

Oversight of project activities by a biological monitor; fencing the project limits; removing vegetation outside the vireo nesting season; implementing a Storm Water Pollution Prevention Plan to avoid and minimize erosion, sedimentation, and pollution in adjacent native habitat; removing invasive plant species from the project work area; minimizing the use of project lighting; storing and removing trash; controlling dust; ensuring that fire suppression equipment at all times; and monitoring and reporting to the Service upon project completion.

Proposed Action and Alternatives

The Proposed Action consists of the issuance of an incidental take permit and implementation of the proposed HCP, which includes measures to avoid, minimize, and mitigate impacts to the vireo. If we approve the permit, take of vireo would be authorized for the applicant's activities associated with the implementation of the OC Reclamation Mine project. In the proposed HCP, the applicant considers the No Action Alternative. Under the No Action Alternative, no incidental take of least Bell's vireo resulting from habitat modification would occur, and no long-term protection and management would be afforded to the species. The No Action Alternative would not meet the primary goal of the proposed Project, which is serve as a receiver site for excess fill and to fill the abandoned pit mine. Because the abandoned pit mine contains the habitat supporting the vireo, it is not possible to implement the project and avoid incidental take of vireo.

Our Preliminary Determination

The Service has made a preliminary determination that approval of the HCP and issuance of an incidental take permit qualify for categorical exclusion under NEPA (42 U.S.C. 4321 *et seq.*), as provided by the Department of the Interior implementing regulations in part 46 of title 43 of the Code of Federal Regulations (43 CFR 46.205, 46.210, and 46.215), and that the HCP qualifies as a low-effect plan as defined by the Habitat Conservation Planning Handbook (December 2016).

We base our determination that a HCP qualifies as a low-effect plan on the following three criteria:

(1) Implementation of the HCP would result in minor or negligible effects on federally listed, proposed, and candidate species and their habitats;

(2) Implementation of the HCP would result in minor or negligible effects on other environmental values or resources; and

(3) Impacts of the HCP, considered together with the impacts of other past, present, and reasonably foreseeable similarly situated projects, would not result, over time, in cumulative effects to environmental values or resources that would be considered significant.

Based upon this preliminary determination, we do not intend to prepare further NEPA documentation. We will consider public comments in making the final determination on whether to prepare such additional documentation.

Next Steps

We will evaluate the proposed HCP and comments we receive to determine whether the permit application meets the requirements and issuance criteria under section 10(a) of the ESA (16 U.S.C. 1531 *et seq.*). We will also evaluate whether issuance of a section 10(a)(1)(B) incidental take permit would comply with section 7 of the ESA by conducting an intra-Service consultation. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to issue a permit. If the requirements and issuance criteria under section 10(a) are met, we will issue the permit to the applicant for incidental take of vireo.

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The

target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.
