**Foreign-Trade Zone (FTZ) 75—  
Phoenix, Arizona; Notification of  
Proposed Production Activity;  
Microchip Technology, Inc.  
(Semiconductor Devices and Related  
Products); Chandler and Tempe,  
Arizona**

Microchip Technology, Inc. (Microchip) submitted a notification of proposed production activity to the FTZ Board for its facilities in Chandler and Tempe, Arizona. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on August 28, 2018.

Microchip already has authority to produce semiconductor devices and related products within Subzone 75H. The current request would add foreign status materials/components to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status materials/components described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Microchip from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, for the foreign-status materials/components noted below, Microchip would be able to choose the duty rates during customs entry procedures that apply to: Field programmable microcontrollers; application-specific processors; related memory products; and, application development tools (duty rate ranges from duty-free to 3%). Microchip would be able to avoid duty on foreign-status components which become scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The materials/components sourced from abroad include: In-circuit debuggers; rubber caps; evaporative air coolers; antennas; plastic boxes, cases, crates, stoppers, lids and caps; memory modules—not incorporating a cathode ray tube; brushless DC electric motors; power supply, output < 50 watts; static converters; transformers; relay contactors; lamp-holder plugs; lamp sockets; electrical equipment for switching of electrical circuits; servo drive boards (for test floor probers); infrared lamps; printed circuit assemblies; coaxial cables; and, electrical conductors with fitted

connections (duty rate ranges from duty-free to 5.3%). The request indicates that certain materials/components are subject to special duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decision requires subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is October 15, 2018.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230-0002, and in the "Reading Room" section of the Board's website, which is accessible via [www.trade.gov/ftz](http://www.trade.gov/ftz).

**Large Power Transformers From the  
Republic of Korea: Notice of Final  
Results of Antidumping Duty Changed  
Circumstances Review**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (Commerce) finds that Hyundai Electric & Energy Systems Co., Ltd. (HEES) is the successor-in-interest to Hyundai Heavy Industries Co., Ltd. (HHI) and that HHI's current cash deposit rate is the applicable rate for all entries of the subject merchandise exported by HEES. In addition, we determine that facts presented in this changed circumstances review (CCR) warrant the retroactive application of the cash deposit rate to the effective date of the first entry by HEES.

**DATES:** Applicable September 5, 2018.

**SUPPLEMENTARY INFORMATION:****Background**

On August 31, 2012, Commerce published in the *Federal Register* an antidumping duty order on large power transformers (LPTs) from the Republic of Korea (Korea).<sup>1</sup> HHI was one of the producers/exporters reviewed in the less-than fair-value investigation and has been reviewed in each subsequent administrative review of the *Order*. During the 2014-2015 administrative review, covering the period August 1, 2014, through July 31, 2015, Commerce assigned HHI an antidumping duty rate of 60.81 percent, finding that the application of total adverse facts available (AFA) was warranted.<sup>2</sup> In addition, during the 2015-2016 administrative review, covering the period August 1, 2015, through July 31, 2016, Commerce continued to assign HHI an antidumping duty rate of 60.81 percent, finding that the application of total AFA was warranted.<sup>3</sup>

Pursuant to section 751(b)(1) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.216(d), on December 4, 2017, Commerce self-initiated a CCR regarding HHI's new spin off company, HEES, based on information obtained: (1) During the course of the 2014/2015 and 2015/2016 administrative reviews; (2) *via* public search and a phone conversation with a representative retained by ABB Inc.'s (ABB's or the petitioner's) counsel; and (3) from U.S. Customs and Border Protection (CBP) data.<sup>4</sup>

On May 31, 2018, Commerce issued the *Preliminary Results* of this CCR, in which it determined that: (1) HEES is the successor-in-interest to HHI; (2) HHI's current cash deposit rate is the rate applicable for all entries of LPTs exported by HEES; and (3) the application of the cash deposit rate applicable to HEES shall be made
