FM Approvals LLC: Grant of Expansion of Recognition and Modification to the Nationally Recognized Testing Laboratory (NRTL) Program's List of Appropriate Test Standards

ACTION: Notice.

standards to the NRTL Program's List of Appropriate Test Standards.

DATES: The expansion of the scope of recognition becomes applicable on September 28, 2018.

FOR FURTHER INFORMATION CONTACT:

Information regarding this notice is available from the following sources:

OSHA's web page includes information about the NRTL Program (see <http://www.osha.gov/dts/otpca/nrtl/index.html>).

SUPPLEMENTARY INFORMATION:

I. Notice of Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition of FM Approvals, LLC, as a NRTL. FM's expansion covers the addition of 24 test standards to its scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified by 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition and is not a delegation or grant of government authority. As a result of recognition, employers may use products properly approved by the NRTL to meet OSHA standards that require testing and certification of the products.

The agency processes applications by a NRTL for initial recognition, or for expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding and, in the second notice, the agency provides the final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL that details its scope of recognition. These pages are available

from the agency's website at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

FM submitted an application, dated July 15, 2016, (OSHA-2007-0041-0008) to expand its recognition to include 28 additional test standards. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. In reviewing the application, OSHA determined that three of the requested standards had been withdrawn by the controlling standards development organization; therefore, OSHA cannot add those three standards to FM's NRTL scope of recognition. Additionally, one of the requested standards, ISA 60079-26, has been superseded by UL 60079-26, which was also included in FM's expansion application. Accordingly, OSHA will add the active standard, not the superseded one, and OSHA will grant recognition to 24 standards in the final expansion. OSHA did not perform any on-site reviews in relation to this application.

OSHA published the preliminary notice announcing FM's expansion application in the **Federal Register** on May 15, 2018, (83 FR 22523). The agency requested comments by May 30, 2018, but it received no comments in response to this notice. OSHA is now proceeding with this final notice to grant expansion of FM's scope of recognition.

To obtain or review copies of all public documents pertaining to FM's application, go to <http://www.regulations.gov> or contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N-3653, Washington, DC 20210. Docket No. OSHA-2007-0041 contains all materials in the record concerning FM's recognition.

II. Final Decision and Order

OSHA staff examined FM's expansion application, capability to meet the requirements of the test standards, and other pertinent information. Based on a review of this evidence, OSHA finds that FM meets the requirements of 29 CFR 1910.7 for expansion of recognition, subject to the specified limitation and conditions listed below. OSHA, therefore, is proceeding with this final notice to grant FM's scope of recognition. OSHA limits the expansion of FM's recognition to testing and certification of products for demonstration of conformance to the test standards listed below in Table 1.
