

presenting cells which are subsequently co-cultured with the patient's isolated T cells. Reactive T cells may be purified and expanded *in vitro* to generate an autologous cell therapy product. The expanded cells may be administered to the patient and mediate tumor regression.

This Notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published Notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information from these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Dated: September 18, 2018.

Richard U. Rodriguez,

Associate Director, Technology Transfer Center, National Cancer Institute.
