

docketed by the NRC as of the date of issuance, as well as future applications submitted after the issuance of this regulatory guide. Such action would not constitute backfitting as defined in the Backfit Rule or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants or potential applicants, with certain exceptions described below, are not within the scope of entities that are the subject of the Backfit Rule or the relevant issue finality provisions in 10 CFR part 52. This RG may be used by existing holders of combined licenses and operating licenses in accordance with their existing licensing basis and applicable regulatory requirements.

The exceptions to the general principle are applicable whenever a combined license applicant references a 10 CFR part 52 license (*i.e.*, an early site permit or a manufacturing license) and/or 10 CFR part 52 regulatory approval (*i.e.*, a design certification rule or design approval). However, the matters addressed in this RG (monitoring the effectiveness of maintenance at nuclear power plants) have not previously been proposed for resolution in a 10 CFR part 52 license or regulatory approval. The NRC staff does not, at this time, intend to impose the positions represented in the RG in a manner that is inconsistent with any issue finality provisions in these 10 CFR part 52 licenses and regulatory approvals. If, in the future, the NRC staff seeks to impose a position in this RG in a manner that does not provide issue finality as described in the applicable issue finality provision, then the NRC staff must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

Further information on the staff's use of the RG is contained in the RG under Section D, "Implementation."

Dated at Rockville, Maryland, this 20th day of September, 2018.

For the Nuclear Regulatory Commission.
