Abstract: The Environmental Protection Agency (EPA) is seeking renewal of a generic information collection request (ICR) for the conduct of focus groups and one-on-one interviews primarily related to survey development for economics projects. Focus groups are groups of individuals brought together for moderated discussions on a specific topic or issue. These groups are typically formed to gain insight and understanding of attitudes and perceptions held by the public surrounding a particular issue. One-on-one interviews, as the term implies, are individual interviews in which a respondent is generally asked to review materials and provide feedback on their content and design as well as the thought processes that the materials invoke. Focus groups and one-on-one interviews (referred to collectively as "focus groups") used as a qualitative research tool have three major purposes:

- To better understand respondents' attitudes, perceptions and emotions in response to specific topics and concepts;
- to obtain respondent information useful for better defining variables and measures in later quantitative studies; and
- to further explore findings obtained from quantitative studies.

Through these focus groups, the Agency will be able to gain a more in-depth understanding of the public's attitudes, beliefs, motivations and feelings regarding specific issues and

will provide invaluable information regarding the quality of draft survey instruments. Focus group discussions are necessary and important steps in the design of a quality survey. The target population for the focus group discussions will vary by project, but will generally include members of the public. Participation in the focus groups will be completely voluntary. Each focus group will fully conform to federal regulations—specifically the Privacy Act of 1974 (5 U.S.C. 552a), the Hawkins-Stafford Amendments of 1988 (Pub. L. 100-297), and the Computer Security Act of 1987.

Form numbers: None.

Respondents/affected entities: Individuals.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 864 (total) over three years or 288 per year.

Frequency of response: 1.

Total estimated burden: 1,728 hours total or 576 per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$20,920 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease of 1,017 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is based on new estimates of projected use of this ICR for focus groups for the next three years provided by the program offices at EPA.

Abstract: Section 3004 of the Resource Conservation and Recovery Act (RCRA), as amended, requires that EPA develop standards for hazardous waste treatment, storage, and disposal as may be necessary to protect human health and the environment. Subsections 3004(d), (e), and (g) require EPA to promulgate regulations that prohibit the land disposal of hazardous waste unless it meets specified treatment standards described in subsection 3004(m).

The regulations implementing these requirements are codified in the Code of Federal Regulations (CFR) Title 40, Part 268. EPA requires that facilities maintain the data outlined in this ICR so that the Agency can ensure that land disposed waste meets the treatment standards. EPA strongly believes that the recordkeeping requirements are necessary for the agency to fulfill its

congressional mandate to protect human health and the environment.

Form Numbers: None.

Respondents/affected entities: Private Sector and State, Local, or Tribal governments.

Respondent's obligation to respond: Mandatory (40 CFR part 268).

Estimated number of respondents: 79,096.

Frequency of response: On occasion.

Total estimated burden: 600,097 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$95,703,440 (per year), which includes \$49,372,275 in annualized capital or operation & maintenance costs and \$46,331,165 in annualized labor costs.

Changes in the Estimates: There is decrease of 46,358 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a decrease in the number of respondents from 90,500 to 79,096.
