k. *Description of Project Facilities*: The project includes the existing Williams Dam, which is currently owned and operated by the Indiana Department of Natural Resources. The dam is a 294-foot-long, 21.3-foot-high concrete structure with a full-length, uncontrolled spillway at a crest elevation of 472.2 feet North American Vertical Datum of 1988 (NAVD 88). The dam impounds a reservoir with a surface area of 553 acres and a gross storage capacity of 5,720 acre-feet. Integral with the dam is an abandoned 107-foot-long, 47-foot-wide concrete powerhouse that contains four inoperable, vertical-shaft turbines. An existing concrete intake bay structure for the powerhouse contains four inoperable 10-foot-wide by 14-foot-high vertical slide intake gates with the upstream water level maintained by bulkheads bolted to the intake divide

walls. Licensed but unconstructed facilities include: A refurbished powerhouse expanded to 107 feet long by 81 feet wide to accommodate a new trashrack and draft tube extension; a 126-foot-long, 44-foot-wide concrete and masonry superstructure constructed on top of the refurbished powerhouse substructure; a new 21.5-foot-high, 100-foot-wide steel trashrack with 3-inch clear bar spacing; new vertical Kaplan turbines that will each be coupled to a 1-MW generator unit for a total installed capacity of 4.0 MW; a new underground 4.16-kilovolt (kV) feeder line to connect the powerhouse to a new 40- by 40-foot substation; a new parking lot located adjacent to the powerhouse, and appurtenant facilities; and, a new 175-foot-long, three-phase 12.5-kV overhead primary transmission line.

l. *Description of Request*: The licensee proposes to surrender the project because it has been unable to secure a power purchase agreement that would allow the project to be constructed. No construction has occurred at the project since licensing. The project area would remain in its pre-licensed, pre-construction condition. No ground disturbing activities would occur as a result of this surrender.
