

SUPPLEMENTARY INFORMATION: DCR Transmission, LLC, has filed a right-of-way (ROW) application with the BLM pursuant to Title V of FLPMA, proposing to construct, operate, maintain, and decommission a single-circuit alternating current 500-kV overhead transmission line. The Project would provide a connection between the existing Delaney Substation in Tonopah, Arizona, and the existing Colorado River Substation in Blythe, California. The project purpose is to strengthen the electrical grid and improve reliability.

DCR Transmission has filed an application for a Certificate of Public Convenience and Necessity (CPCN) with the California Public Utilities Commission (CPUC) to site the transmission infrastructure in California. The CPUC approval or denial of the CPCN application is a discretionary decision. Under California law, the CPUC would be required to comply with the California Environmental Quality Act (CEQA) before issuing the CPCN. The CPUC is currently a cooperating agency in the BLM's NEPA analysis. Pursuant to the California Code of Regulations Title 14 Section 15121, the CPUC will rely upon this EIS to comply with CEQA.

An interdisciplinary approach was used to develop the Draft EIS. The issues addressed in the Draft EIS that shaped the Project's scope and alternatives include, but are not limited to: Air and climate, biological resources, cultural resources, CEQA, health and safety, noise, land use (including farmlands and military operations), recreation, socioeconomics and environmental justice, special designations, wilderness and wilderness characteristics, trails, visual resources, and transportation.

Based on feedback from cooperating agencies, stakeholders, and public scoping, the BLM developed and analyzed a suite of alternatives, which are detailed in the Draft EIS. The BLM has identified Alternative 2: BLM Utility Corridor Route, with minor route modifications near the Town of Quartzsite, Arizona, as the Agency-Preferred Alternative route for the proposed transmission line. This route is 124.9 miles long and primarily located within existing BLM utility corridors or parallel to existing infrastructure. This route is responsive to stakeholder input, by minimizing impacts to the Yuma Proving Ground, avoiding the Kofa National Wildlife Refuge, Johnson Canyon, the Colorado River Indian Tribes Reservation, the Long Term Visitor Area (recreation area), and the Ehrenberg Sandbowl area;

avoiding residential and other development south of the City of Blythe and minimize use of private land in California; avoiding an area of dense cultural resources south of the City of Blythe; and crossing a majority of Visual Resource Management (VRM) Class III land. This route also provides interconnections for potential future energy development opportunities in Arizona.

The Agency-Preferred Alternative would require an amendment to the Yuma RMP to: (1) Designate approximately 13.5 miles of 200-foot wide ROW on public lands managed by the BLM outside of designated utility corridors; and (2) Change the existing VRM Class designations from Class III to Class IV within 0.3-mile either side of centerline of 18.4 miles, for a total of 6,803.2 acres. The Agency-Preferred Alternative would also require an amendment to the California Desert Conservation Area Plan to authorize construction within 0.25-mile of occurrences of Harwood's eriostroma, a BLM special status plant species.

Hardcopies of the documents can be reviewed at the Arizona State Office (see **ADDRESSES**) and at the following locations:

The BLM will use the NEPA public participation requirements to assist the agency in satisfying the public-involvement requirements under Section 106 of the National Historic Preservation Act (NHPA) (54 U.S.C. 306108) pursuant to 36 CFR 800.2(d)(3).

The information about historic and cultural resources within the area

potentially affected by the Project will assist the BLM in identifying and evaluating impacts to such resources in the context of both the NEPA and Section 106 of the NHPA.

The BLM will continue consultation with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration.

You may also contact Mr. Southall to obtain copies (free of charge) of (1) the ICR, (2) any associated forms, and (3) the regulations that require us to collect the information.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues mentioned in the OMB regulations at 5 CFR 1320.8(d)(1): (1) Is the collection necessary to the proper functions of ONRR; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might ONRR enhance the quality, utility, and clarity of the information to be collected; and (5) how might ONRR minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. ONRR will post all comments, including names and addresses of respondents at <http://www.regulations.gov>. We will include or summarize each comment in our request to the Office of Management and
