SUPPLEMENTARY INFORMATION:

Title: FERC-537 (Gas Pipeline Certificates: Construction, Acquisition, and Abandonment).

OMB Control No.: 1902-0060.

Type of Request: Three-year extension of the FERC-537 information collection requirements with no changes to the reporting requirements.

Abstract: The FERC-537 information collection requires natural gas companies to file the necessary information with FERC in order for the Commission to determine if the requested certificate should be authorized. Certain self-implementing construction and abandonment programs do not require the filing of applications. However, those types of programs do require the filing of annual reports, so many less significant actions can be reported in a single filing/response and less detail would be required.

The data required to be submitted in a normal certificate filing consists of identification of the company and responsible officials, factors considered in the location of the facilities and the impact on the area for environmental considerations. Also to be submitted are the following, as applicable to the specific request:

- Flow diagrams showing the design capacity for engineering design verification and safety determination;
- Cost of proposed facilities, plans for financing, and estimated revenues and expenses related to the proposed facility for accounting and financial evaluation.
- Existing and proposed storage capacity and pressures and reservoir
