

Treaty, decisions of the Commission, and other U.S. law. In total, NMFS has tentatively identified two no-action alternatives, three action alternatives related to controls on the type and amount of fishing (Table 1), and three alternatives related to the allocation and use of fishing privileges. NMFS plans to analyze the environmental consequences of implementing each of the alternatives by assessing the direct, indirect, and cumulative effects of each to the human environment in the Western and Central Pacific Ocean.

By evaluating alternatives that span the full range of reasonably foreseeable future management measures, the environmental impacts of future management actions not explicitly analyzed could be estimated relative to those calculated in this EIS.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for extension of a current information collection.

The National Marine Fisheries Service (NMFS) requires any U.S. citizen issued a Special Coral Reef Ecosystem Fishing Permit to complete logbooks and submit them to NMFS (50 CFR 665). The Special Coral Reef Ecosystem Fishing Permit is authorized under the Fishery Ecosystem Plans for American Samoa Archipelago, Hawaiian Archipelago, Mariana Archipelago, and Pacific Remote Island Areas. The information in the logbooks is used to obtain fish catch/fishing effort data on coral reef fishes and invertebrates harvested in designated low-use marine protected areas and on those listed in the regulations as potentially-harvested coral reef taxa in waters of the U.S. exclusive economic zone in the western Pacific region. These data are needed to determine the condition of the stocks, whether the current management measures are having the intended effects, and to evaluate the benefits and costs of changes in management measures. The logbook information includes interactions with protected species, including sea turtles, monk seals, and other marine mammals, which are used to monitor and respond to incidental takes of endangered and threatened marine species.

##### II. Method of Collection

Reports are submitted to NMFS in the form of paper logbook sheets and paper transshipment forms within 30 days of each landing of coral reef harvest. No electronic forms or web-based reporting is currently available. Notifications are submitted via telephone.
