

- The victim's injury or condition substantially worsens, resulting in loss that was not previously compensated.

- The victim has incurred additional economic losses due to an eligible injury or condition.

- The claimant has information in support of the claim that was not submitted to the VCF when the award was determined and that the claimant believes would affect the amount of the calculated loss.

- The claimant needs to add, change, or remove the Personal Representative or parent/guardian on an existing claim.

- The claim was denied or deemed inactive because the claimant did not respond to the VCF's request for missing information and the claimant is now ready to provide the requested documents.

- The claimant has received the initial award determination on the claim and is seeking reimbursement for out-of-pocket medical expenses that total more than \$2,000.

- The claimant previously submitted a claim for one or more components of economic loss and now wants to withdraw that portion of the claim.

The VCF allows a claimant to file an amendment at any time before or after receiving an initial award determination, including after any payment has been made on the claim, so long as the amendment is filed before December 18, 2020. Section 5 (pp. 73–74) of the VCF's Policies and Procedures explains the amendments policy in detail.

Topic 8 Questions

A. What factors should the VCF consider to limit the filing of amendments? For example, should the VCF impose a temporal limitation, such that the VCF will only consider information and/or claimed losses that were not known to the claimant, or did not exist, at the time the original claim was filed?

B. What additional suggestions do you have for possible changes to the amendments policy and process that address the goals of preserving funds and ensuring that funding is prioritized for those with the most debilitating eligible conditions?
