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–PEARL–2018–15 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–PEARL–2018–15. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the

[18] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–PEARL–2018–15 and should be submitted on or before September 7, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83831; File No. SR–CboeBYX–2018–014]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Make Permanent Rule 11.24, Which Sets Forth the Exchange's Pilot Retail Price Improvement Program

August 13, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 30, 2018, Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to make permanent Rule 11.24, which sets forth the Exchange's pilot Retail Price Improvement Program.

The text of the proposed rule change is available at the Exchange's website at *www.markets.cboe.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend Rule 11.24 to make permanent the Retail Price Improvement Program (the ''Program''), which is currently offered on a pilot basis. The Exchange has operated the pilot for a six year period and believes that it has been successful in its stated goal of providing price improvement opportunities to retail investors. The analysis conducted by the Exchange shows that retail investors have been provided a total of $4.5 million of price improvement during the 2.5 year period reviewed from January 2016 through June 2018. In addition, the Exchange's analysis shows that the Program has provided these benefits to retail investors without having an adverse impact on the broader market. The proposal provides an analysis of the economic benefits to retail investors and the marketplace flowing from operation of the Program, which the Exchange believes supports making the Program permanent.

Background

In November 2012, the Commission approved the Program on a pilot basis.[3] The Program is designed to attract retail order flow to the Exchange, and allow such order flow to receive potential price improvement. The Program is currently limited to trades occurring at prices equal to or greater than $1.00 per share.[4] Under the Program, a class of market participant called a Retail Member Organization (''RMO'') is eligible to submit certain retail order flow (''Retail Orders'') to the Exchange. Users[5] are permitted to provide potential price improvement for Retail Orders[6] in the form of non-displayed interest that is better than the national best bid that is a Protected Quotation (''Protected NBB'') or the national best offer that is a Protected Quotation (''Protected NBO'', and together with the Protected NBB, the ''Protected NBBO'').[7] The Program was approved by the Commission on a pilot basis running one-year from the date of implementation.[8] The Commission approved the Program on November 27, 2012.[9] The Exchange implemented the Program on January 11, 2013, and has extended the pilot period five times.[10]

[19] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 68303 (November 27, 2012), 77 FR 71652 (December 3, 2012) (''RPI Approval Order'') (SR–BYX–2012–019).

[4] The Exchange will periodically notify the membership regarding the securities included in the Program through an information circular.

[5] A ''User'' is defined in Rule 1.5(cc) as any member or sponsored participant of the Exchange who is authorized to obtain access to the System.

[6] A ''Retail Order'' is defined in Rule 11.24(a)(2) as an agency order that originates from a natural person and is submitted to the Exchange by a RMO, provided that no change is made to the terms of the order with respect to price or side of market and the order does not originate from a trading algorithm or any computerized methodology. *See* Rule 11.24(a)(2).

[7] The term Protected Quotation is defined in BYX Rule 1.5(t) and has the same meaning as is set forth in Regulation NMS Rule 600(b)(58). The terms Protected NBB and Protected NBO are defined in BYX Rule 1.5(s). The Protected NBB is the best-priced protected bid and the Protected NBO is the best-priced protected offer. Generally, the Protected NBB and Protected NBO and the national best bid (''NBB'') and national best offer (''NBO'', together with the NBB, the ''NBBO'') will be the same. However, a market center is not required to route to the NBB or NBO if that market center is subject to an exception under Regulation NMS Rule 611(b)(1) or if such NBB or NBO is otherwise not available for an automatic execution. In such case, the Protected NBB or Protected NBO would be the best-priced protected bid or offer to which a market center must route interest pursuant to Regulation NMS Rule 611.

The pilot period for the Program is scheduled to expire on July 31, 2018.[11] The Exchange believes that the Program has been successful in its goal of providing price improvement to Retail Orders, and is therefore proposing to amend Rule 11.24 to make this pilot permanent so that retail investors can continue to reap the benefits of the Program.[12]

The SEC approved the Program on a pilot basis, in part, because it concluded, ''the Program is reasonably designed to benefit retail investors by providing price improvement to retail order flow.'' [13] The Commission also found that ''while the Program would treat retail order flow differently from order flow submitted by other market participants, such segmentation would not be inconsistent with Section 6(b)(5) of the Act, which requires that the rules of an exchange are not designed to permit unfair discrimination.'' [14] As the SEC acknowledged, the retail order segmentation was designed to create greater retail order flow competition and thereby increase the amount of this flow to transparent and well-regulated exchanges. This would help to ensure that retail investors benefit from competitive price improvement that exchange-based liquidity providers provide. As discussed below, the Exchange believes that the Program data supports the conclusion that it provides valuable price [sic] to retail investors that they may not otherwise have received, and that it is therefore appropriate to make the Program permanent.

Definitions

The Exchange adopted the following definitions under Rule 11.24(a):

First, the term ''Retail Member Organization'' is defined as a Member (or a division thereof) that has been approved by the Exchange to submit Retail Orders.

Second, the term ''Retail Order'' is defined as an agency order or riskless principal that meets the criteria of FINRA Rule 5320.03 [15] that originates from a natural person and is submitted to the Exchange by a Retail Member Organization, provided that no change is made to the terms of the order with respect to price or side of market and the order does not originate from a trading algorithm or any other computerized methodology. A Retail Order is an Immediate or Cancel (''IOC'') Order and shall operate in accordance with Rule 11.24(f). A Retail Order may be an odd lot, round lot, or mixed lot.

Finally, the term ''Retail Price Improvement Order'' or ''RPI Order'' consists of non-displayed interest on the Exchange that is priced better than the Protected NBB or Protected NBO by at least $0.001 and that is identified as such (''RPI interest'').[16] The System [17] will monitor whether RPI buy or sell interest, adjusted by any offset and subject to the ceiling or floor price, is eligible to interact with incoming Retail Orders. An RPI Order remains non-displayed in its entirety (the buy or sell interest, the offset, and the ceiling or floor). An RPI Order may also be entered in a sub-penny increment with an explicit limit price. Any User is permitted, but not required, to submit RPI Orders. An RPI Order may be an odd lot, round lot or mixed lot.

The price of an RPI Order is determined by a User's entry of the following into the Exchange: (1) RPI buy or sell interest; (2) an offset, if any; and (3) a ceiling or floor price. RPI Orders submitted with an offset are similar to other peg orders available to Users in that the order is tied or ''pegged'' to a certain price, and would have its price automatically set and adjusted upon changes in the Protected NBBO, both upon entry and any time thereafter. RPI buy or sell interest is typically entered to track the Protected NBBO, that is, RPI Orders are typically submitted with an offset. The offset is a predetermined amount by which the User is willing to improve the Protected NBBO, subject to a ceiling or floor price. The ceiling or floor price is the amount above or below which the User does not wish to trade. RPI Orders in their entirety (the buy or sell interest, the offset, and the ceiling or floor) will remain non-displayed. The Exchange also allows Users to enter RPI Orders that establish the exact limit price, which is similar to a non-displayed limit order currently accepted by the Exchange except the Exchange accepts sub-penny limit prices on RPI Orders in increments of $0.001. The Exchange monitors whether RPI buy or sell interest, adjusted by any offset and subject to the ceiling or floor price, is eligible to interact with incoming Retail Orders.

Users and RMOs may enter odd lots, round lots or mixed lots as RPI Orders and as Retail Orders respectively. As discussed below, RPI Orders are ranked and allocated according to price and time of entry into the System consistent with Rule 11.12 and therefore without regard to whether the size entered is an odd lot, round lot or mixed lot amount. Similarly, Retail Orders interact with RPI Orders according to the Priority and Allocation rules of the Program and without regard to whether they are odd lots, round lots or mixed lots. Finally, Retail Orders are designated as Type 1 or Type 2 without regard to the size of the order.

RPI Orders interact with Retail Orders as follows. Assume a User enters RPI sell interest with an offset of $0.001 and a floor of $10.10 while the Protected NBO is $10.11. The RPI Order could interact with an incoming buy Retail Order at $10.109. If, however, the Protected NBO was $10.10, the RPI Order could not interact with the Retail Order because the price required to deliver the minimum $0.001 price improvement ($10.099) would violate the User's floor of $10.10. If a User otherwise enters an offset greater than the minimum required price improvement and the offset would produce a price that would violate the User's floor, the offset would be applied only to the extent that it respects the User's floor. By way of illustration, assume RPI buy interest is entered with an offset of $0.005 and a ceiling of $10.112 while the Protected NBB is at $10.11. The RPI Order could interact with an incoming sell Retail Order at $10.112, because it would produce the required price improvement without violating the User's ceiling, but it could not interact above the $10.112 ceiling. Finally, if a User enters an RPI Order

28, 2016), 81 FR 43306 (July 1, 2016) (SR–BYX–2016–15); 81368 (August 10, 2017), 82 FR 38960 (August 16, 2017) (SR–BYX–2017–18).

[11] Concurrently with the filing of this proposed rule change, the Exchange is filing to extend the current pilot period until the earlier of approval of the filing to make this rule permanent (*i.e.,* this proposed rule change) or December 31, 2018.

[12] The Program will continue to only apply to trades occurring at prices equal to or greater than $1.00 per share.

[13] *See* RPI Approval Order, *supra* note 3 at 71655.

[14] *Id.*

[15] FINRA Rule 5320.03 clarifies that an RMO may enter Retail Orders on a riskless principal basis, provided that (i) the entry of such riskless principal orders meet the requirements of FINRA Rule 5320.03, including that the RMO maintains supervisory systems to reconstruct, in a time-[sic] sequenced manner, all Retail Orders that are entered on a riskless principal basis; and (ii) the RMO submits a report, contemporaneously with the execution of the facilitated order, that identifies the trade as riskless principal.

[16] Exchange systems prevent Retail Orders from interacting with RPI Orders if the RPI Order is not priced at least $0.001 better than the Protected NBBO. The Exchange notes, however, that price improvement of $0.001 would be a minimum requirement and Users could enter RPI Orders that better the Protected NBBO by more than $0.001. Exchange systems will accept RPI Orders without a minimum price improvement value; however, such interest will execute at its floor or ceiling price only if such floor or ceiling price is better than the Protected NBBO by $0.001 or more.

[17] The ''System'' is defined in BYX Rule 1.5(aa) as ''the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.''

without an offset (*i.e.,* an explicitly priced limit order), the RPI Order will interact with Retail Orders at the level of the User's limit price as long as the minimum required price improvement is produced. Accordingly, if RPI sell interest is entered with a limit price of $10.098 and no offset while the Protected NBO is $10.11, the RPI Order could interact with the Retail Order at $10.098, producing $0.012 of price improvement. The System will not cancel RPI interest when it is not eligible to interact with incoming Retail Orders; such RPI interest will remain in the System and may become eligible again to interact with Retail Orders depending on the Protected NBBO.

RMO Qualifications and Application Process

Under Rule 11.24(b), any Member may qualify as an RMO if it conducts a retail business or routes retail orders on behalf of another broker-dealer. For purposes of Rule 11.24(b), conducting a retail business shall include carrying retail customer accounts on a fully disclosed basis. Any Member that wishes to obtain RMO status is required to submit: (1) An application form; (2) supporting documentation sufficient to demonstrate the retail nature and characteristics of the applicant's order flow; and (3) an attestation, in a form prescribed by the Exchange, that substantially all orders submitted as Retail Orders will qualify as such under Rule 11.24.[18] The Exchange shall notify the applicant of its decision in writing.

An RMO is required to have written policies and procedures reasonably designed to assure that it will only designate orders as Retail Orders if all requirements of a Retail Order are met. Such written policies and procedures must require the Member to (i) exercise due diligence before entering a Retail Order to assure that entry as a Retail Order is in compliance with the requirements of this rule, and (ii) monitor whether orders entered as Retail Orders meet the applicable requirements. If the RMO represents Retail Orders from another broker-dealer customer, the RMO's supervisory procedures must be reasonably designed to assure that the orders it receives from such broker-dealer customer that it designates as Retail Orders meet the definition of a Retail Order. The RMO must (i) obtain an annual written representation, in a form acceptable to the Exchange, from each broker-dealer customer that sends it orders to be designated as Retail Orders that entry of such orders as Retail Orders will be in compliance with the requirements of this rule, and (ii) monitor whether its broker-dealer customers' Retail Order flow continues to meet the applicable requirements.[19]

If the Exchange disapproves the application, the Exchange provides a written notice to the Member. The disapproved applicant could appeal the disapproval by the Exchange as provided in Rule 11.24(d), and/or reapply for RMO status 90 days after the disapproval notice is issued by the Exchange. An RMO also could voluntarily withdraw from such status at any time by giving written notice to the Exchange.

Failure of RMO To Abide by Retail Order Requirements

Rule 11.24(c) addresses an RMO's failure to abide by Retail Order requirements. If an RMO designates orders submitted to the Exchange as Retail Orders and the Exchange determines, in its sole discretion, that those orders fail to meet any of the requirements of Retail Orders, the Exchange may disqualify a Member from its status as an RMO. When disqualification determinations are made, the Exchange provides a written disqualification notice to the Member. A disqualified RMO may appeal the disqualification as provided in Rule 11.24(d) and/or reapply for RMO status 90 days after the disqualification notice is issued by the Exchange.

Appeal of Disapproval or Disqualification

Rule 11.24(d) provides appeal rights to Members. If a Member disputes the Exchange's decision to disapprove it as an RMO under Rule 11.24(b) or disqualify it under Rule 11.24(c), such Member (''appellant'') may request, within five business days after notice of the decision is issued by the Exchange, that the Retail Price Improvement Program Panel (''RPI Panel'') review the decision to determine if it was correct.

The RPI Panel consists of the Exchange's Chief Regulatory Officer (''CRO''), or a designee of the CRO, and two officers of the Exchange designated by the Chief Operating Officer (''COO''). The RPI Panel reviews the facts and render [sic] a decision within the time frame prescribed by the Exchange. The RPI Panel may overturn or modify an action taken by the Exchange and all determinations by the RPI Panel constitute final action by the Exchange on the matter at issue.

Retail Liquidity Identifier

Under Rule 11.24(e), the Exchange disseminates an identifier when RPI interest priced at least $0.001 better than the Exchange's Protected Bid or Protected Offer for a particular security is available in the System (''Retail Liquidity Identifier''). The Retail Liquidity Identifier is disseminated through consolidated data streams (*i.e.,* pursuant to the Consolidated Tape Association Plan/Consolidated Quotation Plan, or CTA/CQ, for Tape A and Tape B securities, and the Nasdaq UTP Plan for Tape C securities) as well as through proprietary Exchange data feeds.[20] The Retail Liquidity Identifier reflects the symbol and the side (buy or sell) of the RPI interest, but does not include the price or size of the RPI interest. In particular, CQ and UTP quoting outputs include a field for codes related to the Retail Liquidity Identifier. The codes indicate RPI interest that is priced better than the Exchange's Protected Bid or Protected Offer by at least the minimum level of price improvement as required by the Program.

Retail Order Designations

Under Rule 11.24(f), an RMO can designate how a Retail Order would interact with available contra-side interest as follows:

A Type 1-designated Retail Order will interact with available contra-side RPI Orders and other price improving contra-side interest but will not interact with other available contra-side interest in the System that is not offering price improvement or route to other markets. The portion of a Type 1-designated Retail Order that does not execute against contra-side RPI Orders or other price improving liquidity will be immediately and automatically cancelled.

A Type 2-designated Retail Order will interact first with available contra-side RPI Orders and other price improving liquidity and then any remaining

[18] For example, a prospective RMO could be required to provide sample marketing literature, website screenshots, other publicly disclosed materials describing the retail nature of their order flow, and such other documentation and information as the Exchange may require to obtain reasonable assurance that the applicant's order flow would meet the requirements of the Retail Order definition.

[19] The Exchange or another self-regulatory organization on behalf of the Exchange will review an RMO's compliance with these requirements through an exam-based review of the RMO's internal controls.

[20] The Exchange notes that the Retail Liquidity Identifier for Tape A and Tape B securities are disseminated pursuant to the CTA/CQ Plan. The identifier is also available through the consolidated public market data stream for Tape C securities. The processor for the Nasdaq UTP quotation stream disseminates the Retail Liquidity Identifier and analogous identifiers from other market centers that operate programs similar to the RPI Program.

portion of the Retail Order will be executed as an Immediate-or-Cancel (''IOC'') Order pursuant to Rule 11.9(b)(1). A Type 2-designated Retail Order can either be submitted as a BYX Only Order [21] or as an order eligible for routing pursuant to Rule 11.13(a)(2).

Priority and Order Allocation

Under Rule 11.24(g), competing RPI Orders in the same security are ranked and allocated according to price then time of entry into the System. Executions occur in price/time priority in accordance with Rule 11.12. Any remaining unexecuted RPI interest remains available to interact with other incoming Retail Orders if such interest is at an eligible price. Any remaining unexecuted portion of the Retail Order will cancel or execute in accordance with Rule 11.24(f). The following example illustrates this method:

- Protected NBBO for security ABC is $10.00–$10.05
- User 1 enters an RPI Order to buy ABC at $10.015 for 500
- User 2 then enters an RPI Order to buy ABC at $10.02 for 500
- User 3 then enters an RPI Order to buy ABC at $10.035 for 500

An incoming Retail Order to sell ABC for 1,000 executes first against User 3's bid for 500 at $10.035, because it is the best priced bid, then against User 2's bid for 500 at $10.02, because it is the next best priced bid. User 1 is not filled because the entire size of the Retail Order to sell 1,000 is depleted. The Retail Order executes against RPI Orders in price/time priority.

However, assume the same facts above, except that User 2's RPI Order to buy ABC at $10.02 is for 100. The incoming Retail Order to sell 1,000 executes first against User 3's bid for 500 at $10.035, because it is the best priced bid, then against User 2's bid for 100 at $10.02, because it is the next best priced bid. User 1 then receives an execution for 400 of its bid for 500 at $10.015, at which point the entire size of the Retail Order to sell 1,000 is depleted.

As a final example, assume the same facts as above, except that User 3's order was not an RPI Order to buy ABC at $10.035, but rather, a non-displayed order to buy ABC at $10.03. The result would be similar to the result immediately above, in that the incoming Retail Order to sell 1,000 executes first against User 3's bid for 500 at $10.03, because it is the best priced bid, then against User 2's bid for 100 at $10.02, because it is the next best priced bid. User 1 then receives an execution for 400 of its bid for 500 at $10.015, at which point the entire size of the Retail Order to sell 1,000 is depleted.

Eligible Securities

All Regulation NMS securities traded on the Exchange are eligible for inclusion in the RPI Program. The Exchange limits the Program to trades occurring at prices equal to or greater than $1.00 per share. Toward that end, Exchange trade validation systems prevent the interaction of RPI buy or sell interest (adjusted by any offset) and Retail Orders at a price below $1.00 per share.[22] For example, if there is RPI buy interest tracking the Protected NBB at $0.99 with an offset of $0.001 and a ceiling of $1.02, Exchange trade validation systems would prevent the execution of the RPI Order at $0.991 with a sell Retail Order with a limit of $0.99. However, if the Retail Order was Type 2 as defined the Program,[23] it would be able to interact at $0.99 with liquidity outside the Program in the Exchange's order book. In addition to facilitating an orderly [24] and operationally intuitive program, the Exchange believes that limiting the Program to trades equal to or greater than $1.00 per share enabled it better to focus its efforts to monitor price competition and to assess any indications that data disseminated under the Program is potentially disadvantaging retail orders. As part of that review, the Exchange produced data throughout the pilot, which included statistics about participation, the frequency and level of price improvement provided by the Program, and any effects on the broader market structure.

Rationale for Making the Program Pilot Permanent

The Exchange established the Program in an attempt to attract retail order flow to the Exchange by providing an opportunity for price improvement to such order flow. The Exchange believes that the Program promotes transparent competition for retail order flow by allowing Exchange members to submit RPI Orders to interact with Retail Orders. Such competition promotes efficiency by facilitating the price discovery process and generating additional investor interest in trading securities, thereby promoting capital formation and retail investment opportunities. The Program will continue to be limited to trades occurring at prices equal to or greater than $1.00 per share.

In accordance with its filing establishing the pilot, the Exchange did ''produce data throughout the pilot, which will include statistics about participation, the frequency and level of price improvement provided by the Program, and any effects on the broader market structure.'' [25] The Exchange has fulfilled this obligation through the reports and assessments it has submitted to the Commission since the implementation of the pilot Program. The Exchange believes that the data provided to the Commission to date, as well as the data being provided in this proposed rule change, support the continued operation of the Program on a permanent basis.

The SEC stated in the RPI Approval Order that the Program could promote competition for retail order flow among execution venues, and that this could benefit retail investors by creating additional well-regulated and transparent price improvement opportunities for marketable retail order flow, most of which is currently executed in the Over-the-Counter (''OTC'') markets without ever reaching a public exchange.[26] The Exchange believes that it has achieved its goal of attracting retail order flow to the Exchange. As the Exchange's analysis of the Program data below demonstrates, there has been consistent retail investor interest in the Program, which has provided tangible price improvement to those retail investors through a competitive pricing process over the course of the pilot. The data also demonstrates that the Program had an overall negligible impact on broader market quality outside of the Program. The Exchange has not received any

[21] A BYX Only Order is defined in BYX Rule 11.9(c)(4) and includes orders that are not eligible for routing to other trading centers.

[22] As discussed above, the price of an RPI is determined by a User's entry of buy or sell interest, an offset (if any) and a ceiling or floor price. RPI sell or buy interest typically tracks the Protected NBBO.

[23] Type 2 Retail Orders are treated as IOC orders that execute against displayed and non-displayed liquidity in the Exchange's order book where there is no available liquidity in the Program. Type 2 Retail Orders can either be designated as eligible for routing or as BYX Only Orders, and thus non-routable, as described above.

[24] Given the limitation, the Program would have no impact on the minimum pricing increment for orders priced less than $1.00 and therefore no effect on the potential of markets executing those orders to lock or cross. In addition, the non-displayed nature of the liquidity in the Program simply has no potential to disrupt displayed, protected quotes. In any event, the Program would do nothing to change the obligation of exchanges to avoid and reconcile locked and crossed markets under NMS Rule 610(d).

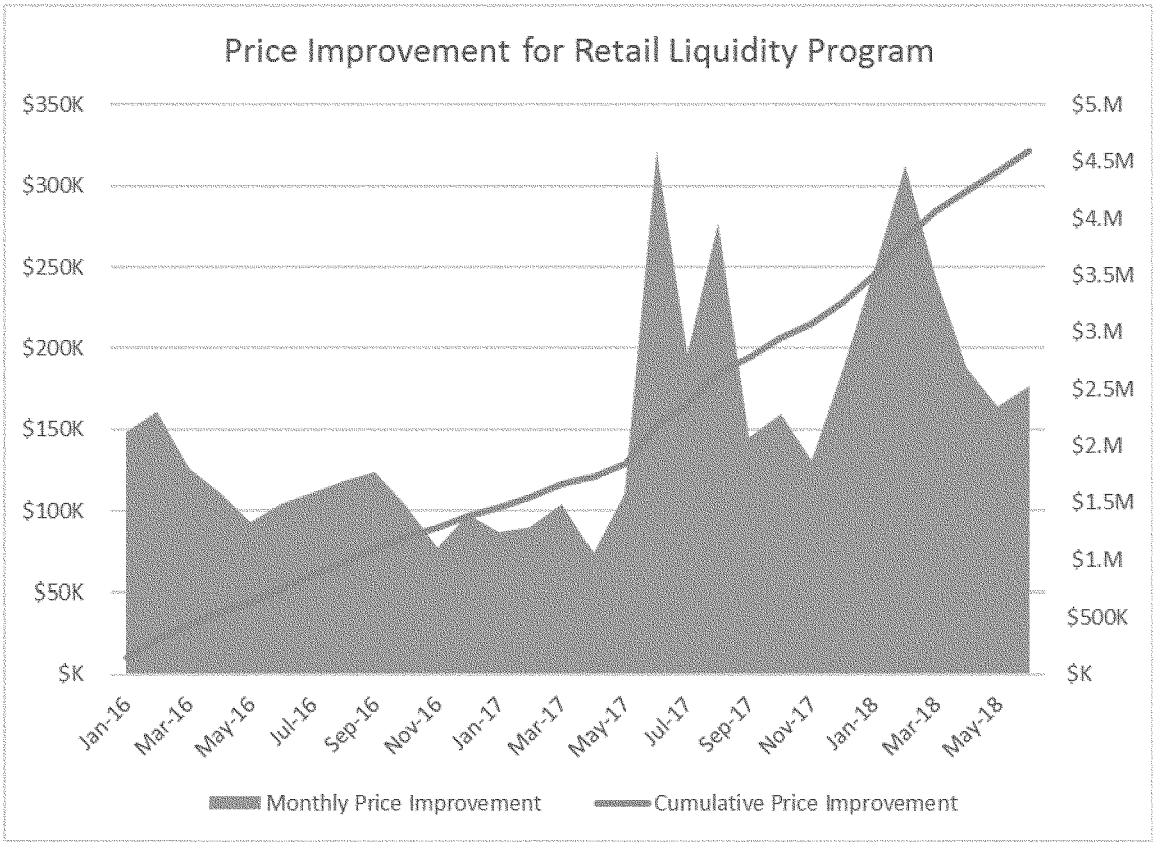
complaints or negative feedback concerning the Program.

I. Overall Analysis of the Program

Brokers route retail orders to a wide range of different trading systems. The Program offers a transparent and well-regulated option, providing meaningful competition and price improvement. As explained above, the purpose of the Program is to attract retail order flow to the Exchange by providing an opportunity for retail investors to receive price improvement. The Exchange believes that the Program has satisfied this goal, having provided a total of $4.5 million of price improvement, or approximately $153,000 per month, in the last 2.5 years. Furthermore, while the amount of price improvement provided in the Program varies month to month, the amount of price improvement provided in recent months has generally increased relative to prior months due to additional participation in the Program by market participants with retail order flow. The Exchange believes that this supports permanent approval of the pilot as retail investors continue to reap the benefits afforded by the Program. The amount of monthly and cumulative price improvement provided in the Program is illustrated in Chart 1 below.

Chart 1: Price Improvement Summary



Furthermore, Retail Order volume executed in the Program accounted for between 0.86% and 2.32% of total BYX volume from January 2017 to June 2018, as shown in Chart 2 below, and between 0.05% and 0.11% of total consolidated volume, as shown in Chart 3 below. Despite its size relative to total volume executed on the Exchange or the broader market, the Program has continued to provide considerable price improvement each month to retail investors that participated in the Program. In addition, the Exchange believes that the relatively modest volume executed in the Program relative to total BYX volume and total consolidated volume limits the potential impact of the Program on broader market quality on the Exchange.[27] The Exchange therefore believes that the Program has demonstrated the effectiveness of a transparent, on-exchange retail order price improvement functionality, notwithstanding that the majority of retail volume is still traded off-exchange.

[27] The Exchange has also performed an analysis of the impact of the Program on other market quality indicators, which found that the Program did not have a significant impact on market quality in the broader market. *See* Section III below.

Chart 2: RPI Volume as a Percentage of Total BYX Volume

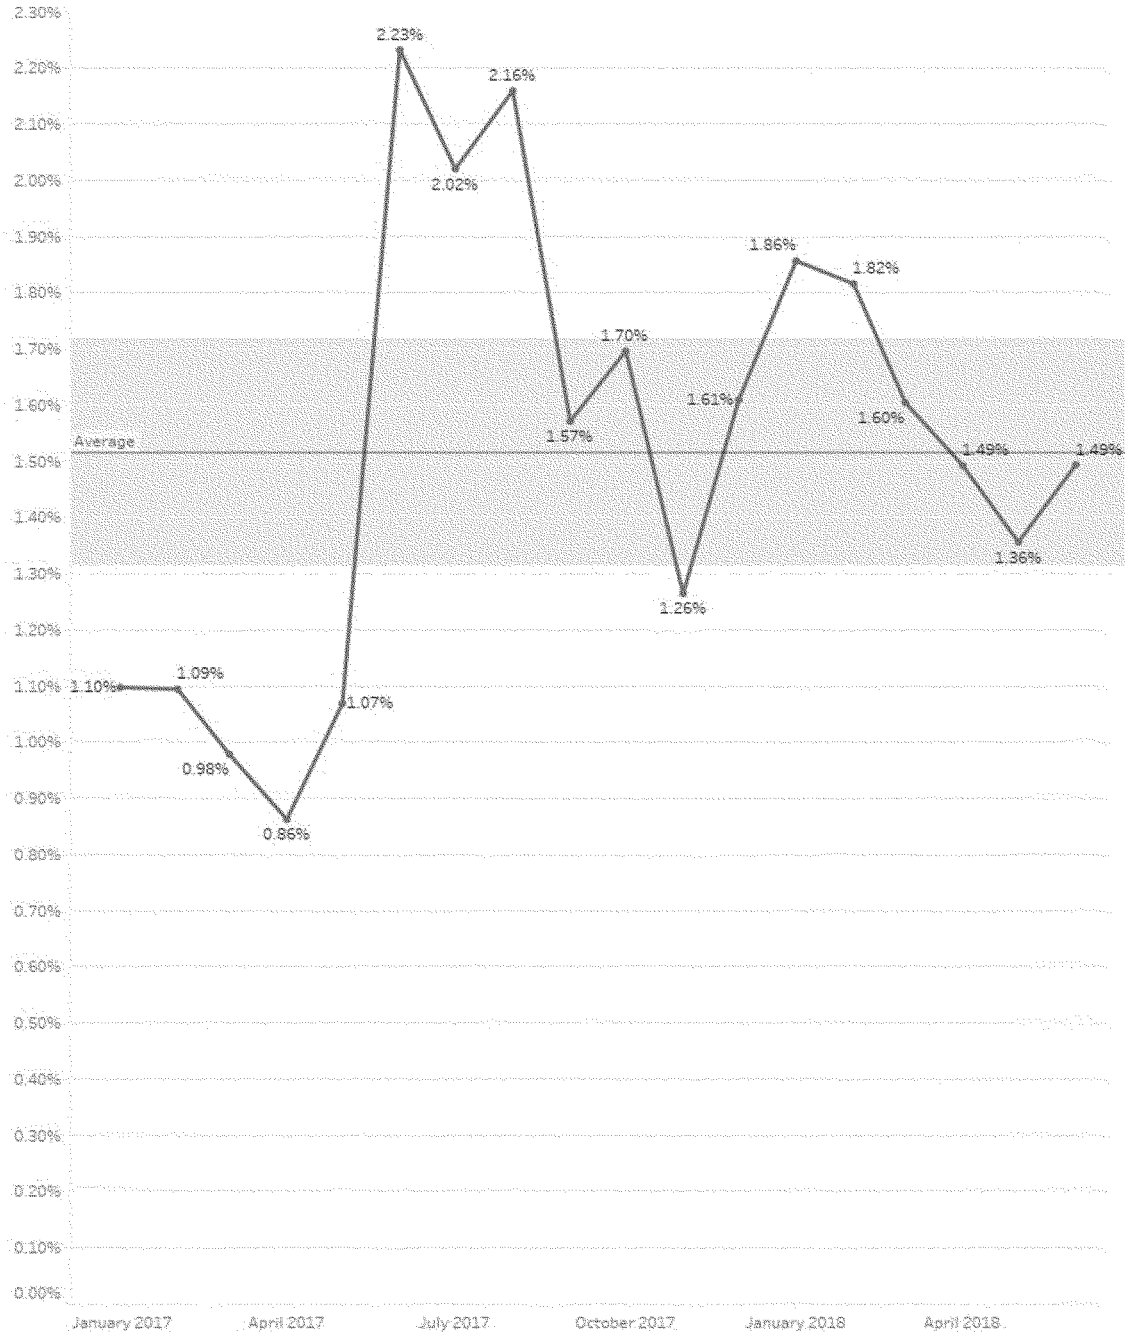


Chart 3: RPI Volume as a Percentage of Total Consolidated Volume

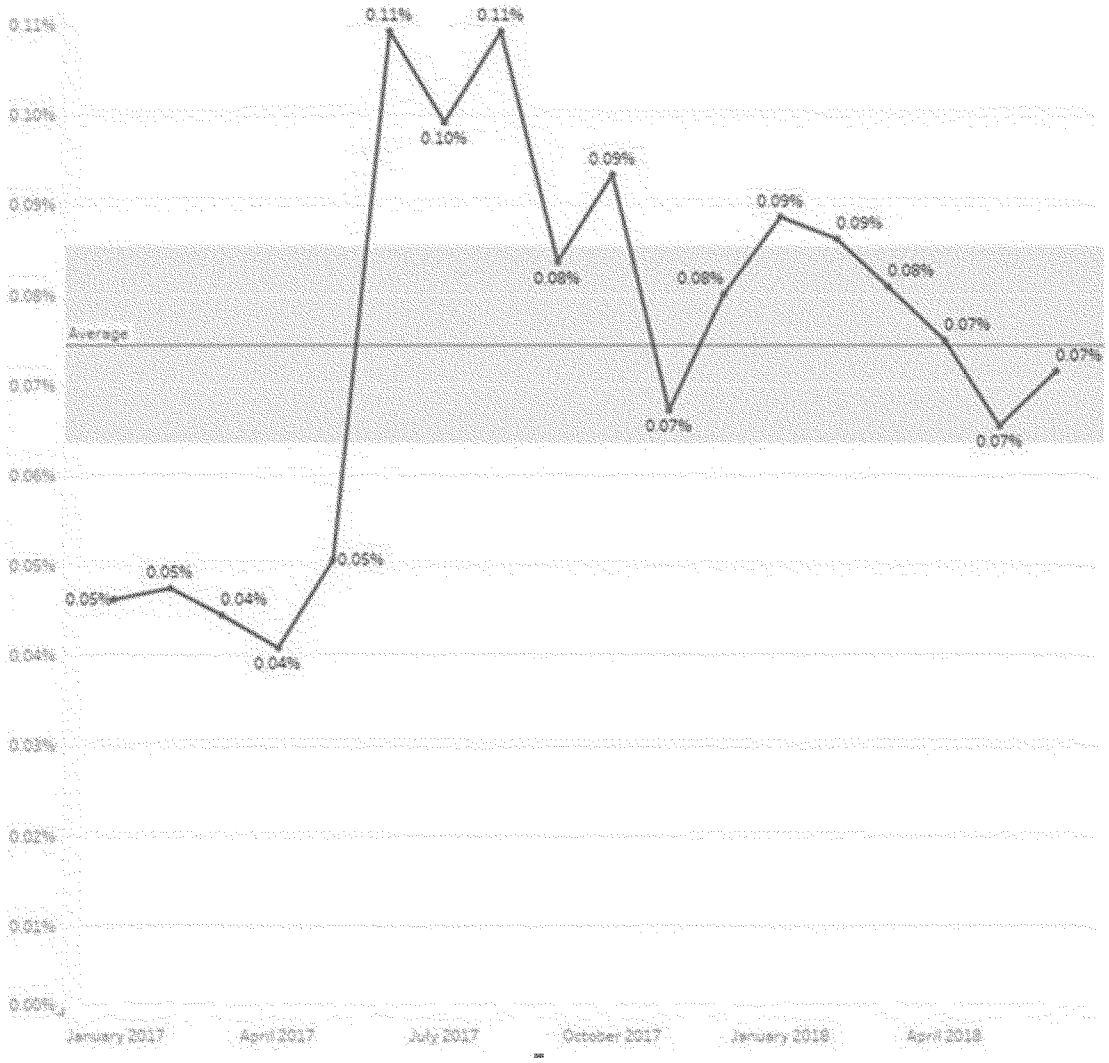

Retail Orders are routed by sophisticated brokers using systems that seek the highest fill rates and amounts of price improvement. These brokers have many choices of execution venues for this order flow. When they choose to route to the Program, they have determined that it is the best opportunity for fill rate and price improvement at that time. As shown in Table 1 below, Retail Order average daily volume (''ADV'') executed in the Program averaged between 2 and 7 million shares from January 2016 to June 2018. Increased volatility in February 2018 likely contributed to the increased Retail Order shares executed in the Program that month. Fill rates for the majority of the period studied ranged from 11%–19% with fill rates declining below 10% starting in December 2017, likely due to additional participation in the Program that resulted in a significant increase in the Retail Order volume entered on the Exchange. Retail Orders also continue to receive more than the minimum $0.001 price improvement required of a liquidity providing RPI Order, with the monthly average price improvement provided to Retail Orders ranging from $0.0011–$0.0014 per share, and the monthly effective/quoted spread ratio ranging from 0.77–0.90. The Exchange believes that this data supports permanent approval of the Program as this would allow retail investors to continue to execute their orders with price improvement in the Program.

II. Analysis of Retail Orders by Order Size

Tables 2, 3, and 4 show the distribution of Retail Orders entered and executed in the Program for the period from January 2017 to June 2018. As shown in Table 2, a majority of all Retail Orders entered to participate in the Program from January 2016 to June 2018 were for a round lot or fewer shares. Specifically, Retail Orders of one round lot or fewer shares accounted for an average of approximately 56% of the total number of Retail Orders entered. More than 73% of Retail Orders entered were for 300 shares or less. Very large orders of more than 7,500 shares accounted for only 1.9% of Retail Orders submitted to the Program but accounted for a significant portion (approximately 40%) of the shares entered, as shown in Table 3. In addition, despite lower fill rates, large orders account for a reasonable portion (approximately 9%) of the shares executed in the Program, as shown in Table 4. The Program also receives a significantly large number of odd lot and single lot sized shares, which could be representative of retail marketable orders from retail customers. By providing price improvement to these orders, retail customers would continue to benefit from the Program.

The Exchange also analyzed fill rates across the different order size buckets and found that while fill rates are higher for smaller orders as expected, large size orders are still able to access liquidity and therefore receive price improvement in the Program. Moreover, overall fill rates indicate that market participants that provide liquidity are responding with quote depth when the contra side order is looking for a fill. While fill rates decreased starting in November 2017, the Exchange believes that this is due to new Retail Order flow being routed to the Program, rather than a decrease in the available liquidity. Monthly volume executed in the Program, as shown in Table 1, has therefore remained constant or increased since November 2017 despite the lower overall fill rates for those months. The Exchange therefore believes that the Program is an attractive option for market participants looking to fill Retail Orders with price improvement.

III. Impact of the Program on Broader Market Quality

As shown in Charts 2 and 3 above, Retail Order volume executed in the Program is a small percentage of both total volume executed on the Exchange and total consolidated volume. While the Program has better depth available for Retail Orders, it does not significantly affect the market volume of BYX. The average volume within the 95th percentile is between 1.3% and 1.7%. With the Program volume mostly below 2.5% of BYX volume, the Exchange does not believe that it is able to significantly impact BYX market quality. Nevertheless, to test the impact of the Program on broader market quality, the Exchange reviewed the correlation between metrics that are tied to overall market quality with relevant Program metrics over both 2017 and 2018. Based on this analysis, which is provided in Table 6 below, the Exchange does not believe that the Program has had any significant impact on broader market quality.

Specifically, the Exchange's analysis shows that: (1) Inside size in the broader market is not correlated with either RPI effective spreads or the percentage of volume executed in the Program, which suggests that market participants are not moving volume from the regular market to the Program as effective spreads narrow or volume executed in the Program increases; (2) effective spreads in the broader market are not correlated with the percentage of volume executed in the Program, which suggests that spreads are not widening as a result of more Retail Order flow being executed in the Program, (3) midpoint volume executed is not correlated with effective spreads in the Program, which suggests that market participants are not moving midpoint liquidity from the regular market to instead receive price improvement in the Program, and (4) displayed volume executed is not correlated with quoted spreads in the Program, which suggest that market participants are not entering non-displayed retail price improving interest in the Program as an alternative to displaying interest on an order book. The Exchange therefore believes that the Program can continue on a permanent basis—and thereby provide increased price improvement opportunities to retail investors on a transparent well-regulated exchange—without degrading market quality outside of the Program.

TABLE 6—BYX MARKET QUALITY CORRELATION ANALYSIS

	Date	
	2017	2018
Correlation of RPI Effective Spread to Average Inside Size across all Equities Exchanges[28]	−0.0145	−0.0096
Correlation of RPI Volume as a Percent of Total Volume to Average Inside Size across all Equities Exchanges	−0.0217	−0.0056
Correlation of RPI Volume as a Percent of Total Volume to Average Effective Spread across all Venues	0.1175	0.0134
Correlation of RPI Effective Spread to Total Midpoint Volume across all Venues	−0.1438	−0.1366
Correlation of RPI Quoted Spread to Total Protected Lit Volume across all Equities Exchanges	−0.1221	−0.0999

IV. Conclusion

Based on the Exchange's experience in operating the Program, and the data provided here and during the duration of the pilot, the Exchange believes that the Program has been a positive experiment in attracting retail order flow to a public exchange. The data provided by the Exchange describes a valuable service that delivers considerable price improvement in a transparent and well-regulated environment. The Program represents just a fraction of retail orders, most of which are executed off-exchange by a wide range of order handling services that have considerably more market share, and which operate pursuant to different rules and regulatory requirements. The order flow the Program attracted to the Exchange provided tangible price improvement to retail investors through a competitive and transparent pricing process unavailable in non-exchange venues. As such, despite relatively modest volumes, the Exchange believes that the Program satisfied the twin goals of attracting retail order flow to the Exchange and allowing such order flow to receive potential price improvement. Moreover, the Exchange believes that the data collected supports the conclusion that the Program did not have a negative impact on broader market quality. Although the results of the Program highlight the substantial advantages that broker-dealers retain when managing the benefits of retail order flow, the Exchange believes that the level of price improvement provided by the Program and the scant evidence that the Program negatively impacted the marketplace justifies making the Program permanent.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,[29] in general, and Section 6(b)(5) of the Act,[30] in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that making the pilot permanent is consistent with these principles because the Program is reasonably designed to attract retail order flow to the exchange environment, while helping to ensure that retail investors benefit from the better price that liquidity providers are willing to give their orders. During the pilot period, the Exchange has provided data and analysis to the Commission. The Exchange believes that this data and analysis, as well as the further analysis provided in this filing, show that the Program has provided the intended benefits to the market, and retail investors in particular, and is therefore consistent with the Act.

Additionally, the Exchange believes the proposed rule change is designed to facilitate transactions in securities and to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system because making the Program permanent would allow the Exchange to continue to attract retail order flow to a public exchange and allow such order flow to receive potential price improvement. The data provided by the Exchange to the Commission staff demonstrates that the Program provided tangible price improvement to retail investors through a competitive pricing process

[28] Inside size is the average bid or ask size when the venue is at the NBB or NBO.

[29] 15 U.S.C. 78f(b).

[30] 15 U.S.C. 78f(b)(5).

unavailable in non-exchange venues, and otherwise had an insignificant impact on the broader market. The Exchange believes that making the Program permanent would encourage the additional utilization of, and interaction with, the Exchange and provide retail customers with an additional venue for price discovery, liquidity, competitive quotes, and price improvement. For the same reasons, the Exchange believes that making the Program permanent would promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market.

Finally, the Exchange also believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition. For all of these reasons, the Exchange believes that the proposed rule change is consistent with the Act.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that making the Program permanent would continue to promote competition for retail order flow among execution venues and contribute to the public price discovery process. The Exchange believes that the data supplied to the Commission, and experience gained over the life of the pilot, have demonstrated that the Program creates price improvement opportunities for retail orders that are equal to what would be provided under OTC internalization arrangements, thereby benefiting retail investors and increasing competition between execution venues. The Exchange also believes that making the Program permanent will promote competition between execution venues operating their own retail liquidity programs. Such competition will lead to innovation within the market, thereby increasing the quality of the national market system. Finally, the Exchange notes that it operates in a highly competitive market in which market participants can easily direct their orders to competing venues, including off-exchange venues. In such an environment, the Exchange must continually review, and consider adjusting the services it offers and the requirements it imposes to remain competitive with other U.S. equity exchanges. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposal is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–CboeBYX–2018–014 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File No. SR–CboeBYX–2018–014. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-CboeBYX–2018–014 and should be submitted on or before September 7, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

Robert W. Errett,

Deputy Secretary.

[Disaster Declaration #15567 and #15568; HAWAII Disaster Number HI–00049]

Presidential Declaration Amendment of a Major Disaster for the State of Hawaii

AGENCY: U.S. Small Business Administration.

ACTION: Amendment 1.

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for the State of Hawaii (FEMA–4366–DR), dated 06/14/2018.

Incident: Kilauea Volcanic Eruption and Earthquakes.

Incident Period: 05/03/2018 and continuing.

DATES: Issued on 06/14/2018.

Physical Loan Application Deadline Date: 09/12/2018.

Economic Injury (EIDL) Loan Application Deadline Date: 03/14/2019.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

[31] 17 CFR 200.30–3(a)(12).

SUPPLEMENTARY INFORMATION: The notice of the President's major disaster declaration for the State of Hawaii, dated 06/14/2018, is hereby amended to extend the deadline for filing applications for physical damages as a result of this disaster to 09/12/2018.

All other information in the original declaration remains unchanged.

SMALL BUSINESS ADMINISTRATION

Changes to SBA Secondary Market Program

AGENCY: U.S. Small Business Administration.

ACTION: Notice of changes to Secondary Market Program.

SUMMARY: The purpose of this Notice is to provide the public with notification of program changes to SBA's Secondary Market Loan Pooling Program. Specifically, SBA is increasing the minimum maturity ratio for both SBA Standard Pools and Weighted-Average Coupon (WAC) Pools by 1.0%, to 95.0%. The changes described in this Notice are being made to ensure that there are sufficient funds to cover the estimated cost of the timely payment guaranty for newly formed SBA 7(a) loan pools. The changes in this Notice will be incorporated, as needed, into the SBA Secondary Market Program Guide and all other appropriate SBA Secondary Market documents.

DATES: The changes will apply to SBA 7(a) loan pools with an issue date on or after October 1, 2018.

ADDRESSES: Address comments concerning this Notice to John M. Wade, Chief Secondary Market Division, U.S. Small Business Administration, 409 3rd Street SW, Washington, DC 20416, or *john.wade@sba.gov.*

FOR FURTHER INFORMATION CONTACT: John M. Wade, Chief, Secondary Market Division, U.S. Small Business Administration, 409 3rd Street SW, Washington, DC 20416, 202–205–3647, or *john.wade@sba.gov.*

SUPPLEMENTARY INFORMATION: The Secondary Market Improvements Act of 1984 authorized SBA to guarantee the timely payment of principal and interest on Pool Certificates. A Pool Certificate represents a fractional undivided interest in a ''Pool,'' which is an aggregation of SBA guaranteed portions of loans made by SBA Lenders under section 7(a) of the Small Business Act, 15 U.S.C. 636(a). In order to support the timely payment guaranty requirement, SBA established the Master Reserve Fund (''MRF''), which serves as a mechanism to cover the cost of SBA's timely payment guaranty. Borrower payments on the guaranteed portions of pooled loans, as well as SBA guaranty payments on defaulted pooled loans, are deposited into the MRF. Funds are held in the MRF until distributions are made to investors (''Registered Holders'') of Pool Certificates. The interest earned on the borrower payments and the SBA guaranty payments deposited into the MRF supports the timely payments made to Registered Holders.

From time to time, SBA provides guidance to SBA Pool Assemblers on the required loan and pool characteristics necessary to form a Pool. These characteristics include, among other things, the minimum number of guaranteed portions of loans required to form a Pool, the allowable difference between the highest and lowest gross and net note rates of the guaranteed portions of loans in a Pool, and the minimum maturity ratio of the guaranteed portions of loans in a Pool. The minimum maturity ratio is equal to the ratio of the shortest and the longest remaining term to maturity of the guaranteed portions of loans in a Pool.

On October 1, 2017, SBA increased the minimum maturity ratio for both SBA Standard Pools and Weighted-Average Coupon (WAC) Pools to 94.0%. Based on SBA's expectations as to the performance of future Pools, SBA has determined that, in order to support the costs associated with SBA's Secondary Market Loan Pooling Program, it is necessary to further increase the minimum maturity ratio—in other words, to reduce the difference between the shortest and the longest remaining term of the guaranteed portions of loans in a Pool. SBA does not expect a 1 percentage point increase in the minimum maturity ratio to have an adverse impact on either the program or the participants in the program. SBA has monitored Pools formed over the last 18 months and has observed that many existing Pools have a minimum maturity ratio of at least 95.0%.

A higher minimum maturity ratio will decrease the difference between the amortization rates of the guaranteed portions of loans in a Pool. This will cause the cash flows from the guaranteed portions of loans in the Pool to be more homogenous, and will more closely match the amortization rate of the Pool Certificate. This is the primary driver in reducing the cost of SBA's timely payment guaranty on Pool Certificates. Therefore, effective October 1, 2018, all guaranteed portions of loans in a Pool presented for settlement with SBA's Fiscal Transfer Agent will be required to have a minimum maturity ratio of at least 95% for Standard Pools and WAC Pools. SBA is making this change pursuant to Section 5(g)(2) of the Small Business Act, 15 U.S.C. 634(g)(2).

SBA will continue to monitor loan and pool characteristics and will provide notification of additional changes as necessary. It is important to note that there is no change to SBA's obligation to honor its guaranty of the amounts owed to Registered Holders of Pool Certificates and that such guaranty continues to be backed by the full faith and credit of the United States.

This program change will be incorporated as necessary into SBA's Secondary Market Guide and all other appropriate SBA Secondary Market documents. As indicated above, this change will be effective for Pools with an issue date on or after October 1, 2018, and will modify any previous guidance regarding the minimum maturity ratio for Standard Pools or WAC Pools.

John A. Miller,

Deputy Associate Administrator, Office of Capital Access.

BILLING CODE 8025–01–P

DEPARTMENT OF STATE

[Public Notice: 10507]

E.O. 13224 Designation of Qassim Abdullah Ali Ahmed, aka Qassim al-Muamen, aka Qassim Al Muamen, aka Qassim Abdullah Ali, aka Qassim Abdullah as a Specially Designated Global Terrorist

Acting under the authority of and in accordance with section 1(b) of Executive Order 13224 of September 23, 2001, as amended by Executive Order 13268 of July 2, 2002, and Executive Order 13284 of January 23, 2003, I hereby determine that the person known as Qassim Abdullah Ali Ahmed, aka Qassim al-Muamen, aka Qassim Al Muamen, aka Qassim Abdullah Ali, aka Qassim Abdullah, committed, or poses a significant risk of committing, acts of terrorism that threaten the security of U.S. nationals or the national security, foreign policy, or economy of the United States. Consistent with the determination in section 10 of Executive Order 13224 that prior notice to persons determined to be subject to the Order

who might have a constitutional presence in the United States would render ineffectual the blocking and other measures authorized in the Order because of the ability to transfer funds instantaneously, I determine that no prior notice needs to be provided to any person subject to this determination who might have a constitutional presence in the United States, because to do so would render ineffectual the measures authorized in the Order.

This notice shall be published in the **Federal Register**.

Dated: July 18, 2018.

SURFACE TRANSPORTATION BOARD

[Docket No. EP 519 (Sub-No. 4)]

Notice of National Grain Car Council Meeting

AGENCY: Surface Transportation Board (Board).

ACTION: Notice of National Grain Car Council meeting.

SUMMARY: Notice is hereby given of a meeting of the National Grain Car Council (NGCC), pursuant to the Federal Advisory Committee Act.

DATES: The meeting will be held on Thursday, September 13, 2018, beginning at 1:00 p.m. (CDT), and is expected to conclude at 5:00 p.m. (CDT).

ADDRESSES: The meeting will be held at the Kansas City Marriott Downtown, 200 West 12th Street, Kansas City, MO 64105 (Phone (816) 421–6800).

FOR FURTHER INFORMATION CONTACT: Fred Forstall at (202) 245–0241 or *alfred.forstall@stb.gov.* [Assistance for the hearing impaired is available through the Federal Information Relay Service (FIRS) at (800) 877–8339.]

SUPPLEMENTARY INFORMATION: The NGCC was established by the Interstate Commerce Commission (ICC) as a working group to facilitate private-sector solutions and recommendations to the ICC (and now the Board) on matters affecting rail grain car availability and transportation. *Nat'l Grain Car Supply—Conference of Interested Parties,* EP 519 (ICC served Jan. 7, 1994).

The general purpose of this meeting is to discuss rail carrier preparedness to transport the 2018 grain harvest. Agenda items include the following: Remarks by NGCC Chair Sharon G. Clark, Board Chair Ann D. Begeman, Board Vice Chairman and NGCC Co-Chair Deb Miller; reports by member groups on expectations for the upcoming harvest, domestic and foreign markets, the supply of rail cars, and rail service; and presentations by industry analysts. The full agenda, along with other information regarding the NGCC, is posted on the Board's website at *https://www.stb.gov/stb/rail/graincar_council.html.*

The meeting is open to the public and will be conducted pursuant to the Federal Advisory Committee Act, 5 U.S.C. app. 2; Federal Advisory Committee Management, 41 CFR pt. 102–3; the NGCC charter; and Board procedures.

Public Comments: Members of the public may submit written comments to the NGCC at any time. Comments should be addressed to NGCC, c/o Fred Forstall, Surface Transportation Board, 395 E Street SW, Washington, DC 20423–0001 or *alfred.forstall@stb.gov.* Any further communications about this meeting will be announced through the Board's website, *www.stb.gov.*

Decided: August 13, 2018.

By the Board, Scott M. Zimmerman, Acting Director, Office of Proceedings.

Tammy Lowery,

Clearance Clerk.

BILLING CODE 4915–01–P

TENNESSEE VALLEY AUTHORITY

Meeting of the Regional Energy Resource Council

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Notice of meeting.

SUMMARY: The TVA Regional Energy Resource Council (RERC) will hold a meeting on Wednesday, September 5, 2018, to discuss the scenarios and strategies that TVA has identified for the 2019 Integrated Resource Plan.

The RERC was established to advise TVA on its energy resource activities and the priority to be placed among competing objectives and values. Notice of this meeting is given under the Federal Advisory Committee Act (FACA).

DATES: The public meeting will be held on Wednesday, September 5, 2018, from 10:00 a.m. to 4:00 p.m., EDT.

ADDRESSES: The meeting will be held at the Hilton Knoxville, 501 West Church Avenue, Knoxville, Tennessee 37902, and will be open to the public. Anyone needing special access or accommodations should let the contact below know at least a week in advance.

FOR FURTHER INFORMATION CONTACT: Barbie Perdue, 865–632–6113, *baperdue@tva.gov.*

SUPPLEMENTARY INFORMATION: The meeting agenda includes the following:

1. Introductions
2. Overview of the 2019 Integrated Resource Plan (IRP) and Supplemental Environmental Impact Statement status
3. Overview of the Scenarios and Strategies identified for the 2019 IRP
4. Public Comments
5. Council Discussion and Advice

The RERC will hear opinions and views of citizens by providing a public comment session starting at 12:45 p.m., EDT, lasting up to one hour, on Wednesday, September 5, 2018. Persons wishing to speak are requested to register at the door between 11:00 a.m. and 12:00 p.m., EDT, on Wednesday, September 5, 2018, and will be called on during the public comment period. TVA will set time limits for providing oral comments, once registered. Handout materials should be limited to one printed page. Written comments are also invited and may be mailed to the Regional Energy Resource Council, Tennessee Valley Authority, 400 West Summit Hill Drive, WT–9–D, Knoxville, Tennessee 37902.

Dated: August 10, 2018.

Joseph J. Hoagland,

Vice President, Enterprise Relations and Innovation, Tennessee Valley Authority.

Federal Aviation Administration

[Summary Notice No. 2018–42]

Petition for Exemption; Summary of Petition Received; Headquarters Air Force Junior Reserve Officer Training Corps

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from 14 CFR part 61.103(a), *Eligibility requirements,* which states in pertinent part that to be eligible for a private pilot certificate, a person must be at least 17 years of age for a rating other than a glider or balloon. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before September 6, 2018.

ADDRESSES: Send comments identified by docket number FAA–2018–0175 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Brent Hart (202) 267–4034, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on August 9, 2018.

Lirio Liu,

Executive Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2018–0175.

Petitioner: Headquarters Air Force Junior Reserve Officer Training Corps.

Section(s) of 14 CFR Affected: 61.103(a).

Description of Relief Sought: The United States Air Force (USAF) is seeking an exemption to allow 16-year-old Junior Reserve Officer Training Corps (JROTC) cadets to qualify for a private pilot certificate under the HQ Air Force JROTC Flight Academy scholarship program. The USAF states that it is petitioning the FAA for an exemption because the selection board can only qualify a limited number of high school sophomores due to the 17-year-old minimum age requirement for private pilot applicants. The USAF further states that the 7- to 9-week flight academy private pilot training program is accomplished between the sophomore and junior years of high school. According to the USAF, allowing 16-year-olds to qualify would increase the cadet candidate pool by 75%, thereby improving the quality of the candidates who could be selected.

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: The FHWA is issuing this notice to advise the public that we are rescinding the September 26, 2013, NOI to prepare an EIS for a proposed project, the I–90 Tolling Project, to manage congestion and traffic flow on I–90 between I–5 and I–405, and contribute revenue to the sustainable, long-term funding for timely completion of the SR 520 Bridge Replacement and HOV Program and maintenance and future transportation improvements on I–90.

FOR FURTHER INFORMATION CONTACT: Lindsey Handel, Urban Transportation Engineer, Federal Highway Administration, Washington Division, 711 S. Capitol Way, Suite 501, Olympia, WA 98501; telephone: 360–753–9550; and email: *lindsey.handel@dot.gov.*

SUPPLEMENTARY INFORMATION: On September 26, 2013, FHWA published a Notice of Intent to prepare an EIS for the I–90 Tolling Project to manage congestion and traffic flow on I–90 between I–5 and I–405, and contribute revenue to the sustainable, long-term funding for timely completion of the SR 520 Bridge Replacement and HOV Program and maintenance and future transportation improvements on I–90. The passage of the Connecting Washington state funding package in 2015 provided sufficient funding to complete the SR 520 Bridge Replacement, eliminating part of the purpose for this project. Any future I–90 tolling projects will progress under a separate environmental review process in accordance with all applicable laws and regulations.

Issued on: August 13, 2018.

Daniel M. Mathis,

FHWA Division Administrator, Olympia, WA.

Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Policy Changes and Fiscal Year 2019 Rates; Quality Reporting Requirements for Specific Providers; Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs (Promoting Interoperability Programs) Requirements for Eligible Hospitals, Critical Access Hospitals, and Eligible Professionals; Medicare Cost Reporting Requirements; and Physician Certification and Recertification of Claims

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: We are revising the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals to implement changes arising from our continuing experience with these systems for FY 2019. Some of these changes implement certain statutory provisions contained in the 21st Century Cures Act and the Bipartisan Budget Act of 2018, and other legislation. We also are making changes relating to Medicare graduate medical education (GME) affiliation agreements for new urban teaching hospitals. In addition, we are providing the market basket update that will apply to the rate-of-increase limits for certain hospitals excluded from the IPPS that are paid on a reasonable cost basis, subject to these limits for FY 2019. We are updating the payment policies and the annual payment rates for the Medicare prospective payment system (PPS) for inpatient hospital services provided by long-term care hospitals (LTCHs) for FY 2019.

In addition, we are establishing new requirements or revising existing requirements for quality reporting by specific Medicare providers (acute care hospitals, PPS-exempt cancer hospitals, and LTCHs). We also are establishing new requirements or revising existing requirements for eligible professionals (EPs), eligible hospitals, and critical access hospitals (CAHs) participating in the Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs (now referred to as the Promoting Interoperability Programs). In addition, we are finalizing modifications to the requirements that apply to States operating Medicaid Promoting Interoperability Programs. We are updating policies for the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program.

We also are making changes relating to the required supporting documentation for an acceptable Medicare cost report submission and the supporting information for physician certification and recertification of claims.

DATES: This final rule is effective on October 1, 2018.

Electronic Access

This **Federal Register** document is available from the **Federal Register** online database through Federal Digital System (FDsys), a service of the U.S. Government Printing Office. This database can be accessed via the internet at: *http://www.gpo.gov/fdsys.*

Tables Available Through the Internet on the CMS Website

In the past, a majority of the tables referred to throughout this preamble and in the Addendum to the proposed rule and the final rule were published in the **Federal Register** as part of the annual proposed and final rules. However, beginning in FY 2012, the majority of the IPPS tables and LTCH PPS tables are no longer published in the **Federal Register**. Instead, these tables, generally, will be available only through the internet. The IPPS tables for this final rule are available through the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/*

AcuteInpatientPPS/index.html. Click on the link on the left side of the screen titled, ''FY 2019 IPPS Final Rule Home Page'' or ''Acute Inpatient—Files for Download.'' The LTCH PPS tables for this FY 2019 final rule are available through the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/LongTermCareHospitalPPS/index.html* under the list item for Regulation Number CMS–1694–F. For further details on the contents of the tables referenced in this final rule, we refer readers to section VI. of the Addendum to this final rule.

Readers who experience any problems accessing any of the tables that are posted on the CMS websites identified above should contact Michael Treitel at (410) 786–4552.

I. Executive Summary and Background

A. Executive Summary

1. Purpose and Legal Authority

This final rule makes payment and policy changes under the Medicare inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals as well as for certain hospitals and hospital units excluded from the IPPS. In addition, it makes payment and policy changes for inpatient hospital services provided by long-term care hospitals (LTCHs) under the long-term care hospital prospective payment system (LTCH PPS). This final rule also makes policy changes to programs associated with Medicare IPPS hospitals, IPPS-excluded hospitals, and LTCHs.

We are establishing new requirements and revising existing requirements for quality reporting by specific providers (acute care hospitals, PPS-exempt cancer hospitals, and LTCHs) that are participating in Medicare. We also are establishing new requirements and revising existing requirements for eligible professionals (EPs), eligible hospitals, and CAHs participating in the Medicare and Medicaid Promoting Interoperability Programs. We are updating policies for the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program.

We are making changes relating to the supporting documentation required for an acceptable Medicare cost report submission and the supporting information for physician certification and recertification of claims.

Under various statutory authorities, we are making changes to the Medicare IPPS, to the LTCH PPS, and to other related payment methodologies and programs for FY 2019 and subsequent fiscal years. These statutory authorities include, but are not limited to, the following:

- Section 1886(d) of the Social Security Act (the Act), which sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires that, instead of paying for capital-related costs of inpatient hospital services on a reasonable cost basis, the Secretary use a prospective payment system (PPS).
- Section 1886(d)(1)(B) of the Act, which specifies that certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Rehabilitation hospitals and units; LTCHs; psychiatric hospitals and units; children's hospitals; cancer hospitals; extended neoplastic disease care hospitals, and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS.
- Sections 123(a) and (c) of the BBRA (Pub. L. 106–113) and section 307(b)(1) of the BIPA (Pub. L. 106–554) (as codified under section 1886(m)(1) of the Act), which provide for the development and implementation of a prospective payment system for payment for inpatient hospital services of LTCHs described in section 1886(d)(1)(B)(iv) of the Act.
- Sections 1814(l), 1820, and 1834(g) of the Act, which specify that payments are made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services and that these payments are generally based on 101 percent of reasonable cost.
- Section 1866(k) of the Act, as added by section 3005 of the Affordable Care Act, which establishes a quality reporting program for hospitals described in section 1886(d)(1)(B)(v) of the Act, referred to as ''PPS-exempt cancer hospitals.''
- Section 1886(a)(4) of the Act, which specifies that costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act.
- Section 1886(b)(3)(B)(viii) of the Act, which requires the Secretary to reduce the applicable percentage increase that would otherwise apply to the standardized amount applicable to a subsection (d) hospital for discharges occurring in a fiscal year if the hospital does not submit data on measures in a form and manner, and at a time, specified by the Secretary.
- Section 1886(o) of the Act, which requires the Secretary to establish a Hospital Value-Based Purchasing (VBP) Program, under which value-based incentive payments are made in a fiscal year to hospitals meeting performance standards established for a performance period for such fiscal year.
- Section 1886(p) of the Act, as added by section 3008 of the Affordable Care Act, which establishes a Hospital-Acquired Condition (HAC) Reduction Program, under which payments to applicable hospitals are adjusted to provide an incentive to reduce hospital-acquired conditions.
- Section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act and amended by section 10309 of the Affordable Care Act and section 15002 of the 21st Century Cures Act, which establishes the ''Hospital

Readmissions Reduction Program.'' Under the program, payments for discharges from an ''applicable hospital'' under section 1886(d) of the Act will be reduced to account for certain excess readmissions. Section 15002 of the 21st Century Cures Act requires the Secretary to compare cohorts of hospitals to each other in determining the extent of excess readmissions.

- Section 1886(r) of the Act, as added by section 3133 of the Affordable Care Act, which provides for a reduction to disproportionate share hospital (DSH) payments under section 1886(d)(5)(F) of the Act and for a new uncompensated care payment to eligible hospitals. Specifically, section 1886(r) of the Act requires that, for fiscal year 2014 and each subsequent fiscal year, subsection (d) hospitals that would otherwise receive a DSH payment made under section 1886(d)(5)(F) of the Act will receive two separate payments: (1) 25 Percent of the amount they previously would have received under section 1886(d)(5)(F) of the Act for DSH (''the empirically justified amount''), and (2) an additional payment for the DSH hospital's proportion of uncompensated care, determined as the product of three factors. These three factors are: (1) 75 Percent of the payments that would otherwise be made under section 1886(d)(5)(F) of the Act; (2) 1 minus the percent change in the percent of individuals who are uninsured (minus 0.2 percentage point for FY 2018 and FY 2019); and (3) a hospital's uncompensated care amount relative to the uncompensated care amount of all DSH hospitals expressed as a percentage.
- Section 1886(m)(6) of the Act, as added by section 1206(a)(1) of the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 (Pub. L. 113–67) and amended by section 51005(a) of the Bipartisan Budget Act of 2018 (Pub. L. 115–123), which provided for the establishment of site neutral payment rate criteria under the LTCH PPS, with implementation beginning in FY 2016, and provides for a 4-year transitional blended payment rate for discharges occurring in LTCH cost reporting periods beginning in FYs 2016 through 2019. Section 51005(b) of the Bipartisan Budget Act of 2018 amended section 1886(m)(6)(B) by adding new clause (iv), which specifies that the IPPS comparable amount defined in clause (ii)(I) shall be reduced by 4.6 percent for FYs 2018 through 2026.
- Section 1886(m)(6) of the Act, as amended by section 15009 of the 21st Century Cures Act (Pub. L. 114–255), which provides for a temporary exception to the application of the site neutral payment rate under the LTCH PPS for certain spinal cord specialty hospitals for discharges in cost reporting periods beginning during FYs 2018 and 2019.
- Section 1886(m)(6) of the Act, as amended by section 15010 of the 21st Century Cures Act (Pub. L. 114–255), which provides for a temporary exception to the application of the site neutral payment rate under the LTCH PPS for certain LTCHs with certain discharges with severe wounds occurring in cost reporting periods beginning during FY 2018.
- Section 1886(m)(5)(D)(iv) of the Act, as added by section 1206(c) of the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 (Pub. L. 113–67), which provides for the establishment of a functional status quality measure in the LTCH QRP for change in mobility among inpatients requiring ventilator support.
- Section 1899B of the Act, as added by section 2(a) of the Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act, Pub. L. 113–185), which provides for the establishment of standardized data reporting for certain post-acute care providers, including LTCHs.

2. Improving Patient Outcomes and Reducing Burden Through Meaningful Measures

Regulatory reform and reducing regulatory burden are high priorities for CMS. To reduce the regulatory burden on the healthcare industry, lower health care costs, and enhance patient care, in October 2017, we launched the Meaningful Measures Initiative.[1] This initiative is one component of our agency-wide Patients Over Paperwork Initiative,[2] which is aimed at evaluating and streamlining regulations with a goal to reduce unnecessary cost and burden, increase efficiencies, and improve beneficiary experience. The Meaningful Measures Initiative is aimed at identifying the highest priority areas for quality measurement and quality improvement, in order to assess the core quality of care issues that are most vital to advancing our work to improve patient outcomes. The Meaningful Measures Initiative represents a new approach to quality measures that will foster operational efficiencies and will reduce costs, including collection and reporting burden while producing quality measurement that is more focused on meaningful outcomes.

The Meaningful Measures framework has the following objectives:

- Address high-impact measure areas that safeguard public health;
- Patient-centered and meaningful to patients;
- Outcome-based where possible;
- Fulfill each program's statutory requirements;
- Minimize the level of burden for health care providers (for example, through a preference for EHR-based measures, where possible, such as electronic clinical quality measures; [3]
- Significant opportunity for improvement;
- Address measure needs for population based payment through alternative payment models; and
- Align across programs and/or with other payers.

In order to achieve these objectives, we have identified 19 Meaningful Measures areas and mapped them to six overarching quality priorities, as shown in the following table:

Quality priority	Meaningful measure area
Making Care Safer by Reducing Harm Caused in the Delivery of Care	Healthcare-Associated Infections. Preventable Healthcare Harm.
Strengthen Person and Family Engagement as Partners in Their Care	Care is Personalized and Aligned with Patient's Goals. End of Life Care According to Preferences. Patient's Experience of Care. Patient Reported Functional Outcomes.

[1] Meaningful Measures web page: *https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/QualityInitiativesGenInfo/MMF/General-info-Sub-Page.html.*

[2] Remarks by Administrator Seema Verma at the Health Care Payment Learning and Action Network (LAN) Fall Summit, as prepared for delivery on October 30, 2017. Available at: *https://www.cms.gov/Newsroom/MediaReleaseDatabase/Fact-sheets/2017-Fact-Sheet-items/2017-10-30.html.*

[3] We refer readers to section VIII.A.9.c. of the preamble of this final rule where we discuss public comments on the potential future development and adoption of eCQMs.

Quality priority	Meaningful measure area
Promote Effective Communication and Coordination of Care	Medication Management. Admissions and Readmissions to Hospitals. Transfer of Health Information and Interoperability.
Promote Effective Prevention and Treatment of Chronic Disease	Preventive Care. Management of Chronic Conditions. Prevention, Treatment, and Management of Mental Health. Prevention and Treatment of Opioid and Substance Use Disorders. Risk Adjusted Mortality.
Work with Communities to Promote Best Practices of Healthy Living	Equity of Care. Community Engagement.
Make Care Affordable	Appropriate Use of Healthcare. Patient-focused Episode of Care. Risk Adjusted Total Cost of Care.

By including Meaningful Measures in our programs, we believe that we can also address the following cross-cutting measure criteria:

- Eliminating disparities;
- Tracking measurable outcomes and impact;
- Safeguarding public health;
- Achieving cost savings;
- Improving access for rural communities; and
- Reducing burden.

We believe that the Meaningful Measures Initiative will improve outcomes for patients, their families, and health care providers, while reducing burden and costs for clinicians and providers, as well as promoting operational efficiencies.

We received numerous comments from stakeholders regarding the Meaningful Measures Initiative and the impact of its implementation in CMS' quality programs. Many of these comments pertained to specific program proposals, and are discussed in the appropriate program-specific sections of this final rule. However, commenters also provided insights and recommendations for the ongoing development of the Meaningful Measures Initiative generally, including: ensuring transparency in public reporting and usability of publicly reported data; evaluating the benefit of individual measures to patients via use in quality programs weighed against the burden to providers of collecting and reporting that measure data; and identifying additional opportunities for alignment across CMS quality programs. We look forward to continuing to work with stakeholders to refine and further implement the Meaningful Measures Initiative, and will take commenters' insights and recommendations into account moving forward.

3. Summary of the Major Provisions

Below we provide a summary of the major provisions in this final rule. In general, these major provisions are as part of the annual update to the payment policies and payment rates, consistent with the applicable statutory provisions. A general summary of the proposed changes that we included in the proposed rule issued prior to this final rule is presented in section I.D. of the preamble of this final rule.

a. MS–DRG Documentation and Coding Adjustment

Section 631 of the American Taxpayer Relief Act of 2012 (ATRA, Pub. L. 112–240) amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment to the standardized amount of Medicare payments to acute care hospitals to account for changes in MS–DRG documentation and coding that do not reflect real changes in case-mix, totaling $11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. The FY 2014 through FY 2017 adjustments represented the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Public Law 110–90. Section 414 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. 114–10) replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percent positive adjustment to the standardized amount of Medicare payments to acute care hospitals for FYs 2018 through 2023. (The FY 2018 adjustment was subsequently adjusted to 0.4588 percent by section 15005 of the 21st Century Cures Act.) Therefore, for FY 2019, we are making an adjustment of +0.5 percent to the standardized amount.

b. Expansion of the Postacute Care Transfer Policy

Section 53109 of the Bipartisan Budget Act of 2018 amended section 1886(d)(5)(J)(ii) of the Act to also include discharges to hospice care by a hospice program as a qualified discharge, effective for discharges occurring on or after October 1, 2018. Accordingly, we are making conforming amendments to § 412.4(c) of the regulation, effective for discharges on or after October 1, 2018, to specify that if a discharge is assigned to one of the MS–DRGs subject to the postacute care transfer policy and the individual is transferred to hospice care by a hospice program, the discharge is subject to payment as a transfer case.

c. DSH Payment Adjustment and Additional Payment for Uncompensated Care

Section 3133 of the Affordable Care Act modified the Medicare disproportionate share hospital (DSH) payment methodology beginning in FY 2014. Under section 1886(r) of the Act, which was added by section 3133 of the Affordable Care Act, starting in FY 2014, DSHs receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remaining amount, equal to 75 percent of the amount that otherwise would have been paid as Medicare DSH payments, is paid as additional payments after the amount is reduced for changes in the percentage of individuals that are uninsured. Each Medicare DSH will receive an additional payment based on its share of the total amount of uncompensated care for all Medicare DSHs for a given time period.

In this FY 2019 IPPS/LTCH PPS final rule, we are updating our estimates of the three factors used to determine uncompensated care payments for FY 2019. We are continuing to use uninsured estimates produced by CMS' Office of the Actuary (OACT) as part of the development of the National Health Expenditure Accounts (NHEA) in the calculation of Factor 2. We also are continuing to incorporate data from Worksheet S–10 in the calculation of hospitals' share of the aggregate amount

of uncompensated care by combining data on uncompensated care costs from Worksheet S–10 for FYs 2014 and 2015 with proxy data regarding a hospital's share of low-income insured days for FY 2013 to determine Factor 3 for FY 2019. In addition, we are using only data regarding low-income insured days for FY 2013 to determine the amount of uncompensated care payments for Puerto Rico hospitals, Indian Health Service and Tribal hospitals, and all-inclusive rate providers. For this final rule, we are establishing the following policies: (1) For providers with multiple cost reports, beginning in the same fiscal year, to use the longest cost report and annualize Medicaid data and uncompensated care data if a hospital's cost report does not equal 12 months of data; (2) in the rare case where a provider has multiple cost reports, beginning in the same fiscal year, but one report also spans the entirety of the following fiscal year, such that the hospital has no cost report for that fiscal year, the cost report that spans both fiscal years will be used for the latter fiscal year; and (3) to apply statistical trim methodologies to potentially aberrant cost-to-charge ratios (CCRs) and potentially aberrant uncompensated care costs reported on the Worksheet S–10.

d. Changes to the LTCH PPS

In this final rule, we set forth changes to the LTCH PPS Federal payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2019. In addition, we are eliminating the 25-percent threshold policy, and under this policy, we are applying a one-time adjustment of approximately 0.9 percent to the LTCH PPS standard Federal payment rate in FY 2019 to ensure this elimination of the 25-percent threshold policy is budget neutral.

e. Reduction of Hospital Payments for Excess Readmissions

We are making changes to policies for the Hospital Readmissions Reduction Program, which was established under section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act, as amended by section 10309 of the Affordable Care Act and further amended by section 15002 of the 21st Century Cures Act. The Hospital Readmissions Reduction Program requires a reduction to a hospital's base operating DRG payment to account for excess readmissions of selected applicable conditions. For FY 2018 and subsequent years, the reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). In this final rule, we are establishing the applicable periods for FY 2019, FY 2020, and FY 2021. We also are codifying the definitions of dual-eligible patients, the proportion of dual-eligibles, and the applicable period for dual-eligibility.

f. Hospital Value-Based Purchasing (VBP) Program

Section 1886(o) of the Act requires the Secretary to establish a Hospital VBP Program under which value-based incentive payments are made in a fiscal year to hospitals based on their performance on measures established for a performance period for such fiscal year. As part of agency-wide efforts under the Meaningful Measures Initiative to use a parsimonious set of the most meaningful measures for patients, clinicians, and providers in our quality programs and the Patients Over Paperwork Initiative to reduce costs and burden and program complexity, as discussed in section I.A.2. of the preamble of this final rule, we are removing a total of 4 measures from the Hospital VBP Program, all of which will continue to be used in the Hospital IQR Program, in order to reduce the costs and complexity of tracking these measures in multiple programs. Specifically, we are removing one measure, beginning with the FY 2021 program year: (1) Elective Delivery (NQF #0469) (PC–01). We also are removing three measures from the Hospital VBP Program, effective with the effective date of this FY 2019 IPPS/LTCH PPS final rule: (1) Hospital-Level, Risk-Standardized Payment Associated With a 30-Day Episode-of-Care for Acute Myocardial Infarction (NQF #2431) (AMI Payment); (2) Hospital-Level, Risk-Standardized Payment Associated With a 30-Day Episode-of-Care for Heart Failure (NQF #2436) (HF Payment); and (3) Hospital-Level, Risk-Standardized Payment Associated With a 30-Day Episode-of-Care for Pneumonia (PN Payment) (NQF #2579). In addition, we are renaming the Clinical Care domain as the Clinical Outcomes domain, beginning with the FY 2020 program year. We also are adopting measure removal factors for the Hospital VBP Program.

We are not finalizing our proposals to remove of the following six patient safety measures: (1) National Healthcare Safety Network (NHSN) Catheter-Associated Urinary Tract Infection (CAUTI) Outcome Measure (NQF #0138); (2) National Healthcare Safety Network (NHSN) Central Line-Associated Bloodstream Infection (CLABSI) Outcome Measure (NQF #0139); (3) American College of Surgeons-Centers for Disease Control and Prevention (ACS–CDC) Harmonized Procedure Specific Surgical Site Infection (SSI) Outcome Measure (NQF #0753); (4) National Healthcare Safety Network (NHSN) Facility-wide Inpatient Hospital-onset Methicillin-resistant *Staphylococcus aureus* Bacteremia (MRSA) Outcome Measure (NQF #1716); (5) National Healthcare Safety Network (NHSN) Facility-wide Inpatient Hospital-onset *Clostridium difficile* Infection (CDI) Outcome Measure (NQF #1717); and (6) Patient Safety and Adverse Events (Composite) (NQF #0531) (PSI 90). We are not finalizing our proposal to remove the Safety domain from the Hospital VBP Program, as we are not finalizing our proposals to remove all of the measures in this domain, and therefore we also are not finalizing changes to the domain weighting.

g. Hospital-Acquired Condition (HAC) Reduction Program

Section 1886(p) of the Act, as added under section 3008(a) of the Affordable Care Act, establishes an incentive to hospitals to reduce the incidence of hospital-acquired conditions by requiring the Secretary to make an adjustment to payments to applicable hospitals effective for discharges beginning on October 1, 2014. This 1-percent payment reduction applies to a hospital whose ranking in the worst-performing quartile (25 percent) of all applicable hospitals, relative to the national average, of conditions acquired during the applicable period and on all of the hospital's discharges for the specified fiscal year. As part of our agency-wide Patients over Paperwork and Meaningful Measures Initiatives, discussed in section I.A.2. of the preamble of this final rule, we are retaining the measures currently included in the HAC Reduction Program because the measures address a performance gap in patient safety and reduce harm caused in the delivery of care. In this final rule, we are: (1) Establishing administrative policies to collect, validate, and publicly report NHSN healthcare-associated infection (HAI) quality measure data that facilitate a seamless transition, independent of the Hospital IQR Program, beginning with January 1, 2020 infectious events; (2) changing the scoring methodology by removing domains and assigning equal weighting to each measure for which a hospital has a measure; and (3) establishing the

applicable period for FY 2021. In addition, we are summarizing comments we received regarding the potential future inclusion of additional measures, including eCQMs.

h. Hospital Inpatient Quality Reporting (IQR) Program

Under section 1886(b)(3)(B)(viii) of the Act, subsection (d) hospitals are required to report data on measures selected by the Secretary for a fiscal year in order to receive the full annual percentage increase that would otherwise apply to the standardized amount applicable to discharges occurring in that fiscal year.

In this final rule, we are making several changes. As part of agency-wide efforts under the Meaningful Measures Initiative to use a parsimonious set of the most meaningful measures for patients and clinicians in our quality programs and the Patients Over Paperwork initiative to reduce burden, cost, and program complexity, as discussed in section I.A.2. of the preamble of this final rule, we are adding a new measure removal factor and removing a total of 39 measures from the Hospital IQR Program. We are finalizing a modified version of our proposal to remove 5 of those measures such that removal is delayed by 1 year. For a full list of measures being removed, we refer readers to section VIII.A.5.c. of the preamble of this final rule. Beginning with the CY 2018 reporting period/FY 2020 payment determination and subsequent years, we are removing 17 claims-based measures and two structural measures. Beginning with the CY 2019 reporting period/FY 2021 payment determination and subsequent years, we are removing three chart-abstracted measures and two claims-based measures. Beginning with the CY 2020 reporting period/FY 2022 payment determination and subsequent years, we are removing six chart-abstracted measures, one claims-based measure, and seven eCQMs from the Hospital IQR Program measure set. Beginning with the CY 2021 reporting period/FY 2023 payment determination, we are removing one claims-based measure.

In addition, for the CY 2019 reporting period/FY 2021 payment determination, we are: (1) Requiring the same eCQM reporting requirements that were adopted for the CY 2018 reporting period/FY 2020 payment determination (82 FR 38355 through 38361), such that hospitals submit one, self-selected calendar quarter of 2019 data for 4 eCQMs in the Hospital IQR Program measure set; and (2) requiring that hospitals use the 2015 Edition certification criteria for CEHRT. These changes are in alignment with changes or current established policies under the Medicare and Medicaid Promoting Interoperability Programs (previously known as the Medicare and Medicaid EHR Incentive Programs). In addition, we are summarizing public comments we received on two measures we are considering for potential future inclusion in the Hospital IQR Program, as well as on the potential future development and adoption of electronic clinical quality measures generally.

i. Long-Term Care Hospital Quality Reporting Program (LTCH QRP)

The LTCH QRP is authorized by section 1886(m)(5) of the Act and applies to all hospitals certified by Medicare as long-term care hospitals (LTCHs). Under the LTCH QRP, the Secretary reduces by 2 percentage points the annual update to the LTCH PPS standard Federal rate for discharges for an LTCH during a fiscal year if the LTCH fails to submit data in accordance with the LTCH QRP requirements specified for that fiscal year. As part of agency-wide efforts under the Meaningful Measures Initiative to use a parsimonious set of the most meaningful measures for patients and clinicians in our quality programs and the Patients Over Paperwork Initiative to reduce cost and burden and program complexity, as discussed in section I.A.2. of the preamble of this final rule, we are removing three measures from the LTCH QRP. We also are adopting a new measure removal factor and are codifying the measure removal factors in our regulations. In addition, we are updating our regulations to expand the methods by which an LTCH is notified of noncompliance with the requirements of the LTCH QRP for a program year and how CMS will notify an LTCH of a reconsideration decision.

j. Medicare and Medicaid Promoting Interoperability Programs (Previously Referred to as Medicare and Medicaid EHR Incentive Programs)

In this final rule, we are finalizing several changes to reduce burden, increase interoperability and improve patient electronic access to their health information under the Medicare and Medicaid Promoting Interoperability Programs (previously referred to as Medicare and Medicaid EHR Incentive Programs). Specifically, we are finalizing: (1) An EHR reporting period of a minimum of any continuous 90 days in CYs 2019 and 2020 for new and returning participants attesting to CMS or their State Medicaid agency; (2) modifications to our proposed performance-based scoring methodology, which consists of a smaller set of objectives as well as a smaller set of new and modified measures; (3) the removal of certain CQMs beginning with the reporting period in CY 2020 as well as the CY 2019 reporting requirements we proposed to align the CQM reporting requirements for the Promoting Interoperability Programs with the Hospital IQR Program; (4) the codification of policies for subsection (d) Puerto Rico hospitals; (5) amendments to the prior approval policy applicable in the Medicaid Promoting Interoperability Program to align with the prior approval policy for MMIS and ADP systems and to minimize burden on States; and (6) deadlines for funding availability for States to conclude the Medicaid Promoting Interoperability Program.

4. Summary of Costs and Benefits

- *Adjustment for MS–DRG Documentation and Coding Changes.* Section 414 of the MACRA replaced the single positive adjustment we intended to make in FY 2018 once the recoupment required by section 631 of the ATRA was complete with a 0.5 percent positive adjustment to the standardized amount of Medicare payments to acute care hospitals for FYs 2018 through 2023. (The FY 2018 adjustment was subsequently adjusted to 0.4588 percent by section 15005 of the 21st Century Cures Act.) For FY 2019, we are making an adjustment of +0.5 percent to the standardized amount consistent with the MACRA.
- *Expansion of the Postacute Care Transfer Policy.* Section 53109 of the Bipartisan Budget Act of 2018 amended section 1886(d)(5)(J)(ii) of the Act to also include discharges to hospice care by a hospice program as a qualified discharge, effective for discharges occurring on or after October 1, 2018. Accordingly, we are making conforming amendments to § 412.4(c) of the regulation to specify that, effective for discharges on or after October 1, 2018, if a discharge is assigned to one of the MS–DRGs subject to the postacute care transfer policy, and the individual is transferred to hospice care by a hospice program, the discharge will be subject to payment as a transfer case. We estimate that this statutory expansion to the postacute care transfer policy will reduce Medicare payments under the IPPS by approximately $240 million in FY 2019.
- *Medicare DSH Payment Adjustment and Additional Payment for Uncompensated Care.* Under section 1886(r) of the Act (as added by section

3133 of the Affordable Care Act), DSH payments to hospitals under section 1886(d)(5)(F) of the Act are reduced and an additional payment for uncompensated care is made to eligible hospitals, beginning in FY 2014. Hospitals that receive Medicare DSH payments receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remainder, equal to an estimate of 75 percent of what otherwise would have been paid as Medicare DSH payments, is the basis for determining the additional payments for uncompensated care after the amount is reduced for changes in the percentage of individuals that are uninsured and additional statutory adjustments. Each hospital that receives Medicare DSH payments will receive an additional payment for uncompensated care based on its share of the total uncompensated care amount reported by Medicare DSHs. The reduction to Medicare DSH payments is not budget neutral.

For FY 2019, we are updating our estimates of the three factors used to determine uncompensated care payments. We are continuing to use uninsured estimates produced by OACT as part of the development of the NHEA in the calculation of Factor 2. We also are continuing to incorporate data from Worksheet S–10 in the calculation of hospitals' share of the aggregate amount of uncompensated care by combining data on uncompensated care costs from Worksheet S–10 for FY 2014 and FY 2015 with proxy data regarding a hospital's share of low-income insured days for FY 2013 to determine Factor 3 for FY 2019. To determine the amount of uncompensated care for Puerto Rico hospitals, Indian Health Service and Tribal hospitals, and all-inclusive rate providers, we are using only the data regarding low-income insured days for FY 2013. In addition, in this final rule, we are establishing the following policies: (1) For providers with multiple cost reports beginning in the same fiscal year, to use the longest cost report and annualize Medicaid data and uncompensated care data if a hospital's cost report does not equal 12 months of data; (2) in the rare case where a provider has multiple cost reports beginning in the same fiscal year, but one report also spans the entirety of the following fiscal year such that the hospital has no cost report for that fiscal year, the cost report that spans both fiscal years will be used for the latter fiscal year; and (3) to apply statistical trim methodologies to potentially aberrant CCRs and potentially aberrant uncompensated care costs.

We project that the amount available to distribute as payments for uncompensated care for FY 2019 will increase by approximately $1.5 billion, as compared to the estimate of overall payments, including Medicare DSH payments and uncompensated care payments, that will be distributed in FY 2018. The payments have redistributive effects, based on a hospital's uncompensated care amount relative to the uncompensated care amount for all hospitals that are estimated to receive Medicare DSH payments, and the calculated payment amount is not directly tied to a hospital's number of discharges.

- *Update to the LTCH PPS Payment Rates and Other Payment Policies.* Based on the best available data for the 409 LTCHs in our database, we estimate that the changes to the payment rates and factors that we present in the preamble and Addendum of this final rule, which reflect the continuation of the transition of the statutory application of the site neutral payment rate, the update to the LTCH PPS standard Federal payment rate for FY 2019, and the one-time permanent adjustment of approximately 0.9 percent to the LTCH PPS standard Federal payment rate to ensure the elimination of the 25-percent threshold policy is budget neutral, will result in an estimated increase in payments in FY 2019 of approximately $39 million.
- *Changes to the Hospital Readmissions Reduction Program.* For FY 2019 and subsequent years, the reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). Overall, in this final rule, we estimate that 2,610 hospitals will have their base operating DRG payments reduced by their determined proxy FY 2019 hospital-specific readmission adjustment. As a result, we estimate that the Hospital Readmissions Reduction Program will save approximately $566 million in FY 2019.
- *Value-Based Incentive Payments under the Hospital VBP Program.* We estimate that there will be no net financial impact to the Hospital VBP Program for the FY 2019 program year in the aggregate because, by law, the amount available for value-based incentive payments under the program in a given year must be equal to the total amount of base operating MS–DRG payment amount reductions for that year, as estimated by the Secretary. The estimated amount of base operating MS–DRG payment amount reductions for the FY 2019 program year and, therefore, the estimated amount available for value-based incentive payments for FY 2019 discharges is approximately $1.9 billion.
- *Changes to the HAC Reduction Program.* A hospital's Total HAC score and its ranking in comparison to other hospitals in any given year depend on several different factors. Any significant impact due to the HAC Reduction Program changes for FY 2019, including which hospitals will receive the adjustment, will depend on actual experience.

The removal of NHSN HAI measures from the Hospital IQR Program and the subsequent cessation of its validation processes for NHSN HAI measures and the creation of a validation process for the HAC Reduction program represent no net change in reporting burden across CMS hospital quality programs. However, with the finalization of our proposal to remove HAI chart-abstracted measures from the Hospital IQR Program, we anticipate a total burden shift of 43,200 hours and approximately $1.6 million, as a result of no longer needing to validate those HAI measures under the Hospital IQR Program and beginning the validation process under the HAC Reduction Program.

- *Changes to the Hospital Inpatient Quality Reporting (IQR) Program.* Across 3,300 IPPS hospitals, we estimate that our finalized requirements for the Hospital IQR Program in this final rule will result in the following changes to costs and burdens related to information collection for this program, compared to previously adopted requirements: (1) A total collection of information burden reduction of 1,046,138 hours and a total cost reduction of approximately $38.3 million for the CY 2019 reporting period/FY 2021 payment determination, due to the removal of ED–1, IMM–2, and VTE–6 measures; and (2) a total collection of information burden reduction of 858,000 hours and a total cost reduction of $31.3 million for the CY 2020 reporting period/FY 2022 payment determination due to the removal of ED–2; and (3) a total collection of information burden reduction of 43,200 hours and a total of $1.6 million for the CY 2021 reporting period/FY 2023 payment determination due to validation of the NHSN HAI measures no longer being conducted under the Hospital IQR Program once the HAC Reduction Program begins validating these measures, as discussed

in the preamble of this final rule for the HAC Reduction Program.

Further, we anticipate that the removal of 39 measures will result in a reduction in costs unrelated to information collection. For example, it may be costly for health care providers to track the confidential feedback, preview reports, and publicly reported information on a measure where we use the measure in more than one program. Also, when measures are in multiple programs, maintaining the specifications for those measures, as well as the tools we need to collect, validate, analyze, and publicly report the measure data may result in costs to CMS. In addition, beneficiaries may find it confusing to see public reporting on the same measure in different programs. We anticipate that our finalized policies will reduce the above-described costs.

- *Changes Related to the LTCH QRP.* In this final rule, we are removing two measures beginning with the FY 2020 LTCH QRP and one measure beginning with the FY 2021 LTCH QRP, for a total of three measures. We also are adopting a new quality measure removal factor for the LTCH QRP. We estimate that the impact of these changes is a reduction in costs of approximately $1,148 per LTCH annually or approximately $482,469 for all LTCHs annually.
- *Changes to the Medicare and Medicaid Promoting Interoperability Programs.* We believe that, overall, the finalized proposals in this final rule will reduce burden, as described in detail in section XIV.B.9. of the preamble and Appendix A, section I.N. of this final rule.

B. Background Summary

1. Acute Care Hospital Inpatient Prospective Payment System (IPPS)

Section 1886(d) of the Social Security Act (the Act) sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires the Secretary to use a prospective payment system (PPS) to pay for the capital-related costs of inpatient hospital services for these ''subsection (d) hospitals.'' Under these PPSs, Medicare payment for hospital inpatient operating and capital-related costs is made at predetermined, specific rates for each hospital discharge. Discharges are classified according to a list of diagnosis-related groups (DRGs).

The base payment rate is comprised of a standardized amount that is divided into a labor-related share and a nonlabor-related share. The labor-related share is adjusted by the wage index applicable to the area where the hospital is located. If the hospital is located in Alaska or Hawaii, the nonlabor-related share is adjusted by a cost-of-living adjustment factor. This base payment rate is multiplied by the DRG relative weight.

If the hospital treats a high percentage of certain low-income patients, it receives a percentage add-on payment applied to the DRG-adjusted base payment rate. This add-on payment, known as the disproportionate share hospital (DSH) adjustment, provides for a percentage increase in Medicare payments to hospitals that qualify under either of two statutory formulas designed to identify hospitals that serve a disproportionate share of low-income patients. For qualifying hospitals, the amount of this adjustment varies based on the outcome of the statutory calculations. The Affordable Care Act revised the Medicare DSH payment methodology and provides for a new additional Medicare payment that considers the amount of uncompensated care beginning on October 1, 2013.

If the hospital is training residents in an approved residency program(s), it receives a percentage add-on payment for each case paid under the IPPS, known as the indirect medical education (IME) adjustment. This percentage varies, depending on the ratio of residents to beds.

Additional payments may be made for cases that involve new technologies or medical services that have been approved for special add-on payments. To qualify, a new technology or medical service must demonstrate that it is a substantial clinical improvement over technologies or services otherwise available, and that, absent an add-on payment, it would be inadequately paid under the regular DRG payment.

The costs incurred by the hospital for a case are evaluated to determine whether the hospital is eligible for an additional payment as an outlier case. This additional payment is designed to protect the hospital from large financial losses due to unusually expensive cases. Any eligible outlier payment is added to the DRG-adjusted base payment rate, plus any DSH, IME, and new technology or medical service add-on adjustments.

Although payments to most hospitals under the IPPS are made on the basis of the standardized amounts, some categories of hospitals are paid in whole or in part based on their hospital-specific rate, which is determined from their costs in a base year. For example, sole community hospitals (SCHs) receive the higher of a hospital-specific rate based on their costs in a base year (the highest of FY 1982, FY 1987, FY 1996, or FY 2006) or the IPPS Federal rate based on the standardized amount. SCHs are the sole source of care in their areas. Specifically, section 1886(d)(5)(D)(iii) of the Act defines an SCH as a hospital that is located more than 35 road miles from another hospital or that, by reason of factors such as an isolated location, weather conditions, travel conditions, or absence of other like hospitals (as determined by the Secretary), is the sole source of hospital inpatient services reasonably available to Medicare beneficiaries. In addition, certain rural hospitals previously designated by the Secretary as essential access community hospitals are considered SCHs.

Under current law, the Medicare-dependent, small rural hospital (MDH) program is effective through FY 2022. Through and including FY 2006, an MDH received the higher of the Federal rate or the Federal rate plus 50 percent of the amount by which the Federal rate was exceeded by the higher of its FY 1982 or FY 1987 hospital-specific rate. For discharges occurring on or after October 1, 2007, but before October 1, 2022, an MDH receives the higher of the Federal rate or the Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the highest of its FY 1982, FY 1987, or FY 2002 hospital-specific rate. MDHs are a major source of care for Medicare beneficiaries in their areas. Section 1886(d)(5)(G)(iv) of the Act defines an MDH as a hospital that is located in a rural area (or, as amended by the Bipartisan Budget Act of 2018, a hospital located in a State with no rural area that meets certain statutory criteria), has not more than 100 beds, is not an SCH, and has a high percentage of Medicare discharges (not less than 60 percent of its inpatient days or discharges in its cost reporting year beginning in FY 1987 or in two of its three most recently settled Medicare cost reporting years).

Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of inpatient hospital services in accordance with a prospective payment system established by the Secretary. The basic methodology for determining capital prospective payments is set forth in our regulations at 42 CFR 412.308 and 412.312. Under the capital IPPS, payments are adjusted by the same DRG for the case as they are under the operating IPPS. Capital IPPS payments are also adjusted for IME and DSH, similar to the adjustments made under the operating IPPS. In addition, hospitals may receive outlier payments for those cases that have unusually high costs.

The existing regulations governing payments to hospitals under the IPPS are located in 42 CFR part 412, subparts A through M.

2. Hospitals and Hospital Units Excluded From the IPPS

Under section 1886(d)(1)(B) of the Act, as amended, certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Inpatient rehabilitation facility (IRF) hospitals and units; long-term care hospitals (LTCHs); psychiatric hospitals and units; children's hospitals; cancer hospitals; extended neoplastic disease care hospitals, and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS. Various sections of the Balanced Budget Act of 1997 (BBA, Pub. L. 105–33), the Medicare, Medicaid and SCHIP [State Children's Health Insurance Program] Balanced Budget Refinement Act of 1999 (BBRA, Pub. L. 106–113), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA, Pub. L. 106–554) provide for the implementation of PPSs for IRF hospitals and units, LTCHs, and psychiatric hospitals and units (referred to as inpatient psychiatric facilities (IPFs)). (We note that the annual updates to the LTCH PPS are included along with the IPPS annual update in this document. Updates to the IRF PPS and IPF PPS are issued as separate documents.) Children's hospitals, cancer hospitals, hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa), and RNHCIs continue to be paid solely under a reasonable cost-based system, subject to a rate-of-increase ceiling on inpatient operating costs. Similarly, extended neoplastic disease care hospitals are paid on a reasonable cost basis, subject to a rate-of-increase ceiling on inpatient operating costs.

The existing regulations governing payments to excluded hospitals and hospital units are located in 42 CFR parts 412 and 413.

3. Long-Term Care Hospital Prospective Payment System (LTCH PPS)

The Medicare prospective payment system (PPS) for LTCHs applies to hospitals described in section 1886(d)(1)(B)(iv) of the Act, effective for cost reporting periods beginning on or after October 1, 2002. The LTCH PPS was established under the authority of sections 123 of the BBRA and section 307(b) of the BIPA (as codified under section 1886(m)(1) of the Act). During the 5-year (optional) transition period, a LTCH's payment under the PPS was based on an increasing proportion of the LTCH Federal rate with a corresponding decreasing proportion based on reasonable cost principles. Effective for cost reporting periods beginning on or after October 1, 2006 through September 30, 2015 all LTCHs were paid 100 percent of the Federal rate. Section 1206(a) of the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) established the site neutral payment rate under the LTCH PPS, which made the LTCH PPS a dual rate payment system beginning in FY 2016. Under this statute, based on a rolling effective date that is linked to the date on which a given LTCH's Federal FY 2016 cost reporting period begins, LTCHs are generally paid for discharges at the site neutral payment rate unless the discharge meets the patient criteria for payment at the LTCH PPS standard Federal payment rate. The existing regulations governing payment under the LTCH PPS are located in 42 CFR part 412, subpart O. Beginning October 1, 2009, we issue the annual updates to the LTCH PPS in the same documents that update the IPPS (73 FR 26797 through 26798).

4. Critical Access Hospitals (CAHs)

Under sections 1814(l), 1820, and 1834(g) of the Act, payments made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services are generally based on 101 percent of reasonable cost. Reasonable cost is determined under the provisions of section 1861(v) of the Act and existing regulations under 42 CFR part 413.

5. Payments for Graduate Medical Education (GME)

Under section 1886(a)(4) of the Act, costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act. The amount of payment for direct GME costs for a cost reporting period is based on the hospital's number of residents in that period and the hospital's costs per resident in a base year. The existing regulations governing payments to the various types of hospitals are located in 42 CFR part 413.

C. Summary of Provisions of Recent Legislation Implemented in This Final Rule

1. Pathway for SGR Reform Act of 2013 (Pub. L. 113–67)

The Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) introduced new payment rules in the LTCH PPS. Under section 1206 of this law, discharges in cost reporting periods beginning on or after October 1, 2015, under the LTCH PPS, receive payment under a site neutral rate unless the discharge meets certain patient-specific criteria. In this final rule, we are continuing to update certain policies that implemented provisions under section 1206 of the Pathway for SGR Reform Act.

2. Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) (Pub. L. 113–185)

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) (Pub. L. 113–185), enacted on October 6, 2014, made a number of changes that affect the Long-Term Care Hospital Quality Reporting Program (LTCH QRP). In this final rule, we are continuing to implement portions of section 1899B of the Act, as added by section 2(a) of the IMPACT Act, which, in part, requires LTCHs, among other post-acute care providers, to report standardized patient assessment data, data on quality measures, and data on resource use and other measures.

3. The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10)

Section 414 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA, Pub. L. 114–10) specifies a 0.5 percent positive adjustment to the standardized amount of Medicare payments to acute care hospitals for FYs 2018 through 2023. These adjustments follow the recoupment adjustment to the standardized amounts under section 1886(d) of the Act based upon the Secretary's estimates for discharges occurring from FYs 2014 through 2017 to fully offset $11 billion, in accordance with section 631 of the ATRA. The FY 2018 adjustment was subsequently adjusted to 0.4588 percent by section 15005 of the 21st Century Cures Act.

4. The 21st Century Cures Act (Pub. L. 114–255)

The 21st Century Cures Act (Pub. L. 114–255), enacted on December 13, 2016, contained the following provision affecting payments under the Hospital Readmissions Reduction Program,

which we are continuing to implement in this final rule:

• Section 15002, which amended section 1886(q)(3) of the Act by adding subparagraphs (D) and (E), which requires the Secretary to develop a methodology for calculating the excess readmissions adjustment factor for the Hospital Readmissions Reduction Program based on cohorts defined by the percentage of dual-eligible patients (that is, patients who are eligible for both Medicare and full-benefit Medicaid coverage) cared for by a hospital. In this final rule, we are continuing to implement changes to the payment adjustment factor to assess penalties based on a hospital's performance, relative to other hospitals treating a similar proportion of dual-eligible patients.

5. The Bipartisan Budget Act of 2018 (Pub. L. 115–123)

The Bipartisan Budget Act of 2018 (Pub. L. 115–123), enacted on February 9, 2018, contains provisions affecting payments under the IPPS and the LTCH PPS, which we are implementing or continuing to implement in this final rule:

• Section 50204 amended section 1886(d)(12) of the Act to provide for certain temporary changes to the low-volume hospital payment adjustment policy for FYs 2018 through 2022. For FY 2018, this provision extends the qualifying criteria and payment adjustment formula that applied for FYs 2011 through 2017. For FYs 2019 through 2022, this provision modifies the discharge criterion and payment adjustment formula. In FY 2023 and subsequent fiscal years, the qualifying criteria and payment adjustment revert to the requirements that were in effect for FYs 2005 through 2010.

• Section 50205 extends the MDH program through FY 2022. It also provides for an eligible hospital that is located in a State with no rural area to qualify for MDH status under an expanded definition if the hospital satisfies any of the statutory criteria at section 1886(d)(8)(E)(ii)(I), (II) (as of January 1, 2018), or (III) of the Act to be reclassified as rural.

• Section 51005(a) modified section 1886(m)(6) of the Act by extending the blended payment rate for site neutral payment rate LTCH discharges for cost reporting periods beginning in FY 2016 by an additional 2 years (FYs 2018 and 2019). In addition, section 51005(b) reduces the LTCH IPPS comparable per diem amount used in the site neutral payment rate for FYs 2018 through 2026 by 4.6 percent. In this final rule, we are making conforming changes to the existing regulations.

• Section 53109 modified section 1886(d)(5)(J) of the Act to require that, beginning in FY 2019, discharges to hospice care also qualify as a postacute care transfer and are subject to payment adjustments.

D. Issuance of a Notice of Proposed Rulemaking

In the proposed rule that appeared in the **Federal Register** on May 7, 2018 (83 FR 20164), we set forth proposed payment and policy changes to the Medicare IPPS for FY 2019 operating costs and for capital-related costs of acute care hospitals and certain hospitals and hospital units that are excluded from IPPS. In addition, we set forth proposed changes to the payment rates, factors, and other payment and policy-related changes to programs associated with payment rate policies under the LTCH PPS for FY 2019.

Below is a general summary of the major changes that we proposed to make in the proposed rule.

1. Proposed Changes to MS–DRG Classifications and Recalibrations of Relative Weights

In section II. of the preamble of the proposed rule, we included—

• Proposed changes to MS–DRG classifications based on our yearly review for FY 2019.

• Proposed adjustment to the standardized amounts under section 1886(d) of the Act for FY 2019 in accordance with the amendments made to section 7(b)(1)(B) of Public Law 110–90 by section 414 of the MACRA.

• Proposed recalibration of the MS–DRG relative weights.

• A discussion of the proposed FY 2019 status of new technologies approved for add-on payments for FY 2018 and a presentation of our evaluation and analysis of the FY 2019 applicants for add-on payments for high-cost new medical services and technologies (including public input, as directed by Pub. L. 108–173, obtained in a town hall meeting).

2. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals

In section III. of the preamble to the proposed rule, we proposed to make revisions to the wage index for acute care hospitals and the annual update of the wage data. Specific issues addressed include, but are not limited to, the following:

• The proposed FY 2019 wage index update using wage data from cost reporting periods beginning in FY 2015.

• Proposal regarding other wage-related costs in the wage index.

• Calculation of the proposed occupational mix adjustment for FY 2019 based on the 2016 Occupational Mix Survey.

• Analysis and implementation of the proposed FY 2019 occupational mix adjustment to the wage index for acute care hospitals.

• Proposed application of the rural floor and the frontier State floor and the proposed expiration of the imputed floor.

• Proposals to codify policies regarding multicampus hospitals.

• Proposed revisions to the wage index for acute care hospitals, based on hospital redesignations and reclassifications under sections 1886(d)(8)(B), (d)(8)(E), and (d)(10) of the Act.

• The proposed adjustment to the wage index for acute care hospitals for FY 2019 based on commuting patterns of hospital employees who reside in a county and work in a different area with a higher wage index.

• Determination of the labor-related share for the proposed FY 2019 wage index.

• Public comment solicitation on wage index disparities.

3. Other Decisions and Proposed Changes to the IPPS for Operating Costs

In section IV. of the preamble of the proposed rule, we discussed proposed changes or clarifications of a number of the provisions of the regulations in 42 CFR parts 412 and 413, including the following:

• Proposed changes to MS–DRGs subject to the postacute care transfer policy and special payment policy and implementation of the statutory changes to the postacute care transfer policy.

• Proposed changes to the inpatient hospital update for FY 2019.

• Proposed changes related to the statutory changes to the low-volume hospital payment adjustment policy.

• Proposed updated national and regional case-mix values and discharges for purposes of determining RRC status.

• The statutorily required IME adjustment factor for FY 2019.

• Proposed changes to the methodologies for determining Medicare DSH payments and the additional payments for uncompensated care.

• Proposed changes to the effective date of SCH and MDH classification status determinations.

• Proposed changes related to the extension of the MDH program.

• Proposed changes to the rules for payment adjustments under the

Hospital Readmissions Reduction Program based on hospital readmission measures and the process for hospital review and correction of those rates for FY 2019.

- Proposed changes to the requirements and provision of value-based incentive payments under the Hospital Value-Based Purchasing Program.
- Proposed requirements for payment adjustments to hospitals under the HAC Reduction Program for FY 2019.
- Proposed changes to Medicare GME affiliation agreements for new urban teaching hospitals.
- Discussion of and proposals relating to the implementation of the Rural Community Hospital Demonstration Program in FY 2019.
- Proposed revisions of the hospital inpatient admission orders documentation requirements.

4. Proposed FY 2019 Policy Governing the IPPS for Capital-Related Costs

In section V. of the preamble to the proposed rule, we discussed the proposed payment policy requirements for capital-related costs and capital payments to hospitals for FY 2019.

5. Proposed Changes to the Payment Rates for Certain Excluded Hospitals: Rate-of-Increase Percentages

In section VI. of the preamble of the proposed rule, we discussed—

- Proposed changes to payments to certain excluded hospitals for FY 2019.
- Proposed changes to the regulations governing satellite facilities.
- Proposed changes to the regulations governing excluded units of hospitals.
- Proposed continued implementation of the Frontier Community Health Integration Project (FCHIP) Demonstration.

6. Proposed Changes to the LTCH PPS

In section VII. of the preamble of the proposed rule, we set forth—

- Proposed changes to the LTCH PPS Federal payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2019.
- Proposed changes to the blended payment rate for site neutral payment rate cases.
- Proposed elimination of the 25-percent threshold policy.

7. Proposed Changes Relating to Quality Data Reporting for Specific Providers and Suppliers

In section VIII. of the preamble of the proposed rule, we address—

- Proposed requirements for the Hospital Inpatient Quality Reporting (IQR) Program.
- Proposed changes to the requirements for the quality reporting program for PPS-exempt cancer hospitals (PCHQR Program).
- Proposed changes to the requirements under the LTCH Quality Reporting Program (LTCH QRP).
- Proposed changes to requirements pertaining to the clinical quality measurement for eligible hospitals and CAHs participating in the Medicare and Medicaid Promoting Interoperability Programs.

8. Proposed Revision to the Supporting Documentation Requirements for an Acceptable Medicare Cost Report Submission

In section IX. of the preamble of the proposed rule, we set forth proposed revisions to the supporting documentation required for an acceptable Medicare cost report submission.

9. Requirements for Hospitals To Make Public List of Standard Charges

In section X. of the preamble of the proposed rule, we discussed our efforts to further improve the public accessibility of hospital standard charge information, effective January 1, 2019, in accordance with section 2718(e) of the Public Health Service Act.

10. Proposed Revisions Regarding Physician Certification and Recertification of Claims

In section XI. of the preamble of the proposed rule, we set forth proposed revisions to the requirements for supporting information used for physician certification and recertification of claims.

11. Request for Information

In section XII. of the preamble of the proposed rule, we included a request for information on the possible establishment of CMS patient health and safety requirements for hospitals and other Medicare- and Medicaid-participating providers and suppliers for interoperable electronic health records and systems for electronic health care information exchange.

12. Determining Prospective Payment Operating and Capital Rates and Rate-of-Increase Limits for Acute Care Hospitals

In sections II. and III. of the Addendum to the proposed rule, we set forth the proposed changes to the amounts and factors for determining the proposed FY 2019 prospective payment rates for operating costs and capital-related costs for acute care hospitals. We proposed to establish the threshold amounts for outlier cases. In addition, in section IV. of the Addendum to the proposed rule, we addressed the update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 2019 for certain hospitals excluded from the IPPS.

13. Determining Prospective Payment Rates for LTCHs

In section V. of the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2019 LTCH PPS standard Federal payment rate and other factors used to determine LTCH PPS payments under both the LTCH PPS standard Federal payment rate and the site neutral payment rate in FY 2019. We proposed to establish the adjustments for wage levels, the labor-related share, the cost-of-living adjustment, and high-cost outliers, including the applicable fixed-loss amounts and the LTCH cost-to-charge ratios (CCRs) for both payment rates.

14. Impact Analysis

In Appendix A of the proposed rule, we set forth an analysis of the impact the proposed changes would have on affected acute care hospitals, CAHs, LTCHs, and PCHs.

15. Recommendation of Update Factors for Operating Cost Rates of Payment for Hospital Inpatient Services

In Appendix B of the proposed rule, as required by sections 1886(e)(4) and (e)(5) of the Act, we provided our recommendations of the appropriate percentage changes for FY 2019 for the following:

- A single average standardized amount for all areas for hospital inpatient services paid under the IPPS for operating costs of acute care hospitals (and hospital-specific rates applicable to SCHs and MDHs).
- Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by certain hospitals excluded from the IPPS.
- The LTCH PPS standard Federal payment rate and the site neutral payment rate for hospital inpatient services provided for LTCH PPS discharges.

16. Discussion of Medicare Payment Advisory Commission Recommendations

Under section 1805(b) of the Act, MedPAC is required to submit a report to Congress, no later than March 15 of each year, in which MedPAC reviews and makes recommendations on Medicare payment policies. MedPAC's March 2018 recommendations concerning hospital inpatient payment

policies addressed the update factor for hospital inpatient operating costs and capital-related costs for hospitals under the IPPS. We addressed these recommendations in Appendix B of the proposed rule. For further information relating specifically to the MedPAC March 2018 report or to obtain a copy of the report, contact MedPAC at (202) 220–3700 or visit MedPAC's website at: *http://www.medpac.gov*.

II. Changes to Medicare Severity Diagnosis-Related Group (MS–DRG) Classifications and Relative Weights

A. Background

Section 1886(d) of the Act specifies that the Secretary shall establish a classification system (referred to as diagnosis-related groups (DRGs)) for inpatient discharges and adjust payments under the IPPS based on appropriate weighting factors assigned to each DRG. Therefore, under the IPPS, Medicare pays for inpatient hospital services on a rate per discharge basis that varies according to the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case multiplies an individual hospital's payment rate per case by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG, relative to the average resources used to treat cases in all DRGs.

Section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and relative weights at least annually to account for changes in resource consumption. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

B. MS–DRG Reclassifications

For general information about the MS–DRG system, including yearly reviews and changes to the MS–DRGs, we refer readers to the previous discussions in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43764 through 43766) and the FYs 2011 through 2018 IPPS/LTCH PPS final rules (75 FR 50053 through 50055; 76 FR 51485 through 51487; 77 FR 53273; 78 FR 50512; 79 FR 49871; 80 FR 49342; 81 FR 56787 through 56872; and 82 FR 38010 through 38085, respectively).

C. Adoption of the MS–DRGs in FY 2008

For information on the adoption of the MS–DRGs in FY 2008, we refer readers to the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189).

D. FY 2019 MS–DRG Documentation and Coding Adjustment

1. Background on the Prospective MS–DRG Documentation and Coding Adjustments for FY 2008 and FY 2009 Authorized by Public Law 110–90 and the Recoupment or Repayment Adjustment Authorized by Section 631 of the American Taxpayer Relief Act of 2012 (ATRA)

In the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189), we adopted the MS–DRG patient classification system for the IPPS, effective October 1, 2007, to better recognize severity of illness in Medicare payment rates for acute care hospitals. The adoption of the MS–DRG system resulted in the expansion of the number of DRGs from 538 in FY 2007 to 745 in FY 2008. By increasing the number of MS–DRGs and more fully taking into account patient severity of illness in Medicare payment rates for acute care hospitals, MS–DRGs encourage hospitals to improve their documentation and coding of patient diagnoses.

In the FY 2008 IPPS final rule with comment period (72 FR 47175 through 47186), we indicated that the adoption of the MS–DRGs had the potential to lead to increases in aggregate payments without a corresponding increase in actual patient severity of illness due to the incentives for additional documentation and coding. In that final rule with comment period, we exercised our authority under section 1886(d)(3)(A)(vi) of the Act, which authorizes us to maintain budget neutrality by adjusting the national standardized amount, to eliminate the estimated effect of changes in coding or classification that do not reflect real changes in case-mix. Our actuaries estimated that maintaining budget neutrality required an adjustment of −4.8 percentage points to the national standardized amount. We provided for phasing in this −4.8 percentage point adjustment over 3 years. Specifically, we established prospective documentation and coding adjustments of −1.2 percentage points for FY 2008, −1.8 percentage points for FY 2009, and −1.8 percentage points for FY 2010.

On September 29, 2007, Congress enacted the TMA [Transitional Medical Assistance], Abstinence Education, and QI [Qualifying Individuals] Programs Extension Act of 2007 (Pub. L. 110–90). Section 7(a) of Public Law 110–90 reduced the documentation and coding adjustment made as a result of the MS–DRG system that we adopted in the FY 2008 IPPS final rule with comment period to −0.6 percentage point for FY 2008 and −0.9 percentage point for FY 2009.

As discussed in prior year rulemakings, and most recently in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56780 through 56782), we implemented a series of adjustments required under sections 7(b)(1)(A) and 7(b)(1)(B) of Public Law 110–90, based on a retrospective review of FY 2008 and FY 2009 claims data. We completed these adjustments in FY 2013 but indicated in the FY 2013 IPPS/LTCH PPS final rule (77 FR 53274 through 53275) that delaying full implementation of the adjustment required under section 7(b)(1)(A) of Public Law 110–90 until FY 2013 resulted in payments in FY 2010 through FY 2012 being overstated, and that these overpayments could not be recovered under Public Law 110–90.

In addition, as discussed in prior rulemakings and most recently in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38008 through 38009), section 631 of the ATRA amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment or adjustments totaling $11 billion by FY 2017. This adjustment represented the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013.

2. Adjustment Made for FY 2018 as Required Under Section 414 of Public Law 114–10 (MACRA) and Section 15005 of Public Law 114–255

As stated in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56785), once the recoupment required under section 631 of the ATRA was complete, we had anticipated making a single positive adjustment in FY 2018 to offset the reductions required to recoup the $11 billion under section 631 of the ATRA. However, section 414 of the MACRA (which was enacted on April 16, 2015) replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percentage point positive adjustment for each of FYs 2018 through 2023. In the FY 2017 rulemaking, we indicated that we would address the adjustments for FY 2018 and later fiscal years in future rulemaking. Section 15005 of the 21st Century Cures Act (Pub. L. 114–255), which was enacted on December 13, 2016, amended section 7(b)(1)(B) of the TMA, as amended by section 631 of the ATRA and section 414 of the MACRA, to reduce the

adjustment for FY 2018 from a 0.5 percentage point to a 0.4588 percentage point. As we discussed in the FY 2018 rulemaking, we believe the directive under section 15005 of Public Law 114–255 is clear. Therefore, in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38009) for FY 2018, we implemented the required +0.4588 percentage point adjustment to the standardized amount. This is a permanent adjustment to payment rates. While we did not address future adjustments required under section 414 of the MACRA and section 15005 of Public Law 114–255 at that time, we stated that we expected to propose positive 0.5 percentage point adjustments to the standardized amounts for FYs 2019 through 2023.

3. Adjustment for FY 2019

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20176 and 20177), consistent with the requirements of section 414 of the MACRA, we proposed to implement a positive 0.5 percentage point adjustment to the standardized amount for FY 2019. We indicated that this would be a permanent adjustment to payment rates. We stated in the proposed rule that we plan to propose future adjustments required under section 414 of the MACRA for FYs 2020 through 2023 in future rulemaking.

Comment: Several commenters stated that CMS has misinterpreted the Congressional directives regarding the level of positive adjustment required for FY 2018 and FY 2019. The commenters contended that, while the positive adjustments required under section 414 of the MACRA would only total 3.0 percentage points by FY 2023, the levels of these adjustments were determined using an estimated positive ''3.2 percent baseline'' adjustment that otherwise would have been made in FY 2018. The commenters believed that because CMS implemented an adjustment of −1.5 percentage points instead of the expected −0.8 percentage points in FY 2017, totaling −3.9 percentage points overall, CMS has imposed a permanent −0.7 percentage point negative adjustment beyond its statutory authority, contravening what the commenters asserted was Congress' clear instructions and intent. A majority of the commenters requested that CMS reverse its previous position and implement additional 0.7 percentage point adjustments for both FY 2018 and FY 2019. Some of the commenters requested that CMS use its statutory discretion to ensure that all 3.9 percentage points in negative adjustment be restored. In addition, some of the commenters, while acknowledging that CMS may be bound by law, expressed opposition to the permanent reductions and requested that CMS refrain from making any additional coding adjustments in the future.

Response: As we discussed in the FY 2019 IPPS/LTCH PPS proposed rule, we believe section 414 of the MACRA and section 15005 of the 21st Century Cures Act clearly set forth the levels of positive adjustments for FYs 2018 through 2023. We are not convinced that the adjustments prescribed by MACRA were predicated on a specific ''baseline'' adjustment level. While we had anticipated making a positive adjustment in FY 2018 to offset the reductions required to recoup the $11 billion under section 631 of the ATRA, section 414 of the MACRA required that we implement a 0.5 percentage point positive adjustment for each of FYs 2018 through 2023, and not the single positive adjustment we intended to make in FY 2018. As noted by the commenters, and discussed in the FY 2017 IPPS/LTCH PPS final rule, by phasing in a total positive adjustment of only 3.0 percentage points, section 414 of the MACRA would not fully restore even the 3.2 percentage points adjustment originally estimated by CMS in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515). Moreover, as discussed in the FY 2018 IPPS/LTCH PPS final rule, Public Law 114–255, which further reduced the positive adjustment required for FY 2018 from 0.5 percentage point to 0.4588 percentage point, was enacted on December 13, 2016, after CMS had proposed and finalized the final negative −1.5 percentage points adjustment required under section 631 of the ATRA. We see no evidence that Congress enacted these adjustments with the intent that CMS would make an additional +0.7 percentage point adjustment in FY 2018 to compensate for the higher than expected final ATRA adjustment made in FY 2017.

After consideration of the public comments we received, we are finalizing the +0.5 percentage point adjustment to the standardized amount for FY 2019, as required under section 414 of the MACRA.

E. Refinement of the MS–DRG Relative Weight Calculation

1. Background

Beginning in FY 2007, we implemented relative weights for DRGs based on cost report data instead of charge information. We refer readers to the FY 2007 IPPS final rule (71 FR 47882) for a detailed discussion of our final policy for calculating the cost-based DRG relative weights and to the FY 2008 IPPS final rule with comment period (72 FR 47199) for information on how we blended relative weights based on the CMS DRGs and MS–DRGs. We also refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56785 through 56787) for a detailed discussion of the history of changes to the number of cost centers used in calculating the DRG relative weights. Since FY 2014, we have calculated the IPPS MS–DRG relative weights using 19 CCRs, which now include distinct CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization.

2. Discussion of Policy for FY 2019

Consistent with our established policy, we calculated the final MS–DRG relative weights for FY 2019 using two data sources: the MedPAR file as the claims data source and the HCRIS as the cost report data source. We adjusted the charges from the claims to costs by applying the 19 national average CCRs developed from the cost reports. The description of the calculation of the 19 CCRs and the MS–DRG relative weights for FY 2019 is included in section II.G. of the preamble to this FY 2019 IPPS/LTCH PPS final rule. As we did with the FY 2018 IPPS/LTCH PPS final rule, for this FY 2019 final rule, we are providing the version of the HCRIS from which we calculated these 19 CCRs on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* Click on the link on the left side of the screen titled ''FY 2019 IPPS Final Rule Home Page'' or ''Acute Inpatient Files for Download.''

Comment: One commenter requested that CMS use a single diagnostic radiology CCR to set weights, rather than using the separate CT and MRI cost centers. The commenter requested that if CMS maintains the separate CT and MRI cost centers, CMS not include cost reports from hospitals that use the ''square foot'' allocation methodology. The commenter provided an analysis to support its assertion that the CCRs for CT and MRI are incorrect and are inappropriately reducing payments under the IPPS. The commenter indicated that the charge compression hypothesis has been shown to be false with the use of the separate CT and MRI cost centers. The commenter discussed problems with cost allocation to the CT and MRI cost centers and referenced discussions in prior IPPS/LTCH PPS rules about this issue. The commenter acknowledged that CMS did not include a specific proposal in the FY 2019 proposed rule regarding this issue.

Response: As the commenter noted, we did not make any proposal for FY 2019 relating to the number of cost centers used to calculate the relative weights. As noted previously and discussed in detail in prior rulemakings, and as noted in response to a similar public comment received last year, we have calculated the IPPS MS–DRG relative weights using 19 CCRs, including distinct CCRs for MRIs and CT scans, since FY 2014. We refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56785) for a detailed discussion of the basis for establishing these 19 CCRs. We further note that in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50518 through 50523), we presented data analyses using distinct CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization.

We will continue to explore ways in which we can improve the accuracy of the cost report data and calculated CCRs used in the cost estimation process.

F. Changes to Specific MS–DRG Classifications

1. Discussion of Changes to Coding System and Basis for FY 2019 MS–DRG Updates

a. Conversion of MS–DRGs to the International Classification of Diseases, 10th Revision (ICD–10)

As of October 1, 2015, providers use the International Classification of Diseases, 10th Revision (ICD–10) coding system to report diagnoses and procedures for Medicare hospital inpatient services under the MS–DRG system instead of the ICD–9–CM coding system, which was used through September 30, 2015. The ICD–10 coding system includes the International Classification of Diseases, 10th Revision, Clinical Modification (ICD–10–CM) for diagnosis coding and the International Classification of Diseases, 10th Revision, Procedure Coding System (ICD–10–PCS) for inpatient hospital procedure coding, as well as the ICD–10–CM and ICD–10–PCS Official Guidelines for Coding and Reporting. For a detailed discussion of the conversion of the MS–DRGs to ICD–10, we refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56787 through 56789).

b. Basis for FY 2019 MS–DRG Updates

CMS has previously encouraged input from our stakeholders concerning the annual IPPS updates when that input was made available to us by December 7 of the year prior to the next annual proposed rule update. As discussed in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38010), as we work with the public to examine the ICD–10 claims data used for updates to the ICD–10 MS DRGs, we would like to examine areas where the MS–DRGs can be improved, which will require additional time for us to review requests from the public to make specific updates, analyze claims data, and consider any proposed updates. Given the need for more time to carefully evaluate requests and propose updates, we changed the deadline to request updates to the MS–DRGs to November 1 of each year. This will provide an additional 5 weeks for the data analysis and review process. Interested parties had to submit any comments and suggestions for FY 2019 by November 1, 2017, and are encouraged to submit any comments and suggestions for FY 2020 by November 1, 2018 via the CMS MS–DRG Classification Change Request Mailbox located at: *MSDRGClassificationChange@cms.hhs.gov*. The comments that were submitted in a timely manner for FY 2019 are discussed in this section of the preamble of this final rule.

Following are the changes that we proposed to the MS–DRGs for FY 2019 in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20177 through 20257). We invited public comments on each of the MS–DRG classification proposed changes, as well as our proposals to maintain certain existing MS–DRG classifications discussed in the proposed rule. In some cases, we proposed changes to the MS–DRG classifications based on our analysis of claims data and consultation with our clinical advisors. In other cases, we proposed to maintain the existing MS–DRG classifications based on our analysis of claims data and consultation with our clinical advisors. For the FY 2019 IPPS/LTCH PPS proposed rule, our MS–DRG analysis was based on ICD–10 claims data from the September 2017 update of the FY 2017 MedPAR file, which contains hospital bills received through September 30, 2017, for discharges occurring through September 30, 2017. In our discussion of the proposed MS–DRG reclassification changes, we referred to our analysis of claims data from the ''September 2017 update of the FY 2017 MedPAR file.''

In this FY 2019 IPPS/LTCH PPS final rule, we summarize the public comments we received on our proposals, present our responses, and state our final policies. For this FY 2019 final rule, we did not perform any further MS–DRG analysis of claims data. Therefore, all of the data analysis is based on claims data from the September 2017 update of the FY 2017 MedPAR file, which contains bills received through September 30, 2017, for discharges occurring through September 30, 2017.

As explained in previous rulemaking (76 FR 51487), in deciding whether to propose to make further modifications to the MS–DRGs for particular circumstances brought to our attention, we consider whether the resource consumption and clinical characteristics of the patients with a given set of conditions are significantly different than the remaining patients represented in the MS–DRG. We evaluate patient care costs using average costs and lengths of stay and rely on the judgment of our clinical advisors to determine whether patients are clinically distinct or similar to other patients represented in the MS–DRG. In evaluating resource costs, we consider both the absolute and percentage differences in average costs between the cases we select for review and the remainder of cases in the MS–DRG. We also consider variation in costs within these groups; that is, whether observed average differences are consistent across patients or attributable to cases that are extreme in terms of costs or length of stay, or both. Further, we consider the number of patients who will have a given set of characteristics and generally prefer not to create a new MS–DRG unless it would include a substantial number of cases.

In our examination of the claims data, we apply the following criteria established in FY 2008 (72 FR 47169) to determine if the creation of a new complication or comorbidity (CC) or major complication or comorbidity (MCC) subgroup within a base MS–DRG is warranted:

- A reduction in variance of costs of at least 3 percent;
- At least 5 percent of the patients in the MS–DRG fall within the CC or MCC subgroup;
- At least 500 cases are in the CC or MCC subgroup;
- There is at least a 20-percent difference in average costs between subgroups; and
- There is a $2,000 difference in average costs between subgroups.

In order to warrant creation of a CC or MCC subgroup within a base MS–DRG, the subgroup must meet all five of the criteria.

We are making the FY 2019 ICD–10 MS–DRG GROUPER and Medicare Code Editor (MCE) Software Version 36, the ICD–10 MS–DRG Definitions Manual files Version 36 and the Definitions of Medicare Code Edits Manual Version 36 available to the public on our CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-*

Payment/AcuteInpatientPPS/MS-DRG-Classifications-and-Software.html.

2. Pre-MDC

a. Heart Transplant or Implant of Heart Assist System

In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38012), we stated our intent to review the ICD–10 logic for Pre-MDC MS–DRGs 001 and 002 (Heart Transplant or Implant of Heart Assist System with and without MCC, respectively), as well as MS–DRG 215 (Other Heart Assist System Implant) and MS–DRGs 268 and 269 (Aortic and Heart Assist Procedures Except Pulsation Balloon with and without MCC, respectively) where procedures involving heart assist devices are currently assigned. We also encouraged the public to submit any comments on restructuring the MS–DRGs for heart assist system procedures to the CMS MS–DRG Classification Change Request Mailbox located at: *MSDRGClassificationChange@cms.hhs.gov* by November 1, 2017.

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20178 through 20179), the logic for Pre-MDC MS–DRGs 001 and 002 is comprised of two lists. The first list includes procedure codes identifying a heart transplant procedure, and the second list includes procedure codes identifying the implantation of a heart assist system. The list of procedure codes identifying the implantation of a heart assist system includes the following three codes.

ICD–10–PCS code	Code description
02HA0QZ	Insertion of implantable heart assist system into heart, open approach.
02HA3QZ	Insertion of implantable heart assist system into heart, percutaneous approach.
02HA4QZ	Insertion of implantable heart assist system into heart, percutaneous endoscopic approach.

In addition to these three procedure codes, there are also 33 pairs of code combinations or procedure code ''clusters'' that, when reported together, satisfy the logic for assignment to MS–DRGs 001 and 002. The code combinations are represented by two procedure codes and include either one code for the insertion of the device with one code for removal of the device or one code for the revision of the device with one code for the removal of the device. The 33 pairs of code combinations are listed below.

Code	Code description		Code	Code description
02HA0RS	Insertion of biventricular short-term external heart assist system into heart, open approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02HA0RS	Insertion of biventricular short-term external heart assist system into heart, open approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02HA0RS	Insertion of biventricular short-term external heart assist system into heart, open approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02HA0RZ	Insertion of short-term external heart assist system into heart, open approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02HA0RZ	Insertion of short-term external heart assist system into heart, open approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02HA0RZ	Insertion of short-term external heart assist system into heart, open approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02HA3RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02HA3RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02HA3RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02HA4RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02HA4RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02HA4RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02HA4RZ	Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02HA4RZ	Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.

Code	Code description		Code	Code description
02HA4RZ	Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02WA0QZ	Revision of implantable heart assist system in heart, open approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02WA0QZ	Revision of implantable heart assist system in heart, open approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02WA0QZ	Revision of implantable heart assist system in heart, open approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02WA0RZ	Revision of short-term external heart assist system in heart, open approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02WA0RZ	Revision of short-term external heart assist system in heart, open approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02WA0RZ	Revision of short-term external heart assist system in heart, open approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02WA3QZ	Revision of implantable heart assist system in heart, percutaneous approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02WA3QZ	Revision of implantable heart assist system in heart, percutaneous approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02WA3QZ	Revision of implantable heart assist system in heart, percutaneous approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02WA3RZ	Revision of short-term external heart assist system in heart, percutaneous approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02WA3RZ	Revision of short-term external heart assist system in heart, percutaneous approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02WA3RZ	Revision of short-term external heart assist system in heart, percutaneous approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02WA4QZ	Revision of implantable heart assist system in heart, percutaneous endoscopic approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02WA4QZ	Revision of implantable heart assist system in heart, percutaneous endoscopic approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02WA4QZ	Revision of implantable heart assist system in heart, percutaneous endoscopic approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02WA4RZ	Revision of short-term external heart assist system in heart, percutaneous endoscopic approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02WA4RZ	Revision of short-term external heart assist system in heart, percutaneous endoscopic approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02WA4RZ	Revision of short-term external heart assist system in heart, percutaneous endoscopic approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.

In response to our solicitation for public comments on restructuring the MS–DRGs for heart assist system procedures, commenters recommended that CMS maintain the current logic under the Pre-MDC MS–DRGs 001 and 002. Similar to the discussion in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38011 through 38012) involving MS–DRG 215 (Other Heart Assist System Implant), the commenters provided examples of common clinical scenarios involving a left ventricular assist device (LVAD) and included the procedure codes that were reported under the ICD–9 based MS–DRGs in comparison to the procedure codes reported under the ICD–10 MS–DRGs, which are reflected in the following table.

Procedure	ICD–9–CM procedure code	ICD–9 MS–DRG	ICD–10–PCS codes	ICD–10 MS–DRG
New LVAD inserted	37.66 (Insertion of implantable heart assist system).	001 or 002	02WA0QZ (Insertion of implantable heart assist system into heart, open approach). 02WA3QZ (Insertion of implantable heart assist system into heart, percutaneous approach). 02WA4QZ (Insertion of implantable heart assist system into heart, percutaneous endoscopic approach).	001 or 002

Procedure	ICD–9–CM procedure code	ICD–9 MS–DRG	ICD–10–PCS codes	ICD–10 MS–DRG
LVAD Exchange—existing LVAD is removed and replaced with either new LVAD system or new LVAD pump.	37.63 (Repair of heart assist system).	215	02PA0QZ (Removal of implantable heart assist system from heart, open approach). 02PA3QZ (Removal of implantable heart assist system from heart, percutaneous approach). 02PA4QZ (Removal of implantable heart assist system from heart, percutaneous endoscopic approach) and. 02WA0QZ (Insertion of implantable heart assist system into heart, open approach). 02WA3QZ (Insertion of implantable heart assist system into heart, percutaneous approach). 02WA4QZ (Insertion of implantable heart assist system into heart, percutaneous endoscopic approach).	001 or 002
LVAD revision and repair—existing LVAD is adjusted or repaired without removing the existing LVAD device.	37.63 (Repair of heart assist system).	215	02WA0QZ (Revision of implantable heart assist system in heart, open approach). 02WA3QZ (Revision of implantable heart assist system in heart, percutaneous approach). 02WA4QZ (Revision of implantable heart assist system in heart, percutaneous endoscopic approach).	215

The commenters noted that, for Pre-MDC MS–DRGs 001 and 002, the procedures involving the insertion of an implantable heart assist system, such as the insertion of a LVAD, and the procedures involving exchange of an LVAD (where an existing LVAD is removed and replaced with either a new LVAD or a new LVAD pump) demonstrate clinical similarities and utilize similar resources. Although the commenters recommended that CMS maintain the current logic under the Pre-MDC MS–DRGs 001 and 002, they also recommended that CMS continue to monitor the data in these MS–DRGs for future consideration of distinctions (for example, different approaches and evolving technologies) that may impact the clinical and resource use of patients undergoing procedures utilizing heart assist devices. The commenters also requested that coding guidance be issued for assignment of the correct ICD–10–PCS procedure codes describing LVAD exchanges to encourage accurate reporting of these procedures.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20180), we stated that we agree with the commenters that we should continue to monitor the data in Pre-MDC MS–DRGs 001 and 002 for future consideration of distinctions (for example, different approaches and evolving technologies) that may impact the clinical and resource use of patients undergoing procedures utilizing heart assist devices. In response to the request that coding guidance be issued for assignment of the correct ICD–10–PCS procedure codes describing LVAD exchanges to encourage accurate reporting of these procedures, as we noted in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38012), coding advice is issued independently from payment policy. We also noted that, historically, we have not provided coding advice in rulemaking with respect to policy (82 FR 38045). We collaborate with the American Hospital Association (AHA) through the Coding Clinic for ICD–10–CM and ICD–10–PCS to promote proper coding. We recommended that the requestor and other interested parties submit any questions pertaining to correct coding for these technologies to the AHA.

In response to the public comments we received on this topic, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20180), we provided the results of our claims analysis from the September 2017 update of the FY 2017 MedPAR file for cases in Pre-MDC MS–DRGs 001 and 002. Our findings are shown in the following table.

MS–DRGs FOR HEART TRANSPLANT OR IMPLANT OF HEART ASSIST SYSTEM

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 001—All cases	1,993	35.6	$185,660
MS–DRG 002—All cases	179	18.3	99,635

As shown in this table, for MS–DRG 001, there were a total of 1,993 cases with an average length of stay of 35.6 days and average costs of $185,660. For MS–DRG 002, there were a total of 179 cases with an average length of stay of 18.3 days and average costs of $99,635.

We then examined claims data in Pre-MDC MS–DRGs 001 and 002 for cases that reported one of the three procedure codes identifying the implantation of a heart assist system such as the LVAD. Our findings are shown in the following table.

MS–DRGs FOR HEART TRANSPLANT OR IMPLANT OF HEART ASSIST SYSTEM

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 001—All cases	1,993	35.6	$185,660

MS–DRGs FOR HEART TRANSPLANT OR IMPLANT OF HEART ASSIST SYSTEM—Continued

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 001—Cases with procedure code 02HA0QZ (Insertion of implantable heart assist system into heart, open approach)	1,260	35.5	206,663
MS–DRG 001—Cases with procedure code 02HA3QZ (Insertion of implantable heart assist system into heart, percutaneous approach)	1	8	33,889
MS–DRG 001—Cases with procedure code 02HA4QZ (Insertion of implantable heart assist system into heart, percutaneous endoscopic approach)	0	0	0
MS–DRG 002—All cases	179	18.3	99,635
MS–DRG 002—Cases with procedure code 02HA0QZ (Insertion of implantable heart assist system into heart, open approach)	82	19.9	131,957
MS–DRG 002—Cases with procedure code 02HA3QZ (Insertion of implantable heart assist system into heart, percutaneous approach)	0	0	0
MS–DRG 002—Cases with procedure code 02HA4QZ (Insertion of implantable heart assist system into heart, percutaneous endoscopic approach)	0	0	0

As shown in this table, for MS–DRG 001, there were a total of 1,260 cases reporting procedure code 02HA0QZ (Insertion of implantable heart assist system into heart, open approach) with an average length of stay of 35.5 days and average costs of $206,663. There was one case that reported procedure code 02HA3QZ (Insertion of implantable heart assist system into heart, percutaneous approach) with an average length of stay of 8 days and average costs of $33,889. There were no cases reporting procedure code 02HA4QZ (Insertion of implantable heart assist system into heart, percutaneous endoscopic approach). For MS–DRG 002, there were a total of 82 cases reporting procedure code 02HA0QZ (Insertion of implantable heart assist system into heart, open approach) with an average length of stay of 19.9 days and average costs of $131,957. There were no cases reporting procedure codes 02HA3QZ (Insertion of implantable heart assist system into heart, percutaneous approach) or 02HA4QZ (Insertion of implantable heart assist system into heart, percutaneous endoscopic approach).

We also examined the cases in MS–DRGs 001 and 002 that reported one of the possible 33 pairs of code combinations or clusters. Our findings are shown in the following 8 tables. The first table provides the total number of cases reporting a procedure code combination (or cluster) compared to all of the cases in the respective MS–DRG, followed by additional detailed tables showing the number of cases, average length of stay, and average costs for each specific code combination that was reported in the claims data.

HEART TRANSPLANT OR IMPLANT OF HEART ASSIST SYSTEM

MS–DRGs 001 and 002	Number of cases	Average length of stay	Average costs
MS–DRG 001—All cases	1,993	35.6	$185,660
MS–DRG 001—Cases with a procedure code combination (cluster)	149	28.4	179,607
MS–DRG 002—All cases	179	18.3	99,635
MS–DRG 002—Cases with a procedure code combination (cluster)	6	3.8	57,343

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM

MS–DRG 001	Number of cases	Average length of stay	Average costs
Cases with a procedure code combination of 02HA0RS (Insertion of biventricular short-term external heart assist system into heart, open approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	3	20.3	$121,919
Cases with a procedure code combination of 02HA0RS (Insertion of biventricular short-term external heart assist system into heart, open approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	2	12	114,688
All cases reporting one or more of the above procedure code combinations in MS–DRG 001	5	17	119,027

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM

	Number of cases	Average length of stay	Average costs
MS–DRG 001			
Cases with a procedure code combination of 02HA0RZ (Insertion of short-term external heart assist system into heart, open approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	30	55.6	$351,995
Cases with a procedure code combination of 02HA0RZ (Insertion of short-term external heart assist system into heart, open approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	19	29.8	191,163

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM—Continued

	Number of cases	Average length of stay	Average costs
All cases reporting one or more of the above procedure code combinations in MS–DRG 001	49	45.6	289,632
MS–DRG 002			
Cases with a procedure code combination of 02HA0RZ (Insertion of short-term external heart assist system into heart, open approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	1	4	48,212
Cases with a procedure code combination of 02HA0RZ (Insertion of short-term external heart assist system into heart, open approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	2	4.5	66,386
All cases reporting one or more of the above procedure code combinations in MS–DRG 002	3	4.3	60,328
All cases reporting one or more of the above procedure code combinations across both MS–DRGs 001 and 002	52	43.3	276,403

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM

	Number of cases	Average length of stay	Average costs
MS–DRG 001			
Cases with a procedure code combination of 02HA3RS (Insertion of biventricular short-term external heart assist system into heart, percutaneous approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	3	43.3	$233,330
Cases with a procedure code combination of 02HA3RS (Insertion of biventricular short-term external heart assist system into heart, percutaneous approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	24	14.8	113,955
Cases with a procedure code combination of 02HA3RS (Insertion of biventricular short-term external heart assist system into heart, percutaneous approach) *with* 02PA4RZ (Removal of short-term external heart assist system from heart, percutaneous endoscopic approach)	1	44	153,284
All cases reporting one or more of the above procedure code combinations in MS–DRG 001	28	18.9	128,150
MS–DRG 002			
Cases with a procedure code combination of 02HA3RS (Insertion of biventricular short-term external heart assist system into heart, percutaneous approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	2	4	30,954
All cases reporting one of the above procedure code combinations in MS–DRG 002	2	4	30,954
All cases reporting one or more of the above procedure code combinations across both MS-DRGs 001 and 002	30	17.9	121,670

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM

MS–DRG 001	Number of cases	Average length of stay	Average costs
Cases with a procedure code combination of 02HA4RZ (Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	4	17.3	$154,885
Cases with a procedure code combination of 02HA4RZ (Insertion of short-term external heart assist system into heart, open approach *with* 02PA4RZ (Removal of short-term external heart assist system from heart, percutaneous endoscopic approach)	2	15.5	80,852
All cases reporting one or more of the above procedure code combinations in MS–DRG 001	6	16.7	130,207

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM

MS–DRG 001	Number of cases	Average length of stay	Average costs
Cases with a procedure code combination of 02WA0QZ (Revision of implantable heart assist system in heart, open approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	1	105	$516,557

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM

MS–DRG 001	Number of cases	Average length of stay	Average costs
Cases with a procedure code combination of 02WA0RZ (Revision of short-term external heart assist system in heart, open approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	2	40	$285,818
Cases with a procedure code combination of 02WA0RZ (Revision of short-term external heart assist system in heart, open approach) *with* 02PA03Z (Removal of short-term external heart assist system from heart, percutaneous approach)	1	43	372,673
All cases reporting one or more of the above procedure code combinations in MS–DRG 001	3	41	314,770

PROCEDURE CODE COMBINATIONS FOR IMPLANT OF HEART ASSIST SYSTEM

	Number of cases	Average length of stay	Average costs
MS–DRG 001			
Cases with a procedure code combination of 02WA3RZ (Revision of short-term external heart assist system in heart, percutaneous approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	2	24	$123,084
Cases with a procedure code combination of 02WA3RZ (Revision of short-term external heart assist system in heart, percutaneous approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	55	14.7	104,963
All cases reporting one or more of the above procedure code combinations in MS–DRG 001	57	15	105,599
MS–DRG 002			
Cases with a procedure code combination of 02WA3RZ (Revision of short-term external heart assist system in heart, percutaneous approach) *with* 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	1	2	101,168
All cases reporting one or more of the above procedure code combinations across both MS–DRGs 001 and 002	58	14.8	105,522
MS–DRG 001			
Cases with a procedure code combination of 02WA4RZ (Revision of short-term external heart assist system in heart, percutaneous endoscopic approach) *with* 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	1	10	112,698

We did not find any cases reporting the following procedure code combinations (clusters) in the claims data.

02HA4RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02HA4RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02HA4RS	Insertion of biventricular short-term external heart assist system into heart, percutaneous endoscopic approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.
02WA3QZ	Revision of implantable heart assist system in heart, percutaneous approach.	with	02PA0RZ	Removal of short-term external heart assist system from heart, open approach.
02WA3QZ	Revision of implantable heart assist system in heart, percutaneous approach.	with	02PA3RZ	Removal of short-term external heart assist system from heart, percutaneous approach.
02WA3QZ	Revision of implantable heart assist system in heart, percutaneous approach.	with	02PA4RZ	Removal of short-term external heart assist system from heart, percutaneous endoscopic approach.

The data show that there are differences in the average length of stay and average costs for cases in Pre-MDC MS–DRGs 001 and 002 according to the type of procedure (insertion, revision, or removal), the type of device (biventricular short-term external heart assist system, short-term external heart assist system or implantable heart assist system), and the approaches that were utilized (open, percutaneous, or percutaneous endoscopic). In the FY 2019 IPPS/LTCH PPS proposed rule, we agreed with the commenters' recommendation to maintain the structure of Pre-MDC MS–DRGs 001 and 002 for FY 2019 and stated that we would continue to analyze the claims data.

Comment: Commenters supported CMS' proposal to maintain the current structure of Pre-MDC MS–DRGs 001 and 002 for FY 2019, and to continue to analyze claims data for consideration of

future modifications. The commenters agreed with CMS that current claims data do not yet reflect recent advice published in *Coding Clinic* for ICD–10–CM/PCS regarding the coding of procedures involving external heart assist devices or recent changes to ICD–10–PCS codes for these procedures.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are maintaining the current structure of Pre-MDC MS–DRGs 001 and 002 for FY 2019.

Commenters also suggested that CMS maintain the current logic for MS–DRG 215 (Other Heart Assist System Implant), but they recommended that CMS continue to monitor the data in MS–DRG 215 for future consideration of distinctions (for example, different approaches and evolving technologies) that may impact the clinical and resource use of procedures utilizing heart assist devices. As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20184), we also received a request to review claims data for procedures involving extracorporeal membrane oxygenation (ECMO) in combination with the insertion of a percutaneous short-term external heart assist device to determine if the current MS–DRG assignment is appropriate.

The logic for MS–DRG 215 is comprised of the procedure codes shown in the following table, for which we examined claims data in the September 2017 update of the FY 2017 MedPAR file in response to the commenters' requests. Our findings are shown in the following table.

MS–DRG 215

[Other Heart Assist System Implant]

	Number of cases	Average length of stay	Average costs
All cases	3,428	8.7	$68,965
Cases with procedure code 02HA0RJ (Insertion of short-term external heart assist system into heart, intraoperative, open approach)	0	0	0
Cases with procedure code 02HA0RS (Insertion of biventricular short-term external heart assist system into heart, open approach)	9	10	118,361
Cases with procedure code 02HA0RZ (Insertion of short-term external heart assist system into heart, open approach)	66	11.5	99,107
Cases with procedure code 02HA3RJ (Insertion of short-term external heart assist system into heart, intraoperative, percutaneous approach)	0	0	0
Cases with procedure code 02HA3RS (Insertion of biventricular short-term external heart assist system into heart, percutaneous approach)	117	7.2	64,302
Cases with procedure code 02HA3RZ (Insertion of short-term external heart assist system into heart, percutaneous approach)	3,136	8.4	67,670
Cases with procedure code 02HA4RJ (Insertion of short-term external heart assist system into heart, intraoperative, percutaneous endoscopic approach)	0	0	0
Cases with procedure code 02HA4RS (Insertion of biventricular short-term external heart assist system into heart, percutaneous endoscopic approach)	1	2	43,988
Cases with procedure code 02HA4RZ (Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach)	31	5.3	57,042
Cases with procedure code 02WA0JZ (Revision of synthetic substitute in heart, open approach)	1	84	366,089
Cases with procedure code 02WA0QZ (Revision of implantable heart assist system in heart, open approach)	56	25.1	123,410
Cases with procedure code 02WA0RS (Revision of biventricular short-term external heart assist system in heart, open approach)	0	0	0
Cases with procedure code 02WA0RZ (Revision of short-term external heart assist system in heart, open approach)	8	13.5	99,378
Cases with procedure code 02WA3QZ (Revision of implantable heart assist system in heart, percutaneous approach)	0	0	0
Cases with procedure code 02WA3RS (Revision of biventricular short-term external heart assist system in heart, percutaneous approach)	0	0	0
Cases with procedure code 02WA3RZ (Revision of short-term external heart assist system in heart, percutaneous approach)	80	10	71,077
Cases with procedure code 02WA4QZ (Revision of implantable heart assist system in heart, percutaneous endoscopic approach)	0	0	0
Cases with procedure code 02WA4RS (Revision of biventricular short-term external heart assist system in heart, percutaneous endoscopic approach)	0	0	0
Cases with procedure code 02WA4RZ (Revision of short-term external heart assist system in heart, percutaneous endoscopic approach)	0	0	0

As shown in this table, for MS–DRG 215, we found a total of 3,428 cases with an average length of stay of 8.7 days and average costs of $68,965. For procedure codes describing the insertion of a biventricular short-term external heart assist system with open, percutaneous or percutaneous endoscopic approaches, we found a total of 127 cases with an average length of stay ranging from 2 to 10 days and average costs ranging from $43,988 to $118,361. For procedure codes describing the insertion of a short-term external heart assist system with open, percutaneous or percutaneous endoscopic approaches, we found a total of 3,233 cases with an average length of stay ranging from 5.3 days to 11.5 days and average costs ranging from $57,042 to $99,107. For procedure codes describing the revision of a short-term external heart assist system with open or percutaneous approaches, we found a total of 88 cases with an average length of stay ranging from 10 to 13.5 days and average costs ranging from $71,077 to $99,378. We found 1 case

reporting procedure code 02WA0JZ (Revision of synthetic substitute in heart, open approach), with an average length of stay of 84 days and average costs of $366,089. Lastly, we found 56 cases reporting procedure code 02WA0QZ (Revision of implantable heart assist system in heart, open approach) with an average length of stay of 25.1 days and average costs of $123,410.

As the data show, there is a wide range in the average length of stay and the average costs for cases reporting procedures that involve a biventricular short-term external heart assist system versus a short-term external heart assist system. There is an even greater range in the average length of stay and the average costs when comparing the revision of a short-term external heart assist system to the revision of a synthetic substitute in the heart or to the revision of an implantable heart assist system.

In the proposed rule, we stated that we agreed with the commenters that continued monitoring of the data and further analysis is necessary prior to proposing any modifications to MS–DRG 215. As stated in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38012), we are aware that the AHA published Coding Clinic advice that clarified coding and reporting for certain external heart assist devices due to the technology being approved for new indications. The current claims data do not yet reflect that updated guidance. We also noted that there have been recent updates to the descriptions of the codes for heart assist devices in the past year. For example, the qualifier ''intraoperative'' was added effective October 1, 2017 (FY 2018) to the procedure codes describing the insertion of short-term external heart assist system procedures to distinguish between procedures where the device was only used intraoperatively and was removed at the conclusion of the procedure versus procedures where the device was not removed at the conclusion of the procedure and for which that qualifier would not be reported. The current claims data do not yet reflect these new procedure codes, which are displayed in the following table and are assigned to MS–DRG 215.

ICD–10–PCS code	Code description
02HA0RJ	Insertion of short-term external heart assist system into heart, intraoperative, open approach.
02HA3RJ	Insertion of short-term external heart assist system into heart, intraoperative, percutaneous approach.
02HA4RJ	Insertion of short-term external heart assist system into heart, intraoperative, percutaneous endoscopic approach.

In the proposed rule, we indicated that our clinical advisors also agreed that additional claims data are needed for analysis prior to proposing any changes to MS–DRG 215. Therefore, we did not propose to make any modifications to MS–DRG 215 for FY 2019.

Comment: Commenters supported CMS' proposal to not make any modifications to MS–DRG 215 for FY 2019 and supported continued analysis of claims data for consideration of modifications in future rulemaking. The commenters noted that the proposal was reasonable, given the data, the ICD–10–PCS procedure codes, and information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current structure of MS–DRG 215 for FY 2019.

As stated in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20185) and earlier in this section, we also received a request to review cases reporting the use of ECMO in combination with the insertion of a percutaneous short-term external heart assist device. Under ICD–10–PCS, ECMO is identified with procedure code 5A15223 (Extracorporeal membrane oxygenation, continuous) and the insertion of a percutaneous short-term external heart assist device is identified with procedure code 02HA3RZ (Insertion of short-term external heart assist system into heart, percutaneous approach). According to the commenter, when ECMO procedures are performed percutaneously, they are less invasive and less expensive than traditional ECMO. The commenter also noted that, currently under ICD–10–PCS, there is not a specific procedure code to identify percutaneous ECMO, and providers are only able to report ICD–10–PCS procedure code 5A15223, which may be inappropriately resulting in a higher paying MS–DRG. Therefore, the commenter submitted a separate request to create a new ICD–10–PCS procedure code specifically for percutaneous ECMO which was discussed at the March 6–7, 2018 ICD–10 Coordination and Maintenance Committee Meeting. We refer readers to section II.F.18. of the preamble of this final rule for further information regarding this meeting and the discussion for a new procedure code.

The requestor suggested that cases reporting a procedure code for ECMO in combination with the insertion of a percutaneous short-term external heart assist device could be reassigned from Pre-MDC MS–DRG 003 (ECMO or Tracheostomy with Mechanical Ventilation >96 Hours or Principal Diagnosis Except Face, Mouth and Neck with Major O.R. Procedure) to MS–DRG 215. Our analysis involved examining cases in Pre-MDC MS–DRG 003 in the September 2017 update of the FY 2017 MedPAR file for cases reporting ECMO with and without the insertion of a percutaneous short-term external heart assist device. Our findings are shown in the following table.

ECMO AND PERCUTANEOUS SHORT-TERM EXTERNAL HEART ASSIST DEVICE

Pre-MDC MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 003—All cases	14,383	29.5	$118,218
MS–DRG 003—Cases with procedure code 5A15223 (Extracorporeal membrane oxygenation, continuous)	1,786	19	119,340
MS–DRG 003—Cases with procedure code 5A15223 (Extracorporeal membrane oxygenation, continuous) and 02HA3RZ (Insertion of short-term external heart assist system into heart, percutaneous approach)	94	11.4	110,874

ECMO AND PERCUTANEOUS SHORT-TERM EXTERNAL HEART ASSIST DEVICE—Continued

Pre-MDC MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 003—Cases with procedure code 5A15223 (Extracorporeal membrane oxygenation, continuous) and 02HA4RZ (Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach)	1	1	64,319

As shown in this table, we found a total of 14,383 cases with an average length of stay of 29.5 days and average costs of $118,218 in Pre-MDC MS–DRG 003. We found 1,786 cases reporting procedure code 5A15223 (Extracorporeal membrane oxygenation, continuous) with an average length of stay of 19 days and average costs of $119,340. We found 94 cases reporting procedure code 5A15223 and 02HA3RZ (Insertion of short-term external heart assist system into heart, percutaneous approach) with an average length of stay of 11.4 days and average costs of $110,874. Lastly, we found 1 case reporting procedure code 5A15223 and 02HA4RZ (Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach) with an average length of stay of 1 day and average costs of $64,319.

We also reviewed the cases in MS–DRG 215 for procedure codes 02HA3RZ and 02HA4RZ. Our findings are shown in the following table.

PERCUTANEOUS SHORT-TERM EXTERNAL HEART ASSIST DEVICE

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 215—All cases	3,428	8.7	$68,965
MS–DRG 215—Cases with procedure code 02HA3RZ (Insertion of short-term external heart assist system into heart, percutaneous approach)	3,136	8.4	67,670
MS–DRG 215—Cases with procedure code 02HA4RZ (Insertion of short-term external heart assist system into heart, percutaneous endoscopic approach)	31	5.3	57,042

As shown in this table, we found a total of 3,428 cases with an average length of stay of 8.7 days and average costs of $68,965. We found a total of 3,136 cases reporting procedure code 02HA3RZ with an average length of stay of 8.4 days and average costs of $67,670. We found a total of 31 cases reporting procedure code 02HA4RZ with an average length of stay of 5.3 days and average costs of $57,042.

We stated in the proposed rule that, for Pre-MDC MS–DRG 003, while the average length of stay and average costs for cases where procedure code 5A15223 was reported with procedure code 02HA3RZ or procedure code 02HA4RZ are lower than the average length of stay and average costs for cases where procedure code 5A15223 was reported alone, we are unable to determine from the data if those ECMO procedures were performed percutaneously in the absence of a unique code. In addition, the one case reporting procedure code 5A15223 with 02HA4RZ only had a 1 day length of stay and it is unclear from the data what the circumstances of that case may have involved. For example, the patient may have been transferred or may have expired. Therefore, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20186), we proposed to not reassign cases reporting procedure code 5A15223 when reported with procedure code 02HA3RZ or procedure code 02HA4RZ for FY 2019. We stated in the proposed rule that our clinical advisors agreed that until there is a way to specifically identify percutaneous ECMO in the claims data to enable further analysis, a proposal at this time is not warranted.

Comment: Commenters supported CMS' proposal to not reassign cases reporting the use of ECMO (procedure code 5A15223) in combination with the insertion of a percutaneous short-term external heart assist device (procedure code 02HA3RZ or procedure code 02HA4RZ) for FY 2019.

Response: We appreciate the commenters' support.

Comment: Other commenters acknowledged that new ICD–10–PCS procedure codes that identify percutaneous ECMO procedures were made publicly available in May 2018. The commenters suggested that the new procedure codes be assigned to MS–DRGs that reflect cases representing patients with similar clinical characteristics and whose treatment requires similar resource utilization, such as MS–DRG 215. Some commenters specifically requested that the new procedure code describing a percutaneous veno-arterial (VA) ECMO procedure be considered for assignment to MS–DRG 215 versus Pre-MDC MS–DRG 003 because MS–DRG 215 is the primary MS–DRG for procedures involving the implantation of peripheral heart assist pumps, with similar cases representing patient conditions and clinical coherence. The commenters noted that the percutaneous ECMO procedure is less invasive and less expensive than the traditional ECMO procedure, and has the clinical similarities and requires similar resource utilization as procedures currently assigned to MS–DRG 215, such as the percutaneous ventricular assist devices procedure.

Another commenter suggested that CMS should assign cases representing patients receiving treatment involving the peripheral VA ECMO procedure to MS–DRG 215 or another MS–DRG within MDC 5. The commenter stated that cases representing patients currently assigned to MS–DRG 215 are clinically coherent to the characteristics of the patients who undergo a peripheral VA ECMO procedure. Another commenter recommended that the new procedure code describing a percutaneous veno-venous (VV) ECMO procedure be considered for assignment to MS–DRG 004 or another MS–DRG within MDC 4 because the indication is to provide respiratory support.

Response: The commenters are correct that the FY 2019 ICD–10–PCS procedure code files (which are available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Coding/ICD10/2019-ICD-10-PCS.html*) include new ICD–10–PCS procedure codes that identify percutaneous ECMO procedures. In addition, the files also show that the current code for ECMO

procedures (ICD–10–PCS code 5A15223) has been revised. These new procedure codes, and the revised ECMO procedure code and description, effective October 1, 2018, are shown in the following table.

ICD–10–PCS code	Code description
5A1522F	Extracorporeal Oxygenation, Membrane, Central.
5A1522G	Extracorporeal Oxygenation, Membrane, Peripheral Veno-arterial.
5A1522H	Extracorporeal Oxygenation, Membrane, Peripheral Veno-venous.

In response to the commenters' suggestions to assign the new procedure codes for percutaneous ECMO procedures to MS–DRG 215, we note that the new procedure codes created to describe percutaneous ECMO procedures were not finalized at the time of the proposed rule. In addition, the deletion of the current procedure code for ECMO (ICD–10–PCS code 5A15223) and the creation of the new procedure code for central ECMO were not finalized at the time of the proposed rule. As these codes were not finalized at the time of the proposed rule, they were not reflected in Table 6B.—New Procedure Codes (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) associated with the FY 2019 IPPS/LTCH PPS proposed rule. Therefore, because these procedure codes were not yet approved, there were no proposed MDC, MS–DRG, or O.R. and non-O.R. designations for these new procedure codes.

Consistent with our annual process of assigning new procedure codes to MDCs and MS–DRGs, and designating a procedure as an O.R. or non-O.R. procedure, we reviewed the predecessor procedure code assignments. The predecessor procedure code (ICD–10–PCS code 5A15223) for the new percutaneous ECMO procedure codes describes an open approach which requires an incision along the sternum (sternotomy) and is performed for open heart surgery. It is considered extremely invasive and carries significant risks for complications, including bleeding, infection, and vessel injury. For central ECMO, arterial cannulation typically occurs directly into the ascending aorta and venous cannulation occurs directly into the right atrium. Conversely, percutaneous (peripheral) ECMO does not require a sternotomy and can be performed in the intensive care unit or at the bedside. The cannulae are placed percutaneously and can utilize a variety of configurations, according to the indication (VA or VV) and patient age (adult vs. pediatric). While percutaneous ECMO also carries risks, they differ from those of central ECMO. For example, our clinical advisor note that patients receiving percutaneous ECMO are at a greater risk of suffering vascular complications.

Upon review, our clinical advisors do not support assigning the new procedure codes for peripheral ECMO procedures to the same MS–DRG as the predecessor code for open (central) ECMO in Pre-MDC MS–DRG 003. Our clinical advisors also do not agree with designating percutaneous ECMO procedures as O.R. procedures because they are less resource intensive compared to open ECMO procedures. As shown in Table 6B.—New Procedure Codes associated with this final rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*), the new procedure codes for percutaneous ECMO procedures have been designated as non-O.R. procedures that will affect the MS–DRG assignment for specific medical MS–DRGs. Effective October 1, 2018, the MS–DRGs for which the percutaneous ECMO procedures will affect MS–DRG assignment are shown in the following table, along with the revised MS–DRG titles.

MDC	MS–DRG	MS–DRG title
4	207	Respiratory System Diagnosis with Ventilator Support >96 Hours or Peripheral Extracorporeal Membrane Oxygenation (ECMO).
5	291	Heart Failure and Shock with MCC or Peripheral Extracorporeal Membrane Oxygenation (ECMO).
5	296	Cardiac Arrest, Unexplained with MCC or Peripheral Extracorporeal Membrane Oxygenation (ECMO).
18	870	Septicemia or Severe Sepsis with MV >96 Hours or Peripheral Extracorporeal Membrane Oxygenation (ECMO).

Our clinical advisors support the designation of the peripheral ECMO procedures as a non-O.R. procedure affecting the MS–DRG assignment of MS–DRG 207 because they consider the procedure to be similar to providing mechanical ventilation greater than 96 hours in terms of both clinical severity and resource use. Because any respiratory diagnosis classified under MDC 4 with mechanical ventilation greater than 96 hours is assigned to MS–DRG 207, it is reasonable to expect that any patient with a respiratory diagnosis who requires treatment involving a peripheral ECMO procedure should also be assigned to MS–DRG 207. The same rationale was applied for MS–DRG 870, which also includes mechanical ventilation greater than 96 hours. In addition, based on the common clinical indications for which a percutaneous ECMO procedure is utilized, such as cardiogenic shock and cardiac arrest, our clinical advisors determined that MS–DRGs 291 (Heart Failure and Shock with MCC) and 296 (Cardiac Arrest, Unexplained with MCC) also are appropriate for a percutaneous ECMO procedure to affect the MS–DRG assignment. The MS–DRG assignment for a central ECMO procedure will remain in Pre-MDC MS–DRG 003.

In cases where a percutaneous external heart assist device is utilized, in combination with a percutaneous ECMO procedure, effective October 1, 2018, the ICD–10 MS–DRG Version 36 GROUPER logic results in a case assignment to MS–DRG 215 because the percutaneous external heart assist device procedure is designated as an O.R. procedure and assigned to MS–DRG 215.

Because the procedure codes describing percutaneous ECMO procedures are new, becoming effective October 1, 2018, we do not yet have any claims data to analyze. Once claims data becomes available, we can examine the

volume, and length of stay and cost data to determine if modifications to the assignment of these procedure codes are warranted.

After consideration of the public comments we received, we are finalizing our proposal to not reassign cases reporting ICD–10–PCS procedure code 5A15223 when reported with ICD–10–PCS procedure code 02HA3RZ or ICD–10–PCS procedure code 02HA4RZ for FY 2019. Consistent with our policy for determining MS–DRG assignment for new codes and for the reasons discussed, the two new procedure codes describing percutaneous ECMO procedures discussed and displayed in the table above, under the ICD–10 MS–DRGs Version 36 GROUPER logic, effective October 1, 2018, are designated as non-O.R. procedures impacting the MS–DRG assignment of MS–DRGs 207, 291, 296, and 870. The MS–DRG assignment for the central ECMO procedure remains in Pre-MDC MS–DRG 003.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20186), we also discussed that a commenter also suggested that CMS maintain the current logic for MS–DRGs 268 and 269 (Aortic and Heart Assist Procedures Except Pulsation Balloon with and without MCC, respectively), but recommended that CMS continue to monitor the data in these MS–DRGs for future consideration of distinctions (for example, different approaches and evolving technologies) that may impact the clinical and resource use of procedures involving heart assist devices.

The logic for heart assist system devices in MS–DRGs 268 and 269 is comprised of the procedure codes shown in the following table, for which we examined claims data in the September 2017 update of the FY 2017 MedPAR file in response to the commenter's request. Our findings are shown in the following table.

MS–DRGs for Aortic and Heart Assist Procedures Except Pulsation Balloon

	Number of cases	Average length of stay	Average costs
MS–DRG 268—All cases	3,798	9.6	$49,122
MS–DRG 268—Cases with procedure code 02PA0QZ (Removal of implantable heart assist system from heart, open approach)	16	23.4	79,850
MS–DRG 268—Cases with procedure code 02PA0RS (Removal of biventricular short-term external heart assist system from heart, open approach)	0	0	0
MS–DRG 268—Cases with procedure code 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	0	0	0
MS–DRG 268—Cases with procedure code 02PA3QZ (Removal of implantable heart assist system from heart, percutaneous approach)	28	10.5	31,797
MS–DRG 268—Cases with procedure code 02PA3RS (Removal of biventricular short-term external heart assist system from heart, percutaneous approach)	0	0	0
MS–DRG 268—Cases with procedure code 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	96	12.4	51,469
MS–DRG 268—Cases with procedure code 02PA4QZ (Removal of implantable heart assist system from heart, percutaneous endoscopic approach)	5	7.8	37,592
MS–DRG 268—Cases with procedure code 02PA4RS (Removal of biventricular short-term external heart assist system from heart, percutaneous endoscopic approach)	0	0	0
MS–DRG 268—Cases with procedure code 02PA4RZ (Removal of short-term external heart assist system from heart, percutaneous endoscopic approach)	0	0	0
MS–DRG 269—All cases	16,900	2.4	30,793
MS–DRG 269—Cases with procedure code 02PA0QZ (Removal of implantable heart assist system from heart, open approach)	10	8	23,741
MS–DRG 269—Cases with procedure code 02PA0RS (Removal of biventricular short-term external heart assist system from heart, open approach)	0	0	0
MS–DRG 269—Cases with procedure code 02PA0RZ (Removal of short-term external heart assist system from heart, open approach)	0	0	0
MS–DRG 269—Cases with procedure code 02PA3QZ (Removal of implantable heart assist system from heart, percutaneous approach)	6	5	19,421
MS–DRG 269—Cases with procedure code 02PA3RS (Removal of biventricular short-term external heart assist system from heart, percutaneous approach)	0	0	0
MS–DRG 269—Cases with procedure code 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach)	11	4	25,719
MS–DRG 269—Cases with procedure code 02PA4QZ (Removal of implantable heart assist system from heart, percutaneous endoscopic approach)	1	3	14,415
MS–DRG 269—Cases with procedure code 02PA4RS (Removal of biventricular short-term external heart assist system from heart, percutaneous endoscopic approach)	0	0	0
MS–DRG 269—Cases with procedure code 02PA4RZ (Removal of short-term external heart assist system from heart, percutaneous endoscopic approach)	0	0	0

As shown in this table, for MS–DRG 268, there were a total of 3,798 cases, with an average length of stay of 9.6 days and average costs of $49,122. There were 16 cases reporting procedure code 02PA0QZ (Removal of implantable heart assist system from heart, open approach), with an average length of stay of 23.4 days and average costs of $79,850. There were no cases that reported procedure codes 02PA0RS (Removal of biventricular short-term external heart assist system from heart, open approach), 02PA0RZ (Removal of short-term external heart assist system from heart, open approach), 02PA3RS (Removal of biventricular short-term external heart assist system from heart, percutaneous approach), 02PA4RS (Removal of biventricular short-term external heart assist system from heart, percutaneous endoscopic approach) or 02PA4RZ (Removal of short-term external heart assist system from heart, percutaneous endoscopic approach). There were 28 cases reporting procedure code 02PA3QZ (Removal of implantable

heart assist system from heart, percutaneous approach), with an average length of stay of 10.5 days and average costs of $31,797. There were 96 cases reporting procedure code 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach), with an average length of stay of 12.4 days and average costs of $51,469. There were 5 cases reporting procedure code 02PA4QZ (Removal of implantable heart assist system from heart, percutaneous endoscopic approach), with an average length of stay of 7.8 days and average costs of $37,592. For MS–DRG 269, there were a total of 16,900 cases, with an average length of stay of 2.4 days and average costs of $30,793. There were 10 cases reporting procedure code 02PA0QZ (Removal of implantable heart assist system from heart, open approach), with an average length of stay of 8 days and average costs of $23,741. There were no cases reporting procedure codes 02PA0RS (Removal of biventricular short-term external heart assist system from heart, open approach), 02PA0RZ (Removal of short-term external heart assist system from heart, open approach), 02PA3RS (Removal of biventricular short-term external heart assist system from heart, percutaneous approach), 02PA4RS (Removal of biventricular short-term external heart assist system from heart, percutaneous endoscopic approach) or 02PA4RZ (Removal of short-term external heart assist system from heart, percutaneous endoscopic approach). There were 6 cases reporting procedure code 02PA3QZ (Removal of implantable heart assist system from heart, percutaneous approach), with an average length of stay of 5 days and average costs of $19,421. There were 11 cases reporting procedure code 02PA3RZ (Removal of short-term external heart assist system from heart, percutaneous approach), with an average length of stay of 4 days and average costs of $25,719. There was 1 case reporting procedure code 02PA4QZ (Removal of implantable heart assist system from heart, percutaneous endoscopic approach), with an average length of stay of 3 days and average costs of $14,415.

The data show that there are differences in the average length of stay and average costs for cases in MS–DRGs 268 and 269 according to the type of device (short-term external heart assist system or implantable heart assist system), and the approaches that were utilized (open, percutaneous, or percutaneous endoscopic). In the proposed rule, we stated that we agreed with the recommendation to maintain the structure of MS–DRGs 268 and 269 for FY 2019 and will continue to analyze the claims data for possible future updates. As such, we proposed to not make any changes to the structure of MS–DRGs 268 and 269 for FY 2019.

Comment: Commenters supported CMS' proposal to not make any changes to the structure of MS–DRGs 268 and 269 for FY 2019.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to maintain the structure of MS–DRGs 268 and 269 for FY 2019.

b. Brachytherapy

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20188), we received a request to create a new Pre-MDC MS–DRG for all procedures involving the CivaSheet® technology, an implantable, planar brachytherapy source designed to enable delivery of radiation to the site of the cancer tumor excision or debulking, while protecting neighboring tissue. The requestor stated that physicians have used the CivaSheet® technology for a number of indications, such as colorectal, gynecological, head and neck, soft tissue sarcomas and pancreatic cancer. The requestor noted that potential uses also include nonsmall-cell lung cancer, ocular melanoma, and atypical meningioma. Currently, procedures involving the CivaSheet® technology are reported using ICD–10–PCS Section D—Radiation Therapy codes, with the root operation ''Brachytherapy.'' These codes are non-O.R. codes and group to the MS–DRG to which the principal diagnosis is assigned.

In response to this request, we analyzed claims data from the September 2017 update of the FY 2017 MedPAR file for cases representing patients who received treatment that reported low dose rate (LDR) brachytherapy procedure codes across all MS–DRGs. We referred readers to Table 6P.—ICD–10–CM and ICD–10–PCS Codes for Proposed MS–DRG Changes associated with the proposed rule, which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* A detailed list of these procedure codes was shown in Table 6P.1.associated with the proposed rule. Our findings are reflected in the following table. As we note below in response to comments, there were errors in the table included in the proposed rule (83 FR 20188) with regard to an identified MS–DRG and procedure code. However, there were no errors in the data findings reported. In the proposed rule, we identified claims data for MS–DRG 129 with procedure code D710BBZ (Low dose rate (LDR) brachytherapy of bone marrow using Palladium-103 (Pd-103)). That entry was an inadventent error. The correct MS–DRG, that is, MS–DRG 054, and procedure code, that is, D010BBZ, are reflected in the table that follows. In addition, in the proposed rule we inadvertently identified MS–DRG 724 with procedure code DV10BBZ (Low dose rate (LDR) brachytherapy of prostate using Palladium 103 (Pd-103)). Upon review, this case was actually reported with MS–DRG 189. The data findings identified for each of these 4 cases are correctly reflected in the table that follows.

CASES REPORTING LOW DOSE RATE (LDR) BRACHYTHERAPY PROCEDURE CODES ACROSS ALL MS–DRGS

ICD–10–PCS procedures	Number of cases	Average length of stay	Average costs
MS–DRG 054 (Nervous System Neoplasms with CC)—Cases with procedure code D010BBZ (Low dose rate (LDR) brachytherapy of brain using Palladium-103 (Pd-103))	1	7	$10,357
MS–DRG 189 (Pulmonary Edema and Respiratory Failure)—Cases with procedure code DV10BBZ (Low dose rate (LDR) brachytherapy of prostate using Palladium-103 (Pd-103))	1	7	32,298
MS–DRG 129 (Major Head and Neck Procedures with CC/MCC or Major Device)—Cases with procedure code DW11BBZ (Low dose rate (LDR) brachytherapy of head and neck using Palladium-103 (Pd-103))	1	3	42,565
MS–DRG 330 (Major Small and Large Bowel Procedures with CC)—Cases with procedure code DW16BBZ (Low dose rate (LDR) brachytherapy of pelvic region using Palladium-103 (Pd-103))	1	8	74,190

As shown in the immediately preceding table, we identified 4 cases reporting one of these LDR brachytherapy procedure codes across all MS–DRGs, with an average length of stay of 6.3 days and average costs of $39,853. In the proposed rule, we stated that we believe that creating a new Pre-MDC MS–DRG based on such a small number of cases could lead to distortion in the relative payment weights for the Pre-MDC MS–DRG. Having a larger number of clinically cohesive cases within the Pre-MDC MS–DRG provides greater stability for annual updates to the relative payment weights. Therefore, we did not propose to create a new Pre-MDC MS–DRG for procedures involving the CivaSheet® technology for FY 2019.

Comment: Some commenters supported CMS' proposal not to create a new MS–DRG for assignment of procedures involving the CivaSheet® technology. Several commenters, including the manufacturer of the CivaSheet® technology, disagreed with CMS' proposal, and stated that the current payment for cases involving the CivaSheet® technology is inadequate and does not currently allow widespread adoption and use of the technology. One commenter noted that its contractor also identified four cases in the proposed rule, but raised some concerns regarding the procedure codes and costs associated with the cases identified in the proposed rule. Other commenters described the clinical benefits and potential cost-savings associated with the CivaSheet® technology, and requested that CMS reconsider its proposal to not create a new Pre- MDC MS–DRG for the assignment of cases involving the use of this technology. The commenters stated that they understood CMS' concern about the lack of volume, but indicated that the lack of adequate payment for procedures involving the CivaSheet® technology does not allow more widespread use. The manufacturer requested that, if CMS finalizes its proposal not to create a new MS–DRG for assignment of cases involving the CivaSheet® technology, CMS consider other payment mechanisms by which to ensure adequate payment for hospitals providing this service.

Response: We appreciate the commenters' support and input. With respect to the commenters who disagreed with our proposal, we reiterate that our analysis of the claims data and our clinical advisors did not support the creation of a new MS–DRG based on the very small number of cases identified. As we noted in the proposed rule, only four cases were identified. The MS–DRGs are a classification system intended to group together those diagnoses and procedures with similar clinical characteristics and utilization of resources. As we discussed in the proposed rule, basing a new MS–DRG on such a small number of cases could lead to distortions in the relative payment weights for the MS–DRG because several expensive cases could impact the overall relative payment weight. Having larger clinical cohesive groups within an MS–DRG provides greater stability for annual updates to the relative payment weights.

We agree with the commenter that there were some inadvertent errors in the table included in the proposed rule in reference to certain procedure codes and MS–DRGs; the table in this final rule above now correctly reflects the procedure codes and MS–DRGs reflected in the FY 2017 MedPAR file (as of the September 2017 update). We note that because our proposal was based on the small number of cases, and not the nature of those cases, these errors had no bearing on our proposal or our decision to finalize this proposal. We acknowledge the commenters' concerns about the adequacy of payment for these low volume services. Therefore, as part of our ongoing, comprehensive analysis of the MS–DRGs under ICD–10, we will continue to explore mechanisms through which to address rare diseases and low volume DRGs.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current MS–DRG structure for procedures involving the CivaSheet® technology for FY 2019.

c. Laryngectomy

The logic for case assignment to Pre-MDC MS–DRGs 11, 12, and 13 (Tracheostomy for Face, Mouth and Neck Diagnoses with MCC, with CC, and without CC/MCC, respectively) as displayed in the ICD–10 MS–DRG Version 35 Definitions Manual, which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2018-IPPS-Final-Rule-Home-Page-Items/FY2018-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending,* is comprised of a list of procedure codes for laryngectomies, a list of procedure codes for tracheostomies, and a list of diagnosis codes for conditions involving the face, mouth, and neck. The procedure codes for laryngectomies are listed separately and are reported differently from the procedure codes listed for tracheostomies. The procedure codes listed for tracheostomies must be reported with a diagnosis code involving the face, mouth, or neck as a principal diagnosis to satisfy the logic for assignment to Pre-MDC MS–DRG 11, 12, or 13. Alternatively, any principal diagnosis code reported with a procedure code from the list of procedure codes for laryngectomies will satisfy the logic for assignment to Pre-MDC MS–DRG 11, 12, or 13.

To improve the manner in which the logic for assignment is displayed in the ICD–10 MS–DRG Definitions Manual and to clarify how it is applied for grouping purposes, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20188), we proposed to reorder the lists of the diagnosis and procedure codes. The list of principal diagnosis codes for face, mouth, and neck would be sequenced first, followed by the list of the tracheostomy procedure codes and, lastly, the list of laryngectomy procedure codes.

We also proposed to revise the titles of Pre-MDC MS–DRGs 11, 12, and 13 from ''Tracheostomy for Face, Mouth and Neck Diagnoses with MCC, with CC and without CC/MCC, respectively'' to ''Tracheostomy for Face, Mouth and Neck Diagnoses or Laryngectomy with MCC'', ''Tracheostomy for Face, Mouth and Neck Diagnoses or Laryngectomy with CC'', and ''Tracheostomy for Face, Mouth and Neck Diagnoses or Laryngectomy without CC/MCC'', respectively, to reflect that laryngectomy procedures may also be assigned to these MS–DRGs.

Comment: Commenters supported CMS' proposal to reorder the lists of diagnoses and procedure codes for Pre-MDC MS–DRGs 11, 12 and 13 in the ICD–10 MS–DRG Definitions Manual to clarify the GROUPER logic. The commenters stated that the proposal was reasonable given the ICD–10–CM diagnosis codes, the ICD–10–PCS procedure codes, and the information provided. Commenters also supported the proposal to revise the titles for Pre-MDC MS–DRGs 11, 12 and 13.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to reorder the lists of diagnoses and procedure codes for Pre-MDC MS–DRGs 11, 12, and 13 in the ICD–10 MS–DRG Definitions Manual Version 36. We also are finalizing our proposal to revise the titles for Pre-MDC MS–DRGs 11, 12, and 13 as follows for the ICD–10 MS–DRGs Version 36, effective October 1, 2018:

- MS–DRG 11 (Tracheostomy for Face, Mouth and Neck Diagnoses or Laryngectomy with MCC);

- MS–DRG 12 (Tracheostomy for Face, Mouth and Neck Diagnoses or Laryngectomy with CC); and
- MS–DRG 13 (Tracheostomy for Face, Mouth and Neck Diagnoses or Laryngectomy without CC/MCC).

d. Chimeric Antigen Receptor (CAR) T-Cell Therapy

Chimeric Antigen Receptor (CAR) T-cell therapy is a cell-based gene therapy in which T-cells are genetically engineered to express a chimeric antigen receptor that will bind to a certain protein on a patient's cancerous cells. The CAR T-cells are then administered to the patient to attack certain cancerous cells and the individual is observed for potential serious side effects that would require medical intervention.

Two CAR T-cell therapies received FDA approval in 2017. KYMRIAH® (manufactured by Novartis Pharmaceuticals Corporation) was approved for the use in the treatment of patients up to 25 years of age with B-cell precursor acute lymphoblastic leukemia (ALL) that is refractory or in second or later relapse. In May 2018, KYMRIAH received FDA approval for a second indication, treatment of adult patients with relapsed or refractory large B-cell lymphoma after two or more lines of systemic therapy, including diffuse large B-cell lymphoma (DLBCL), high grade B-cell lymphoma, and DLBCL arising from follicular lymphoma. YESCARTA® (manufactured by Kite Pharma, Inc.) was approved for use in the treatment of adult patients with relapsed or refractory large B-cell lymphoma and who have not responded to or who have relapsed after at least two other kinds of treatment.

Procedures involving the CAR T-cell therapies are currently identified with ICD–10–PCS procedure codes XW033C3 (Introduction of engineered autologous chimeric antigen receptor t-cell immunotherapy into peripheral vein, percutaneous approach, new technology group 3) and XW043C3 (Introduction of engineered autologous chimeric antigen receptor t-cell immunotherapy into central vein, percutaneous approach, new technology group 3), which both became effective October 1, 2017. Procedures described by these two ICD–10–PCS procedure codes are designated as non-O.R. procedures that have no impact on MS–DRG assignment.

As we discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20189), we have received many inquiries from the public regarding payment of CAR T-cell therapy under the IPPS. Suggestions for the MS–DRG assignment for FY 2019 ranged from assigning ICD–10–PCS procedure codes XW033C3 and XW043C3 to an existing MS–DRG to the creation of a new MS–DRG for CAR T-cell therapy. In the context of the recommendation to create a new MS–DRG for FY 2019, we also received suggestions that payment should be established in a way that promotes comparability between the inpatient setting and outpatient setting.

As part of our review of these suggestions, we examined the existing MS–DRGs to identify the MS–DRGs that represent cases most clinically similar to those cases in which the CAR T-cell therapy procedures would be reported. The CAR T-cell procedures involve a type of autologous immunotherapy in which the patient's cells are genetically transformed and then returned to that patient after the patient undergoes cell depleting chemotherapy. Our clinical advisors believe that patients receiving treatment utilizing CAR T-cell therapy procedures would have similar clinical characteristics and comorbidities to those seen in cases representing patients receiving treatment for other hematologic cancers who are treated with autologous bone marrow transplant therapy that are currently assigned to MS–DRG 016 (Autologous Bone Marrow Transplant with CC/MCC). Therefore, after consideration of the inquiries received as to how the IPPS can appropriately group cases reporting the use of CAR T-cell therapy, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20189), we proposed to assign ICD–10–PCS procedure codes XW033C3 and XW043C3 to Pre-MDC MS–DRG 016 for FY 2019. In addition, we proposed to revise the title of MS–DRG 016 from ''Autologous Bone Marrow Transplant with CC/MCC'' to ''Autologous Bone Marrow Transplant with CC/MCC or T-cell Immunotherapy.''

However, we noted in the proposed rule that, as discussed in greater detail in section II.H.5.a. of the preamble of the proposed rule and this final rule, the manufacturer of KYMRIAH and the manufacturer of YESCARTA submitted applications for new technology add-on payments for FY 2019. We stated that we also recognize that many members of the public have noted that the combination of the new technology add-on payment applications, the extremely high-cost of these CAR T-cell therapies, and the potential for volume increases over time present unique challenges with respect to the MS–DRG assignment for procedures involving the utilization of CAR T-cell therapies and cases representing patients receiving treatment involving CAR T-cell therapies. We stated in the proposed rule that we believed that, in the context of these pending new technology add-on payment applications, there may also be merit in the alternative suggestion we received to create a new MS–DRG for procedures involving the utilization of CAR T-cell therapies and cases representing patients receiving treatment involving CAR T-cell therapy to which we could assign ICD–10–PCS procedure codes XW033C3 and XW043C3, effective for discharges occurring in FY 2019. We stated that, as noted in section II.H.5.a. of the preamble of the proposed rule, if a new MS–DRG were to be created then consistent with section 1886(d)(5)(K)(ix) of the Act there may no longer be a need for a new technology add-on payment under section 1886(d)(5)(K)(ii)(III) of the Act.

We invited public comments on our proposed approach of assigning ICD–10–PCS procedure codes XW033C3 and XW043C3 to Pre-MDC MS–DRG 016 for FY 2019. We also invited public comments on alternative approaches, including in the context of the pending KYMRIAH and YESCARTA new technology add-on payment applications, and the most appropriate way to establish payment for FY 2019 under any alternative approaches. We indicated that such payment alternatives may include using a CCR of 1.0 for charges associated with ICD–10–PCS procedure codes XW033C3 and XW043C3, given that many public inquirers believed that hospitals would be unlikely to set charges different from the costs for KYMRIAH and YESCARTA CAR T-cell therapies, as discussed further in section II.A.4.g.2. of the Addendum of the proposed rule and this final rule. We further stated that these payment alternatives, including payment under any potential new MS–DRG, also could take into account an appropriate portion of the average sales price (ASP) for these drugs, including in the context of the pending new technology add-on payment applications.

We invited comments on how these payment alternatives would affect access to care, as well as how they affect incentives to encourage lower drug prices, which is a high priority for this Administration. In addition, we stated that we are considering approaches and authorities to encourage value-based care and lower drug prices. We solicited comments on how the payment methodology alternatives may intersect and affect future participation in any such alternative approaches.

We noted that, as stated in section II.F.1.b. of the preamble of the proposed rule, we described the criteria used to establish new MS–DRGs. In particular,

we consider whether the resource consumption and clinical characteristics of the patients with a given set of conditions are significantly different than the remaining patients in the MS–DRG. We evaluate patient care costs using average costs and lengths of stay and rely on the judgment of our clinical advisors to decide whether patients are clinically distinct or similar to other patients in the MS–DRG. In evaluating resource costs, we consider both the absolute and percentage differences in average costs between the cases we select for review and the remainder of cases in the MS–DRG. We also consider whether observed average differences are consistent across patients or attributable to cases that were extreme in terms of costs or length of stay, or both. Further, we consider the number of patients who will have a given set of characteristics and generally prefer not to create a new MS–DRG unless it would include a substantial number of cases. Based on the principles typically used to establish a new MS–DRG, we solicited comments on how the administration of the CAR T-cell therapies and associated services meet the criteria for the creation of a new MS–DRG. Also, section 1886(d)(4)(C)(iii) of the Act specifies that, beginning in FY 1991, the annual DRG reclassification and recalibration of the relative weights must be made in a manner that ensures that aggregate payments to hospitals are not affected. Given that a new MS–DRG must be established in a budget neutral manner, we stated that we are concerned with the redistributive effects away from core hospital services over time toward specialized hospitals and how that may affect payment for these core services. Therefore, we solicited public comments on our concerns with the payment alternatives that we were considering for CAR T-cell therapies.

Comment: Many commenters stated that the existing payment mechanisms under the IPPS do not allow for accurate payment of CAR T-cell therapy due its unprecedented high cost. Commenters also asserted structural insufficiencies in the new technology add-on payments for the drug therapy, such as the maximum add-on payment of 50 percent; the inapplicability of the usual cost to charge ratios used in ratesetting and payment, including those used in determining new technology add-on payments, outlier payments, and payments to IPPS-excluded cancer hospitals; and a lack of sufficient historical data and experience related to a therapy with a cost of this magnitude. In addition, commenters stated that payment for CAR T-cell therapy should avoid inappropriate financial incentives for care to be provided in an outpatient instead of an inpatient setting. Many commenters requested a permanent and long-term solution to ensure accurate payment for CAR T-cell therapy while concurrently ensuring any redistributive payment effects within the IPPS are limited.

Some commenters recommended that, until a more permanent solution is developed, CMS finalize the proposed assignment of CAR T-cell therapy to MS–DRG 016, approve the NTAP application for CAR T-cell therapy, and/or allow for a CCR of 1.0 for CAR T-cell therapy. However, some commenters disagreed with CMS' proposed assignment of CAR T-cell therapy to MS–DRG 016 and requested a new separate MS–DRG. These commenters disagreed that patients receiving CAR T-cell therapy are sufficiently clinically similar to patients receiving autologous bone marrow transplants. Reasons cited by these commenters included differences in lengths of stay, the level and predictability of associated toxicity, and the overall disease burden. Some of these commenters suggested creating a new separate MS–DRG for CAR T-cell therapy and developing the FY 2019 weight for this MS–DRG not based only on historical claims data but also including alternative data on the cost of CAR T-cell therapy drugs, such as average sales price (ASP) data. Some commenters pointed to the establishment of a separate DRG for drug eluting stents under the IPPS as a possible payment model for CAR T-cell therapy.

Other commenters did not support the creation of a new separate MS–DRG for CAR T-cell therapy. Reasons cited by these commenters included the relative newness of the therapy, the limited number of providers delivering these treatments, the low volume of patients, redistributive effects, and the lack of long term data surrounding length of stay, treatment complexities, and costs. These commenters urged CMS to collect more comprehensive clinical and cost data before considering assignment of a new MS–DRG to these therapies.

Some commenters requested that CMS carve out the cost of CAR T-cell therapy from the IPPS and pay for it on a pass-through basis reflecting the cost of the therapy to the hospital and indicated that this was the approach taken by some state Medicaid programs. These commenters believed that payment on a pass-through basis, for inpatient and/or outpatient care, provides the most accurate payment while minimizing inappropriate payment incentives across the inpatient and outpatient setting.

Commenters also made technical and operational suggestions to CMS if we were to adopt changes to our existing payment mechanisms in the final rule as they apply to CAR T-cell therapy, including how a CCR of 1.0 would be operationalized, or how CMS would collect data on the cost of CAR T-cell therapy for pass-through and other purposes.

Response: Building on President Trump's *Blueprint to Lower Drug Prices and Reduce Out-of-Pocket Costs,* the CMS Center for Medicare and Medicaid Innovation (Innovation Center) is soliciting public comment in the CY 2019 OPPS/ASC proposed rule on key design considerations for developing a potential model that would test private market strategies and introduce competition to improve quality of care for beneficiaries, while reducing both Medicare expenditures and beneficiaries' out of pocket spending. CMS sought similar feedback in a previous solicitation of comments,[4] and, most recently, in the President's *Blueprint to Lower Drug Prices and Reduce Out-of-Pocket Costs.*[5]

Given the relative newness of CAR T-cell therapy, the potential model, including the reasons underlying our consideration of a potential model described in greater detail in the CY 2019 OPPS/ASC proposed rule, and our request for feedback on this model approach, we believe it would be premature to adopt changes to our existing payment mechanisms, either under the IPPS or for IPPS-excluded cancer hospitals, specifically for CAR T-cell therapy. Therefore, we disagree with commenters who have requested such changes under the IPPS for FY

[4] CMS included a solicitation of comments on the Competitive Acquisition Program (CAP) for Part B Drugs and Biologicals (81 FR 13247) in a proposed rule, on March 11, 2016, entitled ''Medicare Program; Part B Drug Payment Model'' (81 FR 13230). The solicitation of comments sought to help CMS determine if there was sufficient interest in the CAP program, and to gather public input if we were to consider developing and testing a future model that would be at least partly based on the authority for the CAP under section 1847B of the Act. The March 11, 2016 proposed rule was withdrawn on October 4, 2017 (82 FR 46182) to ensure agency flexibility in reexamining important issues related to the proposed payment model and exploring new options and alternatives with stakeholders as CMS develops potential payment models that support innovative approaches to improve quality, accessibility, and affordability, reduce Medicare program expenditures, and empower patients and doctors to make decisions about their health care.

[5] President Donald J. Trump's Blueprint to Lower Drug Prices and Reduce Out-of-Pocket Costs, May 11, 2018. Available at: *https://www.whitehouse.gov/briefings-statements/president-donald-j-trumps-blueprint-lower-drug-prices/.*

2019, including, but not limited to, the creation of a pass-through payment; structural changes in new technology add-on payments for the drug therapy; changes in the usual cost-to-charge ratios (CCRs) used in ratesetting and payment, including those used in determining new technology add-on payments, outlier payments, and payments to IPPS excluded cancer hospitals; and the creation of a new MS–DRG specifically for CAR T-cell therapy prior to gaining more experience with the therapy.

We agree with commenters who recommended that we finalize the proposed assignment of CAR–T therapy to MS–DRG 016 rather than consider the creation of a new MS–DRG for these therapies, given the relative newness of the therapy, the limited number of providers delivering these treatments, the low volume of patients, redistributive effects, and the lack of long-term data surrounding length of stay, treatment complexities, and costs. In addition to the potential model, we agree we should collect more comprehensive clinical and cost data before considering assignment of a new MS–DRG to these therapies.

In response to the commenters who indicated that MS–DRG 016 is a poor clinical match for CAR T-cell therapy patients and would prefer that we create a new MS–DRG for CAR–T cell therapy, we acknowledge that there are differences between the treatment approaches, but we continue to believe that MS–DRG 016 is the most appropriate match of the existing MS–DRGs, given similarities between CAR–T cell therapy and autologous bone marrow transplant in harvesting and infusion of patient cells as well as post-infusion monitoring for and management of potentially severe adverse effects. We reiterate that, in light of the potential model and our request for feedback on this approach, it would be premature to create a new MS–DRG specifically for CAR T-cell therapy. We will consider requests for alternative MS–DRG assignments and/or the creation of a new MS–DRG for CAR T-cell therapy after we review the public feedback on a potential model and as we gain further experience with CAR T-cell therapy and can better evaluate the commenters' concerns.

As described in more detail in section II.H. of the preamble of this final rule, we are approving new technology add-on payments for CAR T-cell therapy for FY 2019.

In response to commenters who made technical and operational suggestions if CMS were to adopt changes to its existing payment mechanisms in the final rule as they apply to CAR T-cell therapy, because we are not adopting such changes, we are not addressing those technical and operational comments at the current time but will consider them for future rulemaking as appropriate.

After consideration of the public comments we received, we are finalizing our proposed approach of assigning ICD–10–PCS procedure codes XW033C3 and XW043C3 to Pre-MDC MS–DRG 016 for FY 2019 and to revise the title of MS–DRG 016 from ''Autologous Bone Marrow Transplant with CC/MCC'' to ''Autologous Bone Marrow Transplant with CC/MCC or T-cell Immunotherapy.''

3. MDC 1 (Diseases and Disorders of the Nervous System)

a. Epilepsy With Neurostimulator

In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38015 through 38019), based on a request we received and our review of the claims data, the advice of our clinical advisors, and consideration of public comments, we finalized our proposal to reassign all cases reporting a principal diagnosis of epilepsy and one of the following ICD–10–PCS code combinations, which capture cases involving neurostimulator generators inserted into the skull (including cases involving the use of the RNS© neurostimulator), to retitled MS–DRG 023 (Craniotomy with Major Device Implant or Acute Complex Central Nervous System (CNS) Principal Diagnosis (PDX) with MCC or Chemotherapy Implant or Epilepsy with Neurostimulator), even if there is no MCC reported:

- 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H00MZ (Insertion of neurostimulator lead into brain, open approach);
- 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H03MZ (Insertion of neurostimulator lead into brain, percutaneous approach); and
- 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H04MZ (Insertion of neurostimulator lead into brain, percutaneous endoscopic approach).

The finalized listing of epilepsy diagnosis codes (82 FR 38018 through 38019) contained codes provided by the requestor (82 FR 38016), in addition to diagnosis codes organized in subcategories G40.A- and G40.B- as recommended by a commenter in response to the proposed rule (82 FR 38018) because the diagnosis codes organized in these subcategories also are representative of diagnoses of epilepsy.

For FY 2019, we received a request to include two additional diagnosis codes organized in subcategory G40.1- in the listing of epilepsy diagnosis codes for cases assigned to MS–DRG 023 because these diagnosis codes also represent diagnoses of epilepsy. The two additional codes identified by the requestor are:

- G40.109 (Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with simple partial seizures, not intractable, without status epilepticus); and
- G40.111 (Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with simple partial seizures, intractable, with status epilepticus).

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20190), we stated that we agreed with the requestor that diagnosis codes G40.109 and G40.111 also are representative of epilepsy diagnoses and should be added to the listing of epilepsy diagnosis codes for cases assigned to MS–DRG 023 because they also capture a type of epilepsy. Our clinical advisors reviewed this issue and agreed that adding the two additional epilepsy diagnosis codes is appropriate. Therefore, we proposed to add ICD–10–CM diagnosis codes G40.109 and G40.111 to the listing of epilepsy diagnosis codes for cases assigned to MS–DRG 023, effective October 1, 2018.

Comment: Commenters agreed with CMS' proposal to add ICD–10–CM diagnosis codes G40.109 and G40.111 to the list of epilepsy diagnosis codes for assignment to MS–DRG 023. The commenters stated that the proposal was reasonable, given the ICD–10–CM diagnosis codes and the information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add ICD–10–CM diagnosis codes G40.109 and G40.111 to the list of epilepsy diagnosis codes for assignment to MS–DRG 023 in the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

b. Neurological Conditions With Mechanical Ventilation

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20190), we received two separate, but related requests to create new MS–DRGs for cases that identify patients who have been diagnosed with neurological conditions classified under MDC 1 (Diseases and Disorders of the Nervous

System) and who require mechanical ventilation with and without a thrombolytic and in the absence of an O.R. procedure. The requestors suggested that CMS consider when mechanical ventilation is reported with a neurological condition for the ICD–10 MS–DRG GROUPER assignment logic, similar to the current logic for MS–DRGs 207 and 208 (Respiratory System Diagnosis with Ventilator Support >96 Hours and <=96 Hours, respectively) under MDC 4 (Diseases and Disorders of the Respiratory System), which consider respiratory conditions that require mechanical ventilation and are assigned a higher relative weight.

The requestors stated that patients with a principal diagnosis of respiratory failure requiring mechanical ventilation are currently assigned to MS–DRG 207 (Respiratory System Diagnoses with Ventilator Support >96 Hours), which has a relative weight of 5.4845, and to MS–DRG 208 (Respiratory System Diagnoses with Ventilator Support <=96 Hours), which has a relative weight of 2.3678. The requestors also stated that patients with a principal diagnosis of ischemic cerebral infarction who received a thrombolytic agent during the hospital stay and did not undergo an O.R. procedure are assigned to MS–DRGs 061, 062, and 063 (Ischemic Stroke, Precerebral Occlusion or Transient Ischemia with Thrombolytic Agent with MCC, with CC, and without CC/MCC, respectively) under MDC 1, while patients with a principal diagnosis of intracranial hemorrhage or ischemic cerebral infarction who did not receive a thrombolytic agent during the hospital stay and did not undergo an O.R. procedure are assigned to MS–DRGs 064, 065 and 66 (Intracranial Hemorrhage or Cerebral Infarction with MCC, with CC or TPA in 24 Hours, and without CC/MCC, respectively) under MDC 1.

The requestors provided the current FY 2018 relative weights for these MS–DRGs as shown in the following table.

MS–DRG	MS–DRG title	Relative weight
MS–DRG 061	Ischemic Stroke, Precerebral Occlusion or Transient Ischemia with Thrombolytic Agent with MCC	2.7979
MS–DRG 062	Ischemic Stroke, Precerebral Occlusion or Transient Ischemia with Thrombolytic Agent with CC	l.9321
MS–DRG 063	Ischemic Stroke, Precerebral Occlusion or Transient Ischemia with Thrombolytic Agent without CC/MCC	l.6169
MS–DRG 064	Intracranial Hemorrhage or Cerebral Infarction with MCC	l.7685
MS–DRG 065	Intracranial Hemorrhage or Cerebral Infarction with CC or TPA in 24 hours	1.0311
MS–DRG 066	Intracranial Hemorrhage or Cerebral Infarction with MCC	.7466

The requestors stated that although the ICD–10–CM Official Guidelines for Coding and Reporting allow sequencing of acute respiratory failure as the principal diagnosis when it is jointly responsible (with an acute neurologic event) for admission, which would result in assignment to MS–DRGs 207 or 208 when the patient requires mechanical ventilation, it would not be appropriate to sequence acute respiratory failure as the principal diagnosis when it is secondary to intracranial hemorrhage or ischemic cerebral infarction.

The requestors also stated that reporting for other purposes, such as quality measures, clinical trials, and Joint Commission and State certification or survey cases, is based on the principal diagnosis, and it is important, from a quality of care perspective, that the intracranial hemorrhage or cerebral infarction codes continue to be sequenced as principal diagnosis. The requestors believed that cases of patients who present with cerebral infarction or cerebral hemorrhage and acute respiratory failure are currently in conflict for principal diagnosis sequencing because the cerebral infarction or cerebral hemorrhage code is needed as the principal diagnosis for quality reporting and other purposes. However, acute respiratory failure is needed as the principal diagnosis for purposes of appropriate payment under the MS–DRGs.

The requestors stated that by creating new MS–DRGs for neurological conditions with mechanical ventilation, those patients who require mechanical ventilation for airway protection on admission and those patients who develop acute respiratory failure requiring mechanical ventilation after admission can be grouped to MS–DRGs that provide appropriate payment for the mechanical ventilation resources. The requestors suggested two new MS–DRGs, citing as support that new MS–DRGs were created for patients with sepsis requiring mechanical ventilation greater than and less than 96 hours.

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20191) and earlier in this section, the requests we received were separate, but related requests. The first request was to specifically identify patients presenting with intracranial hemorrhage or cerebral infarction with mechanical ventilation and create two new MS–DRGs as follows:

- Suggested new MS–DRG XXX (Intracranial Hemorrhage or Cerebral Infarction with Mechanical Ventilation >96 Hours); and
- Suggested new MS–DRG XXX (Intracranial Hemorrhage or Cerebral Infarction with Mechanical Ventilation <=96 Hours).

The second request was to consider *any* principal diagnosis under the current GROUPER logic for MDC 1 with mechanical ventilation and create two new MS–DRGs as follows:

- Suggested New MS–DRG XXX (Neurological System Diagnosis with Mechanical Ventilation 96+ Hours); and
- Suggested New MS–DRG XXX (Neurological System Diagnosis with Mechanical Ventilation <96 Hours).

Both requesters suggested that CMS use the three ICD–10–PCS codes identifying mechanical ventilation to assign cases to the respective suggested new MS–DRGs. The three ICD–10–PCS codes are shown in the following table.

ICD–10–PCS code	Code description
5A1935Z	Respiratory ventilation, less than 96 consecutive hours.
5A1945Z	Respiratory ventilation, 24–96 consecutive hours.
5A1955Z	Respiratory ventilation, greater than 96 consecutive hours.

Below we discuss the different aspects of each request in more detail.

The first request involved two aspects: (1) Analyzing patients diagnosed with cerebral infarction and required mechanical ventilation who received a thrombolytic (for example, TPA) and did not undergo an O.R. procedure; and (2) analyzing patients diagnosed with intracranial hemorrhage or ischemic cerebral infarction and required mechanical ventilation who did not receive a thrombolytic (for example, TPA) during the current episode of care and did not undergo an O.R. procedure.

For the first subset of patients, we analyzed claims data from the September 2017 update of the FY 2017 MedPAR file for MS–DRGs 061, 062, and 063 because cases that are assigned to these MS–DRGs specifically identify patients who were diagnosed with a cerebral infarction and received a thrombolytic. The 90 ICD–10–CM diagnosis codes that specify a cerebral infarction and were included in our analysis are listed in Table 6P.1a associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*).

The ICD–10–PCS procedure codes displayed in the following table describe use of a thrombolytic agent.

ICD–10–PCS code	Code description
3E03017	Introduction of other thrombolytic into peripheral vein, open approach.
3E03317	Introduction of other thrombolytic into peripheral vein, percutaneous approach.
3E04017	Introduction of other thrombolytic into central vein, open approach.
3E04317	Introduction of other thrombolytic into central vein, percutaneous approach.
3E05017	Introduction of other thrombolytic into peripheral artery, open approach.
3E05317	Introduction of other thrombolytic into peripheral artery, percutaneous approach.
3E06017	Introduction of other thrombolytic into central artery, open approach.
3E06317	Introduction of other thrombolytic into central artery, percutaneous approach.
3E08017	Introduction of other thrombolytic into heart, open approach.
3E08317	Introduction of other thrombolytic into heart, percutaneous approach.

We examined claims data in MS–DRGs 061, 062, and 063 and identified cases that reported mechanical ventilation of any duration with a principal diagnosis of cerebral infarction where a thrombolytic agent was administered and the patient did not undergo an O.R. procedure. Our findings are shown in the following table.

CEREBRAL INFARCTION WITH THROMBOLYTIC AND MV

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 061—All cases	5,192	6.4	$20,097
MS–DRG 061—Cases with principal diagnosis of cerebral infarction and mechanical ventilation >96 hours	166	12.8	41,691
MS–DRG 061—Cases with principal diagnosis of cerebral infarction and mechanical ventilation = 24–96 hours	378	7.5	26,368
MS–DRG 061—Cases with principal diagnosis of cerebral infarction and mechanical ventilation <24 hours	214	4.9	19,795
MS–DRG 062—All cases	9,730	3.9	13,865
MS–DRG 062—Cases with principal diagnosis of cerebral infarction and mechanical ventilation >96 hours	0	0.0	0
MS–DRG 062—Cases with principal diagnosis of cerebral infarction and mechanical ventilation = 24–96 hours	10	5.3	19,817
MS–DRG 062—Cases with principal diagnosis of cerebral infarction and mechanical ventilation <24 hours	23	3.8	14,026
MS–DRG 063—All cases	1,984	2.7	11,771
MS–DRG 063—Cases with principal diagnosis of cerebral infarction and mechanical ventilation >96 hours	0	0.0	0
MS–DRG 063—Cases with principal diagnosis of cerebral infarction and mechanical ventilation = 24–96 hours	3	2.7	14,588
MS–DRG 063—Cases with principal diagnosis of cerebral infarction and mechanical ventilation <24 hours	5	2.0	11,195

As shown in this table, there were a total of 5,192 cases in MS–DRG 061 with an average length of stay of 6.4 days and average costs of $20,097. There were a total of 758 cases reporting the use of mechanical ventilation in MS–DRG 061 with an average length of stay ranging from 4.9 days to 12.8 days and average costs ranging from $19,795 to $41,691. For MS–DRG 062, there were a total of 9,730 cases with an average length of stay of 3.9 days and average costs of $13,865. There were a total of 33 cases reporting the use of mechanical ventilation in MS–DRG 062 with an average length of stay ranging from 3.8 days to 5.3 days and average costs ranging from $14,026 to $19,817. For MS–DRG 063, there were a total of 1,984 cases with an average length of stay of 2.7 days and average costs of $11,771. There were a total of 8 cases reporting the use of mechanical ventilation in MS–DRG 063 with an average length of stay ranging from 2.0 days to 2.7 days and average costs ranging from $11,195 to $14,588.

We then compared the total number of cases in MS–DRGs 061, 062, and 063 specifically reporting mechanical

ventilation >96 hours with a principal diagnosis of cerebral infarction where a thrombolytic agent was administered and the patient did not undergo an O.R. procedure against the total number of cases reporting mechanical ventilation <=96 hours with a principal diagnosis of cerebral infarction where a thrombolytic agent was administered and the patient did not undergo an O.R. procedure. Our findings are shown in the following table.

CEREBRAL INFARCTION WITH THROMBOLYTIC AND MV

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 061—All cases	5,192	6.4	$20,097
MS–DRG 061—Cases with principal diagnosis of cerebral infarction and mechanical ventilation >96 hours	166	12.8	41,691
MS–DRG 061—Cases with principal diagnosis of cerebral infarction and mechanical ventilation <=96 hours	594	6.5	23,780
MS–DRG 062—All cases	9,730	3.9	13,865
MS–DRG 062—Cases with principal diagnosis of cerebral infarction and mechanical ventilation >96 hours	0	0.0	0
MS–DRG 062—Cases with principal diagnosis of cerebral infarction and mechanical ventilation <=96 hours	34	4.2	15,558
MS–DRG 063—All cases	1,984	2.7	11,771
MS–DRG 063—Cases with principal diagnosis of cerebral infarction and mechanical ventilation >96 hours	0	0.0	0
MS–DRG 063—Cases with principal diagnosis of cerebral infarction and mechanical ventilation <=96 hours	8	2.3	12,467

As shown in this table, the total number of cases reported in MS–DRG 061 was 5,192, with an average length of stay of 6.4 days and average costs of $20,097. There were 166 cases that reported mechanical ventilation >96 hours, with an average length of stay of 12.8 days and average costs of $41,691. There were 594 cases that reported mechanical ventilation <=96 hours, with an average length of stay of 6.5 days and average costs of $23,780.

The total number of cases reported in MS–DRG 062 was 9,730, with an average length of stay of 3.9 days and average costs of $13,865. There were no cases identified in MS–DRG 062 where mechanical ventilation >96 hours was reported. However, there were 34 cases that reported mechanical ventilation <=96 hours, with an average length of stay of 4.2 days and average costs of $15,558.

The total number of cases reported in MS–DRG 63 was 1,984 with an average length of stay of 2.7 days and average costs of $11,771. There were no cases identified in MS–DRG 063 where mechanical ventilation >96 hours was reported. However, there were 8 cases that reported mechanical ventilation <=96 hours, with an average length of stay of 2.3 days and average costs of $12,467.

For the second subset of patients, we examined claims data for MS–DRGs 064, 065, and 066. We identified cases reporting mechanical ventilation of any duration with a principal diagnosis of cerebral infarction or intracranial hemorrhage where a thrombolytic agent was not administered during the current hospital stay and the patient did not undergo an O.R. procedure. The 33 ICD–10–CM diagnosis codes that specify an intracranial hemorrhage and were included in our analysis are listed in Table 6P.1b associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*).

We also used the list of 90 ICD–10–CM diagnosis codes that specify a cerebral infarction listed in Table 6P.1a associated with the proposed rule for our analysis. We noted that the GROUPER logic for case assignment to MS–DRG 065 includes that a thrombolytic agent (for example, TPA) was administered within 24 hours of the current hospital stay. The ICD–10–CM diagnosis code that describes this scenario is Z92.82 (Status post administration of tPA (rtPA) in a different facility within the last 24 hours prior to admission to current facility). We did not review the cases reporting that diagnosis code for our analysis. Our findings are shown in the following table.

CEREBRAL INFARCTION OR INTRACRANIAL HEMORRHAGE WITH MV AND WITHOUT THROMBOLYTIC

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 064—All cases	76,513	6.0	$12,574
MS–DRG 064—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation >96 hours	2,153	13.4	38,262
MS–DRG 064—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation = 24–96 hours	4,843	6.6	18,119
MS–DRG 064—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation <24 hours	4,001	3.1	8,675
MS–DRG 065—All cases	106,554	3.7	7,236
MS–DRG 065—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation >96 hours	22	10.2	20,759
MS–DRG 065—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation = 24–96 hours	127	4.2	12,688
MS–DRG 065—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation <24 hours	301	2.1	6,145

CEREBRAL INFARCTION OR INTRACRANIAL HEMORRHAGE WITH MV AND WITHOUT THROMBOLYTIC—Continued

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 066—All cases	34,689	2.5	5,321
MS–DRG 066—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation >96 hours	1	4.0	3,426
MS–DRG 066—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation = 24–96 hours	31	3.7	10,364
MS–DRG 066—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation <24 hours	163	1.4	4,148

The total number of cases reported in MS–DRG 064 was 76,513, with an average length of stay of 6.0 days and average costs of $12,574. There were a total of 10,997 cases reporting the use of mechanical ventilation in MS–DRG 064 with an average length of stay ranging from 3.1 days to 13.4 days and average costs ranging from $8,675 to $38,262. For MS–DRG 065, there were a total of 106,554 cases with an average length of stay of 3.7 days and average costs of $7,236. There were a total of 450 cases reporting the use of mechanical ventilation in MS–DRG 065 with an average length of stay ranging from 2.1 days to 10.2 days and average costs ranging from $6,145 to $20,759. For MS–DRG 066, there were a total of 34,689 cases with an average length of stay of 2.5 days and average costs of $5,321. There were a total of 195 cases reporting the use of mechanical ventilation in MS–DRG 066 with an average length of stay ranging from 1.4 days to 4.0 days and average costs ranging from $3,426 to $10,364.

We then compared the total number of cases in MS–DRGs 064, 065, and 066 specifically reporting mechanical ventilation >96 hours with a principal diagnosis of cerebral infarction or intracranial hemorrhage where a thrombolytic agent was not administered and the patient did not undergo an O.R. procedure against the total number of cases reporting mechanical ventilation <=96 hours with a principal diagnosis of cerebral infarction or intracranial hemorrhage where a thrombolytic agent was not administered and the patient did not undergo an O.R. procedure. Our findings are shown in the following table.

CEREBRAL INFARCTION OR INTRACRANIAL HEMORRHAGE WITH MV AND WITHOUT THROMBOLYTIC

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 064—All cases	76,513	6.0	$12,574
MS–DRG 064—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation >96 hours	2,153	13.4	38,262
MS–DRG 064—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation <=96 hours	8,794	4.9	13,704
MS–DRG 065—All cases	106,554	3.7	7,236
MS–DRG 065—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation >96 hours	22	10.2	20,759
MS–DRG 065—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation <=96 hours	428	2.7	8,086
MS–DRG 066—All cases	34,689	2.5	5,321
MS–DRG 066—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation >96 hours	1	4.0	3,426
MS–DRG 066—Cases with principal diagnosis of cerebral infarction or intracranial hemorrhage and mechanical ventilation <=96 hours	194	1.8	5,141

The total number of cases reported in MS–DRG 064 was 76,513, with an average length of stay of 6.0 days and average costs of $12,574. There were 2,153 cases that reported mechanical ventilation >96 hours, with an average length of stay of 13.4 days and average costs of $38,262, and there were 8,794 cases that reported mechanical ventilation <=96 hours, with an average length of stay of 4.9 days and average costs of $13,704.

The total number of cases reported in MS–DRG 65 was 106,554, with an average length of stay of 3.7 days and average costs of $7,236. There were 22 cases that reported mechanical ventilation >96 hours, with an average length of stay of 10.2 days and average costs of $20,759, and there were 428 cases that reported mechanical ventilation <=96 hours, with an average length of stay of 2.7 days and average costs of $8,086.

The total number of cases reported in MS–DRG 66 was 34,689, with an average length of stay of 2.5 days and average costs of $5,321. There was one case that reported mechanical ventilation >96 hours, with an average length of stay of 4.0 days and average costs of $3,426, and there were 194 cases that reported mechanical ventilation <=96 hours, with an average length of stay of 1.8 days and average costs of $5,141.

We also analyzed claims data for MS–DRGs 207 and 208. As shown in the following table, there were a total of 19,471 cases found in MS–DRG 207 with an average length of stay of 13.8 days and average costs of $38,124. For MS–DRG 208, there were a total of 55,802 cases found with an average length of stay of 6.7 days and average costs of $17,439.

RESPIRATORY SYSTEM DIAGNOSIS WITH VENTILATOR SUPPORT

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 207—All cases	19,471	13.8	$38,124
MS–DRG 208—All cases	55,802	6.7	17,439

We stated in the proposed rule that our analysis of claims data relating to the first request for MS–DRGs 061, 062, 063, 064, 065, and 066 and consultation with our clinical advisors do not support creating new MS–DRGs for cases that identify patients diagnosed with cerebral infarction or intracranial hemorrhage who require mechanical ventilation with or without a thrombolytic and in the absence of an O.R. procedure.

For the first subset of patients (in MS–DRGs 061, 062 and 063), our data findings for MS–DRG 061 demonstrate the 166 cases that reported mechanical ventilation >96 hours had a longer average length of stay (12.8 days versus 6.4 days) and higher average costs ($41,691 versus $20,097) compared to all the cases in MS–DRG 061. However, there were no cases that reported mechanical ventilation >96 hours for MS–DRG 062 or MS–DRG 063. For the 594 cases that reported mechanical ventilation <=96 hours in MS–DRG 061, the data show that the average length of stay was consistent with the average length of stay of all of the cases in MS–DRG 061 (6.5 days versus 6.4 days) and the average costs were also consistent with the average costs of all of the cases in MS–DRG 061 ($23,780 versus $20,097). For the 34 cases that reported mechanical ventilation <=996 hours in MS–DRG 062, the data show that the average length of stay was consistent with the average length of stay of all of the cases in MS–DRG 062 (4.2 days versus 3.9 days) and the average costs were also consistent with the average costs of all of the cases in MS DRG 062 ($15,558 versus $13,865). Lastly, for the 8 cases that reported mechanical ventilation <=96 hours in MS–DRG 063, the data show that the average length of stay was consistent with the average length of stay of all of the cases in MS–DRG 063 (2.3 days versus 2.7 days) and the average costs were also consistent with the average costs of all of the cases in MS DRG 063 ($12,467 versus $11,771).

For the second subset of patients (in MS–DRGs 064, 065 and 066), the data findings for the 2,153 cases that reported mechanical ventilation >96 hours in MS–DRG 064 showed a longer average length of stay (13.4 days versus 6.0 days) and higher average costs ($38,262 versus $12,574) compared to all of the cases in MS–DRG 064. However, the 2,153 cases represent only 2.8 percent of all the cases in MS–DRG 064. For the 22 cases that reported mechanical ventilation >96 hours in MS–DRG 065, the data showed a longer average length of stay (10.2 days versus 3.7 days) and higher average costs ($20,759 versus $7,236) compared to all of the cases in MS–DRG 065. However, the 22 cases represent only 0.02 percent of all the cases in MS–DRG 065. For the one case that reported mechanical ventilation >96 hours in MS–DRG 066, the data showed a longer average length of stay (4.0 days versus 2.5 days) and lower average costs ($3,426 versus $5,321) compared to all of the cases in MS–DRG 066. For the 8,794 cases that reported mechanical ventilation <=96 hours in MS–DRG 064, the data showed that the average length of stay was shorter than the average length of stay for all of the cases in MS–DRG 064 (4.9 days versus 6.0 days) and the average costs were consistent with the average costs of all of the cases in MS–DRG 064 ($13,704 versus $12,574). For the 428 cases that reported mechanical ventilation <=96 hours in MS–DRG 065, the data showed that the average length of stay was shorter than the average length of stay for all of the cases in MS–DRG 065 (2.7 days versus 3.7 days) and the average costs were consistent with the average costs of all the cases in MS–DRG 065 ($8,086 versus $7,236). For the 194 cases that reported mechanical ventilation <=96 hours in MS–DRG 066, the data showed that the average length of stay was shorter than the average length of stay for all of the cases in MS–DRG 066 (1.8 days versus 2.5 days) and the average costs were less than the average costs of all of the cases in MS–DRG 066 ($5,141 versus $5,321).

We stated in the proposed rule that, based on the analysis described above, the current MS–DRG assignment for the cases in MS–DRGs 061, 062, 063, 064, 065 and 066 that identify patients diagnosed with cerebral infarction or intracranial hemorrhage who require mechanical ventilation with or without a thrombolytic and in the absence of an O.R. procedure appears appropriate.

Our clinical advisors also noted that patients requiring mechanical ventilation (in the absence of an O.R. procedure) are known to be more resource intensive and it would not be practical to create new MS–DRGs specifically for this subset of patients diagnosed with an acute neurologic event, given the various indications for which mechanical ventilation may be utilized. We stated in the proposed rule that, if we were to create new MS–DRGs for patients diagnosed with an intracranial hemorrhage or cerebral infarction who require mechanical ventilation, it would not address all of the other patients who also utilize mechanical ventilation resources. It would also necessitate further extensive analysis and evaluation for several other conditions that require mechanical ventilation across each of the 25 MDCs under the ICD–10 MS–DRGs.

To evaluate the frequency in which the use of mechanical ventilation is reported for different clinical scenarios, we examined claims data across each of the 25 MDCs to determine the number of cases reporting the use of mechanical ventilation >96 hours. Our findings are shown in the table below.

MECHANICAL VENTILATION >96 HOURS ACROSS ALL MDCS

MDC	Number of cases	Average length of stay	Average costs
All cases with mechanical ventilation >96 hours	127,626	18.4	$61,056
MDC 1 (Diseases and Disorders of the Nervous System)—Cases with mechanical ventilation >96 hours	13,668	18.3	61,234
MDC 2 (Disease and Disorders of the Eye)—Cases with mechanical ventilation >96 hours	33	22.7	79,080

MECHANICAL VENTILATION >96 HOURS ACROSS ALL MDCS—Continued

MDC	Number of cases	Average length of stay	Average costs
MDC 3 (Diseases and Disorders of the Ear, Nose, Mouth and Throat)—Cases with mechanical ventilation >96 hours	602	20.3	62,625
MDC 4 (Diseases and Disorders of the Respiratory System)—Cases with mechanical ventilation >96 hours	27,793	16.6	48,869
MDC 5 (Diseases and Disorders of the Circulatory System)—Cases with mechanical ventilation >96 hours	16,923	20.7	84,565
MDC 6 (Diseases and Disorders of the Digestive System)—Cases with mechanical ventilation >96 hours	6,401	22.4	73,759
MDC 7 (Diseases and Disorders of the Hepatobiliary System and Pancreas)—Cases with mechanical ventilation >96 hours	1,803	24.5	80,477
MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue)—Cases with mechanical ventilation >96 hours	2,780	22.3	83,271
MDC 9 (Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast)—Cases with mechanical ventilation >96 hours	390	22.2	68,288
MDC 10 (Endocrine, Nutritional and Metabolic Diseases and Disorders)—Cases with mechanical ventilation >96 hours	1,168	20.9	60,682
MDC 11 (Diseases and Disorders of the Kidney and Urinary Tract)—Cases with mechanical ventilation >96 hours	2,325	19.6	57,893
MDC 12 (Diseases and Disorders of the Male Reproductive System)—Cases with mechanical ventilation >96 hours	54	26.8	95,204
MDC 13 (Diseases and Disorders of the Female Reproductive System)—Cases with mechanical ventilation >96 hours	89	24.6	83,319
MDC 14 (Pregnancy, Childbirth and the Puerperium)—Cases with mechanical ventilation >96 hours	22	17.4	56,981
MDC 16 (Diseases and Disorders of Blood, Blood Forming Organs, Immunologic Disorders)—Cases with mechanical ventilation >96 hours	468	20.1	68,658
MDC 17 (Myeloproliferative Diseases and Disorders, Poorly Differentiated Neoplasms)—Cases with mechanical ventilation >96 hours	538	29.7	99,968
MDC 18 (Infectious and Parasitic Diseases, Systemic or Unspecified Sites)—Cases with mechanical ventilation >96 hours	48,176	17.3	55,022
MDC 19 (Mental Diseases and Disorders)—Cases with mechanical ventilation >96 hours	54	29.3	52,749
MDC 20 (Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders)—Cases with mechanical ventilation >96 hours	312	20.5	47,637
MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs)—Cases with mechanical ventilation >96 hours	2,436	18.2	57,712
MDC 22 (Burns)—Cases with mechanical ventilation >96 hours	242	34.8	188,704
MDC 23 (Factors Influencing Health Status and Other Contacts with Health Services)—Cases with mechanical ventilation >96 hours	64	17.7	50,821
MDC 24 (Multiple Significant Trauma)—Cases with mechanical ventilation >96 hours	922	17.6	72,358
MDC 25 (Human Immunodeficiency Virus Infections)—Cases with mechanical ventilation >96 hours	363	19.1	56,688

As shown in the table, the top 5 MDCs with the largest number of cases reporting mechanical ventilation >96 hours are MDC 18, with 48,176 cases; MDC 4, with 27,793 cases; MDC 5, with 16,923 cases; MDC 1, with 13,668 cases; and MDC 6, with 6,401 cases. We noted that the claims data demonstrate that the average length of stay is consistent with what we would expect for cases reporting the use of mechanical ventilation >96 hours across each of the 25 MDCs. The top 5 MDCs with the highest average costs for cases reporting mechanical ventilation >96 hours were MDC 22, with average costs of $188,704; MDC 17, with average costs of $99,968; MDC 12, with average costs of $95,204; MDC 5, with average costs of $84,565; and MDC 13, with average costs of $83,319. We noted that the data for MDC 8 demonstrated similar results compared to MDC 13 with average costs of $83,271 for cases reporting mechanical ventilation >96 hours. In summary, the claims data reflect a wide variance with regard to the frequency and average costs for cases reporting the use of mechanical ventilation >96 hours.

We also examined claims data across each of the 25 MDCs for the number of cases reporting the use of mechanical ventilation <=96 hours. Our findings are shown in the table below.

MECHANICAL VENTILATION <=96 HOURS ACROSS ALL MDCS

MDC	Number of cases	Average length of stay	Average costs
All cases with mechanical ventilation <=96 hours	266,583	8.5	$26,668
MDC 1 (Diseases and Disorders of the Nervous System)—Cases with mechanical ventilation <=96 hours	29,896	7.4	22,838
MDC 2 (Disease and Disorders of the Eye)—Cases with mechanical ventilation <=96 hours	60	8.4	29,708
MDC 3 (Diseases and Disorders of the Ear, Nose, Mouth and Throat)—Cases with mechanical ventilation <=96 hours	1,397	9.8	29,479
MDC 4 (Diseases and Disorders of the Respiratory System)—Cases with mechanical ventilation <=96 hours	64,861	7.8	20,929

MECHANICAL VENTILATION <=96 HOURS ACROSS ALL MDCS—Continued

MDC	Number of cases	Average length of stay	Average costs
MDC 5 (Diseases and Disorders of the Circulatory System)—Cases with mechanical ventilation <=96 hours	45,147	8.8	35,818
MDC 6 (Diseases and Disorders of the Digestive System)—Cases with mechanical ventilation <=96 hours	15,629	11.3	33,660
MDC 7 (Diseases and Disorders of the Hepatobiliary System and Pancreas)—Cases with mechanical ventilation <=96 hours	4,678	10.5	31,565
MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue)—Cases with mechanical ventilation <=96 hours	7,140	10.4	40,183
MDC 9 (Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast)—Cases with mechanical ventilation <=96 hours	1,036	10.7	26,809
MDC 10 (Endocrine, Nutritional and Metabolic Diseases and Disorders)—Cases with mechanical ventilation <=96 hours	3,591	9.0	23,863
MDC 11 (Diseases and Disorders of the Kidney and Urinary Tract)—Cases with mechanical ventilation <=96 hours	5,506	10.2	27,951
MDC 12 (Diseases and Disorders of the Male Reproductive System)—Cases with mechanical ventilation <=96 hours	168	11.5	35,009
MDC 13 (Diseases and Disorders of the Female Reproductive System)—Cases with mechanical ventilation <=96 hours	310	10.8	32,382
MDC 14 (Pregnancy, Childbirth and the Puerperium)—Cases with mechanical ventilation <=96 hours	55	7.6	21,785
MDC 16 (Diseases and Disorders of Blood, Blood Forming Organs, Immunologic Disorders)—Cases with mechanical ventilation <=96 hours	1,171	8.7	26,138
MDC 17 (Myeloproliferative Diseases and Disorders, Poorly Differentiated Neoplasms)—Cases with mechanical ventilation <=96 hours	1,178	15.3	46,335
MDC 18 (Infectious and Parasitic Diseases, Systemic or Unspecified Sites)—Cases with mechanical ventilation <=96 hours	69,826	8.5	25,253
MDC 19 (Mental Diseases and Disorders)—Cases with mechanical ventilation <=96 hours	264	10.4	18,805
MDC 20 (Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders)—Cases with mechanical ventilation <=96 hours	918	8.3	19,376
MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs)—Cases with mechanical ventilation <=96 hours	10,842	6.5	17,843
MDC 22 (Burns)—Cases with mechanical ventilation <=96 hours	353	9.7	45,557
MDC 23 (Factors Influencing Health Status and Other Contacts with Health Services)—Cases with mechanical ventilation <=96 hours	307	6.6	16,159
MDC 24 (Multiple Significant Trauma)—Cases with mechanical ventilation <=96 hours	1,709	8.8	36,475
MDC 25 (Human Immunodeficiency Virus Infections)—Cases with mechanical ventilation <=96 hours	541	10.4	29,255

As shown in the table, the top 5 MDCs with the largest number of cases reporting mechanical ventilation <=96 hours are MDC 18, with 69,826 cases; MDC 4, with 64,861 cases; MDC 5, with 45,147 cases; MDC 1, with 29,896 cases; and MDC 6, with 15,629 cases. We noted that the claims data demonstrate that the average length of stay is consistent with what we would expect for cases reporting the use of mechanical ventilation <=96 hours across each of the 25 MDCs. The top 5 MDCs with the highest average costs for cases reporting mechanical ventilation <=96 hours are MDC 17, with average costs of $46,335; MDC 22, with average costs of $45,557; MDC 8, with average costs of $40,183; MDC 24, with average costs of $36,475; and MDC 5, with average costs of $35,818. Similar to the cases reporting mechanical ventilation >96 hours, the claims data for cases reporting the use of mechanical ventilation <=96 hours also reflect a wide variance with regard to the frequency and average costs. Depending on the number of cases in each MS–DRG, it may be difficult to detect patterns of complexity and resource intensity.

With respect to the requestor's statement that reporting for other purposes, such as quality measures, clinical trials, and Joint Commission and State certification or survey cases, is based on the principal diagnosis, and their belief that patients who present with cerebral infarction or cerebral hemorrhage and acute respiratory failure are currently in conflict for principal diagnosis sequencing because the cerebral infarction or cerebral hemorrhage code is needed as the principal diagnosis for quality reporting and other purposes (however, acute respiratory failure is needed as the principal diagnosis for purposes of appropriate payment under the MS–DRGs), we noted that providers are required to assign the principal diagnosis according to the ICD–10–CM Official Guidelines for Coding and Reporting and these assignments are not based on factors such as quality measures or clinical trials indications. Furthermore, we do not base MS–DRG reclassification decisions on those factors. If the cerebral hemorrhage or ischemic cerebral infarction is the reason for admission to the hospital, the cerebral hemorrhage or ischemic cerebral infarction diagnosis code should be assigned as the principal diagnosis.

We acknowledged in the proposed rule that new MS–DRGs were created for cases of patients with sepsis requiring mechanical ventilation greater than and less than 96 hours. However, those MS–DRGs (MS–DRG 575 (Septicemia with Mechanical Ventilation 96+ Hours Age >17) and MS–DRG 576 (Septicemia without Mechanical Ventilation 96+ Hours Age >17)) were created several years ago, in FY 2007 (71 FR 47938 through 47939) in response to public comments suggesting alternatives for the need to recognize the treatment for that subset of patients with severe sepsis who exhibit a greater degree of severity and resource consumption as septicemia is a systemic condition, and also as a

preliminary step in the transition from the CMS DRGs to MS–DRGs.

We stated in the proposed rule that we believe that additional analysis and efforts toward a broader approach to refining the MS–DRGs for cases of patients requiring mechanical ventilation across the MDCs involves carefully examining the potential for instability in the relative weights and disrupting the integrity of the MS–DRG system based on the creation of separate MS–DRGs involving small numbers of cases for various indications in which mechanical ventilation may be required.

The second request focused on patients diagnosed with *any* neurological condition classified under MDC 1 requiring mechanical ventilation in the absence of an O.R. procedure and without having received a thrombolytic agent. Because the first request specifically involved analysis for the acute neurological conditions of cerebral infarction and intracranial hemorrhage under MDC 1 and our findings did not support creating new MS–DRGs for those specific conditions, we did not perform separate claims analysis for other conditions classified under MDC 1.

Therefore, in the FY 2019 IPPS/LTCH PPS proposed rule, we did not propose to create new MS–DRGs for cases that identify patients diagnosed with neurological conditions classified under MDC 1 who require mechanical ventilation with or without a thrombolytic and in the absence of an O.R. procedure.

Comment: Commenters supported CMS' proposal to not create new MS–DRGs, classified under MDC 1, for cases representing patients diagnosed with a neurological condition who require mechanical ventilation with or without a thrombolytic, and in the absence of an O.R. procedure. The commenters stated that the proposal was reasonable, given the data, the ICD–10–CM diagnosis codes, the ICD–10–PCS procedure codes, and the information provided. However, the commenters also recommended that CMS continue to conduct further analyses across all the MDCs for the subset of patients who require mechanical ventilation in an effort to better address the reporting and payment issues.

Response: We appreciate the commenters' support and agree that further analyses are necessary to evaluate the development of potential proposals for the subset of patients requiring mechanical ventilation across all the MDCs.

Comment: One commenter disagreed with CMS' proposal to not create new MS–DRGs for patients admitted with strokes and treated with mechanical ventilation. The commenter expressed appreciation for CMS' efforts in analyzing the cost and length of stay data for this subset of patients. However, the commenter believed that the results of the analysis identifying patients who receive mechanical ventilation >96 hours and also have an MCC demonstrate that these cases require twice the cost of all cases in MS–DRG 61 (Ischemic Stroke, Precerebral Occlusion or Transient Ischemia with Thrombolytic Agent with MCC) and MS–DRG 64 (Intracranial Hemorrhage or Cerebral Infarction with MCC). The commenter requested that CMS reconsider alternative options for this subset of patients due to the cost and length of stay disparities.

Response: We acknowledge the commenters' concern that the average length of stay and average costs for cases where mechanical ventilation >96 hours was reported with an MCC for MS–DRG 61 and MS–DRG 64 are greater when compared to the average length of stay and average costs for all cases in those MS–DRGs. However, as stated in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20195), our clinical advisors noted that patients requiring mechanical ventilation are known to be more resource intensive and it would not be practical to create new MS–DRGs for this subset of patients given the various other indications in which mechanical ventilation may be utilized for other patients. We will consider additional analysis in the future in our efforts toward a broader approach to refining the MS–DRGs for cases of patients requiring mechanical ventilation across the MDCs.

Comment: One commenter suggested that, although CMS' analysis of the cases reporting a neurological condition with mechanical ventilation was acceptable, CMS consider creating a new MS–DRG for poisoning with mechanical ventilation in future rulemaking. The commenter believed that a patient who is in critical condition as a result of a poisoning and requires prolonged mechanical ventilation is not being recognized appropriately under the current MS–DRG relative payment weights.

Response: We appreciate the commenter's input and suggestion. As noted earlier, we will consider additional analysis in our efforts toward a broader approach to refining the MS–DRGs for cases of patients requiring mechanical ventilation across the MDCs.

After consideration of the public comments we received, we are finalizing our proposal to not create new MS–DRGs, classified under MDC 1, for cases that identify patients requiring mechanical ventilation and are diagnosed with stroke or any other neurological condition with or without a thrombolytic, and in the absence of an O.R. procedure for FY 2019.

4. MDC 5 (Diseases and Disorders of the Circulatory System)

a. Pacemaker Insertions

In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56804 through 56809), we discussed a request to examine the ICD–10–PCS procedure code combinations that describe procedures involving pacemaker insertions to determine if some procedure code combinations were excluded from the Version 33 ICD–10 MS–DRG assignments for MS–DRGs 242, 243, and 244 (Permanent Cardiac Pacemaker Implant with MCC, with CC, and without CC/MCC, respectively) under MDC 5. We finalized our proposal to modify the Version 34 ICD–10 MS–DRG GROUPER logic so the specified procedure code combinations were no longer required for assignment into those MS–DRGs. As a result, the logic for pacemaker insertion procedures was simplified by separating the procedure codes describing cardiac pacemaker device insertions into one list and separating the procedure codes describing cardiac pacemaker lead insertions into another list. Therefore, when any ICD–10–PCS procedure code describing the insertion of a pacemaker device is reported from that specific logic list with any ICD–10–PCS procedure code describing the insertion of a pacemaker lead from that specific logic list (81 FR 56804 through 56806), the case is assigned to MS–DRGs 242, 243, and 244 under MDC 5.

We then discussed our examination of the Version 33 GROUPER logic for MS–DRGs 258 and 259 (Cardiac Pacemaker Device Replacement with and without MCC, respectively) because assignment of cases to these MS–DRGs also included qualifying ICD–10–PCS procedure code combinations involving pacemaker insertions (81 FR 56806 through 56808). Specifically, the logic for Version 33 ICD–10 MS–DRGs 258 and 259 included ICD–10–PCS procedure code combinations describing the removal of pacemaker devices and the insertion of new pacemaker devices. We finalized our proposal to modify the Version 34 ICD–10 MS–DRG GROUPER logic for MS–DRGs 258 and 259 to establish that a case reporting any procedure code from the list of ICD–10–PCS procedure codes describing procedures involving pacemaker device insertions without any other procedure

codes describing procedures involving pacemaker leads reported would be assigned to MS–DRGs 258 and 259 (81 FR 56806 through 56807) under MDC 5. In addition, we pointed out that a limited number of ICD–10–PCS procedure codes describing pacemaker insertion are classified as non-operating room (non-O.R.) codes within the MS–DRGs and that the Version 34 ICD–10 MS–DRG GROUPER logic would continue to classify these procedure codes as non-O.R. codes. We noted that a case reporting any one of these non-O.R. procedure codes describing a pacemaker device insertion without any other procedure code involving a pacemaker lead would be assigned to MS–DRGs 258 and 259. Therefore, the listed procedure codes describing a pacemaker device insertion under MS–DRGs 258 and 259 are designated as non-O.R. affecting the MS–DRG.

Lastly, we discussed our examination of the Version 33 GROUPER logic for MS–DRGs 260, 261, and 262 (Cardiac Pacemaker Revision Except Device Replacement with MCC, with CC, and without CC/MCC, respectively), and noted that cases assigned to these MS–DRGs also included lists of procedure code combinations describing procedures involving the removal of pacemaker leads and the insertion of new leads, in addition to lists of single procedure codes describing procedures involving the insertion of pacemaker leads, removal of cardiac devices, and revision of cardiac devices (81 FR 56808). We finalized our proposal to modify the ICD–10 MS–DRG GROUPER logic for MS–DRGs 260, 261, and 262 so that cases reporting any one of the listed ICD–10–PCS procedure codes describing procedures involving pacemakers and related procedures and associated devices are assigned to MS DRGs 260, 261, and 262 under MDC 5. Therefore, the GROUPER logic that required a combination of procedure codes be reported for assignment into MS–DRGs 260, 261 and 262 under Version 33 was no longer required effective with discharges occurring on or after October 1, 2016 (FY 2017) under Version 34 of the ICD–10 MS–DRGs.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20198), we noted that while the discussion in the FY 2017 IPPS/LTCH PPS final rule focused on the MS–DRGs involving pacemaker procedures under MDC 5, similar GROUPER logic exists in Version 33 of the ICD–10 MS–DRGs under MDC 1 (Diseases and Disorders of the Nervous System) in MS–DRGs 040, 041 and 042 (Peripheral, Cranial Nerve and Other Nervous System Procedures with MCC, with CC or Peripheral Neurostimulator and without CC/MCC, respectively) and MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs) in MS–DRGs 907, 908, and 909 (Other O.R. Procedures for Injuries with MCC, with CC, and without MCC, respectively) where procedure code combinations involving cardiac pacemaker device insertions or removals and cardiac pacemaker lead insertions or removals are required to be reported together for assignment into those MS–DRGs. We also noted that, with the exception of when a principal diagnosis is reported from MDC 1, MDC 5, or MDC 21, the procedure codes describing the insertion, removal, replacement, or revision of pacemaker devices are assigned to a medical MS–DRG in the absence of another O.R. procedure according to the GROUPER logic. We referred the reader to the ICD–10 MS–DRG Definitions Manual Version 33, which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page-Items/FY2016-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending* for complete documentation of the GROUPER logic that was in effect at that time for the Version 33 ICD–10 MS–DRGs discussed earlier.

As discussed in the FY 2019 IPS/LTCH PPS proposed rule (83 FR 20198), for FY 2019, we received a request to assign all procedures involving the insertion of pacemaker devices to surgical MS–DRGs, regardless of the principal diagnosis. The requestor recommended that procedures involving pacemaker insertion be grouped to surgical MS–DRGs within the MDC to which the principal diagnosis is assigned, or that they group to MS–DRGs 981, 982, and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC and without CC/MCC, respectively). Currently, in Version 35 of the ICD–10 MS–DRGs, procedures involving pacemakers are assigned to MS–DRGs 040, 041, and 042 (Peripheral, Cranial Nerve and Other Nervous System Procedures with MCC, with CC or Peripheral Neurostimulator and without CC/MCC, respectively) under MDC 1 (Diseases and Disorders of the Nervous System), to MS–DRGs 242, 243, and 244 (Permanent Cardiac Pacemaker Implant with MCC, with CC, and without CC/MCC, respectively), MS–DRGs 258 and 259 (Cardiac Pacemaker Device Replacement with MCC and without MCC, respectively), and MS–DRGs 260, 261 and 262 (Cardiac Pacemaker Revision Except Device Replacement with MCC, with CC, and without CC/MCC, respectively) under MDC 5 (Diseases and Disorders of the Circulatory System), and to MS–DRGs 907, 908, and 909 (Other O.R. Procedures for Injuries with MCC, with CC, and without CC/MCC, respectively), under MDC 21 (Injuries, Poisoning and Toxic Effects of Drugs), with all other unrelated principal diagnoses resulting in a medical MS–DRG assignment. According to the requestor, the medical MS–DRGs do not provide adequate payment for the pacemaker device, specialized operating suites, time, skills, and other resources involved for pacemaker insertion procedures. Therefore, the requestor recommended that procedures involving pacemaker insertions be grouped to surgical MS–DRGs. We refer readers to the ICD–10 MS–DRG Definitions Manual Version 35, which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2018-IPPS-Final-Rule-Home-Page-Items/FY2018-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending* for complete documentation of the GROUPER logic for the MS–DRGs discussed earlier.

The following procedure codes describe procedures involving the insertion of a cardiac rhythm related device which are classified as a type of pacemaker insertion under the ICD–10 MS–DRGs. These four codes are assigned to MS–DRGs 040, 041, and 042, as well as MS–DRGs 907, 908, and 909, and are designated as O.R. procedures.

ICD–10–PCS code	Code description
0JH60PZ	Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach.
0JH63PZ	Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach.
0JH80PZ	Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, open approach.
0JH83PZ	Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, percutaneous approach.

We examined cases from the September update of the FY 2017 MedPAR claims data for cases involving pacemaker insertion procedures reporting the above ICD–10–PCS codes in MS–DRGs 040, 041 and 042 under MDC 1. Our findings are shown in the following table.

CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 1

MS–DRG in MDC 1	Number of cases	Average length of stay	Average costs
MS–DRG 040—All cases	4,462	10.4	$26,877
MS–DRG 040—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	13	14.2	55,624
MS–DRG 040—Cases with procedure code 0JH63PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach)	2	3.5	15,826
MS–DRG 040—Cases with procedure code 0JH80PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, open approach)	0	0	0
MS–DRG 040—Cases with procedure code 0JH83PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, percutaneous approach)	0	0	0
MS–DRG 041—All cases	5,648	5.2	16,927
MS–DRG 041—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	12	6.4	22,498
MS–DRG 041—Cases with procedure code 0JH63PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach)	4	5	17,238
MS–DRG 041—Cases with procedure code 0JH80PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, open approach)	0	0	0
MS–DRG 041—Cases with procedure code 0JH83PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, percutaneous approach)	0	0	0
MS–DRG 042—All cases	2,154	3.1	13,730
MS–DRG 042—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	5	8	18,183
MS–DRG 042—Cases with procedure code 0JH83PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, percutaneous approach)	0	0	0
MS–DRG 042—Cases with procedure code 0JH80PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, open approach)	0	0	0
MS–DRG 042—Cases with procedure code 0JH83PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, percutaneous approach)	0	0	0

The following table is a summary of the findings shown above from our review of MS–DRGs 040, 041 and 042 and the total number of cases reporting a pacemaker insertion procedure.

MS–DRGS FOR CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 1

MS–DRG in MDC 1	Number of cases	Average length of stay	Average costs
MS–DRGs 040, 041, and 042—All cases	12,264	6.7	$19,986
MS–DRGs 040, 041, and 042—Cases with a pacemaker insertion procedure	36	9.1	32,906

We found a total of 12,264 cases in MS–DRGs 040, 041, and 042 with an average length of stay of 6.7 days and average costs of $19,986. We found a total of 36 cases in MS–DRGs 040, 041, and 042 reporting procedure codes describing the insertion of a pacemaker device with an average length of stay of 9.1 days and average costs of $32,906.

We then examined cases involving pacemaker insertion procedures reporting those same four ICD–10–PCS procedure codes 0JH60PZ, 0JH63PZ, 0JH80PZ and 0JH83PZ in MS–DRGs 907, 908, and 909 under MDC 21. Our findings are shown in the following table.

MS–DRGS FOR CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 21

MS–DRG in MDC 21	Number of cases	Average length of stay	Average costs
MS–DRG 907–All cases	7,405	10.1	$28,997
MS–DRG 907—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	7	11.1	60,141
MS–DRG 908—All cases	8,519	5.2	14,282
MS–DRG 908—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	4	3.8	35,678
MS–DRG 909—All cases	3,224	3.1	9,688
MS–DRG 909—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	2	2	42,688

We note that there were no cases found where procedure codes 0JH63PZ, 0JH80PZ or 0JH83PZ were reported in MS–DRGs 907, 908 and 909 under MDC 21 and, therefore, they are not displayed in the table.

The following table is a summary of the findings shown above from our review of MS–DRGs 907, 908, and 909 and the total number of cases reporting a pacemaker insertion procedure.

MS–DRGs FOR CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 21

MS–DRG in MDC 21	Number of cases	Average length of stay	Average costs
MS–DRGs 907, 908 and 909—All cases	19,148	6.7	$19,199
MS–DRGs 907, 908 and 909—Cases with a pacemaker insertion procedure	13	7.5	49,929

We found a total of 19,148 cases in MS–DRGs 907, 908, and 909 with an average length of stay of 6.7 days and average costs of $19,199. We found a total of 13 cases in MS–DRGs 907, 908, and 909 reporting pacemaker insertion procedures with an average length of stay of 7.5 days and average costs of $49,929.

We also examined cases involving pacemaker insertion procedures reporting the following procedure codes that are assigned to MS–DRGs 242, 243, and 244 under MDC 5.

ICD–10–PCS code	Code description
0JH604Z	Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, open approach.
0JH605Z	Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, open approach.
0JH606Z	Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, open approach.
0JH607Z	Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, open approach.
0JH60PZ	Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach.
0JH634Z	Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, percutaneous approach.
0JH635Z	Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, percutaneous approach.
0JH636Z	Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, percutaneous approach.
0JH637Z	Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, percutaneous approach.
0JH63PZ	Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach.
0JH804Z	Insertion of pacemaker, single chamber into abdomen subcutaneous tissue and fascia, open approach.
0JH805Z	Insertion of pacemaker, single chamber rate responsive into abdomen subcutaneous tissue and fascia, open approach.
0JH806Z	Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, open approach.
0JH807Z	Insertion of cardiac resynchronization pacemaker pulse generator into abdomen subcutaneous tissue and fascia, open approach.
0JH80PZ	Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, open approach.
0JH834Z	Insertion of pacemaker, single chamber into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH835Z	Insertion of pacemaker, single chamber rate responsive into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH836Z	Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH837Z	Insertion of cardiac resynchronization pacemaker pulse generator into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH83PZ	Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, percutaneous approach.

Our data findings are shown in the following table. We note that procedure codes displayed with an asterisk (*) in the table are designated as non-O.R. procedures affecting the MS–DRG.

CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 5

MS–DRG in MDC 5	Number of cases	Average length of stay	Average costs
MS–DRG 242—All cases	18,205	6.9	$26,414
MS–DRG 242—Cases with procedure code 0JH604Z* (Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, open approach)	2,518	7.7	25,004
MS–DRG 242—Cases with procedure code 0JH605Z* (Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, open approach)	306	7.7	24,454
MS–DRG 242—Cases with procedure code 0JH606Z* (Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, open approach)	13,323	6.7	25,497
MS–DRG 242—Cases with procedure code 0JH607Z (Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, open approach)	1,528	8.1	37,060
MS–DRG 242—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	5	16.6	59,334
MS–DRG 242—Cases with procedure code 0JH634Z* (Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, percutaneous approach)	65	8.5	26,789

CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 5—Continued

MS–DRG in MDC 5	Number of cases	Average length of stay	Average costs
MS–DRG 242—Cases with procedure code 0JH635Z* (Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, percutaneous approach)	10	7	35,104
MS–DRG 242—Cases with procedure code 0JH636Z* (Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, percutaneous approach)	313	6.4	23,699
MS–DRG 242—Cases with procedure code 0JH637Z (Insertion of cardiac resynchronization pacemaker pulse generator into chest Subcutaneous tissue and fascia, percutaneous approach)	82	7.1	35,382
MS–DRG 242—Cases with procedure code 0JH63PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach)	2	12.5	32,405
MS–DRG 242—Cases with procedure code 0JH804Z* (Insertion of pacemaker, single chamber into abdomen subcutaneous tissue and fascia, open approach)	25	14.4	43,080
MS–DRG 242—Cases with procedure code 0JH805Z* (Insertion of pacemaker, single chamber rate responsive into abdomen subcutaneous tissue and fascia, open approach)	2	4	26,949
MS–DRG 242—Cases with procedure code 0JH806Z* (Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, open approach)	50	6.8	25,306
MS–DRG 242—Cases with procedure code 0JH807Z (Insertion of cardiac resynchronization pacemaker pulse generator into abdomen subcutaneous tissue and fascia, open approach)	5	21.2	67,908
MS–DRG 242—Cases with procedure code 0JH836Z (Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, percutaneous approach)	1	5	36,111
MS–DRG 243—All cases	24,586	4	18,669
MS–DRG 243—Cases with procedure code 0JH604Z* (Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, open approach)	2,537	4.7	17,118
MS–DRG 243—Cases with procedure code 0JH605Z* (Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, open approach)	271	4.4	17,268
MS–DRG 243—Cases with procedure code 0JH606Z* (Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, open approach)	19,921	3.9	18,306
MS–DRG 243—Cases with procedure code 0JH607Z (Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, open approach)	1,236	4.4	28,658
MS–DRG 243—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	6	4.2	20,994
MS–DRG 243—Cases with procedure code 0JH634Z* (Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, percutaneous approach)	55	5.2	16,784
MS–DRG 243—Cases with procedure code 0JH635Z* (Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, percutaneous approach)	15	4.1	17,938
MS–DRG 243—Cases with procedure code 0JH636Z* (Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, percutaneous approach)	431	3.7	16,164
MS–DRG 243—Cases with procedure code 0JH637Z (Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, percutaneous approach)	58	5	28,926
MS–DRG 243—Cases with procedure code 0JH63PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach)	3	8.3	23,717
MS–DRG 243—Cases with procedure code 0JH804Z* (Insertion of pacemaker, single chamber into abdomen subcutaneous tissue and fascia, open approach)	10	8.2	20,871
MS–DRG 243—Cases with procedure code 0JH805Z* (Insertion of pacemaker, single chamber rate responsive into abdomen subcutaneous tissue and fascia, open approach)	1	4	15,739
MS–DRG 243—Cases with procedure code 0JH806Z* (Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, open approach)	57	4.4	18,787
MS–DRG 243—Cases with procedure code 0JH807Z (Insertion of cardiac resynchronization pacemaker pulse generator into abdomen subcutaneous tissue and fascia, open approach)	3	4	19,653
MS–DRG 243—Cases with procedure code 0JH80PZ (Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, open approach)	1	7	16,224
MS–DRG 243—Cases with procedure code 0JH836Z* (Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, percutaneous approach)	1	2	14,005
MS–DRG 244—All cases	15,974	2.7	15,670
MS–DRG 244—Cases with procedure code 0JH604Z* (Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, open approach)	1,045	3.2	14,541
MS–DRG 244—Cases with procedure code 0JH605Z* (Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, open approach)	127	3	13,208
MS–DRG 244—Cases with procedure code 0JH606Z* (Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, open approach)	14,092	2.7	15,596
MS–DRG 244—Cases with procedure code 0JH607Z (Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, open approach)	303	2.8	26,221
MS–DRG 244—Cases with procedure code 0JH60PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach)	2	4.5	9,248
MS–DRG 244—Cases with procedure code 0JH634Z* (Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, percutaneous approach)	32	2.8	11,525
MS–DRG 244—Cases with procedure code 0JH635Z* (Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, percutaneous approach)	1	2	30,100
MS–DRG 244—Cases with procedure code 0JH636Z* (Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, percutaneous approach)	320	2.6	13,670

CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 5—Continued

MS–DRG in MDC 5	Number of cases	Average length of stay	Average costs
MS–DRG 244—Cases with procedure code 0JH637Z (Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, percutaneous approach)	20	2.7	19,218
MS–DRG 244—Cases with procedure code 0JH63PZ (Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach)	1	3	12,120
MS–DRG 244—Cases with procedure code 0JH805Z* (Insertion of pacemaker, single chamber rate responsive into abdomen subcutaneous tissue and fascia, open approach)	1	1	21,604
MS–DRG 244—Cases with procedure code 0JH806Z* (Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, open approach)	36	3.2	16,492
MS–DRG 244—Cases with procedure code 0JH836Z* (Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, percutaneous approach)	1	3	12,160

The following table is a summary of the findings shown above from our review of MS–DRGs 242, 243, and 244 and the total number of cases reporting a pacemaker insertion procedure.

MS–DRGS FOR CASES INVOLVING PACEMAKER INSERTION PROCEDURES IN MDC 5

MS–DRG in MDC 5	Number of cases	Average length of stay	Average costs
MS–DRGs 242, 243 and 244—All cases	58,765	4.6	$20,253
MS–DRGs 242, 243, and 244—Cases with a pacemaker insertion procedure	*58,822	4.6	20,270

*The figure is not adjusted for cases reporting more than one pacemaker insertion procedure code. The figure represents the frequency in which the number of pacemaker insertion procedures was reported.

We found a total of 58,765 cases in MS–DRGs 242, 243, and 244 with an average length of stay of 4.6 days and average costs of $20,253. We found a total of 58,822 cases reporting pacemaker insertion procedures in MS–DRGs 242, 243, and 244 with an average length of stay of 4.6 days and average costs of $20,270. We note that the analysis performed is by procedure code, and because multiple pacemaker insertion procedures may be reported on a single claim, the total number of these pacemaker insertion procedure cases exceeds the total number of all cases found across MS–DRGs 242, 243, and 244 (58,822 procedures versus 58,765 cases).

We then analyzed claims for cases reporting a procedure code describing (1) the insertion of a pacemaker device only, (2) the insertion of a pacemaker lead only, and (3) both the insertion of a pacemaker device and a pacemaker lead across all the MDCs except MDC 5 to determine the number of cases currently grouping to medical MS–DRGs and the potential impact of these cases moving into the surgical unrelated MS–DRGs 981, 982 and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC and without CC/MCC, respectively). Our findings are shown in the following table.

PACEMAKER INSERTION PROCEDURES IN MEDICAL MS–DRGS

All MDCs except MDC 5	Number of cases	Average length of stay	Average costs
Procedures for insertion of pacemaker device	2,747	9.5	$29,389
Procedures for insertion of pacemaker lead	2,831	9.4	29,240
Procedures for insertion of pacemaker device with insertion of pacemaker lead	2,709	9.4	29,297

We found a total of 2,747 cases reporting the insertion of a pacemaker device in 177 medical MS–DRGs with an average length of stay of 9.5 days and average costs of $29,389 across all the MDCs except MDC 5. We found a total of 2,831 cases reporting the insertion of a pacemaker lead in 175 medical MS–DRGs with an average length of stay of 9.4 days and average costs of $29,240 across all the MDCs except MDC 5. We found a total of 2,709 cases reporting both the insertion of a pacemaker device and the insertion of a pacemaker lead in 170 medical MS–DRGs with an average length of stay of 9.4 days and average costs of $29,297 across all the MDCs except MDC 5.

We also analyzed claims for cases reporting a procedure code describing the insertion of a pacemaker device with a procedure code describing the insertion of a pacemaker lead in all the surgical MS–DRGs across all the MDCs except MDC 5. Our findings are shown in the following table.

PACEMAKER INSERTION PROCEDURES IN SURGICAL MS–DRGS

All MDCs except MDC 5	Number of cases	Average length of stay	Average costs
Procedures for insertion of pacemaker device with insertion of pacemaker lead	3,667	12.8	$48,856

We found a total of 3,667 cases reporting the insertion of a pacemaker device and the insertion of a pacemaker lead in 194 surgical MS–DRGs with an average length of stay of 12.8 days and average costs of $48,856 across all the MDCs except MDC 5.

For cases where the insertion of a pacemaker device, the insertion of a pacemaker lead or the insertion of both a pacemaker device and lead were reported on a claim grouping to a medical MS–DRG, the average length of stay and average costs were generally higher for these cases when compared to the average length of stay and average costs for all the cases in their assigned MS–DRGs. For example, we found 113 cases reporting both the insertion of a pacemaker device and lead in MS–DRG 378 (G.I. Hemorrhage with CC), with an average length of stay of 7.1 days and average costs of $23,711. The average length of stay for all cases in MS–DRG 378 was 3.6 days and the average cost for all cases in MS–DRG 378 was $7,190. The average length of stay for cases reporting both the insertion of a pacemaker device and lead were twice as long as the average length of stay for all the cases in MS–DRG 378 (7.1 days versus 3.6 days). In addition, the average costs for the cases reporting both the insertion of a pacemaker device and lead were approximately $16,500 higher than the average costs of all the cases in MS–DRG 378 ($23,711 versus $7,190). We refer readers to Table 6P.1c associated with the proposed rule (which is available via the internet on the CMS website) for the detailed report of our findings across the other medical MS–DRGs. We note that the average costs and average length of stay for cases reporting the insertion of a pacemaker device, the insertion of a pacemaker lead or the insertion of both a pacemaker device and lead are reflected in Columns D and E, while the average costs and average length of stay for all cases in the respective MS–DRG are reflected in Columns I and J.

The claims data results from our analysis of this request showed that if we were to support restructuring the GROUPER logic so that pacemaker insertion procedures that include a combination of the insertion of the pacemaker device with the insertion of the pacemaker lead are designated as an O.R. procedure across all the MDCs, we would expect approximately 2,709 cases to move or ''shift'' from the medical MS–DRGs where they are currently grouping into the surgical unrelated MS–DRGs 981, 982, and 983.

Our clinical advisors reviewed the data results and recommended that pacemaker insertion procedures involving a complete pacemaker system (insertion of pacemaker device combined with insertion of pacemaker lead) warrant classification into surgical MS–DRGs because the patients receiving these devices demonstrate greater treatment difficulty and utilization of resources when compared to procedures that involve the insertion of only the pacemaker device or the insertion of only the pacemaker lead. We note that the request we addressed in the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 24981 through 24984) was to determine if some procedure code combinations were excluded from the ICD–10 MS–DRG assignments for MS–DRGs 242, 243, and 244. We proposed and, upon considering public comments received, finalized an alternate approach that we believed to be less complicated. We also stated in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56806) that we would continue to monitor the MS–DRGs for pacemaker insertion procedures as we receive ICD–10 claims data. Upon further review, we stated that we believe that recreating the procedure code combinations for pacemaker insertion procedures would allow for the grouping of these procedures to the surgical MS–DRGs, which we believe is warranted to better recognize the resources and complexity of performing these procedures. Therefore, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20203), we proposed to recreate pairs of procedure code combinations involving both the insertion of a pacemaker device with the insertion of a pacemaker lead to act as procedure code combination pairs or ''clusters'' in the GROUPER logic that are designated as O.R. procedures outside of MDC 5 when reported together.

Comment: Commenters supported the proposal to recreate pairs of procedure code combinations involving both the insertion of a pacemaker device with the insertion of a pacemaker lead to act as procedure code combination pairs or ''clusters'' in the GROUPER logic that are designated as O.R. procedures outside of MDC 5 when reported together. One commenter specifically expressed its appreciation of CMS' efforts to update the MS–DRG GROUPER logic to better recognize the resources and complexity of pacemaker device and lead procedures. Another commenter disagreed with the proposal to use pacemaker code pairs for assignment to a surgical MS–DRG, stating it would be more appropriate to designate each pacemaker device and pacemaker lead procedure code as an O.R. procedure to allow initial insertions and replacement of individual components to group to surgical MS–DRGs within all MDCs. According to the commenter, this designation would compensate providers for the cost of the device and the resources utilized in the performance of initial insertions and the replacement of individual components.

Response: We appreciate the commenters' support. With regard to the commenter who disagreed with the proposal to utilize pacemaker code pairs for assignment to a surgical MS–DRG and suggested that the GROUPER logic designate each pacemaker device and pacemaker lead procedure code as an O.R. procedure to allow initial insertions and replacement of individual components to group to surgical MS–DRGs within all MDCs, we note that, as displayed in Table 6P.1c. associated with the FY 2019 IPPS/LTCH PPS proposed rule (which is available via the internet on the CMS website), our claims analysis for cases reporting a procedure code describing the insertion of a pacemaker device only demonstrated a total of six cases across all the medical MS–DRGs, and for cases reporting a procedure code describing the insertion of a pacemaker lead only, the data demonstrated a total of four cases across all the medical MS–DRGs. As a result, there were a total of only 10 cases where a stand-alone code for insertion of a pacemaker device procedure or a stand-alone code for insertion of a pacemaker lead procedure was reported. Those 10 cases grouped to 10 different medical MS–DRGs, of which 8 included a CC or MCC diagnosis. Therefore, it is not clear how much of the average costs, the average length of stay, the complexity of service, and resource utilization for those cases

are attributable to the insertion of the pacemaker device/lead procedure versus the severity of illness.

After consideration of the public comments we received, we are finalizing our proposal to recreate pairs of procedure code combinations involving both the insertion of a pacemaker device with the insertion of a pacemaker lead to act as procedure code combination pairs or ''clusters'' in the GROUPER logic that are designated as O.R. procedures outside of MDC 5 when reported together under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

We also proposed to designate all the procedure codes describing the insertion of a pacemaker device or the insertion of a pacemaker lead as non-O.R. procedures when reported as a single, individual stand-alone code based on the recommendation of our clinical advisors as noted in the proposed rule and earlier in this section and consistent with how these procedures were classified under the Version 33 ICD–10 MS–DRG GROUPER logic.

Comment: A number of commenters supported the proposal to designate all the procedure codes describing the insertion of a pacemaker device or the insertion of a pacemaker lead as non-O.R. procedures when reported as a single, individual stand-alone code. However, other commenters opposed the proposal. One commenter acknowledged that the complexity of inserting a full pacemaker system is greater than when inserting a pacemaker lead or generator. However, this commenter asserted that the complexity does not increase significantly and that the placement of a lead or generator still requires the use of an operating room, sterile field, anesthesiology, and preparing the patient. The commenter believed that the placement of a pacemaker lead or device does require the use of an operating room and expressed concern that CMS would designate the procedures as a non-O.R. procedure.

Response: We appreciate the commenters' support. With regard to the commenter who expressed concern that we proposed to designate procedure codes describing the insertion of a pacemaker device or the insertion of a pacemaker lead as non-O.R. procedures when reported as a single, individual stand-alone code, we note that historically, these procedures have been designated as non-O.R. procedures. As we noted in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20203), our proposal to designate all the procedure codes describing the insertion of a pacemaker device or the insertion of a pacemaker lead as non-O.R. procedures when reported as a single, individual stand-alone code is consistent with how these procedures were classified under the Version 33 ICD–10 MS–DRG GROUPER logic. In addition, our clinical advisors continue to support the non-O.R. designation because, as the commenter noted in its own comments, while these procedures may require a sterile field, anesthesia and preparing the patient, the complexity of inserting a pacemaker lead or generator alone is less than that of inserting a full pacemaker system and the former can be performed in settings such as cardiac catheterization laboratories.

After consideration of the public comments we received, we are finalizing our proposal to designate all the procedure codes describing the insertion of a pacemaker device or the insertion of a pacemaker lead as non-O.R. procedures when reported as a single, individual stand-alone code outside of MDC 5 under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

In the proposed rule, we referred readers to Table 6P.1d, Table 6P.1e, and Table 6P.1f. associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) for (1) a complete list of the proposed procedure code combinations or ''pairs''; (2) a complete list of the procedure codes describing the insertion of a pacemaker device; and (3) a complete list of the procedure codes describing the insertion of a pacemaker lead. We invited public comments on our lists of procedure codes that we proposed to include for restructuring the ICD–10 MS–DRG GROUPER logic for pacemaker insertion procedures.

In addition, we proposed to maintain the current GROUPER logic for MS–DRGs 258 and 259 (Cardiac Pacemaker Device Replacement with MCC and without MCC, respectively) where the listed procedure codes as shown in the ICD–10 MS–DRG Definitions Manual Version 35, which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2018-IPPS-Final-Rule-Home-Page-Items/FY2018-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending*, describing a pacemaker device insertion, continue to be designated as ''non-O.R. affecting the MS–DRG'' because they are reported when a pacemaker device requires replacement and have a corresponding diagnosis from MDC 5. Also, we proposed to maintain the current GROUPER logic for MS–DRGs 260, 261, and 262 (Cardiac Pacemaker Revision Except Device Replacement with MCC, with CC, and without CC/MCC, respectively) so that cases reporting any one of the listed ICD–10–PCS procedure codes as shown in the ICD–10 MS–DRG Definitions Manual Version 35 describing procedures involving pacemakers and related procedures and associated devices will continue to be assigned to those MS DRGs under MDC 5 because they are reported when a pacemaker device requires revision and they have a corresponding circulatory system diagnosis.

Comment: Commenters agreed with the proposed lists of procedure codes for restructuring the ICD–10 MS DRG GROUPER logic for pacemaker insertion procedures. One commenter also suggested the addition of ICD–10–PCS procedure code 02H63MZ (Insertion of cardiac lead into right atrium, percutaneous approach) and ICD–10–PCS procedure code 02H73MZ (Insertion of cardiac lead into left atrium, percutaneous approach) to Tables 6P.1d. and Table 6P.1f. that were associated with the proposed rule. The commenter noted that the tables included the open and percutaneous endoscopic approaches but did not include the percutaneous approach.

Response: We appreciate the commenters' support. We agree with the commenter to add ICD–10–PCS procedure codes 02H63MZ and 02H73MZ to Table 6P.1d and as reflected in Table 6P.1f. associated with this final rule (which is available via the internet on the CMS website), to be included for the pacemaker insertion code pairs and as stand-alone codes for the insertion of a pacemaker lead. The codes are consistent with the other insertion of cardiac lead procedures and were inadvertently omitted from the initial list.

After consideration of the public comments we received, we are finalizing the lists of the procedure codes in Tables 6P.1d., Table 6P.1e., and Table 6P.1f associated with the proposed rule, with the addition of ICD–10–PCS procedure codes 02H63MZ and 02H73MZ to be included for the pacemaker insertion code pairs and as stand-alone codes for the insertion of a pacemaker lead, as reflected in Tables 6P.1.d. and 6P.1.f. associated with this final rule. We also are finalizing our proposal to maintain the current GROUPER logic for MS–DRGs 258 and 259 and for MS–DRGs 260, 261, and 262

under the ICD–10 Version 36, effective October 1, 2018.

We noted in the proposed rule that, while the requestor did not include the following procedure codes in its request, these codes are also currently designated as O.R. procedure codes and are assigned to MS–DRGs 260, 261, and 262 under MDC 5.

ICD–10–PCS code	Code description
02PA0MZ	Removal of cardiac lead from heart, open approach.
02PA3MZ	Removal of cardiac lead from heart, percutaneous approach.
02PA4MZ	Removal of cardiac lead from heart, percutaneous endoscopic approach.
02WA0MZ	Revision of cardiac lead in heart, open approach.
02WA3MZ	Revision of cardiac lead in heart, percutaneous approach.
02WA4MZ	Revision of cardiac lead in heart, percutaneous endoscopic approach.
0JPT0PZ	Removal of cardiac rhythm related device from trunk subcutaneous tissue and fascia, open approach.
0JPT3PZ	Removal of cardiac rhythm related device from trunk subcutaneous tissue and fascia, percutaneous approach.
0JWT0PZ	Revision of cardiac rhythm related device in trunk subcutaneous tissue and fascia, open approach.
0JWT3PZ	Revision of cardiac rhythm related device in trunk subcutaneous tissue and fascia, percutaneous approach.

In the proposed rule, we solicited public comments on whether these procedure codes describing the removal or revision of a cardiac lead and removal or revision of a cardiac rhythm related (pacemaker) device should also be designated as non-O.R. procedure codes for FY 2019 when reported as a single, individual stand-alone code with a principal diagnosis outside of MDC 5 for consistency in the classification among these devices.

Comment: One commenter recommended that CMS not finalize the proposed designation of the procedure codes listed in the above table describing the removal or revisions of a cardiac lead and the removal or revision of a cardiac rhythm related (pacemaker) device from O.R. procedures to non-O.R. procedures when reported as a single, individual stand-alone code when reported with a principal diagnosis outside of MDC 5. Another commenter expressed concern that the rationale for the proposal was not clear and warranted additional clarification about the data used to arrive at this recommendation. According to this commenter, regardless of the principal diagnosis, the resources for procedures involving insertion, removal or revision of a pacemaker generator or lead are the same. The commenter further noted that revisions are often more complex and require greater resources. The commenter recommended that CMS continue to designate the procedures as O.R. procedures and further explain the proposal.

Response: We appreciate the commenter's feedback. We note that while we were soliciting comments on the procedure codes listed in the table above that describe the removal or revision of a cardiac lead and the removal or revision of a cardiac rhythm related (pacemaker) device, we did not specifically recommend a change to the designation of the procedure codes at this time. We agree with the commenter that the removal or revision of a cardiac lead or pacemaker generator can be more complex and require greater resources than an initial insertion procedure.

After consideration of the public comments we received, we are maintaining the O.R. designation of the procedure codes listed in the above table under the ICD–10 MS–DRGs Version 36, effective October 1, 2018. As additional claims data become available, we will continue to analyze these procedures.

We also note in the proposed rule that, while the requestor did not include the following procedure codes in its request, the codes in the following table became effective October 1, 2016 (FY 2017) and also describe procedures involving the insertion of a pacemaker. Specifically, the following list includes procedure codes that describe an intracardiac or ''leadless'' pacemaker. These procedure codes are designated as O.R. procedure codes and are currently assigned to MS–DRGs 228 and 229 (Other Cardiothoracic Procedures with MCC and without MCC, respectively) under MDC 5.

ICD–10–PCS code	Code description
02H40NZ	Insertion of intracardiac pacemaker into coronary vein, open approach.
02H43NZ	Insertion of intracardiac pacemaker into coronary vein, percutaneous approach.
02H44NZ	Insertion of intracardiac pacemaker into coronary vein, percutaneous endoscopic approach.
02H60NZ	Insertion of intracardiac pacemaker into right atrium, open approach.
02H63NZ	Insertion of intracardiac pacemaker into right atrium, percutaneous approach.
02H64NZ	Insertion of intracardiac pacemaker into right atrium, percutaneous endoscopic approach.
02H70NZ	Insertion of intracardiac pacemaker into left atrium, open approach.
02H73NZ	Insertion of intracardiac pacemaker into left atrium, percutaneous approach.
02H74NZ	Insertion of intracardiac pacemaker into left atrium, percutaneous endoscopic approach.
02HK0NZ	Insertion of intracardiac pacemaker into right ventricle, open approach.
02HK3NZ	Insertion of intracardiac pacemaker into right ventricle, percutaneous approach.
02HK4NZ	Insertion of intracardiac pacemaker into right ventricle, percutaneous endoscopic approach.
02HL0NZ	Insertion of intracardiac pacemaker into left ventricle, open approach.
02HL3NZ	Insertion of intracardiac pacemaker into left ventricle, percutaneous Approach.
02HL4NZ	Insertion of intracardiac pacemaker into left ventricle, percutaneous endoscopic approach.
02WA0NZ	Revision of intracardiac pacemaker in heart, open approach.
02WA3NZ	Revision of intracardiac pacemaker in heart, percutaneous approach.
02WA4NZ	Revision of intracardiac pacemaker in heart, percutaneous endoscopic approach.
02WAXNZ	Revision of intracardiac pacemaker in heart, external approach.
02H40NZ	Insertion of intracardiac pacemaker into coronary vein, open approach.

ICD–10–PCS code	Code description
02H43NZ	Insertion of intracardiac pacemaker into coronary vein, percutaneous approach.

We examined claims data for procedures involving an intracardiac pacemaker reporting any of the above codes across all MS–DRGs. Our findings are shown in the following table.

INTRACARDIAC PACEMAKER PROCEDURES

Across all MS–DRGs	Number of cases	Average length of stay	Average costs
Procedures for intracardiac pacemaker	1,190	8.6	$38,576

We found 1,190 cases reporting a procedure involving an intracardiac pacemaker with an average length of stay of 8.6 days and average costs of $38,576. Of these 1,190 cases, we found 1,037 cases in MS–DRGs under MDC 5. We also found that the 153 cases that grouped to MS–DRGs outside of MDC 5 grouped to surgical MS–DRGs; therefore, another O.R. procedure was also reported on the claim. However, in the FY 2019 IPPS/LTCH PPS proposed rule, we solicited public comments on whether these procedure codes describing the insertion and revision of intracardiac pacemakers should also be considered for classification into all surgical unrelated MS–DRGs outside of MDC 5 for FY 2019.

Comment: Commenters supported classifying the procedure codes listed in the table above describing the insertion and revision of intracardiac pacemakers into all surgical unrelated MS–DRGs outside of MDC 5.

Response: We appreciate the commenters' feedback. We note that while we solicited comments on the procedure codes listed in the table above that describe the insertion of an intracardiac pacemaker device, we did not specifically recommend a change to the designation of the procedure codes at this time. We also note that, currently, the procedures are already classified within the GROUPER logic as extensive O.R. procedures. Therefore, if one of the procedure codes is reported with a principal diagnosis outside of MDC 5, the case will group to one of the unrelated surgical MS–DRGs.

After consideration of the public comments we received, we are maintaining the O.R. designation of the procedure codes listed in the above table under the ICD–10 MS–DRGs Version 36, effective October 1, 2018. As additional claims data become available, we will continue to analyze these procedures.

b. Drug-Coated Balloons in Endovascular Procedures

In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38111), we discontinued new technology add-on payments for the LUTONIX® and IN.PACT™ Admiral™ drug-coated balloon (DCB) technologies, effective for FY 2018, because the technology no longer met the newness criterion for new technology add-on payments. For FY 2019, we received a request to reassign cases that utilize a drug-coated balloon in the performance of an endovascular procedure involving the treatment of superficial femoral arteries for peripheral arterial disease from the lower severity level MS–DRG 254 (Other Vascular Procedures without CC/MCC) and MS–DRG 253 (Other Vascular Procedures with CC) to the highest severity level MS–DRG 252 (Other Vascular Procedures with MCC). We also received a request to revise the title of MS–DRG 252 to ''Other Vascular Procedures with MCC or Drug-Coated Balloon Implant''.

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20205), there are currently 36 ICD–10–PCS procedure codes that describe the performance of endovascular procedures involving treatment of the superficial femoral arteries that utilize a drug-coated balloon, which are listed in the following table.

ICD–10–PCS code	Code description
047K041	Dilation of right femoral artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047K0D1	Dilation of right femoral artery with intraluminal device using drug-coated balloon, open approach.
047K0Z1	Dilation of right femoral artery using drug-coated balloon, open approach.
047K341	Dilation of right femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047K3D1	Dilation of right femoral artery with intraluminal device using drug-coated balloon, percutaneous approach.
047K3Z1	Dilation of right femoral artery using drug-coated balloon, percutaneous approach.
047K441	Dilation of right femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047K4D1	Dilation of right femoral artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047K4Z1	Dilation of right femoral artery using drug-coated balloon, percutaneous endoscopic approach.
047L041	Dilation of left femoral artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047L0D1	Dilation of left femoral artery with intraluminal device using drug-coated balloon, open approach.
047L0Z1	Dilation of left femoral artery using drug-coated balloon, open approach.
047L341	Dilation of left femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047L3D1	Dilation of left femoral artery with intraluminal device using drug-coated balloon, percutaneous approach.
047L3Z1	Dilation of left femoral artery using drug-coated balloon, percutaneous approach.
047L441	Dilation of left femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047L4D1	Dilation of left femoral artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047L4Z1	Dilation of left femoral artery using drug-coated balloon, percutaneous endoscopic approach.

ICD–10–PCS code	Code description
047M041	Dilation of right popliteal artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047M0D1	Dilation of right popliteal artery with intraluminal device using drug-coated balloon, open approach.
047M0Z1	Dilation of right popliteal artery using drug-coated balloon, open approach.
047M341	Dilation of right popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047M3D1	Dilation of right popliteal artery with intraluminal device using drug-coated balloon, percutaneous approach.
047M3Z1	Dilation of right popliteal artery using drug-coated balloon, percutaneous approach.
047M441	Dilation of right popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047M4D1	Dilation of right popliteal artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047M4Z1	Dilation of right popliteal artery using drug-coated balloon, percutaneous endoscopic approach.
047N041	Dilation of left popliteal artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047N0D1	Dilation of left popliteal artery with intraluminal device using drug-coated balloon, open approach.
047N0Z1	Dilation of left popliteal artery using drug-coated balloon, open approach.
047N341	Dilation of left popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047N3D1	Dilation of left popliteal artery with intraluminal device using drug-coated balloon, percutaneous approach.
047N3Z1	Dilation of left popliteal artery using drug-coated balloon, percutaneous approach.
047N441	Dilation of left popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047N4D1	Dilation of left popliteal artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047N4Z1	Dilation of left popliteal artery using drug-coated balloon, percutaneous endoscopic approach.

The requestor performed its own analysis of claims data and expressed concern that it found that the average costs of cases using a drug-coated balloon in the performance of percutaneous endovascular procedures involving treatment of patients who have been diagnosed with peripheral arterial disease are significantly higher than the average costs of all of the cases in the MS–DRGs where these procedures are currently assigned. The requestor also expressed concern that payments may no longer be adequate because the new technology add-on payments have been discontinued and may affect patient access to these procedures.

We first examined claims data from the September 2017 update of the FY 2017 MedPAR file for cases reporting any 1 of the 36 ICD–10–PCS procedure codes listed in the immediately preceding table that describe the use of a drug-coated balloon in the performance of endovascular procedures in MS–DRGs 252, 253, and 254. Our findings are shown in the following table.

MS–DRGs for Other Vascular Procedures With Drug-Coated Balloon

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 252—All cases	33,583	7.6	$23,906
MS–DRG 252—Cases with drug-coated balloon	870	8.8	30,912
MS–DRG 253—All cases	25,714	5.4	18,986
MS–DRG 253—Cases with drug-coated balloon	1,532	5.4	23,051
MS–DRG 254—All cases	12,344	2.8	13,287
MS–DRG 254—Cases with drug-coated balloon	488	2.4	17,445

As shown in this table, there were a total of 33,583 cases in MS–DRG 252, with an average length of stay of 7.6 days and average costs of $23,906. There were 870 cases in MS–DRG 252 reporting the use of a drug-coated balloon in the performance of an endovascular procedure, with an average length of stay of 8.8 days and average costs of $30,912. The total number of cases in MS–DRG 253 was 25,714, with an average length of stay of 5.4 days and average costs of $18,986. There were 1,532 cases in MS–DRG 253 reporting the use of a DCB in the performance of an endovascular procedure, with an average length of stay of 5.4 days and average costs of $23,051. The total number of cases in MS–DRG 254 was 12,344, with an average length of stay of 2.8 days and average costs of $13,287. There were 488 cases in MS–DRG 254 reporting the use of a DCB in the performance of an endovascular procedure, with an average length of stay of 2.4 days and average costs of $17,445.

The results of our data analysis show that there is not a very high volume of cases reporting the use of a drug-coated balloon in the performance of endovascular procedures compared to all of the cases in the assigned MS–DRGs. The data results also show that the average length of stay for cases reporting the use of a drug-coated balloon in the performance of endovascular procedures in MS–DRGs 253 and 254 is lower compared to the average length of stay for all of the cases in the assigned MS–DRGs, while the average length of stay for cases reporting the use of a drug-coated balloon in the performance of endovascular procedures in MS–DRG 252 is slightly higher compared to all of the cases in MS–DRG 252 (8.8 days versus 7.6 days). Lastly, the data results showed that the average costs for cases reporting the use of a drug-coated balloon in the performance of percutaneous endovascular procedures were higher compared to all of the cases in the assigned MS–DRGs. Specifically, for MS–DRG 252, the average costs for cases reporting the use of a DCB in the performance of endovascular procedures were $30,912 versus the average costs of $23,906 for all cases in MS–DRG 252, a difference of $7,006. For MS–DRG 253, the average costs for cases reporting the use of a drug-coated balloon in the performance of endovascular procedures were $23,051 versus the average costs of $18,986 for all cases in MS–DRG 253, a difference

of $4,065. For MS–DRG 254, the average costs for cases reporting the use of a drug-coated balloon in the performance of endovascular procedures were $17,445 versus the average costs of $13,287 for all cases in MS–DRG 254, a difference of $4,158.

The following table is a summary of the findings discussed above from our review of MS–DRGs 252, 253 and 254 and the total number of cases that used a drug-coated balloon in the performance of the procedure across MS–DRGs 252, 253, and 254.

MS–DRGs for Other Vascular Procedures and Cases With Drug-Coated Balloon

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 252, 253, and 254—All cases	71,641	6.0	$20,310
MS–DRGs 252, 253, and 254—Cases with drug-coated balloon	2,890	6.0	24,569

As shown in this table, there were a total of 71,641 cases across MS–DRGs 252, 253, and 254, with an average length of stay of 6.0 days and average costs of $20,310. There were a total of 2,890 cases across MS–DRGs 252, 253, and 254 reporting the use of a drug-coated balloon in the performance of the procedure, with an average length of stay of 6.0 days and average costs of $24,569. The data analysis showed that cases reporting the use of a drug-coated balloon in the performance of the procedure across MS–DRGs 252, 253 and 254 have similar lengths of stay (6.0 days) compared to the average length of stay for all of the cases in MS–DRGs 252, 253, and 254. The data results also showed that the cases reporting the use of a drug-coated balloon in the performance of the procedure across these MS–DRGs have higher average costs ($24,569 versus $20,310) compared to the average costs for all of the cases across these MS–DRGs.

We stated in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20207) that the results of our claims data analysis and the advice from our clinical advisors did not support reassigning cases reporting the use of a drug-coated balloon in the performance of these procedures from the lower severity level MS–DRGs 253 and 254 to the highest severity level MS–DRG 252 at this time. We further stated that, if we were to reassign cases that utilize a drug-coated balloon in the performance of these types of procedures from MS–DRG 254 to MS–DRG 252, the cases would result in overpayment and also would have a shorter length of stay compared to all of the cases in MS–DRG 252. While the cases reporting the use of a drug-coated balloon in the performance of these procedures are higher compared to the average costs for all cases in their assigned MS–DRGs, it is not by a significant amount. We stated that we believe that as use of a drug-coated balloon becomes more common, the costs will be reflected in the data. Our clinical advisors also agreed that it would not be clinically appropriate to reassign cases for patients from the lowest severity level (without CC/MCC) MS–DRG to the highest severity level (with MCC) MS–DRG in the absence of additional data to better determine the resource utilization for this subset of patients. Therefore, for these reasons, we proposed to not reassign cases reporting the use of a drug-coated balloon in the performance of endovascular procedures from MS–DRGs 253 and 254 to MS–DRG 252.

Comment: A number of commenters supported maintaining the current classification of cases involving the use of a drug-coated balloon in the performance of endovascular procedures. The commenters stated that CMS' proposal was reasonable, given the data, ICD–10–PCS procedure codes, and information provided.

Response: We appreciate the commenters' support.

Comment: One commenter recommended that further data analysis be conducted after the new ICD–10–PCS procedure codes for endovascular procedures utilizing a drug-coated balloon in the upper extremity become effective on October 1, 2018, in order to determine if MS–DRG structure and assignment modifications are warranted in the future.

Response: We agree with the commenter that continued monitoring of the cases reporting the use of a drug-coated balloon in the performance of endovascular procedures in the lower extremity, along with analysis of the new ICD–10–PCS procedure codes that identify the use of a drug-coated balloon in the upper extremity, would be advantageous. As claims data become available, we will be able to evaluate the resource utilization of these procedures more effectively.

Comment: One commenter believed that an analysis of the average costs of cases performed with and without the use of drug-coated balloons in MS–DRGs 252, 253, and 254 justified assigning cases, including cases involving the use of drug-coated balloons in the performance of the procedure, to MS–DRGs 252 or 253, and not to MS–DRG 254. The commenter indicated that claims data showed the average costs of MS–DRG 253 for all cases is $18,986, while the average cost of cases utilizing drug-coated balloons in the performance of the procedure assigned to MS–DRG 254 is $17,445. The commenter believed that, while the average length-of-stay is lower for these cases, the average costs are consistent with that of MS–DRG 253. Therefore, the commenter suggested that CMS reassign these cases to MS–DRG 253 as a more appropriate reflection of the hospital resources utilized for these cases.

Response: Our clinical advisors reviewed the data, and again determined that it would not be clinically appropriate to reassign cases for patients from the lowest severity level (without CC/MCC) MS–DRG to the higher severity level (with CC) MS–DRG in the absence of additional data to better determine the resource utilization for this subset of patients. We reiterate that we believe as use of the drug-coated balloon in the performance of endovascular procedures becomes more common, the costs will be reflected in the data. In addition, as noted above, new ICD–10–PCS procedure codes that describe the use of a drug-coated balloon in the upper extremity are effective with discharges occurring on or after October 1, 2018. As such, we will continue to monitor cases reporting the use of a drug-coated balloon in the performance of endovascular procedures and determine if future MS–DRG structure and assignment modifications are supported.

After consideration of the public comments we received, we are finalizing our proposal to not reassign cases reporting the use of a drug-coated balloon in the performance of endovascular procedures from MS–DRGs 253 and 254 to MS–DRG 252 for FY 2019.

We noted in the proposed rule that because 24 of the 36 ICD–10–PCS procedure codes describing the use of a

drug-coated balloon in the performance of endovascular procedures also include the use of an intraluminal device, we conducted further analysis to determine the number of cases reporting an intraluminal device with the use of a drug-coated balloon in the performance of the procedure versus the number of cases reporting the use of a drug-coated balloon alone. We analyzed the number of cases across MS–DRGs 252, 253, and 254 reporting: (1) The use of an intraluminal device (stent) with use of a drug-coated balloon in the performance of the procedure; (2) the use of a drug-eluting intraluminal device (stent) with the use of a drug-coated balloon in the performance of the procedure; and (3) the use of a drug-coated balloon only in the performance of the procedure. Our findings are shown in the following table.

MS–DRGs FOR OTHER VASCULAR PROCEDURES AND CASES WITH DRUG-COATED BALLOON

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 252, 253 and 254—All cases	71,641	6.0	$20,310
MS–DRGs 252, 253 and 254—Cases with intraluminal device with drug-coated balloon	522	6.0	28,418
MS–DRGs 252, 253 and 254—Cases with drug-eluting intraluminal device with drug-coated balloon	447	6.0	26,098
MS–DRGs 252, 253 and 254—Cases with drug-coated balloon only	2,705	6.1	24,553

As shown in this table, there were a total of 71,641 cases across MS–DRGs 252, 253, and 254, with an average length of stay of 6.0 days and average costs of $20,310. There were 522 cases across MS–DRGs 252, 253, and 254 reporting the use of an intraluminal device with use of a drug-coated balloon in the performance of the procedure, with an average length of stay of 6.0 days and average costs of $28,418. There were 447 cases across MS–DRGs 252, 253, and 254 reporting the use of a drug-eluting intraluminal device with use of a drug-coated balloon in the performance of the procedure, with an average length of stay of 6.0 days and average costs of $26,098. Lastly, there were 2,705 cases across MS–DRGs 252, 253, and 254 reporting the use of a drug-coated balloon alone in the performance of the procedure, with an average length of stay of 6.1 days and average costs of $24,553.

The data showed that the 2,705 cases in MS–DRGs 252, 253, and 254 reporting the use of a drug-coated balloon alone in the performance of the procedure have lower average costs compared to the 969 cases in MS–DRGs 252, 253, and 254 reporting the use of an intraluminal device (522 cases) or a drug-eluting intraluminal device (447 cases) with a drug-coated balloon in the performance of the procedure ($24,553 versus $28,418 and $26,098, respectively.) The data also showed that the cases reporting the use of a drug-coated balloon alone in the performance of the procedure have a comparable average length of stay compared to the cases reporting the use of an intraluminal device or a drug-eluting intraluminal device with a drug-coated balloon in the performance of the procedure (6.1 days versus 6.0 days).

In summary, as we stated in the proposed rule, we believe that further analysis of endovascular procedures involving the treatment of superficial femoral arteries for peripheral arterial disease that utilize a drug-coated balloon in the performance of the procedure would be advantageous. As additional claims data become available, we will be able to more fully evaluate the differences in cases where a procedure utilizes a drug-coated balloon alone in the performance of the procedure versus cases where a procedure utilizes an intraluminal device or a drug-eluting intraluminal device in addition to a drug-coated balloon in the performance of the procedure.

5. MDC 6 (Diseases and Disorders of the Digestive System)

a. Benign Lipomatous Neoplasm of Kidney

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20207), we received a request to reassign ICD–10–CM diagnosis code D17.71 (Benign lipomatous neoplasm of kidney) from MDC 06 (Diseases and Disorders of the Digestive System) to MDC 11 (Diseases and Disorders of the Kidney and Urinary Tract). The requestor stated that this diagnosis code is used to describe a kidney neoplasm and believed that because the ICD–10–CM code is specific to the kidney, a more appropriate assignment would be under MDC 11. In FY 2015, under the ICD–9–CM classification, there was not a specific diagnosis code for a benign lipomatous neoplasm of the kidney. The only diagnosis code available was ICD–9–CM diagnosis code 214.3 (Lipoma of intra-abdominal organs), which was assigned to MS–DRGs 393, 394, and 395 (Other Digestive System Diagnoses with MCC, with CC, and without CC/MCC, respectively) under MDC 6. Therefore, when we converted from the ICD–9 based MS–DRGs to the ICD–10 MS–DRGs, there was not a specific code available that identified the kidney from which to replicate. As a result, ICD–10–CM diagnosis code D17.71 was assigned to those same MS–DRGs (MS–DRGs 393, 394, and 395) under MDC 6.

While reviewing the MS–DRG classification of ICD–10–CM diagnosis code D17.71, we also reviewed the MS–DRG classification of another diagnosis code organized in subcategory D17.7, ICD–10–CM diagnosis code D17.72 (Benign lipomatous neoplasm of other genitourinary organ). ICD–10–CM diagnosis code D17.72 is currently assigned under MDC 09 (Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast) to MS–DRGs 606 and 607 (Minor Skin Disorders with and without MCC, respectively). Similar to the replication issue with ICD–10–CM diagnosis code D17.71, with ICD–10–CM diagnosis code D17.72, under the ICD–9–CM classification, there was not a specific diagnosis code to identify a benign lipomatous neoplasm of genitourinary organ. The only diagnosis code available was ICD–9–CM diagnosis code 214.8 (Lipoma of other specified sites), which was assigned to MS–DRGs 606 and 607 under MDC 09. Therefore, when we converted from the ICD–9 based MS–DRGs to the ICD–10 MS–DRGs, there was not a specific code available that identified another genitourinary organ (other than the kidney) from which to replicate. As a result, ICD–10–CM diagnosis code D17.72 was assigned to those same MS–DRGs (MS–DRGs 606 and 607) under MDC 9.

In the proposed rule, we proposed to reassign ICD–10–CM diagnosis code D17.71 from MS–DRGs 393, 394, and 395 (Other Digestive System Diagnoses with MCC, with CC, and without CC/MCC, respectively) under MDC 06 to

MS–DRGs 686, 687, and 688 (Kidney and Urinary Tract Neoplasms with MCC, with CC, and without CC/MCC, respectively) under MDC 11 because this diagnosis code is used to describe a kidney neoplasm. We also proposed to reassign ICD–10–CM diagnosis code D17.72 from MS–DRGs 606 and 607 under MDC 09 to MS–DRGs 686, 687, and 688 under MDC 11 because this diagnosis code is used to describe other types of neoplasms classified to the genitourinary tract that do not have a specific code identifying the site. Our clinical advisors agreed that the conditions described by the ICD–10–CM diagnosis codes provide specific anatomic detail involving the kidney and genitourinary tract and, therefore, if reclassified under this proposed MDC and reassigned to these MS–DRGs, would improve the clinical coherence of the patients assigned to these groups.

Comment: Commenters agreed with CMS' proposals to reassign ICD–10–CM diagnosis code D17.71 that describes benign lipomatous neoplasm of the kidney from MDC 6 to MDC 11, and to reassign ICD–10–CM diagnosis code D17.72 that describes benign lipomatous neoplasm of other genitourinary tract organ from MDC 9 to MDC 11. The commenters stated the proposals were reasonable, given the ICD–10–CM diagnosis codes and information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposals to reassign ICD–10–CM diagnosis code D17.71 from MS–DRGs 393, 394, and 395 under MDC 6 to MS–DRGs 686, 687, and 688 under MDC 11, and to reassign ICD–10–CM diagnosis code D17.72 from MS–DRGs 606 and 607 under MDC 9 to MS–DRGs 686, 687, and 688 under MDC 11 in the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

b. Bowel Procedures

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20208), we received a request to reassign the following 8 ICD–10–PCS procedure codes that describe repositioning of the colon and takedown of end colostomy from MS–DRGs 344, 345, and 346 (Minor Small and Large Bowel Procedures with MCC, with CC, and without CC/MCC, respectively) to MS–DRGs 329, 330, and 331 (Major Small and Large Bowel Procedures with MCC, with CC, and without CC/MCC, respectively):

ICD–10–PCS code	Code description
0DSK0ZZ	Reposition ascending colon, open approach.
0DKL4ZZ	Reposition ascending colon, percutaneous endoscopic approach.
0DSL0ZZ	Reposition transverse colon, open approach.
0DSL4ZZ	Reposition transverse colon, percutaneous endoscopic approach.
0DSM0ZZ	Reposition descending colon, open approach.
0DSM4ZZ	Reposition descending colon, percutaneous endoscopic approach.
0DSN0ZZ	Reposition sigmoid colon, open approach.
0DSN4ZZ	Reposition sigmoid colon, percutaneous endoscopic approach.

The requestor indicated that the resources required for procedures identifying repositioning of specified segments of the large bowel are more closely aligned with other procedures that group to MS–DRGs 329, 330, and 331, such as repositioning of the large intestine (unspecified segment).

We analyzed the claims data from the September 2017 update of the FY 2017 Med PAR file for MS–DRGs 344, 345 and 346 for all cases reporting the 8 ICD–10–PCS procedure codes listed in the table above. Our findings are shown in the following table:

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 344—All cases	1,452	9.5	$20,609
MS–DRG 344—All cases with a specific large bowel reposition procedure	52	9.6	23,409
MS–DRG 345—All cases	2,674	5.6	11,552
MS–DRG 345—All cases with a specific large bowel reposition	246	6	14,915
MS–DRG 346—All cases	990	3.8	8,977
MS–DRG 346—All cases with a specific large bowel reposition procedure	223	4.5	12,279

The data showed that the average length of stay and average costs for cases that reported a specific large bowel reposition procedure were generally consistent with the average length of stay and average costs for all of the cases in their assigned MS–DRG.

We then examined the claims data in the September 2017 update of the FY 2017 MedPAR file for MS–DRGs 329, 330 and 331. Our findings are shown in the following table.

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 329, 330, and 331—All cases	112,388	8.4	$21,382
MS–DRG 329—All cases	33,640	13.3	34,015
MS–DRG 330—All cases	52,644	7.3	17,896
MS–DRG 331—All cases	26,104	4.1	12,132

As shown in this table, across MS–DRGs 329, 330, and 331, we found a total of 112,388 cases, with an average length of stay of 8.4 days and average costs of $21,382. We stated in the FY 2019 IPPS/LTCH PPS proposed rule that the results of our analysis indicate that the resources required for cases reporting the specific large bowel repositioning procedures are more aligned with those resources required for all cases assigned to MS–DRGs 344, 345, and 346, with the average costs being lower than the average costs for all cases assigned to MS–DRGs 329, 330, and 331. Our clinical advisors also indicated that the 8 specific bowel repositioning procedures are best aligned with those in MS–DRGs 344, 345, and 346. Therefore, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20209), we proposed to maintain the current assignment of the 8 specific bowel repositioning procedures in MS–DRGs 344, 345, and 346 for FY 2019.

Comment: Commenters supported CMS' proposal to maintain the current assignment of the 8 specific bowel repositioning procedures in MS DRGs 344, 345, and 346 for FY 2019.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current assignment of the 8 specific bowel repositioning procedures in MS DRGs 344, 345, and 346 for FY 2019.

In conducting our analysis of MS–DRGs 329, 330, and 331, we also examined the subset of cases reporting one of the bowel procedures listed in the following table as the only O.R. procedure.

ICD–10–PCS code	Code description
0DQK0ZZ	Repair ascending colon, open approach.
0DQK4ZZ	Repair ascending colon, percutaneous endoscopic approach.
0DQL0ZZ	Repair transverse colon, open approach.
0DQL4ZZ	Repair transverse colon, percutaneous endoscopic approach.
0DQM0ZZ	Repair descending colon, open approach.
0DQM4ZZ	Repair descending colon, percutaneous endoscopic approach.
0DQN0ZZ	Repair sigmoid colon, open approach.
0DQN4ZZ	Repair sigmoid colon, percutaneous endoscopic approach.
0DSB0ZZ	Reposition ileum, open approach.
0DSB4ZZ	Reposition ileum, percutaneous endoscopic approach.
0DSE0ZZ	Reposition large intestine, open approach.
0DSE4ZZ	Reposition large intestine, percutaneous endoscopic approach.

This approach can be useful in determining whether resource use is truly associated with a particular procedure or whether the procedure frequently occurs in cases with other procedures with higher than average resource use. As shown in the following table, we identified 398 cases reporting a bowel procedure as the only O.R. procedure, with an average length of stay of 6.3 days and average costs of $13,595 across MS–DRGs 329, 330, and 331, compared to the overall average length of stay of 8.4 days and average costs of $21,382 for all cases in MS–DRGs 329, 330, and 331.

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 329, 330 and 331—All cases	112,388	8.4	$21,382
MS–DRGs 329, 330 and 331—All cases with a bowel procedure as only O.R. procedure	398	6.3	13,595
MS–DRG 329—All cases	33,640	13.3	34,015
MS–DRG 329—Cases with a bowel procedure as only O.R. procedure	86	8.3	19,309
MS–DRG 330—All cases	52,644	7.3	17,896
MS–DRG 330—Cases with a bowel procedure as only O.R. procedure	183	6.9	13,617
MS–DRG 331—All cases	26,104	4.1	12,132
MS–DRG 331—Cases with a bowel procedure as only O.R. procedure	129	4.3	9,754

We stated in the FY 2019 IPPS/LTCH PPS proposed rule that the resources required for these cases are more aligned with the resources required for cases assigned to MS–DRGs 344, 345, and 346 than with the resources required for cases assigned to MS–DRGs 329, 330, and 331. Our clinical advisors also agreed that these cases are more clinically aligned with cases in MS–DRGs 344, 345, and 346, as they are minor procedures relative to the major bowel procedures assigned to MS–DRGs 329, 330, and 331. Therefore, in the proposed rule, we proposed to reassign the 12 ICD–10–PCS procedure codes listed above from MS–DRGs 329, 330, and 331 to MS–DRGs 344, 345, and 346.

Comment: Commenters disagreed with CMS' proposal to reassign the 12 ICD–10–PCS procedure codes listed above from MS–DRGs 329, 330, and 331 to MS DRGs 344, 345, and 346. The commenters recommended that changes to these MS–DRGs be delayed until a thorough data analysis is conducted. The commenters further recommended that any future analysis include a thorough review of the principal diagnoses for cases involving these ICD–10–PCS codes, as the associated diagnosis significantly impacts the resource utilization and complexity of the procedure performed and MS–DRG assignment. The commenters noted that the root operation of ''Reposition'' may be used for the takedown of a stoma, as well as to treat a specific medical condition such as malrotation of the intestine, and that ''Repair'' is the root operation of last resort when no other ICD–10–PCS root operation applies and, therefore, is used for a wide range of procedures of varying complexity.

Commenters also noted that several questions and answers regarding these ICD–10–PCS procedure codes were published in *Coding Clinic* for ICD–10–CM/PCS between late 2016 and the end of 2017, and stated that because 2 full

years of data were not available subsequent to publication of this advice, CMS' analysis and proposed MS–DRG modifications may be based on unreliable data.

Response: Upon further review, we agree with the commenters that the availability of a full 2 years of data would allow us to conduct a more comprehensive analysis upon which to consider potential modifications to these MS–DRGs. Therefore, we believe it would be preferable to wait until these data are available before finalizing changes to the MS–DRG assignment for these bowel procedures.

After consideration of the public comments we received, we are not finalizing our proposal to reassign the 12 ICD–10–PCS procedure codes listed above from MS–DRGs 329, 330, and 331 to MS–DRGs 344, 345, and 346 for FY 2019.

6. MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue): Spinal Fusion

In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38036), we announced our plans to review the ICD–10 logic for the MS–DRGs where procedures involving spinal fusion are currently assigned for FY 2019. After publication of the FY 2018 IPPS/LTCH PPS final rule, we received a comment suggesting that CMS publish findings from this review and discuss possible future actions. The commenter agreed that it is important to be able to fully evaluate the MS–DRGs to which all spinal fusion procedures are currently assigned with additional claims data, particularly considering the 33 clinically invalid codes that were identified through the rulemaking process (82 FR 38034 through 38035) and the 87 codes identified from the upper and lower joint fusion tables in the ICD–10–PCS classification and discussed at the September 12, 2017 ICD–10 Coordination and Maintenance Committee that were proposed to be deleted effective October 1, 2018 (FY 2019). The agenda and handouts from that meeting can be obtained from the CMS website at: *https://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/ICD-9-CM-C-and-M-Meeting-Materials.html.*

According to the commenter, deleting the 33 procedure codes describing clinically invalid spinal fusion procedures for FY 2018 partially resolves the issue for data used in setting the FY 2020 payment rates. However, the commenter also noted that the problem will not be fully resolved until the FY 2019 claims are available for FY 2021 ratesetting (due to the 87 codes identified at the ICD–10 Coordination and Maintenance Committee meeting for deletion effective October 1, 2018 (FY 2019)).

The commenter noted that it analyzed claims data from the FY 2016 MedPAR data set and was surprised to discover a significant number of discharges reporting 1 of the 87 clinically invalid codes that were identified and discussed by the ICD–10 Coordination and Maintenance Committee among the following spinal fusion MS–DRGs.

MS–DRG	Description
453	Combined Anterior/Posterior Spinal Fusion with MCC.
454	Combined Anterior/Posterior Spinal Fusion with CC.
455	Combined Anterior/Posterior Spinal Fusion without CC/MCC.
456	Spinal Fusion Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions with MCC.
457	Spinal Fusion Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions with CC.
458	Spinal Fusion Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions without CC/MCC.
459	Spinal Fusion Except Cervical with MCC.
460	Spinal Fusion Except Cervical without MCC.
471	Cervical Spinal Fusion with MCC.
472	Cervical Spinal Fusion with CC.
473	Cervical Spinal Fusion without CC/MCC.

In addition, the commenter noted that it also identified a number of discharges for the 33 clinically invalid codes we identified in the FY 2018 IPPS/LTCH PPS final rule in the same MS–DRGs listed above. According to the commenter, its findings of these invalid spinal fusion procedure codes in the FY 2016 claims data comprise approximately 30 percent of all discharges for spinal fusion procedures.

The commenter expressed its appreciation that CMS is making efforts to address coding inaccuracies within the classification and suggested that CMS publish findings from its own review of spinal fusion coding issues in those MS–DRGs where cases reporting spinal fusion procedures are currently assigned and include a discussion of possible future actions in the FY 2019 IPPS/LTCH PPS proposed rule. The commenter believed that such an approach would allow time for stakeholder input on any possible proposals along with time for the invalid codes to be worked out of the datasets. The commenter also noted that publishing CMS' findings will put the agency, as well as the public, in a better position to address any potential payment issues for these services beginning in FY 2021.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20210), we thanked the commenter for acknowledging the steps we have taken in our efforts to address coding inaccuracies within the classification as we continue to refine the ICD–10 MS–DRGs. We did not propose any changes to the MS–DRGs involving spinal fusion procedures for FY 2019. However, in response to the commenter's suggestion and findings, we provided the following results from our analysis of the September 2017 update of the FY 2017 MedPAR claims data for the MS–DRGs involving spinal fusion procedures.

We noted that while the commenter stated that 87 codes were identified from the upper and lower joint fusion tables in the ICD–10–PCS classification and discussed at the September 12, 2017 ICD–10 Coordination and Maintenance Committee meeting to be deleted effective October 1, 2018 (FY 2019), there were 99 spinal fusion codes identified in the meeting materials, as shown in Table 6P.1g associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*).

As shown in Table 6P.1g associated with the proposed rule, the 99 procedure codes describe spinal fusion procedures that have device value ''Z'' representing No Device for the 6th character in the code. Because a spinal fusion procedure always requires some type of device (for example, instrumentation with bone graft or bone

graft alone) to facilitate the fusion of vertebral bones, these codes are considered clinically invalid and were proposed for deletion at the September 12, 2017 ICD–10 Coordination and Maintenance Committee meeting. We received public comments in support of the proposal to delete the 99 codes describing a spinal fusion without a device, in addition to receiving support for the deletion of other procedure codes describing fusion of body sites other than the spine. A total of 213 procedure codes describing fusion of a specific body part with device value ''Z'' No Device are being deleted effective October 1, 2018 (FY 2019) as shown in Table 6D.—Invalid Procedure Codes associated with the proposed rule and this final rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*).

We examined claims data from the September 2017 update of the FY 2017 MedPAR file for cases reporting any of the clinically invalid spinal fusion procedures with device value ''Z'' No Device in MS–DRGs 028 (Spinal Procedures with MCC), 029 (Spinal Procedures with CC or Spinal Neurostimulators), and 030 (Spinal Procedures without CC/MCC) under MDC 1 and MS–DRGs 453, 454, 455, 456, 457, 458, 459, 460, 471, 472, and 473 under MDC 8 (that are listed and shown earlier in this section). Our findings are shown in the following tables.

SPINAL FUSION PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 028—All cases	1,927	11.7	$37,524
MS–DRG 028—Cases with invalid spinal fusion procedures	132	13	52,034
MS–DRG 029—All cases	3,426	5.7	22,525
MS–DRG 029—Cases with invalid spinal fusion procedures	171	7.4	33,668
MS–DRG 030—All cases	1,578	3	15,984
MS–DRG 030—Cases with invalid spinal fusion procedures	52	2.6	22,471
MS–DRG 453—All cases	2,891	9.5	70,005
MS–DRG 453—Cases with invalid spinal fusion procedures	823	10.1	84,829
MS–DRG 454—All cases	12,288	4.7	47,334
MS–DRG 454—Cases with invalid spinal fusion procedures	2,473	5.4	59,814
MS–DRG 455—All cases	12,751	3	37,440
MS–DRG 455—Cases with invalid spinal fusion procedures	2,332	3.2	45,888
MS–DRG 456—All cases	1,439	11.5	66,447
MS–DRG 456—Cases with invalid spinal fusion procedures	404	12.5	71,385
MS–DRG 457—All cases	3,644	6	48,595
MS–DRG 457—Cases with invalid spinal fusion procedures	960	6.7	53,298
MS–DRG 458—All cases	1,368	3.6	37,804
MS–DRG 458—Cases with invalid spinal fusion procedures	244	4.1	43,182
MS–DRG 459—All cases	4,904	7.8	43,862
MS–DRG 459—Cases with invalid spinal fusion procedures	726	9	49,387
MS–DRG 460—All cases	59,459	3.4	29,870
MS–DRG 460—Cases with invalid spinal fusion procedures	5,311	3.9	31,936
MS–DRG 471—All cases	3,568	8.4	36,272
MS–DRG 471—Cases with invalid spinal fusion procedures	389	9.9	43,014
MS–DRG 472—All cases	15,414	3.2	21,836
MS–DRG 472—Cases with invalid spinal fusion procedures	1,270	4	25,780
MS–DRG 473—All cases	18,095	1.8	17,694
MS–DRG 473—Cases with invalid spinal fusion procedures	1,185	2.3	19,503

SUMMARY TABLE FOR SPINAL FUSION PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 028, 029, 030, 453, 454, 455, 456, 457, 458, 459, 460, 471, 472, and 473—All cases	142,752	3.9	$31,788
MS–DRGs 028, 029, 030, 453, 454, 455, 456, 457, 458, 459, 460, 471, 472, and 473—Cases with invalid spinal fusion procedures	16,472	5.1	42,929

As shown in this summary table, we found a total of 142,752 cases in MS–DRGs 028, 029, 030, 453, 454, 455, 456, 457, 458, 459, 460, 471, 472, and 473 with an average length of stay of 3.9 days and average costs of $31,788. We found a total of 16,472 cases reporting a procedure code for an invalid spinal fusion procedure with device value ''Z'' No Device across MS–DRGs 028, 029, and 030 under MDC 1 and MS–DRGs 453, 454, 455, 456, 457, 458, 459, 460, 471, 472, and 473 under MDC 8, with an average length of stay of 5.1 days and average costs of $42,929. The results of the data analysis demonstrate that these invalid spinal fusion procedures represent approximately 12 percent of all discharges across the spinal fusion MS–DRGs. Because these procedure codes describe clinically invalid procedures, we would not expect these codes to be reported on any claims data. We stated in the proposed rule that it is unclear why providers assigned procedure codes for spinal fusion procedures with the device value ''Z'' No Device. Our analysis did not examine whether these claims were isolated to a specific provider or whether this inaccurate reporting was widespread among a number of providers.

With regard to possible future action, we indicated in the proposed rule that we will continue to monitor the claims data for resolution of the coding issues previously identified. Because the procedure codes that we analyzed and presented findings for in the FY 2019 IPPS/LTCH PPS proposed rule will no longer be in the classification system, effective October 1, 2018 (FY 2019), the claims data that we examine for FY 2020 may still contain claims with the invalid codes. As such, we will continue to collaborate with the AHA as one of the four Cooperating Parties through the AHA's *Coding Clinic for ICD–10–CM/PCS* and provide further education on spinal fusion procedures and the proper reporting of the ICD–10–PCS spinal fusion procedure codes. We agreed with the commenter that until these coding inaccuracies are no longer reflected in the claims data, it would be premature to propose any MS–DRG modifications for spinal fusion procedures. Possible MS–DRG modifications may include taking into account the approach that was utilized in performing the spinal fusion procedure (for example, open versus percutaneous).

For the reasons described and as stated in the proposed rule and earlier in our discussion, we proposed not to make any changes to the spinal fusion MS–DRGs for FY 2019.

Comment: Commenters agreed with CMS' proposal not to make any changes to the MS–DRGs involving spinal fusion procedures for FY 2019.

Response: We thank the commenters for their support.

Comment: Some commenters noted that confusion has existed as to whether a spinal fusion code may be assigned when no bone graft or bone graft substitute is used (that is, instrumentation only) but the medical record documentation refers to the procedure as a spinal fusion. One commenter recommended that additional refinements be made to the ICD–10–PCS spinal fusion coding guidelines in order to further clarify appropriate reporting of spinal fusion codes. Another commenter asserted that the planned deletion of a total of 213 ICD–10–PCS fusion procedure codes with the device value ''Z'' for ''no device'', effective October 1, 2018, should help remedy the confusion regarding the correct coding of spinal procedures.

Response: We agree with the commenters that accurate coding of spinal fusion procedures has been the subject of confusion in the past, and we will continue to monitor the claims data for spinal fusion procedures. As one of the four Cooperating Parties, we also will continue to collaborate with the American Hospital Association to provide guidance for coding spinal fusion procedures through the Coding Clinic for ICD–10–CM/PCS publication and to review the ICD–10–PCS spinal fusion coding guidelines to determine where further clarifications may be made.

After consideration of the public comments we received, we are finalizing our proposal to not make any changes to the spinal fusion MS–DRGs for FY 2019.

7. MDC 9 (Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast): Cellulitis With Methicillin Resistant Staphylococcus Aureus (MRSA) Infection

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20212), we received a request to reassign ICD–10–CM diagnosis codes reported with a principal diagnosis of cellulitis and a secondary diagnosis code of B95.62 (Methicillin resistant Staphylococcus aureus infection as the cause of diseases classified elsewhere) or A49.02 (Methicillin resistant Staphylococcus aureus infection, unspecified site). Currently, these cases are assigned to MS–DRG 602 (Cellulitis with MCC) and MS–DRG 603 (Cellulitis without MCC) in MDC 9. The requestor believed that cases of cellulitis with MSRA infection should be reassigned to MS–DRG 867 (Other Infectious and Parasitic Diseases Diagnoses with MCC) because MS–DRGs 602 and 603 include cases that do not accurately reflect the severity of illness or risk of mortality for patients diagnosed with cellulitis and MRSA. The requestor acknowledged that the organism is not to be coded before the localized infection, but stated in its request that patients diagnosed with cellulitis and MRSA are entirely different from patients diagnosed only with cellulitis. The requestor stated that there is a genuine threat to life or limb in these cases. The requestor further stated that, with the opioid crisis and the frequency of MRSA infection among this population, cases of cellulitis with MRSA should be identified with a specific combination code and assigned to MS–DRG 867.

For the FY 2019 IPPS/LTCH PPS proposed rule, we analyzed claims data from the September 2017 update of the FY 2017 MedPAR file for all cases assigned to MS–DRGs 602 and 603 and subsets of these cases reporting a principal ICD–10–CM diagnosis of cellulitis and a secondary diagnosis code of B95.62 or A49.02. Our findings are shown in the following table.

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 602—All cases	26,244	5.8	$10,034
MS–DRG 603—All cases	104,491	3.9	6,128
MS–DRGs 602 and 603—Cases reported with a principal diagnosis of cellulitis and a secondary diagnosis of B95.62	5,364	5.3	8,245
MS–DRGs 602 and 603—Cases reported with a principal diagnosis of cellulitis and a secondary diagnosis of A49.02	309	5.4	8,832

As shown in this table, we examined the subsets of cases in MS–DRGs 602 and 603 reported with a principal diagnosis of cellulitis and a secondary diagnosis code B95.62 or A49.02. Both of these subsets of cases had an average length of stay that was comparable to the average length of stay for all cases in MS–DRG 602 and greater than the average length of stay for all cases in MS–DRG 603, and average costs that were lower than the average costs of all cases in MS–DRG 602 and higher than the average costs of all cases in MS–DRG 603. As we have discussed in prior rulemaking (77 FR 53309), it is a fundamental principle of an averaged payment system that half of the procedures in a group will have above average costs. It is expected that there will be higher cost and lower cost subsets, especially when a subset has low numbers.

To examine the request to reassign ICD–10–CM diagnosis codes reported with a principal diagnosis of cellulitis and a secondary diagnosis code of B95.62 or A49.02 from MS–DRGs 602 and 603 to MS–DRG 867 (which would typically involve also reassigning those cases to the two other severity level MS–DRGs 868 and 869 (Other Infectious

and Parasitic Diseases Diagnoses with CC and Other Infectious and Parasitic Diseases Diagnoses without CC/MCC, respectively)), we then analyzed the data for all cases in MS–DRGs 867, 868 and 869. The results of our analysis are shown in the following table.

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 867—All cases	2,653	7.5	$14,762
MS–DRG 868—All cases	2,096	4.4	7,532
MS–DRG 869—All cases	499	3.3	5,624

We compared the average length of stay and average costs for MS–DRGs 867, 868, and 869 to the average length of stay and average costs for the subsets of cases in MS–DRGs 602 and 603 reported with a principal diagnosis of cellulitis and a secondary diagnosis code of B95.62 or A49.02. We found that the average length of stay for these subsets of cases was shorter and the average costs were lower than those for all cases in MS–DRG 867, but that the average length of stay and average costs were higher than those for all cases in MS–DRG 868 and MS–DRG 869. We stated in the proposed rule that our findings from the analysis of claims data do not support reassigning cellulitis cases reported with ICD–10–CM diagnosis code B95.62 or A49.02 from MS–DRGs 602 and 603 to MS–DRGs 867, 868 and 869. Our clinical advisors noted that when a principal diagnosis of cellulitis is accompanied by a secondary diagnosis of B95.62 or A49.02 in MS–DRGs 602 or 603, the combination of these primary and secondary diagnoses is the reason for the hospitalization, and the level of acuity of these subsets of patients is similar to other patients in MS–DRGs 602 and 603. Therefore, in the proposed rule, we stated that these cases are more clinically aligned with all cases in MS–DRGs 602 and 603. For these reasons, we did not propose to reassign cellulitis cases reported with ICD–10–CM diagnosis code of B95.62 or A49.02 to MS–DRG 867, 868, or 869 for FY 2019. We invited public comments on our proposal to maintain the current MS–DRG assignment for ICD–10–CM codes B95.62 and A49.02 when reported as secondary diagnoses with a principal diagnosis of cellulitis.

Comment: One commenter supported CMS' proposal to maintain the current MS–DRG assignment for ICD–10–CM codes B95.62 and A49.02 when reported as secondary diagnoses with a principal diagnosis of cellulitis.

Response: We appreciate the commenter's support.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current MS–DRG classification for cases reported with ICD–10–CM diagnosis codes B95.62 and A49.02 when reported as secondary diagnoses with a principal diagnosis of cellulitis.

8. MDC 10 (Endocrine, Nutritional and Metabolic Diseases and Disorders): Acute Intermittent Porphyria

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20212), we received a request to revise the MS–DRG classification for cases of patients diagnosed with porphyria and reported with ICD–10–CM diagnosis code E80.21 (Acute intermittent (hepatic) porphyria) to recognize the resource requirements in caring for these patients, to ensure appropriate payment for these cases, and to preserve patient access to necessary treatments. Porphyria is defined as a group of rare disorders (''porphyrias'') that interfere with the production of hemoglobin that is needed for red blood cells. While some of these disorders are genetic (inborn) and others are acquired, they all result in the abnormal accumulation of hemoglobin building blocks, called porphyrins, which can be deposited in the tissues where they particularly interfere with the functioning of the nervous system and the skin. Treatment for patients suffering from disorders of porphyrin metabolism consists of an intravenous injection of Panhematin® (hemin for injection). ICD–10–CM diagnosis code E80.21 is currently assigned to MS–DRG 642 (Inborn and Other Disorders of Metabolism). (We note that this issue has been discussed previously in the FY 2013 IPPS/LTCH PPS proposed and final rules (77 FR 27904 through 27905 and 77 FR 53311 through 53313, respectively) and the FY 2015 IPPS/LTCH PPS proposed and final rules (79 FR 28016 and 79 FR 49901, respectively)).

We analyzed claims data from the September 2017 update of the FY 2017 MedPAR file for cases assigned to MS–DRG 642. Our findings are shown in the following table.

MS–DRG 642	Number of cases	Average length of stay	Average costs
MS–DRG 642—All cases	1,801	4.3	$9,157
MS–DRG 642—Cases reporting diagnosis code E80.21 as principal diagnosis	183	5.6	19,244
MS–DRG 642—Cases not reporting diagnosis code E80.21 as principal diagnosis	1,618	4.1	8,016

As shown in this table, cases reporting diagnosis code E80.21 as the principal diagnosis in MS–DRG 642 had higher average costs and longer average lengths of stay compared to the average costs and lengths of stay for all other cases in MS–DRG 642.

To examine the request to reassign cases with ICD–10–CM diagnosis code E80.21 as the principal diagnosis, we analyzed claims data for all cases in MS–DRGs for endocrine disorders, including MS–DRG 643 (Endocrine Disorders with MCC), MS–DRG 644 (Endocrine Disorders with CC), and MS–DRG 645 (Endocrine Disorders without CC/MCC). The results of our analysis are shown in the following table.

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 643—All cases	9,337	6.3	$11,268

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 644—All cases	11,306	4.2	7,154
MS–DRG 645—All cases	4,297	3.2	5,406

The data results showed that the average length of stay for the subset of cases reporting ICD–10–CM diagnosis code E80.21 as the principal diagnosis in MS–DRG 642 is lower than the average length of stay for all cases in MS–DRG 643, but higher than the average length of stay for all cases in MS–DRGs 644 and 645. The average costs for the subset of cases reporting ICD–10–CM diagnosis code E80.21 as the principal diagnosis in MS–DRG 642 are much higher than the average costs for all cases in MS–DRGs 643, 644, and 645. However, after considering these findings in the context of the current MS–DRG structure, we stated in the FY 2019 IPPS/LTCH PPS proposed rule that we were unable to identify an MS–DRG that would more closely parallel these cases with respect to average costs and length of stay that would also be clinically aligned. We further stated that our clinical advisors believe that, in the current MS–DRG structure, the clinical characteristics of patients in these cases are most closely aligned with the clinical characteristics of patients in all cases in MS–DRG 642. Moreover, given the small number of porphyria cases, we do not believe there is justification for creating a new MS–DRG. Basing a new MS–DRG on such a small number of cases could lead to distortions in the relative payment weights for the MS–DRG because several expensive cases could impact the overall relative payment weight. Having larger clinical cohesive groups within an MS–DRG provides greater stability for annual updates to the relative payment weights. In summary, we did not propose to revise the MS–DRG classification for porphyria cases.

Comment: Some commenters supported CMS' proposal to maintain porphyria cases in MS–DRG 642.

Response: We appreciate the commenters' support.

Comment: Other commenters opposed CMS' proposal to not create a new MS–DRG for cases involving ICD–10–CM diagnosis code E80.21. These commenters described significant difficulties encountered by patients with acute porphyria attacks in obtaining Panhematin® when presenting to an inpatient hospital, which they attribute to the strong financial disincentives faced by facilities to treat these cases on an inpatient basis. The commenters asserted that the inpatient stays required for management of acute porphyria attacks are not clinically similar to inpatient stays for other inborn disorders of metabolism (which comprise the cases assigned to MS–DRG 642). The commenters stated that, based on the lower than expected average cost per case and longer than expected length of stay for acute porphyria attacks, it appears that facilities are frequently not providing Panhematin® to patients in this condition, and instead attempting to provide symptom relief and transferring patients to an outpatient setting to receive the drug where they can be adequately paid. The commenters stated that this is in contrast to the standard of care for acute porphyria attacks and can result in devastating long-term health consequences. The commenters suggested that CMS consider alternative mechanisms to ensure adequate payment for cases involving rare diseases. In summary, commenters asserted that creating a new MS–DRG would allow more accurate payment for the cases that remain in MS–DRG 642 and facilitate access to the standard of care for patients with acute porphyria attacks.

Response: We acknowledge the commenters' concerns. As we have stated in prior rulemaking, it is not appropriate for facilities to deny treatment to beneficiaries needing a specific type of therapy or treatment that involves increased costs. The MS–DRG system is a system of averages and it is expected that across the diagnostic related groups that within certain groups, some cases may demonstrate higher than average costs, while other cases may demonstrate lower than average costs.

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20212 through 20213), we recognize the average costs of the small number of porphyria cases are greater than the average costs of the cases in MS–DRG 642 overall. An averaged payment system depends on aggregation of similar cases with a range of costs, and it is therefore usually possible to define subsets with higher values and subsets with lower values. We seek to identify sufficiently large sets of claims data with a resource/cost similarity and clinical similarity in developing diagnostic-related groups rather than smaller subsets of diagnoses. In response to the commenters' assertion that these cases are not clinically similar to other cases within the MS–DRG, our clinical advisors continue to believe that MS–DRG 642 represents the most clinically appropriate placement within the current MS–DRG structure at this time because the clinical characteristics of patients in these cases are most closely aligned with the clinical characteristics of patients in all cases in MS–DRG 642.

We are sensitive to the commenters' concerns about access to treatment for beneficiaries who have been diagnosed with this condition. Therefore, as part of our ongoing, comprehensive analysis of the MS–DRGs under ICD–10, we will continue to explore mechanisms through which to address rare diseases and low volume DRGs. However, at this time, for the reasons summarized earlier, we are finalizing our proposal for FY 2019 to maintain the MS–DRG classification for porphyria cases.

9. MDC 11 (Diseases and Disorders of the Kidney and Urinary Tract): Admit for Renal Dialysis

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20213 through 20214),we received a request to review the codes assigned to MS–DRG 685 (Admit for Renal Dialysis) to determine if the MS–DRG should be deleted, or if it should remain as a valid MS–DRG. Currently, the ICD–10–CM diagnosis codes shown in the table below are assigned to MS–DRG 685:

ICD–10–CM code	ICD–10–CM code title
Z49.01	Encounter for fitting and adjustment of extracorporeal dialysis catheter.
Z49.02	Encounter for fitting and adjustment of peritoneal dialysis catheter.
Z49.31	Encounter for adequacy testing for hemodialysis.

ICD–10–CM code	ICD–10–CM code title
Z49.32	Encounter for adequacy testing for peritoneal dialysis.

The requestor stated that, under ICD–9–CM, diagnosis code V56.0 (Encounter for extracorporeal dialysis) was reported as the principal diagnosis to identify patients who were admitted for an encounter for dialysis. However, under ICD–10–CM, there is no comparable code in which to replicate such a diagnosis. The requestor noted that, while patients continued to be admitted under inpatient status (under certain circumstances) for dialysis services, there is no existing ICD–10–CM diagnosis code within the classification that specifically identifies a patient being admitted for an encounter for dialysis services.

The requestor also noted that three of the four ICD–10–CM diagnosis codes currently assigned to MS–DRG 685 are on the ''Unacceptable Principal Diagnosis'' edit code list in the Medicare Code Editor (MCE). Therefore, these codes are not allowed to be reported as a principal diagnosis for an inpatient admission.

We examined claims data from the September 2017 update of the FY 2017 MedPAR file for cases reporting ICD–10–CM diagnosis codes Z49.01, Z49.02, Z49.31, and Z49.32. Our findings are shown in the following table.

ADMIT FOR RENAL DIALYSIS ENCOUNTER

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 685—All cases	78	4	$8,871
MS–DRG 685—Cases reporting ICD–10–CM diagnosis code Z49.01	78	4	8,871
MS–DRG 685—Cases reporting ICD–10–CM diagnosis code Z49.02	0	0	0
MS–DRG 685—Cases reporting ICD–10–CM diagnosis code Z49.31	0	0	0
MS–DRG 685—Cases reporting ICD–10–CM diagnosis code Z49.32	0	0	0

As shown in the table above, for MS–DRG 685, there were a total of 78 cases reporting ICD–10–CM diagnosis code Z49.01, with an average length of stay of 4 days and average costs of $8,871. There were no cases reporting ICD–10–CM diagnosis code Z49.02, Z49.31, or Z49.32.

Our clinical advisors reviewed the clinical issues, as well as the claims data for MS–DRG 685. Based on their review of the data analysis, our clinical advisors recommended that MS–DRG 685 be deleted and ICD–10–CM diagnosis codes Z49.01, Z49.02, Z49.31, and Z49.32 be reassigned. Historically, patients were admitted as inpatients to receive hemodialysis services. However, over time, that practice has shifted to outpatient and ambulatory settings. Because of this change in medical practice, we stated in the FY 2019 IPPS/LTCH PPS proposed rule that we did not believe that it was appropriate to maintain a vestigial MS–DRG, particularly due to the fact that the transition to ICD–10 had resulted in three out of four codes that mapped to the MS–DRG being precluded from being used as principal diagnosis codes on the claim. In addition, our clinical advisors believed that reassigning the ICD–10–CM diagnosis codes from MS–DRG 685 to MS–DRGs 698, 699, and 700 (Other Kidney and Urinary Tract Diagnoses with MCC, with CC, and without CC\MCC, respectively) was clinically appropriate because the reassignment would result in an accurate MS–DRG assignment of a specific case or inpatient service and encounter based on acceptable principal diagnosis codes under these MS–DRGs.

Therefore, for FY 2019, because there is no existing ICD–10–CM diagnosis code within the classification system that specifically identifies a patient being admitted for an encounter for dialysis services; and three of the four ICD–10–CM diagnosis codes, Z49.02, Z49.31, and Z49.32, currently assigned to MS–DRG 685 are on the Unacceptable Principal Diagnosis edit code list in the MCE, we proposed to reassign ICD–10–CM diagnosis codes Z49.01, Z49.02, Z49.31, and Z49.32 from MS–DRG 685 to MS–DRGs 698, 699, and 700, and to delete MS–DRG 685.

Comment: Commenters agreed with the proposal to reassign ICD–10–CM diagnosis codes Z49.01, Z49.02, Z49.31, and Z49.32 from MS–DRG 685 to MS–DRGs 698, 699, and 700, and to delete MS–DRG 685.

Response: We thank the commenters for their support.

After consideration of the public comments we received, we are finalizing our proposal to delete MS–DRG 685 and reassign ICD–10–CM diagnosis codes Z49.01, Z49.02, Z49.31, and Z49.32 from MS–DRG 685 to MS–DRGs 698, 699, and 700 for FY 2019, without modification.

10. MDC 14 (Pregnancy, Childbirth and the Puerperium)

In the FY 2018 IPPS/LTCH PPS proposed rule (82 FR 19834) and final rule (82 FR 38036 through 38037), we noted that the MS–DRG logic involving a vaginal delivery under MDC 14 is technically complex as a result of the requirements that must be met to satisfy assignment to the affected MS–DRGs. As a result, we solicited public comments on further refinement to the following four MS–DRGs related to vaginal delivery: MS–DRG 767 (Vaginal Delivery with Sterilization and/or D&C); MS–DRG 768 (Vaginal Delivery with O.R. Procedure Except Sterilization and/or D&C); MS–DRG 774 (Vaginal Delivery with Complicating Diagnosis); and MS–DRG 775 (Vaginal Delivery without Complicating Diagnosis). In addition, we sought public comments on further refinements to the conditions defined as a complicating diagnosis in MS–DRG 774 and MS–DRG 781 (Other Antepartum Diagnoses with Medical Complications). We indicated that we would review public comments received in response to the solicitation as we continued to evaluate these MS–DRGs under MDC 14 and, if warranted, we would propose refinements for FY 2019. Commenters were instructed to direct comments for consideration to the CMS MS–DRG Classification Change Request Mailbox located at *MSDRGClassificationChange@cms.hhs.gov* by November 1, 2017.

In response to our solicitation for public comments on the MS–DRGs related to vaginal delivery, one commenter recommended that CMS convene a workgroup that would include hospital staff and physicians to systematically review the MDC 14 MS–DRGs and to identify which conditions should appropriately be considered complicating diagnoses. As an interim step, this commenter recommended that CMS consider the following suggestions as a result of its own evaluation of MS–DRGs 767, 774 and 775.

For MS–DRG 767, the commenter recommended that the following ICD–10–CM diagnosis codes and ICD–10–PCS procedure code be removed from the GROUPER logic and provided the rationale for why the commenter suggested removing each code.

SUGGESTIONS FOR MS–DRG 767

[Vaginal delivery with sterilization and/or D&C]

ICD–10–CM code	Code description	Rationale for removing code from MS–DRG 767
O66.41	Failed attempted vaginal birth after previous cesarean delivery.	This code indicates that the attempt at vaginal delivery has failed.
O71.00	Rupture of uterus before onset of labor, unspecified trimester.	This code indicates that the uterus has ruptured before onset of labor and therefore, a vaginal delivery would not be possible.
O82	Encounter for cesarean delivery without indication	This code indicates the encounter is for a cesarean delivery.
O75.82	Onset (spontaneous) of labor after 37 weeks of gestation but before 39 completed weeks, with delivery by (planned) C-section.	This code indicates this is a cesarean delivery.

SUGGESTIONS FOR MS–DRG 767

[Vaginal delivery with sterilization and/or D&C]

ICD–10–PCS code	Code description	Rationale for removing code from MS–DRG 767
10A07Z6	Abortion of products of conception, vacuum, via natural or artificial opening.	This code indicates the procedure to be an abortion rather than a vaginal delivery.

For MS–DRG 774, the commenter recommended that the following ICD–10–CM diagnosis codes be removed from the GROUPER logic and provided the rationale for why the commenter suggested removing each code.

SUGGESTIONS FOR MS–DRG 774

[Vaginal delivery with complicating diagnoses]

ICD–10–CM code	Code description	Rationale for removing code from MS–DRG 774
O66.41	Failed attempted vaginal birth after previous cesarean delivery.	This code indicates that the attempt at vaginal delivery has failed.
O71.00	Rupture of uterus before onset of labor, unspecified trimester.	This code indicates that the uterus has ruptured before onset of labor and therefore, a vaginal delivery would not be possible.
O75.82	Onset (spontaneous) of labor after 37 weeks of gestation but before 39 completed weeks, with delivery by (planned) C-section.	This code indicates this is a planned cesarean delivery.
O82	Encounter for cesarean delivery without indication	This code indicates the encounter is for a cesarean delivery.
O80	Encounter for full-term uncomplicated delivery	According to the Official Guidelines for Coding and Reporting, ''Code O80 should be assigned when a woman is admitted for a full term normal delivery and delivers a single, healthy infant without any complications antepartum, during the delivery, or postpartum during the delivery episode.''

For MS–DRG 775, the commenter recommended that the following ICD–10–CM diagnosis codes and ICD–10–PCS procedure code be removed from the GROUPER logic and provided the rationale for why the commenter suggested removing each code.

SUGGESTIONS FOR MS–DRG 775

[Vaginal delivery without complicating diagnoses]

ICD–10–CM code	Code description	Rationale for removing code from MS–DRG 775
O66.41	Failed attempted vaginal birth after previous cesarean delivery.	This code indicates that the attempt at vaginal delivery has failed.
O69.4XX0	Labor and delivery complicated by vasa previa, not applicable or unspecified.	According to the physicians consulted, vasa previa always results in C-section. Research indicates that when vasa previa is diagnosed, C-section before labor begins can save the baby's life.
O69.4XX2	Labor and delivery complicated by vasa previa, fetus 2.	According to the physicians consulted, vasa previa always results in C-section. Research indicates that when vasa previa is diagnosed, C-section before labor begins can save the baby's life.
O69.4XX3	Labor and delivery complicated by vasa previa, fetus 3.	According to the physicians consulted, vasa previa always results in C-section. Research indicates that when vasa previa is diagnosed, C-section before labor begins can save the baby's life.
O69.4XX4	Labor and delivery complicated by vasa previa, fetus 4.	According to the physicians consulted, vasa previa always results in C-section. Research indicates that when vasa previa is diagnosed, C-section before labor begins can save the baby's life.
O69.4XX5	Labor and delivery complicated by vasa previa, fetus 5.	According to the physicians consulted, vasa previa always results in C-section. Research indicates that when vasa previa is diagnosed, C-section before labor begins can save the baby's life.
O69.4XX9	Labor and delivery complicated by vasa previa, other fetus.	According to the physicians consulted, vasa previa always results in C-section. Research indicates that when vasa previa is diagnosed, C-section before labor begins can save the baby's life.
O71.00	Rupture of uterus before onset of labor, unspecified trimester.	This code indicates that the uterus has ruptured before onset of labor and therefore, a vaginal delivery would not be possible.
O82	Encounter for cesarean delivery without indication.	This code indicates the encounter is for a cesarean delivery.

SUGGESTIONS FOR MS–DRG 775

[Vaginal delivery without complicating diagnoses]

ICD–10–PCS code	Code description	Rationale for removing code from MS–DRG 775
10A07Z6	Abortion of Products of Conception, Vacuum, Via Natural or Artificial Opening.	This code indicates the procedure to be an abortion rather than a vaginal delivery.

Another commenter agreed that the MS–DRG logic for a vaginal delivery under MDC 14 is technically complex and provided examples to illustrate these facts. For instance, the commenter noted that the GROUPER logic code lists appear redundant with several of the same codes listed for different MS–DRGs and that the GROUPER logic code list for a vaginal delivery in MS–DRG 774 is comprised of diagnosis codes while the GROUPER logic code list for a vaginal delivery in MS–DRG 775 is comprised of procedure codes. The commenter also noted that several of the ICD–10–CM diagnosis codes shown in the table below that became effective with discharges on and after October 1, 2016 (FY 2017) or October 1, 2017 (FY 2018) appear to be missing from the GROUPER logic code lists for MS–DRGs 781 and 774.

ICD–10–CM code	Code description
O11.4	Pre-existing hypertension with pre-eclampsia, complicating childbirth.
O11.5	Pre-existing hypertension with pre-eclampsia, complicating the puerperium.
012.04	Gestational edema, complicating childbirth.
012.05	Gestational edema, complicating the puerperium.
012.14	Gestational proteinuria, complicating childbirth.
012.15	Gestational proteinuria, complicating the puerperium.
012.24	Gestational edema with proteinuria, complicating childbirth.
012.25	Gestational edema with proteinuria, complicating the puerperium.
O13.4	Gestational [pregnancy-induced] hypertension without significant proteinuria, complicating childbirth.
O13.5	Gestational [pregnancy-induced] hypertension without significant proteinuria, complicating the puerperium.
O14.04	Mild to moderate pre-eclampsia, complicating childbirth.
O14.05	Mild to moderate pre-eclampsia, complicating the puerperium.
O14.14	Severe pre-eclampsia complicating childbirth.
O14.15	Severe pre-eclampsia, complicating the puerperium.
O14.24	HELLP syndrome, complicating childbirth.
O14.25	HELLP syndrome, complicating the puerperium.
O14.94	Unspecified pre-eclampsia, complicating childbirth.
O14.95	Unspecified pre-eclampsia, complicating the puerperium.
O15.00	Eclampsia complicating pregnancy, unspecified trimester.
O15.02	Eclampsia complicating pregnancy, second trimester.

ICD–10–CM code	Code description
O15.03	Eclampsia complicating pregnancy, third trimester.
O15.1	Eclampsia complicating labor.
O15.2	Eclampsia complicating puerperium, second trimester.
O16.4	Unspecified maternal hypertension, complicating childbirth.
O16.5	Unspecified maternal hypertension, complicating the puerperium.
O24.415	Gestational diabetes mellitus in pregnancy, controlled by oral hypoglycemic drugs.
O24.425	Gestational diabetes mellitus in childbirth, controlled by oral hypoglycemic drugs.
O24.435	Gestational diabetes mellitus in puerperium, controlled by oral hypoglycemic drugs.
O44.20	Partial placenta previa NOS or without hemorrhage, unspecified trimester.
O44.21	Partial placenta previa NOS or without hemorrhage, first trimester.
O44.22	Partial placenta previa NOS or without hemorrhage, second trimester.
O44.23	Partial placenta previa NOS or without hemorrhage, third trimester.
O44.30	Partial placenta previa with hemorrhage, unspecified trimester.
O44.31	Partial placenta previa with hemorrhage, first trimester.
O44.32	Partial placenta previa with hemorrhage, second trimester.
O44.33	Partial placenta previa with hemorrhage, third trimester.
O44.40	Low lying placenta NOS or without hemorrhage, unspecified trimester.
O44.41	Low lying placenta NOS or without hemorrhage, first trimester.
O44.42	Low lying placenta NOS or without hemorrhage, second trimester.
O44.43	Low lying placenta NOS or without hemorrhage, third trimester.
O44.50	Low lying placenta with hemorrhage, unspecified trimester.
O44.51	Low lying placenta with hemorrhage, first trimester.
O44.52	Low lying placenta with hemorrhage, second trimester.
O44.53	Low lying placenta with hemorrhage, third trimester.
O70.20	Third degree perineal laceration during delivery, unspecified.
O70.21	Third degree perineal laceration during delivery, IIIa.
O70.22	Third degree perineal laceration during delivery, IIIb.
O70.23	Third degree perineal laceration during delivery, IIIc.
O86.11	Cervicitis following delivery.
O86.12	Endometritis following delivery.
O86.13	Vaginitis following delivery.
O86.19	Other infection of genital tract following delivery.
O86.20	Urinary tract infection following delivery, unspecified.
O86.21	Infection of kidney following delivery.
O86.22	Infection of bladder following delivery.
O86.29	Other urinary tract infection following delivery.
O86.81	Puerperal septic thrombophlebitis.
O86.89	Other specified puerperal infections.

Lastly, the commenter stated that the list of ICD–10–PCS procedure codes appears comprehensive, but indicated that inpatient coding is not their expertise. We note that it was not clear which list of procedure codes the commenter was specifically referencing. The commenter did not provide a list of any procedure codes for CMS to review or reference a specific MS–DRG in its comment.

Another commenter expressed concern that ICD–10–PCS procedure codes 10D17Z9 (Manual extraction of products of conception, retained, via natural or artificial opening) and 10D18Z9 (Manual extraction of products of conception, retained, via natural or artificial opening endoscopic) are not assigned to the appropriate MS–DRG. ICD–10–PCS procedure codes 10D17Z9 and 10D18Z9 describe the manual removal of a retained placenta and are currently assigned to MS–DRG 767 (Vaginal Delivery with Sterilization and/or D&C). According to the commenter, a patient that has a vaginal delivery with manual removal of a retained placenta is not having a sterilization or D&C procedure. The commenter noted that, under ICD–9–CM, a vaginal delivery with manual removal of retained placenta grouped to MS–DRG 774 (Vaginal Delivery with Complicating Diagnosis) or MS–DRG 775 (Vaginal Delivery without Complicating Diagnosis). The commenter suggested CMS review these procedure codes for appropriate MS–DRG assignment under the ICD–10 MS–DRGs.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20217), we thanked the commenters and stated that we appreciated the recommendations and suggestions provided in response to our solicitation for comments on the GROUPER logic for the MS–DRGs involving a vaginal delivery or complicating diagnosis under MDC 14. With regard to the commenter who recommended that we convene a workgroup that would include hospital staff and physicians to systematically review the MDC 14 MS–DRGs and to identify which conditions should appropriately be considered complicating diagnoses, we noted that we formed an internal workgroup comprised of clinical advisors that included physicians, coding specialists, and other IPPS policy staff that assisted in our review of the GROUPER logic for a vaginal delivery and complicating diagnoses. We indicated that we also received clinical input from 3M/Health Information Systems (HIS) staff, which, under contract with CMS, is responsible for updating and maintaining the GROUPER program. We note that our analysis involved other MS–DRGs under MDC 14, in addition to those for which we specifically solicited public comments. As one of the other commenters correctly pointed out, there is redundancy, with several of the same codes listed for different MS–DRGs. Below we provide a summary of our internal analysis with responses to the commenters' recommendations and suggestions incorporated into the applicable sections. We referred readers to the ICD–10 MS–DRG Version 35 Definitions Manual located via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/*

AcuteInpatientPPS/FY2018-IPPS-Final-Rule-Home-Page-Items/FY2018-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending for documentation of the GROUPER logic associated with the MDC 14 MS–DRGs to assist in the review of our discussion that follows.

We started our evaluation of the GROUPER logic for the MS–DRGs under MDC 14 by first reviewing the current concepts that exist. For example, there are ''groups'' for cesarean section procedures, vaginal delivery procedures, and abortions. There also are groups where no delivery occurs, and lastly, there are groups for after the delivery occurs, or the ''postpartum'' period. These groups are then further subdivided based on the presence or absence of complicating conditions or the presence of another procedure. We examined how we could simplify some of the older, complex GROUPER logic and remain consistent with the structure of other ICD–10 MS–DRGs. We identified the following MS–DRGs for closer review, in addition to MS–DRG 767, MS–DRG 768, MS–DRG 774, MS–DRG 775 and MS–DRG 781.

MS–DRG	Description
MS–DRG 765	Cesarean Section with CC/MCC.
MS–DRG 766	Cesarean Section without CC/MCC.
MS–DRG 769	Postpartum and Post Abortion Diagnoses with O.R. Procedure.
MS–DRG 770	Abortion with D&C, Aspiration Curettage or Hysterotomy.
MS–DRG 776	Postpartum and Post Abortion Diagnoses without O.R. Procedure.
MS–DRG 777	Ectopic Pregnancy.
MS–DRG 778	Threatened Abortion.
MS–DRG 779	Abortion without D&C.
MS–DRG 780	False Labor.
MS–DRG 782	Other Antepartum Diagnoses without Medical Complications.

The first issue we reviewed was the GROUPER logic for complicating conditions (MS–DRGs 774 and 781). Because one of the main objectives in our transition to the MS–DRGs was to better recognize the severity of illness of a patient, we believed we could structure the vaginal delivery and other MDC 14 MS–DRGs in a similar way. Therefore, we began working with the concept of vaginal delivery ''with MCC, with CC and without CC/MCC'' to replace the older, ''complicating conditions'' logic.

Next, we compared the additional GROUPER logic that exists between the vaginal delivery and the cesarean section MS–DRGs (MS–DRGs 765, 766, 767, 774, and 775). Currently, the vaginal delivery MS–DRGs take into account a sterilization procedure; however, the cesarean section MS–DRGs do not. Because a patient can have a sterilization procedure performed along with a cesarean section procedure, we adopted a working concept of ''cesarean section with and without sterilization with MCC, with CC and without CC/MCC'', as well as ''vaginal delivery with and without sterilization with MCC, with CC and without CC/MCC''.

We then reviewed the GROUPER logic for the MS–DRGs involving abortion and where no delivery occurs (MS–DRGs 770, 777, 778, 779, 780, and 782). We believed that we could consolidate the groups in which no delivery occurs.

Finally, we considered the GROUPER logic for the MS–DRGs related to the postpartum period (MS–DRGs 769 and 776) and determined that the structure of these MS–DRGs did not appear to require modification.

After we established those initial working concepts for the MS–DRGs discussed above, we examined the list of the ICD–10–PCS procedure codes that comprise the sterilization procedure GROUPER logic for the vaginal delivery MS–DRG 767. We identified the two manual extraction of placenta codes that the commenter had brought to our attention (ICD–10–PCS codes 10D17Z9 and 10D18Z9). We also identified two additional procedure codes, ICD–10–PCS codes 10D17ZZ (Extraction of products of conception, retained, via natural or artificial opening) and 10D18ZZ (Extraction of products of conception, retained, via natural or artificial opening endoscopic) in the list that are not sterilization procedures. Two of the four procedure codes describe manual extraction (removal) of retained placenta and the other two procedure codes describe dilation and curettage procedures. We then identified four more procedure codes in the list that do not describe sterilization procedures. ICD–10–PCS procedure codes 0UDB7ZX (Extraction of endometrium, via natural or artificial opening, diagnostic), 0UDB7ZZ (Extraction of endometrium, via natural or artificial opening), 0UDB8ZX (Extraction of endometrium, via natural or artificial opening endoscopic, diagnostic), and 0UDB8ZZ (Extraction of endometrium, via natural or artificial opening endoscopic) describe dilation and curettage procedures that can be performed for diagnostic or therapeutic purposes. We stated in the proposed rule that we believe that these ICD–10–PCS procedure codes would be more appropriately assigned to MDC 13 (Diseases and Disorders of the Female Reproductive System) in MS–DRGs 744 and 745 (D&C, Conization, Laparaoscopy and Tubal Interruption with and without CC/MCC, respectively) and, therefore, removed them from our working list of sterilization and/or D&C procedures. Because the GROUPER logic for MS–DRG 767 includes both sterilization and/or D&C, we agreed that all the other procedure codes currently included under that logic list of sterilization procedures should remain, with the exception of the two identified by the commenter. Therefore, in the proposed rule, we stated we agreed with the commenter that the manual extraction of retained placenta procedure codes should be reassigned to a more clinically appropriate vaginal delivery MS–DRG because they are not describing sterilization procedures.

Our attention then turned to other MDC 14 GROUPER logic code lists starting with the ''CC for C-section'' list under MS–DRGs 765 and 766 (Cesarean Section with and without CC/MCC, respectively). As noted in the proposed rule and earlier in this section, in conducting our review, we considered how we could utilize the severity level concept (with MCC, with CC, and without CC/MCC) where applicable. Consistent with this approach, we removed the ''CC for C-section'' logic from these MS–DRGs as part of our working concept and efforts to refine MDC 14. We determined it would be less complicated to simply allow the existing ICD–10 MS–DRG CC and MCC

code list logic to apply for these MS–DRGs. Next, we reviewed the logic code lists for ''Malpresentation'' and ''Twins'' and concluded that this logic was not necessary for the cesarean section MS–DRGs because these are describing antepartum conditions and it is the procedure of the cesarean section that determines whether or not a patient would be classified to these MS–DRGs. Therefore, those code lists were also removed for purposes of our working concept. With regard to the ''Operating Room Procedure'' code list, we stated in the proposed rule that we agreed there should be no changes. However, we noted that the title to ICD–10–PCS procedure code 10D00Z0 (Extraction of products of conception, classical, open approach) is being revised, effective October 1, 2018, to replace the term ''classical'' with ''high'' and ICD–10–PCS procedure code 10D00Z1 (Extraction of products of conception, low cervical, open approach) is being revised to replace the term ''low cervical'' to ''low''. These revisions are also shown in Table 6F—Revised Procedure Code Titles associated with the proposed rule and this final rule available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

Next, we reviewed the ''Delivery Procedure'' and ''Delivery Outcome'' GROUPER logic code lists for the vaginal delivery MS–DRGs 767, 768, 774, and 775. We identified ICD–10–PCS procedure code 10A0726 (Abortion of products of conception, vacuum, via natural or artificial opening) and ICD–10–PCS procedure code 10S07ZZ (Reposition products of conception, via natural or artificial opening) under the ''Delivery Procedure'' code list as procedure codes that should not be included because ICD–10–PCS procedure code 10A07Z6 describes an abortion procedure and ICD–10–PCS procedure code 10S07ZZ describes repositioning of the fetus and does not indicate a delivery took place. We also noted that, as described in the proposed rule and earlier in this discussion, a commenter recommended that ICD–10–PCS procedure code 10A07Z6 be removed from the GROUPER logic specifically for MS–DRGs 767 and 775. Therefore, we removed these two procedure codes from the logic code list for ''Delivery Procedure'' in MS–DRGs 767, 768, 774, and 775. We stated in the proposed rule that we agreed with the commenter that ICD–10–PCS procedure code 10A07Z6 would be more appropriately assigned to one of the Abortion MS–DRGs. For the remaining procedures currently included in the ''Delivery Procedure'' code list we considered which procedures would be expected to be performed during the course of a standard, uncomplicated delivery episode versus those that would reasonably be expected to require additional resources outside of the delivery room. The list of procedure codes we reviewed is shown in the following table.

ICD–10–PCS code	Code description
0DQP7ZZ	Repair rectum, via natural or artificial opening.
0DQQ0ZZ	Repair anus, open approach.
0DQQ3ZZ	Repair anus, percutaneous approach.
0DQQ4ZZ	Repair anus, percutaneous endoscopic approach.
0DQQ7ZZ	Repair anus, via natural or artificial opening.
0DQQ8ZZ	Repair anus, via natural or artificial opening endoscopic.
0DQR0ZZ	Repair anal sphincter, open approach.
0DQR3ZZ	Repair anal sphincter, percutaneous approach.
0DQR4ZZ	Repair anal sphincter, percutaneous endoscopic approach.

While we acknowledged that these procedures may be performed to treat obstetrical lacerations as discussed in prior rulemaking (81 FR 56853), we stated that we also believe that these procedures would reasonably be expected to require a separate operative episode and would not be performed immediately at the time of the delivery. Therefore, we removed those procedure codes describing repair of the rectum, anus, and anal sphincter shown in the table above from our working concept list of procedures to consider for a vaginal delivery. Our review of the list of diagnosis codes for the ''Delivery Outcome'' as a secondary diagnosis did not prompt any changes. We stated in the proposed rule we agreed that the current list of diagnosis codes continues to appear appropriate for describing the outcome of a delivery.

As the purpose of our analysis and this review was to clarify what constitutes a vaginal delivery to satisfy the ICD–10 MS–DRG logic for the vaginal delivery MS–DRGs, we believed it was appropriate to expect that a procedure code describing the vaginal delivery or extraction of ''products of conception'' procedure and a diagnosis code describing the delivery outcome should be reported on every claim in which a vaginal delivery occurs. This is also consistent with Section I.C.15.b.5 of the ICD–10–CM Official Guidelines for Coding and Reporting, which states ''A code from category Z37, Outcome of delivery, should be included on every maternal record when a delivery has occurred. These codes are not to be used on subsequent records or on the newborn record.'' Therefore, we adopted the working concept that, regardless of the principal diagnosis, if there is a procedure code describing the vaginal delivery or extraction of ''products of conception'' procedure and a diagnosis code describing the delivery outcome, this logic would result in assignment to a vaginal delivery MS–DRG. In the proposed rule, we noted that, as a result of this working concept, there would no longer be a need to maintain the ''third condition'' list under MS–DRG 774. In addition, as noted in the proposed rule and earlier in this discussion, because we were working with the concept of vaginal delivery ''with MCC, with CC, and without CC/MCC'' to replace the older, ''complicating conditions'' logic, there would no longer be a need to maintain the ''second condition'' list of complicating diagnosis under MS–DRG 774.

We then reviewed the GROUPER logic code list of ''Or Other O.R. procedures'' (MS–DRG 768) to determine if any changes to these lists were warranted. Similar to our analysis of the procedures listed under the ''Delivery Procedure'' logic code list, our examination of the procedures currently described in the ''Or Other O.R. procedures'' procedure code list also considered which procedures would be expected to be

performed during the course of a standard, uncomplicated delivery episode versus those that would reasonably be expected to require additional resources outside of the delivery room. Our analysis of all the procedures resulted in the working concept to allow all O.R. procedures to be applicable for assignment to MS–DRG 768, with the exception of the procedure codes for sterilization and/or D&C and ICD–10–PCS procedure codes 0KQM0ZZ (Repair perineum muscle, open approach) and 0UJM0ZZ (Inspection of vulva, open approach), which we determined would be reasonably expected to be performed during a standard delivery episode and, therefore, assigned to MS–DRG 774 or MS–DRG 775. We also noted that, this working concept for MS–DRG 768 would eliminate vaginal delivery cases with an O.R. procedure grouping to the unrelated MS–DRGs because all O.R. procedures would be included in the GROUPER logic procedure code list for ''Or Other O.R. Procedures''.

The next set of MS–DRGs we examined more closely included MS–DRGs 777, 778, 780, 781, and 782. We believed that, because the conditions in these MS–DRGs are all describing antepartum related conditions, we could group the conditions together clinically. Diagnoses described as occurring during pregnancy and diagnoses specifying a trimester or maternal care in the absence of a delivery procedure reported were considered antepartum conditions. We also believed we could better classify these groups of patients based on the presence or absence of a procedure. Therefore, we worked with the concept of ''antepartum diagnoses with and without O.R. procedure''.

As noted in the proposed rule and earlier in the discussion, we adopted a working concept of ''cesarean section with and without sterilization with MCC, with CC, and without CC/MCC.'' This concept is illustrated in the following table and includes our suggested modifications.

SUGGESTED MODIFICATIONS TO MS–DRGS FOR MDC 14

[Pregnancy, childbirth and the puerperium]

DELETE 2 MS–DRGs:
- MS–DRG 765 (Cesarean Section with CC/MCC).
- MS–DRG 766 (Cesarean Section without CC/MCC).

CREATE 6 MS–DRGs:
- MS–DRG XXX (Cesarean Section with Sterilization with MCC).
- MS–DRG XXX (Cesarean Section with Sterilization with CC).
- MS–DRG XXX (Cesarean Section with Sterilization without CC/MCC).
- MS–DRG XXX (Cesarean Section without Sterilization with MCC).
- MS–DRG XXX (Cesarean Section without Sterilization with CC).
- MS–DRG XXX (Cesarean Section without Sterilization without CC/MCC).

As shown in the table, we suggested deleting MS–DRGs 765 and 766. We also suggested creating 6 new MS–DRGs that are subdivided by a 3-way severity level split that includes ''with Sterilization'' and ''without Sterilization''.

We also adopted a working concept of ''vaginal delivery with and without sterilization with MCC, with CC, and without CC/MCC''. This concept is illustrated in the following table and includes our suggested modifications.

SUGGESTED MODIFICATIONS TO MS–DRGS FOR MDC 14

[Pregnancy, childbirth and the puerperium]

DELETE 3 MS–DRGs:
- MS–DRG 767 (Vaginal Delivery with Sterilization and/or D&C).
- MS–DRG 774 (Vaginal Delivery with Complicating Diagnosis).
- MS–DRG 775 (Vaginal Delivery without Complicating Diagnosis).

CREATE 6 MS–DRGs:
- MS–DRG XXX (Vaginal Delivery with Sterilization/D&C with MCC).
- MS–DRG XXX (Vaginal Delivery with Sterilization/D&C with CC).
- MS–DRG XXX (Vaginal Delivery with Sterilization/D&C without CC/MCC).
- MS–DRG XXX (Vaginal Delivery without Sterilization/D&C with MCC).
- MS–DRG XXX (Vaginal Delivery without Sterilization/D&C with CC).
- MS–DRG XXX (Vaginal Delivery without Sterilization/D&C without CC/MCC).

As shown in the table, we suggested deleting MS–DRGs 767, 774, and 775. We also suggested creating 6 new MS–DRGs that are subdivided by a 3-way severity level split that includes ''with Sterilization/D&C'' and ''without Sterilization/D&C''.

In addition, as indicated above, we believed that we could consolidate the groups in which no delivery occurs. In the proposed rule, we stated we believe that consolidating MS–DRGs where clinically coherent conditions exist is consistent with our approach to MS–DRG reclassification and our continued refinement efforts. This concept is illustrated in the following table and includes our suggested modifications.

SUGGESTED MODIFICATIONS TO MS–DRGS FOR MDC 14

[Pregnancy, childbirth and the puerperium]

DELETE 5 MS–DRGs:
- MS–DRG 777 (Ectopic Pregnancy).
- MS–DRG 778 (Threatened Abortion).
- MS–DRG 780 (False Labor).
- MS–DRG 781 (Other Antepartum Diagnoses with Medical Complications).
- MS–DRG 782 (Other Antepartum Diagnoses without Medical Complications).

CREATE 6 MS–DRGs:
- MS–DRG XXX (Other Antepartum Diagnoses with O.R. Procedure with MCC).
- MS–DRG XXX (Other Antepartum Diagnoses with O.R. Procedure with CC).
- MS–DRG XXX (Other Antepartum Diagnoses with O.R. Procedure without CC/MCC).
- MS–DRG XXX (Other Antepartum Diagnoses without O.R. Procedure with MCC).
- MS–DRG XXX (Other Antepartum Diagnoses without O.R. Procedure with CC).
- MS–DRG XXX (Other Antepartum Diagnoses without O.R. Procedure without CC/MCC).

As shown in the table, we suggested deleting MS–DRGs 777, 778, 780, 781, and 782. We also suggested creating 6 new MS–DRGs that are subdivided by a 3-way severity level split that includes ''with O.R. Procedure'' and ''without O.R. Procedure''.

Once we established each of these fundamental concepts from a clinical perspective, we were able to analyze the data to determine if our initial suggested modifications were supported.

To analyze our suggested modifications for the cesarean section and vaginal delivery MS–DRGs, we examined the claims data from the September 2017 update of the FY 2017 MedPAR file for MS–DRGs 765, 766, 767, 768, 774, and 775.

MS–DRGS FOR MDC 14 PREGNANCY, CHILDBIRTH AND THE PUERPERIUM

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 765 (Cesarean Section with CC/MCC)—All cases	3,494	4.6	$8,929
MS–DRG 766 (Cesarean Section without CC/MCC)—All cases	1,974	3.1	6,488
MS–DRG 767 (Vaginal Delivery with Sterilization and/or D&C)—All cases	351	3.2	7,886
MS–DRG 768 (Vaginal Delivery with O.R. Procedure Except Sterilization and/or D&C)—All cases	17	6.2	26,164

MS–DRGS FOR MDC 14 PREGNANCY, CHILDBIRTH AND THE PUERPERIUM—Continued

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 774 (Vaginal Delivery with Complicating Diagnosis)—All cases	1,650	3.3	6,046
MS–DRG 775 (Vaginal Delivery without Complicating Diagnosis)—All cases	4,676	2.4	4,769

As shown in the table, there were a total of 3,494 cases in MS–DRG 765, with an average length of stay of 4.6 days and average costs of $8,929. For MS–DRG 766, there were a total of 1,974 cases, with an average length of stay of 3.1 days and average costs of $6,488. For MS–DRG 767, there were a total of 351 cases, with an average length of stay of 3.2 days and average costs of $ 7,886. For MS–DRG 768, there were a total of 17 cases, with an average length of stay of 6.2 days and average costs of $26,164. For MS–DRG 774, there were a total of 1,650 cases, with an average length of stay of 3.3 days and average costs of $6,046. Lastly, for MS–DRG 775, there were a total of 4,676 cases, with an average length of stay of 2.4 days and average costs of $4,769.

To compare and analyze the impact of our suggested modifications, we ran a simulation using the Version 35 ICD–10 MS–DRG GROUPER. The following table reflects our findings for the suggested Cesarean Section MS–DRGs with a 3-way severity level split.

SUGGESTED MS–DRGS FOR CESAREAN SECTION

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 783 (Cesarean Section with Sterilization with MCC)	178	6.4	$12,977
MS–DRG 784 (Cesarean Section with Sterilization with CC)	511	4.1	8,042
MS–DRG 785 (Cesarean Section with Sterilization without CC/MCC)	475	3.0	6,259
MS–DRG 786 (Cesarean Section without Sterilization with MCC)	707	5.9	11,515
MS–DRG 787 (Cesarean Section without Sterilization with CC)	1,887	4.2	7,990
MS–DRG 788 (Cesarean Section without Sterilization without CC/MCC)	1,710	3.3	6,663

As shown in the table, there were a total of 178 cases for the cesarean section with sterilization with MCC group, with an average length of stay of 6.4 days and average costs of $12,977. There were a total of 511 cases for the cesarean section with sterilization with CC group, with an average length of stay of 4.1 days and average costs of $8,042. There were a total of 475 cases for the cesarean section with sterilization without CC/MCC group, with an average length of stay of 3.0 days and average costs of $6,259. For the cesarean section without sterilization with MCC group there were a total of 707 cases, with an average length of stay of 5.9 days and average costs of $11,515. There were a total of 1,887 cases for the cesarean section without sterilization with CC group, with an average length of stay of 4.2 days and average costs of $7,990. Lastly, there were a total of 1,710 cases for the cesarean section without sterilization without CC/MCC group, with an average length of stay of 3.3 days and average costs of $6,663.

The following table reflects our findings for the suggested Vaginal Delivery MS–DRGs with a 3-way severity level split.

SUGGESTED MS–DRGS FOR VAGINAL DELIVERY

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 796 (Vaginal Delivery with Sterilization/D&C with MCC)	25	6.7	$11,421
MS–DRG 797 (Vaginal Delivery with Sterilization/D&C with CC)	63	2.4	6,065
MS–DRG 798 (Vaginal Delivery with Sterilization/D&C without CC/MCC)	126	2.3	6,697
MS–DRG 805 (Vaginal Delivery without Sterilization/D&C with MCC)	406	5.0	9,605
MS–DRG 806 (Vaginal Delivery without Sterilization/D&C with CC)	1,952	2.9	5,506
MS–DRG 807 (Vaginal Delivery without Sterilization/D&C without CC/MCC)	4,105	2.3	4,601

As shown in the table, there were a total of 25 cases for the vaginal delivery with sterilization/D&C with MCC group, with an average length of stay of 6.7 days and average costs of $11,421. There were a total of 63 cases for the vaginal delivery with sterilization/D&C with CC group, with an average length of stay of 2.4 days and average costs of $6,065. There were a total of 126 cases for vaginal delivery with sterilization/D&C without CC/MCC group, with an average length of stay of 2.3 days and average costs of $6,697. There were a total of 406 cases for the vaginal delivery without sterilization/D&C with MCC group, with an average length of stay of 5.0 days and average costs of $9,605. There were a total of 1,952 cases for the vaginal delivery without sterilization/D&C with CC group, with an average length of stay of 2.9 days and average costs of $5,506. There were a total of 4,105 cases for the vaginal delivery without sterilization/D&C without CC/MCC group, with an average length of stay of 2.3 days and average costs of $4,601.

We then reviewed the claims data from the September 2017 update of the FY 2017 MedPAR file for MS–DRGs 777, 778, 780, 781, and 782. Our findings are shown in the following table.

MS–DRGS FOR MDC 14 PREGNANCY, CHILDBIRTH AND THE PUERPERIUM

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 777 (Ectopic Pregnancy)—All cases	72	1.9	$7,149
MS–DRG 778 (Threatened Abortion)—All cases	205	2.7	4,001
MS–DRG 780 (False Labor)—All cases	41	2.1	3,045
MS–DRG 781 (Other Antepartum Diagnoses with Medical Complications)—All cases	2,333	3.7	5,817
MS–DRG 782 (Other Antepartum Diagnoses without Medical Complications)—All cases	70	2.1	3,381

As shown in the table, there were a total of 72 cases in MS–DRG 777, with an average length of stay of 1.9 days and average costs of $7,149. For MS–DRG 778, there were a total of 205 cases, with an average length of stay of 2.7 days and average costs of $4,001. For MS–DRG 780, there were a total of 41 cases, with an average length of stay of 2.1 days and average costs of $3,045. For MS–DRG 781, there were a total of 2,333 cases, with an average length of stay of 3.7 days and average costs of $5,817. Lastly, for MS–DRG 782, there were a total of 70 cases, with an average length of stay of 2.1 days and average costs of $3,381.

To compare and analyze the impact of deleting those 5 MS–DRGs and creating 6 new MS–DRGs, we ran a simulation using the Version 35 ICD–10 MS–DRG GROUPER. Our findings below represent what we found and would expect under the suggested modifications. The following table reflects the MS–DRGs for the suggested Other Antepartum Diagnoses MS–DRGs with a 3-way severity level split.

SUGGESTED MS–DRGS FOR OTHER ANTEPARTUM DIAGNOSES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 817 (Other Antepartum Diagnoses with O.R. Procedure with MCC)	60	5.1	$13,117
MS–DRG 818 (Other Antepartum Diagnoses with O.R. Procedure with CC)	66	4.2	10,483
MS–DRG 819 (Other Antepartum Diagnoses with O.R. Procedure without CC/MCC)	44	1.7	5,904
MS–DRG 831 (Other Antepartum Diagnoses without O.R. Procedure with MCC)	786	4.3	7,248
MS–DRG 832 (Other Antepartum Diagnoses without O.R. Procedure with CC)	910	3.5	4,994
MS–DRG 833 (Other Antepartum Diagnoses without O.R. Procedure without CC/MCC)	855	2.7	3,843

Our analysis of claims data from the September 2017 update of the FY 2017 MedPAR file recognized that when the criteria to create subgroups were applied for the 3-way severity level splits for the suggested MS–DRGs, those criteria were not met in all instances. For example, the criteria that there are at least 500 cases in the MCC or CC group was not met for the suggested Vaginal Delivery with Sterilization/D&C 3-way severity level split or the suggested Other Antepartum Diagnoses with O.R. Procedure 3-way severity level split.

However, as we have noted in prior rulemaking (72 FR 47152), we cannot adopt the same approach to refine the maternity and newborn MS–DRGs because of the extremely low volume of Medicare patients there are in these DRGs. While there is not a high volume of these cases represented in the Medicare data, and while we generally advise that other payers should develop MS–DRGs to address the needs of their patients, we believe that our suggested 3-way severity level splits would address the complexity of the current MDC 14 GROUPER logic for a vaginal delivery and takes into account the new and different clinical concepts that exist under ICD–10 for this subset of patients while also maintaining the existing MS–DRG structure for identifying severity of illness, utilization of resources and complexity of service.

However, as an alternative option, we also performed analysis for a 2-way severity level split for the suggested MS–DRGs. Our findings are shown in the following tables.

SUGGESTED MS–DRGS FOR CESAREAN SECTION

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG XXX (Cesarean Section with Sterilization with CC/MCC)	689	4.7	$9,317
MS–DRG XXX (Cesarean Section with Sterilization without CC/MCC)	475	3.0	6,259
MS–DRG XXX (Cesarean Section without Sterilization with MCC)	2,594	4.7	8,951
MS–DRG XXX (Cesarean Section without Sterilization without CC/MCC)	1,710	3.3	6,663

SUGGESTED MS–DRGS FOR VAGINAL DELIVERY

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG XXX (Vaginal Delivery with Sterilization/D&C with CC/MCC)	88	3.6	$7,586
MS–DRG XXX (Vaginal Delivery with Sterilization/D&C without CC/MCC)	126	2.3	6,697
MS–DRG XXX (Vaginal Delivery without Sterilization/D&C with MCC)	2,358	3.2	6,212
MS–DRG XXX (Vaginal Delivery without Sterilization/D&C without CC/MCC)	4,105	2.3	4,601

SUGGESTED MS–DRGS FOR OTHER ANTEPARTUM DIAGNOSES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG XXX (Other Antepartum Diagnoses with O.R. Procedure with MCC)	126	4.7	$11,737
MS–DRG XXX (Other Antepartum Diagnoses with O.R. Procedure without CC/MCC)	44	1.7	5,904
MS–DRG XXX (Other Antepartum Diagnoses without O.R. Procedure with MCC)	1,696	3.9	6,039
MS–DRG XXX (Other Antepartum Diagnoses without O.R. Procedure without CC/MCC)	855	2.7	3,843

Similar to the analysis performed for the 3-way severity level split, we acknowledged that when the criteria to create subgroups was applied for the alternative 2-way severity level splits for the suggested MS–DRGs, those criteria were not met in all instances. For example, the suggested Vaginal Delivery with Sterilization/D&C and the Other Antepartum Diagnoses with O.R. Procedure alternative option 2-way severity level splits did not meet the criteria for 500 or more cases in the MCC or CC group.

Based on our review, which included support from our clinical advisors, and the analysis of claims data described above, in the FY 2019 IPPS/LTCH PPS proposed rule, we proposed the deletion of 10 MS–DRGs and the creation of 18 new MS–DRGs (as shown below). This proposal was based on the approach described above, which involves consolidating specific conditions and concepts into the structure of existing logic and making additional modifications, such as adding severity levels, as part of our refinement efforts for the ICD–10 MS–DRGs. We indicated in the proposed rule that our proposals are intended to address the vaginal delivery ''complicating diagnosis'' logic and antepartum diagnoses with ''medical complications'' logic with the proposed addition of the existing and familiar severity level concept (with MCC, with CC, and without CC/MCC) to the MDC 14 MS–DRGs to provide the ability to distinguish the varying resource requirements for this subset of patients and allow the opportunity to make more meaningful comparisons with regard to severity across the MS–DRGs. We stated that our proposals, as set forth below, would also simplify the vaginal delivery procedure logic that we identified and commenters acknowledged as technically complex by eliminating the extensive diagnosis and procedure code lists for several conditions that must be met for assignment to the vaginal delivery MS–DRGs. We stated that our proposals also are intended to respond to issues identified and brought to our attention through public comments for consideration in updating the GROUPER logic code lists in MDC 14.

Specifically, we proposed to delete the following 10 MS–DRGs under MDC 14:

- MS–DRG 765 (Cesarean Section with CC/MCC);
- MS–DRG 766 (Cesarean Section without CC/MCC);
- MS–DRG 767 (Vaginal Delivery with Sterilization and/or D&C);
- MS–DRG 774 (Vaginal Delivery with Complicating Diagnosis);
- MS–DRG 775 (Vaginal Delivery without Complicating Diagnosis);
- MS–DRG 777 (Ectopic Pregnancy);
- MS–DRG 778 (Threatened Abortion);
- MS–DRG 780 (False Labor);
- MS–DRG 781 (Other Antepartum Diagnoses with Medical Complications); and
- MS–DRG 782 (Other Antepartum Diagnoses without Medical Complications).

We proposed to create the following new 18 MS–DRGs under MDC 14:

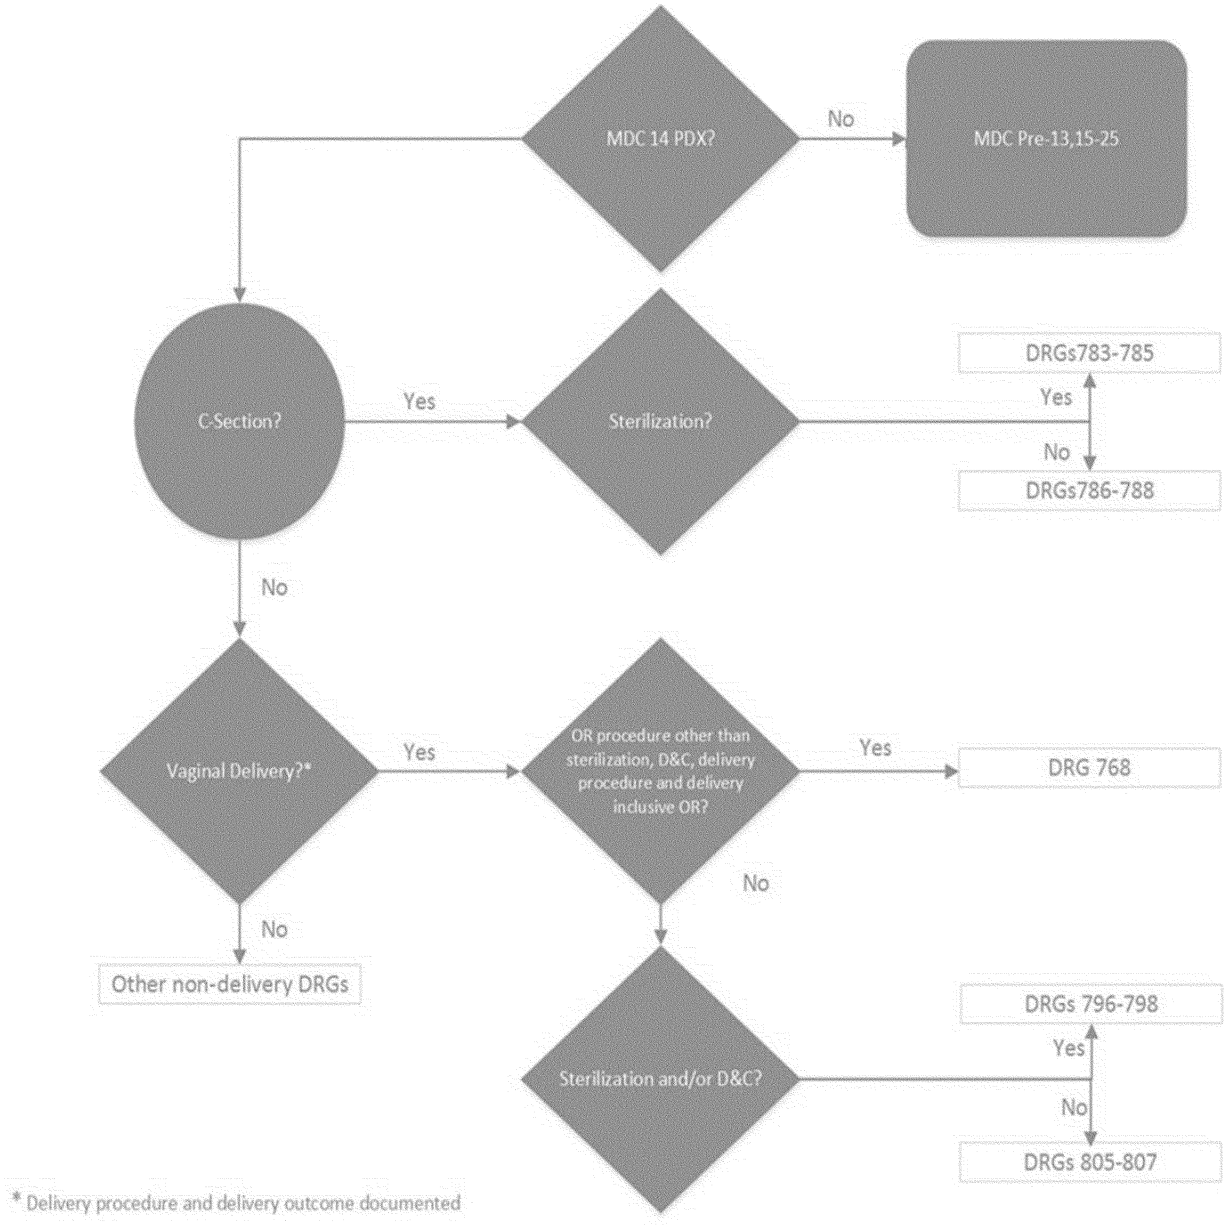
- Proposed new MS–DRG 783 (Cesarean Section with Sterilization with MCC);
- Proposed new MS–DRG 784 (Cesarean Section with Sterilization with CC);
- Proposed new MS–DRG 785 (Cesarean Section with Sterilization without CC/MCC);
- Proposed new MS–DRG 786 (Cesarean Section without Sterilization with MCC);
- Proposed new MS–DRG 787 (Cesarean Section without Sterilization with CC);
- Proposed new MS–DRG 788 Cesarean Section without Sterilization without CC/MCC);
- Proposed new MS–DRG 796 (Vaginal Delivery with Sterilization/D&C with MCC);
- Proposed new MS–DRG 797 (Vaginal Delivery with Sterilization/D&C with CC);
- Proposed new MS–DRG 798 (Vaginal Delivery with Sterilization/D&C without CC/MCC);
- Proposed new MS–DRG 805 (Vaginal Delivery without Sterilization/D&C with MCC);
- Proposed new MS–DRG 806 (Vaginal Delivery without Sterilization/D&C with CC);
- Proposed new MS–DRG 807 (Vaginal Delivery without Sterilization/D&C without CC/MCC);
- Proposed new MS–DRG 817 (Other Antepartum Diagnoses with O.R. Procedure with MCC);
- Proposed new MS–DRG 818 (Other Antepartum Diagnoses with O.R. Procedure with CC);
- Proposed new MS–DRG 819 (Other Antepartum Diagnoses with O.R. Procedure without CC/MCC);
- Proposed new MS–DRG 831 (Other Antepartum Diagnoses without O.R. Procedure with MCC);
- Proposed new MS–DRG 832 (Other Antepartum Diagnoses without O.R. Procedure with CC); and
- Proposed new MS–DRG 833 (Other Antepartum Diagnoses without O.R. Procedure without CC/MCC).

The diagrams below illustrate how the proposed MS–DRG logic for MDC 14 would function. The first diagram (Diagram 1.) begins by asking if there is a principal diagnosis from MDC 14. If no, the GROUPER logic directs the case to the appropriate MDC based on the principal diagnosis reported. Next, the logic asks if there is a cesarean section procedure reported on the claim. If yes, the logic asks if there was a sterilization procedure reported on the claim. If yes, the logic assigns the case to one of the proposed new MS–DRGs 783, 784, or 785. If no, the logic assigns the case to one of the proposed new MS–DRGs 786, 787, or 788. If there was not a cesarean section procedure reported on the claim, the logic asks if there was a vaginal delivery procedure reported on the claim. If yes, the logic asks if there was another O.R. procedure other than sterilization, D&C, delivery procedure or a delivery inclusive O.R. procedure. If yes, the logic assigns the case to existing MS–DRG 768. If no, the logic asks if there was a sterilization and/or D&C reported on the claim. If yes, the logic assigns the case to one of the proposed new MS–DRGs 796, 797, or 798. If no, the logic assigns the case to one of the proposed new MS–DRGs 805, 806, or 807. If there was not a vaginal delivery procedure reported on the claim, the GROUPER logic directs you to the other

non-delivery MS–DRGs as shown in Diagram 2.

BILLING CODE 4120–01–P

Diagram 1.

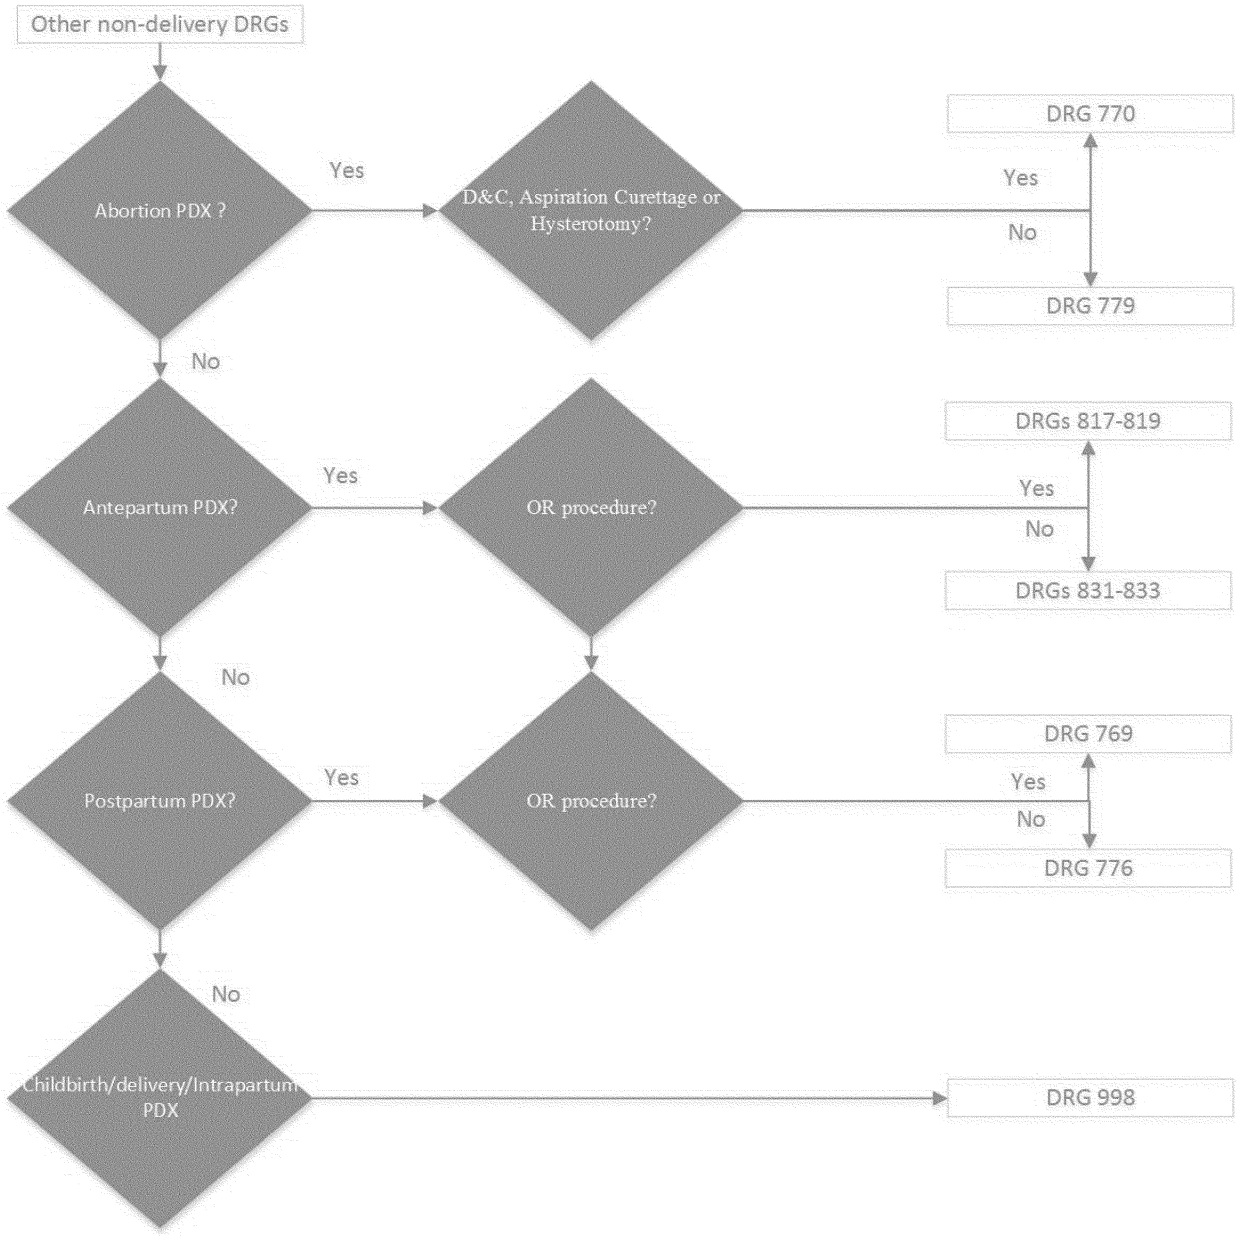


The logic for Diagram 2. begins by asking if there is a principal diagnosis of abortion reported on the claim. If yes, the logic then asks if there was a D&C, aspiration curettage or hysterotomy procedure reported on the claim. If yes, the logic assigns the case to existing MS–DRG 770. If no, the logic assigns the case to existing MS–DRG 779. If there was not a principal diagnosis of abortion reported on the claim, the logic asks if there was a principal diagnosis of an antepartum condition reported on the claim. If yes, the logic then asks if there was an O.R. procedure reported on the claim. If yes, the logic assigns the case to one of the proposed new MS–DRGs 817, 818, or 819. If no, the logic assigns the case to one of the proposed new MS–DRGs 831, 832, or 833. If there was not a principal diagnosis of an antepartum condition reported on the claim, the logic asks if there was a principal diagnosis of a postpartum condition reported on the claim. If yes, the logic then asks if there was an O.R. procedure reported on the claim. If yes, the logic assigns the case to existing MS–DRG 769. If no, the logic assigns the case to existing MS–DRG 776. If there was not a principal diagnosis of a postpartum condition reported on the claim, the logic identifies that there was a principal diagnosis describing childbirth, delivery or an intrapartum condition reported on the claim without

any other procedures, and assigns the case to existing MS–DRG 998 (Principal Diagnosis Invalid as Discharge Diagnosis).

To assist in detecting coding and MS–DRG assignment errors for MS–DRG 998 that could result when a provider does not report the procedure code for either a cesarean section or a vaginal delivery along with an outcome of delivery diagnosis code, as discussed in section II.F.13.d., we proposed to add a new Questionable Obstetric Admission edit under the MCE. We invited public comments on this proposed MCE edit and we also invited public comments on the need for any additional MCE considerations with regard to the proposed changes for the MDC 14 MS–DRGs.

Diagram 2.



BILLING CODE 4120–01–C

We referred readers to Tables 6P.1h. through 6P.1k. associated with the proposed rule for the lists of the diagnosis and procedure codes that we proposed to assign to the GROUPER logic for the proposed new MS–DRGs and the existing MS–DRGs under MDC 14. We invited public comments on our proposed list of diagnosis codes, which also addresses the list of diagnosis codes that a commenter identified as missing from the GROUPER logic. We noted that, as a result of our proposed GROUPER logic changes to the vaginal delivery MS–DRGs, which would only take into account the procedure codes for a vaginal delivery and the outcome of delivery secondary diagnosis codes, there is no longer a need to maintain a specific principal diagnosis logic list for those MS–DRGs. Therefore, while we

appreciate the detailed suggestions and rationale submitted by the commenter for why specific diagnosis codes should be removed from the vaginal delivery principal diagnosis logic as displayed earlier in this discussion, we proposed to remove that logic. We invited public comments on this proposal, as well as our proposed list of procedure codes for the proposed revised MDC 14 MS–DRG logic, which would require a procedure code for case assignment. We also invited public comments on the proposed deletion of the 10 MS–DRGs and the proposed creation of 18 new MS–DRGs with a 3-way severity level split listed above in this section, as well as on the potential alternative new MS–DRGs using a 2-way severity level split as also presented above.

Comment: Commenters agreed with CMS' proposal to restructure the MS–DRGs within MDC 14. A few commenters commended CMS on the proposed new structure and GROUPER logic for these MS–DRGs, and believed that the new structure and logic is clearer and clinically appropriate. Another commenter agreed with the proposed new GROUPER logic for MDC 14 for deliveries with the 3-way severity level splits. The commenters anticipated that the new structure and logic will provide more clarity than the current structure.

Response: We appreciate the commenters' support. We agree the proposed new structure and GROUPER logic of the MS–DRGs under MDC 14 will provide more clarity than the current structure and logic.

Comment: Another commenter stated that all of the diagnoses currently assigned to MS–DRG 774 (Vaginal Delivery with Complicating Diagnosis) in the GROUPER logic, along with some of the diagnoses that were noted to appear to be missing from the GROUPER logic (83 FR 20216 through 20217), should be added to the Principal Diagnosis Is Its Own CC Or MCC logic for the proposed new vaginal delivery MS–DRGs 796 (Vaginal Delivery with Sterilization/D&C with MCC), 797 (Vaginal Delivery with Sterilization/D&C with CC), 798 (Vaginal Delivery with Sterilization/D&C without CC/MCC), 805 (Vaginal Delivery without Sterilization/D&C with MCC), 806 (Vaginal Delivery without Sterilization/D&C with CC), and 807 (Vaginal Delivery without Sterilization/D&C without CC/MCC). The commenter provided the following list of diagnosis codes that were noted to appear to be missing from the GROUPER logic, and requested CMS consider adding these diagnosis codes to the Principal Diagnosis Is Its Own CC Or MCC Lists. The commenter believed that the current GROUPER logic for MS–DRG 774 includes diagnoses that could change the MS–DRG assignment of a case from MS–DRG 775 to MS–DRG 774 based on the principal diagnosis. The commenter further expressed concern that these same diagnoses may group to the proposed new MS–DRGs 798 or 807 (without CC/MCC) under the proposed new structure and GROUPER logic for the vaginal delivery MS–DRGs.

ICD–10–CM code	Code description
O11.5	Pre-existing hypertension with pre-eclampsia, complicating the puerperium.
012.04	Gestational edema, complicating childbirth.
012.05	Gestational edema, complicating the puerperium.
012.14	Gestational proteinuria, complicating childbirth.
012.15	Gestational proteinuria, complicating the puerperium.
012.24	Gestational edema with proteinuria, complicating childbirth.
012.25	Gestational edema with proteinuria, complicating the puerperium.
O13.4	Gestational [pregnancy-induced] hypertension without significant proteinuria, complicating childbirth.
O13.5	Gestational [pregnancy-induced] hypertension without significant proteinuria, complicating the puerperium.
O14.04	Mild to moderate pre-eclampsia, complicating childbirth.
O14.05	Mild to moderate pre-eclampsia, complicating the puerperium.
O14.14	Severe pre-eclampsia complicating childbirth.
O14.15	Severe pre-eclampsia, complicating the puerperium.
O14.24	HELLP syndrome, complicating childbirth.
O14.25	HELLP syndrome, complicating the puerperium.
O14.94	Unspecified pre-eclampsia, complicating childbirth.
O14.95	Unspecified pre-eclampsia, complicating the puerperium.
O15.00	Eclampsia complicating pregnancy, unspecified trimester.
O15.02	Eclampsia complicating pregnancy, second trimester.
O15.03	Eclampsia complicating pregnancy, third trimester.
O15.1	Eclampsia complicating labor.
O15.2	Eclampsia complicating puerperium, second trimester.
O16.4	Unspecified maternal hypertension, complicating childbirth.
O16.5	Unspecified maternal hypertension, complicating the puerperium.

Response: As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20236 through 20239), we proposed to remove the special logic in the GROUPER for processing claims containing a diagnosis code from the Principal Diagnosis Is Its Own CC or MCC Lists. For the reasons stated in section II.F.15.c. of the preamble of this final rule, we are finalizing that proposal, and therefore this logic will no longer apply for FY 2019. We refer readers to section II.F.15.c. of the preamble of this final rule for further discussion of the specific proposal, including summaries of the public comments we received and our responses and our statement of final policy.

With regard to the commenter's concern that the diagnosis codes listed above appear to be missing from the GROUPER logic, we note that, currently, all of the diagnoses codes are included in the MDC 14 Assignment of Diagnosis Codes List. The diagnosis codes that include the terminology ''complicating the puerperium'' are listed under the ''Second Condition—Principal or Secondary Diagnosis'' code list in the diagnosis code logic for MS–DRG 774, and the diagnosis codes that include the terminology ''complicating childbirth'' are listed under the ''Principal Diagnosis'' code list for the diagnosis code logic for MS–DRG 781 (Other Antepartum Diagnoses with Medical Complications). We acknowledge that the diagnosis codes that include the

terminology ''complicating childbirth'' that the commenter referenced were inadvertently omitted, and are not listed in the ICD–10 MS–DRG Definitions Manual Version 35 under the diagnosis code logic list for MS–DRG 774 (or for MS–DRGs 767 (Vaginal Delivery with Sterilization and/or D&C) and 768 (Vaginal Delivery with O.R. Procedure Except Sterilization and/or D&C)). However, if one of those diagnosis codes is reported with a procedure code from the vaginal delivery code list, the ICD–10 MS–DRG GROUPER Version 35 accurately groups the case to a vaginal delivery MS–DRG.

As stated in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20220), in our proposal for restructuring the MDC 14 MS–DRGs under the ICD–10 MS–DRGs Version 36, diagnoses described as occurring during pregnancy and diagnoses specifying a trimester or maternal care in the absence of a delivery procedure reported are considered antepartum conditions. Also, as shown in Table 6P.1j. associated with the proposed rule (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2019-IPPS-Proposed-Rule-Home-Page-Items/FY2019-IPPS-Proposed-Rule-Tables.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending*), we did not propose to include any diagnosis codes describing a condition as ''complicating childbirth'' in the list of diagnosis codes describing antepartum conditions. Therefore, the diagnosis codes described as ''complicating childbirth'' would be applicable when a patient is admitted for a delivery episode and are subject to MS–DRG assignment to proposed MS–DRGs describing a cesarean or vaginal delivery.

Comment: Another commenter agreed with CMS' initiative to restructure the MS–DRGs and GROUPER logic under MDC 14. However, the commenter expressed concerns with the proposed GROUPER logic, and requested CMS consider all of the issues prior to implementing the proposed new MS–DRGs and GROUPER logic. The commenter believed that grouping a vaginal delivery by procedure codes describing a delivery and a diagnosis code describing the outcome of delivery did not seem appropriate. The commenter stated that it is necessary to determine if a case should be assigned to a vaginal delivery MS–DRG based on the combination of principal diagnoses and procedure codes versus the combination of a procedure code with an outcome of delivery code. The commenter recommended that the first consideration should consist of identification of a principal diagnosis code within the O00–O08 code range (Pregnancy with Abortive Outcome) and then proceeding with grouping those cases to the Abortion MS–DRGs 770 (Abortion with D&C, Aspiration Curettage or Hysterotomy) and 779 (Abortion without D&C), prior to possibly grouping the cases to the cesarean or vaginal delivery MS–DRGs. The commenter provided the example of a blighted ovum that may be treated with ICD–10–PCS procedure codes 10D07Z6 (Extraction of products of conception, vacuum, via natural or artificial opening) or 10D07Z8 (Extraction of products of conception, other, via natural or artificial opening), which are reported for vaginal deliveries.

Response: We appreciate the commenter's support for the effort to restructure the MS–DRGs and GROUPER logic under MDC 14. However, with respect to the commenter's concerns regarding the proposed new GROUPER logic for a vaginal delivery, we disagree with the commenter that it is necessary to determine if cases should be assigned to a vaginal delivery MS–DRG based on the combination of principal diagnoses and procedure codes versus the combination of a procedure code with an outcome of delivery code. One of the underlying purposes of the effort to restructure the vaginal delivery MS–DRGs was to simplify the complex logic currently associated with the vaginal delivery MS–DRGs, which includes multiple code lists for principal and secondary diagnoses. Based on the proposed new structure and GROUPER logic of the MS–DRGs under MDC 14, to identify that a vaginal delivery occurred, the logic does not have to consider or depend on the reason the patient was admitted. Rather, the GROUPER logic is structured to account for the fact that a delivery took place during that hospitalization. The delivery MS–DRGs (whether cesarean or vaginal) are specifically intended for that reason. With regard to the example provided by the commenter, we note that ICD–10–PCS procedure codes 10D07Z6 and 10D07Z8 are designated as non-O.R. procedures that affect the MS–DRG assignment of specific MS–DRGs. ICD–10–PCS procedure codes 10D07Z6 and 10D07Z8 impact the MS–DRG assignment of the vaginal delivery MS–DRGs. However, ICD–10–CM diagnosis code O02.0 (Blighted ovum and nonhydatidiform mole) is identified as a proposed antepartum condition, as shown in Table 6P.1j. associated with the proposed rule (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2019-IPPS-Proposed-Rule-Home-Page-Items/FY2019-IPPS-Proposed-Rule-Tables.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending*) and, therefore, as depicted in the commenter's example, if a patient has a principal diagnosis of a blighted ovum and either ICD–10–PCS procedure code 10D07Z6 or 10D07Z8 is reported, the proposed new GROUPER logic would result in an MS–DRG case assignment to one of the proposed new MS–DRGs 831, 832, or 833 (Other Antepartum Diagnoses without O.R. Procedure with MCC, with CC or without CC/MCC, respectively) and not a vaginal delivery MS–DRG. The diagnosis of a blighted ovum does not result in a viable pregnancy and, therefore, an outcome of delivery diagnosis code would not be reported. An illustration of how this proposed new GROUPER logic would apply for antepartum conditions was represented in Diagram 2 of the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20225).

Comment: One commenter expressed concern about the proposed relative weights for several of the proposed new MS–DRGs under MDC 14. The commenter stated that the low volume of the procedures assigned to these MS–DRGs accounted for volatility in the relative weights. With regard to proposed new MS–DRGs 817, 818, and 819 (Other Antepartum Diagnoses with O.R. Procedure with MCC, CC, and without CC/MCC, respectively), the commenter stated that the proposed relative weights for these MS–DRGs are significantly lower than the proposed relative weights of the surgical MS–DRGs to which the procedure codes proposed to be assigned to these proposed new MS–DRGs would map for non-obstetrical patients. This commenter also stated that the relative weights for proposed new MS–DRGs 806 and 807 (Vaginal Delivery without Sterilization/D&C with CC and without CC/MCC, respectively) are lower than the current relative weights for MS–DRGs 774 and 775 (Vaginal Delivery with and without Complicating Diagnosis, respectively), and believed the relative weight for proposed new MS–DRG 805 (Vaginal Delivery without Sterilization/D&C with MCC) is likely inadequate for the resources required to care for patients with MCC severity level designations. The commenter suggested that CMS maintain the relative weights for proposed new MS–DRGs 806 and 807 at the same value of

the current MS–DRGs, and establish a relative weight for proposed new MS–DRG 805 that is more comparable with those values of medical MS–DRGs with MCC severity level designations. The commenter further noted that the relative weights for proposed new MS–DRGs 797 and 798 (Vaginal Delivery with Sterilization/D&C with CC and without CC/MCC, respectively) are the same value, but believed the relative weight should be greater for proposed new MS–DRG 797. The commenter also believed that the relative weight for proposed new MS–DRG 786 (Cesarean Section without Sterilization with MCC) is insufficient for the required resources necessary to perform these procedures and provide the appropriate care to patients, and requested CMS establish a relative weight with a value more consistent with values of surgical MS–DRGs with MCC severity level designations. The commenter also requested that CMS maintain the relative weights for MS–DRG 787 (Cesarean Section without Sterilization with CC) at the same value of current MS–DRG 765 (Cesarean Section with CC/MCC), and the relative weight for proposed new MS–DRG 833 (Other Antepartum Diagnoses without O.R. Procedure without CC/MCC) at the same value of current MS–DRG 782 (Other Antepartum Diagnoses without Medical Complications).

Response: It is to be expected that when MS–DRGs are restructured, resulting in a different case-mix within the new MS–DRGs, the relative weights of the MS–DRGs will change as a result. With respect to the comment about the low volume of cases, as we have noted in the proposed rule, we were unable to use our usual criterion of ensuring that there are at least 500 cases in the MCC or CC group to refine the maternity MS–DRGs because of the extremely low volume of Medicare patients cases reflected in claims data for these DRGs. While there is not a high volume of these cases represented in the Medicare data, and while we generally advise that other payers should develop MS–DRGs to address the needs of their patients, we continue to believe that the restructured MS–DRGs within MDC 14 serve important purposes to account for the new and different clinical concepts that exist under ICD–10 for this subset of patients while also maintaining the existing MS–DRG structure for identifying severity of illness, utilization of resources, and complexity of service. We believe that even though some of the resulting MS–DRGs have relatively low volumes in the Medicare population, using our established methodology for developing DRG relative weights is the most appropriate approach for the new MS–DRGs within MDC 14. With regard to the comment about MS–DRGs 797 and 798, we note that the average cost per case for MS–DRG 797 was lower than the average cost per case for MS–DRG 798. Therefore, we blended the data for these two MS–DRGs to avoid nonmonotonocity, in which the lower severity MS–DRG has a higher relative weight than the higher severity MS–DRG. For these reasons, we are not finalizing a change to the calculation of the relative weights for the MS–DRGs under MDC 14.

After consideration of the public comments we received, we are finalizing our proposals, without modification, including the list of diagnosis codes assigned to the MS–DRGs under the restructuring of the vaginal delivery MS–DRGs under MDC 14, which we note also addresses the list of diagnosis codes that a commenter identified and were noted in the proposed rule as appearing to be missing from the GROUPER logic.

We also invited public comments on our proposal to reassign ICD–10–PCS procedure codes 0UDB7ZX, 0UDB7ZZ, 0UDB8ZX, and 0UDB8ZZ that describe dilation and curettage procedures from MS–DRG 767 under MDC 14 to MS–DRGs 744 and 745 under MDC 13.

Comment: Commenters supported CMS' proposal to reassign ICD–10–PCS procedure codes 0UDB7ZX, 0UDB7ZZ, 0UDB8ZX, and 0UDB8ZZ from MS–DRG 767 to MS–DRGs 744 and 745.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to reassign ICD–10–PCS procedure codes 0UDB7ZX, 0UDB7ZZ, 0UDB8ZX, and 0UDB8ZZ that describe dilation and curettage procedures from MS–DRG 767 under MDC 14 to MS–DRGs 744 and 745 under MDC 13 in the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

After consideration of the public comments we received, we are finalizing our proposed list of diagnosis and procedure codes for assignment to the revised MDC 14 MS–DRGs including the deletion of 10 MS–DRGs and the creation of 18 new MS–DRGs in the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

11. MDC 18 (Infectious and Parasitic Diseases (Systematic or Unspecified Sites): Systemic Inflammatory Response Syndrome (SIRS) of Non-Infectious Origin

ICD–10–CM diagnosis codes R65.10 (Systemic Inflammatory Response Syndrome (SIRS) of non-infectious origin without acute organ dysfunction) and R65.11 (Systemic Inflammatory Response Syndrome (SIRS) of non-infectious origin with acute organ dysfunction) are currently assigned to MS–DRGs 870 (Septicemia or Severe Sepsis with Mechanical Ventilation >96 Hours), 871 (Septicemia or Severe Sepsis with Mechanical Ventilation >96 Hours with MCC), and 872 (Septicemia or Severe Sepsis with Mechanical Ventilation >96 Hours without MCC) under MDC 18 (Infectious and Parasitic Diseases, Systemic or Unspecified Sites). As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20226), our clinical advisors noted that these diagnosis codes are specifically describing conditions of a non-infectious origin, and recommended that they be reassigned to a more clinically appropriate MS–DRG.

We examined claims data from the September 2017 update of the FY 2017 MedPAR file for cases in MS–DRGs 870, 871, and 872. Our findings are shown in the following table.

SEPTICEMIA OR SEVERE SEPSIS WITH AND WITHOUT MECHANICAL VENTILATION >96 HOURS WITH AND WITHOUT MCC

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 870—All cases	31,658	14.3	$42,981
MS–DRG 871—All cases	566,531	6.3	13,002
MS–DRG 872—All cases	150,437	4.3	7,532

As shown in this table, we found a total of 31,658 cases in MS–DRG 870, with an average length of stay of 14.3 days and average costs of $42,981. We found a total of 566,531 cases in MS–DRG 871, with an average length of stay

of 6.3 days and average costs of $13,002. Lastly, we found a total of 150,437 cases in MS–DRG 872, with an average length of stay of 4.3 days and average costs of $7,532.

We then examined claims data in MS–DRGs 870, 871, or 872 for cases reporting an ICD–10–CM diagnosis code of R65.10 or R65.11. Our findings are shown in the following table.

SIRS of Non-Infectious Origin With and Without Acute Organ Dysfunction

MS–DRGs 870, 871 and 872	Number of cases	Average length of stay	Average costs
MS–DRGs 870, 871, and 872—Cases reporting a principal diagnosis code of R65.10	1,254	3.8	$6,615
MS–DRGs 870, 871, and 872—Cases reporting a principal diagnosis code of R65.11	138	4.8	9,655
MS–DRGs 870, 871, and 872—Cases reporting a secondary diagnosis code of R65.10	1,232	5.5	10,670
MS–DRGs 870, 871, and 872—Cases reporting a secondary diagnosis code of R65.11	117	6.2	12,525

As shown in this table, we found a total of 1,254 cases reporting a principal diagnosis code of R65.10 in MS–DRGs 870, 871, and 872, with an average length of stay of 3.8 days and average costs of $6,615. We found a total of 138 cases reporting a principal diagnosis code of R65.11 in MS–DRGs 870, 871, and 872, with an average length of stay of 4.8 days and average costs of $9,655. We found a total of 1,232 cases reporting a secondary diagnosis code of R65.10 in MS–DRGs 870, 871, and 872, with an average length of stay of 5.5 days and average costs of $10,670. Lastly, we found a total of 117 cases reporting a secondary diagnosis code of R65.11 in MS–DRGs 870, 871, and 872, with an average length of stay of 6.2 days and average costs of $12,525.

The claims data included a total of 1,392 cases in MS–DRGs 870, 871, and 872 that reported a principal diagnosis code of R65.10 or R65.11. We noted in the FY 2019 IPPS/LTCH PPS proposed rule that these 1,392 cases appear to have been coded inaccurately according to the ICD–10–CM Official Guidelines for Coding and Reporting at Section I.C.18.g., which specifically state: ''The systemic inflammatory response syndrome (SIRS) can develop as a result of certain non-infectious disease processes, such as trauma, malignant neoplasm, or pancreatitis. When SIRS is documented with a non-infectious condition, and no subsequent infection is documented, the code for the underlying condition, such as an injury, should be assigned, followed by code R65.10, Systemic inflammatory response syndrome (SIRS) of non-infectious origin without acute organ dysfunction or code R65.11, Systemic inflammatory response syndrome (SIRS) of non-infectious origin with acute organ dysfunction.'' Therefore, according to the Coding Guidelines, ICD–10–CM diagnosis codes R65.10 and R65.11 should not be reported as the principal diagnosis on an inpatient claim.

We have acknowledged in past rulemaking the challenges with coding for SIRS (and sepsis) (71 FR 24037). In addition, we note that there has been confusion with regard to how these codes are displayed in the ICD–10 MS–DRG Definitions Manual under MS–DRGs 870, 871, and 872, which may also impact the reporting of these conditions. For example, in Version 35 of the ICD–10 MS–DRG Definitions Manual (which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2018-IPPS-Final-Rule-Home-Page-Items/FY2018-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending*, the logic for case assignment to MS–DRGs 870, 871, and 872 is comprised of a list of several diagnosis codes, of which ICD–10–CM diagnosis codes R65.10 and R65.11 are included. Because these codes are listed under the heading of ''Principal Diagnosis'', it may appear that these codes are to be reported as a principal diagnosis for assignment to MS–DRGs 870, 871, or 872. However, the Definitions Manual display of the GROUPER logic assignment for each diagnosis code is for grouping purposes only. The GROUPER (and, therefore, documentation in the MS–DRG Definitions Manual) was not designed to account for coding guidelines or coverage policies. Since the inception of the IPPS, the data editing function has been a separate and independent step in the process of determining a DRG assignment. Except for extreme data integrity issues that prevent a DRG from being assigned, such as an invalid principal diagnosis, the DRG assignment GROUPER does not edit for data integrity. Prior to assigning the MS–DRG to a claim, the MACs apply a series of data integrity edits using programs such as the Medicare Code Editor (MCE). The MCE is designed to identify cases that require further review before classification into an MS–DRG. These data integrity edits address issues such as data validity, coding rules, and coverage policies. The separation of the MS–DRG grouping and data editing functions allows the MS–DRG GROUPER to remain stable during a fiscal year even though coding rules and coverage policies may change during the fiscal year. As such, in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38050 through 38051), we finalized our proposal to add ICD–10–CM diagnosis codes R65.10 and R65.11 to the Unacceptable Principal Diagnosis edit in the MCE as a result of the Official Guidelines for Coding and Reporting related to SIRS, in efforts to improve coding accuracy for these types of cases.

To address the issue of determining a more appropriate MS–DRG assignment for ICD–10–CM diagnosis codes R65.10 and R65.11, we reviewed alternative options under MDC 18. Our clinical advisors determined the most appropriate option is MS–DRG 864 (Fever) because the conditions that are assigned here describe conditions of a non-infectious origin.

Therefore, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20227), we proposed to reassign ICD–10–CM diagnosis codes R65.10 and R65.11 to MS–DRG 864 and to revise the title of MS–DRG 864 to ''Fever and Inflammatory Conditions'' to better reflect the diagnoses assigned there.

PROPOSED REVISED MS–DRG 864 (FEVER AND INFLAMMATORY CONDITIONS)

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 864—All cases	12,144	3.4	$6,232

Comment: Commenters supported the proposal to reassign ICD–10–CM diagnosis codes R65.10 and R65.11 to MS–DRG 864 and to revise the title of MS–DRG 864 to ''Fever and Inflammatory Conditions''.

Response: We thank the commenters for their support.

Comment: One commenter questioned the proposed logic for ICD–10–CM diagnosis codes R65.10 and R65.11 within MS–DRG 864. The commenter noted that the diagnosis codes are included on the unacceptable principal diagnoses code edit list in the MCE and specifically inquired if cases reporting diagnosis code R65.10 or R65.11 as a secondary diagnosis would result in assignment to MS–DRG 864.

Response: The GROUPER logic assignment for each diagnosis code as a principal diagnosis is for grouping purposes only. The GROUPER was not designed to account for coding guidelines or coverage policies. The MCE is designed to identify cases that require further review before classification into an MS–DRG. Therefore, the MS–DRG logic must specifically require a condition to group based on whether it is reported as a principal diagnosis or a secondary diagnosis, and consider any procedures that are reported, in addition to consideration of the patient's age, sex and discharge status in order to affect the MS–DRG assignment.

As noted in the ICD–10 MS–DRG Definitions Manual Version 35, Appendix B—Diagnosis Code/MDC/MS–DRG Index, each diagnosis code is listed with the MDC and the MS–DRGs to which the diagnosis is used to define the logic of the DRG either as a principal diagnosis or a secondary diagnosis. For diagnosis codes R65.10 and R65.11, the ICD–10 MS DRG Definitions Manual displays MDC 18 and MS–DRGs 870–872, as described previously. As discussed in the proposed rule, because the diagnosis are codes listed under the heading of ''Principal Diagnosis'' in the ICD–10 MS DRG Definitions Manual, it may appear to indicate that these codes are to be reported as a principal diagnosis for assignment to these MS–DRGs. However, the Definitions Manual display of the GROUPER logic assignment for each diagnosis code is for grouping purposes only and does not correspond to coding guidelines for reporting the principal diagnosis. In other words, cases will group according to the GROUPER logic, regardless of any coding guidelines or coverage policies. It is the MCE and other payer specific edits that identify inconsistencies in the coding guidelines or coverage policies. Under our proposed change to the ICD–10 MS–DRGs Version 36, cases reporting diagnosis code R65.10 or R65.11 as a secondary diagnosis would result in assignment to MS–DRG 864 when one of the other listed diagnosis codes in the MS–DRG 864 logic is reported as the principal diagnosis.

After consideration of the public comments we received, we are finalizing our proposal to reassign ICD–10–CM diagnosis codes R65.10 and R65.11 to MS–DRG 864 and to revise the title of MS–DRG 864 to ''Fever and Inflammatory Conditions''.

12. MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs): Corrosive Burns

ICD–10–CM Coding Guidelines include ''Code first'' sequencing instructions for cases reporting a principal diagnosis of toxic effect (ICD–10–CM codes T51 through T65) and a secondary diagnosis of corrosive burn (ICD–10–CM codes T21.40 through T21.79). As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20227), we received a request to reassign these cases from MS–DRGs 901 (Wound Debridements for Injuries with MCC), 902 (Wound Debridements for Injuries with CC), 903 (Wound Debridements for Injuries without CC/MCC), 904 (Skin Grafts for Injuries with CC/MCC), 905 (Skin Grafts for Injuries without CC/MCC), 917 (Poisoning and Toxic Effects of Drugs with MCC), and 918 (Poisoning and Toxic Effects of Drugs without MCC) to MS–DRGs 927 (Extensive Burns or Full Thickness Burns with Mechanical Ventilation >96 Hours with Skin Graft), 928 (Full Thickness Burn with Skin Graft or Inhalation Injury with CC/MCC), 929 (Full Thickness Burn with Skin Graft or Inhalation Injury without CC/MCC), 933 (Extensive Burns or Full Thickness Burns with Mechanical Ventilation >96 Hours without Skin Graft), 934 (Full Thickness Burn without Skin Graft or Inhalation Injury), and 935 (Nonextensive Burns).

The requestor noted that, for corrosion burns codes T21.40 through T21.79, ICD–10–CM Coding Guidelines instruct to ''Code first (T51 through T65) to identify chemical and intent.'' Because code first notes provide sequencing directive, when patients are admitted with corrosive burns (which can be full thickness and extensive), toxic effect codes T51 through T65 must be sequenced first followed by codes for the corrosive burns. This causes full-thickness and extensive burns to group to MS–DRGs 901 through 905 when excisional debridement and split thickness skin grafts are performed, and to MS–DRGs 917 and 918 when procedures are not performed. This is in contrast to cases reporting a principal diagnosis of corrosive burn, which group to MS–DRGs 927 through 935.

The requestor stated that MS–DRGs 456 (Spinal Fusion except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions with MCC), 457 (Spinal Fusion Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions with CC), and 458 (Spinal Fusion Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions without CC/MCC) are grouped based on the procedure performed in combination with the principal diagnosis or secondary diagnosis (secondary scoliosis). The requestor stated that when codes for corrosive burns are reported as secondary diagnoses in conjunction with principal diagnoses codes T5l through T65, particularly when skin grafts are performed, they would be more appropriately assigned to MS–DRGs 927 through 935.

We analyzed claims data from the September 2017 update of the FY 2017 MedPAR file for all cases assigned to MS–DRGs 901, 902, 903, 904, 905, 917, and 918, and subsets of these cases with principal diagnosis of toxic effect with secondary diagnosis of corrosive burn. We noted in the proposed rule that we found no cases from this subset in MS–DRGs 903, 907, 908, and 909 and, therefore, did not include the results for these MS–DRGs in the table below. We also analyzed all cases assigned to MS–DRGs 927, 928, 929, 933, 934, and 935 and those cases that reported a principal diagnosis of corrosive burn. Our findings are shown in the following two tables.

MDC 21 INJURIES, POISONINGS AND TOXIC EFFECTS OF DRUGS

MS–DRGs	Number of cases	Average length of stay	Average costs
All Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn—Across all MS–DRGs	55	5.5	$18,077
MS–DRG 901—All cases	968	13	31,479
MS–DRG 901—Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn	1	8	12,388
MS–DRG 902—All cases	1,775	6.6	14,206
MS–DRG 902—Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn	8	10.3	20,940
MS–DRG 904—All cases	905	9.8	23,565
MS–DRG 904—Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn	8	6.4	22,624
MS–DRG 905—All cases	263	4.9	13,291
MS–DRG 905—Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn	2	2.5	7,682
MS–DRG 906—All cases	458	4.8	13,555
MS–DRG 906—Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn	1	5	7,409
MS–DRG 917—All cases	31,730	4.8	10,280
MS–DRG 917—Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn	6	4.8	7,336
MS–DRG 918—All cases	19,819	3	5,529
MS–DRG 918—Cases with principal diagnosis of toxic effect and secondary diagnosis of corrosive burn	28	3.5	5,643

As shown in this table, there were a total of 55 cases with a principal diagnosis of toxic effect and a secondary diagnosis of corrosive burn across MS–DRGs 901, 902, 903, 904, 905, 917, and 918. When comparing this subset of codes relative to those of each MS–DRG as a whole, we noted that, in most of these MS–DRGs, the average costs and average length of stay for this subset of cases were roughly equivalent to or lower than the average costs and average length of stay for cases in the MS–DRG as a whole, while in one case, they were higher. As we have noted in prior rulemaking (77 FR 53309) and elsewhere in the proposed rule and this final rule, it is a fundamental principle of an averaged payment system that half of the procedures in a group will have above average costs. It is expected that there will be higher cost and lower cost subsets, especially when a subset has low numbers. We stated in the proposed rule that the results of this analysis indicate that these cases are appropriately placed within their current MDC.

Our clinical advisors reviewed this request and indicated that patients with a principal diagnosis of toxic effect and a secondary diagnosis of corrosive burn have been exposed to an irritant or corrosive substance and, therefore, are clinically similar to those patients in MDC 21. Furthermore, our clinical advisors did not believe that the size of this subset of cases justifies the significant changes to the GROUPER logic that would be required to address the commenter's request, which would involve rerouting cases when the primary and secondary diagnoses are in different MDCs.

MDC 22 BURNS

MS–DRG	Number of cases	Average length of stay	Average costs
All cases with principal diagnosis of corrosive burn—Across all MS–DRGs	60	8.5	$19,456
MS–DRG 927—All cases	159	28.1	128,960
MS–DRG 927—Cases with principal diagnosis of corrosive burn	1	41	75,985
MS–DRG 928—All cases	1,021	15.1	42,868
MS–DRG 928—Cases with principal diagnosis of corrosive burn	13	13.2	31,118
MS–DRG 929—All cases	295	7.9	21,600
MS–DRG 929—Cases with principal diagnosis of corrosive burn	4	12.5	18,527
MS–DRG 933—All cases	121	4.6	21,291
MS–DRG 933—Cases with principal diagnosis of corrosive burn	1	7	91,779
MS–DRG 934—All cases	503	6.1	13,286
MS–DRG 934—Cases with principal diagnosis of corrosive burn	11	5.8	13,280
MS–DRG 935—All cases	1,705	5.2	13,065
MS–DRG 935—Cases with principal diagnosis of corrosive burn	29	5	9,822

To address the request of reassigning cases with a principal diagnosis of toxic effect and secondary diagnosis of corrosive burn, we reviewed the data for all cases in MS–DRGs 927, 928, 929, 933, 934, and 935 and those cases reporting a principal diagnosis of corrosive burn. We found a total of 60 cases reporting a principal diagnosis of corrosive burn, with an average length of stay of 8.5 days and average costs of $19,456. We stated in the proposed rule that our clinical advisors believe that these cases reporting a principal diagnosis of corrosive burn are appropriately placed in MDC 22 as they are clinically aligned with other patients in this MDC. We further stated that, in

summary, the results of our claims data analysis and the advice from our clinical advisors do not support reassigning cases in MS–DRGs 901, 902, 903, 904, 905, 917, and 918 reporting a principal diagnosis of toxic effect and a secondary diagnosis of corrosive burn to MS–DRGs 927, 928, 929, 933, 934 and 935. Therefore, we did not propose to reassign these cases.

Comment: One commenter supported the proposal to maintain the current MS–DRG structure for cases reporting a principal diagnosis of toxic effect (ICD–10–CM codes T51 through T65) and a secondary diagnosis of corrosive burn (ICD–10–CM codes T21.40 through T21.79). Another commenter suggested that the 60 identified cases that CMS used in its analysis were incorrectly coded. The commenter noted that ICD–10–CM coding guidelines under each code for corrosion burn state ''Code first (T51–T65) to identify chemical and intent.'' The commenter stated that corrosive burns cannot be sequenced as the principal diagnosis because the coding guidelines must be followed. The commenter stated that the toxic effect codes T51–T65 must be sequenced first, which causes these cases to group to MS–DRGs 901 through 905 and 917 and 918 instead of the more appropriate burn MS–DRGs. The commenter stated that it appears that when codes T51–T65 are the principal diagnosis, the cases group to MDC 21 (Injuries, Poisoning. and Toxic Effects of Drugs), and then to MS–DRGs 901 through 905 and 917 and 918.

Response: We appreciate the commenter's support. With regard to the commenter who raised concerns about the coding guidelines and display of codes in the ICD–10 MS–DRG Definitions Manual, we note that the GROUPER logic was not designed to account for coding guidelines. With regard to the display of code lists in the ICD–10 MS–DRG Definitions Manual, the MS–DRG logic must specifically require a condition to group based on whether it is reported as a principal diagnosis or a secondary diagnosis and consider any procedures that are reported in order to affect the MS–DRG assignment. However, as stated previously, the GROUPER logic is not dependent on coding guidelines. The purpose of the GROUPER is to group cases into particular MS–DRGs. We recognize that, over time, the desire to create or modify existing GROUPER logic in response to coding guidelines has become more common. As we continue our efforts to refine the ICD–10 MS–DRGs, we will consider alternate approaches to ensure the integrity of both the GROUPER logic and coding guidelines. Based on the data available at this time, we do not believe that it is appropriate to change the MS–DRG assignment for the procedures identifying corrosive burns identified earlier.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current MS–DRG structure for cases reporting a principal diagnosis of toxic effect (ICD–10–CM codes T51 through T65) and a secondary diagnosis of corrosive burn (ICD–10–CM codes T21.40 through T21.79).

13. Changes to the Medicare Code Editor (MCE)

The Medicare Code Editor (MCE) is a software program that detects and reports errors in the coding of Medicare claims data. Patient diagnoses, procedure(s), and demographic information are entered into the Medicare claims processing systems and are subjected to a series of automated screens. The MCE screens are designed to identify cases that require further review before classification into an MS–DRG.

As discussed in the FY 2018 IPPS/LTCH PPS final rule (82 FR 38045), we made available the FY 2018 ICD–10 MCE Version 35 manual file. The link to this MCE manual file, along with the link to the mainframe and computer software for the MCE Version 35 (and ICD–10 MS–DRGs) are posted on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html* through the FY 2018 IPPS Final Rule Home Page.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20229), we addressed the MCE requests we received by the November 1, 2017 deadline. We also discussed the proposals we were making based on our internal review and analysis. In this FY 2019 IPPS/LTCH PPS final rule, we present a summation of the comments we received in response to the MCE requests and proposals presented based on internal reviews and analyses in the proposed rule, our responses to those comments, and our finalized policies.

In addition, as a result of new and modified code updates approved after the annual spring ICD–10 Coordination and Maintenance Committee meeting, we routinely make changes to the MCE. In the past, in both the IPPS proposed and final rules, we only provided the list of changes to the MCE that were brought to our attention after the prior year's final rule. We historically have not listed the changes we have made to the MCE as a result of the new and modified codes approved after the annual spring ICD–10 Coordination and Maintenance Committee meeting. These changes are approved too late in the rulemaking schedule for inclusion in the proposed rule. Furthermore, although our MCE policies have been described in our proposed and final rules, we have not provided the detail of each new or modified diagnosis and procedure code edit in the final rule. However, we make available the finalized Definitions of Medicare Code Edits (MCE) file. Therefore, we are making available the FY 2019 ICD–10 MCE Version 36 Manual file, along with the link to the mainframe and computer software for the MCE Version 36 (and ICD–10 MS DRGs), on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/MS-DRG-Classifications-and-Software.html*.

a. Age Conflict Edit

In the MCE, the Age Conflict edit exists to detect inconsistencies between a patient's age and any diagnosis on the patient's record; for example, a 5-year-old patient with benign prostatic hypertrophy or a 78-year-old patient coded with a delivery. In these cases, the diagnosis is clinically and virtually impossible for a patient of the stated age. Therefore, either the diagnosis or the age is presumed to be incorrect. Currently, in the MCE, the following four age diagnosis categories appear under the Age Conflict edit and are listed in the manual and written in the software program:

- Perinatal/Newborn—Age of 0 years only; a subset of diagnoses which will only occur during the perinatal or newborn period of age 0 (for example, tetanus neonatorum, health examination for newborn under 8 days old).
- Pediatric—Age is 0–17 years inclusive (for example, Reye's syndrome, routine child health exam).
- Maternity—Age range is 12–55 years inclusive (for example, diabetes in pregnancy, antepartum pulmonary complication).
- Adult—Age range is 15–124 years inclusive (for example, senile delirium, mature cataract).

(1) Perinatal/Newborn Diagnoses Category

Under the ICD–10 MCE, the Perinatal/Newborn Diagnoses category under the Age Conflict edit considers the age of 0 years only; a subset of diagnoses which will only occur during the perinatal or newborn period of age 0 to be inclusive. This includes conditions that have their origin in the fetal or perinatal period (before birth through the first 28 days

after birth) even if morbidity occurs later. For that reason, the diagnosis codes on this Age Conflict edit list would be expected to apply to conditions or disorders specific to that age group only.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20229), we indicated that, in the ICD–10–CM classification, there are 14 diagnosis codes that describe specific suspected conditions that have been evaluated and ruled out during the newborn period and are currently not on the Perinatal/Newborn Diagnoses Category edit code list. We consulted with staff at the Centers for Disease Control's (CDC's) National Center for Health Statistics (NCHS) because NCHS has the lead responsibility for the ICD–10–CM diagnosis codes. The NCHS' staff confirmed that the following diagnosis codes are appropriate to add to the edit code list for the Perinatal/Newborn Diagnoses Category.

ICD–10–CM code	Code description
Z05.0	Observation and evaluation of newborn for suspected cardiac condition ruled out.
Z05.1	Observation and evaluation of newborn for suspected infectious condition ruled out.
Z05.2	Observation and evaluation of newborn for suspected neurological condition ruled out.
Z05.3	Observation and evaluation of newborn for suspected respiratory condition ruled out.
Z05.41	Observation and evaluation of newborn for suspected genetic condition ruled out.
Z05.42	Observation and evaluation of newborn for suspected metabolic condition ruled out.
Z05.43	Observation and evaluation of newborn for suspected immunologic condition ruled out.
Z05.5	Observation and evaluation of newborn for suspected gastrointestinal condition ruled out.
Z05.6	Observation and evaluation of newborn for suspected genitourinary condition ruled out.
Z05.71	Observation and evaluation of newborn for suspected skin and subcutaneous tissue condition ruled out.
Z05.72	Observation and evaluation of newborn for suspected musculoskeletal condition ruled out.
Z05.73	Observation and evaluation of newborn for suspected connective tissue condition ruled out.
Z05.8	Observation and evaluation of newborn for other specified suspected condition ruled out.
Z05.9	Observation and evaluation of newborn for unspecified suspected condition ruled out.

Therefore, we proposed to add the ICD–10–CM diagnosis codes listed in the table above to the Age Conflict edit under the Perinatal/Newborn Diagnoses Category edit code list. We also proposed to continue to include the existing diagnosis codes currently listed under the Perinatal/Newborn Diagnoses Category edit code list.

Comment: Commenters agreed with CMS' proposal to add the diagnosis codes listed in the table above to the Age Conflict edit under the Perinatal/Newborn Diagnoses Category edit code list.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add the ICD–10–CM diagnosis codes listed in the table above to the Age Conflict edit under the Perinatal/Newborn Diagnoses Category edit code list. We also are finalizing our proposal to continue to include the existing list of codes on the Perinatal/Newborn Diagnoses Category edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

(2) Pediatric Diagnoses Category

Under the ICD–10 MCE, the Pediatric Diagnoses Category for the Age Conflict edit considers the age range of 0 to 17 years inclusive. For that reason, the diagnosis codes on this Age Conflict edit list would be expected to apply to conditions or disorders specific to that age group only.

As discussed in section II.F.15. of the preamble of the proposed rule, Table 6C.—Invalid Diagnosis Codes associated with the proposed rule and this final (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) lists the diagnoses that will no longer be effective as of October 1, 2018. Included in this table is an ICD–10–CM diagnosis code currently listed on the Pediatric Diagnoses Category edit code list, ICD–10–CM diagnosis code Z13.4 (Encounter for screening for certain developmental disorders in childhood). In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20230), we proposed to remove this code from the Pediatric Diagnoses Category edit code list. We also proposed to continue to include the other existing diagnosis codes currently listed under the Pediatric Diagnoses Category edit code list.

Comment: Commenters agreed with the proposal to remove ICD–10–CM diagnosis code Z13.4 from the Pediatric Diagnoses Category edit code list because this code will no longer be effective as of October 1, 2018.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to remove ICD–10–CM diagnosis code Z13.4 from the Pediatric Diagnoses Category edit code list. We also are finalizing our proposal to maintain the other existing codes on the Pediatric Diagnoses Category edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

(3) Maternity Diagnoses

Under the ICD–10 MCE, the Maternity Diagnoses Category for the Age Conflict edit considers the age range of 12 to 55 years inclusive. For that reason, the diagnosis codes on this Age Conflict edit list would be expected to apply to conditions or disorders specific to that age group only.

As discussed in section II.F.15. of the preamble of the proposed rule, Table 6A.—New Diagnosis Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed the new diagnoses codes that had been approved to date, which will be effective with discharges occurring on and after October 1, 2018. The following table lists the new ICD–10–CM diagnosis codes included in Table 6A associated with pregnancy and maternal care that we stated we believe are appropriate to add to the Maternity Diagnoses Category edit code list under the Age Conflict edit. Therefore, in the proposed rule, we proposed to add these codes to the Maternity Diagnoses Category edit code list under the Age Conflict edit.

ICD–10–CM code	Code description
F53.0	Postpartum depression.
F53.1	Puerperal psychosis.
O30.131	Triplet pregnancy, trichorionic/triamniotic, first trimester.
O30.132	Triplet pregnancy, trichorionic/triamniotic, second trimester.
O30.133	Triplet pregnancy, trichorionic/triamniotic, third trimester.
O30.139	Triplet pregnancy, trichorionic/triamniotic, unspecified trimester.
O30.231	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, first trimester.
O30.232	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, second trimester.
O30.233	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, third trimester.
O30.239	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, unspecified trimester.
O30.831	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, first trimester.
O30.832	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, second trimester.
O30.833	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, third trimester.
O30.839	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, unspecified trimester.
O86.00	Infection of obstetric surgical wound, unspecified.
O86.01	Infection of obstetric surgical wound, superficial incisional site.
O86.02	Infection of obstetric surgical wound, deep incisional site.
O86.03	Infection of obstetric surgical wound, organ and space site.
O86.04	Sepsis following an obstetrical procedure.
O86.09	Infection of obstetric surgical wound, other surgical site.

In addition, as discussed in section II.F.15. of the preamble of the proposed rule, Table 6C.—Invalid Diagnosis Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed the diagnosis codes that will no longer be effective as of October 1, 2018. Included in this table are two ICD–10–CM diagnosis codes currently listed on the Maternity Diagnoses Category edit code list: ICD–10–CM diagnosis codes F53 (Puerperal psychosis) and O86.0 (Infection of obstetric surgical wound). In the proposed rule, we proposed to remove these codes from the Maternity Diagnoses Category Edit code list. We also proposed to continue to include the other existing diagnosis codes currently listed under the Maternity Diagnoses Category edit code list.

Comment: Commenters agreed with the proposal to add the diagnosis codes listed in the table above to the Maternity Diagnoses Category edit code list. Commenters also agreed with the proposal to remove ICD–10–CM diagnosis codes F53 and O86.0 from the Maternity Diagnoses Category edit code list.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add the diagnosis codes listed in the table above to the Maternity Diagnoses Category edit code list and our proposal to remove ICD–10–CM diagnosis codes F53 and O86.0 from the Maternity Diagnoses Category edit code list. We also are finalizing our proposal to maintain the other existing codes on the Maternity Diagnoses Category edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

b. Sex Conflict Edit

In the MCE, the Sex Conflict edit detects inconsistencies between a patient's sex and any diagnosis or procedure on the patient's record; for example, a male patient with cervical cancer (diagnosis) or a female patient with a prostatectomy (procedure). In both instances, the indicated diagnosis or the procedure conflicts with the stated sex of the patient. Therefore, the patient's diagnosis, procedure, or sex is presumed to be incorrect.

(1) Diagnoses for Females Only Edit

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20231), we indicated that we received a request to consider the addition of the following ICD–10–CM diagnosis codes to the list for the Diagnoses for Females Only edit.

ICD–10–CM code	Code description
Z30.015	Encounter for initial prescription of vaginal ring hormonal contraceptive.
Z31.7	Encounter for procreative management and counseling for gestational carrier.
Z98.891	History of uterine scar from previous surgery.

The requestor noted that, currently, ICD–10–CM diagnosis code Z30.44 (Encounter for surveillance of vaginal ring hormonal contraceptive device) is on the Diagnoses for Females Only edit code list and suggested that ICD–10–CM diagnosis code Z30.015, which also describes an encounter involving a vaginal ring hormonal contraceptive, be added to the Diagnoses for Females Only edit code list as well. In addition, the requestor suggested that ICD–10–CM diagnosis codes Z31.7 and Z98.891 be added to the Diagnoses for Females Only edit code list.

We reviewed ICD–10–CM diagnosis codes Z30.015, Z31.7, and Z98.891, and we agreed with the requestor that it is clinically appropriate to add these three ICD–10–CM diagnosis codes to the Diagnoses for Females Only edit code list because the conditions described by these codes are specific to and consistent with the female sex.

In addition, as discussed in section II.F.15. of the preamble of the proposed rule, Table 6A.—New Diagnosis Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed

the new diagnosis codes that had been approved to date, which will be effective with discharges occurring on and after October 1, 2018. The following table lists the new diagnosis codes that are associated with conditions consistent with the female sex. We proposed to add these ICD–10–CM diagnosis codes to the Diagnoses for Females Only edit code list under the Sex Conflict edit.

ICD–10–CM code	Code description
F53.0	Postpartum depression.
F53.1	Puerperal psychosis.
N35.82	Other urethral stricture, female.
N35.92	Unspecified urethral stricture, female.
O30.131	Triplet pregnancy, trichorionic/triamniotic, first trimester.
O30.132	Triplet pregnancy, trichorionic/triamniotic, second trimester.
O30.133	Triplet pregnancy, trichorionic/triamniotic, third trimester.
O30.139	Triplet pregnancy, trichorionic/triamniotic, unspecified trimester.
O30.231	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, first trimester.
O30.232	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, second trimester.
O30.233	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, third trimester.
O30.239	Quadruplet pregnancy, quadrachorionic/quadra-amniotic, unspecified trimester.
O30.831	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, first trimester.
O30.832	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, second trimester.
O30.833	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, third trimester.
O30.839	Other specified multiple gestation, number of chorions and amnions are both equal to the number of fetuses, unspecified trimester.
O86.00	Infection of obstetric surgical wound, unspecified.
O86.01	Infection of obstetric surgical wound, superficial incisional site.
O86.02	Infection of obstetric surgical wound, deep incisional site.
O86.03	Infection of obstetric surgical wound, organ and space site.
O86.04	Sepsis following an obstetrical procedure.
O86.09	Infection of obstetric surgical wound, other surgical site.
Q51.20	Other doubling of uterus, unspecified.
Q51.21	Other complete doubling of uterus.
Q51.22	Other partial doubling of uterus.
Q51.28	Other doubling of uterus, other specified.
Z13.32	Encounter for screening for maternal depression.

Comment: Commenters supported the proposals to add ICD–10–CM diagnosis codes Z30.015, Z31.7 and Z98.891 and the ICD–10–CM diagnosis codes listed in the table above to the Diagnoses for Females Only edit code list.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposals to add ICD–10–CM diagnosis codes Z30.015, Z31.7 and Z98.891 and the ICD–10–CM diagnosis codes listed in the table above to the Diagnoses for Females Only edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

In addition, as discussed in section II.F.15. of the preamble of the proposed rule, Table 6C.—Invalid Diagnosis Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed the diagnosis codes that are no longer effective as of October 1, 2018. Included in this table were the following three ICD–10–CM diagnosis codes currently listed on the Diagnoses for Females Only edit code list.

ICD–10–CM code	Code description
F53	Puerperal psychosis.
O86.0	Infection of obstetric surgical wound.
Q51.2	Other doubling of uterus, unspecified.

Because these three ICD–10–CM diagnosis codes will no longer be effective as of October 1, 2018, we proposed to remove them from the Diagnoses for Females Only edit code list under the Sex Conflict edit.

Comment: Commenters supported the proposal to remove ICD–10–CM diagnosis codes F53, O86.0, and Q51.2, from the Diagnoses for Females Only edit code list, as they are no longer valid effective October 1, 2018. One commenter also noted that there were typographical errors in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20232) for diagnosis codes O86.0 and Q51.2, where an extra zero was inadvertently included as a fifth digit.

Response: We appreciate the commenters' support. We agree with the commenter that there were typographical errors in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20232) for diagnosis codes O86.0 and Q51.2, where an extra zero was inadvertently included as a fifth digit, and have corrected these errors in the table presented in this final rule preamble.

After consideration of the public comments we received, we are finalizing our proposal to remove ICD–10–CM diagnosis codes F53, O86.0, and Q51.2, from the Diagnoses for Females Only edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

(2) Procedures for Females Only Edit

As discussed in section II.F.15. of the preamble of the FY 2019 IPPS/LTCH PPS proposed rule, Table 6B.—New Procedure Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed the procedure codes that had been approved to date, which will be effective with discharges occurring on and after October 1, 2018. In the proposed rule, we proposed to add the three ICD–10–PCS procedure codes in the following table describing procedures associated with the female sex to the Procedures for Females Only edit code list.

ICD–10–PCS code	Code description
0UY90Z0	Transplantation of uterus, allogeneic, open approach.
0UY90Z1	Transplantation of uterus, syngeneic, open approach.
0UY90Z2	Transplantation of uterus, zooplastic, open approach.

We also proposed to continue to include the existing procedure codes currently listed under the Procedures for Females Only edit code list.

Comment: Commenters supported the proposal to add ICD–10–PCS procedure codes 0UY90Z0, 0UY90Z1 and 0UY90Z2 to the Procedures for Females Only edit code list.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add ICD–10–PCS procedure codes 0UY90Z0, 0UY90Z1 and 0UY90Z2 to the Procedures for Females Only edit code list. We also are finalizing our proposal to maintain the existing list of codes on the Procedures for Females Only edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

(3) Diagnoses for Males Only Edit

As discussed in section II.F.15. of the preamble of the proposed rule, Table 6A.—New Diagnosis Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed the new diagnosis codes that had been approved to date, which will be effective with discharges occurring on and after October 1, 2018. The following table lists the new diagnosis codes that are associated with conditions consistent with the male sex. In the proposed rule, we proposed to add these ICD–10–CM diagnosis codes to the Diagnoses for Males Only edit code list under the Sex Conflict edit.

ICD–10–CM code	Code description
N35.016	Post-traumatic urethral stricture, male, overlapping sites.
N35.116	Postinfective urethral stricture, not elsewhere classified, male, overlapping sites.
N35.811	Other urethral stricture, male, meatal.
N35.812	Other urethral bulbous stricture, male.
N35.813	Other membranous urethral stricture, male.
N35.814	Other anterior urethral stricture, male, anterior.
N35.816	Other urethral stricture, male, overlapping sites.
N35.819	Other urethral stricture, male, unspecified site.
N35.911	Unspecified urethral stricture, male, meatal.
N35.912	Unspecified bulbous urethral stricture, male.
N35.913	Unspecified membranous urethral stricture, male.
N35.914	Unspecified anterior urethral stricture, male.
N35.916	Unspecified urethral stricture, male, overlapping sites.
N35.919	Unspecified urethral stricture, male, unspecified site.
N99.116	Postprocedural urethral stricture, male, overlapping sites.
R93.811	Abnormal radiologic findings on diagnostic imaging of right testicle.
R93.812	Abnormal radiologic findings on diagnostic imaging of left testicle.
R93.813	Abnormal radiologic findings on diagnostic imaging of testicles, bilateral.
R93.819	Abnormal radiologic findings on diagnostic imaging of unspecified testicle.

We also proposed to continue to include the existing diagnosis codes currently listed under the Diagnoses for Males Only edit code list.

Comment: Commenters supported the proposal to add the ICD–10–CM diagnosis codes listed in the table above to the Diagnoses for Males Only edit code list.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add the ICD–10–CM diagnosis codes listed in the table above to the Diagnoses for Males Only edit code list. We also are finalizing our proposal to maintain the existing list of codes on the Diagnoses for Males Only edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

c. Manifestation Code as Principal Diagnosis Edit

In the ICD–10–CM classification system, manifestation codes describe the manifestation of an underlying disease, not the disease itself and, therefore, should not be used as a principal diagnosis.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20232), we noted that, as discussed in section II.F.15. of the preamble of the proposed rule, Table 6A.—New Diagnosis Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed the new diagnosis codes that had been approved to date which will be effective with discharges

occurring on and after October 1, 2018. Included in this table are ICD–10–CM diagnosis codes K82.A1 (Gangrene of gallbladder in cholecystitis) and K82.A2 (Perforation of gallbladder in cholecystitis). We proposed to add these two ICD–10–CM diagnosis codes to the Manifestation Code as Principal Diagnosis edit code list because the type of cholecystitis would be required to be reported first. We also proposed to continue to include the existing diagnosis codes currently listed under the Manifestation Code as Principal Diagnosis edit code list. We invited public comments on our proposals.

Comment: Commenters supported the proposal to add ICD–10–CM diagnosis codes K82.A1 and K82.A2 to the Manifestation Code as Principal Diagnosis edit code list and to continue to include the existing diagnosis codes currently listed under the Manifestation Code as Principal Diagnosis edit code list.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add ICD–10–CM diagnosis codes K82.A1 and K82.A2 to the Manifestation Code as Principal Diagnosis edit code list and to continue to include the existing diagnosis codes currently listed under the Manifestation Code as Principal Diagnosis edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

d. Questionable Admission Edit

In the MCE, some diagnoses are not usually sufficient justification for admission to an acute care hospital. For example, if a patient is assigned ICD–10–CM diagnosis code R03.0 (Elevated blood pressure reading, without diagnosis of hypertension), the patient would have a questionable admission because an elevated blood pressure reading is not normally sufficient justification for admission to a hospital.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20233), we noted that, as discussed in section II.F.10. of the preamble of the proposed rule, we were proposing several modifications to the MS–DRGs under MDC 14 (Pregnancy, Childbirth and the Puerperium). We stated in the proposed rule that one aspect of these proposed modifications involves the GROUPER logic for the cesarean section and vaginal delivery MS–DRGs. We referred readers to section II.F.10. of the preamble of the proposed rule for a detailed discussion of the proposals regarding these MS–DRG modifications under MDC 14 and the relation to the MCE.

If a patient presents to the hospital and either a cesarean section or a vaginal delivery occurs, it is expected that, in addition to the specific type of delivery code, an outcome of delivery code is also assigned and reported on the claim. The outcome of delivery codes are ICD–10–CM diagnosis codes that are to be reported as secondary diagnoses as instructed in Section I.C.15.b.5 of the ICD–10–CM Official Guidelines for Coding and Reporting which states: ''A code from category Z37, Outcome of delivery, should be included on every maternal record when a delivery has occurred. These codes are not to be used on subsequent records or on the newborn record.'' Therefore, to encourage accurate coding and appropriate MS–DRG assignment in alignment with the proposed modifications to the delivery MS–DRGs, we proposed to create a new ''Questionable Obstetric Admission Edit'' under the Questionable Admission edit to read as follows:

''b. Questionable obstetric admission

ICD–10–PCS procedure codes describing a cesarean section or vaginal delivery are considered to be a questionable admission *except* when reported with a corresponding secondary diagnosis code describing the outcome of delivery.

Procedure code list for cesarean section

10D00Z0 Extraction of Products of Conception, High, Open Approach
10D00Z1 Extraction of Products of Conception, Low, Open Approach
10D00Z2 Extraction of Products of Conception, Extraperitoneal, Open Approach

Procedure code list for vaginal delivery

10D07Z3 Extraction of Products of Conception, Low Forceps, Via Natural or Artificial Opening
10D07Z4 Extraction of Products of Conception, Mid Forceps, Via Natural or Artificial Opening
10D07Z5 Extraction of Products of Conception, High Forceps, Via Natural or Artificial Opening
10D07Z6 Extraction of Products of Conception, Vacuum, Via Natural or Artificial Opening
10D07Z7 Extraction of Products of Conception, Internal Version, Via Natural or Artificial Opening
10D07Z8 Extraction of Products of Conception, Other, Via Natural or Artificial Opening
10D17Z9 Manual Extraction of Products of Conception, Retained, Via Natural or Artificial Opening
10D18Z9 Manual Extraction of Products of Conception, Retained, Via Natural or Artificial Opening Endoscopic
10E0XZZ Delivery of Products of Conception, External Approach

Secondary diagnosis code list for outcome of delivery

Z37.0 Single live birth
Z37.1 Single stillbirth
Z37.2 Twins, both liveborn
Z37.3 Twins, one liveborn and one stillborn
Z37.4 Twins, both stillborn
Z37.50 Multiple births, unspecified, all liveborn
Z37.51 Triplets, all liveborn
Z37.52 Quadruplets, all liveborn
Z37.53 Quintuplets, all liveborn
Z37.54 Sextuplets, all liveborn
Z37.59 Other multiple births, all liveborn
Z37.60 Multiple births, unspecified, some liveborn
Z37.61 Triplets, some liveborn
Z37.62 Quadruplets, some liveborn
Z37.63 Quintuplets, some liveborn
Z37.64 Sextuplets, some liveborn
Z37.69 Other multiple births, some liveborn
Z37.7 Other multiple births, all stillborn
Z37.9 Outcome of delivery, unspecified''

We proposed that the three ICD–10–PCS procedure codes listed in the following table would be used to establish the list of codes for the proposed Questionable Obstetric Admission edit logic for cesarean section.

ICD–10–PCS Procedure Codes for Cesarean Section Under the Proposed Questionable Obstetric Admission Edit Code List in the MCE

ICD–10–PCS code	Code description
10D00Z0	Extraction of products of conception, high, open approach.
10D00Z1	Extraction of products of conception, low, open approach.
10D00Z2	Extraction of products of conception, extraperitoneal, open approach.

We proposed that the nine ICD–10–PCS procedure codes listed in the following table would be used to establish the list of codes for the proposed new Questionable Obstetric

Admission edit logic for vaginal delivery.

ICD–10–PCS PROCEDURE CODES FOR VAGINAL DELIVERY UNDER THE PROPOSED QUESTIONABLE OBSTETRIC ADMISSION EDIT CODE LIST IN THE MCE

ICD–10–PCS code	Code description
10D07Z3	Extraction of products of conception, low forceps, via natural or artificial opening.
10D07Z4	Extraction of products of conception, mid forceps, via natural or artificial opening.
10D07Z5	Extraction of products of conception, high forceps, via natural or artificial opening.
10D07Z6	Extraction of products of conception, vacuum, via natural or artificial opening.
10D07Z7	Extraction of products of conception, internal version, via natural or artificial opening.
10D07Z8	Extraction of products of conception, other, via natural or artificial opening.
10D17Z9	Manual extraction of products of conception, retained, via natural or artificial opening.
10D18Z9	Manual extraction of products of conception, retained, via natural or artificial opening.
10E0XZZ	Delivery of products of conception, external approach.

We proposed that the 19 ICD–10–CM diagnosis codes listed in the following table would be used to establish the list of secondary diagnosis codes for the proposed new Questionable Obstetric Admission edit logic for outcome of delivery.

ICD–10–CM SECONDARY DIAGNOSIS CODES FOR OUTCOME OF DELIVERY UNDER THE PROPOSED QUESTIONABLE OBSTETRIC ADMISSION EDIT CODE LIST IN THE MCE

ICD–10–CM code	Code description
Z37.0	Single live birth.
Z37.1	Single stillbirth.
Z37.2	Twins, both liveborn.
Z37.3	Twins, one liveborn and one stillborn.
Z37.4	Twins, both stillborn.
Z37.50	Multiple births, unspecified, all liveborn.
Z37.51	Triplets, all liveborn.
Z37.52	Quadruplets, all liveborn.
Z37.53	Quintuplets, all liveborn.
Z37.54	Sextuplets, all liveborn.
Z37.59	Other multiple births, all liveborn.
Z37.60	Multiple births, unspecified, some liveborn.
Z37.61	Triplets, some liveborn.
Z37.62	Quadruplets, some liveborn.
Z37.63	Quintuplets, some liveborn.
Z37.64	Sextuplets, some liveborn.
Z37.69	Other multiple births, some liveborn.
Z37.7	Other multiple births, all liveborn.
Z37.9	Outcome of delivery, unspecified.

Comment: Commenters supported creating the new Questionable Obstetric Admission edit. Commenters also supported the list of diagnoses and procedure codes that we proposed to include for the proposed new edit. However, a few commenters expressed concern with several of the procedure codes that were proposed for inclusion under the vaginal delivery procedure code list. Specifically, the commenters identified that ICD–10–PCS procedure codes 10D17Z9 and 10D18Z9 may be reported for other clinical indications, in the absence of an outcome of delivery diagnosis code. Therefore, the commenter stated that the edit would be triggered erroneously for those case scenarios.

Response: We appreciate the commenters' support. We reviewed the procedure codes for which the commenters expressed concern under the vaginal delivery procedure code list (ICD–10–PCS procedure codes 10D17Z9 and 10D18Z9) and agree that there may be instances in which the procedure codes could be reported in the absence of an outcome of delivery diagnosis code. Therefore, we believe it is appropriate to remove these two procedure codes from the vaginal delivery procedure code list for the edit. In addition, we reviewed ICD–10–PCS procedure codes 10D07Z6 and 10D07Z8 and believe the procedures could potentially be performed for other clinical indications, in the absence of an outcome of delivery code, and erroneously trigger the proposed edit if reported.

After consideration of the public comments we received, we are finalizing our proposal to create the new Questionable Obstetric Admission edit. We also are finalizing our proposal to include ICD–10–PCS procedure codes 10D00Z0, 10D00Z1, and 10D00Z2 listed above for the ''Procedure code list for cesarean section'' portion of the edit. We are finalizing our proposal to include the procedure codes listed above for vaginal delivery with modifications. Specifically, we are not including ICD–10–PCS procedure codes 10D07Z6, 10D07Z87, 10D17Z9 and 10D18Z9 in the ''Procedure code list for vaginal delivery'' portion of the edit and finalizing the inclusion of the remaining

procedure codes listed above. In addition, we are finalizing our proposal to include the diagnosis codes listed above under the ''Secondary diagnosis code list for outcome of delivery'' portion of the edit. We are finalizing these changes as described above under the ICD–10 MCE Version 36, effective October 1, 2018.

e. Unacceptable Principal Diagnosis Edit

In the MCE, there are select codes that describe a circumstance which influences an individual's health status, but does not actually describe a current illness or injury. There also are codes that are not specific manifestations, but may be due to an underlying cause. These codes are considered unacceptable as a principal diagnosis. In limited situations, there are a few codes on the MCE Unacceptable Principal Diagnosis edit code list that are considered ''acceptable'' when a specified secondary diagnosis is also coded and reported on the claim.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20234), we noted that, as discussed in section II.F.9. of the preamble of the proposed rule, ICD–10–CM diagnosis codes Z49.02 (Encounter for fitting and adjustment of peritoneal dialysis catheter), Z49.31 (Encounter for adequacy testing for hemodialysis), and Z49.32 (Encounter for adequacy testing for peritoneal dialysis) are currently on the Unacceptable Principal Diagnosis edit code list. We proposed to add diagnosis code Z49.01 (Encounter for fitting and adjustment of extracorporeal dialysis catheter) to the Unacceptable Principal Diagnosis edit code list because this is an encounter code that would more likely be performed in an outpatient setting.

Comment: Some commenters supported the proposal to add ICD–10–CM diagnosis code Z49.01 to the Unacceptable Principal Diagnosis edit code list. However, some commenters recommended that CMS reconsider the proposal. These commenters did not dispute the fact that this code is more likely to be reported in the outpatient setting. However, they stated that the proposal to add it to the edit appeared to conflict with the proposal that was discussed in section II.F.9. for MDC 11 (Diseases and Disorders of the Kidney and Urinary Tract) and MS–DRG 685 (Admit for Renal Dialysis). According to the commenters, CMS proposed to only reassign diagnosis code Z49.01 as a principal diagnosis in the proposal to delete MS–DRG 685 and reassign diagnosis code Z49.01 to MS–DRGs 698, 699 and 700.

Response: We appreciate the commenters' support. With regard to the commenters who recommended that we reconsider the proposal to add diagnosis code Z49.01 to the Unacceptable Principal Diagnoses edit code list, we believe there is some confusion with respect to the proposal that was discussed in section II.F.9. of the preamble of the proposed rule. The proposal was to reassign diagnosis codes Z49.01, Z49.02, Z49.31 and Z49.32 to MS–DRGs 698, 699 and 700 (Other Kidney and Urinary Tract Diagnoses with MCC, with CC and without CC/MCC, respectively) with the proposed deletion of MS–DRG 685. We are unable to determine what aspect of the proposal that was discussed in section II.F. 9. of the preamble of the proposed rule was unclear. For example, it is not clear if the commenters' confusion relates to the GROUPER logic for MS–DRGs 698, 699, and 700 as shown in the ICD–10 MS–DRG Definitions Manual. As discussed elsewhere in this final rule, in the ICD–10 MS–DRG Definitions Manual, diagnosis codes listed under the heading of ''Principal Diagnosis'' may appear to indicate that those codes are to be reported as a principal diagnosis for assignment to the respective MS–DRG. However, the Definitions Manual display of the GROUPER logic assignment for each diagnosis code is for grouping purposes only and does not correspond to coding guidelines for reporting the principal diagnosis. In other words, cases will group according to the GROUPER logic, regardless of any coding guidelines or coverage policies. It is the MCE and other payer-specific edits that identify inconsistencies in the coding guidelines or coverage policies.

We also noted in the proposed rule that, as discussed in section II.F.15. of the preamble of the proposed rule, Table 6C.—Invalid Diagnosis Codes associated with the proposed rule (which is available via the internet on the CMS website at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) listed the diagnosis codes that will no longer be effective as of October 1, 2018. As previously noted, included in this table is an ICD–10–CM diagnosis code Z13.4 (Encounter for screening for certain developmental disorders in childhood) which is currently listed on the Unacceptable Principal Diagnoses edit code list. We proposed to remove this code from the Unacceptable Principal Diagnosis edit code list.

We also proposed to continue to include the other existing diagnosis codes currently listed under the Unacceptable Principal Diagnosis edit code list.

Comment: Commenters supported the proposal to remove ICD–10–CM diagnosis code Z13.4 from the Unacceptable Principal diagnoses category edit code list because it will be an invalid code effective October 1, 2018.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add ICD–10–CM diagnosis code Z49.01 to the Unacceptable Principal Diagnosis edit code list. We also are finalizing our proposal to remove ICD–10–CM diagnosis code Z13.4 from the Unacceptable Principal Diagnosis edit code list. In addition, we are finalizing our proposal to maintain the other existing codes on the Unacceptable Principal Diagnosis edit code list under the ICD–10 MCE Version 36, effective October 1, 2018.

Comment: One commenter requested that CMS review a coverage edit in the MCE manual and software. According to the commenter, CMS began covering multiple myeloma on January 1, 2016 under the condition of coverage with evidence development (CED) as shown in guidance located at: *https://www.cms.gov/Medicare/Coverage/Coverage-with-Evidence-Development/allo-MM.html*. The commenter noted that the applicable procedure codes along with diagnosis codes C90.00 (Multiple myeloma not having achieved remission) and C90.01 (Multiple myeloma in remission) are listed as ''non-covered'' in the MCE manual and encouraged CMS to review further and make any necessary updates as needed to ensure claims are processed appropriately.

Response: We thank the commenter for bringing this to our attention. Upon review, guidance was issued on January 27, 2016 for allogeneic hematopoietic stem cell transplant (HSCT) for certain Medicare beneficiaries with multiple myeloma under CED. This guidance is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Coverage/Coverage-with-Evidence-Development/allo-MM.html*. We agree with the commenter and, therefore, are removing the following noncovered procedure edit from the ICD–10 MCE Version 36 manual, effective October 1, 2018:

''*E. Non-covered procedure codes*

The procedures shown below are identified as non-covered procedures only when any code from the diagnoses list shown below is present as either a principal or secondary diagnosis.

Procedures

30230G2 Transfuse Allo Rel Bone Marrow in Periph Vein, Open

Diagnoses

C9000 Multiple myeloma not having achieved remission
C9001 Multiple myeloma in remission''

This update will also be reflected in the ICD–10 MCE software Version 36 effective October 1, 2018.

f. Future Enhancement

In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38053 through 38054), we noted the importance of ensuring accuracy of the coded data from the reporting, collection, processing, coverage, payment, and analysis aspects. We have engaged a contractor to assist in the review of the limited coverage and noncovered procedure edits in the MCE that may also be present in other claims processing systems that are utilized by our MACs. The MACs must adhere to criteria specified within the National Coverage Determinations (NCDs) and may implement their own edits in addition to what are already incorporated into the MCE, resulting in duplicate edits. The objective of this review is to identify where duplicate edits may exist and to determine what the impact might be if these edits were to be removed from the MCE.

We have noted that the purpose of the MCE is to ensure that errors and inconsistencies in the coded data are recognized during Medicare claims processing. In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20235), we indicated that we are considering whether the inclusion of coverage edits in the MCE necessarily aligns with that specific goal because the focus of coverage edits is on whether or not a particular service is covered for payment purposes and not whether it was coded correctly.

As we continue to evaluate the purpose and function of the MCE with respect to ICD–10, we encourage public input for future discussion. As we discussed in the FY 2018 IPPS/LTCH PPS final rule, we recognize a need to further examine the current list of edits and the definitions of those edits. We continue to encourage public comments on whether there are additional concerns with the current edits, including specific edits or language that should be removed or revised, edits that should be combined, or new edits that should be added to assist in detecting errors or inaccuracies in the coded data. Comments should be directed to the MS–DRG Classification Change Mailbox located at: *MSDRGClassificationChange@cms.hhs.gov* by November 1, 2018 for FY 2020.

14. Changes to Surgical Hierarchies

Some inpatient stays entail multiple surgical procedures, each one of which, occurring by itself, could result in assignment of the case to a different MS–DRG within the MDC to which the principal diagnosis is assigned. Therefore, it is necessary to have a decision rule within the GROUPER by which these cases are assigned to a single MS–DRG. The surgical hierarchy, an ordering of surgical classes from most resource-intensive to least resource-intensive, performs that function. Application of this hierarchy ensures that cases involving multiple surgical procedures are assigned to the MS–DRG associated with the most resource-intensive surgical class.

A surgical class can be composed of one or more MS–DRGs. For example, in MDC 11, the surgical class ''kidney transplant'' consists of a single MS–DRG (MS–DRG 652) and the class ''major bladder procedures'' consists of three MS–DRGs (MS–DRGs 653, 654, and 655). Consequently, in many cases, the surgical hierarchy has an impact on more than one MS–DRG. The methodology for determining the most resource-intensive surgical class involves weighting the average resources for each MS–DRG by frequency to determine the weighted average resources for each surgical class. For example, assume surgical class A includes MS–DRGs 001 and 002 and surgical class B includes MS–DRGs 003, 004, and 005. Assume also that the average costs of MS–DRG 001 are higher than that of MS–DRG 003, but the average costs of MS–DRGs 004 and 005 are higher than the average costs of MS–DRG 002. To determine whether surgical class A should be higher or lower than surgical class B in the surgical hierarchy, we would weigh the average costs of each MS–DRG in the class by frequency (that is, by the number of cases in the MS–DRG) to determine average resource consumption for the surgical class. The surgical classes would then be ordered from the class with the highest average resource utilization to that with the lowest, with the exception of ''other O.R. procedures'' as discussed in this final rule.

This methodology may occasionally result in assignment of a case involving multiple procedures to the lower-weighted MS–DRG (in the highest, most resource-intensive surgical class) of the available alternatives. However, given that the logic underlying the surgical hierarchy provides that the GROUPER search for the procedure in the most resource-intensive surgical class, in

cases involving multiple procedures, this result is sometimes unavoidable.

We note that, notwithstanding the foregoing discussion, there are a few instances when a surgical class with a lower average cost is ordered above a surgical class with a higher average cost. For example, the ''other O.R. procedures'' surgical class is uniformly ordered last in the surgical hierarchy of each MDC in which it occurs, regardless of the fact that the average costs for the MS–DRG or MS–DRGs in that surgical class may be higher than those for other surgical classes in the MDC. The ''other O.R. procedures'' class is a group of procedures that are only infrequently related to the diagnoses in the MDC, but are still occasionally performed on patients with cases assigned to the MDC with these diagnoses. Therefore, assignment to these surgical classes should only occur if no other surgical class more closely related to the diagnoses in the MDC is appropriate.

A second example occurs when the difference between the average costs for two surgical classes is very small. We have found that small differences generally do not warrant reordering of the hierarchy because, as a result of reassigning cases on the basis of the hierarchy change, the average costs are likely to shift such that the higher-ordered surgical class has lower average costs than the class ordered below it.

Based on the changes that we proposed to make in the FY 2019 IPPS/LTCH PPS proposed rule, as discussed in section II.F.10. of the preamble of this final rule, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20235), we proposed to revise the surgical hierarchy for MDC 14 (Pregnancy, Childbirth & the Puerperium) as follows: In MDC 14, we proposed to delete MS–DRGs 765 and 766 (Cesarean Section with and without CC/MCC, respectively) and MS–DRG 767 (Vaginal Delivery with Sterilization and/or D&C) from the surgical hierarchy. We proposed to sequence proposed new MS–DRGs 783, 784, and 785 (Cesarean Section with Sterilization with MCC, with CC and without CC/MCC, respectively) above proposed new MS–DRGs 786, 787, and 788 (Cesarean Section without Sterilization with MCC, with CC and without CC/MCC, respectively). We proposed to sequence proposed new MS–DRGs 786, 787, and 788 (Cesarean Section without Sterilization with MCC, with CC and without CC/MCC, respectively) above MS–DRG 768 (Vaginal Delivery with O.R. Procedure Except Sterilization and/or D&C). We also proposed to sequence proposed new MS–DRGs 796, 797, and 798 (Vaginal Delivery with Sterilization/D&C with MCC, with CC and without CC/MCC, respectively) below MS–DRG 768 and above MS–DRG 770 (Abortion with D&C, Aspiration Curettage or Hysterotomy). Finally, we proposed to sequence proposed new MS–DRGs 817, 818, and 819 (Other Antepartum Diagnoses with O.R. procedure with MCC, with CC and without CC/MCC, respectively) below MS–DRG 770 and above MS–DRG 769 (Postpartum and Post Abortion Diagnoses with O.R. Procedure). Our proposals for Appendix D MS–DRG Surgical Hierarchy by MDC and MS–DRG of the ICD–10 MS–DRG Definitions Manual Version 36 are illustrated in the following table.

PROPOSED SURGICAL HIERARCHY: MDC 14

[Pregnancy, childbirth and the puerperium]

Proposed New MS–DRGs 783–785	Cesarean Section with Sterilization.
Proposed New MS–DRGs 786–788	Cesarean Section without Sterilization.
MS–DRG 768	Vaginal Delivery with O.R. Procedures.
Proposed New MS–DRGs 796–798	Vaginal Delivery with Sterilization/D&C.
MS–DRG 770	Abortion with D&C, Aspiration Curettage or Hysterotomy.
Proposed New MS–DRGs 817–819	Other Antepartum Diagnoses with O.R. Procedure.
MS–DRG 769	Postpartum and Post Abortion Diagnoses with O.R. Procedure.

Comment: Commenters supported the proposed additions, deletions, and sequencing for the surgical hierarchy under MDC 14.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposed changes to Appendix D MS–DRG Surgical Hierarchy by MDC and MS–DRG of the ICD–10 MS–DRG Definitions Manual Version 36 as illustrated in the table above effective October 1, 2018.

As with other MS–DRG related issues, we encourage commenters to submit requests to examine ICD–10 claims pertaining to the surgical hierarchy via the CMS MS–DRG Classification Change Request Mailbox located at: *MSDRGClassificationChange@cms.hhs.gov* by November 1, 2018 for FY 2020 consideration.

15. Changes to the MS–DRG Diagnosis Codes for FY 2019

a. Background of the CC List and the CC Exclusions List

Under the IPPS MS–DRG classification system, we have developed a standard list of diagnoses that are considered CCs. Historically, we developed this list using physician panels that classified each diagnosis code based on whether the diagnosis, when present as a secondary condition, would be considered a substantial complication or comorbidity. A substantial complication or comorbidity was defined as a condition that, because of its presence with a specific principal diagnosis, would cause an increase in the length-of-stay by at least 1 day in at least 75 percent of the patients. However, depending on the principal diagnosis of the patient, some diagnoses on the basic list of complications and comorbidities may be excluded if they are closely related to the principal diagnosis. In FY 2008, we evaluated each diagnosis code to determine its impact on resource use and to determine the most appropriate CC subclassification (non-CC, CC, or MCC) assignment. We refer readers to sections II.D.2. and 3. of the preamble of the FY 2008 IPPS final rule with comment period for a discussion of the refinement of CCs in relation to the MS–DRGs we adopted for FY 2008 (72 FR 47152 through 47171).

b. Additions and Deletions to the Diagnosis Code Severity Levels for FY 2019

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20236), we indicated that the following tables identifying the proposed additions and deletions to the MCC severity levels list and the proposed additions and deletions to the CC severity levels list for FY 2019 were available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

Table 6I.1—Proposed Additions to the MCC List—FY 2019;

Table 6I.2—Proposed Deletions to the MCC List—FY 2019;

Table 6J.1—Proposed Additions to the CC List—FY 2019; and

Table 6J.2—Proposed Deletions to the CC List—FY 2019.

We invited public comments on our proposed severity level designations for the diagnosis codes listed in Table 6I.1. and Table 6J.1. We noted that, for Table 6I.2. and Table 6J.2., the proposed deletions are a result of code expansions, with the exception of diagnosis codes B20 and J80, which are the result of proposed severity level designation changes. Therefore, the diagnosis codes on these lists will no longer be valid codes, effective FY 2019.

We referred readers to the Tables 6I.1, 6I.2, 6J.1, and 6J.2 associated with the proposed rule, which are available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

Comment: Commenters supported the proposed additions and deletions for the diagnosis codes, and their corresponding severity level designations that were listed in Tables 6I.1, 6I.2, 6J.1, and 6J.2. associated with the FY 2019 IPPS/LTCH PPS proposed rule. However, a few commenters expressed concern with the proposed severity level designation change to diagnosis code B20, and recommended CMS conduct further analysis prior to finalizing any proposals.

Response: We appreciate the commenters' support. We refer readers to section II.F.16.b. of the preamble of this final rule for the detailed discussion of public comments related to the proposals and final statement of policy involving diagnosis codes B20 and J80.

Comment: One commenter disagreed with CMS' proposal to designate diagnosis codes K35.20 (Acute appendicitis with generalized peritonitis, without abscess) and T81.44XA (Sepsis following a procedure, initial encounter) as CC severity levels, and recommended CMS reconsider the conditions and classify the severity levels as MCCs. The commenter noted that the predecessor code for diagnosis code K35.20 is diagnosis code K35.2 (Acute appendicitis with generalized peritonitis), which is classified as a MCC severity level designation. Therefore, the commenter also believed that diagnosis code K35.20 should be designated as a MCC severity level. Additionally, the commenter stated that diagnosis code T81.44XA should be classified as an MCC severity level because sepsis is defined as a life-threatening organ dysfunction caused by a host response to infection.

Response: While we acknowledge that our process in assigning a severity level designation for a diagnosis code generally begins with identifying the designation of the predecessor code assignment, we believe that any new or revised clinical concepts included in the new diagnosis codes should also be considered when making a severity level designation. We reviewed diagnosis codes K35.20 and T81.44XA and our clinical advisors continue to support the CC severity level designation of these diagnosis codes. The commenter is correct that, effective October 1, 2018, diagnosis code K35.20 has been expanded from the current diagnosis code K35.2. However, we also note that, effective October 1, 2018, diagnosis code K35.2 has been expanded to create new diagnosis code K35.21 (Acute appendicitis with generalized peritonitis, with abscess). In addition, effective October 1, 2018, diagnosis code K35.3 (Acute appendicitis with localized peritonitis) has been expanded to create new diagnosis codes K35.30 (Acute appendicitis with localized peritonitis, without perforation or gangrene), K35.31 (Acute appendicitis with localized peritonitis and gangrene, without perforation), K35.32 (Acute appendicitis with perforation and localized peritonitis, without abscess) and K35.33 (Acute appendicitis with perforation and localized peritonitis, with abscess). Consistent with our usual process, in reviewing all of these newly expanded conditions, our clinical advisors considered the additional clinical concepts now included with each diagnosis code in evaluating the appropriate proposed severity level assignments. Our clinical advisors believed that the new diagnosis codes for acute appendicitis described as ''with abscess'' or ''with perforation'' were clinically qualified for the MCC severity level designation, while acute appendicitis ''without abscess'' or ''without perforation'' were clinically qualified for the CC severity level designation because cases with abscess or perforation would be expected to require more clinical resources and time to treat while those cases ''without abscess'' or ''without perforation'' are not as severe clinical conditions. As such, we disagree with the commenter that, based on the designation of its predecessor code alone, diagnosis code K35.20 should be designated as an MCC severity level instead of a CC for FY 2019. With regard to diagnosis code T81.44XA, our clinical advisors maintain that a CC severity level designation is most appropriate because the new code is clinically consistent with the predecessor code, T81.4XXA (Infection following a procedure, initial encounter), which also has a CC severity level designation. Currently, under Version 35 of the ICD–10 MS–DRGs, diagnosis code T81.4XXA contains several inclusion terms (conditions for which the code may be reported), one of which is ''sepsis following a procedure''. Our clinical advisors do not believe that the creation of a unique diagnosis code to specifically identify this condition within the classification introduces a new clinical concept requiring a higher level of resources. The new diagnosis code provides additional detail as to the *type* of infection following a procedure. However, it is considered to be clinically similar to the current diagnosis code describing an infection following a procedure. We also note that an additional five new diagnosis codes describing infections of varying degrees following a procedure were created for FY 2019 based on the other inclusion terms that currently exist at diagnosis code T81.4XXA.

As shown in the table below and in Table 6J.1. associated with the proposed rule, a total of six new diagnosis codes were proposed to be designated at the CC severity level based on review of the predecessor code (T81.4XXA), clinical coherence, and resource considerations.

ICD–10–CM code	Code description
T81.40XA	Infection following a procedure, unspecified, initial encounter.
T81.41XA	Infection following a procedure, superficial incisional surgical site, initial encounter.
T81.42XA	Infection following a procedure, deep incisional surgical site, initial encounter.
T81.43XA	Infection following a procedure, organ and space surgical site, initial encounter.
T81.44XA	Sepsis following a procedure, initial encounter.
T81.49XA	Infection following a procedure, other surgical site, initial encounter.

Therefore, for the reasons discussed above, our clinical advisors continue to support the proposed CC severity level designation for diagnosis code T81.44XA for FY 2019.

In addition, because these diagnosis codes identified by the commenter are new, we do not have any claims data for further analysis. Once we have additional claims data to allow us to conduct further review, we can continue to examine these conditions to determine if their impact on resource use is equal to or above the expected value of a CC severity level designation.

After consideration of the public comments we received, we are finalizing our proposal to designate diagnosis codes K35.20 and T81.44XA as CC severity levels. We also are finalizing our other proposed additions and deletions with their corresponding severity level designations for FY 2019. We refer readers to Tables 6I.1., 6I.2, 6J.1, and 6J.2. associated with this final rule, which are available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

c. Principal Diagnosis Is Its Own CC or MCC

In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38060), we provided the public with notice of our plans to conduct a comprehensive review of the CC and MCC lists for FY 2019. In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38056 through 38057), we also finalized our proposal to maintain the existing lists of principal diagnosis codes in Table 6L.—Principal Diagnosis Is Its Own MCC List and Table 6M.—Principal Diagnosis Is Its Own CC List for FY 2018, without any changes to the existing lists, noting our plans to conduct a comprehensive review of the CC and MCC lists for FY 2019 (82 FR 38060). We stated that having multiple lists for CC and MCC diagnoses when reported as a principal and/or secondary diagnosis may not provide an accurate representation of resource utilization for the MS–DRGs.

We also stated that the purpose of the Principal Diagnosis Is Its Own CC or MCC Lists was to ensure consistent MS–DRG assignment between the ICD–9–CM and ICD–10 MS–DRGs. The Principal Diagnosis Is Its Own CC or MCC Lists were developed for the FY 2016 implementation of the ICD–10 version of the MS–DRGs to facilitate replication of the ICD–9–CM MS–DRGs. As part of our efforts to replicate the ICD–9–CM MS–DRGs, we implemented logic that may have increased the complexity of the MS–DRG assignment hierarchy and altered the format of the ICD–10 MS–DRG Definitions Manual. Two examples of workarounds used to facilitate replication are the proliferation of procedure clusters in the surgical MS–DRGs and the creation of the Principal Diagnosis Is Its Own CC or MCC Lists special logic.

The following paragraph was added to the Version 33 ICD–10 MS–DRG Definitions Manual to explain the use of the Principal Diagnosis Is Its Own CC or MCC Lists: ''A few ICD–10–CM diagnosis codes express conditions that are normally coded in ICD–9–CM using two or more ICD–9–CM diagnosis codes. In the interest of ensuring that the ICD–10 MS–DRGs Version 33 places a patient in the same DRG regardless whether the patient record were to be coded in ICD–9–CM or ICD–10–CM/PCS, whenever one of these ICD–10–CM combination codes is used as principal diagnosis, the cluster of ICD–9–CM codes that would be coded on an ICD–9–CM record is considered. If one of the ICD–9–CM codes in the cluster is a CC or MCC, then the single ICD–10–CM combination code used as a principal diagnosis must also imply the CC or MCC that the ICD–9–CM cluster would have presented. The ICD–10–CM diagnoses for which this implication must be made are listed here.'' Versions 34 and 35 of the ICD–10 MS–DRG Definitions Manual also include this special logic for the MS–DRGs.

The Principal Diagnosis Is Its Own CC or MCC Lists were developed in the absence of ICD–10 coded data by mapping the ICD–9–CM diagnosis codes to the new ICD–10–CM combination codes. CMS has historically used clinical judgment combined with data analysis to assign a principal diagnosis describing a complex or severe condition to the appropriate DRG or MS–DRG. The initial ICD–10 version of the MS–DRGs replicated from the ICD–9 version can now be evaluated using clinical judgment combined with ICD–10 coded data because it is no longer necessary to replicate MS–DRG assignment across the ICD–9 and ICD–10 versions of the MS–DRGs for purposes of calculating relative weights. Now that ICD–10 coded data are available, in addition to using the data for calculating relative weights, ICD–10 data can be used to evaluate the effectiveness of the special logic for assigning a severity level to a principal diagnosis, as an indicator of resource utilization. In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20237), to evaluate the effectiveness of the special logic, we conducted analysis of the ICD–10 coded data combined with clinical review to determine whether to propose to keep the special logic for assigning a severity level to a principal diagnosis, or to propose to remove the special logic and use other available means of assigning a complex principal diagnosis to the appropriate MS–DRG.

In the proposed rule, using claims data from the September 2017 update of the FY 2017 MedPAR file, we employed the following method to determine the impact of removing the special logic used in the current Version 35 GROUPER to process claims containing a code on the Principal Diagnosis Is Its Own CC or MCC Lists. Edits and cost estimations used for relative weight calculations were applied, resulting in 9,070,073 IPPS claims analyzed for this special logic impact evaluation. We refer readers to section II.G. of the preamble of this final rule for further information regarding the methodology for calculation of the relative weights.

First, we identified the number of cases potentially impacted by the special logic. We identified 310,184 cases reporting a principal diagnosis on the Principal Diagnosis Is Its Own CC or MCC lists. Of the 310,184 total cases that reported a principal diagnosis code on the Principal Diagnosis Is Its Own CC or MCC Lists, 204,749 cases also reported a secondary diagnosis code at the same severity level or higher severity level, and therefore the special logic had no impact on MS–DRG assignment. However, of the 310,184 total cases, there were 105,435 cases that did not report a secondary diagnosis code at the same severity level or higher severity level, and therefore the special logic could potentially impact MS–DRG assignment, depending on the specific severity leveling structure of the base DRG.

Next, we removed the special logic in the GROUPER that is used for processing claims reporting a principal diagnosis on the Principal Diagnosis Is Its Own CC or MCC Lists, thereby creating a Modified Version 35 GROUPER. Using this Modified Version 35 GROUPER, we reprocessed the 105,435 claims for which the principal diagnosis code was the sole source of a MCC or CC on the case, to obtain data for comparison showing the effect of removing the special logic.

After removing the special logic in the Version 35 GROUPER for processing claims containing diagnosis codes on the Principal Diagnosis Is Its Own CC or MCC Lists, and reprocessing the claims using the Modified Version 35 GROUPER software, we found that 18,596 (6 percent) of the 310,184 cases reporting a principal diagnosis on the Principal Diagnosis Is Its Own CC or MCC Lists resulted in a different MS–

DRG assignment. Overall, the number of claims impacted by removal of the special logic (18,596) represents 0.2 percent of the 9,070,073 IPPS claims analyzed.

Below we provide a summary of the steps that we followed for the analysis performed.

Step 1. We analyzed 9,070,073 claims to determine the number of cases impacted by the special logic.

WITH SPECIAL LOGIC—9,070,073 CLAIMS ANALYZED

Number of cases reporting a principal diagnosis from the Principal Diagnosis Is Its Own CC/MCC lists (special logic)	310,184
Number of cases reporting an additional CC/MCC secondary diagnosis code at or above the level of the designated severity level of the principal diagnosis	204,749
Number of cases not reporting an additional CC/MCC secondary diagnosis code	105,435

Step 2. We removed special logic from GROUPER and created a modified GROUPER.

Step 3. We reprocessed 105,435 claims with modified GROUPER.

WITHOUT SPECIAL LOGIC—105,435 CLAIMS ANALYZED

Number of cases reporting a principal diagnosis from the Principal Diagnosis Is Its Own CC/MCC lists	310,184
Number of cases resulting in different MS–DRG assignment	18,596

To estimate the overall financial impact of removing the special logic from the GROUPER, we calculated the aggregate change in estimated payment for the MS–DRGs by comparing average costs for each MS–DRG affected by the change, before and after removing the special logic. Before removing the special logic in the Version 35 GROUPER, the cases impacted by the special logic had an estimated average payment of $58 million above the average costs for all the MS–DRGs to which the claim was originally assigned. After removing the special logic in the Version 35 GROUPER, the 18,596 cases impacted by the special logic had an estimated average payment of $39 million below the average costs for the newly assigned MS–DRGs.

We performed regression analysis to compare the proportion of variance in the MS–DRGs with and without the special logic. The results of the regression analysis showed a slight decrease in variance when the logic was removed. While the decrease itself was not statistically significant (an R-squared of 36.2603 percent after the special logic was removed, compared with an R-squared of 36.2501 percent in the current version 35 GROUPER), we note that the proportion of variance across the MS–DRGs essentially stayed the same, and certainly did not increase, when the special logic was removed.

We further examined the 18,596 claims that were impacted by the special logic in the GROUPER for processing claims containing a code on the Principal Diagnosis Is Its Own CC or MCC Lists. The 18,596 claims were analyzed by the principal diagnosis code and the MS–DRG assigned, resulting in 588 principal diagnosis and MS–DRG combinations or subsets. Of the 588 subsets of cases that utilized the special logic, 556 of the 588 subsets (95 percent) had fewer than 100 cases, 529 of the 588 subsets (90 percent) had fewer than 50 cases, and 489 of the 588 subsets (83 percent) had fewer than 25 cases.

We examined the 32 subsets of cases (5 percent of the 588 subsets) that utilized the special logic and had 100 or more cases. Of the 32 subsets of cases, 18 (56 percent) are similar in terms of average costs and length of stay to the MS–DRG assignment that results when the special logic is removed, and 14 of the 32 subsets of cases (44 percent) are similar in terms of average costs and length of stay to the MS–DRG assignment that results when the special logic is utilized.

The table below contains examples of four subsets of cases that utilize the special logic, comparing average length of stay and average costs between two MS–DRGs within a base DRG, corresponding to the MS–DRG assigned when the special logic is removed and the MS–DRG assigned when the special logic is utilized. All four subsets of cases involve the principal diagnosis code E11.52 (Type 2 diabetes mellitus with diabetic peripheral angiopathy with gangrene). There are four subsets of cases in this example because the records involving the principal diagnosis code E11.52 are assigned to four different base DRGs, one medical MS–DRG and three surgical MS–DRGs, depending on the procedure code(s) reported on the claim. All subsets of cases contain more than 100 claims. In three of the four subsets, the cases are similar in terms of average length of stay and average costs to the MS–DRG assignment that results when the special logic is removed, and in one of the four subsets, the cases are similar in terms of average length of stay and average costs to the MS–DRG assignment that results when the special logic is utilized.

As shown in the following table, using ICD–10–CM diagnosis code E11.52 (Type 2 diabetes mellitus with diabetic peripheral angiopathy with gangrene) as our example, the data findings show four different MS–DRG pairs for which code E11.52 was the principal diagnosis on the claim and where the special logic impacted MS–DRG assignment. For the first MS–DRG pair, we examined MS–DRGs 240 and 241 (Amputation for Circulatory System Disorders Except Upper Limb and Toe with CC and without CC/MCC, respectively). We found 436 cases reporting diagnosis code E11.52 as the principal diagnosis, with an average length of stay of 5.5 days and average costs of $11,769. These 436 cases are assigned to MS–DRG 240 with the special logic utilized, and assigned to MS–DRG 241 with the special logic removed. The total number of cases reported in MS–DRG 240 was 7,675, with an average length of stay of 8.3 days and average costs of $17,876. The total number of cases reported in MS–DRG 241 was 778, with an average length of stay of 5.0 days and average costs of $10,882. The 436 cases are more similar to MS–DRG 241 in terms of length of stay and average cost and less similar to MS–DRG 240.

For the second MS–DRG pair, we examined MS–DRGs 256 and 257 (Upper Limb and Toe Amputation for Circulatory System Disorders with CC and without CC/MCC, respectively). We found 193 cases reporting ICD–10–CM

diagnosis code E11.52 as the principal diagnosis, with an average length of stay of 4.2 days and average costs of $8,478. These 193 cases are assigned to MS–DRG 256 with the special logic utilized, and assigned to MS–DRG 257 with the special logic removed. The total number of cases reported in MS–DRG 256 was 2,251, with an average length of stay of 6.1 days and average costs of $11,987. The total number of cases reported in MS–DRG 257 was 115, with an average length of stay of 4.6 days and average costs of $7,794. These 193 cases are more similar to MS–DRG 257 in terms of average length of stay and average costs and less similar to MS–DRG 256.

For the third MS–DRG pair, we examined MS–DRGs 300 and 301 (Peripheral Vascular Disorders with CC and without CC/MCC, respectively). We found 185 cases reporting ICD–10–CM diagnosis code E11.52 as the principal diagnosis, with an average length of stay of 3.6 days and average costs of $5,981. These 185 cases are assigned to MS–DRG 300 with the special logic utilized, and assigned to MS–DRG 301 with the special logic removed. The total number of cases reported in MS–DRG 300 was 29,327, with an average length of stay of 4.1 days and average costs of $7,272. The total number of cases reported in MS–DRG 301 was 9,611, with an average length of stay of 2.8 days and average costs of $5,263. These 185 cases are more similar to MS–DRG 301 in terms of average length of stay and average costs and less similar to MS–DRG 300.

For the fourth MS–DRG pair, we examined MS–DRGs 253 and 254 (Other Vascular Procedures with CC and without CC/MCC, respectively). We found 225 cases reporting diagnosis code E11.52 as the principal diagnosis, with an average length of stay of 5.2 days and average costs of $17,901. These 225 cases are assigned to MS–DRG 253 with the special logic utilized, and assigned to MS–DRG 254 with the special logic removed. The total number of cases reported in MS–DRG 253 was 25,714, with an average length of stay of 5.4 days and average costs of $18,986. The total number of cases reported in MS–DRG 254 was 12,344, with an average length of stay of 2.8 days and average costs of $13,287. Unlike the previous three MS–DRG pairs, these 225 cases are more similar to MS–DRG 253 in terms of average length of stay and average costs and less similar to MS–DRG 254.

MS–DRG Pairs for Principal Diagnosis ICD–10–CM Code E11.52 With and Without Special MS–DRG Logic

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 240 and 241—Special logic impacted cases with ICD–10–CM code E11.52 as principal diagnosis	436	5.5	$11,769
MS–DRG 240—All cases	7,675	8.3	17,876
MS–DRG 241—All cases	778	5.0	10,882
MS–DRGs 253 and 254—Special logic impacted cases with ICD–10–CM E11.52 as principal diagnosis	225	5.2	17,901
MS–DRG 253—All cases	25,714	5.4	18,986
MS–DRG 254—All cases	12,344	2.8	13,287
MS–DRGs 256 and 257—Special logic impacted cases with ICD–10–CM E11.52 as principal diagnosis	193	4.2	8,478
MS–DRG 256—All cases	2,251	6.1	11,987
MS–DRG 257—All cases	115	4.6	7,794
MS–DRGs 300 and 301—Special logic impacted cases with ICD–10–CM E11.52 as principal diagnosis	185	3.6	5,981
MS–DRG 300—All cases	29,327	4.1	7,272
MS–DRG 301—All cases	9,611	2.8	5,263

Based on our analysis of the data, we stated that we believe that there may be more effective indicators of resource utilization than the Principal Diagnosis Is Its Own CC or MCC Lists and the special logic used to assign clinical severity to a principal diagnosis. As stated in the proposed rule and earlier in this discussion, it is no longer necessary to replicate MS–DRG assignment across the ICD–9 and ICD–10 versions of the MS–DRGs. The available ICD–10 data can now be used to evaluate other indicators of resource utilization.

Therefore, as an initial recommendation from the first phase in our comprehensive review of the CC and MCC lists, we proposed to remove the special logic in the GROUPER for processing claims containing a diagnosis code from the Principal Diagnosis Is Its Own CC or MCC Lists, and we proposed to delete the tables containing the lists of principal diagnosis codes, Table 6L.—Principal Diagnosis Is Its Own MCC List and Table 6M.—Principal Diagnosis Is Its Own CC List, from the ICD–10 MS–DRG Definitions Manual for FY 2019. We invited public comments on our proposals.

Comment: Commenters supported the proposed deletion of the Principal Diagnosis Is Its Own CC or MCC logic. One commenter stated that the lists were created to facilitate replication of the ICD–9 based MS–DRGs and are an artifact of the ICD–10 transitions. Another commenter recommended removing some of the conditions that are currently on the lists but expressed concern that eliminating the logic completely could impact the ability to measure a patient's severity of illness. One commenter noted that CMS described its internal comprehensive review and analysis that were conducted, which provided some level of insight for the proposal; however, the overarching comment was that CMS believed there were more effective indicators of resource utilization. Other commenters disagreed with CMS' proposal to ''globally'' remove the Principal Diagnosis Is Its Own CC or MCC logic. A few commenters stated that a more detailed analysis, consistent with the comprehensive CC/MCC analysis approach conducted for severity level changes, should occur. One commenter recommended that the logic described as part of the MS–DRG Conversion Project with the MCC and CC translations from ICD–9 to ICD–10 be considered. Another commenter acknowledged that CMS is no longer attempting to replicate the ICD–9 based MS–DRG GROUPER logic. However, this commenter noted that the conditions represented by the ICD–10–CM combination codes are clinically the

same conditions that were CCs or MCCs under ICD–9–CM.

Response: We appreciate the commenters' support. With regard to the commenter who recommended removing some of the conditions that are currently on the lists but expressed concern that eliminating the logic completely could impact the ability to measure a patient's severity of illness, we disagree because, in general, the description of a diagnosis code itself describes or implies a certain level of severity. In addition, there are other factors to consider besides the principal diagnosis when determining severity of illness and resource utilization. In response to the other commenters who disagreed with our proposal to remove the Principal Diagnosis Is Its Own CC or MCC logic and recommended that we perform an analysis consistent with the comprehensive CC/MCC analysis, we note that such an analysis would not be conclusive because the purpose of the comprehensive CC/MCC analysis is to evaluate the impact in resource use for patients with conditions reported as secondary diagnoses. We believe that the analysis that was performed and discussed in the proposed rule was appropriate for assessing if we should maintain the special logic that currently exists for assigning a severity level to a principal diagnosis, as well as to assess whether it would be appropriate to propose removing the special logic and utilize alternate methods to evaluate what should be considered a complex principal diagnosis for MS–DRG assignment purposes. As stated in the proposed rule (83 FR 20237), CMS has historically used clinical judgment combined with data analysis to assign a principal diagnosis describing a complex or severe condition to the appropriate MS–DRG. We also note that, as stated in the proposed rule (83 FR 20238), the findings from our analysis of the 18,596 claims that were impacted by the special logic in the GROUPER for processing claims containing a code on the Principal Diagnosis Is Its Own CC or MCC Lists demonstrated that 556 of the 588 subsets had fewer than 100 cases. The low number of cases means that if the special logic had been proposed for the first time under ICD–10, 95 percent of the diagnosis codes that were responsible for 95 percent of the cases using the special logic would not have met the criteria for proposing a change to their severity level. With regard to the commenter who stated that the conditions represented by the ICD–10–CM combination codes are clinically the same conditions that were CCs or MCCs under ICD–9–CM, we note that combination diagnosis codes are a feature of the classification of both ICD–9–CM and ICD–10–CM. The majority of the combination diagnosis codes in ICD–9–CM are also combination codes in ICD–10–CM. The current list of ICD–10–CM codes that are included in the special logic is a result of the fact that the codes were classified differently in ICD–9–CM than in ICD–10–CM. Diagnoses represented as two separate codes under ICD–9–CM were represented in a combination code under ICD–10–CM. Codes that were combination codes in both ICD–9–CM and ICD–10–CM do not have any special severity logic applied, regardless of the clinical severity of the conditions described, or the increased use of resources that could be associated with a particular combination principal diagnosis. As a result, the categorization of ICD–10–CM codes into lists wherein the principal diagnosis is its own CC or MCC is based not on a systematic clinical evaluation of the severity of illness of patients with these combination diagnosis codes, or on a systematic evaluation of data containing these combination diagnosis codes used as principal diagnosis, but on a collection of codes selected exclusively because there were structural differences between the classification scheme in ICD–9–CM versus ICD–10–CM. Now that ICD–10 coded data are available, it can be used to evaluate other indicators of resource utilization, along with clinical judgment.

After consideration of the public comments we received, we are finalizing our proposal to remove the special logic in the GROUPER for processing claims containing a code on the Principal Diagnosis Is Its Own CC or MCC Lists as an initial step in our first phase of the comprehensive review of the CC and MCC lists. We also are finalizing our proposal to delete the tables containing the lists of principal diagnosis codes, Table 6L.—Principal Diagnosis Is Its Own MCC List and Table 6M.—Principal Diagnosis Is Its Own CC List, from the ICD–10 MS–DRG Definitions Manual Version 36, effective October 1, 2018.

d. CC Exclusions List for FY 2019

In the September 1, 1987 final notice (52 FR 33143) concerning changes to the DRG classification system, we modified the GROUPER logic so that certain diagnoses included on the standard list of CCs would not be considered valid CCs in combination with a particular principal diagnosis. We created the CC Exclusions List for the following reasons: (1) To preclude coding of CCs for closely related conditions; (2) to preclude duplicative or inconsistent coding from being treated as CCs; and (3) to ensure that cases are appropriately classified between the complicated and uncomplicated DRGs in a pair.

In the May 19, 1987 proposed notice (52 FR 18877) and the September 1, 1987 final notice (52 FR 33154), we explained that the excluded secondary diagnoses were established using the following five principles:

- Chronic and acute manifestations of the same condition should not be considered CCs for one another;
- Specific and nonspecific (that is, not otherwise specified (NOS)) diagnosis codes for the same condition should not be considered CCs for one another;
- Codes for the same condition that cannot coexist, such as partial/total, unilateral/bilateral, obstructed/unobstructed, and benign/malignant, should not be considered CCs for one another;
- Codes for the same condition in anatomically proximal sites should not be considered CCs for one another; and
- Closely related conditions should not be considered CCs for one another.

The creation of the CC Exclusions List was a major project involving hundreds of codes. We have continued to review the remaining CCs to identify additional exclusions and to remove diagnoses from the master list that have been shown not to meet the definition of a CC. We refer readers to the FY 2014 IPPS/LTCH PPS final rule (78 FR 50541 through 50544) for detailed information regarding revisions that were made to the CC and CC Exclusion Lists under the ICD–9–CM MS–DRGs.

The ICD–10 MS–DRGs Version 35 CC Exclusion List is included as Appendix C in the ICD–10 MS–DRG Definitions Manual, which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*, and includes two lists identified as Part 1 and Part 2. Part 1 is the list of all diagnosis codes that are defined as a CC or MCC when reported as a secondary diagnosis. If the code designated as a CC or MCC is allowed with all principal diagnoses, the phrase ''NoExcl'' (for no exclusions) follows the CC or MCC designation. For example, ICD–10–CM diagnosis code A17.83 (Tuberculous neuritis) has this ''NoExcl'' entry. For all other diagnosis codes on the list, a link is provided to a collection of diagnosis codes which, when used as the principal diagnosis, would cause the CC or MCC diagnosis to be considered as a non-CC. Part 2 is the list of diagnosis codes designated as a MCC only for

patients discharged alive; otherwise, they are assigned as a non-CC.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20239), for FY 2019, we proposed changes to the ICD–10 MS–DRGs Version 36 CC Exclusion List. Therefore, we developed Table 6G.1.—Proposed Secondary Diagnosis Order Additions to the CC Exclusions List—FY 2019; Table 6G.2.—Proposed Principal Diagnosis Order Additions to the CC Exclusions List—FY 2019; Table 6H.1.—Proposed Secondary Diagnosis Order Deletions to the CC Exclusions List—FY 2019; and Table 6H.2.—Proposed Principal Diagnosis Order Deletions to the CC Exclusions List—FY 2019. For Table 6G.1, each secondary diagnosis code proposed for addition to the CC Exclusion List is shown with an asterisk and the principal diagnoses proposed to exclude the secondary diagnosis code are provided in the indented column immediately following it. For Table 6G.2, each of the principal diagnosis codes for which there is a CC exclusion is shown with an asterisk and the conditions proposed for addition to the CC Exclusion List that will not count as a CC are provided in an indented column immediately following the affected principal diagnosis. For Table 6H.1, each secondary diagnosis code proposed for deletion from the CC Exclusion List is shown with an asterisk followed by the principal diagnosis codes that currently exclude it. For Table 6H.2, each of the principal diagnosis codes is shown with an asterisk and the proposed deletions to the CC Exclusions List are provided in an indented column immediately following the affected principal diagnosis. Tables 6G.1., 6G.2., 6H.1., and 6H.2. associated with the proposed rule are available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

To identify new, revised and deleted diagnosis and procedure codes, for FY 2019, we developed Table 6A.—New Diagnosis Codes, Table 6B.—New Procedure Codes, Table 6C.—Invalid Diagnosis Codes, Table 6D.—Invalid Procedure Codes, Table 6E.—Revised Diagnosis Code Titles, and Table 6F.—Revised Procedure Code Titles for the proposed rule and this final rule.

These tables are not published in the Addendum to the proposed rule or the final rule but are available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html* as described in section VI. of the Addendum to this final rule. As discussed in section II.F.18. of the preamble of this final rule, the code titles are adopted as part of the ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee process. Therefore, although we publish the code titles in the IPPS proposed and final rules, they are not subject to comment in the proposed or final rules.

In the FY 2019 IPPS/LTCH PPS proposed rule, we invited public comments on the MDC and MS–DRG assignments for the new diagnosis and procedure codes as set forth in Table 6A.—New Diagnosis Codes and Table 6B.—New Procedure Codes. In addition, we invited public comments on the proposed severity level designations for the new diagnosis codes as set forth in Table 6A. and the proposed O.R. status for the new procedure codes as set forth in Table 6B.

Comment: One commenter addressed the proposed MS–DRG assignment for ICD–10–CM diagnosis code K35.20 (Acute appendicitis with generalized peritonitis, without abscess) that was included in Table 6A.—New Diagnosis Codes associated with the proposed rule. The commenter included the following codes that describe conditions involving appendicitis with peritonitis, abscess, perforation and gangrene.

ICD–10–CM code	Code description	Proposed MS–DRG
K35.20	Acute appendicitis with generalized peritonitis, without abscess	371, 372, 373
K35.21	Acute appendicitis with generalized peritonitis, with abscess	338, 339, 340 371, 372, 373
K35.30	Acute appendicitis with localized peritonitis, without perforation or gangrene	371, 372, 373
K35.31	Acute appendicitis with localized peritonitis and gangrene, without perforation	371, 372, 373
K35.32	Acute appendicitis with perforation and localized peritonitis, without abscess	338, 339, 340 371, 372, 373
K35.33	Acute appendicitis with perforation and localized peritonitis, with abscess	338, 339, 340 371, 372, 373
K35.890	Other acute appendicitis without perforation or gangrene	371, 372, 373
K35.891	Other acute appendicitis without perforation, with gangrene	371, 372, 373

The commenter stated that the proposed MS–DRG assignment for diagnosis code K35.20 is inappropriate and urged CMS to assign additional MS–DRGs and revise Table 6A. Specifically, the commenter expressed concern that MS–DRGs 371, 372, and 373 (Major Gastrointestinal Disorders and Peritoneal Infections with MCC, with CC, and without CC/MCC, respectively) were the only MS–DRGs assigned to diagnosis code K35.20 and requested that MS–DRGs 338, 339, and 340 (Appendectomy with Complicated Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) also be assigned. The commenter questioned why CMS only assigned MS–DRGs 371, 372, and 373 for diagnosis code K35.20 when diagnosis code K35.32 was assigned to MS–DRGs 338, 339, and 340 in addition to MS–DRGs 371, 372, and 373. The commenter stated that the FY 2019 ICD–10–CM Tabular List of Diseases and Injuries indicates that codes at the new subcategory K35.2 include a ruptured or perforated appendix, which is a complicating diagnosis and requires additional resources. The commenter expressed concern that the proposed MS–DRG assignment for diagnosis code K35.20 does not appropriately reflect the complications of the underlying disease or resources associated with acute appendicitis with generalized peritonitis. The commenter also noted that studies of patients admitted with appendicitis define complicated appendicitis as the presence of either generalized peritonitis due to perforated appendicitis or appendicular abscess. The commenter further noted that an appendix may perforate and cause generalized peritonitis without abscess if the perforation is walled off from the remainder of the peritoneal cavity because of its retroperitoneal location or by loops of small intestine or omentum.

Response: We note that the predecessor code for new diagnosis code K35.20 is diagnosis code K35.2 (Acute appendicitis with generalized peritonitis), which is currently assigned

to MS–DRGs 338, 339, 340, 371, 372, and 373. Diagnosis code K35.2 was subdivided into diagnosis codes K35.20 and K35.21. In assigning the proposed MS–DRGs for these new diagnosis codes, we considered the predecessor code MS–DRG assignment and the descriptions of the new diagnosis codes. Our clinical advisors determined that diagnosis code K35.21 ''with abscess'' was more appropriate to assign to MS–DRGs 338, 339, and 340 in addition to MS–DRGs 371, 372, and 373 versus diagnosis code K35.20 ''without abscess''. The degree and severity of the peritonitis in a patient with acute appendicitis can vary greatly. However, not all patients with peritonitis develop an abscess. While we agree that peritonitis is a serious condition when it develops in a patient with acute appendicitis, we also believe that, clinically, an abscess presents an even greater risk of complications that requires more resources as discussed in section II.F.15.b. of the preamble of this final rule with regard to the severity level designation.

We also consulted with the staff at the Centers for Disease Control's (CDC's) National Center for Health Statistics (NCHS) because NCHS has the lead responsibility for maintaining the ICD–10–CM diagnosis codes. The NCHS' staff acknowledged the clinical concerns of the commenter based on the manner in which diagnosis codes K35.2 and K35.3 were expanded and confirmed that they will consider further review of these newly expanded codes with respect to the clinical concepts.

Therefore, we maintain that the proposed MS–DRG assignment for diagnosis code K35.20 as shown in Table 6A is appropriate. Because the diagnosis codes that the commenter submitted in its comments are new, effective October 1, 2018, we do not yet have any claims data. We will continue to monitor these codes as data become available.

After consideration of the public comments we received, we are finalizing our proposal to assign diagnosis code K35.20 to MS–DRGs 371, 372, and 373 under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

Comment: One commenter recommended that the following new diagnosis codes that were included in Table 6A.—New Diagnosis Codes—FY 2019, be designated as a CC in the ICD–10–CM classification.

ICD–10–CM code	Code description
K61.31	Horseshoe abscess.
K61.39	Other ischiorectal abscess.
K61.5	Supralevator abscess.
K82.A1	Gangrene of gallbladder in cholecystitis.
O86.00	Infection of obstetric surgical wound, unspecified.
O86.01	Infection of obstetric surgical wound, superficial incisional site.
O86.02	Infection of obstetric surgical wound, deep incisional site.
O86.03	Infection of obstetric surgical wound, organ and space site.
O86.09	Infection of obstetric surgical wound, other surgical site.

According to the commenter, abscesses, postoperative infections, and gangrene of gallbladder warrant the CC designation because they are acute conditions and require antibiotics or surgical treatment and impact the length of stay. The commenter noted that, currently, diagnosis codes K61.3 (Ischiorectal abscess) and K61.4 (Intrasphincteric abscess) are designated as CCs. The commenter also noted that gangrene of gallbladder classifies to acute cholecystitis, which is a CC, and recommended that the codes listed in the above table all be designated as CCs.

Response: We appreciate the commenter's feedback on the proposed severity level designations of the diagnosis codes that were included in Table 6A.—New Diagnosis Codes—FY 2019. The commenter is correct that, currently, diagnosis codes K61.3 and K61.4 are designated as CCs. However, our clinical advisors reviewed diagnosis codes K61.31, K61.39, and K61.5 and continue to support maintaining the proposed non-CC designation because they do not agree from a clinical perspective that these conditions warrant a CC designation or significantly impact resource utilization as a secondary diagnosis. Specifically, our clinical advisors believe that these diagnosis codes described conditions that can range in severity and subsequently, the treatment that is rendered. With regard to the commenter's statement that abscesses, postoperative infections, and gangrene of gallbladder warrant the CC designation because they are acute conditions and require antibiotics or surgical treatment and impact the length of stay, we note that there are various types of abscesses and postoperative infections with varying levels of severity that do not always warrant surgical intervention.

With regard to the commenter's statement that gangrene of gallbladder classifies to acute cholecystitis which is a CC, we acknowledge that, currently, diagnosis code K81.0 (Acute cholecystitis) is a CC and has an inclusion term for gangrene of gallbladder. However, the new code description does not include the term ''acute''. Upon review of code K82.A1, our clinical advisors continue to support maintaining the proposed non-CC designation because they do not agree from a clinical perspective that this condition warrants a CC designation or significantly impacts resource utilization as a secondary diagnosis as the primary diagnosis likely is a more significant contributor to resource utilization. With regard to the codes describing infection of obstetrical wound of varying degrees and depths, the predecessor code O86.0 (Infection of obstetric wound) is currently classified as a non-CC and our clinical advisors agreed that, in the absence of data for the new codes, they are appropriately designated as non-CCs.

After consideration of the public comments we received, we are finalizing our proposed severity level assignments for the above listed diagnosis codes under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

We also are making available on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html* the following final tables associated with this final rule:

- Table 6A.—New Diagnosis Codes—FY 2019;
- Table 6B.—New Procedure Codes—FY 2019;
- Table 6C.—Invalid Diagnosis Codes—FY 2019;

- Table 6D.—Invalid Procedure Codes—FY 2019;
- Table 6E.—Revised Diagnosis Code Titles—FY 2019;
- Table 6F.—Revised Procedure Code Titles—FY 2019;
- Table 6G.1.—Secondary Diagnosis Order Additions to the CC Exclusions List—FY 2019;
- Table 6G.2.—Principal Diagnosis Order Additions to the CC Exclusions List—FY 2019;
- Table 6H.1.—Secondary Diagnosis Order Deletions to the CC Exclusions List—FY 2019;
- Table 6H.2.—Principal Diagnosis Order Deletions to the CC Exclusions List—FY 2019;
- Table 6I.1.—Additions to the MCC List—FY 2019;
- Table 6I.2.–Deletions to the MCC List—FY 2019;
- Table 6J.1.—Additions to the CC List—FY 2019; and
- Table 6J.2.—Deletions to the CC List—FY 2019.

We note that, as discussed in section II.F.15.c. of the preamble of this final rule, we proposed, and in this final rule are finalizing, to delete Table 6L. and Table 6M. from the ICD–10 MS–DRG Definitions Manual for FY 2019.

16. Comprehensive Review of CC List for FY 2019

a. Overview of Comprehensive CC/MCC Analysis

In the FY 2008 IPPS/LTCH PPS final rule (72 FR 47159), we described our process for establishing three different levels of CC severity into which we would subdivide the diagnosis codes. The categorization of diagnoses as an MCC, a CC, or a non-CC was accomplished using an iterative approach in which each diagnosis was evaluated to determine the extent to which its presence as a secondary diagnosis resulted in increased hospital resource use. We refer readers to the FY 2008 IPPS/LTCH PPS final rule (72 FR 47159) for a complete discussion of our approach. Since this comprehensive analysis was completed for FY 2008, we have evaluated diagnosis codes individually when receiving requests to change the severity level of specific diagnosis codes. However, given the transition to ICD–10–CM and the significant changes that have occurred to diagnosis codes since this review, we believe it is necessary to conduct a comprehensive analysis once again. We have begun this analysis and will discuss our findings in future rulemaking. We are currently using the same methodology utilized in FY 2008 and described below to conduct this analysis.

For each secondary diagnosis, we measured the impact in resource use for the following three subsets of patients:

(1) Patients with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs.

(2) Patients with at least one other secondary diagnosis that is a CC but none that is an MCC.

(3) Patients with at least one other secondary diagnosis that is an MCC.

Numerical resource impact values were assigned for each diagnosis as follows:

Value	Meaning
0	Significantly below expected value for the non-CC subgroup.
1	Approximately equal to expected value for the non-CC subgroup.
2	Approximately equal to expected value for the CC subgroup.
3	Approximately equal to expected value for the MCC subgroup.
4	Significantly above the expected value for the MCC subgroup.

Each diagnosis for which Medicare data were available was evaluated to determine its impact on resource use and to determine the most appropriate CC subclass (non-CC, CC, or MCC) assignment. In order to make this determination, the average cost for each subset of cases was compared to the expected cost for cases in that subset. The following format was used to evaluate each diagnosis:

Code	Diagnosis	Cnt1	C1	Cnt2	C2	Cnt3	C3

Count (Cnt) is the number of patients in each subset and C1, C2, and C3 are a measure of the impact on resource use of patients in each of the subsets. The C1, C2, and C3 values are a measure of the ratio of average costs for patients with these conditions to the expected average cost across all cases. The C1 value reflects a patient with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs. The C2 value reflects a patient with at least one other secondary diagnosis that is a CC but none that is a major CC. The C3 value reflects a patient with at least one other secondary diagnosis that is a major CC. A value close to 1.0 in the C1 field would suggest that the code produces the same expected value as a non-CC diagnosis. That is, average costs for the case are similar to the expected average costs for that subset and the diagnosis is not expected to increase resource usage. A higher value in the C1 (or C2 and C3) field suggests more resource usage is associated with the diagnosis and an increased likelihood that it is more like a CC or major CC than a non-CC. Thus, a value close to 2.0 suggests the condition is more like a CC than a non-CC but not as significant in resource usage as an MCC. A value close to 3.0 suggests the condition is expected to consume resources more similar to an MCC than a CC or non-CC. For example, a C1 value of 1.8 for a secondary diagnosis means that for the subset of patients who have the secondary diagnosis and have either no other secondary diagnosis present, or all the other secondary diagnoses present are non-CCs, the impact on resource use of the secondary diagnoses is greater than the expected value for a non-CC by an amount equal to 80 percent of the difference between the expected value of a CC and a non-CC (that is, the impact on resource use of the secondary diagnosis is closer to a CC than a non-CC).

These mathematical constructs are used as guides in conjunction with the judgment of our clinical advisors to classify each secondary diagnosis reviewed as an MCC, CC or non-CC. Our clinical panel reviews the resource use impact reports and suggests modifications to the initial CC subclass assignments when clinically appropriate.

b. Requested Changes to Severity Levels

(1) Human Immunodeficiency Virus [HIV] Disease

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20241), we received a request that we consider changing the severity level of ICD–10–CM diagnosis code B20 (Human immunodeficiency virus [HIV] disease) from an MCC to a CC. We used the approach outlined above to evaluate this request. The table below contains the data that were evaluated for this request.

ICD–10–CM diagnosis code	Cnt1	C1	Cnt2	C2	Cnt3	C3	Current CC subclass	Proposed CC subclass
B20 (Human immunodeficiency virus [HIV] disease)	2,918	0.9946	8,938	2.1237	11,479	3.0960	MCC	CC

We stated in the proposed rule that while the data did not strongly suggest that the categorization of HIV as an MCC was inaccurate, our clinical advisors indicated that, for many patients with HIV disease, symptoms are well controlled by medications. Our clinical advisors stated that if these patients have an HIV-related complicating disease, that complicating disease would serve as a CC or an MCC. Therefore, they advised us that ICD–10–CM diagnosis code B20 is more similar to a CC than an MCC. Based on the data results and the advice of our clinical advisors, we proposed to change the severity level of ICD–10–CM diagnosis code B20 from an MCC to a CC.

Comment: Commenters opposed the proposal to change the severity level for ICD–10–CM diagnosis code B20 from an MCC to a CC. The commenters stated that the change should not be made without strong supporting empirical data, referencing the language in the proposed rule that indicated that the data did not strongly suggest that the categorization of HIV as an MCC was inaccurate. One commenter indicated that patients with CD4 counts of less than 100, or elevated viral loads, would need more laboratory tests, more imaging, and a higher level of care even if they are in the hospital for a non-HIV related condition. This commenter suggested that if diagnosis code B20 is changed to a CC, CMS develop distinct codes for patients with AIDS based on their level of CD4 and whether viral loads are suppressed.

Response: While we stated in the proposed rule that the data did not strongly suggest correlation of a secondary diagnosis code of B20 with a severity level of an MCC was inaccurate, the data also did not definitively support maintaining a severity level of an MCC. While we understand that HIV is a serious disease that causes significant chronic illness and can lead to serious complications, we note that when a patient is admitted for a non-HIV related condition, our clinical advisors do not believe that the secondary diagnosis of HIV would be expected to result in the additional resources associated with an MCC. As explained in the proposed rule, our clinical advisors believe that, for many patients with HIV disease, symptoms are well controlled by medications, and if these patients have an HIV-related complicating disease, that complicating disease would serve as a CC or an MCC. For these reasons, our clinical advisors continue to believe that ICD–10–CM diagnosis code B20 is more accurately characterized as a CC.

As discussed in section II.F.18. of the preamble of this final rule, requests for new ICD–10–CM diagnosis codes are discussed at the ICD–10 Coordination and Maintenance Committee meetings. We refer the commenter to the National Center for Health Statistics (NCHS) website at *https://www.cdc.gov/nchs/icd/icd10_maintenance.html* for further information regarding these meetings and the process for how to request code updates.

After consideration of the public comments we received, we are finalizing our proposal to change the severity level of diagnosis code of B20 from an MCC to a CC.

(2) Acute Respiratory Distress Syndrome

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20241), we also received a request to change the severity level for ICD–10–CM diagnosis code J80 (Acute respiratory distress syndrome) from a CC to a MCC. We used the approach outlined above to evaluate this request. The following table contains the data that were evaluated for this request.

ICD–10–CM diagnosis code	Cnt1	C1	Cnt2	C2	Cnt3	C3	Current CC subclass	Proposed CC subclass
J80 (Acute respiratory distress syndrome)	1,840	1.7704	6,818	2.5596	18,376	3.3428	CC	MCC

We stated in the proposed rule that the data suggest that the resources involved in caring for a patient with this condition are 77 percent greater than expected when the patient has either no other secondary diagnosis present or all the other secondary diagnoses present are non-CCs. The resources are 56 percent greater than expected when reported in conjunction with another secondary diagnosis that is a CC, and 34 percent greater than expected when reported in conjunction with another secondary diagnosis code that is an MCC. Our clinical advisors agreed that the resources required to care for a patient with this secondary diagnosis are consistent with those of an MCC. Therefore, we proposed to change the severity level of ICD–10–CM diagnosis code J80 from a CC to an MCC.

Comment: Commenters supported the proposal to change the severity level of ICD–10–CM diagnosis code J80 from a CC to an MCC.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to change the severity level of ICD–10–CM diagnosis code J80 from a CC to an MCC.

(3) Encephalopathy

As discussed in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20241), we also received a request to change the severity level for ICD–10–CM diagnosis code G93.40 (Encephalopathy, unspecified) from an MCC to a non-CC. The requestor pointed out that the nature of the encephalopathy or its underlying cause should be coded. The requestor also noted that unspecified heart failure is a non-CC. We used the approach outlined earlier to evaluate this request. The following table contains the data that were evaluated for this request.

ICD–10–CM diagnosis code	Cnt1	C1	Cnt2	C2	Cnt3	C3	Current CC subclass	Proposed CC subclass
G93.40 (Encephalopathy, unspecified)	16,306	1.840	80,222	1.8471	139,066	2.4901	MCC	MCC

We stated in the proposed rule that the data suggest that the resources involved in caring for a patient with this condition are 84 percent greater than expected when the patient has either no other secondary diagnosis present or all the other secondary diagnoses present are non-CCs. We stated in the proposed rule that the resources are 15 percent lower than expected when reported in conjunction with another secondary diagnosis that is a CC, and 49 percent lower than expected when reported in conjunction with another secondary diagnosis code that is an MCC. The sentence should have read as follows: The resources are 15 percent lower than expected when reported in conjunction with another secondary diagnosis that is a CC, and 51 percent lower than expected when reported in conjunction with another secondary diagnosis code that is an MCC. We noted that the pattern observed in resource use for the condition of unspecified heart failure (ICD–10–CM diagnosis code I50.9) differs from that of unspecified encephalopathy. Our clinical advisors reviewed this request and agreed that, from a clinical standpoint, the resources involved in caring for a patient with this condition are aligned with those of an MCC. Therefore, we did not propose a change to the severity level for ICD–10–CM diagnosis code G93.40.

Comment: Several commenters supported the proposal to maintain the severity level for ICD–10–CM diagnosis code G93.40 as an MCC. One commenter opposed the proposal, stating that unspecified encephalopathy is poorly defined, not all specified encephalopathies are MCCs, and the MCC status creates an incentive for coding personnel to not pursue specificity of encephalopathy which could lead to a lower relative weight.

Response: We appreciate the commenters' support. After reviewing the rationale provided by the commenter who opposed our proposal, we concur with the commenter that unspecified encephalopathy is poorly defined, not all encephalopathies are MCCs, and the MCC status creates an incentive for coding personnel to not pursue specificity of encephalopathy. For these reason, our clinical advisors agree that it is appropriate to change the severity level from an MCC to a CC.

After consideration of the public comments we received, we are changing the severity level for ICD–10–CM diagnosis code G93.40 from an MCC to a CC.

(4) End-Stage Heart Failure and Hepatic Encephalopathy

Comment: One commenter stated that ICD–10–CM code I50.84 (End-stage heart failure) should be assigned the severity level of a CC and that hepatic encephalopathy should be assigned the severity level of an MCC. The commenter did not provide the specific ICD–10–CM diagnosis codes that describe hepatic encephalopathy.

Response: Because ICD–10–CM code I50.84 and the codes that describe hepatic encephalopathy referred to by the commenter are newly created codes, we do not yet have data with which to evaluate the commenter's request. We will consider these diagnosis codes during our ongoing comprehensive CC/MCC analysis once data become available.

After consideration of the public comment received, we are not changing the severity level of ICD–10–CM code I50.84 or the ICD–10–CM codes describing hepatic encephalopathy for FY 2019.

17. Review of Procedure Codes in MS DRGs 981 Through 983 and 987 Through 989

Each year, we review cases assigned to MS–DRGs 981, 982, and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) and MS–DRGs 987, 988, and 989 (Nonextensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) to determine whether it would be appropriate to change the procedures assigned among these MS–DRGs. MS–DRGs 981 through 983 and 987 through 989 are reserved for those cases in which none of the O.R. procedures performed are related to the principal diagnosis. These MS–DRGs are intended to capture atypical cases, that is, those cases not occurring with sufficient frequency to represent a distinct, recognizable clinical group.

a. Moving Procedure Codes From MS–DRGs 981 Through 983 or MS–DRGs 987 Through 989 Into MDCs

We annually conduct a review of procedures producing assignment to MS–DRGs 981 through 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) or MS–DRGs 987 through 989 (Nonextensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) on the basis of volume, by procedure, to see if it would be appropriate to move procedure codes out of these MS–DRGs into one of the surgical MS–DRGs for the MDC into which the principal diagnosis falls. The data are arrayed in two ways for comparison purposes. We look at a frequency count of each major operative procedure code. We also compare procedures across MDCs by volume of procedure codes within each MDC.

We identify those procedures occurring in conjunction with certain principal diagnoses with sufficient frequency to justify adding them to one of the surgical MS–DRGs for the MDC in which the diagnosis falls. Based on the results of our review of the claims data from the September 2017 update of the FY 2017 MedPAR file, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20242), we did not propose to move any procedures from MS–DRGs 981 through 983 or MS–DRGs 987 through 989 into one of the surgical MS–DRGs for the MDC into which the principal diagnosis is assigned.

Comment: One commenter identified two scenarios that involve some cases that are grouping to MS–DRGs 981 through 983 and MS–DRGs 987 through 989. The commenter stated that these grouping issues should be addressed by CMS and provided specific examples with a combination of several codes.

Response: We appreciate the commenter bringing these issues to our attention. However, we were unable to fully evaluate these scenarios for consideration in FY 2019. We intend to review and consider these items for FY 2020 as part of our ongoing analysis of the unrelated procedure MS–DRGs. As stated in section II.F.1.b. of the preamble of this final rule, we encourage individuals with comments about MS–DRG classification issues to submit these comments no later than November 1 of each year so that they can be considered for possible inclusion in the annual proposed rule.

After consideration of the public comments we received, we are not

moving any procedures from MS–DRGs 981 through 983 or MS–DRGs 987 through 989 into one of the surgical MS–DRGs for the MDC into which the principal diagnosis is assigned for FY 2019.

b. Reassignment of Procedures Among MS–DRGs 981 Through 983 and 987 Through 989

We also review the list of ICD–10–PCS procedures that, when in combination with their principal diagnosis code, result in assignment to MS–DRGs 981 through 983, or 987 through 989, to ascertain whether any of those procedures should be reassigned from one of those two groups of MS–DRGs to the other group of MS–DRGs based on average costs and the length of stay. We look at the data for trends such as shifts in treatment practice or reporting practice that would make the resulting MS–DRG assignment illogical. If we find these shifts, we would propose to move cases to keep the MS–DRGs clinically similar or to provide payment for the cases in a similar manner. Generally, we move only those procedures for which we have an adequate number of discharges to analyze the data.

Based on the results of our review of the September 2017 update of the FY 2017 MedPAR file, we also proposed to maintain the current structure of MS–DRGs 981 through 983 and MS–DRGs 987 through 989.

Comment: One commenter recommended that CMS classify the insertion and revision of intracardiac pacemakers as discussed in section II.F.4.a. of the proposed rule (83 FR 20204) as extensive O.R. procedures (MS–DRG 981 through 983). The commenter performed its own analysis where the results demonstrated the average costs of the intracardiac pacemakers were higher than the average costs of cases in MS–DRGs 981 through 983.

Response: We are unclear as to the nature of the commenter's request, as the intracardiac pacemaker procedure codes are already designated as extensive O.R. procedures in the GROUPER logic, as discussed in section II.F.4.a. of the preamble of this final rule

After consideration of the public comments we received, we are finalizing our proposal to maintain the current structure of MS–DRGs 981 through 983 and MS–DRGs 987 through 989 under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

c. Adding Diagnosis or Procedure Codes to MDCs

We received a request recommending that CMS reassign cases for congenital pectus excavatum (congenital depression of the sternum or concave chest) when reported with a procedure describing repositioning of the sternum (the Nuss procedure) from MS–DRGs 981, 982, and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) to MS–DRGs 515, 516, and 517 (Other Musculoskeletal System and Connective Tissue O.R. Procedures with MCC, with CC, and without CC/MCC, respectively). ICD–10–CM diagnosis code Q67.6 (Pectus excavatum) is reported for this congenital condition and is currently assigned to MDC 4 (Diseases and Disorders of the Respiratory System). ICD–10–PCS procedure code 0PS044Z (Reposition sternum with internal fixation device, percutaneous endoscopic approach) may be reported to identify the Nuss procedure and is currently assigned to MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue) in MS–DRGs 515, 516, and 517. The requester noted that *acquired* pectus excavatum (ICD–10–CM diagnosis code M95.4) groups to MS–DRGs 515, 516, and 517 when reported with a ICD–10–PCS procedure code describing repositioning of the sternum and requested that cases involving diagnoses describing *congenital* pectus excavatum also group to those MS–DRGs when reported with a ICD–10–PCS procedure code describing repositioning of the sternum.

Our analysis of this grouping issue confirmed that, when pectus excavatum (ICD–10–CM diagnosis code Q67.6) is reported as a principal diagnosis with a procedure such as the Nuss procedure (ICD–10–PCS procedure code 0PS044Z), these cases group to MS–DRGs 981, 982, and 983. The reason for this grouping is because whenever there is a surgical procedure reported on a claim, which is unrelated to the MDC to which the case was assigned based on the principal diagnosis, it results in an MS–DRG assignment to a surgical class referred to as ''unrelated operating room procedures.'' In the example provided, because the ICD–10–CM diagnosis code Q67.6 describing pectus excavatum is classified to MDC 4 and the ICD–10–PCS procedure code 0PS044Z is classified to MDC 8, the GROUPER logic assigns this case to the ''unrelated operating room procedures'' set of MS–DRGs.

During our review of ICD–10–CM diagnosis code Q67.6, we also reviewed additional ICD–10–CM diagnosis codes in the Q65 through Q79 code range to determine if there might be other conditions classified to MDC 4 that describe congenital malformations and deformities of the musculoskeletal system. We identified the following six ICD–10–CM diagnosis codes:

ICD–10–CM code	Code description
Q67.7	Pectus carinatum.
Q76.6	Other congenital malformations of ribs.
Q76.7	Congenital malformation of sternum.
Q76.8	Other congenital malformations of bony thorax.
Q76.9	Congenital malformation of bony thorax, unspecified.
Q77.2	Short rib syndrome.

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20243), we proposed to reassign ICD–10–CM diagnosis code Q67.6, as well as the additional six ICD–10–CM diagnosis codes above describing congenital musculoskeletal conditions, from MDC 4 to MDC 8 where other related congenital conditions that correspond to the musculoskeletal system are classified, as discussed further below.

We identified other related ICD–10–CM diagnosis codes that are currently assigned to MDC 8 in categories Q67 (Congenital musculoskeletal deformities of head, face, spine and chest), Q76 (Congenital malformations of spine and bony thorax), and Q77 (Osteochondrodysplasia with defects of growth of tubular bones and spine) that are listed in the following table.

ICD–10–CM code	Code description
Q67.0	Congenital facial asymmetry.
Q67.1	Congenital compression facies.
Q67.2	Dolichocephaly.
Q67.3	Plagiocephaly.
Q67.4	Other congenital deformities of skull, face and jaw.
Q67.5	Congenital deformity of spine.
Q67.8	Other congenital deformities of chest.
Q76.1	Klippel-Feil syndrome.
Q76.2	Congenital spondylolisthesis.
Q76.3	Congenital scoliosis due to congenital bony malformation.
Q76.411	Congenital kyphosis, occipito-atlanto-axial region.
Q76.412	Congenital kyphosis, cervical region.
Q76.413	Congenital kyphosis, cervicothoracic region.
Q76.414	Congenital kyphosis, thoracic region.
Q76.415	Congenital kyphosis, thoracolumbar region.
Q76.419	Congenital kyphosis, unspecified region.
Q76.425	Congenital lordosis, thoracolumbar region.
Q76.426	Congenital lordosis, lumbar region.
Q76.427	Congenital lordosis, lumbosacral region.
Q76.428	Congenital lordosis, sacral and sacrococcygeal region.
Q76.429	Congenital lordosis, unspecified region.
Q76.49	Other congenital malformations of spine, not associated with scoliosis.
Q76.5	Cervical rib.
Q77.0	Achondrogenesis.
Q77.1	Thanatophoric short stature.
Q77.3	Chondrodysplasia punctate.
Q77.4	Achondroplasia.
Q77.5	Diastrophic dysplasia.
Q77.6	Chondroectodermal dysplasia.
Q77.7	Spondyloepiphyseal dysplasia.
Q77.8	Other osteochondrodysplasia with defects of growth of tubular bones and spine.
Q77.9	Osteochondrodysplasia with defects of growth of tubular bones and spine, unspecified.

Next, we analyzed the MS–DRG assignments for the related codes listed above and found that cases with the following conditions are assigned to MS–DRGs 551 and 552 (Medical Back Problems with and without MCC, respectively) under MDC 8.

ICD–10–CM code	Code description
Q76.2	Congenital spondylolisthesis.
Q76.411	Congenital kyphosis, occipito-atlanto-axial region.
Q76.412	Congenital kyphosis, cervical region.
Q76.413	Congenital kyphosis, cervicothoracic region.
Q76.414	Congenital kyphosis, thoracic region.
Q76.415	Congenital kyphosis, thoracolumbar region.
Q76.419	Congenital kyphosis, unspecified region.
Q76.49	Other congenital malformations of spine, not associated with scoliosis.

The remaining conditions shown below are assigned to MS–DRGs 564, 565, and 566 (Other Musculoskeletal System and Connective Tissue Diagnoses with MCC, with CC, and without CC/MCC, respectively) under MDC 8.

ICD–10–CM code	Code description
Q67.0	Congenital facial asymmetry.
Q67.1	Congenital compression facies.
Q67.2	Dolichocephaly.
Q67.3	Plagiocephaly.
Q67.4	Other congenital deformities of skull, face and jaw.
Q67.5	Congenital deformity of spine.
Q67.8	Other congenital deformities of chest.
Q76.1	Klippel-Feil syndrome.
Q76.3	Congenital scoliosis due to congenital bony malformation.
Q76.425	Congenital lordosis, thoracolumbar region.
Q76.426	Congenital lordosis, lumbar region.
Q76.427	Congenital lordosis, lumbosacral region.
Q76.428	Congenital lordosis, sacral and sacrococcygeal region.

ICD–10–CM code	Code description
Q76.429	Congenital lordosis, unspecified region.
Q76.5	Cervical rib.
Q77.0	Achondrogenesis.
Q77.1	Thanatophoric short stature.
Q77.3	Chondrodysplasia punctate.
Q77.4	Achondroplasia.
Q77.5	Diastrophic dysplasia.
Q77.6	Chondroectodermal dysplasia.
Q77.7	Spondyloepiphyseal dysplasia.
Q77.8	Other osteochondrodysplasia with defects of growth of tubular bones and spine.
Q77.9	Osteochondrodysplasia with defects of growth of tubular bones and spine, unspecified.

As a result of our review, we proposed to reassign ICD–10–CM diagnosis code Q67.6, as well as the additional six ICD–10–CM diagnosis codes above describing congenital musculoskeletal conditions, from MDC 4 to MDC 8 in MS–DRGs 564, 565, and 566. Our clinical advisors agreed with this proposed reassignment because it is clinically appropriate and consistent with the other related ICD–10–CM diagnosis codes grouped in the Q65 through Q79 range that describe congenital malformations and deformities of the musculoskeletal system that are classified under MDC 8 in MS–DRGs 564, 565, and 566. We stated in the propsed rule that by reassigning ICD–10–CM diagnosis code Q67.6 and the additional six ICD–10–CM diagnosis codes listed in the table above from MDC 4 to MDC 8, cases reporting these ICD–10–CM diagnosis codes in combination with the respective ICD–10–PCS procedure code will reflect a more appropriate grouping from a clinical perspective because they will now be classified under a surgical musculoskeletal system related MS–DRG and will no longer result in an MS–DRG assignment to the ''unrelated operating room procedures'' surgical class.

In summary, we proposed to reassign ICD–10–CM diagnosis codes Q67.6, Q67.7, Q76.6, Q76.7, Q76.8, Q76.9, and Q77.2 from MDC 4 to MDC 8 in MS–DRGs 564, 565, and 566 (Other Musculoskeletal System and Connective Tissue Diagnoses with MCC, with CC, and without CC/MCC, respectively).

Comment: Commenters supported the proposal to reassign the seven ICD–10–CM diagnosis codes describing congenital musculoskeletal conditions from MDC 4 to MDC 8 into MS–DRGs 564, 565 and 566. The commenters stated that the proposal was reasonable, given the ICD–10–CM codes and the information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing the proposal to reassign ICD–10–CM diagnosis codes Q67.6, Q67.7, Q76.6, Q76.7, Q76.8, Q76.9, and Q77.2 from MDC 4 to MDC 8 in MS–DRGs 564, 565, and 566 under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

We also received a request recommending that CMS reassign cases for sternal fracture repair procedures from MS–DRGs 981, 982, and 983 and from MS–DRGs 166, 167 and 168 (Other Respiratory System O.R. Procedures with MCC, with CC and without CC/MCC, respectively) under MDC 4 to MS–DRGs 515, 516, and 517 under MDC 8. The requester noted that clavicle fracture repair procedures with an internal fixation device group to MS–DRGs 515, 516, and 517 when reported with an ICD–10–CM diagnosis code describing a fractured clavicle. However, sternal fracture repair procedures with an internal fixation device group to MS–DRGs 981, 982, and 983 or MS–DRGs 166, 167 and 168 when reported with an ICD–10–CM diagnosis code describing a fracture of the sternum. According to the requestor, because the clavicle and sternum are in the same anatomical region of the body, it would appear that assignment to MS–DRGs 515, 516, and 517 would be more appropriate for sternal fracture repair procedures.

The requestor provided the following list of ICD–10–PCS procedure codes in its request for consideration to reassign to MS–DRGs 515, 516 and 517 when reported with an ICD–10–CM diagnosis code for sternal fracture.

ICD–10–PCS code	Code description
0PS000Z	Reposition sternum with rigid plate internal fixation device, open approach.
0PS004Z	Reposition sternum with internal fixation device, open approach.
0PS00ZZ	Reposition sternum, open approach.
0PS030Z	Reposition sternum with rigid plate internal fixation device, percutaneous approach.
0PS034Z	Reposition sternum with internal fixation device, percutaneous approach.

We noted that the above five ICD–10–PCS procedure codes that may be reported to describe a sternal fracture repair are already assigned to MS–DRGs 515, 516, and 517 under MDC 8. In addition, ICD–10–PCS procedure codes 0PS000Z and 0PS030Z are assigned to MS–DRGs 166, 167 and 168 under MDC 4.

As noted in the previous discussion, whenever there is a surgical procedure reported on a claim, which is unrelated to the MDC to which the case was assigned based on the principal diagnosis, it results in an MS–DRG assignment to a surgical class referred to as ''unrelated operating room procedures.'' In the examples provided by the requestor, when the ICD–10–CM diagnosis code describing a sternal fracture is classified under MDC 4 and the ICD–10–PCS procedure code describing a sternal fracture repair procedure is classified under MDC 8, the GROUPER logic assigns these cases to the ''unrelated operating room procedures'' group of MS–DRGs (981, 982, and 983) and when the ICD–10–CM diagnosis code describing a sternal fracture is classified under MDC 4 and the ICD–10–PCS procedure code

describing a sternal repair procedure is also classified under MDC 4, the GROUPER logic assigns these cases to MS–DRG 166, 167, or 168.

For our review of this grouping issue and the request to have procedures for sternal fracture repairs assigned to MDC 8, we analyzed the ICD–10–CM diagnosis codes describing a sternal fracture currently classified under MDC 4. We identified 10 ICD–10–CM diagnosis codes describing a sternal fracture with an ''initial encounter'' classified under MDC 4 that are listed in the following table.

ICD–10–CM code	Code description
S22.20XA	Unspecified fracture of sternum, initial encounter for closed fracture.
S22.20XB	Unspecified fracture of sternum, initial encounter for open fracture.
S22.21XA	Fracture of manubrium, initial encounter for closed fracture.
S22.21XB	Fracture of manubrium, initial encounter for open fracture.
S22.22XA	Fracture of body of sternum, initial encounter for closed fracture.
S22.22XB	Fracture of body of sternum, initial encounter for open fracture.
S22.23XA	Sternal manubrial dissociation, initial encounter for closed fracture.
S22.23XB	Sternal manubrial dissociation, initial encounter for open fracture.
S22.24XA	Fracture of xiphoid process, initial encounter for closed fracture.
S22.24XB	Fracture of xiphoid process, initial encounter for open fracture.

Our analysis of this grouping issue confirmed that when 1 of the 10 ICD–10–CM diagnosis codes describing a sternal fracture listed in the table above from MDC 4 is reported as a principal diagnosis with an ICD–10–PCS procedure code for a sternal repair procedure from MDC 8, these cases group to MS–DRG 981, 982, or 983. We also confirmed that when 1 of the 10 ICD–10–CM diagnosis codes describing a sternal fracture listed in the table above from MDC 4 is reported as a principal diagnosis with an ICD–10–PCS procedure code for a sternal repair procedure from MDC 4, these cases group to MS–DRG 166, 167 or 168.

Our clinical advisors agreed with the requested reclassification of ICD–10–CM diagnosis codes S22.20XA, S22.20XB, S22.21XA, S22.21XB, S22.22XA, S22.22XB, S22.23XA, S22.23XB, S22.24XA, and S22.24XB describing a sternal fracture with an initial encounter from MDC 4 to MDC 8. They advised that this requested reclassification is clinically appropriate because it is consistent with the other related ICD–10–CM diagnosis codes that describe fractures of the sternum and which are classified under MDC 8. The ICD–10–CM diagnosis codes describing a sternal fracture currently classified under MDC 8 to MS–DRGs 564, 565, and 566 are listed in the following table.

ICD–10–CM code	Code description
S22.20XD	Unspecified fracture of sternum, subsequent encounter for fracture with routine healing.
S22.20XG	Unspecified fracture of sternum, subsequent encounter for fracture with delayed healing.
S22.20XK	Unspecified fracture of sternum, subsequent encounter for fracture with nonunion.
S22.20XS	Unspecified fracture of sternum, sequela.
S22.21XD	Fracture of manubrium, subsequent encounter for fracture with routine healing.
S22.21XG	Fracture of manubrium, subsequent encounter for fracture with delayed healing.
S22.21XK	Fracture of manubrium, subsequent encounter for fracture with nonunion.
S22.21XS	Fracture of manubrium, sequela.
S22.22XD	Fracture of body of sternum, subsequent encounter for fracture with routine healing.
S22.22XG	Fracture of body of sternum, subsequent encounter for fracture with delayed healing.
S22.22XK	Fracture of body of sternum, subsequent encounter for fracture with nonunion.
S22.22XS	Fracture of body of sternum, sequela.
S22.23XD	Sternal manubrial dissociation, subsequent encounter for fracture with routine healing.
S22.23XG	Sternal manubrial dissociation, subsequent encounter for fracture with delayed healing.
S22.23XK	Sternal manubrial dissociation, subsequent encounter for fracture with nonunion.
S22.23XS	Sternal manubrial dissociation, sequela.
S22.24XD	Fracture of xiphoid process, subsequent encounter for fracture with routine healing.
S22.24XG	Fracture of xiphoid process, subsequent encounter for fracture with delayed healing.
S22.24XK	Fracture of xiphoid process, subsequent encounter for fracture with nonunion.
S22.24XS	Fracture of xiphoid process, sequela.

We stated in the proposed rule that by reclassifying the 10 ICD–10–CM diagnosis codes listed in the table earlier in this section describing sternal fracture codes with an ''initial encounter'' from MDC 4 to MDC 8, the cases reporting these ICD–10–CM diagnosis codes in combination with the respective ICD–10–PCS procedure codes will reflect a more appropriate grouping from a clinical perspective and will no longer result in an MS–DRG assignment to the ''unrelated operating room procedures'' surgical class when reported with a surgical procedure classified under MDC 8.

Therefore, in the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20245), we proposed to reassign ICD–10–CM diagnosis codes S22.20XA, S22.20XB, S22.21XA, S22.21XB, S22.22XA, S22.22XB, S22.23XA, S22.23XB, S22.24XA, and S22.24XB from under MDC 4 to MDC 8 to MS–DRGs 564, 565, and 566. We invited public comments on our proposals.

Comment: Commenters supported the proposal to reassign the 10 ICD–10–CM diagnosis codes describing sternal fractures with an initial encounter from MDC 4 to MDC 8 into MS–DRGs 564, 565 and 566. The commenters stated that the proposal was reasonable, given

the ICD–10–CM codes and the information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing the proposal to reassign ICD–10–CM diagnosis codes S22.20XA, S22.20XB, S22.21XA, S22.21XB, S22.22XA, S22.22XB, S22.23XA, S22.23XB, S22.24XA, and S22.24XB from MDC 4 to MDC 8 to MS–DRGs 564, 565, and 566 under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

In addition, we received a request recommending that CMS reassign cases for rib fracture repair procedures from MS–DRGs 981, 982, and 983, and from MS–DRGs 166, 167 and 168 (Other Respiratory System O.R. Procedures with MCC, with CC, and without CC/MCC, respectively) under MDC 4 to MS–DRGs 515, 516, and 517 under MDC 8. The requestor noted that clavicle fracture repair procedures with an internal fixation device group to MS–DRGs 515, 516, and 517 when reported with an ICD–10–CM diagnosis code describing a fractured clavicle. However, rib fracture repair procedures with an internal fixation device group to MS–DRGs 981, 982, and 983 or to MS–DRGs 166, 167 and 168 when reported with an ICD–10–CM diagnosis code describing a rib fracture. According to the requestor, because the clavicle and ribs are in the same anatomical region of the body, it would appear that assignment to MS–DRGs 515, 516, and 517 would be more appropriate for rib fracture repair procedures.

The requestor provided the following list of 10 ICD–10–PCS procedure codes in its request for consideration for reassignment to MS–DRGs 515, 516 and 517 when reported with an ICD–10–CM diagnosis code for rib fracture.

ICD–10–PCS code	Code description
0PH104Z	Insertion of internal fixation device into 1 to 2 ribs, open approach.
0PH134Z	Insertion of internal fixation device into 1 to 2 ribs, percutaneous approach.
0PH144Z	Insertion of internal fixation device into 1 to 2 ribs, percutaneous endoscopic approach.
0PH204Z	Insertion of internal fixation device into 3 or more ribs, open approach.
0PH234Z	Insertion of internal fixation device into 3 or more ribs, percutaneous approach.
0PH244Z	Insertion of internal fixation device into 3 or more ribs, percutaneous endoscopic approach.
0PS104Z	Reposition 1 to 2 ribs with internal fixation device, open approach.
0PS134Z	Reposition 1 to 2 ribs with internal fixation device, percutaneous approach.
0PS204Z	Reposition 3 or more ribs with internal fixation, device, open approach.
0PS234Z	Reposition 3 or more ribs with internal fixation device, percutaneous approach.

We note that the above 10 ICD–10–PCS procedure codes that may be reported to describe a rib fracture repair are already assigned to MS–DRGs 515, 516, and 517 under MDC 8. In addition, 6 of the 10 ICD–10–PCS procedure codes listed above (0PH104Z, 0PH134Z, 0PH144Z, 0PH204Z, 0PH234Z and 0PH244Z) are also assigned to MS–DRGs 166, 167, and 168 under MDC 4.

As noted in the previous discussions above, whenever there is a surgical procedure reported on a claim, which is unrelated to the MDC to which the case was assigned based on the principal diagnosis, it results in an MS–DRG assignment to a surgical class referred to as ''unrelated operating room procedures.'' In the examples provided by the requestor, when the ICD–10–CM diagnosis code describing a rib fracture is classified under MDC 4 and the ICD–10–PCS procedure code describing a rib fracture repair procedure is classified under MDC 8, the GROUPER logic assigns these cases to the ''unrelated operating room procedures'' group of MS–DRGs (981, 982, and 983) and when the ICD–10–CM diagnosis code describing a rib fracture is classified under MDC 4 and the ICD–10–PCS procedure code describing a rib repair procedure is also classified under MDC 4, the GROUPER logic assigns these cases to MS–DRG 166, 167, or 168.

For our review of this grouping issue and the request to have procedures for rib fracture repairs assigned to MDC 8, we analyzed the ICD–10–CM diagnosis codes describing a rib fracture and found that, while some rib fracture ICD–10–CM diagnosis codes are classified under MDC 8 (which would result in those cases grouping appropriately to MS–DRGs 515, 516, and 517), there are other ICD–10–CM diagnosis codes that are currently classified under MDC 4. We identified the following ICD–10–CM diagnosis codes describing a rib fracture with an initial encounter classified under MDC 4, as listed in the following table.

ICD–10–CM code	Code description
S2231XA	Fracture of one rib, right side, initial encounter for closed fracture.
S2231XB	Fracture of one rib, right side, initial encounter for open fracture.
S2232XA	Fracture of one rib, left side, initial encounter for closed fracture.
S2232XB	Fracture of one rib, left side, initial encounter for open fracture.
S2239XA	Fracture of one rib, unspecified side, initial encounter for closed fracture.
S2239XB	Fracture of one rib, unspecified side, initial encounter for open fracture.
S2241XA	Multiple fractures of ribs, right side, initial encounter for closed fracture.
S2241XB	Multiple fractures of ribs, right side, initial encounter for open fracture.
S2242XA	Multiple fractures of ribs, left side, initial encounter for closed fracture.
S2242XB	Multiple fractures of ribs, left side, initial encounter for open fracture.
S2243XA	Multiple fractures of ribs, bilateral, initial encounter for closed fracture.
S2243XB	Multiple fractures of ribs, bilateral, initial encounter for open fracture.
S2249XA	Multiple fractures of ribs, unspecified side, initial encounter for closed fracture.
S2249XB	Multiple fractures of ribs, unspecified side, initial encounter for open fracture.
S225XXA	Flail chest, initial encounter for closed fracture.
S225XXB	Flail chest, initial encounter for open fracture.

Our analysis of this grouping issue confirmed that, when one of the following four ICD–10–PCS procedure codes identified by the requestor (and listed in the table earlier in this section) from MDC 8 (0PS104Z, 0PS134Z, 0PS204Z, or 0PS234Z) is reported to describe a rib fracture repair procedure with a principal diagnosis code for a rib fracture with an initial encounter listed in the table above from MDC 4, these cases group to MS–DRG 981, 982, or 983.

During our review of those four repositioning of the rib procedure codes, we also identified the following four ICD–10–PCS procedure codes classified to MDC 8 that describe repositioning of the ribs.

ICD–10–PCS code	Code description
0PS10ZZ	Reposition 1 to 2 ribs, open approach.
0PS144Z	Reposition 1 to 2 ribs with internal fixation device, percutaneous endoscopic approach.
0PS20ZZ	Reposition 3 or more ribs, open approach.
0PS244Z	Reposition 3 or more ribs with internal fixation device, percutaneous endoscopic approach.

We confirmed that when one of the above four procedure codes is reported with a principal diagnosis code for a rib fracture listed in the table above from MDC 4, these cases also group to MS–DRG 981, 982, or 983.

Lastly, we confirmed that when one of the six ICD–10–PCS procedure codes describing a rib fracture repair listed in the previous table above from MDC 4 is reported with a principal diagnosis code for a rib fracture with an initial encounter from MDC 4, these cases group to MS–DRG 166, 167, or 168.

In response to the request to reassign the procedure codes that describe a rib fracture repair procedure from MS–DRGs 981, 982, and 983 and from MS–DRGs 166, 167, and 168 under MDC 4 to MS–DRGs 515, 516, and 517 under MDC 8, as discussed above, the 10 ICD–10–PCS procedure codes submitted by the requestor that may be reported to describe a rib fracture repair are already assigned to MS–DRGs 515, 516, and 517 under MDC 8 and 6 of those 10 procedure codes (0PH104Z, 0PH134Z, 0PH144Z, 0PH204Z, 0PH234Z, and 0PH244Z) are also assigned to MS–DRGs 166, 167, and 168 under MDC 4.

We analyzed claims data from the September 2017 update of the FY 2017 MedPAR file for cases reporting a principal diagnosis of a rib fracture (initial encounter) from the list of diagnosis codes shown in the table above with one of the six ICD–10–PCS procedure codes describing the insertion of an internal fixation device into the rib (0PH104Z, 0PH134Z, 0PH144Z, 0PH204Z, 0PH234Z, and 0PH244Z) in MS–DRGs 166, 167, and 168 under MDC 4. Our findings are shown in the table below.

MS–DRGs FOR OTHER RESPIRATORY SYSTEM O.R. PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 166–All cases	22,938	10.2	$24,299
MS–DRG 166–Cases with principal diagnosis of rib fracture(s) and insertion of internal fixation device for the rib(s)	40	11.4	43,094
MS–DRG 167–All cases	10,815	5.7	13,252
MS–DRG 167–Cases with principal diagnosis of rib fracture(s) and insertion of internal fixation device for the rib(s)	10	6.7	30,617
MS–DRG 168–All cases	3,242	3.1	9,708
MS–DRG 168–Cases with principal diagnosis of rib fracture(s) and insertion of internal fixation device for the rib(s)	4	2	21,501

As shown in this table, there were a total of 22,938 cases in MS–DRG 166, with an average length of stay of 10.2 days and average costs of $24,299. In MS–DRG 166, we found 40 cases reporting a principal diagnosis of a rib fracture(s) with insertion of an internal fixation device for the rib(s), with an average length of stay of 11.4 days and average costs of $43,094. There were a total of 10,815 cases in MS–DRG 167, with an average length of stay of 5.7 days and average costs of $13,252. In MS–DRG 167, we found 10 cases reporting a principal diagnosis of a rib fracture(s) with insertion of an internal fixation device for the rib(s), with an average length of stay of 6.7 days and average costs of $30,617. There were a total of 3,242 cases in MS–DRG 168, with an average length of stay of 3.1 days and average costs of $9,708. In MS–DRG 168, we found 4 cases reporting a principal diagnosis of a rib fracture(s) with insertion of an internal fixation device for the rib(s), with an average length of stay of 2 days and average costs of $21,501. Overall, for MS–DRGs 166, 167, and 168, there were a total of 54 cases reporting a principal diagnosis of a rib fracture(s) with insertion of an internal fixation device for the rib(s), demonstrating that while rib fractures may require treatment, they are not typically corrected surgically. Our clinical advisors agreed with the current assignment of procedure codes to MS–DRGs 166, 167, and 168 that may be reported to describe repair of a rib fracture under MDC 4, as well as the current assignment of procedure codes to MS–DRGs 515, 516, and 517 that may be reported to describe repair of a rib fracture under MDC 8. Our clinical advisors noted that initial, acute rib fractures can cause numerous respiratory related issues requiring various treatments and problems with the healing of a rib fracture are considered musculoskeletal issues.

We also noted that the procedure codes submitted by the requestor may be reported for other indications and they are not restricted to reporting for repair of a rib fracture. Therefore, assignment of these codes to the MDC 4 MS–DRGs and the MDC 8 MS–DRGs is clinically appropriate.

To address the cases reporting procedure codes describing the

repositioning of a rib(s) that are grouping to MS–DRGs 981, 982, and 983 when reported with a principal diagnosis of a rib fracture (initial encounter), in the FY 2019 IPPS/LTCH PPS proposed rule, we proposed to add the following eight ICD–10–PCS procedure codes currently assigned to MDC 8 into MDC 4, in MS–DRGs 166, 167 and 168.

ICD–10–PCS code	Code description
0PS104Z	Reposition 1 to 2 ribs with internal fixation device, open approach.
0PS10ZZ	Reposition 1 to 2 ribs, open approach.
0PS134Z	Reposition 1 to 2 ribs with internal fixation device, percutaneous approach.
0PS144Z	Reposition 1 to 2 ribs with internal fixation device, percutaneous endoscopic approach.
0PS204Z	Reposition 3 or more ribs with internal fixation device, open approach.
0PS20ZZ	Reposition 3 or more ribs, open approach.
0PS234Z	Reposition 3 or more ribs with internal fixation device, percutaneous approach.
0PS244Z	Reposition 3 or more ribs with internal fixation device, percutaneous endoscopic approach.

Our clinical advisors agreed with this proposed addition to the classification structure because it is clinically appropriate and consistent with the other related ICD–10–PCS procedure codes that may be reported to describe rib fracture repair procedures with the insertion of an internal fixation device and are classified under MDC 4.

We stated in the proposed rule that by adding the eight ICD–10–PCS procedure codes describing repositioning of the rib(s) that may be reported to describe a rib fracture repair procedure under the classification structure for MDC 4, these cases will no longer result in an MS–DRG assignment to the ''unrelated operating room procedures'' surgical class when reported with a diagnosis code under MDC 4.

Comment: Commenters supported the proposal to add the eight ICD–10–PCS procedure codes describing repositioning of the ribs to MDC 4 in MS–DRGs 166, 167 and 168. The commenters stated that the proposal was reasonable, given the data, the ICD–10–PCS codes and the information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing the proposal to add ICD–10–PCS procedure codes 0PS104Z, 0PS10ZZ, 0PS134Z, 0PS144Z, 0PS204Z, 0PS20ZZ, 0PS234Z and 0PS244Z currently assigned to MDC 8 into MDC 4 in MS–DRGs 166, 167 and 168 under the ICD–10 MS–DRGs Version 36, effective October 1, 2018.

18. Changes to the ICD–10–CM and ICD–10–PCS Coding Systems

In September 1985, the ICD–9–CM Coordination and Maintenance Committee was formed. This is a Federal interdepartmental committee, co-chaired by the National Center for Health Statistics (NCHS), the Centers for Disease Control and Prevention (CDC), and CMS, charged with maintaining and updating the ICD–9–CM system. The final update to ICD–9–CM codes was made on October 1, 2013. Thereafter, the name of the Committee was changed to the ICD–10 Coordination and Maintenance Committee, effective with the March 19–20, 2014 meeting. The ICD–10 Coordination and Maintenance Committee addresses updates to the ICD–10–CM and ICD–10–PCS coding systems. The Committee is jointly responsible for approving coding changes, and developing errata, addenda, and other modifications to the coding systems to reflect newly developed procedures and technologies and newly identified diseases. The Committee is also responsible for promoting the use of Federal and non-Federal educational programs and other communication techniques with a view toward standardizing coding applications and upgrading the quality of the classification system.

The official list of ICD–9–CM diagnosis and procedure codes by fiscal year can be found on the CMS website at: *http://cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/codes.html.* The official list of ICD–10–CM and ICD–10–PCS codes can be found on the CMS website at: *http://www.cms.gov/Medicare/Coding/ICD10/index.html.*

The NCHS has lead responsibility for the ICD–10–CM and ICD–9–CM diagnosis codes included in the Tabular List and Alphabetic Index for Diseases, while CMS has lead responsibility for the ICD–10–PCS and ICD–9–CM procedure codes included in the Tabular List and Alphabetic Index for Procedures.

The Committee encourages participation in the previously mentioned process by health-related organizations. In this regard, the Committee holds public meetings for discussion of educational issues and proposed coding changes. These meetings provide an opportunity for representatives of recognized organizations in the coding field, such as the American Health Information Management Association (AHIMA), the American Hospital Association (AHA), and various physician specialty groups, as well as individual physicians, health information management professionals, and other members of the public, to contribute ideas on coding matters. After considering the opinions expressed at the public meetings and in writing, the Committee formulates recommendations, which then must be approved by the agencies.

The Committee presented proposals for coding changes for implementation in FY 2019 at a public meeting held on September 12–13, 2017, and finalized the coding changes after consideration of comments received at the meetings and in writing by November 13, 2017.

The Committee held its 2018 meeting on March 6–7, 2018. The deadline for submitting comments on these code proposals was scheduled for April 6, 2018. It was announced at this meeting that any new ICD–10–CM/PCS codes for which there was consensus of public support and for which complete tabular and indexing changes would be made by May 2018 would be included in the October 1, 2018 update to ICD–10–CM/ICD–10–PCS. As discussed in earlier sections of the preamble of this final rule, there are new, revised, and deleted ICD–10–CM diagnosis codes and ICD–10–PCS procedure codes that are captured in Table 6A.—New Diagnosis Codes, Table 6B.—New Procedure Codes, Table 6C.—Invalid Diagnosis Codes, Table 6D.—Invalid Procedure Codes, Table 6E.—Revised Diagnosis Code Titles, and Table 6F.—Revised Procedure Code Titles for this final rule, which are available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* The code titles are adopted as part of the

ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee process. Therefore, although we make the code titles available for the IPPS proposed rule, they are not subject to comment in the proposed rule. Because of the length of these tables, they were not published in the Addendum to the proposed rule. Rather, they are available via the internet as discussed in section VI. of the Addendum to the proposed rule.

Live Webcast recordings of the discussions of procedure codes at the Committee's September 12–13, 2017 meeting and March 6–7, 2018 meeting can be obtained from the CMS website at: *http://cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html?redirect=/icd9ProviderDiagnosticCodes/03_meetings.asp*. The minutes of the discussions of diagnosis codes at the September 12–13, 2017 meeting and March 6–7, 2018 meeting can be found at: *http://www.cdc.gov/nchs/icd/icd10cm_maintenance.html*. These websites also provide detailed information about the Committee, including information on requesting a new code, attending a Committee meeting, and timeline requirements and meeting dates.

We encourage commenters to address suggestions on coding issues involving diagnosis codes to: Donna Pickett, Co-Chairperson, ICD–10 Coordination and Maintenance Committee, NCHS, Room 2402, 3311 Toledo Road, Hyattsville, MD 20782. Comments may be sent by Email to: *nchsicd10cm@cdc.gov*.

Questions and comments concerning the procedure codes should be submitted via Email to: *ICDProcedureCodeRequest@cms.hhs.gov*.

In the September 7, 2001 final rule implementing the IPPS new technology add-on payments (66 FR 46906), we indicated we would attempt to include proposals for procedure codes that would describe new technology discussed and approved at the Spring meeting as part of the code revisions effective the following October.

Section 503(a) of Public Law 108–173 included a requirement for updating diagnosis and procedure codes twice a year instead of a single update on October 1 of each year. This requirement was included as part of the amendments to the Act relating to recognition of new technology under the IPPS. Section 503(a) amended section 1886(d)(5)(K) of the Act by adding a clause (vii) which states that the Secretary shall provide for the addition of new diagnosis and procedure codes on April 1 of each year, but the addition of such codes shall not require the Secretary to adjust the payment (or diagnosis-related group classification) until the fiscal year that begins after such date. This requirement improves the recognition of new technologies under the IPPS by providing information on these new technologies at an earlier date. Data will be available 6 months earlier than would be possible with updates occurring only once a year on October 1.

While section 1886(d)(5)(K)(vii) of the Act states that the addition of new diagnosis and procedure codes on April 1 of each year shall not require the Secretary to adjust the payment, or DRG classification, under section 1886(d) of the Act until the fiscal year that begins after such date, we have to update the DRG software and other systems in order to recognize and accept the new codes. We also publicize the code changes and the need for a mid-year systems update by providers to identify the new codes. Hospitals also have to obtain the new code books and encoder updates, and make other system changes in order to identify and report the new codes.

The ICD–10 (previously the ICD–9–CM) Coordination and Maintenance Committee holds its meetings in the spring and fall in order to update the codes and the applicable payment and reporting systems by October 1 of each year. Items are placed on the agenda for the Committee meeting if the request is received at least 2 months prior to the meeting. This requirement allows time for staff to review and research the coding issues and prepare material for discussion at the meeting. It also allows time for the topic to be publicized in meeting announcements in the **Federal Register** as well as on the CMS website. Final decisions on code title revisions are currently made by March 1 so that these titles can be included in the IPPS proposed rule. A complete addendum describing details of all diagnosis and procedure coding changes, both tabular and index, is published on the CMS and NCHS websites in June of each year. Publishers of coding books and software use this information to modify their products that are used by health care providers. This 5-month time period has proved to be necessary for hospitals and other providers to update their systems.

A discussion of this timeline and the need for changes are included in the December 4–5, 2005 ICD–9–CM Coordination and Maintenance Committee Meeting minutes. The public agreed that there was a need to hold the fall meetings earlier, in September or October, in order to meet the new implementation dates. The public provided comment that additional time would be needed to update hospital systems and obtain new code books and coding software. There was considerable concern expressed about the impact this April update would have on providers.

In the FY 2005 IPPS final rule, we implemented section 1886(d)(5)(K)(vii) of the Act, as added by section 503(a) of Public Law 108–173, by developing a mechanism for approving, in time for the April update, diagnosis and procedure code revisions needed to describe new technologies and medical services for purposes of the new technology add-on payment process. We also established the following process for making these determinations. Topics considered during the Fall ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee meeting are considered for an April 1 update if a strong and convincing case is made by the requester at the Committee's public meeting. The request must identify the reason why a new code is needed in April for purposes of the new technology process. The participants at the meeting and those reviewing the Committee meeting summary report are provided the opportunity to comment on this expedited request. All other topics are considered for the October 1 update. Participants at the Committee meeting are encouraged to comment on all such requests. There were not any requests approved for an expedited April 1, 2018 implementation of a code at the September 12–13, 2017 Committee meeting. Therefore, there were not any new codes for implementation on April 1, 2018.

ICD–9–CM addendum and code title information is published on the CMS website at: *http://www.cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html?redirect=/icd9ProviderDiagnosticCodes/01overview.asp#TopofPage*. ICD–10–CM and ICD–10–PCS addendum and code title information is published on the CMS website at: *http://www.cms.gov/Medicare/Coding/ICD10/index.html*. CMS also sends copies of all ICD–10–CM and ICD–10–PCS coding changes to its Medicare contractors for use in updating their systems and providing education to providers.

Information on ICD–10–CM diagnosis codes, along with the Official ICD–10–CM Coding Guidelines, can also be found on the CDC website at: *http://www.cdc.gov/nchs/icd/icd10.htm*. Additionally, information on new, revised, and deleted ICD–10–CM/ICD–10–PCS codes is provided to the AHA for publication in the *Coding Clinic for ICD–10*. AHA also distributes coding update information to publishers and software vendors.

The following chart shows the number of ICD–10–CM and ICD–10–PCS codes and code changes since FY 2016 when ICD–10 was implemented.

TOTAL NUMBER OF CODES AND CHANGES IN TOTAL NUMBER OF CODES PER FISCAL YEAR ICD–10–CM AND ICD–10–PCS CODES

Fiscal year	Number	Change
FY 2016:		
ICD–10–CM	69,823	
ICD–10–PCS	71,974	
FY 2017:		
ICD–10–CM	71,486	+1,663
ICD–10–PCS	75,789	+3,815
FY 2018:		
ICD–10–CM	71,704	+218
ICD–10–PCS	78,705	+2,916
FY 2019:.		
ICD–10–CM	71,932	+228
ICD–10–PCS	78,881	+176

As mentioned previously, the public is provided the opportunity to comment on any requests for new diagnosis or procedure codes discussed at the ICD–10 Coordination and Maintenance Committee meeting.

At the September 12–13, 2017 and March 6–7, 2018 Committee meetings, we discussed any requests we had received for new ICD–10–CM diagnosis codes and ICD–10–PCS procedure codes that were to be implemented on October 1, 2018. We invited public comments on any code requests discussed at the September 12–13, 2017 and March 6–7, 2018 Committee meetings for implementation as part of the October 1, 2018 update. The deadline for commenting on code proposals discussed at the September 12–13, 2017 Committee meeting was November 13, 2017. The deadline for commenting on code proposals discussed at the March 6–7, 2018 Committee meeting was April 6, 2018.

19. Replaced Devices Offered Without Cost or With a Credit

a. Background

In the FY 2008 IPPS final rule with comment period (72 FR 47246 through 47251), we discussed the topic of Medicare payment for devices that are replaced without cost or where credit for a replaced device is furnished to the hospital. We implemented a policy to reduce a hospital's IPPS payment for certain MS–DRGs where the implantation of a device that subsequently failed or was recalled determined the base MS–DRG assignment. At that time, we specified that we will reduce a hospital's IPPS payment for those MS–DRGs where the hospital received a credit for a replaced device equal to 50 percent or more of the cost of the device.

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51556 through 51557), we clarified this policy to state that the policy applies if the hospital received a credit equal to 50 percent or more of the cost of the replacement device and issued instructions to hospitals accordingly.

b. Changes for FY 2019

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20250 through 20251), for FY 2019, we did not propose to add any MS–DRGs to the policy for replaced devices offered without cost or with a credit. We proposed to continue to include the existing MS–DRGs currently subject to the policy as displayed in the table below.

MDC	MS–DRG	MS–DRG title
Pre-MDC	001	Heart Transplant or Implant of Heart Assist System with MCC.
Pre-MDC	002	Heart Transplant or Implant of Heart Assist System without MCC.
1	023	Craniotomy with Major Device Implant or Acute Complex CNS Principal Diagnosis with MCC or Chemotherapy Implant or Epilepsy with Neurostimulator.
1	024	Craniotomy with Major Device Implant or Acute Complex CNS Principal Diagnosis without MCC.
1	025	Craniotomy & Endovascular Intracranial Procedures with MCC.
1	026	Craniotomy & Endovascular Intracranial Procedures with CC.
1	027	Craniotomy & Endovascular Intracranial Procedures without CC/MCC.
1	040	Peripheral, Cranial Nerve & Other Nervous System Procedures with MCC.
1	041	Peripheral, Cranial Nerve & Other Nervous System Procedures with CC or Peripheral Neurostimulator.
1	042	Peripheral, Cranial Nerve & Other Nervous System Procedures without CC/MCC.
3	129	Major Head & Neck Procedures with CC/MCC or Major Device.
3	130	Major Head & Neck Procedures without CC/MCC.
5	215	Other Heart Assist System Implant.
5	216	Cardiac Valve & Other Major Cardiothoracic Procedure with Cardiac Catheterization with MCC.
5	217	Cardiac Valve & Other Major Cardiothoracic Procedure with Cardiac Catheterization with CC.
5	218	Cardiac Valve & Other Major Cardiothoracic Procedure with Cardiac Catheterization without CC/MCC.
5	219	Cardiac Valve & Other Major Cardiothoracic Procedure without Cardiac Catheterization with MCC.
5	220	Cardiac Valve & Other Major Cardiothoracic Procedure without Cardiac Catheterization with CC.
5	221	Cardiac Valve & Other Major Cardiothoracic Procedure without Cardiac Catheterization without CC/MCC.
5	222	Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/Heart Failure/Shock with MCC.

MDC	MS–DRG	MS–DRG title
5	223	Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/Heart Failure/Shock without MCC.
5	224	Cardiac Defibrillator Implant with Cardiac Catheterization without AMI/Heart Failure/Shock with MCC.
5	225	Cardiac Defibrillator Implant with Cardiac Catheterization without AMI/Heart Failure/Shock without MCC.
5	226	Cardiac Defibrillator Implant without Cardiac Catheterization with MCC.
5	227	Cardiac Defibrillator Implant without Cardiac Catheterization without MCC.
5	242	Permanent Cardiac Pacemaker Implant with MCC.
5	243	Permanent Cardiac Pacemaker Implant with CC.
5	244	Permanent Cardiac Pacemaker Implant without CC/MCC.
5	245	AICD Generator Procedures.
5	258	Cardiac Pacemaker Device Replacement with MCC.
5	259	Cardiac Pacemaker Device Replacement without MCC.
5	260	Cardiac Pacemaker Revision Except Device Replacement with MCC.
5	261	Cardiac Pacemaker Revision Except Device Replacement with CC.
5	262	Cardiac Pacemaker Revision Except Device Replacement without CC/MCC.
5	265	AICD Lead Procedures.
5	266	Endovascular Cardiac Valve Replacement with MCC.
5	267	Endovascular Cardiac Valve Replacement without MCC.
5	268	Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC.
5	269	Aortic and Heart Assist Procedures Except Pulsation Balloon without MCC.
5	270	Other Major Cardiovascular Procedures with MCC.
5	271	Other Major Cardiovascular Procedures with CC.
5	272	Other Major Cardiovascular Procedures without CC/MCC.
8	461	Bilateral or Multiple Major Joint Procedures Of Lower Extremity with MCC.
8	462	Bilateral or Multiple Major Joint Procedures of Lower Extremity without MCC.
8	466	Revision of Hip or Knee Replacement with MCC.
8	467	Revision of Hip or Knee Replacement with CC.
8	468	Revision of Hip or Knee Replacement without CC/MCC.
8	469	Major Hip and Knee Joint Replacement or Reattachment of Lower Extremity with MCC or Total Ankle Replacement.
8	470	Major Hip and Knee Joint Replacement or Reattachment of Lower Extremity without MCC.

We did not receive any public comments on our proposal to continue to include the existing MS–DRGs currently subject to the policy and to not add any additional MS–DRGs. Therefore, we are finalizing the list of MS–DRGs in the table included in the proposed rule and above that will be subject to the replaced devices offered without cost or with a credit policy, effective October 1, 2018.

20. Other Policy Changes: Other Operating Room (O.R.) and Non-O.R. Issues

In the FY 2019 IPPS/LTCH PPS proposed rule (83 FR 20251 through 20257), we addressed requests that we received regarding changing the designation of specific ICD–10–PCS procedure codes from non-O.R. to O.R. procedures, or changing the designation from O.R. procedure to non-O.R. procedure. In cases where we proposed to change the designation of procedure codes from non-O.R. to O.R. procedures, we also proposed one or more MS–DRGs with which these procedures are clinically aligned and to which the procedure code would be assigned. We generally examine the MS–DRG assignment for similar procedures, such as the other approaches for that procedure, to determine the most appropriate MS–DRG assignment for procedures newly designated as O.R. procedures. We invited public comments on these proposed MS–DRG assignments.

We also noted that many MS–DRGs require the presence of any O.R. procedure. As a result, cases with a principal diagnosis associated with a particular MS–DRG would, by default, be grouped to that MS–DRG. Therefore, we do not list these MS–DRGs in our discussion below. Instead, we only discussed MS–DRGs that require explicitly adding the relevant procedures codes to the GROUPER logic in order for those procedure codes to affect the MS–DRG assignment as intended. In addition, cases that contain O.R. procedures will map to MS–DRGs 981, 982, or 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) or MS–DRGs 987, 988, or 989 (Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) when they do not contain a principal diagnosis that corresponds to one of the MDCs to which that procedure is assigned. These procedures need not be assigned to MS–DRGs 981 through 989 in order for this to occur. Therefore, if requestors included some or all of MS–DRGs 981 through 989 in their request or included MS–DRGs that require the presence of any O.R. procedure, we did not specifically address that aspect in summarizing their request or our response to the request in the section below.

(a) Percutaneous and Percutaneous Endoscopic Excision of Brain and Cerebral Ventricle

One requestor identified 22 ICD–10–PCS procedure codes that describe procedures involving transcranial brain and cerebral ventricle excision that the requestor stated would generally require the resources of an operating room. The 22 procedure codes are listed in the following table.

ICD–10–PCS procedure code	Code description
00B03ZX	Excision of brain, percutaneous approach, diagnostic.

ICD–10–PCS procedure code	Code description
00B13ZX	Excision of cerebral meninges, percutaneous approach, diagnostic.
00B23ZX	Excision of dura mater, percutaneous approach, diagnostic.
00B63ZX	Excision of cerebral ventricle, percutaneous approach, diagnostic.
00B73ZX	Excision of cerebral hemisphere, percutaneous approach, diagnostic.
00B83ZX	Excision of basal ganglia, percutaneous approach, diagnostic.
00B93ZX	Excision of thalamus, percutaneous approach, diagnostic.
00BA3ZX	Excision of hypothalamus, percutaneous approach, diagnostic.
00BB3ZX	Excision of pons, percutaneous approach, diagnostic.
00BC3ZX	Excision of cerebellum, percutaneous approach, diagnostic.
00BD3ZX	Excision of medulla oblongata, percutaneous approach, diagnostic.
00B04ZX	Excision of brain, percutaneous endoscopic approach, diagnostic.
00B14ZX	Excision of cerebral meninges, percutaneous endoscopic approach, diagnostic.
00B24ZX	Excision of dura mater, percutaneous endoscopic approach, diagnostic.
00B64ZX	Excision of cerebral ventricle, percutaneous endoscopic approach, diagnostic.
00B74ZX	Excision of cerebral hemisphere, percutaneous endoscopic approach, diagnostic.
00B84ZX	Excision of basal ganglia, percutaneous endoscopic approach, diagnostic.
00B94ZX	Excision of thalamus, percutaneous endoscopic approach, diagnostic.
00BA4ZX	Excision of hypothalamus, percutaneous endoscopic approach, diagnostic.
00BB4ZX	Excision of pons, percutaneous endoscopic approach, diagnostic.
00BC4ZX	Excision of cerebellum, percutaneous endoscopic approach, diagnostic.
00BD4ZX	Excision of medulla oblongata, percutaneous endoscopic approach, diagnostic.

The requestor stated that, although percutaneous burr hole biopsies are performed through smaller openings in the skull than open burr hole biopsies, these procedures require drilling or cutting through the skull using sterile technique with anesthesia for pain control. The requestor also noted that similar procedures involving percutaneous drainage of the subdural space are currently classified as O.R. procedures in Version 35 of the ICD–10 MS–DRGs. However, these 22 ICD–10–PCS procedure codes are not recognized as O.R. procedures for purposes of MS–DRG assignment. The requestor recommended that the 22 ICD–10–PCS codes be designated as O.R. procedures and assigned to MS–DRGs 25, 26, and 27 (Craniotomy and Endovascular Intracranial Procedures with MCC, with CC, and without CC/MCC, respectively).

In the proposed rule, we stated that we agreed with the requestor that these procedures typically require the resources of an operating room. Therefore, we proposed to add these 22 ICD–10–PCS procedure codes to the FY 2019 ICD–10 MS–DRGs Version 36 Definitions Manual in Appendix E—Operating Room Procedures and Procedure Code/MS–DRG Index as O.R. procedures assigned to MS–DRGs 25, 26, and 27 in MDC 1 (Diseases and Disorders of the Nervous System).

Comment: One commenter supported the proposal to change the designation of the 22 procedure codes listed in the table above to O.R. procedures.

Response: We appreciate the commenter's support.

After consideration of the public comment we received, we are finalizing our proposal to change the designation of the 22 ICD–10–PCS procedure codes shown in the table above from non-O.R. procedures to O.R. procedures, effective October 1, 2018.

b. Open Extirpation of Subcutaneous Tissue and Fascia
