

habitats occupied by these two endangered butterflies. The HCP's area encompasses the counties of Berrien, Branch, Cass, Jackson, Oakland, Van Buren, and Washtenaw in Michigan and LaGrange County in Indiana. The covered activities include the following: Hydrology restoration, prescribed burning, mowing/hydro-axing, vegetation removal, biological control of invasive species, livestock grazing, seeding and planting, and butterfly surveys. The applicants have determined that actions associated with the maintenance and restoration of butterfly habitat has the potential to incidentally take the species. Both butterfly species could be injured or killed by the actions to maintain and restore their habitat.

The HCP's proposed conservation strategy is designed to minimize and mitigate the impacts of covered activities on the covered species. The biological goals are to complement the needed conservation actions to restore and conserve the species' habitat in Michigan and Indiana. The proposed action consists of the issuance of ITPs and implementation of the proposed HCP. Three alternatives were considered in the HCP. The proposed alternative in the draft HCP is the issuance of ITPs to the State of Indiana and the State of Michigan to authorize take of MSB and PS on private lands and public lands. The first alternative considered, but not selected, was restricting the HCP to public agencies only. However, this would miss the opportunity to work more efficiently with non-public landowners where the species frequently occur and thus result in fewer conservations actions to benefit the species. The second alternative considered, but not selected, was for the current status quo or no action (*i.e.*, only existing management techniques that are approved on a site-by-site, project-by-project basis under ESA section 7 consultation or 10(a)(1)(A) recovery permits). This alternative results in a lower efficiency, as each agency or organization develops and applies for individual permits or authorizations rather than being part of a coordinated effort. The quantity and quality of conservation actions is expected to be lower under the status quo than under the other alternatives considered. Under the proposed alternative, non-Federal cooperators who wish to conduct habitat management activities for the butterflies may participate through certificates of inclusion by agreeing to implement the conservation measures and other requirements of the HCP. The certificates of inclusion will be issued

by each State and will convey all of the ITPs incidental take authorization.

Our Preliminary Determination

We are requesting comments on our preliminary determination that the applicants' proposal will have a minor or negligible effect on the endangered butterflies and that the plan qualifies as a low-effect HCP as defined by our Habitat Conservation Planning Handbook (December 2016). We base our determinations on three criteria: (1) Implementation of the proposed project as described in the HCP would result in minor or negligible effects on federally listed, proposed, and/or candidate species and their habitats; (2) implementation of the HCP would result in minor or negligible effects on other environmental values or resources; and (3) HCP impacts, considered together with those of other past, present, and reasonably foreseeable future projects, would not result in cumulatively significant effects. In our analysis of these criteria, we have made a preliminary determination that the approval of the HCP and issuance of an ITP qualify for categorical exclusion under the National Environmental Policy Act (NEPA) (42 U.S.C. 4321 *et seq.*), as provided by the Department of the Interior implementing regulations in part 46 of title 43 of the Code of Federal Regulations (43 CFR 46.205, 46.210, and 46.215). However, based upon our review of public comments that we receive in response to this notice, this preliminary determination may be revised.

Next Steps

We will evaluate the permit application, associated documents, and comments we receive to determine whether the permit application meets the requirements of the ESA, NEPA, and their implementing regulations. If we determine that all requirements are met, we will issue permits under section 10(a)(1)(B) of the ESA to the MDNR and IDNR. We will not make our final decision on the permit application until after the end of the public comment period, and we will fully consider all comments we receive during the comment period.

Public Comments

You may submit your comments and materials related to the draft HCP, DEA, or other supporting documents by one of the methods listed in **ADDRESSES**. We request that you send comments by only one of the methods described in **ADDRESSES**.

Comments and materials we receive, as well as documents associated with

the notice, will be available for public inspection by appointment, during normal business hours, at the Michigan Ecological Services Field Office in East Lansing, Michigan (see **FOR FURTHER INFORMATION CONTACT**). Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in you comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22) and the NEPA (42 U.S.C. 4371 *et seq.*) and its implementing regulations (40 CFR 1506.6; 43 CFR part 46).

Dated: April 27, 2018.

Lori H. Nordstrom,

Assistant Regional Director, Ecological Services, Midwest Region.

Filing of Plats of Survey: Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Bureau of Land Management, Idaho State Office, Boise, Idaho, 30 days from the date of this publication.

Boise Meridian

Idaho

T. 6 S, R. 33 E,

Section 26, accepted August 29, 2018.

T. 36 N, R. 4 W,

Section 26, accepted August 29, 2018.

T. 13 N, R. 42 E,

Sections 7, 8 and 9, accepted August 29, 2018.

ADDRESSES: A copy of the plats may be obtained from the Public Room at the Bureau of Land Management, Idaho State Office, 1387 S Vinnell Way, Boise, Idaho 83709, upon required payment.

FOR FURTHER INFORMATION CONTACT:

Timothy A. Quincy, (208) 373-3981, Branch of Cadastral Survey, Bureau of Land Management, 1387 South Vinnell Way, Boise, Idaho 83709-1657. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at (800) 877-8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with Mr. Quincy. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION:

A person or party who wishes to protest one or more plats of survey identified above must file a written notice with the Chief Cadastral Surveyor for Idaho, Bureau of Land Management. The protest must identify the plat(s) of survey that the person or party wishes to protest and contain all reasons and evidence in support of the protest. The protest must be filed before the scheduled date of official filing for the plat(s) of survey being protested. Any protest filed after the scheduled date of official filing will be untimely and will not be considered. A protest is considered filed on the date it is received by the Chief Cadastral Surveyor for Idaho during regular business hours; if received after regular business hours, a protest will be considered filed the next business day. If a protest against a plat of survey is received prior to the scheduled date of official filing, the official filing of the plat of survey identified in the protest will be stayed pending consideration of the protest. A plat of survey will not be officially filed until the next business day following dismissal or resolution of all protests of the plat.

Before including your address, phone number, email address, or other personal identifying information in a protest, you should be aware that the documents you submit, including your personal identifying information, may be made publicly available in their entirety at any time. While you can ask us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Timothy A. Quincy,

Chief Cadastral Surveyor for Idaho.

Notice of Availability of the Final Supplemental Environmental Impact Statement for the Alpine Satellite Development Plan for the Greater Mooses Tooth 2 Development Project, National Petroleum Reserve in Alaska

AGENCY: Bureau of Land Management, Interior

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM), Arctic District Office, Fairbanks, Alaska, is issuing the Final Supplemental Environmental Impact Statement (EIS) for the Alpine Satellite Development Plan for the Greater Mooses Tooth 2 (GMT2) Development Project, National Petroleum Reserve in Alaska (NPR-A). The EIS supplements the September 2004 Alpine Satellite Development Plan Final EIS that originally analyzed the GMT2 Project, regarding establishing satellite oil production pads and associated infrastructure within the Alpine field.

DATES: The BLM will issue a Record of Decision for the application for permit to drill no earlier than 30 days from the date of the Notice of Availability published by the Environmental Protection Agency.

ADDRESSES: Requests for information regarding the Final Supplemental EIS may be mailed to: GMT2 Final Supplemental EIS, Attn: Stephanie Rice, 222 West 7th Avenue #13, Anchorage, Alaska 99513. The GMT2 Final Supplemental EIS is available online at BLM Alaska's website at <http://www.blm.gov/alaska>. You may also request an electronic or paper copy of the GMT2 Final Supplemental EIS by contacting Stephanie Rice, BLM project lead, at 907-271-3202.

FOR FURTHER INFORMATION CONTACT:

Stephanie Rice, BLM Alaska State Office, 907-271-3202. People who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The GMT2 Supplemental EIS analyzes an application from ConocoPhillips Alaska, Inc. (ConocoPhillips). The application is for a permit to drill and related

authorizations to construct, operate, and maintain a drill site, access road, pipelines, and ancillary facilities on federally managed land to support development of petroleum resources at the GMT2 drill site. BLM Alaska manages the surface and subsurface at the drill site and at the proposed infield road and pipeline route. ConocoPhillips may also develop subsurface resources owned by the Arctic Slope Regional Corporation, and may occupy surface lands owned by the Kuukpik Corporation.

The proposed GMT2 site is approximately 25 miles southwest of the ConocoPhillips-operated Alpine Central Processing Facility (CD1) and will be operated and maintained by staff at the Alpine Central Processing Facility.

The GMT2 Project was originally analyzed as the Colville Delta 7 (CD7) drill pad in the BLM's September 2004 Alpine Satellite Development Plan Final EIS. The purpose of the Supplemental EIS is to evaluate any relevant new circumstances and information that have arisen since the Alpine Satellite Development Plan Final EIS, to update the alternatives in the 2004 EIS, and to address any changes to ConocoPhillips' proposed development plan for GMT2. The GMT2 Final Supplemental EIS analyzes four alternatives, including two alternatives with an access road, an alternative without an access road, and a no-action alternative.

The Supplemental EIS will result in a Record of Decision (ROD) that will approve, deny, or approve with modification, ConocoPhillips' application, as well as incorporate any additional mitigation measures that may be appropriate. The Draft Supplemental EIS, published in March 2018, identified Alternative A, the Proponent's Proposal, as the BLM's preferred alternative. The Final Supplemental EIS also identifies Alternative A as BLM's Preferred Alternative.

The key issues in the GMT2 Final Supplemental EIS are the protection of surface resources; the minimization of social impacts; and the identification of appropriate mitigation measures for the construction, operation, and maintenance of a drill site and access road, pipelines, and ancillary facilities to support development of petroleum resources at the proposed GMT2 site.

Authority: 40 CFR 1506.6(b).

Karen E. Mouritsen,

Acting State Director, Alaska.
