

mixed to create a fixed combination drug that offered additional medicinal benefits compared to taking each API alone. The first API, atovaquone, was not indicated for the prevention or treatment of malaria, the second API, proguanil hydrochloride, was used to treat malaria, but was less effective than Malarone. Because of the “synergies in [the APIs’] method of action,” which resulted in a product that “interfere[s] with 2 different pathways” to prevent and treat malaria, CBP held that the combination of atovaquone, proguanil hydrochloride, and inactive ingredients to form the Malarone tablets in Canada resulted in a substantial transformation.

In this case, to make the dietary supplement tablets, various ingredients from different countries of origin are mixed together based on a specific formula. This results in a finished product that differs from any of the individual ingredients. The vitamins and minerals are put together in one tablet for the purposes of creating a product that is designed to promote certain effects that are distinct from the effects if only the individual ingredients were taken. Similar to HQ H253443, the combination of the vitamins and minerals in a single tablet creates a product with a synergistic effect that promotes benefits that otherwise would only be possible by taking the individual ingredients separately. In other words, the combination of the various vitamins and minerals in one tablet results in a product that has an identity, character and use that is different from and more convenient to use than taking the individual raw materials. Accordingly, we find that the three Visionary dietary supplement tablets have a new name, character and use different from the individual vitamins, minerals, and the inert ingredients used in the production of the finished tablets. Therefore, we find that the country of origin of the Visionary Advanced 2 multiple vitamin and mineral dietary supplement tablets is the United States, where the manufacturing process take place.

HOLDING:

The country of origin of the Visionary Advanced 2 Coated Tablets, Visionary Orange Advanced 2 Chewable Tablets, and Visionary Cherry Advanced 2 Chewable Tablets for purpose of U.S. Government procurement is the United States.
