**SUPPLEMENTARY INFORMATION:**

#### I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance process to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, the reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (see 29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with a minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining said information (see 29 U.S.C. 657).

#### II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary

for the proper performance of the agency's functions, including whether the information is useful;

- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply—for example, by using automated or other technological information collection and transmission techniques.

The information collection requirements specified in the Cadmium in General Industry Standard protect workers from the adverse health effects that may result from their exposure to cadmium. The major information collection requirements of the standard include: conducting worker exposure monitoring, notifying workers of their cadmium exposures, implementing a written compliance program, implementing medical surveillance of workers, providing examining physicians with specific information, ensuring that workers receive a copy of their medical surveillance results, maintaining workers' exposure monitoring and medical surveillance records for specific periods, and providing access to these records to the workers who are the subject of the records, the worker's representative, and other designated parties.

The agency is requesting a burden hour adjustment decrease of 2,636 (from 75,998 to 73,362 hours). The agency estimates a decrease of exposed workers in the cross-industry sectors as well as in the specific-industry sectors. On the other hand, the number of plants is estimated to increase slightly in both sectors. As a result, the operation and maintenance costs have increased from \$4,799,475 to \$5,453,858, a total increase of \$654,383, due to increased costs for exposure monitoring sampling and medical exams.

#### III. Proposed Actions

*Type of Review:* Extension of a currently approved collection.

*Title:* Cadmium in General Industry (29 CFR 1910.1027).

*OMB Control Number:* 1218–0185.

*Affected Public:* Business or other for-profits.

*Number of Respondents:* 50,679.

*Frequency:* On occasion; Quarterly; Biennially; Semi-annually; Annually.

*Average Time per Response:* Varies.

*Estimated Number of Responses:* 208,899.

*Estimated Total Burden Hours:* 73,362.

*Estimated Cost (Operation and Maintenance):* \$2,312,424.
