

needs assessment) no later than October 1, 2020. The Bipartisan Budget Act of 2018 further establishes that conducting a MIECHV statewide needs assessment update is a condition of receiving Title V Maternal and Child Health Service (MCH) Block Grant funding; submission of the MIECHV needs assessment update in accordance with the guidance in the SIR will meet this requirement.

In response to the forthcoming SIR, states will be required to submit an updated statewide needs assessment that identifies all of the following information, as required by the MIECHV authorizing statute:

(1) Communities with concentrations of (a) premature birth, low-birth weight infants, and infant mortality, including infant death due to neglect, or other indicators of at-risk prenatal, maternal, newborn, or child health; (b) poverty; (c) crime; (d) domestic violence; (e) high rates of high-school drop-outs; (f) substance abuse; (g) unemployment; or (h) child maltreatment.

(2) The quality and capacity of existing programs or initiatives for early childhood home visitation in the state including: The number and types of individuals and families who are receiving services under such programs or initiatives; the gaps in early childhood home visitation in the state; and the extent to which such programs or initiatives are meeting the needs of eligible families.

(3) The state's capacity for providing substance abuse treatment and

counseling services to individuals and families in need of such treatment or services.

The forthcoming SIR will provide further guidance to states in updating their statewide needs assessments and submitting the required information to HRSA. States that have elected not to apply or be awarded MIECHV funds are encouraged to work with nonprofit organizations that have received awards to provide MIECHV services within the state and indicate whether they will submit their needs assessments directly or through the nonprofit organization awardee. Nonprofit awardees will need to provide documentation to demonstrate that they have been authorized or requested by the state in which they provide services to submit a needs assessment on behalf of the state. Documentation, such as a letter, may come from a state's Title V agency; an other health, education or human services state agency; or the governor's office.

HRSA, states, and nonprofits providing MIECHV services within states will use the information collected through the needs assessment update to reaffirm the provision of MIECHV home visiting services in at-risk communities. The information will also be used to support program planning, improvement, and decision-making. The purpose of updating the statewide needs assessments is for awardees to gather more recent information on community needs and ensure that MIECHV

programs are being operated in areas of high need. However, the requirement for such an update should not be construed as requiring moving MIECHV-funded home visiting programs, defunding of programs for the sole purpose of moving services to other communities, or otherwise disrupting existing home visiting programs, their relationships in the community, and their services to eligible families. The statutory requirements of a needs assessment update also apply to territory awardees, but this ICR does not include guidance, nor a burden estimate, for these awardees. Recognizing potential challenges related to the availability of population health data for the territories, a separate SIR will provide guidance on the needs assessment update to territories eligible to apply for MIECHV funds.

Likely Respondents: MIECHV Program Awardees that are states, territories, and, where applicable, nonprofit organizations providing services within states.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions and supporting materials; to collect and analyze data; engage with stakeholders and coordinate with state level partners; and to draft and submit the report. The table below summarizes the total annual burden hours estimated for this SIR.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Instrument	Number of respondents	Number of responses per respondent	Total responses	Average burden hours per response	Total burden hours
Maternal, Infant, and Early Childhood Home Visiting Program Statewide Needs Assessment Update	51	1	51	120	6,120

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these

documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Project: Government Performance and Results Act (GPRA) Client/Participant Outcomes Measure—(OMB No. 0930-0208)—Revision

SAMHSA is requesting approval to add 13 new questions to its existing CSAT Client-level GPRA instrument. Grantees will only be required to answer no more than four additional questions, per CSAT grant awarded, in addition to the other questions on the instrument. Currently, the information collected from this instrument is entered and stored in SAMHSA's Performance

Accountability and Reporting System, which is a real-time, performance management system that captures information on the substance abuse treatment and mental health services delivered in the United States. Continued approval of this information collection will allow SAMHSA to continue to meet Government Performance and Results Modernization Act of 2010 reporting requirements that

quantify the effects and accomplishments of its discretionary grant programs, which are consistent with OMB guidance.

SAMHSA and its Centers will use the data for annual reporting required by GPRA and comparing baseline with discharge and follow-up data. GPRA requires that SAMHSA's fiscal year report include actual results of performance monitoring for the three

preceding fiscal years. The additional information collected through this process will allow SAMHSA to: (1) Report results of these performance outcomes; (2) maintain consistency with SAMHSA-specific performance domains, and (3) assess the accountability and performance of its discretionary and formula grant programs.
