

conducted without change; and (2) the matching program has been conducted in compliance with the original agreement.

Procedure

CNCS will provide SSA with a data file including social security number, first and last names, and date of birth. SSA will conduct a match on the identifying information. If the match does not return a result verifying the individual's social security number and citizenship status, CNCS will notify the individual or the grant recipient program that selected the individual. The affected individual will have an opportunity to contest the accuracy of the information provided by SSA in accordance with the requirements of 5 U.S.C. 552a(p) and applicable OMB guidelines.

The individual will have at least 30 days from the date of the notice to submit evidence demonstrating the accuracy of the social security number and/or proof that the individual is a citizen, national, or lawful permanent resident alien of the United States. CNCS will consider any timely submitted evidence to determine whether the record establishes the accuracy of the social security number and/or the United States citizenship, nationality or lawful permanent residency of the individual. If the individual fails to timely submit such evidence, CNCS will presume that the information provided by SSA is accurate. The notice will so advise the individual.

Additional Notice

Applicants and transferees will be informed that information provided on the application is subject to verification through a computer matching program. The application package will contain a privacy certification notice that the applicant must sign authorizing CNCS to verify the information provided. Individuals receiving a transferred Education Award will be informed at the time identifying information is requested from the transferee, that their data will be verified through this computer matching agreement. The form requesting this data will contain a privacy certification notice that the applicant must sign authorizing CNCS to verify the information provided.

Participating Agencies: Participants in this computer matching program are the Social Security Administration (source agency) and the Corporation for National and Community Service (recipient agency).

creating this matching program is pursuant to section 1711 of the Serve America Act of 2009 (Pub. L. 111–13, April 21, 2009). CNCS's legal authority to enter into this agreement is in section 146(b)(3) of the National and Community Service Act (NCSA) (42 U.S.C. 12602(a)), concerning an individual's eligibility to receive a Segal AmeriCorps Education Award from the National Service Trust upon successful completion of a term of service in an approved national service position. The authority is further articulated in section 1711 of the Serve America Act (Pub. Purpose(s): The computer matching agreement between CNCS and SSA enables CNCS to verify the social security numbers of most applicants for approved national service positions, and verify statements made by those applicants regarding their citizenship status according to the records that SSA has on file. uses information from the Enumeration System to assign SSNs. The information CNCS provides from the AmeriCorps Member Individual Account (Corporation 8) system of records will be matched against this system of records and verification results will be disclosed under the applicable routine use.

Notice of Availability of Software and Documentation for Licensing

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Availability of Memory Visualization software and documentation for licensing.

SUMMARY: The Department of the Air Force announces the availability of Memory Visualization software and related documentation, which aids digital forensics examinations of computing device memory captures for user and malware identification.

ADDRESSES: Licensing interests should be sent to: Air Force Institute of Technology, Office of Research and Technology Applications, AFIT/ENR, 2950 Hobson Way, Building 641, Rm. 101c, Wright-Patterson AFB, OH 45433; Facsimile: (937) 656–7139.

FOR FURTHER INFORMATION CONTACT: Air Force Institute of Technology, Office of Research and Technology Applications, AFIT/ENR, 2950 Hobson Way, Building 641, Rm. 101c, Wright-Patterson AFB, OH 45433; Facsimile: (937) 656–7139, or Mr. Jeff Murray, (937) 255–3636, Ext. 4665.

SUPPLEMENTARY INFORMATION: One major challenge facing digital forensics practitioners is the complicated task of acquiring an understanding of the digital data residing in electronic devices. Currently, this task requires significant experience and background to aggregate the data their tools provide from the digital artifacts. Most of the tools available present their results in text files or tree lists. It is up to the practitioner to mentally capture a global understanding of the state of the device at the time of seizure and find the items of evidentiary interest.

The Memory Visualization software applies Information Visualization

techniques to improve the analysis of digital forensic evidence from Operating System memory captures. This visualization tool presents both global and local views of the evidence based on user interactions with the graphics. The visualization also maintains connection to the data behind the visualization so that the practitioner can verify manually. The resulting visualizations provide the necessary details for verifying digital artifacts and assists in locating additional items of relevance.

This notice is pursuant to the provisions of Section 801 of Public Law 113-66 (2014 National Defense Authorization Act).

Acting Air Force Federal Register Liaison Officer.
