

Animal Plant and Health Inspection Service

Title: Virus-Serum-Toxin Act and Regulations in 9 CFR, Subchapter E, Parts 101–124.

OMB Control Number: 0579–0013.

Summary of Collection: The Virus-Serum-Toxin Act (37 Stat. 832–833, 21 U.S.C. 151–159) gives the United States Department of Agriculture, the Animal and Plant Health Inspection Service (APHIS) the authority to promulgate regulations designed to prevent the importation, preparation, sale, or shipment of harmful veterinary biological products. A veterinary biological product is defined as all viruses, serums, toxins, and analogous products of natural or synthetic origin (such as vaccines, antitoxins, or the immunizing components of microorganisms intended for the diagnosis, treatment, or prevention of diseases in domestic animals). In order to effectively implement the licensing, production, labeling, importation, and other requirements, APHIS employs a number of information gathering tools such as establishment license applications, product license applications, product permit applications, product and test report forms and field study summaries, event reports, stop distribution and sale notifications, and recordkeeping.

Need and Use of the Information: This information collection includes mergers with 0579–0209 and 0579–0460. APHIS uses the information collected as a primary basis for the approval or acceptance of issuing licenses or permits to ensure veterinary biological products that are used in the United States are pure, safe, potent, and effective. Failing to collect this information would severely cripple APHIS' ability to prevent harmful veterinary biologics from being distributed in the United States.

Description of the Respondents: Businesses or other for profit, Foreign and State Governments, Private Individuals.

Number of Respondents: 10,183.

Frequency of Responses: Recordkeeping; Third Party Disclosure; Reporting: On occasion.

Total Burden Hours: 122,998.

Animal and Plant Health Inspection Service

Title: Importation of Fruits and Vegetables.

OMB Control Number: 0579–0264.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701–7772), the Secretary of Agriculture is authorized to regulate the importation of

plants, plant products, and other articles to prevent the introduction of injurious plant pests. Regulations contained in Title 7 of the Code of Federal Regulations, Part 319 (Subpart—Fruit and Vegetables), Sections 319.56 *et seq.* implement the intent of this Act by prohibiting or restricting the importation of certain fruits and Vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of fruit flies and other injurious plant pests that are new to the United States or not widely distributed within the United States. These regulations are enforced by the Plant Protection and Quarantine, a program with USDA's Animal and Plant Health Inspection Service (APHIS).

Need and Use of the Information: The use of certain information collection activities including Phytosanitary Certificates, Trapping Records, Cooperative Agreements (PPQ 519), Application of Sterile Insect Technique, Monitoring, Safeguarding, Emergency Action Notification (PPQ 523), and Notice of Arrival (PPQ 368) will be used to allow the entry of certain fruits and vegetables into the United States. Without the information all shipment would need to be inspected very thoroughly, thereby requiring considerably more time and would slow the clearance of international shipments.

Description of Respondents: Business or other for-profit; Federal Government.

Number of Respondents: 65.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 381.
