### SUPPLEMENTARY INFORMATION:

A. Federal Acquisition Regulation (FAR) Subpart 4.11 prescribes policies and procedures for requiring contractor registration in the System for Award Management (SAM) database to: (1) Increase visibility of vendor sources (including their geographical locations) for specific supplies and services; and (2) establish a common source of vendor data for the Government.

In the past, the GSA Office of Inspector General (OIG) conducted an investigation into fraudulent activities discovered within SAM. Certain bad actors have, through electronic means, used public information to impersonate legitimate entities and established new entity registrations for those entities in SAM. By establishing fraudulent entity registrations, bad actors submitted bids in certain U.S. Government procurement systems or shipped deficient or counterfeit goods to the U.S. Government.

GSA established a new Information Collection Request (ICR) to collect additional information to support

increased validation of entities registered and registering in the System for Award Management (SAM). This additional information is contained in a notarized letter in which an officer or other signatory authority of the entity formally appoints the Entity Administrator for the entity registering or recertifying in SAM. The original, signed letter is mailed to the Federal Service Desk for SAM prior to the registration's activation or re-registration.

The new ICR expires September 30, 2018, without authority for an extension. GSA is actively pursuing technical alternatives to the collection of this information for all non-federal entities. GSA seeks to refine the requirement and adopt a risk-based approach. This notice for an extension of the ICR lays the groundwork for the authority to continue collection of the information provided GSA is still pursuing the technical alternative beyond the ICR expiration date. In the interim, the collection of the notarized letter information is essential to GSA's acquisition mission to meet the needs of all federal agencies, as well as the needs of the grant community. A key element of GSA's mission is to provide efficient and effective acquisition solutions across the Federal Government. SAM is essential to the accomplishment of that mission. In addition to federal contracts, federal assistance programs also rely upon the integrity and security of the information in SAM. Without assurances that the information in SAM is protected and, is at minimal risk of compromise, GSA would risk losing the confidence of the federal acquisition and assistance communities which it serves. As a result, some entities may prefer not to do business with the Federal Government.

### B. Discussion and Analysis

A 60-day notice was published in the **Federal Register** at 83 FR 24312 on May 25, 2018. Two comments were received.

*Comments:* One respondent stated that it is already time-consuming and frustrating for our grantees to use the SAM registration process. If the process was simple, it would not be a problem; however, having to submit notarized documents in addition to an already difficult process affects our ability to nimbly respond to programmatic initiatives through small grants to organizations or individuals who we know and want to partner with to achieve our goals. The other respondent stated that the new procedure creates another challenge for our grantees in that mailing the notarized document requires extra effort, but also finding a
