

River on the Agreement's enrolled property, which is commonly known as the Hart Ranch. The Little Shasta River is a tributary to the Shasta River, which is a tributary to the Klamath River, California. The duration of the agreement and Permit 21008 is 10 years.

Permit 21008 authorizes the incidental taking of the covered species associated with routine agricultural activities, implementation of restoration/enhancement activities, and the potential future return of the enrolled property to the agreement's Baseline and Elevated Baseline Conditions. Under the Agreement, the permit holder specifies the restoration and/or enhancement, and management activities to be carried out on the enrolled property and a timetable for implementing those activities. NMFS reviewed the agreement and determined that the agreement will result in a net conservation benefit for the covered species and meets all required standards of NMFS' Safe Harbor Policy (64 FR 32717). The agreement adopts Baseline and Elevated Baseline Conditions (Section 3 of the agreement) and includes restoration/enhancement activities that will be completed by the permit holder to achieve the Elevated Baseline Condition. The agreement also contains a monitoring component that requires the permit holder to ensure compliance with the terms and conditions of the agreement, and to ensure the Baseline and Elevated Baseline levels of habitat for the covered species occur on the enrolled property. Results of the monitoring efforts will be provided to NMFS by the permit holder in annual reports for the duration of the 10-year permit term.

Near the end of the permit term and agreement, Permit 21008 authorizes the permit holder incidental take associated with a return to Baseline and Elevated Baseline Conditions if desired and in compliance with the terms and conditions of the Permit.
