The WARN Act also gives the Commission authority to adopt procedures by which CMS Providers disclose their intent to participate in WEA. The Commission created WEA in response to the WARN Act, and to satisfy the Commission's mandate to promote the safety of life and property using wire and radio communication. These information collections involve the WEA system, which allows CMS Providers to elect to transmit emergency alerts to the public. The information collection from CMS Providers include (1) disclosing the extent to which a CMS Provider participates in wireless alerts ("in whole" or "in part"); and (2) enhanced notification of the CMS provider's non-participation in WEA, to new subscribers at the point of sale. These disclosures will allow consumers to make more informed choices about their ability to receive WEA Alert Messages that are relevant to them.

### Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received final OMB approval on August 13, 2018, for the information collection requirement contained in new rule 47 CFR 90.25.

Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060-1257.

The foregoing notice is required by the Paperwork Reduction Act of 1995,

Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

*OMB Control Number:* 3060–1257.

*OMB Approval Date:* August 13, 2018.

*OMB Expiration Date:* August 31, 2021.

*Title:* New Procedure for Non-Federal Public Safety Entities to License Federal Government Interoperability Channels.

*Form Number:* N/A.

*Respondents:* Not-for-profit institutions; State, local, or tribal government.

*Number of Respondents and Responses:* 45,947 respondents; 45,947 responses.

*Estimated Time per Response:* 0.25 hours.

*Frequency of Response:* One-time reporting requirement.

*Obligation to Respond:* New Section 90.25 adopted in Order DA 18–282, requires any non-federal public safety entity seeking to license mobile and portable units on the Federal Interoperability Channels to obtain written concurrence from its Statewide Interoperability Coordinator (SWIC) or a state appointed official and include such written concurrence with its application for license. A non-federal public safety entity may communicate on designated Federal Interoperability Channels for joint federal/non-federal operations, provided it first obtains a license from the Commission authorizing use of the channels. Statutory authority for these collections are contained in 47 U.S.C. 151, 154, 301, 303, and 332 of the Communications Act of 1934.

*Total Annual Burden:* 11,487 hours.

*Total Annual Cost:* No cost.

*Privacy Act:* No impact(s).

*Nature and Extent of Confidentiality:* Applicants who include written concurrence from their SWIC or state appointed official with their application to license mobile and portable units on the Federal Interoperability Channels need not include any confidential information with their application. Nonetheless, there is a need for confidentiality with respect to all applications filed with the Commission through its Universal Licensing System (ULS). Although ULS stores all information pertaining to the individual license via an FCC Registration Number (FRN), confidential information is accessible only by persons or entities that hold the password for each account, and the Commission's licensing staff. Information on private land mobile radio licensees is maintained in the Commission's system of records, FCC/

WTB–1, “Wireless Services Licensing Records.” The licensee records will be publicly available and routinely used in accordance with subsection (b) of the Privacy Act. TIN Numbers and material which is afforded confidential treatment pursuant to a request made under 47 CFR 0.459 will not be available for Public inspection. Any personally identifiable information (PII) that individual applicants provide is covered by a system of records, FCC/WTB–1, “Wireless Services Licensing Records,” and these and all other records may be disclosed pursuant to the Routine Uses as stated in this system of records notice.

*Needs and Uses:* The purpose of requiring a non-federal public safety entity to obtain written consent from its SWIC or state appointed official before communicating with federal government agencies on the Federal Interoperability Channels is to ensure that the non-federal public safety entity operates in accordance with the rules and procedures governing use of the federal interoperability channels and does not cause inadvertent interference during emergencies. Commission staff will use the written concurrence from the SWIC or state appointed official to determine if an applicant's proposed operation on the Federal Interoperability Channels conforms to the terms of an agreement signed by the SWIC or state appointed official with a federal user with a valid assignment from the National Telecommunications and Information Administration (NTIA) which has jurisdiction over the channels.

### Federal Railroad Administration

#### 49 CFR Part 228

[Docket No. FRA–2012–0101]

RIN 2130–AC41

#### Hours of Service Recordkeeping; Automated Recordkeeping

**AGENCY:** Federal Railroad Administration (FRA), Department of Transportation (DOT).

**ACTION:** Final rule.

**SUMMARY:** This rule is part of FRA's broader initiative to reduce the

paperwork burden of its regulations while still supporting compliance with the Federal hours of service laws and regulations. Current regulations require employees covered by those laws or regulations (covered service employees) to create and retain hours of service records by hand (a paper system) or “certify” the record using a compliant computerized system (an electronic system) with program logic. Cognizant of the burden placed on small operations, FRA provides a simplified method of computerized recordkeeping (an automated system)—in which employees apply their electronic signatures to automated records stored in a railroad computer system without the complexity and functionality of an electronic system—for eligible smaller railroads (and contractors and subcontractors providing covered service employees to such railroads). This rule does not require the use of automated recordkeeping, but, when implemented by the small operations for which it is tailored, it will decrease the burden hours spent on hours of service recordkeeping.

**DATES:** This final rule is effective August 29, 2018 in accordance with 5 U.S.C. 553(d)(1).
