Abstract: GreenChill is a voluntary partnership program sponsored by the U.S. Environmental Protection Agency (EPA) that encourages supermarket companies to adopt cost effective technologies and practices that reduce refrigerant emissions and improve operational efficiency. The GreenChill Program works with the supermarket industry to lower barriers inhibiting the implementation of technologies and practices that reduce refrigerant emissions. The Program effectively promotes the adoption of emission reduction practices and technologies by engaging GreenChill partners to set an annual refrigerant emission reduction goal and develop a refrigerant management plan reflecting the company's implementation objectives.

Implementation of the partners' refrigeration management plan to reduce refrigerant emissions enhances the protection of the environment and may save partners money and improve operational efficiency. The GreenChill Program offers the opportunity for any individual store to be GreenChill certified at the silver-, gold- or platinum-level when it demonstrates that the amount of refrigerant used is below a specified limit, based on the store's MBTU/hour cooling load, and that the refrigerant emitted from the store in the prior 12 months is below a specified percentage depending on each GreenChill store certification level. Information submitted for the certification of individual stores is compared to these set criteria for each certification level. The certification of a store provides the opportunity for broad recognition within the supermarket industry and with the store's customers.

Form numbers: GreenChill Partnership Agreement; Partner Annual Report (GreenChill Installed Refrigerant and Emissions Corporate Report for Food Retail Partners); Refrigerant Management Plan; Store Certification Application.

Respondents/affected entities: The following is a list of North American Industry Classification System (NAICS) codes for organizations potentially affected by the information requirements covered under this ICR are:

445110 Supermarkets

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 30 (per year).

Frequency of response: Annual, and when desired.

Total estimated burden: 407 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$19,726 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in estimates: There is a decrease of 1.2 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due in part to a decrease in the number of respondents due to industry consolidation, acquisitions, and bankruptcy, as well as a reduction in the number of companies joining the partnership each year.

Dated: August 10, 2018.

Cynthia A. Newberg,
Director, Stratospheric Protection Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Natural Gas Transmission and Storage (40 CFR part 63, subpart HHH) apply to existing facilities and new facilities that are major sources of hazardous air pollutants (HAP) and that either transport or store natural gas prior to entering the pipeline to a local distribution company or to a final end user (if there is no local distribution company). The 2012 amendment eliminates the startup, shutdown and malfunction (SSM) exemption, establishes MACT standards for "small" glycol dehydration units (glycol dehydrators with an actual annual average natural gas flowrate less than 283,000 scmd or actual average benzene emissions less than 0.9 Mg/yr), and requires facilities using carbon adsorbers as a control device to keep records of their carbon replacement schedule. New facilities include those that commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart HHH.

Form Numbers: None.

Respondents/affected entities: Natural gas transport and storage facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart HHH).

Estimated number of respondents: 55 (total).

Frequency of response: Initially, occasionally, and semiannually.
