

is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition. The Egg, Chicken, and Turkey Surveys obtain basic poultry statistics from voluntary cooperators throughout the Nation. Statistics are published on placement of pullet chicks for hatchery supply flocks; hatching reports for broiler-type, egg-type, and turkey eggs; number of layers on hand; total table egg production; and production and value estimates for eggs, chickens, and turkeys. The frequencies of the surveys being conducted include weekly, monthly, and annually. This information is used by producers, processors, feed dealers, and others in marketing and supply channels as a basis for production and marketing decisions. Government agencies use these estimates to evaluate poultry product supplies. The information is an important consideration in government purchases for the National School Lunch Program and in formulation of export-import policy. The current expiration date for this docket is January 31, 2019. NASS intends to request that the surveys be approved for another 3 years.
